Thakur Randhir Singh: Born in 1939 and married in 1972 to Thakurani Sushila Kumari daughter of Thakur Sher Singh of Delath and has a daughter named Meenakshi Kumari born in 1974 and married to Kanwar Yog Raj Singh of Kullu. Thakur Randhir is the son of Kanwar Fateh Singh and was the natural choice for family headship.

In 1948, Rawingarh was merged with Himachal Pradesh and at present is part of Jubbal tehsil of Shimla district.

The available Geneology of Rawingarh is:

1. Duni Chand, 2. Kanwar Singh 3. Tara Singh 4. Himmat Singh
5. Runa Singh (brother of Himmat Singh)
6. Bairagi Singh (Son of Himmat Singh, 1829)
7. Dhyan Singh (Died in 1857)
8. Hari Chand (Died in 1904)
9. Kedar Singh (born in 1876-1904, brother of Hari Chand)
10. Tikka Fateh Singh (born on 24th September 1906)

RATESH

Ratesh was a fief of Keonthal state, situated in 31° 3' North and 77° 25' East with an area of 12 square miles (nearly 20 sq. km.). The founder ruler of Ratesh principality was *'Rai Singh'*, brother of Raja Karam Prakash (1616-1660) of Sirmaur. Raja Karam Prakash gave five parganas along with Giri river to his brother. In the ancient time the ruling family adopted the title of *'Rana'* for itself.

The Ratesh Thakur was a feudatory of the Raja of Keonthal and was one of the smallest of the semi-independent rulers of these little states. Within the limits of this state he was supreme; but the capital sentence passed by him required the confirmation of the Superintendent of Shimla Hill states.

On the invasion of Gurkhas, Ratesh was a flourishing little kingdom. But when Ochterlony swept these hills, the ruler, Kishan Singh was a boy of 6 or 7 years of age, and exiled to Sirmaur and there was no one to look after his interests. Keonthal annexed four of the parganas of Ratesh and what remained was seized in 1920 by the Rana of Balsan. Subsequently the Keonthal Raja was required to restore the territory which finally formed the state of Ratesh Thakur. The last ruler of the state was Thakur Shamsher Singh, who succeeded in A.D. 1925. He was the one, who signed the document of accession with Himachal Pradesh.

The available Geneology of the state is as follows:

1. Rai Singh
2. Jeet Singh (Died in 1801)
3. Kishan Singh (Died in 1860)
4. Ram Singh (Died in 1890)
5. Hira Singh (Died in 1925)
6. Shamsher Singh (1925-48)

SANGARI

Sangari was a small principality among Shimla Hill States, lying between 31° 16' and 32° North and 77° 22' and 77° 28' East, on the South bank of the

Satluj, above Kotgarh and near Kumharsain, with an area of 40 square kilometre. The area of the state originally belonged to Bushahr. It was conquered by Raja Man Singh of Kullu, sometime during the first half of the 18th century.

Sangari was seized by Gurkhas in 1803 and restored to the Kullu Raja in 1815 by the British at the end of Gurkhas war. From 1803 to 1815, Kullu Raja used to pay tribute to the Gurkhas for Sangari area. In 1815, the area was restored by the British to **Bikram Singh**, who died in 1816 and succeeded by Ajit Singh. After the death of Ajit Singh in 1841, Ranbir Singh, minor son of Mian Jhagar Singh, who was the first cousin of Ajit Singh was tipped by the then Superintendent of Shimla Hill States to succeed to the *gaddi* of Kullu, before he could be installed as such, the child fell sick and died.

As a part of Kullu, Sangari was under the Sikh Government of Lahore until the annexation of the Jallandur Doab at the close of the first Sikh war in 1845-46. In 1840 the people of Kullu rebelled against the Sikhs and **Raja Jeet Singh** of Kullu was seized and ill treated by Sikhs. He was rescued and his captors massacred to the number of three thousand. Raja Jeet singh took refuge in Sangari, on the British side of the river and Kullu was lost to his branch family which retained Sangari under British protection.

Ajit singh died in 1841. His uncle Jagar Singh was next heir but was superceded being of weak intellect, by his son **Ranbir Singh** who died at *Mandi* on his way to Lahore to receive investiture at the hands of Maharaja Sher Singh. The Sikhs then selected **Thakar Singh** as Raja and gave him *Waziri Rupi* in Jagir. This was also recognised by the British Government. Jagar Singh, the imbecile was appointed Thakur of Sangari in 1841, which was separated from Kullu and incorporated with the Shimla Hill States. The state was then taken under British Management and remained so, until his death in 1876. Jagar Singh was succeeded by his son **Hira Singh**.

Rai Mian Hira Singh: Born on 24th February 1849, was Rai of Sangri from 1876 to 1927, succeeded on 30th September 1876. He was adopted by the senior Rani of Raja Ajit Singh and succeeded to her jagir of Seraj after her death. He was granted the title of Rai as a hereditary distinction in 1887 by the British. He married two sisters of the Mandi Royal family. He had three sons namely-Mian Dharam Singh (born in 1882), Rai Mian Raghubir Singh (born in 1908) and Mian Shyam Singh (born in 1909 and married Istly Kumari Padma Prabha, daughter of Kanwar Diwan Singh of Suket, married 2ndly Kumari Timawati, daughter of raja of Baragon) Mian Hira Singh died on 15th March 1927. Hira Singh afterwards claimed the Kullu Jagir but failed to recover it. He enjoyed an allowance of Rs. 1, 650/- annual from one of the *ex-Ranis* of Kullu, who adopted him.

In 1887, the hereditary title of *Rai* was conferred on Hira Singh. He exercised administrative powers within the limits of his state, subject to the control of the Superintendent of the Shimla Hill States, No tribute was levied and the income was only Rs. 2000/- per annum. Rai Hira Singh died at the age of 78 in 1927 and was succeeded by his son Rai Raghuvir Singh, born in A.D. 1909.

Rai Mian Raghubir Singh: Was born in 1908, Rai of Sangri from 1927 to 1962. He had marital relations with three thakurais. i.e Rani Saraswati Kumari daughter of Rana Jai Singh of Kotkhai, Rani Sharda Devi daughter of Thakur Amog Chand of Khaneti, Rani Chitra Kumari daughter of Kanwar Mangal Singh of Koti and

Rani Krishna Kumari daughter of Kanwar Inder Singh of Koti. He died in January 1962. He was officially the last raja of Sangari. In 1948 Sangari became part of Mahasu district of Himachal Pradesh.

Rai Mian Digvijay Singh: Born in 1955, was the son of Mian Shyam Singh. He was Rai of Sangri from 1962 to 1990. At the time of Rai Mian Raghubir Singh's death, Digvijay Singh was the senior most male member in the family, he was declared the head of the Sangari Thakurai. He married to Rani Dayavati Kumari daughter of Thakur Pratap Singh of Kotgarh and has two daughters, namely Kumari Samriti and Kumari Samridhi. Mian Digvijay Singh died in 1990.

GENEOLOGY OF SANGARI

(1) Man Singh (1688-1719) (2) Raj Singh (1719-1731)
(3) Jai singh (1731-1742) (4) Tehdi Singh (1742-1767)
(5) Preetam Singh (1767-1803) (6) Gurkha Period (1803-1815)
(7) Vikram Singh (1815-1816) (8) Ajit Singh (1816-1841)
(9) Ranbir Singh (1841-1844) (10) Jagar Singh (1844-1876)
(11) Rai Heera Singh (1876-1972) (12) Rai Raghuvir Singh (1927-1948)

KEONTHAL

Keonthal state was lying between 30° 55' and 31° 13' North and 77° 10' and 77° 25' East. It had an area of 260 sq km., and occupying *sixth position among Shimla Hill States.* It was surrounded by Theog, Balson and Sirmaur in the East; Patiala, Koti and Shimla in the West and Patiala, Koti and Madhan state in the North. Subordinate to the Raja of Keonthal were the five petty states of *'Koti', 'Theog', 'Madhan', 'Ghund'* and *'Ratesh'*, each paying a small annual tribute, though in many respects practically independent.

The state is said to have been founded around 1211 A.D. by Giri Sen (also mentioned at some places as Tomar Sen) who was younger brother of Bir sen, the founder of Suket state. At one time, the state was the largest state, next to Kullu. The founders of 'Suket', 'Mandi', 'Keonthal' and 'Kishtwar' were from the common *Sen dynasty of Bengal.* Bir Sen, Giri Sen and Hamir Sen the sons of Rup Sen, after their father's fatal encounter with the Mohammdans at Ropar in A.D. 1210, fled to the hills and settled in Suket, Keonthal and Kishtwar respectively.

The history of Keonthal state is available in fragmented and incohesive form without much to discussion. In 1379 when Feroz Shah Tughlaq attacked Punjab Hill States, Sirmaur and Keonthal also came under his control temporarily.

There are references in the folklores and folktales that Keonthal was in conflict with its neighbouring states, Bushahr and Hindur, ^eksb;k dh gkj* (Defeat of Moia) and ^ns'kq dh gkj* (Defeat of Deshu) are folktales related to *'Keonthal-Sirmaur'* conflict, while ^enuk* (Madna) folktales is related to the conflict between *'Keonthal'* and *'Kahlur'*. This conflict probably took place in A.D. 1680.

In 1800 A.D. just before Gurkha invasion, Keonthal is said to have been the overlord of some eighteen petty *Thakurais.* These were--*Koti, Ghund, Theog, Madhan, Mehlog, Kuthar, Kunihar, Dhami, Tharoch, Sangari, Kumharsain, Rajana, Khaneti, Maili, Khalsi, Baghari, Deeghyali and Ghat.*

In 1809 A.D. when Gurkhas attacked Keonthal, Rana Raghunath Sen fled to

Suket where he subsequently died. He was survived by an infant son, Sansar Sen, to whom in 1814, the state was restored by the British government. In the course of Gurkhas invasion many of the Thakurais contrived to free themselves from the overlordship of Keonthal, while others became absorbed in Keonthal or in other states of the area which remained in Keonthal. In 1814, eight *parganas* were ceded to government by chief's representatives, in lieu of a money contribution towards the expense of the Nepales war. These were sold later to Patiala in return for a cash payment of Rs. 2.80.000/-.

By a *sanad* of September 1815 the chief of Kenothal was invested with authority over the Thakurais of *'Theog', 'Koti', 'Ghund', 'Kiari'* (or Madhan) the chiefs of which were required to regard him as their overlord and to pay him tribute. By another *Sanda* the pargana of *'Punar'* was conferred upon Keonthal. This *sanad* is dated 1823. though the transfer was actually authorized in 1816. This transfer was made by the British. owing to the turbulent character of Punar's inhabitants and in position of the British government to extend its territories in the hills.

In A.D. 1830 a part of the district of Rawingarh, which had been retained by government in 1815 was conferred for Shimla. In 1830, the present station of Shimla was formed by the acquisition of portions. The Jagirdars of Rawain, Dhadi and Nandpur in the Rawingarh district were however exempted from this exchange, A *sanad* was promised to the Keonthal chief on the occasion of this exchange, but it does not appear to have been issued.

The Keonthal chiefs were formerly styled *'Rana'* upto 1857, but were raised by the British government to the rank of *'Raja'* in 1857, and Sansar Sen was given a *'Khilat'* of Rs. 1000/-, in exchange for his loyal behaviour at the outbreak of 1857 mutiny. Many Europeans who had fled from Shimla to Keonthal, were given shelter by the Rana of Keonthal. The Keonthal family was connected by marriage with *Dhami, Khairgarh of Oudh* and the *Raja of Sirmaur.*

Raja Sansar Sen: He was 72nd Raja of Keonthal from 1831 to 1862, born in Suket and was granted hereditary title of 'Raja' in 1858, for his part played during the revolt of 1857. He married to a rani of Bushahr and had a son, Mahendra Sen. Raja Sansar Sen died in 1862. Raja Sansar Sen died in 1862 and was succeeded by his son *Mahendra Sen.*

Raja Mahendera Sen: Born in 1827, the 73rd Raja of Keonthal from 1862-1882, he succeeded in paying off a debt inherited from his father. He married four wives, two from Dhami and two from Kuthar. He had six son and two daughters, namely-Raja Balbir Sen (born in 1852), Kanwar Hira Singh (born in 1857 and died in 1892), Kanwar Surat Singh (born in 1862 and died in 1923), Kanwar Sahib Singh or Shiv Singh (born in 1863 and died in 1917), Kanwar Randhir Singh (born in 1864 and died in 1916), Kanwar Mohan Singh (born in 1866, wazir of Keonthal in 1937, had two wives, one from Burail the present day Chandigarh and other from Bhajji). Both daughters of the Raja Mahendra Sen were married to Raja Samsher Prakash of Sirmaur. Mahendra Sen died in 1882 and succeeded by his son Balbir Sen. In 1882, was succeeded by his son *Balbir Sen.*

Raja Balbir Sen: 74th Raja of Keonthal, born in 1852 occupied the gaddi from 1882-1901, the actual coronation took place on 23rd August 1882. The main feature of his reign was internal disorder, resulting in the appointment of a British government manager in 1889. He married a Rani from Khairigarh Singhai, had two

son and two daughters; they were-Tikka Ugar Sen (born in 1875, married a daughter of Raja Amar Chand of Bilaspur, died in 1892), Bijey Sen (born in 1887) and both daughters were married to Tikka Hari Raj Singh of Kashipur. Raja Balbir Sen died on 18th March 1901.

In A.D. 1884, in return for an annual payment of Rs. 3,500/- he ceded full jurisdiction over an area of 50 acres of land known as *Kasumpati*, which adjoins the municipality of Shimla. Raja Balbir Sen died in 1901 and was succeeded by his son Bije (Vijay) Sen.

BIJAY SEN: Raja of Keonthal from 1901 to 1916. He was born on 13th September 1877 and succeeded to the throne on 18th March 1901. He was invested with full ruling powers on 26th June 1902. He in 1901 year ceded full jurisdiction over lands within the state required for Kalka-Shimla Railway. He attended the Coronation Durbar of their Imperial Majesties, King George V and Queen Mary at Delhi in 1911, married 1stly, 1900, daughter of Raja Raghunath Singh of Guler, married 2ndly 1900, another daughter of Raja Raghunath Singh of Guler, married 3rdly 1904, Rajkumari Indumati Devi of Jubbal, eldest daughter of Rana Padam Chand of Jubbal, married 4thly 1904, the second daughter of HH Rana Padam Chand of Jubbal, and had five children. His children were-Rajkumari Kamrendra Mati (born on 20 March 1901 and married to Maharaja Narendra Shah of Tehri Garhwal) Rajkumari Indu Mati Devi (born in 1902 and also married to Maharaja Narendra Shah of Tehri Garhwal), Rajkumari Vidyawati Devi (married to the Tikka of Vizanagram Alaka Narayana Gajapathi Raju) and Rajkumar Inder Vikram Singh (born in 1911, married to Kumari Indu Mati Devi, daughter of Kanwar Shamsher Singh of Kotkhai, died in 1991). He died on 2nd February 1916.

HEMENDRA SEN: Raja of Keonthal from 1916 to 1940. He was born on 21st January 1905, succeeded to the throne on 2nd February 1916, educated at Aitchison's Chiefs College, Lahore; C.S.I. [1936]; married 1stly in 1924, Rani Vindheshwari Devi, daughter of Rao Bahadur Raja Harpal Singh of Alipura, married 2ndly, Rani Prasan Kumari of Sayla, and had two sons (Raja Hitendra Sen and Rajkumar Dalip Singh) and a daughter (Rajkumari Tara Devi). He was invested with full powers in 1926. The state maintained a local force of 36 men, with one serviceable gun, which was later reduced to a force of 12 armed police. The Raja was entitled to be received by the Viceroy. The state was liable to the operation of *'Nazarana'* rules upto 1911, when on the occasion of the coronation Durbar all such levies were abolished. He died in 1940. He was succeeded by his son, the last ruler, Hitendra Sen.

HITENDRA SEN: Raja of Keonthal from 1940 to 1948. He was born on 13th September 1925, married 1stly in May 1944, Rajkumari Shanta Devi, she died in July 1960, daughter of Rana Krishan Chand of Kuthar, and his wife, Rani Krishna Devi. Married 2ndly in 1964, Kumari Sheela Kumari, daughter of Kanwar Ranjit Singh of Koti in Himachal, and had four sons(Tikka Jogendra Sen, Rajkumar Arun Sen, Raja Veer Vikram Sen and Rajkumar

Prithvi Vikram Sen) and two daughter (Rajkumari Sudha Kumari and Rajkumari Pratibha Kumari). He died on 13th December 2002.

VEER VIKRAM SEN: Present owner of Keonthal since the 13th of December 2002. Born on 6th April 1965 in Junga, became Tikka of Keonthal on the death of his elder brother in 1981 and Raja of Keonthal on the death of his father on 13th December 2002. Married on 18th February 1994 in Junga to Kumari Vijay Jyoti, who was born on 14th September 1971 in Khaneti, daughter of Rajkumar Tilak Raj Singh of Khaneti.

In 1948 Keonthal became part of Mahasu district of Himachal Pradesh and at present is with Shimla district.

75. Vijay Sen (1901-16) 76. Hamendra Sen
77. Hatendra Sen (1942-47)

GHUND

Ghund was a fief of the *'Keonthal State'*, lying between 31° 2' and 31° 6 North and 77° 27' and 77° 33 East with an area of 28 square miles (nearly 46 sq. km.). This was founded by one Jan Jaan Singh sometimes in the 17th century. Nothing much is available about the early history of Ghund. After the expulsion of Gurkhas the British put it under the control of Keonthal. The chief exercised full powers, subject to approval of the Superintendent, Shimla Hill States in cases of sentence of death.

Thakur Ranjeet Singh succeeded to the *Gaddi* of his father Thakur Kishan Singh in 1907 but upto 1901, when he was granted administrative powers the state was governed by the Manager of Khaneti, subject to control of the Superintendent of Hill States. During Praja Mandal movement the Thakur banned the entry of Praja mandalists in the territory. Finally on 15th April 1948 Ghund became a part of Mahasu district of Himachal Pradesh.

GENEOLOGY OF GHUND

(1) Jan Jaan Singh (founder)
(2) Ram Dass (Died in 1866)
(3) Kishan Singh (grand son of Ram Dass, Died in 1907)
(4) Ranjeet Singh (After 1907)

MADHAN

'Madhan', 'Ghund' and *'Theog'* all three principalities are said to have common origin. It is said that a Chandel Rajput of Jaipur, while on pilgrimage to Badrinath, settled at Ram Sarai in Garhwal because of his liking for hill country. It is also said that after his movement to Kahlur in the time of Raja Bhim Chand around A.D. 1667, his sons moved to upper Shimla Hills. His three sons *'Jais Chand', 'Jajan Singh'* and *'Bhup Singh'* founded respectively Theog, Ghund and Madhan states.

Madhan a fief of Keonthal was lying between 31° 6' and 31° 12' North and 77° 21' and 77° 26' East, with an area of 9 square miles (nearly 15 sq. km.). A tribute of Rs. 250/- was paid to Keonthal state by the Thakurs of Madhan who ruled over half a dozen small villages between *Phagu* and *Matiana* to the North of the road between Shimla and Kotgarh.

In the beginning, this principality also remained under the control of Kumharsain. Gurkhas annexed Madhan in 1810 and it continued under their control till 1815, when British government put it under the control of Keonthal state. After the death of Vishan Chand in 1905, his minor son Randhir Chand succeeded to the throne. During his minority, the state was administered by a council which exercised full powers, but sentence of death required confirmation of Superintendent of Shimla Hill States.

GENEOLOGY OF MADHAN

(1) Bhup Singh (Bhup Chand) (2) Dharam Chand
(3) Nakul Chand (Died in 1839) (4) Sansar Chand (Died in 1868)
(5) Vishan Chand (Died in 1905) (6) Randhir Chand (1905)
(7) Devinder Chand (Born in 1935) (8) Narendra Singh

On 15th April 1948, Madhan was merged with Theog and became part of Mahasu district of Himachal Pradesh. At present it is in district Shimla.

THEOG

Theog was a fief of Keonthal state lying between 30° 4' and 31° 9' North and 77° 21' and 77° 31' East. It was founded by Jayas Chand in the 17th Century. Like any other Thakurais, Theog was also under Gurkhas possession from 1810 to 1815. In 1815 when Gurkhas fled from the scene it was put under the control of Keonthal state. The Keonthal Raja had no power of interference so long as the Thakur was not in arrears with his tribute. The latter exercised full criminal and civil jurisdiction within the limits of his state; but capital sentences required the confirmation of the Superintendent of Shimla Hill States.

Thakur Bhup Singh, great grand father of Padam Chand was removed in 1856 for misconduct and his son Hari Chand was appointed in his place. A grant of Rs. 500 per annum was made to his father who died ten years later. Thakur Hari Chand married the daughter of Rana of Balsan. He died in 1893 and was succeeded by his son Thakur Shamsher Chand, who died in 1909. Padam Chand succeeded his father Shamsher Chand in 1909 and followed by his son Karan Chand and grandson Krishan Chand.

On 15th April 1948, when Himachal Pradesh was formed Theog state was formed into a tehsil of Mahasu district. At present it is a tehsil of Shimla district.

GENEOLOGY OF THEOG

(1) Jayas Chand (2) Bhup Chand
(3) Hari Chand (4) Shamsher Chand (1893-1909)
(5) Padam Chand (1909) (6) Karan Chand
(7) Krishan Chand

KOTKHAI THAKURAI

Kotkhai was founded by the scion of Kumharsain state, named Ahimal Sing. Owing to its small size, Kotkhai Thakurai was constantly under the threat from Bushahr, Kumharsain and Kullu states. For ten years Kotkhai remained with Kullu and then annexed by Bushahr and retained it for nearly 40 years or probably till the invasion of Gurkhas.

Like other *Thakurais* Kotkhai and Kotgarth also remained under Gurkha's possession. The Rana of Kotkhai used to pay Rs. 6000 annual tribute to

Gurkhas. After the expulsion of Gurkhas, it came under the control of British, who returned Kotkhai to Rana Ranjit Singh and retained Kotgarh with them.

Rana Ranjit Singh was a cruel and wicked ruler, who was constantly in confrontation with the British. Rana Ranjit Singh died in 1821 and was succeeded by Bhagwan Singh, who was not less than his predecessor in any of the negative qualities. In 1826, when tension reached at its zenith between Rana and the public, the British government finally annexed Kotkhai and made it part of British rule in India. Kotkhai at present is a part of Shimla district with the status of a tehsil.

KARANGLA

Karangla was founded by one Sansar Chand, the scion of Kumharsain state. Owing to its small size it was a fief of Bushahr. After Gurkhas invasion, it was finally merged with Bushahr state and now forms the part of Himachal Pradesh.

SAIRIE

Sairie was founded by the second son Mool Chand (in the 12th century) the last ruler of Sirmaur named Ugra Chand on the right bank of the river Pabbar. The whole history of Sairie is available through folktales and folklores. Nothing is available in writing. It seems that whenever Bushahr state found it opportune, it attacked Sairie and kept it under its control. Rohru was also under Sairie Thakurais. Probably the last ruler of Sairie was Puran Singh, who died while fighting against Gurkhas. He died without leaving an heir. Ultimately, the *rani* took over the control of administration in her own hands. After *Rani's* death in 1864 the British government handed over Sairie to Bushahr as *Nazarana*. At persent it is a part of Shimla district.

FAIRS IN DISTRICT SHIMLA

Bharara Fair : This fair is held in village Bharara near Kumharsain and people of all castes and creed participate. The fair is held on the 1st of Jaistha (May), It is being celebrated from ancient times. Devta Koteshwar is brought in the fair and goats are sacrificed (now banned by High court in 2014) in its honour as a mark of respect. The fair is cultural and recreational and 'Natti' dances are performed.

Bhoj Fair : This fair is held in village Guman in Rohru tehsil in the month of November for three days in honour of Devta Bansor, Parshu Ram and Kilbaru. Devta Bansor is the presiding deity. Beside paying homage to the deities 'Natti' dances are performed by the people. The fair attracts a huge crowd.

Lavi Fair : Lavi fair of Rampur is the most important fair of the district and state. It is a commercial fair held on the 25th of Kartika (November). It is said that the fair was related to the signing of trade treaty between the erst-while Bushahr State and Tibet.. The shepherds of Kinnaur migrate to warmer

places before the onset of winter and on their way they halt at Rampur. The woollen goods, dry fruits and medicinal herbs brought by them are purchased by the people and the traders of the plains and food grains, clothes and utensils are sold. It is a very old fair and entirely related to the sale and purchase of goods. 'Natti' dances and cultural shows are the main attractions.

Mahasu Jatar : This fair is celebrated at a place about 6 Km. from Shimla-Kotkhai road near Mahasu village on the 3rd Tuesday in the month of Baisakha (May) for two days. The fair is a very old one and is held in front of the Durga Devi temple by a large gathering who throng the place from the neighbouring areas. It is believed that a Rana of Badoli lived in Chakroth near Mahasu. He had built Durga temple there. After the abolition of his jagir the Rana left the village and the villagers of Mahasu constructed a temple of Durga in their own village and to commemorate the occasion they started the fair. 'Natti' dances and folk songs are performed. Archery game is the main attraction of entertainment. At the end of the fair a goat is sacrificed.

Pathar-Ka-Khel-Halog : This fair is held in village Halog of tehsil Shimla. Halog was the capital of erstwhile Dhami state. The fair is held on the second day of Diwali in the month of Kartik (November). In ancient times human sacrifice, it is said, used to be offered to goddess Kali every year at the spot where the fair is now held. It is also said that on this day the widow of a ruler of the state performed 'Satti' and that before doing so she had ordered to make human sacrifice henceforth. Human sacrifice was stopped after sometimes. Stone throwing fight between two parties is the main attraction of the fair and whatever blood oozes out from the wounds caused by injuries on the bodies of the participants is collected and offered to the Kali.

Sipi Fair : This fair is held every year in Sihpur below Mashobra on the 1st of Jaistha (May) in honour of Sip Devta. It is very old fair and the Rana of Koti used to be the chief visitor. Thousands of people of the surrounding areas participate in the fair. A goat is slaughtered in honour of the deity. Archery game is played besides several cultural programmes, variety shows, 'Karyala', Performance of the jugglers, magicians and acrobats provide additional entertainment to the spectators.

Summer Festival : It is held every year in the month of May at Shimla. It is variety cultural function with performance of local folks, cultural program by school children and daily performance by some famous personality. It is held on the famous ridge ground.

Winter sports festival : Ice-skating in Shimla is a big attraction for the sports-lovers during winter. Shimla is the only place in Asia which has the privilege of having a natural Ice-skating rink of the kind and offers a popular pastime to the participants and on lookers alike. Ice-skating normally begins in early December and carries on to February. Clear skies and low temperatures provide series of uninterrupted sessions. There are two sessions every day, in the morning and in the evening depending upon the frozen ice on the

ground . The hanging balloon on the Municipal Building adjacent to scandal point works as signal , whether the skating is going to be held on that day or not. Membership is available for the season as well as for shorter terms and even for single sessions. Skates are available at the rink. Fancy dress carnivals, 'gymkhanas' ice-hockey and dances enliven every season.

Rohru Fair : This fair is held in Rohru on the 9th and 10th of Baiskha (April) on the banks of river Pabbar in honour of Devta Shikru. People of nearby villages are the devotees of the Devta. It is very old fair and is held to commemorate the supremacy of the deity. This fair is also a commercial one and apart from the performance of 'Natti' dances and cultural activities, brisk trading is also done. Men and Women costumed in their best attire participate in the fair.

The climate of the district is sub-tropical in the valley and tends to be temperate in the hilltops. There are four major seasons. The winter season commences from October to February and ends in March; summer season extends from March to June followed by the monsoon period extending from July to September. Maximum precipitation occurs during the months from July to September. Average annual rainfall in the district is about 1253 mm. In the winter season precipitation as snowfall also occurs in the higher reaches and as rainfall in low hills and valleys of the district. Mean maximum and minimum temperature ranges between 33.3° C and –3.1°C.

Shimla district presents an intricate mosaic of high mountain ranges, hills and narrow deep valleys with altitude ranging from 1000 to 3000 m above mean sea level. In the areas underlain by high hill ranges of Himalayas, the valleys are narrow and deep with steep slopes trending in NW-SE direction. The terrain is moderately to highly dissected with steep slopes. The altitude is higher in northeastern parts and decreases towards south and west Shimla district is drained by streams/rivers forming part of the drainage basins of the Satluj, the Yamuna, the Pabbar and Tons rivers. However, major part of the district is drained by tributaries of Satluj river viz., The Satluj river is the longest river traversing along the northern boundary of the area and Giri river which is the tributary of the Yamuna river originates from the eastern part and runs in the SW direction. Whereas tributaries of Tons river flows in the southern parts and the Pabbar river in the eastern parts of the district. In general the density of drainage is moderate to high and is not uniform all over the district. Soil is generally sandy loam in valley areas of the district and in rest of the hilly and mountainous areas soil is skeletal, soil depth is generally shallow except in areas having good vegetative cover. It is generally dry, shallow and deficient in organic matter.

Landslides are the common features in mountainous terrain. Soils are rich in nutrients and thus are fertile. Major parts of the district are hilly & mountainous with highly dissected and undulating terrain. These areas are underlain by consolidated hard rocks of Proterozoic period. Ground water potential in such areas is very low due to its hydro-geomorphic set up. Springs are the

main ground water structures that provide water for domestic and irrigation in major rural and urban centres. Springs in the district are mainly gravity, contact or fracture type and springs located along major thrust/faults or structurally weak planes are high yielding. The springs, locally called *Chasma*, discharges varies from seepages to as high as ten liters per second. *Bowries*, a type of dug well, are another structure constructed in the hill slopes to tap the seepages. Such Bowries are very common and observed all over the district.

DECADEL VARIATIONS IN POPULATION SINCE 1901-2011

Year	Persons	Males	Females	Decadel variation	Percentage Decadel Variation	Females per 1000 of males

SHIMLA - THE CAPITAL

Shimla is the capital town of Himachal Pradesh. It was formerly the summer capital of the government of India, situated on a transverse spur of the central Himalayan system 31° 06' North and 77° 10' East at a mean elevation of 7262 feet (2421 meters) above mean sea level. The town of Shimla is built over several hills and connecting ridges. The important hills are Jakhu (8050 feet), Prospect Hill (7140 feet), Observatory Hill (7050 feet), Elysigim Hill (7400 feet) and Summer Hill (6900 feet). The scenery in the immediate neighbourhood of Shimla presents a number of magnificent views. Northwards the sight opens into a medley of mountain chains crowned in the distant by a crescent of snowy peaks standing out boldly against cobalt blue sky. On the South, the view opens up to the plains of Ambala.

The strata on which Shimla is located are coeval with some of those of *'Alps'* and the basic structure is a layer of shale, formed probably in the carboniferous period under sea-bottom, quite expansive and extending along the mountains in a band several miles broad. The geniss granite is lying under Shimla shale, is evident from the structure of the inner hills. The presence of hot water sulphur springs in the Satluj Valley is the indication of still persisting pristine volcanic activity. The climate of Shimla is most beautiful and delightful, representing something like European conditions in India and providing a wonderful opportunity to the visitors to enjoy its scenic beauty all-around the year. There are four seasons. The winter (December to February), the summer (March to June), the rainy season (July to September) and in the middle of September when monsoon starts withdrawing, a fine weather prevails in and around Shimla hills. The mean annual rainfall of Shimla is 76 inches, most of which falls during the rainy season.

HISTORY

There is a great controversy over the origin of the name Shimla. Many versions are there to support its origin. *According to one, the name Shimla was derived from 'Shyamalaya' meaning 'Blue house' said to be the name of the house built of blue slate by a faqir on Jakhu. Other say that 'Shumlah' 'Shimlu' or 'Shemlah' is the actual native word from which the station takes its persent designation. According to one version, Shimla really pronounced as Shimla takes its name from 'Shimla' meaning a blue female, another name for well known goddess Kali. In the past, at a site very near to the ROTHNEY CASTLE, on the Jakhu hillside, there was a small temple dedicated to this goddess. Later on sometimes during the British period, the image of the goddess was removed to the present site of Kali Bari.* The version of goddess 'Kali' seems to be the most appropriate and authentic, keeping in view the fact that the people of these hills and their ruling chiefs were chiefly worshippers of Shakti and Shiva, both symbols of power.

History of Shimla goes back to the period of Anglo-Gurkha war in the beginning of 19th century. Shimla, as the summer capital of India, provided an escape not only from heat but also from native culture of the plains. *If an English official was unable to go on long leave to England, he came to Shimla.* It was the most wanted refuge from relative isolation of crowded culture of district and cantonments. Shimla's atmosphere was that of an oversized English club. The dominant characteristics of British Shimla was its contempt for all things of India. 'The Mall', a crescent shaped promenade was according to vivid description reserved for the 'Europeans'. No load carrying porter was allowed to use it, nor any ill dressed Indian either, in 'the day time'. Some relaxation was provided only in 'the night time'.

The first mention of Shimla, a middle-sized village, comes in 1817 from the diary of the Scottish Officers (Brothers), Lt. Patrik and Alexander Gerrad. The earliest available records also reveal that the area formed a part of the Keonthal State at the turn of the 18th century. The British connection with the area developed only after battle between the Sikhs and the Gurkhas in 1808-09 A.D. The Sikh army inflicted crushing defeat on Gurkhas and drove them deep into the hills of the Satluj Valley. According to the British version, the Gurkhas continued their terror spreading technique, which resulted in the invitation to the British by local people to provide protection and security against excesses of the Gurkhas. A small British force under Major General 'Sir David Ochterlony' was dispatched to liberate the hill men from Gurkhas. Majority of Hill Chiefs responded to the call and joined the British forces. The rivals were engaged in the toughest battle at 3750 feet, high 'Ramgarh Fort' at Nalagarh. A decisive battle took place near the fort at Malaon in which superior guns of the British overpowered the enemy. Their leader 'Bhagta Thapa' was slain and the British captured the fort. The British with their tradition of honouring, the valiant, *raised the first Gurkhas Rifles in the Malaon Fort.* It was the first Gurkha battalion to enter the British army and till today retains the name of *'Malaon Rifles'.* At some places, there is also reference about *'Nasiri Battalion',* welded together from fragments of the defeated Gurkha forces, was posted at the forts of *'Subathu', 'Kotgarh', 'Ramgarh',* and *'Sandoch'* retained by the company.

The battle of Malaon on 15th May 1815 ended the dream of the Gurkhas, to rule over this part of the land for any longer. After few days, an official declaration was made according to which all Chieftains who had joined British in expelling Gurkhas were restored with their land under the British protection. The Maharaja of Patiala who had also rendered invaluable services to the British was rewarded with land in the neighbourhood of the area now comprising Shimla. In a series of well planned maneuvers in 1814-15, the Gurkhas were defeated and forced to sign the 'TREATY OF SANGAULI'. The company retained the strategic forts of *Subathu, Kotgarh, Ramgarh and Sandoch.*

During war period, Shimla remained unnoticed. It was only in 1819 A.D.

that the then Assistant Political Agent of hill states, Lt Ross, set up first British residence, a mere cottage of wood. His Successor, Lt. Charles Patt Kennedy, *erected the first pucca house in 1822 A.D.* The town still has a building 'Kennedy House' where certain government offices are now located. Kennedy was Commanding Officer of *'Nasiri Battalion'* stationed at Subathu. The thickly wooded Shimla ridge was clearly visible from the Cantonment at Subathu. Its forests, full of hyena, bear, leopard, barking deer and jackals became a hunting ground for officers posted there. Speedily Shimla became a place of frequent and prolonged summer trips for the British officers.

The tales about the area began spreading far and wide and the then Governor-General Lord Amherst himself paid a visit in 1827 after triumphant ending of the Bharatpur campaign. He stayed in the 'Kennedy House'. This visit was the foundation of Shimla's greatness. It was at the 'Kennedy House' that Lord Amherst said these famous words: *"The Emperor of China and I govern half of the human race and yet we find time for breakfast". Lord Amherst came with his entourage and 1,700 coolies in attendance and stayed there for two months.*

The following year, Lord Comberemere, Commander-in-Chief of the British forces in India, visited Shimla. He took keen interest in development activities. He planned and got constructed a three mile road around the Jakhu hill. It was during his period that a wooden bridge across a deep nullah below Jakhu was also built. *Construction of wooden bridge was the first kind of developmental activities undertaken in Shimla by the British.* In anticipation of the visit of the then Governor General, Lord William Bentick, a house was constructed in 1829, where he stayed during his visit in 1832 A.D. In 1829 itself, the appointment of Political Assistant of Subathu was changed to that of Principal Assistant to the Resident of Delhi; and Captain Kennedy became the first occupant of the new post.

In 1830, Government decided to acquire more land in the vicinity of the settlement, Major Kennedy was empowered to settle deal with the Chiefs of Keonthal and Patiala. *In lieu of 12 Villages of Panjar, Sharrhan, Deberia, Phagli, Dalhi , Kiar, Bamnoi, Pagawag, Dhar, Kanhlag, Kalhiana and Khalini from Keonthal Chief Pargana of Rawain was handed over to him. A portion of the Bharauli Pargana consisting Dhanoti, Kalawar and Dharol villages was handed over to the Maharaja of Patiala in exchange for Kainthu, Bagleg, Cheog and Aindari villages.* Since the visit of Lord William Bentick in 1832, Shimla became a prominent place for high dignitaries during summer months. Lord Bentick received a mission from Maharaja Ranjit Singh in Shimla through which the famous meeting at Ropar was arranged. In 1838, another mission from Maharaja Ranjit Singh to Lord Auckland arrived. *The treaty of 1838 between the British and the Punjab Government and Shah Shuja was also planned at Shimla.*

Right from earliest, Shimla established reputation for gaiety, visited by affluent, fashionable section of the East India Company's civil and military

servants, 'ANNADALE', the name given to a flat semi-circular amphitheater, was a ready made play and recreation ground. The first fun fair was held in Annadale in September 1833 to raise funds for girls school at Subathu. Annadale's legacy to Indian sport was the annual Durand Football tournament, inaugurated by Sir Mortimer Durand in 1888. The important decision to invade Afghanistan, which proved disastrous for the Britishers, was taken in 1838 at Shimla in the *'AUCKLAND HOUSE'*, as the Governor-General's house came to be known. Ironically, after four years, the decision to invade Afghanistan was criticized in the same house, in the same room and on the same very day by *Lord Ellenborough,* who recognised the right of self-determination for the people of Afghanistan. *The credit to introduce potato cultivation in Shimla Hills goes to Major Kennedy in which lay the seeds of an agricultural revolution in the modern Himachal Pradesh.*

The Queen Victoria ascended the British throne in 1837 and her tenure was marked by strict regimentation and court etiquette. A large number of British officers, who did not conform to discipline, were packed off to India. To such officers, Shimla offered an ideal setting. The Shimla District Gazetteer of 1888-89 mentions that the settlement in Shimla grew with tremendous speed, from 30 houses in 1830, it increased to 100 in 1841, 290 in 1866 and the number of occupied houses in 1881 was 1,141.

In fact it was Kennedy who sited houses, bazars and roads in the rugged and wooded hills of Shimla and transformed it into a summer resort. Some of the earliest houses were: 'TOWNSEND', 'ABERGELDIE HOUSE' and 'COTTAGE' which belonged to *Colonel Tytler* (referred to as Tital Hotel still) was a hotel in the 1860s, 'BONNIE MOON' was a boarding house in the 1840s, 'THE UNITED SERVICE CLUB', 'RICHMONDA VILLA, 'THE CHALET AND CENTRAL HOTEL' etc. Further downhill were built 'REVENSWOOD' and 'CENTRAL HOTEL'. A group of houses, 'ROOKSLEY' and 'ROOKS NEST', and below the Mall, 'GLENARM HOTEL' (New Marina Hotel etc.). The hub of the British social life until the middle of the nineteenth century were the 'Jubilee Theatre' and 'Assembly Rooms' (now the meat market).

The Annadale ground gained such an importance that the Viceregal dance in honour of the Queen's birthday was actually held at "Annadale" on 24th May 1839.

The growing size of Shimla made government to introduce certain administrative changes in 1841. The Political Agent was redesignated Deputy Commissioner of Shimla and *Superintendent of the Shimla Hill States,* subordinate to the Resident of Delhi (and after 1911, Ambala). After the death of Maharaja Ranjit Singh in 1839, there was lawlessness and chaos in Punjab, which provided a direct opportunity to Lord Dalhousie within a decade to annex this state. To strengthen militarily, many steps were taken by the Britishers such as Kasauli was made into a military station, Kalka was requisitioned in 1842, in 1843 Jutogh was cantonment of British infantry, in

1847 Dagshai formed into another cantonment. In the same year, 'LAWRENCE ASYLUM' was founded in Sanawar near Kasauli and finally in 1861, 'Solan' as acquired as a rifle practice ground for troops stationed at Kasauli. Auckland's successors, 'Ellenborough' and 'Hardinge', visited Shimla in 1842 and 1846 respectively.

Lord Ellenborough sanctioned funds for a safe level road to be constructed from the cantonment of Jutogh to Shimla. Another stretch of road was made linking Jutogh to the approach to Shimla, which in turn facilitated the entry of loaded cattle to the Gunj or market there. The locality was named after two eccentric brothers, 'Colonel John Theophilis Boileau' and 'Alexander Henry Edmonstone Boileau', both engineers in NWFP. The older Boileau designed Christ Church at Shimla and St. George at Agra. The first corner stone of Christ Church was laid by Rev. Daniel Wilson, Bishop of Calcutta on 9th September 1844. the John Boileau was a keen astronomer of the time and in 1840-57 was incharge of the Shimla Magnetic Observatory. The foundation stone ceremony was also attended by Governor General Lord Hardinge.

As per the Imperial Gazetteer of 1887, *"all classes of the hill population in the Shimla district have always been simple minded, orderly people, truthful in character and submissive to authority, so that they scarcely require to be ruled".* The first foreigner sent to impose rule over them was one Captain *Charles Pratt Kennedy* who in 1822 was appointed Superintendent of the Hill States, with instructions to receive tribute from the hill chiefs and establish some traditional British-style law and order among them. Victor Jacquemont, a Frenchman who stayed at Shimla in 1830, had given detailed version of Shimla's life.

In the year 1828, Lord Combermere became the first Commander-in-Chief of the Indian Army to arrive in Shimla and in his staff was one Captain Mundy, who wrote extensively about his Lord's endeavours to initiate developmental work in Shimla. The construction of broad level road round the Mount Jakhu, about three miles in length and a Pine wood bridge, which was named after him, were some of Lord Combermere's pioneering efforts. 'Lord Auckland' visited Shimla in 1838. Shimla was acquired for the government of India by Auckland's predecessor, 'Lord William Bentick', who built a hilltop residence for himself there known as 'Bentick's Castle'. Later on, Bentick Castle was made a residence of the Commander-in-Chief. A few pioneering foreign merchants opened shops just off the Mall—open fronted, timbered premises with a small town frontier. The first of these on record belonged to Messrs Barrett & Co. for butchery. But later on, enterprising Mr. Barrett went on to open Shimla's first billiard room and racquet court and to become a founder member of the old Shimla Bank (now Grand Hotel), which was first mooted in 1845 after a dinner party.

During the annexation of the Punjab, Dalhousie spent three consecutive summers from 1849-51 at Shimla. The Marquis of Dalhousie was Governor-

General of India from 1846-56. But he and his wife were less enthusiastic about Shimla and its beauty. *Dalhousie was well aware that he was not very popular in the Anglo-Indian community and neither his wife whom 'the Shimla ladies' considered to be snooty.* Dalhousie's *eyrie'* during the monsoons was about 150 miles from Shimla in the remote of 'Chinni' (Kinnaur) in the protected hill state of Bushahr. Dalhuousie's visit to Bushahr led him to re-examine the possibility of trade route to Tibet envisioned during Gurkhas wars.

The outcome of this was construction of 'Hindustan and Tibet Road' commencing from Kalka. The first lap of the road was constructed in 1850-51. The 'Hinduatan Tibet Road' upto Shimla came to be used for wheeled traffic by the 1860s. A 560 feet long tunnel was constructed beyond Sanjauli Bazar on H.T. Road during 1851-52. With the growing popularity of Shimla and the increasing number of holiday visitors and surrounding cantonments required the use of *'Jampans'* as a mode of transport. This meant rounding up from 15 to 20 thousand villagers to serve as *'porters'* and *'coolies'*. As per the clause of 1816 treaty 'on the supply of labour' affected the Shimla Hill State villagers the most and those living in the villages along the roads were compelled to serve as coolies in accordance with the 'custom of begar' prevalent in the hills. *Edwards, Shimla's Deputy Commissioner and Superintendent of Hill States from 1847 till 1852 was a man of positive vision, viewed begar as a nothing short of insupportable and fearful system of serfdom. He abolished it, but under pressure from European community it was restarted during his successor William Hay's period in modified way by making available moderate of coolies through the formal appointment of an influential man of neighbouring areas, a* Chadhuri. Edward introduced Western schools in the hills and for this purpose he collected funds from local rulers. He opened a Central School at Shimla and other schools in the district at Jubbal, Kotkhai, Bharauli and Baghat. He also took steps to exclude the middlemen and commission agents of Shimla's Lower Bazar and fixed the prices of essential commodities such as food grains. *By a proclamation of 7th April 1848, he abolished the institution of commission agent.* In 1848, Edward planned a market, called the Gunj (Later on named Edward Gunj) where traders from surrounding hills and from the plains could sell their grain to retailers at their own risks. Edward's system was abandoned after a trial of four years by his successor William Hay.

Sir Charles Napier, who was in command of the Indian Army during part of Dalhousie's rule, was unwilling to keep soldiers in the comforts of Shimla for a long duration and so put some restrictions to their movements. Napier spent the summer of 1849 at Shimla's 'Barnes Court', *a residence built on a southern spur of the mount Jakhu,* with forty-two acres of ground. Barnes Court was one of the station's oldest large estates, dating from 1830. The spot remained favourite with the Army and between 1849 and 1865, was the summer residence of no less than six Commanders-in-Chief. First among them was Sir Edward Barnes, formerly the Duke of Wellington's Adjutant General at *Waterloo,* who gave it its name when he bought it in 1832.

Within three months of Dalhousie's departure, the first war of Independence broke out at Meerut. When the news of outbreak first reached Shimla, there was some panic among noncombatant Anglo-Indian residents, who lessly feared that their 'faithful little green Gurkhas' would take up arms against them. The hill Ranas demonstrated their loyalty during 1857 uprising when the Gurkhas of the Nasiri Battalion at Subathu mutinied and marched off with a sum of government money to join their comrades at 'Jutogh'. A contingent of soldiers sent from Sirmaur guarded the bazaar, while another from Bilaspur occupied Boileaugung, the approach to Shimla. But in Shimla, all remained tranquil and Lord William Hay, Deputy Commissioner of the region, later reported that *"the utmost decorum and good order" prevailed in the hill states during the crisis and appreciated the loyalty of the Indian servants and guards."* The first hand information of the accounts of violence which took place in the plains was brought to Shimla by some lucky survivors. To name them was William Howard Russel, a famous correspondent of 'The Times', who with his friend, Captain Alison, ascended the mountains on 14 June 1859. the Commander-in-Chief of the Army, General Anson, who was in Shimla, when first war of independence broke out, rushed to Delhi.

However, he fell ill and died on the way. Lord William Hay in a letter writes to Mr. G.G. Barnes, Commissioner and Superintendent, Ambala, that *"some Europeans took refuge at Junga, the residence of Rana of Keonthal, others with Thakurs of koti of Balson, while the remainder sought safety in the hill cantonments of 'Dagshai', 'Subathu',* and *'Kasauli".* The Rana of Keonthal, for rendering good service during the uprising, was raised to the higher rank of 'Raja' in 1857 soon after the peace was restored.

Lord Canning, the last Governor General and the first Viceroy under the Crown after the Mutiny paid a brief visit to Shimla in 1860. He was succeeded by Lord Elgin, but he died soon in 1863. John Lawrence was rather unexpectedly appointed Viceroy in 1863, following the sudden death of Lord Elgin. Sir Johan Lawrence was younger brother of Sir Henry Lawrence. Lawrence's career had been shaped in the Punjab; in 1849 he was appointed administrator of the Punjab and from 1853-59, he was Chief Commander of the Province. It was in 1864 that Shimla became the summer capital of the Raj. In his letter to secretary of State. Mr. Charles Wood, strongly favoured the shifting of capital on the following grounds: *"Of all hill stations, Shimla seems to me the best for the supreme government. Here you are with one foot, I may say, in the Punjab and another in the North-West provinces. Here you are among a docile population and yet near enough to influence Oudh. Around you in a word are all the warlike races of India, all those on whose character and power, our hold in India, exclusive of our own countrymen, depends ..... Nowadays, you have no large native army to fear. What you have on this side of India, you have mainly around and about you, so that your Governor-General, if he has any discernment, is well placed to perceive the first signs of danger and is then able to apply a remedy".*

In 1850s, another pattern was set, District and provincial administration moved their headquarters to nearest hill station in the summer, the Bombay Government was for four months at 'Mahabaleshwar' and four at 'Poona' each, the Madras Government spent six months at 'Ootacamund', the Government of NWFP and Oudh was in 'Naini Tal' for five and a half months and the Bengal Government went to *Darjeeling* for three months. The intense persuasion of Lawrence paid dividends and the Secretary of State, Sir Charles Wood, wrote back to him that, *"with or without your council, you are quite welcome to be away from Calcutta for six months and, therefore, you may set your mind quite at ease on that point".*

The decision to maintain Army Headquarters permanently in Shimla was taken in view of Shimla's strategic location regarding Punjab and North-West. Soon, the offices attached to the Army Headquarters, the Director General and Examiner of Military Accounts, the Director General of Ordinances, the Army Removal Department, the Imperial Service Troops and Indian Medical Service were also located permanently in Shimla. The Criminal Investigation Department, the Meterological Department and Sanitary Department were transferred in 1884.

The offices of the Punjab Government were also shifted for about five months each year from 1871 to 1873. From 1876, it became an annual practice though Punjab Government continued to function from Lahore. The Shimla Municipality, created in 1850, was the oldest in the Punjab and its activities were effective— as chronicled in *E.J. Buck's* book 'Shimla Past and Present'. One of the most fascinating of Shimla's Shops to which everyone went in search of curious was opened in 1871 by a man of uncertain origins who became quite a figure on the local scene. His name was 'A.M. Jacob', an art dealer, jeweller and collector of eastern antiquities.

Lord and Lady Lytton, who first went to Shimla in 1876, were considered to be first truly stylish and fashionable pair to inhabit *Peterhoff,* the then official government residence. The first Viceroy to live there was Lord Elgin in 1863.

The two local newspapers then published were *'The Himalayan Advertisers'* and *'The Shimla Advertisers'.* There was the Shimla museum, housed in a former boarding establishment called *'Bonnie Moon'.* The museum had been founded by *Colonel Robert Tytler.* It was in 1873 that Sayyid Nur Mohammed, an envoy of Amir Sher Ali of Afghanistan, arrived at Shimla to hold discussion with the then Viceroy *Lord Northbook.* On the name of British protection to Afghanistan against Russian onslaught, what was promised *"friendly neutrality"* of the government of India. But once Disraeli took over the office in England he gave up Gladstone's policy of *"masterly inactivity'* and pursued the *"forward policy"* in relation to Afghanistan.

A string of events later culminated in the declaration of a bloody war against Afghanistan in 1878. For municipal purposes, Shimla town was divided into two wards, Station ward and Bazar ward. Station ward consisted of most of municipal Shimla and was dotted with upwards of 400 privately owned

cottages, villas and castles. Bazar ward meant all five bazars— Boileaugunj, Kainthu, Lakkar, Chotta and the largest, Bara or lower Shimla Bazar—in the different localities of Shimla. This demarcation was possible made to make town's administration convenient and efficient. Lord Lytton was not happy with residence at Peterhoff provided to Viceroy.

In 1877, he selected a site on the summit of Observatory Hill in the Western part of Shimla for the new residence. **Captain Cole** was deputed to prepare the designs for it. In 1880, Cole was replaced by *Henry Irwin* as Superintendent Engineer. But successor of Lytton, Lord Ripon and Dufferin did not take much interest in the plan to execute it quickly. It was only in 1885 that Lord Dufferin revived the plans made for Observatory Hill site and approved it with certain modifications as construction progressed. The Dufferins moved into the Viceregal Lodge on 23rd July 1888, few months before his departure.

Al though the idea of Viceregal Lodge was conceived by lord Lytton, yet first to reside there was lord Dufferin.

Shimla can claim the credit for being the place where the Indian National Congress was conceived and where the idea of forming the Muslim League gained ground. In 1883, A.O. Hume wrote an open letter to the graduates of Calcutta University and also took up the cause of Indians with Lord Northbook and his successor Lord Lytton. But both did not show any positive interest and infact to get rid of Hume, Lord Lytton abolished, Agriculture, Revenue and Commerce Department headed by him. Hume resigned from service at the age of 50 and settled down at the **'Rothney Castle'** at Shimla which he had purchased earlier. Lord Rippon seemed more appreciative of Hume's ideas and a good understanding developed between Peterhoff (The Viceroy's residence) and the 'Rothney Castle'. *It is at the Rothney Castle where Hume mooted the idea of forming Indian National Congress.* Hume left India in 1892 but returned two years later to attend the Lahore session. Back in England, he continued to work for the Congress till his death in 1912 at the age of 83. By that time, Congress had come to the age. In 1880, at the residence of Ravenswood in Shimla, Shimla Fine Arts Society's exhibition **'Native Industrial Art'** was held. In the eastern part of Shimla, **'Barnes Court'** set in forty-six acres of land, was purchased in 1879 to serve as the residence of the Lt. Governor of Punjab.

The proposal for 'Town Hall' on the Ridge came in 1880 from several English residents. *The Town Hall was completed in 1888.* It was designed by **'Henry Irwin'** in the **'Gothic style'**, **'The Gaiety theatre'**, which stands till date, was opened in 1887. The first play put on in the theatre was a comedy called **"Time Will Tell"**. In 1904, the Civil Secretariat was shifted to a new office at **'Gorton Castle'** and the vacated block was handed over to Army Headquarters. The League, which was the mouth piece of the Muslims of India during the nationalist movement, partly owes its origin and formation after a delegation of Muslim had met the Viceroy **Lord Minto** at Shimla. *The first formal recognition to the claim of the Muslim for separate representation*

was given in Shimla in 1906. Which later on culminated in the form of Minto -Morley Reforms in 1909.

Lord Curzon (1899-1905) took keen interest in the speedy completion of *Kalka-Shimla* railway under the supervision of the Chief Engineer, 'Mr. H.S. Harrington'. The total length of the line is about 60 miles, involved construction of 103 tunnels, totalling about five miles. The longest tunnel was the 'Barog Tunnel' being 1143.61 meters in length. The railway line was opened for traffic on *31st March 1891* and the passenger train was flagged off only on *9th November 1903*. In 1905, a tunnel was constructed under the Ridge running from near the 'Blessington tennis courts' in the north and opening on to the Lower Bazar below the 'Jami Masjid' in the South.

THE UNITED SERVICES CLUB was opened in 1844, and since its inception it was preserved for the defence personnel only. Women were not permitted even as guests. In 1890, the 'Chalet' (bunglow made of wood) was constructed to enable members to entertain ladies. In 1909, Bendochy with twenty four acres of land was rented at Mashobra as a weekend resort. In 1945, because of the exodus from Shimla, the U.S. Club ran into loss for the first time in its history. The Club was finally liquidated in December 1947. The Alliance Bank of Shimla was set up in 1874 with a capital of Rs. 50,000/-.

Most of the shops on Mall were owned by British traders. The British traders on the Mall were affiliated to the *'Punjab Traders Association'* with headquarters at Lahore. The goods sold by these traders were very expensive. So to escape from their exploitation, 'Shimla Cooperative Association' was set up in 1882, which supplied its shareholders with English goods at little more than cost price. BISHOP COTTON SCHOOL, meant to be a replica of an English Public School, was opened by *Bishop Cotton* and Foundation stone was laid by *John Lawrence* in 1863 at *Jutogh,* as a thanks offering to God for His deliverances of the British people in India during 1857. *It was shifted to its present site in Shimla in 1866.* This school was based on the model of Winchester, Rugby and Marlborough schools. The Fredrik Roberts, Commander-in-Chief in 1890, sold his Shimla House 'SNOWDON' to the government as the official residence of the Commander-in-Chief.

Shimla in the 19th and 20th century was not only the place for tourists attraction but also a good place to acquire property and sell that on higher rates. Many princely rulers were most preferred buyers, since cost of the properties was out of the reach of the common man. The Raja of Cooch Behar, for instance, owned four properties: 'ROSE BANK', 'KENNEDY HOUSE', 'LEMMEDY LODGE' and 'GUARD HOUSE'. The Maharaja of Faridkot owned 'KNOCKDRIN' and 'RAVENSWOOD'. The Raja of Nahan topped the list with fourteen estates which included 'TORRENTIUM', 'RETREAT' and 'YARROWS'. Raja Rajinder Singh (1882-1900 A.D. of Patiala had purchased three estates, 'OAKOVER', 'ROOKWOOD' and 'CEDAR' along the Mall. His son provided a contingent of 28,000 men to the government during World

War-I and served as India's representative in the *'Imperial War Cabinet'*. In 1916, the Maharaja (Bhupinder Singh, 1900-1938) handed over 'Oakover' to the military authorities as a home for convalescent officers. In 1925, he represented the Indian princes at the League of Nations and was elected Chancellor of the Chamber of Princes.

The Romance of the Rickshaw

Just imagine... the hazy mist rises to unveil a light emanating from a lantern... the tinkling of a bell.... of a rickshaw, being driven by four liveried but barefooted panting 'paharis', carrying a 'gora' memsahib on a road lined by stately pines.... in beautiful Shimla, the former summer capital of vast Imperial India. Today, the famed rickshaw of Shimla is one of the most interesting relics of British times, immortalized by Rudyard Kipling in his story, 'The Phantom Rickshaw'.

History informs us that the rickshaw originated not in Shimla, but in far away Japan. However, 'a public-spirited Englishman' called Smith along with an American 'half cobbler and half missionary' named Globe claims to have invented it in 1868, though many do not agree with this version.

Gile paints out that the word 'rickshaw' was originally called jinnyrickshaw. It is actually derived from the Japanese pronunciation of three character reading 'jin-riki-sha' which are symbolic of *man, strength* and *cart*. From its homeland i.e. Japan, the rickshaw travelled to various lands, soon becoming the 'usual public mode of conveyance' in Shanghai (China) in 1876'. The rickshaw used in Shimla was first used by a chaplain the Rev. J. Fordyce of St. Marks Church in 1880s', as opined by historian Pamela Kanwar. The jinrickshaw or the jinnyrickshaw as it was initially called, soon superceded the *'jampan'* and the *'dandy'*, which faded out of the road scene by the end of the First World War. Technically, the rickshaw was a rickety carriage consisting of a padded chair with arm rests.

Shimla's Municipal Committee (MC) was first constituted in 1852 according to the provisions of the government of India Act of December 1850. In June 1851, William Edwards, Shimla's Deputy Commissioner convened a meeting of property owners of the *'Kutcherry'* to discuss various issues to be dealt with under the new body's jurisdiction. At a meeting held in July 1852, seven member were elected by Commissioner, while the Deputy Commissioner was nominated ex-officio Chairman. In 1855, MC was provided with a new constitution. In 1864, when the offices of the government of India moved formally to Shimla, its membership was increased. *In 1871, Shimla was given the status of a first class municipality under the Act of 1867.* A first class municipality was to enjoy independence with regard to expenditure, subject only to a government audit. The Committee was reconstituted again to consist of 17 to 20 members. Voice was repeatedly raised by house owners against the growing number of the nominated members in the Municipal Committee.

Shimla's first Secretary to MC was 'Harace Bioleau Good'. Lord Rippon

was a great supporter of local self-government institution. His resolution of 18th May 1882 on local self-government paved the way to a fresh experiment in Municipal Government, in Shimla. Elections under the new constitution were held on 1st August 1883. A.O. Hume was elected and became Vice-President of the Municipal Committee. James Walker, a wealthy banker, became Committee's Chairman. The project of the 'Town Hall' was enthusiastically started by the newly elected Municipality of 1883. The new Town Hall planned in 1884 was to be completed by the summer of 1885. The construction work began on 22nd October 1884. A project of hospital was contemplated in 1863, but it was only in October 1882 that foundation stone was laid for the 'RIPPON HOSPITAL'. Rippon Hospital was designed like 'Town Hall' by 'Henry Irwin'. The building was completed in three years and declared open by Dufferin on 14 May 1885.

Octroi was levied for the first time in Shimla in 1875 only when Municipality required additional funds to provide for civic amenities. *Urbanisation has its good and bad effects. Prostitution is one such evil which is a part of all urban centres and Shimla was no exception to it. Although red light area was there in Shimla from quite early, yet in 1880 a 'Chakla' or* 'prostitute's quarter' *was set up at a house called 'CHARLESTON'. Later on, it was shifted to houses on the Gunj Road and Alleys number 2 and 6 Middle Bazar. What was a declared profession in those days, has made in roads in the modern society in different forms and names. Pre and extra marital relations are more common today, then what it was in those days.*

In 1902, the Deputy Commissioner of Shimla also became the ex-officio President of the Municipal Committee. This undoubtedly added to the efficiency of the Municipal Committee's functioning.

The community that captured the lion's share of the trade and business in the 19th century of Shimla was the 'Sood', they were the principal moneylenders, commission agents, traders and shop keepers. The majority of these came from the two village of 'Garli' and 'Pragpur' in Kangra district. They are very shrewd and unrelenting businessmen. Even today, they are in possession of a greater share of business in the town Shimla. They are reminiscent of the remorseless moneylenders of the feudal age.

The passing of *'Rowlatt Act'* (1919) and *'Jallianwalla Bagh'* tragedy activated Shimla Congress. But unlike Delhi, Bombay and Lahore, Shimla remained calm and no violent incident occurred. The Rowlatt Act and Jallianwalla Bagh tragedy made Samuel Evans Stokes, an American Missionary, a critic of government policies and he took a strong stand against the government's short-sightedness. In Shimla hills, a great problem of *'Begars'* was proving an inhumanitarian way to crush local people, which required peasants to serve as coolies to carry luggage virtually free. This burden fell heavily on villagers living along the more frequented routes. By 1920, the question of *begar* (forced labour) had reached crisis point. *In September 1921, the Government gave in and begar was abolished in Shimla district.* On various issues, Stokes had many meetings with Gandhiji.

He attended the Nagpur session of the Congress in 1920.

When Mahatma Gandhi alighted at the Summer Hill Railway Station on 11th May 1921, there was massive crowd waiting for him. He stayed at 'Shanti Kutir' at Summer Hill. On 15th May, a Sunday morning, Gandhiji addressed an overflow meeting attended by 15,000 people at the Idgah. Gandhiji was accompanied by Pandit Madan Mohan Malviya and Lala Lajpat Rai, who utilised the visit to collect funds for the *'Tilak Swaraj Fund'* and to spread the message of *'Swaraj'* in Shimla. Gandhiji's visit affected Shimla in two ways. *Firstl,* it activated local leaders and *secondly* local problems which had been the subject of petitions for many years, were presented at public meetings at the Gunj. Three personalities dominated the local political scene– Dr. Kedar Nath, Lala Harish Chandra and an American Missionary from Kotgarh, Samuel Evans Stokes. Shri Kedar Nath was General Secretary of the district Congress from 1914-1922. Lala Harish Chandra, a Sood from Sujanpur Tira in Kangra, was President of the City Congress Committee in 1914-22. Samuel Evans Stokes wrote a book 'Satyakam' in 1927. In 1932, under the aegis of the Arya Samaj, he became a convert to Hinduism changing from Samuel Evans to Satyanand Stokes. With the acceptance of both demands, i.e. abolition of *'begar'* and representative system in the Municipal Committee by 1923, Shimla Congress became virtually nonexistent. Shimla Congress was revived in 1929 with a membership of sixty-seven. Sood traders and professionals like Kedar Nath and Harish Chandra, took initiative in forming the Shimla branch of the Indian National Congress in 1914, full 28 years after it was conceived by A.O. Hume in Shimla town itself.

The Legislative Assembly building or Council Chamber was constructed in 1925, the last important building to be built during the Raj days. The Council Chamber was opened by Lord Reading on 21st August 1925. After the partition, the East Punjab Government shifted to Shimla and its Assembly held sessions in the Council Chamber. This provision continued till 1953 when the Assembly was shifted to Chandigarh.

Mall Road of Shimla was classic example of discrimination and indignation to the Indians. A Shimla Municipal Traffic Byelaw (No. 5 Section 500) proclaimed. From the 15th of March till 15th October, both days inclusive and between the hours of 4 p.m. and 8 p.m., no job porter or Coolie shall solicit employment, loiter or carry any load in any street mentioned in the first schedule annexed to these rules (most Shimla roads mentioned).

26th April 1930 was a momentous day in Shimla; Vithal Bhai Patel, who was the President of the Legislative Assembly, resigned from his post at Shimla. This sparked off civil disobedience in the town. On 27th April 1930, he was taken in a procession, after he had addressed a large gathering at *'Edward Gunj'* through a route which was strictly prohibited for political processions and Indian's movement. Somehow permission was granted to the crowd and so this came as a first success to the Congress as a part of Civil Disobedience movement by defying the Police Act. Women in Shimla played a prominent

role in Congress activities in 1930. Some of them were 'Lakshmi Devi', 'Lajja Verma', 'Kamla Devi' and 'Satyawati' from Amritsar, an eloquent speaker and poetess, responsible for organizing the women volunteers of Shimla. There was another group of political activists called 'Bal Bharat Sabha', modelled on the *'Naujawn Bharat Sabha'*, with socialist leanings which had been founded in 1928 by *Baghat Singh* and *Sukhdev.* The Bal Bharat Sabha was established by a Sood trader named Dina Nath 'Andhi' from 'Garli'. He courted arrest many times. During his interrogation by the police, he gave his name as *'Andhi son of Gandhi'.* He later on joined the Congress Socialist Party. Mahatma Gandhi again came to Shimla along with Jawahar Lal Nehru, Sardar Vallabhbhai Patel *(Iron Man),* Dr. Ansari and *Frontier Gandhi,* Abdul Gaffar Khan, on 25th August 1931 for what is called the *"second settlement"* before attending the Round Table Conference in England.

At the national level INC was providing a complete forum to the people, to rise against *'alien rule'* but subsequently people of Himachal were also waging a peaceful struggle against local ruler's dictatorial regime. This came to be known as 'Praja Mandals'. These organizations were, in a way, the outcome of the revival of the Shimla branch of the Indian National Congress. A large number of Congress leaders were in the forefront of the movement. The Praja Mandals owe their existence to Shimla and subsequently the movement spread to the adjoining areas.

On 1st June 1939, 'Himalaya Riyasti Praja Mandal' was launched at Shimla with 'Pandit Padam Dev' as President. While addressing a meeting in the 'Gunj' he exhorted people not to contribute money towards fighting World War-II as it served to tighten imperial bondage. He was arrested on 26th June 1941 and sentenced to eighteen months rigorous imprisonment.

Thakur Bhagmal Sautha, trained as an engineer at Baroda, running Imperial Hotel at Lower Bazar, set up the 'Shri Dhami Prem Pracharani Sabha' on 1st June 1939. The state of Dhami, sixteen miles North-West of Shimla, offers a typical example of increasing pressure exerted on the hill people and their resentment gradually building into violent protest. The following were the main causes of launching Dhami movement:

(i) The villagers were deprived of their traditional rights on forest land;

(ii) The sharp increase in land revenue; and

(iii) For the non-payment of revenue timely, Rana resorted to repressive measures such as fines and confiscation of property.

The leaders of 'SHRI DHAMI PREM PRACHARANI SABHA' decided to send a memorandum to the 'Rana' to ensure improvement in the conditions of local people. To make the whole plan successful, following demands were put forward:

(i) The immediate grant of *"full responsible government"* and the grant of civil liberties, right of free speech and platform; and

(ii) Another demand was for 50 percent remission of the land revenue because of continuous failure of crops for three years.

In between, the name of 'Shri Dhami Prem Pracharani Sabha' was changed and came to be known as the DHAMI RIYASTI PRAJAMANDAL'. The resolution of demands was sent to the Rana of Dhami for consideration and acceptance. On 16th of July 1939, Sunday, volunteers were asked to assemble at a place called *'Khel Maidan'*, about a mile and a half from 'Halog', the capital. Thakur Bhagmal was stopped by Dhami Police at 'Ghanahatti' and taken into custody. He was taken to *'Halog'* by Police. A huge crowd in the form of procession followed police. The sight of Rana of Dhami and the rumour that he would soon order firing caused a melee. Soon agitation took a violent turn and police resorted to firing, which ended in two dead and forty injured.

Sautha's agitation met with disapproval from all quarters. He was evicted from the Imperial Hotel and lodged in a jail in Ambala. Narain Dass, president of 'Dhami Riyasti Prajamandal' was dismissed from municipal service. This was the only known incident in the history of national movement, where a large number of low paid government employees participated spontaneously. Subsequently, the Praja Mandal movement spread to certain other areas also, notably in 'Suket' and 'Pajotha' where Vaid Surat Singh led the agitation.

Shimla was the headquarters of the *exiled Burma government form July 1942 to 1945.* The various officers of the exiled government were scattered in different buildings in Shimla. The Army Headquarters which was shifted to Delhi in 1941, was almost entirely placed at the disposal of the exiled Burmese government. Although shifting of capital from Calcutta to Delhi had reduced the importance of Shimla substantially yet it remained a place for many historical events even after that. In 1945, Lord Wavell convened **'Shimla conference'**. Mahatma Gandhi, whom Viceroy had invited to the conference, had declined to participate in it, but had promised to be in Shimla during the course of the proceeding. The Indians in Shimla, who had tumbled out in multitudes to welcome Gandhi in 1921 and 1931, greeted him in 1945 with black flags, protesting against the bartering away of Hindu rights. The representative of various political organisations participated in the meeting. **Sir Even Jenkins** and V.P. Menon were appointed as Secretaries to the conference.

The following year from 5th to 12th May 1946, another historical meeting took place between the Cabinet mission and representatives of the Congress and Muslim League. Once it was decided that country would be partitioned, a Boundary Commission was appointed with **Sir Cyril Radcliffe**, as Chairman of the two Commissions for Bengal and Punjab. The members of the Punjab Commission were Mr. Justice Mehar Chand Mahajan, Teja Singh, Deen Mohammed and Mohammed Munir. The last meeting of the Boundary commission was held in the United Services Club, which coincidentally was also the place where the Mac Mohan Line was drawn many decades ago (1913-14 A.D.).

The partition of the country saw Shimla as the capital of what was then called 'East Punjab'. The Indian tricolour was unfurled outside **'Ellersile'**, the

Secretariat of Punjab government on independence day, which is now the Himachal Pradesh Government's Secretariat. **Dr. Gopi Chand Bhargava** was the Premier of East Punjab in 1947. The High Court of Punjab was located in 'PETTERHOFF', a former residence of the Viceroys. *It ironically was the venue where the trial of Gandhiji's killers (Nathu Ram Godse etc.) was conducted. The convicted were lodged in the Boileaugunj lock-up.*

The Punjab government had never thought that it would retain its capital in Shimla and was looking for a more centrally located place. The Committee formed by the government for a new permanent capital visited several towns. The Committee with its headquarters at Shimla surveyed areas with the help of helicopters and by driving past several villages, ultimately traced a land about 110 kms from Shimla, came to be known *Chandigarh.* It was a strange coincidence that the planning for Chandigarh was done in the same U.S. Club; By 1953, the Punjab government had formally shifted its headquarters to Chandigarh and Shimla was relegated to the position of a distant district headquarters. Shimla's Association with Himachal Pradesh started on 15th April 1948 when the Pradesh was constituted as a Chief Commissioner's province, with the merger of 30 principalities. The **'Foreign Office Building'** under the British Raj, which was later destroyed in a huge fire on 5th May 1957 was converted into the headquarters and secretariat of the province. The building was named **'Himachal Dham'.**

The future of Himachal Pradesh remained uncertain from 1951 to 1966. The decision to set up Reorganisation Commission of Punjab on linguistic basis in 1965, came as a great opportunity to the residents of Shimla, along with those belonging to hilly areas, to demand merger of Shimla and other hill areas in Himachal Pradesh. **Himachal Pradesh came to own Shimla from 1st November 1966.** In 1971, a great occasion came in the life of the town when it was made venue of the **'Indo-Pakistan Summit'** after the 1971 war with that country. Formal and informal meetings were held between the two delegations at the **'Ellerslie'** and the **'Barnes Court'** which was called Himachal Bhawan. In 1972, *'Shimla Pact'* was signed between India and Pakistan.

The Municipal Committee of Shimla town has been replaced by Municipal Corporation as constituted in its present shape by the Himachal Pradesh Municipal Corporation Act, 1978. There is complete change in the nature and structure of Shimla town after the British left this summer capital of the Raj. Over 175 registered hotels and about 50 unregistered hotels had sprung up in the town uptil 1991. The Viceregal Lodge, which has been renamed as Imperial Government's Secretariat now houses the offices of Accountant General of Himachal Pradesh. The **'Barnes Court'** which served as the residence of Commander-in-Chief of the imperial Army and Lieutenant-Governors of erstwhile Punjab, is now the temporary residence of the Governor of Himachal Pradesh. The **'Rothney Castle'**, one time residence of the founder of the Indian National Congress, Mr. A.O. Hume, has been converted into a luxury

hotel. The Castle is located on way to the Jakhu temple and provides a magnificent view of the Shimla hills.

The 'Peterhoff', which was used as the High Court and Governor's house after the freedom, was totally destroyed in a major fire in 1981. There is a tunnel named Victory Tunnel which was commenced in 1945 at the end of World War-II to commemorate the victory of the Allied Forces. Shimla, the capital of Himachal Pradesh, has lost much of its beauty as a hill station with increasing population, unauthorised construction and illegal cutting of trees in the past two decades. If timely action is not taken it may turn out as one of the most unhealthy and ugly hill stations and dangerous place to live in. Who cares for restoring dignity to Shimla, what it enjoyed during pre-independence days?

Shimla Development Authority, Shimla

Shimla Development Authority was constituted in the year 1978 and was converted into a full-fledged development authority by the government on 14th December. 1983. The objective of the authority is to develop in a planned manner serviced land for meeting the needs of the housing and commercial areas for the growing population by mobilization of resources.

DECADEL VARIATIONS IN POPULATION SHIMLA TOWN FROM 1901-2011

Year	*Persons*	*Males*	*Females*	*Decadel variation Variation*	*Percentage Decadel of males*	*Females per 1000*
1	2	3	4	5	6	7
1901	13,960	10,256	3,704	—	—	361
1911	19,405	14,107	5,298	+5,445	+39.00	375
1921	27.213	20.805	6,408	+7,808	+40.24	308
1931	18,144	13,667	4,477	-9,069	-33.33	327
1941	18,348	13,436	4,912	+1,204	+1.12	365
1951	46,150	29,735	16,415	+27,802	+151.53	552
1961	42,597	26,667	15,930	-3,553	-7.70	597
1971	55,368	33,246	22,122	+12,771	+29.98	665
1981	70,604	42,254	28,350	+15,236	+27.52	671
1991	1,10,360	63,661	46,699	+39,576	+56.31	735

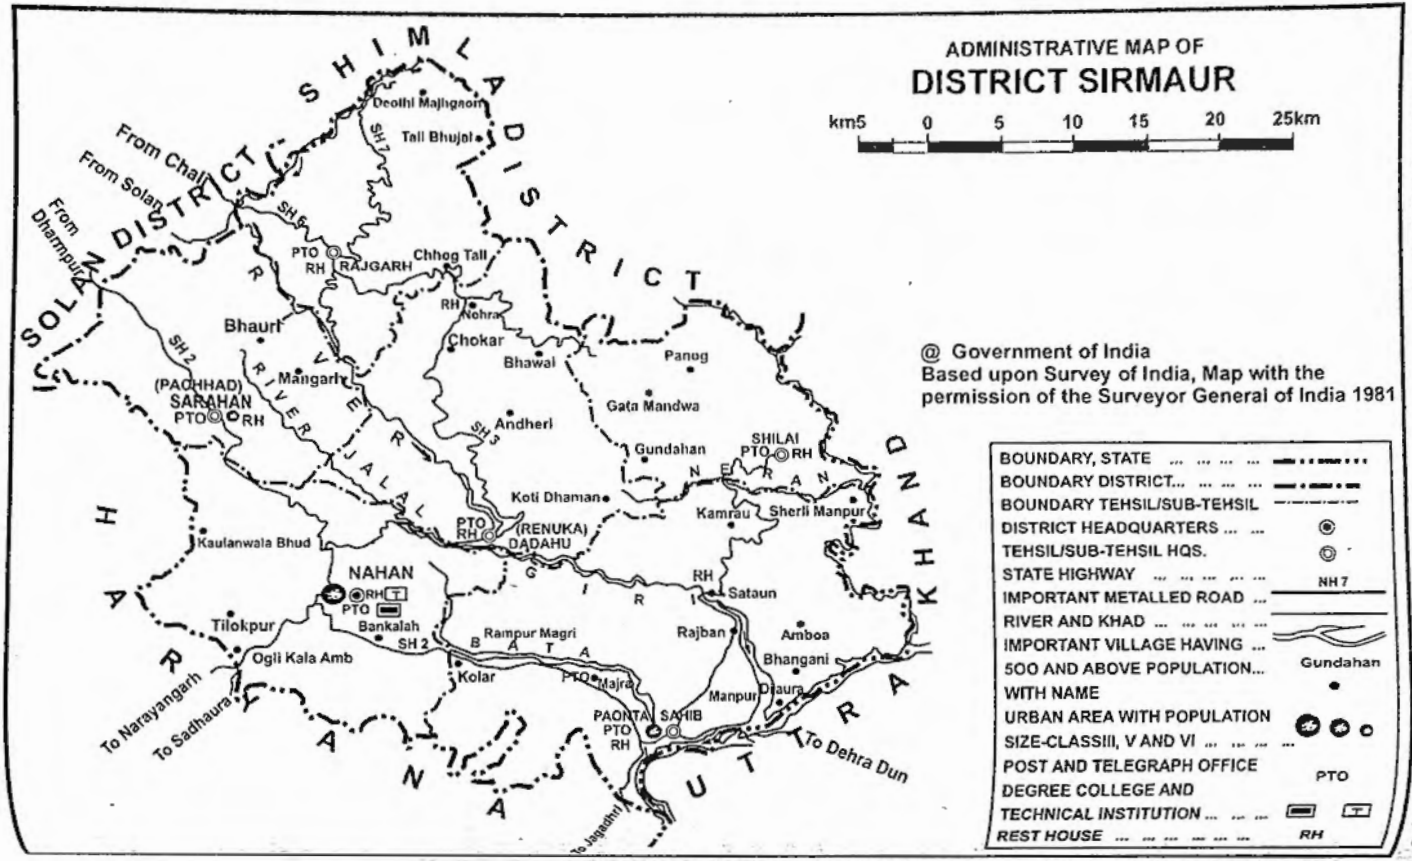
SIRMAUR

(HQ, NAHAN, ALTITUDE 933 METERS)

Languages spoken : SIRMAURI AND HINDI



The district lies in outer Himalayan ranges, commonly called as Shivaliks between 77° 01' 12" and 77° 49' 40" East longitude and 33° 22' 30" and 31° 01' 20" North longitude and except the 'Dun valley' which is called as 'Kayar-Da-Dun', the district is predominantly mountainous. The maximum length from West to East is 77 km and the maximum width from North to South is 80 km. The district is bounded by Shimla district in the North, the rivers Tons and Yamuna in the East, district Ambala of Haryana in the South and West and North-West by Solan district. The district can be divided into three parts (i) Trans-Giri, (ii) Cis Giri and (iii) the plains of 'Kayar-Da-Dun or Dun valley.

(a) **The Trans-Giri region**, consists of the wild mountains culminating into **'Choor peak'**, which is popularly known as *'Choor Chandani-Ki-Dhar'*, has an altitude of 11,982 feet above mean sea level. Some of the famous ranges of this region are, **Dhar Taproli-Jadol, Dhar Nohra, Haripur fort** (8,809 feet above mane sea level), **Dudham Dhar, Dhar Nigali and Dhar Shillai.** The Dhar Kamru and the Dhar Shillai form the valley of *'Naira river'* which ultimately falls in the Tons river.

(b) **The Cis-Giri region** is intersected by three main ranges which run from North-West to South-East. These are the *'Sain Dhar'* and *'Dharthi Dhar'*. Between these two *'Dhars'* flows river **'Jalal'**. The third is quite low range. In the western half of this range flows the **'Markanda river'**. This flat valley is irrigated by **'Bata river'** which flows from east to west, originating from Dharthi ranges. The area of Kayar-Da-Dun valley fertile and useful from economic point of view.

Jaitak hills: The Jaitak hills is a historical place in the annals of Sirmaur. It was here that the most important battle was fought between the British forces and the Gurkhas. Jaitak is the name applied to a peak, or rather two peaks. About 19 km to the north of Nahan, Jamta falls on the Nahan-Dadahu motorable road. An ascent of about 3 km has to be negotiated form Jamta to gain Jaitak. A hill fortress one crowned the Jaitak hill which is a steep ridge of slate and which rises above the Kayarda Dun, 30-36' north and 77-24' east, in the Nahan tehsil. The elevation above the sea level is about 1479 m. The fortress was constructed by Ranjor Singh Thapa, the Gurkha leader, when he attacked and sacked Nahan in about 1810. A small hamlet is the only remnant of old Jaitak. It commands a fine view of the Sain, Nahan and Dharthi hills. The famous Jaitak Khel of Kanets derives its name from this village.

Haripur Dhar: Haripur is the name applied to a mountain called Haripur

Dhar. Perched on a peak of this hill like a silent sentinel, a fort was built on this range of mountain by the rulers of erstwhile Sirmaur State. It was primarily meant to guard the state frontiers with the neighboring Jubbal State as there were constant boundary disputes between the two states and there was unusual encroachment into each others territory. It has fallen into disuse and the part which is still habitable is used by the Forest Department as forester's headquarters. The fort reminds the visitor of the historical period when to hold or capture such forts used to be the chief aim of the contending hill states. Its main attraction is the wild game in its vicinity. Lying at a distance of about 106 km from Nahan. Kharotiyon, a place from where the site of the fort remains about 2 km on the high hill top.

River System and Water Resources

Leaving apart the multitude of small and insignificant streamlets that flow here and there in this district, there are seven streams, big and small, deserving mention.

The Yamuna: It rises from the Yamunotri in the Himalayas at a height of about 7,924 meters from the mean sea level. After crossing through Garhawal and irrigating Jaunsar area, it flows on the Eastern boundary of the district for a distance of about 22 km, ending at village **'Khadar Majri'** and leaving at **'Kaunch'**. It separates Kayar-Da-Dun from the Dehra Dun and forms the boundary line between Sirmaur and Uttrakhand. Within the boundary of this district, the estimated maximum width of the river is about 91 meters and the depth about six meters, but this limit is far exceeded during the rainy season.

The water of this river is generally cold and clean but during the summer, due to melting of snow, it becomes somewhat muddy. The Yamuna has mythical relation to the sun. It is a sacred river having the temples on its bank, at Rampur and at Paonta Sahib, where a Sikh Gurudwara also exists. Its main tributaries are the 'Tons', meeting it at Khadar Majri, the 'Giri' joining near Rampur Ghat and the 'Bata' mingling its water with it at Bata Mandi.

The Giri: It rises in the hills of Jubbal and courses through the hills of Kotkhai and Ratesh, parts of Shimla district and enters the district on its South-West side. At village 'Mandoplasa', this takes an East-Southerly direction, dividing Sirmaur into two parts and flows for a distance of 86 km. in this district and falls in the Yamuna at Rampur Ghat. The river is of varying width in the Sirmaur district, the average being 122 meters. It is, however, for the most part shallow, the depth ranging between 1.2 to 1.5 meters, which is fordable.

The *'Rampur Giri canal'* has been constructed on the river Giri. The tributaries of the river Giri are: **'Jalal'**, which joins it at *'Dadahu' below 'Sati Bagh'* and the **'Nait'** and **'Palar'**, which rise on the Southern slopes of Choor peak. Below Nehi, in the West rises the **'Kawal'**, which joins it. The smaller tributaries are the **'Bajhe'**.

streams. The river Giri has a legend with regard to its origin. It is said that in remote past, a *saint* was wandering in the Himalayas, carrying with him a Kamandal (a container) with Ganga water. When he reached at the spot from where the Giri rises, his Kamandal fell from his hand spilling over its contents. Shocked over the spilling out of the Ganga water, the saint exclaimed 'Ganga Giri'. Instantly, the legend says, there sprang at that spot a spring of water and this spring was named as 'Giri'.

The Tons: This river rises from 'Yamunotri' mountains and after crossing through the territories of Jubbal and Jaunsar, it *enters the district near village Koti,* separating it from the Jaunsar area, once a part of the erstwhile princely state of Sirmaur. After flowing for about 50 km. it *joins the Yamuna near Khodas Majri.* When it rises from its bed of snow at an elevation of about 3,897 meters above the mean level of sea, it flows at a grand volume, nine meters wide and nine meters deep maintaining its dignity of character until its confluence with the river Yamuna. The maximum width is estimated at 30 meters. In the east of 'Dhar Nigali' rises two streams namely, 'Baghal' and 'Newali' or 'Naira', which flow into the Tons.

The Jalal: The small, Shallow and narrow river *rises near village Bani* below Nehi in tehsil Pachhad and forms a dividing line between *the Sain and the Dharthi.* At Dadahu in tehsil Renuka, it falls into Giri river.

The Markanda: It rises at 'Baraban' in the hill of Katasan pass below a temple of *Katasan Devi.* After flowing for a distance of about 25 km within the district it passes on to the Ambala district of the Haryana at Kala Amb. At village Dewani, it is joined by a streamlet named 'Solani'. Its banks are highly sandy out of which gold is washed. Areas of Bajura, Khol of Kala Amb, the lands of *'Sambhuwala', 'Rukhri'* and the garden of *'Bir Bikrambad'* and the *'Khadar Bag'* are irrigated by its water. It is a perennial stream.

The Bata: It is perennial stream, rises from 'Siori spring' in the Dharthi range, located in village Bagna, tehsil Nahan. Dividing Kayar-Da-Dun into two parts, it joins Yamuna at the Bata Mandi. The width of its course never exceeds 12 meters and depth 0.6 meters.

The Ghaggar: It rises near 'Lawasa' in the Sirmaur district. It flows in the westerly direction and whole of the Southern slope to Dharthi Dhar upto Lawasa drains into this river. It flows for about 12.8 km in Pachhad tehsil before it *enters the Haryana near Priti Nagar.* It has only two main tributaries, i.e. 'the Lah' which runs through *'Ghinni'* tract and 'the Deh which drains the Ghar portion and the Ponwala Jagir. It is not a perennial river and while coursing in the plains, the quantity of water diminishes to a mere thread and finally it loses itself in 'Bikaner' territory near *'Hanumangarh',* formally called *'Bhatnair'.*

At village 'Mahipur' situated in tehsil Renuka, there was two waterfalls. These are most noticeable because of the fact that waterfalls within the district are not many. The hill which traverses the Mangarh village on its exit, forms

a waterfall about 122 meters high through a deep rocky chasm. It is clearly and fully visible only from the cultivated fields of village Kadakan. Similarly, opposite to the village 'Maithu', in the trans-Giri area of Renuka tehsil there are some picturesque waterfalls. The only lake in the district is at Renuka associated with the name of Renuka Devi, mother of Parsurama, a deity of Hindus reincarnation of lord Vishnu.

There are four tanks in Nahan town and one at Trilokpur.

Drinking water in the district is obtained from natural streams and springs. In and about the town of Nahan, there are several springs. The water of the 'Shivpuri spring' which lies at a distance of about three kilometers North of Nahan town is the purest. Apart from the springs in and around Nahan, there are several springs in the district. Of these, 'Nahar Sabar springs' is the most important located in tehsil Renuka, at a distance of about 25 km. from Nahan at the foot of a mountain range. This spring is the source of water supply to the town of Nahan since 1915.

The geology of the district is composed of alternating beds of a fine grained, usually grey, firm as sandstone and of clays, usually bright and red in colour and almost always have some shade of red or purple which weather in a nodular manner. The clays usually prevail in the lower part of group and sandstones in the upper. Broadly speaking, the district is hexagonal in shape. The entire territory is mountainous with the exception of the valley, in the Paonta tehsil, commonly called 'Kayarda Dun'. This valleys, roughly 40 km, long and 10 km, to 21 km. broad, is mostly flat and plain. The mountainous portion, which comprises the bulk of the territory, is characterized by deep valley, lying between ranges of varying elevations.

HISTORY

As regards the history of Sirmaur, the available date of historical records and archaeological features are inconsiderable. This may be ascribed to two major reasons. Firstly, no thorough efforts seem to have been made, in the past, for the compilation of document, deserving to be called a comprehensive history. Secondly, it is believed, that owing to the curse of a women in about 1139 A.D., the original capital along with surrounding tract was destroyed by an unprecedented flood and reduced to a lifeless waste. The main sources at our disposal are the old gazetteers compiled in 1904, 1934, 1969 and 1982 and the *'Tarikh-i-Riyasat Sirmaur'* by Kanwar Ranzor Singh.

There are several theories regarding the origin of the name of Sirmaur, though none of the interpretations can be said to be beyond doubt. One view is that it derived its name as Sirmaur because of the senior position it held amongst the princely states. Another version is that at the earliest times, the capital of the state was Sirmaur and so state derived its name from its capital. Third version is that 'Raja Rasaloo' founded the state. He was from *'Jaisalmer'* and one of his ancestors name was Sirmaur. For that, state was named after him. This, however, is no more than a guess. Yet another theory is that upto

the time of Madan Singh one of the Rajas, the capital was located in a place called Sirmaur and the entire state derived its name there from. Why that place itself was named Sirmaur has not been explained. According to Kanwar Ranzor Singh in his book *'Tarikh-i-Riyasat, Sirmaur* the state was founded by Raja Rasaloo, the son of Raja Salvahan of Jaisalmer. Sirmaur was the son of Buland, the brother of Raja Rasaloo, after whom the state took its name.

That there was a king with the name of Sirmaur of the state is confirmed by the traditional worship of *'devta'* (god) known as *'Sirmuria'* in the district. This god occupies a position next to *'Mahasu'*, who was perhaps the first to acquire the faith of the people of the area. The existence of Sirmaur as a powerful principality is supported by some incidents recorded in the Urdu history of Kumharsain (now in Shimla district). According to that, during the period of Rana Zorawar Singh of Kumharsain (C.A.D. 166, calculated on the basis of a regnal year of Zorawar Singh's ancestor), the then Raja of Sirmaur is said to have invaded Rampur Bushahr. The invader was forewarned by *'Mahakali'* not to take such an expedition, but the Raja disobeyed the warning and as a result, cholera broke out in his army which forced him to retreat. During his retreat, cordial relations were set up with the chief of Kumharsain and as a consequence Zorawar Singh is said to have married his daughter to the Raja of Sirmaur. Rana Zorawar Singh was succeeded by his son Dil Rnajan Singh. On the other side, Raja of Sirmaur was burning with indignity over the failure of his earlier campaign against Bushahr and again launched an attack to suffer much worse fate.

But according to Punjab State Gazetteer, Kumharsain state came into existence in or about eleventh century. This is a big chronological discrepancy. But it may be possible that there was a state of Kumharsain in the second century A.D., which was disintegrated and subsequently revived. Because boundaries, status and power of princely states kept on changing throughout ancient and medieval period, until 1815 A.D., when British came to occupy sovereign power over them. The matrimonial alliance between the Royal families of Kumharsain and Sirmaur and invasion of Sirmaur by Raja Bidhi Chand of Bilaspur are proof of the existence of Sirmaur state at that time. The earliest name of Sirmaur is also believed to be 'Sulokina'. The inhabitants of the Sirmaur in the early history of human existence were *'Kulindas'* or *'Kunindas'*. Kulindas are said to have been identified with modern Kanets, form bulk of the population of modern Kullu, Shimla and Sirmaur hills.

Rana Period: Certain very ancient traditions, folklores, folk-songs, contain references to wars among the local chieftains. These petty chiefs had the title of Rana or Thakur.

Madna was a chief in the northern region of what is now called Sirmaur. The Rana of Paonta gave him an ultimatum of war and Madna accepted it. A fierce battle took place, in which Madna was killed and his brother-in-law, who was assisting Madna was taken as a prisoner.

Badal was the chief of a Pargana. In village Shialora, at a place named

Khalna, he gave away lands to *'devas'* (Brahmins) and Rawats (Rajputs) for their subsistence. Brahmins were headed by 'Kamna' and Rajputs by 'Kir Chand'. For some time they fell out. A fight took place, in which Kamna was killed. His wife with a view to avenging the death of her husband, collected a small army and in a battle that followed, beheaded Kir Chand with her own hands.

'Mian Siddhu' and 'Kir Chand' rebelled against the Raja of Sirmaur and formed a front against him in *'Tikkari fort'*. The Raja quickly proceeded and suppressed the rebellion. It is very difficult to say, without the reliable evidence, that how long this period of mutual strife among petty chiefs continued. It is a matter of pure conjuncture as to how many generations passed away before the real process of consolidation of a single principality started at 'Sirmaur'. The ancient state capital was 'Kayara Dun'. Despite subsequent shifting of the capital, the original name, Sirmaur, has been held to this day.

The original capital, Sirmaur, was devastated by a flood in the Giri river about which there are some legends. According to one version, during the reign of 'Madan Singh', a Rajput of *'Suryavanshi'* (Solar dynasty) family, a woman versed in the art of predicting by means of communication with the dead and magic, had cursed the Raja for his treachery played against her. The devastation of the original capital by the flood is supposed to be the sequel to this curse. In this flood, the state was left without a ruler. Then Pandits and astrologers were consulted. They visualised that many miles East of Sirmaur state; there was a Raja just and pious, whom they decided to visit. He had three Ranis and all of them enceinte. The delegation of Sirmaur Pundits requested the Raja of Jaisalmer to send one of his Ranis to Sirmaur, so that her offspring may become the ruler of the state.

The Raja, after some hesitation, persuaded the chosen Rani to go to Sirmaur. When she entered the boundary of the state, she gave birth to 'Badan Singh'. Under a *'dhak'* tree. This tree is still worshipped by the females of Sirmaur. Thus from Raja Badan Singh, there has been an unbroken line of rulers till the time to *Maharaja Rajinder Parkash,* who died in 1964 without any male heir. Another version which is generally accepted as tradition of the dynasty says that for some time after the devastation, the people of Sirmaur resolved to send a messenger to Jaisalmer to bring a prince of royal blood. Consequently, a 'Rai Bhat' was deputed. The Raja of Jaisalmer Salvahan II was requested to send a prince, to which he agreed and granted his third son 'Hasoo', to accompany *'the Bhat'* to Sirmaur.

The prince along with his wife reached Sirhind where he died all of a sudden. But soon it came to be known that the wife of 'Prince Hasoo' was pregnant and she, in due course, gave birth to a child under a tree of *'dhan plass'* (Butea Frondosa) at Poka, near Sirmauri Tal. The prince was named as 'Plasso' after the plass tree and the rulers thereafter were called *'Plassia'*. According to one version, Raja Ugar Sen Rawal of Jaisalmer, who had come

either on hunting expedition or perhaps on pilgrimage and finding the throne of Sirmaur empty, took possession of it in 1095 A.D. But this description seems to be completed false, since there was no ruler of Jaisalmer by this name secondly Jaisalmer was founded in 1156 A.D. only. In the old Gazetteer of Sirmaur (1934), it is related that in about 1097 A.D., Raja of Jaisalmer **Ugar Sen,** who happened to visit Haridawar on pilgrimage and on hearing the throne vacant in the nearby state, sent his son' Soba Rawal' who conquered and established kingdom with *the capital at Rajban,* taking the title of **'Subhans Parkash'**. He ruled uptil 1199 A.D. Ever since the name of *'Parkash'* in the princely family of Sirmaur continued till its last ruler. The history of ruling dynasty started with Raja Subhans Parkash has been discussed in brief in the following pages.

After the death of Raja Subhansh Parkash (1195-1199 A.D.), his son **Mahe Parkash** came to power with capital at *'Rajban'*. He recaptured all the lost territories of former Sirmaur state and to extend the limits of his state, he launched an attack on Srinagar in Garhwal, advancing as far as **'Malda'** on the Bhagirathi river and wrested the fort of Malda. He caused to build a temple of *Lakshmi Narain'* on the bank of Bhagirathi to commemorate his victory and named it after his own name, **'Mahe Deval'**. After the rule of eighteen years, he died in A.D. 1217. In the old gazetteer, genealogical tree, his name appears at serial No. 4, following **'Balak Chand Parkash'** and 'Salvahan Parkash', but Kr. Ranzor Singh places him at serial NO. 2, after Shuhbans Parkash.

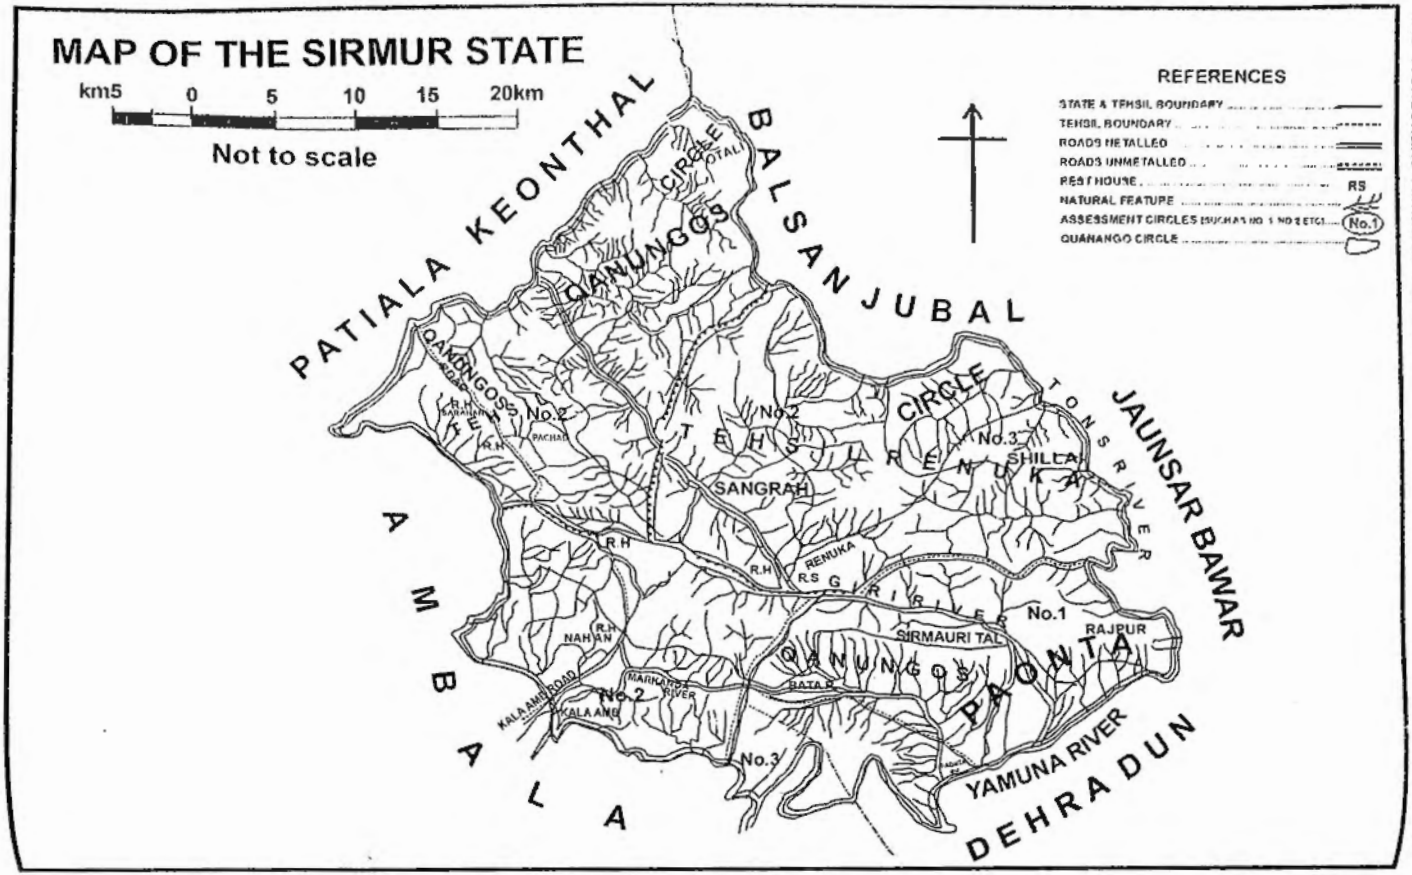
Raja **Udit Parkash** ascended the throne in the year 1217 and *shifted his capital from Rajban to Kalsi* (now in Dehradun district of Uttrakhand). He abdicated in favour of his son **Kaul Prakash** in A.D. 1227.

Kaol Prakash, like his grandfather Mahe Parkash, busied himself in the augmentation and strengthening of the bounds of his domain. He made the rulers of **'Jubbal'**, **'Balsan'** and **'Tharoch'** his tributaries. He ruled till A.D. 1239. It is about this time that the earliest mention of Sirmaur by Mohammedan historians occurs in the 'TABAKAT-I-NASIRI', when Nizam-ul-Mulk Mohammed Khan rebelled against Razia Sultan, took refuge in the hills of Sirmaur Bardar (Bardar Probably Bhadraj Tibba in Saharanpur).

Sumer Parkash came to power in A.D, 1239, first plundered and annexed the fort and then hill state of Ratesh, forming part of Keonthal state and made it his capital. He passed away in A.D. 1248 after the reign of nine years.

Raja Suraj Parkash then ascended the throne in A.D. 1248. While at Ratesh, he got a news from Kalsi that his subjects had risen in revolt and devastated the capital at *'Kalsi'* and also attacked the palace. According to one version, his daughter played a great role in the suppression of revolt; while according to some, she died in the process. Raja Suraj Parkash, after reestablishing order, again set out to the hills and is said to have invaded the Thakurs of *Jubbal, Balsan, Kumharasin, Ghund, Theog, Sairi, Rawin* and *Kotgarh* (now all in Shimla district) and made them to pay tribute and then

returned to Kalsi. It was during this period when Mohammedan army for the first time entered the area to chase 'Qutlugh Khan', in his retreat from Hindustan to Lahore. 'Mahmud Shah-I' attacked the fort of Santurgarh, but not before the flight of Qutlugh Khan. The place Santurgarh is now in Ambala district. In the event of failure to nab Qutlugh Khan, the territory of Sirmaur was devastated. Raja Suraj Parkash ruled for eleven years and died in the year 1259. Next century from A.D. 1259 to 1374 was uneventful. During this period, seven Rajas, namely 'Padam Parkash', 'Karan Parkash', 'Akhand Parkash', 'Budhi Parkash', 'Aachal Parkash', 'vir Saal Parkash' and 'Sat Brahmin' ruled the state.



Raja Bhakat Parkash ruled from 1374 to 1386. In 1379, the Sirmaur state was made a tributary by 'Firoz Shah' of Delhi. Following the death of Raja Bhakat Parkash in A.D. 1386, Raja Jagat Parkash occupied the throne. His reign was famous for maladministration. His subjects, the rulers of *Jubbal, Balson, Rawain,* Kumharsain and other fiefs revolted and ceased to be subordinate to him. He died after two years reign in A.D, 1388.

Raja Veer Parkash, son of Jagat Parkash came to power in A.D. 1388 and crushed the rebellion of Thakurs. Following the family traditions and customs of propitiation of *'devi'* and construction of temple etc. on the state boundaries in commemoration of victories, *he built a devi temple dedicated to Goddess Durga on the bank of the Pabbar river in the area of* 'Hatkoti' (now in Shimla district) at the junction of the boundaries of Jubbal and Rawain states. He also built a fort, known as *'Rawingarh'*. He had defeated all the chiefs, who revolted against his father and made them tributaries once again. He died at Hatkoti in 1398, after ten years reign.

Raja Nekat Parkash ascended the throne in 1398 A.D. He made *'Village Neri'* as his place of residence and seat of government. Ruling for fourteen years, he was followed by Raja Garbh Parkash in A.D. 1414. He transferred his place of residence from *Neri to Jagri fort,* situated in the erstwhile state of Ratesh from where he ruled for eighteen years and died in A.D. 1432. *Ratesh at present is in the Shimla district.*

Raja Braham Parkash ascended the throne in A.D. 1432 after the death of his father Raja Garbh Parkash. According to Kanwar Ranzor Singh, he made Kot Deothal', in Sirmaur his capital. The old gazetteer however, mentions that he made 'Kot' and 'Gijari' in Ratesh Pargana, his capital. He ruled for fourteen years and died in A.D. 1446. He was succeeded by son Hans Parkash, who also ruled from Kot Deothal and after a reign of twenty five years, died in A.D. 1471.

Raja Rattan Parkash ascended the throne in A.D. 1471 and ruled till A.D. 1495. Raja Prithi Parkash reigned from A.D. 1495 to A.D. 1522 followed by Raja Bahubal Parkash, who ruled at 'Kot Deothal' till 1538. It is believed that he shifted the seat of government to 'Kalsi'. But Kanwar Ranzor Singh mentions that it was done by the next Raja. Raja Dharm Parkash, succeeding in A.D. 1538, is believed to have shifted his place of residence to 'Kalsi' and

after a reign of thirty two years, died in A.D. 1570. He was succeeded by Raja Deep Parkash, who ruled for fifteen years and died in 1585. He was followed by Raja Bhakat Parkash, who died at Kalsi in A.D. 1605, after a reign of twenty years.

According to Captain R.C. in his book, 'Punjab Notes and Queries' (Vol. II Page 136), there is a mention in the history of 'Kotaha', about a very important incident. Man Chand was one of the fourteen Thakurs of Kotaha, which he had received as a Jagir from the Raja of Sirmaur. When Bhakhat Parkash ascended throne, he demanded from Man Chand his daughter in marriage and when he refused the Raja prepared to attack him. When it came to the knowledge of Man Chand, he fled away taking his daughter with him to Emperor Jahangir at Delhi to whom he gave her and himself turned Mohammedan under the title 'Raja Mohan Murad'. The Emperor lent him support to recapture his territory and named it Kotaha and fixed its boundaries at the *'Bhursingh Deo Range'*. He reigned for twelve years, after which he poisoned himself, his wife and children. And then state passed into the possession of the Mirs of Kotaha.

Raja Budhi Parkash mounted the throne in A.D. 1605. He shifted his residence and seat of government from *'Kalsi to Rajpur'*. He died in A.D. 1615. In the list of Rajas, maintained in the state head office, the name of Raja Budhi Parkash in given as *'Bhupat Parkash'*, but in Mahant's list, his reign has been omitted. He was followed by Raja Udai Parkash, who ruled for one year and died in A.D. 1616.

Raja Karam Parkash ascended the throne in A.D. 1616 and reigned till A.D. 1630. For the first six years, he continued to reside at Kalsi and then in A.D. 1621, *he laid the foundation of the city and the fort of 'Nahan'*. It is believed that formerly the state was called *Nahar*, meaning lion, after the lion companion of a saint who was living there. Raja Karam Parkash was disciple of *Baba Banwari Dass*, whose descendents still hold the temple of Jagganath at Nahan. He was succeeded by his brother Mandhata Parkash, who was contemporary of the Emperor Shah Jahan. He was a man of great qualities and so favourite of Emperor Shah Jahan. In the eighth year of his reign, Shah Jahan sent 'Nijabat Khan', *faujdar* of the country at the foot of the Kangra hills to attack Srinagar in Gharwal. In the process, Nijabat Khan restored the forts of Shergarh, Kalsi and Bairat to Raja Mandhata Parkash and Santur territory to 'Jagtu', the Zamindar of Lakhanpur. But Nijabat Khan's Gharwal mission met with disaster. Raja Mandhata breathed his last in A.D. 1647.

Raja Sobhag Parkash ascended throne in A.D. 1647. The Emperor Alamgir in the third year of his reign, conferred upon him the territory of *Kalankhar*, on the ground that it was being mismanaged. It seems to be the present area of *Kolagdh*, near Dehradun. It was during his period that Srinagar was conquered. In grant of his services to the Emperor, he was granted the territory of Kotaha. He expelled the Zamindar of Kotaha and annexed the territory. Before his accession, Aurangzeb sent a second *'firman'*, calling upon

the Raja to intercept all correspondence passing through Sirmaur between 'Sulaiman Shakoh', then at Kashmir and 'Dara Shakoh', his brother. By another *'firman'*, Subhagh Parkash was advised to assist Raja Rup of Nurpur and 'Motmad Rad-Andaz Khan' in an attack against Srinagar (Gharwal). Later on, the area of *'Kalesar'*, which was part of Saharanpur in Delhi province, was given to the Raja, in lieu of his services. Raja Sobhag ruled for twelve years at Nahan and died in A.D. 1659.

Raja Sobhag Parkash had two sons, **Bihari Mal** (or Mahi Chand) and Hari Singh. Bihari Mal succeeded his father in A.D. 1659, under the title of Budh or Bidhi Chand Parkash. He was also known as Mahi Parkash in history. His succession was also recognised in the 10th year of Emperor Alamgir's reign. By a *farman*, the Raja was required to expect Suraj Chand, son of a Zamindar who has usurped the *'Pingaur Parjana'* which formed part of the estate of 'Nawab Fida Khan', the Emperor's foster brother. This farman was duly executed. The Raja took possession of Pinjaur, Sahwana, the forts of 'Jagatgarh' and 'Muzzafargarh', now in Ambala district of Haryana. Later on, the Raja also seized the fort of *'Bairath Kalsi'* from Rāja of Srinagar, which the latter had taken over.

An important event which still lingers in the memory of the people of Sirmaur is that, Raja Mahi Parkash demanded a daughter in marriage from Raja Rup Chand of Keonthal, which was refused by the latter. On this, the forces of Sirmaur were defeated but aided by his father-in-law, the Raja of Guler, Mahi Parkash, attacked the Hat-Koti, where Rup Chand was vanquished and his son gave his sister in marriage to Mahi Parkash. This event forms the part of folk song in the area, Raja Budh Parkash (Mahi Parkash) died in A.D. 1678.

Jog Raj succeeded father Budh Parkash in A.D. 1678 under the title of Mast or Medni Parkash. In the 31st year of his reign, Aurangzeb recognized him as the *'Raja of Sirmaur'* with the title *'Mast Parkash'*. It is apparent from various mandates and *farmans* that now Sirmaur state was completely under the control of Emperors of Delhi. Previously, state enjoyed complete independence. *During his reign, the 10th Guru, Guru Govind Singh came to Sirmaur state.* Between the Guru and Raja Bhim Chand of Bilaspur (kahlur), a rift had cropped up on account of a *white elephant* given to the former by Raja Man Singh of Bangala. Raja Bhim Chand demanded the elephant, but was refused. The Raja expelled Guru Govind Singh from Anandpur, whereupon the Guru camped in village *'Mirpur Gurudwara'* of tehsil Nahan. Raja Medni Parkash invited the Guru to Nahan where he stayed for some time. From Nahan, the Guru migrated to Paonta Sahib in Kiarda Dun and stayed there for years. While the Guru was at Paonta Sahib, marriage of a son of Raja Bhim Chand of Bilaspur was settled with the daughter of Fateh Shah, the Chief of Garhwal and friend of the Guru.

On this auspicious occasion, the Guru sent *'tambol'* (gifts) to Fateh Shah. When it came to the knowledge of Raja Bhim Chand, he wrote to Fateh Shah reminding the latter about old enemity between him and the Guru and informed

him that marriage would not take place if the friendship between Fateh Shah and the Guru continued.

Consequently, Fateh Shah had to return all gifts much to the displeasure of the Guru. The Guru took it as an unprovoked indignity and he threw down the gauntlet, when the Raja of Bilaspur was returning after the wedding of his son. A fierce battle was fought at Bhangani, 12 km. from Paonta Sahib. Raja Karpal Chand Katoch, Raja Kesari Chand Jawanwala, Sukhdev Chand Jasrota and Raja Hari Chand of Hindur were the allies of Raja Bhim Chand. But fortune of the blood predominating battle was decided in favour of the Guru and Raja Hari Chand, Raja Kesari Chand and Raja Sukhdev Chand fell in the field. There still remains a tomb, assumed to be the monument in commemoration of the Ranis of the fallen Rajas. Guru Govind Singh set a *'Jhanda'* at Bhangani, where a Gurudwara also exists. After a reign of sixteen years in Nahan, the Raja died issueless in A.D. 1694.

In the absence of a direct male heir from Raja Mast Parkash, his uncle Hari Singh (brother of Raja Budh Parkash) ascended the throne under the name of Raja Hari Parkash in A.D. 1694. In the forty-sixth year of Shah Alamgir's reign, he was recognised as the 'Raja of Sirmaur'. He ruled for nine years and died in A.D. 1703. Raja Hari Parkash was succeeded by his son Bhup Parkash in A.D. 1703. He was honoured with a *Khillat* (an honour), the title of ***Bhim Parkash*** and recognition as ruler by Shah Mohammed Moazam Bin Alamgir, Emperor of Delhi, by a royal order. He ruled for ten years and died in A.D. 1713. Bhup Parkash was succeeded by his son Biji Parkash. He married the daughter of Kalyan Chand, ruler of Kumaon. The Rani was too religious like the Raja and an *idol of Kali*, which she had brought with her from Kumaon, was installed in a temple, still exists as 'Kalistan'. She also built a large tank and a well for drinking water at Nahan. The reign of the Raja lasted for thirty-six years and he passed away in A.D. 1749.

Pratap Parkash occupied the throne in 1749. His period was marked with revolts by many feudatories who challenged his supremacy. After eight years rule, he died in A.D. 1757, leaving behind four sons, namely *Kirat Singh, the heir-apparent, Jiwan Singh, Muhkam Singh and Ishri Singh.*

Kirat Singh was enthroned in A.D. 1757 while he was quite young. Soon he put all feudatories under his control. On the other side, Mughal Emperor had fallen on evil days and the Sikhs were challenging their authority. The Sikhs had taken possession of Sirhind and were advancing towards Pinjaur. The Raja met the Sikh forces and wrested the forts of *'Ramgarh'* and *'Dhaindaharoo'* from 'Chaudhari Gharib Dass' of Mani Majra, the founder of Mani Majra family. Following the death of Zin Khan, Governor of Sirhind and collapse of Mughal empire, Gharib Dass had taken possession of 84 villages for his father Ganga Ram who was revenue officer for the empire and further extended his territory for seizing the fort of Pinjaur. Raja Kirat Parkash attacked the Pinjaur fort with the help of the Raja of Patiala and seized it by slaying Ganga Ram, who was placed incharge of the fort by Gharib Dass. An attempt

was made by Gharib Dass to recapture the fort of Pinjaur without any success. However, He expelled Kirat Parkash from Chandirgarh.

Raja Kirat Parkash was victorious over the Raja of Srinagar and then captured ***Naraingarh, Rampur, Thanadhar, Ramgarh, Morni, Pinjaur*** and Jagatgarh from the Sikhs. He also drove out Hidayat Khan Rasuria from Loharpur fort, appointed by the Sikhs. In 1767, he built a temple dedicated to Jaganath, in commemoration of his victory. He also entered an alliance with Raja Amar Singh of Patiala, under which restored to him the fort of 'Saifbad' after winning it back from the Mohammedans. Raja Kirat Parkash also helped Raja Amar Singh to put down a rising, engineered by Ganga Ram, the Wazir and Himat Singh, the brother of Raja Ambar Singh. The Kehlur chief was also helped by Kirat Parkash against the attack of Ghulam Qadir Rohilla, who had tortured Shah Alam by pulling out his eyes, to rid of Kehlur of Ghulam Qadir. Some time afterwards, Praduman Shah, the ruler of Garhwal sought Raja Kirat Parkash's assistance to quell the Gurkha assault. The Raja advanced to Garhwal and engaged the Gurkhas, but for unknown reasons. Garhwal chief abandoned the field. On this, Sirmauri Raja thought it advisable to enter into a treaty with Gurkhas under the headship of Amar Singh Thapa to end animosity. According to the treaty concluded by them, the Ganga was accepted as the boundary line between the Gurkhas and the State of Sirmaur. While returning, Kirat Parkash was taken ill and he died at **'Lakar Ghat'** on the shores of the Ganga at the age of 26 years in the year 1773.

Jagat Singh, son of Kirat Parkash ascended the throne in A.D. 1773, under the title of Jagat Parkash. To combat the advance of Sikhs, he appointed Mir Baqar Ali Khan of *'Garhi'* as the *Nizam* of *'Kotah area'*. Mir Baquar Khan was a descendent of Quasim Ali Khan, a royal physician who was granted revenue free land in Garhi area, having eighteen villages. Later on, British Government separated the area from Sirmaur and bestowed it upon the descendants of Mir Baqar Ail Khan in recognition to their services during the Gurkha war.

The old friendship between the Sirmaur and the Patiala Rajas came handy for Jagat Parkash. Raja Amar Singh of Patiala helped Jagat Parkash, first to kill the rebellious attitude of local chiefs and secondly imposed a crushing defeat on Ghulam Qadir Rohilla in the battle of *Katasan,* 19 km. South-East of Nahan. In commemoration of this victory, he *built a temple of Devi of Katasan.* Meanwhile, Raja Mahan Chand of Kahlur attacked Hindur (Nalagarh) and occupied a fort of this territory. On the request of Raja Ram Singh of Hindur, Raja Jagat Parkash sent an army and the territory got restored. After nineteen years reign, Raja Jagat Parkash died in A.D. 1792.

Raja Jagat Parkash left no son. On that, his younger brother, **'Dharam Parkash'**, ascended the throne. His reign was an eventful one. Ram Singh, the ruler of Hindur, captured few of the feudatories, which were under the control of Sirmaur state. To check the interference and advance of Ram Singh, Raja Dharma Parkash set out the head of an army and a battle was fought at

'Chhalra Bhaira'. In this battle, an ally of Ram Singh, Raja Jagat Singh of Baghat, fell into the hands of Raja Dharam Parkash. To secure his release, Raja Ram Singh entered a peace treaty with the Raja of Sirmaur and returned all the wrested areas. In the meantime. Kanwar Parkash Shah of Srinagar (Gharwal) invaded and seized the fort of **Khushalpur near Dehradun**. Ishri Singh, along with a force, was at once dispatched. A fierce battle took place between the two and ultimately **'Kanwar Parkram Shah'** had to retreat, wounded and defeated. Kanwar Ishri Singh finally regained the possession of the fort. About that time, Katoch chief of Kangra, **Raja Sansar Chand** had begun his mission of integration and merger of hill states with Kangra Kingdom by force. He had taken the possession of some areas and forts of Kahlur and the forces of Raja Mahan Chand of Kahlur were being unable to counter the onslaught of Raja Sansar Chand. On this, help was sought from Raja Dharam Parkash by Mahan Chand in exchange to a lakh of rupees as *nazrana.*

The Raja of Sirmaur got agreed to this proposal and accordingly marched at the head of Sirmaur and Kahlur troops with the assistance of a number of Thakurs. Raja Ram Singh of Hindur was also an ally against Raja Sansar Chand. A great battle ensued at the boundary of Kangra and Kahlur, place named **'Chararatu'** in A.D. 1796, in which Raja Dharam Parkash fell to the gun shot of his enemy. Raja Sansar Chand wanted to take away the dead body of the fallen Raja as a trophy, but his (Dharam Parkash) men would not tolerate the execution of such a design and in an attempt to protect the body, they laid their lives on the spot. Raja Dharam Parkash ruled for four years till 1796 and died without a heir.

Karam Singh assuming the title of Karam Parkash, the younger brother of Raja Dharam Parkash, ascended the throne in A.D. 1796. His period is famous for conspiracies and mal-administration. The annals of the erstwhile Patiala state mention that, to put down a rebellion in Sirmaur State, an expedition was led in 1796 to Nahan to assist Raja Karam Parkash.

Mehta Prem Singh Wazir, in the first two yesrs of Raja Karam Parkash's accession, was hand in glove with Raja. Later on, however, he became insolently disrespectful and instigated Raja Ram Singh of Hindur for an invasion on Sirmaur. He also encouraged Kanwar Kishan Singh, son of Ishri Singh to rebel. The Raja of Handur took possession of the areas adjacent to Handur and Kishan Singh started looting Nahan, the capital and made the fort Naraingarh his base. When Maharaja Ranjit Singh, came to know about Kishan Singh, he subdued him and his territory was wrested and made over to Sardar Fateh Singh, a General, on receipt of *nazrana* of Rs. 40,000/-. On the other side, Mehta Prem Singh was beheaded and his all property was confiscated by the Raja of Sirmaur for hatching a conspiracy. This action of the Raja led to a large scale resentment amongst his subjects and officials belonging to *'Kanet'* and *'Bhat'* communities, became unruly. Taking advantage of these chaotic conditions, a number of feudatory chiefs declared themselves independent. In A.D. 1799, Gurkhas in defiance of the earlier treaties, occupied

Dehra Dun and its forts. Sikhs, who were already looking for such an opportunity, jumped into the fray and in the South, took possession of the Pinjaur territory. The areas of *trans-Ghaggar and cis-Ghaggar* at that time belonged to the state of Patiala and Sirmaur respectively.

In the meantime, sons of **'Mian Kushal Singh'**, namely Mian Maldev and Narain Singh, administrators of Ramgarh on behalf of the state, declared themselves independent. On learning that a conspiracy was being hatched against him, Raja Karam Parkash, along with his family members in A.D. 1803 went to the *'fort of Kangra'* situated on the top of a hill in Kayarda Dun, seventy km. East of Nahan and began to reside there. The absence of The Raja was a blessing in disguise to the disloyal officers. The most influential group of Ajib Singh, Prem Singh and Kishan Singh conspired with Kanwar Ratan Singh, the Raja's brother, whom they desired to place on the throne, while others made Kanwar Kishan Singh the ring leader and started plundering. In the process, state army also aroused against the Raja.

To arrest or assassinate him, they besieged the Kangra fort. But Raja Karam Parkash along with Rani Guleri escaped from the fort at night and fled to Kalsi. In Nahan, the mischief mongers seated Kanwar Ratan Singh on the throne under the title of **'Ratan Parkash'**, while Kanwar Kishan Singh continued his activities of plundering and harassment. Raja Karam Parkash then went to Dehradun where he met Amar Singh Thapa, a senior military officer of Nepal and sought his help for crushing the conspirators. *Gurkhas, already eager to carve out colonies, promptly agreed and invaded Sirmaur, expelled Ratan Parkash and set up their own government, leaving Karam Parkash in no better position than before.* Amar Singh Thapa, there upon, proceeded to Hindur state. Karam Parkash also accompanied him upto Ramnagar. On his return, he repaired the **'fort of Morni'** to stay there. The confusion and anarchy, prevailing earlier, continued even during Gurkha's period. In the meantime, the chiefs of **Kotah, Ramgarh, Loharpur, Morni,** Pinjaur, Jagatgarh and other places threw off their allegiance to the state, as a result of which these territories were lost to it forever. While political and administrative events were hardly favourable, a personal shock occurred to the Raja in the form of heir-apparent Kanwar Gopal Singh's child, named Fateh Singh. Guleri Rani in all had three sons, named Fateh Parkash, Man Singh and Jai Singh.

Amar Singh Thapa, then conquered Hindur state and launched an attack on Kangra. When he came back to Morni, instead of restoring Raja Karam Parkash to the throne of Sirmaur, appointed his son (Amar Singh'), Ranzor Singh as an administrator and sent him to Nahan. Ranzor Singh got constructed a fort on the hill of *'Jaitak'* where he lodged himself. Raja Karma Parkash then went to Subathu in the area of Ramgarh. This place was under the control of two brothers, Mahadev and Narain Singh, sons of Kushal Singh, who were in rebellion against the Raja, for which reference has already been made. They did not allow Raja Karam Parkash to stay there and compelled him with his

family and Wazir Mauji Ram Mehta to seek an asylum at 'Buria' in Ambala district. By now, the condition of the Sirmaur state had become so deplorable that administrator of a particular area became the lord thereof. The Raja of Paonta occupied Pinjaur, Raja Karam Singh of Hindur took possession of the areas lying adjacent to his boundary and Nahan passed into the hands of the Gurkhas. Raja Karam Parkash continued to reside till his death at Buria in 1826.

While Raja Karam Parkash was living an exiled life at Buria, the Guleri Rani, a wise and courageous women, appealed to Colonel Ochterlony, the then Political Agent at Ludhiana. The Britishers who were already keeping a close vigil on Gurkhas movement, formed a division consisting of 3,000 men in October 1814 at Meerut and moved towards Nahan. At Maginand Pass, Major General Martindale also joined and took the command of the Army. In the first instance, town Nahan was captured and then a bloody battle took place for capturing the 'fort of Jaitak' by the British forces. In A.D. 1815, this was occupied by a British force. With this, the Gurkha war came to an end and a treaty of peace was signed on the 2nd day of December 1815 between the Raja of Nepal and the East India Company.

Since then, Rajas were brought under general protection of the British government and territories belonging to them were restored. But Raja Karam Parkash, for his notorious behaviour, was excluded from the succession and succession passed onto his eldest son Fateh Parkash. Raj Kumar Fateh Parkash, a child of six years only, ascended the throne in 1815 as Raja Fateh Parkash, in accordance with one *Sanad* dated 21st September 1815. Raj Kumar was sent to Nahan under the guardianship of Rani Guleri, his mother and Captain George Birch, the Political Agent.

Aziz-Ullah-Khan was appointed administrator of the state for the minority period of the Raja. Mian Devi Singh and Dalip Singh, sons respectively of Mian Kushal Singh and Ram Dev of Ramgarh, then in Punjab, executed a deed of allegiance in 1823, thereby attaching Ramgarh firmly to the state. In 1827, Raja Fateh Parkash attained majority and the British Government of India granted him full administrative and revenue powers. In the same year, he also attended the Durbar held at Shimla by the British India Government. To set up good relations, Rana Puran Chand of Jubbal, deputed his Wazir to the court of Raja Fateh Parkash.

Raja Fateh Parkash took over the charge of the state which had fallen in a dilapidated condition without faithful officials and sympathetic relatives. But the Raja rose equal to the task. He removed all causes of maladministration with great ability and straightened out the affairs of the state. *He built the 'Sheesh Mahal' and the 'Moti Mahal' for the use* and occupation of younger Rani from Kahlur. A temple was also constructed in the vicinity of the palace. In the year 1833, the Raja asked the British government to restore the area of Kayar-Dadun, excluding Kalsi and Jaunsar Bawar for a consideration of Rs. 50,000/-. He had been charged to pay Rs. 20,000/- by way of indemnity and

the payment of Rs. 50,000/-, for which he got back Kayarda Dun. Again i 1844, he applied for the restoration of the areas of Kalsi and Jaunsar Bawa promising to pay the balance Rs. 1,50,000/- but was rejected.

Raja Fateh Parkash remained loyal to the Brithish Government in a expedition against Afghanistan to replace Mohammed Khan Amir by Kin Shujah-ul-Mulik. In the Punjab war of 1845, the Raja again placed the stat troops commanded by Kanwar Madan Singh, at the disposal of the British Government. The Sirmauri troops helped in the possession of the 'fort o Ghungarana'. Raja Fateh Parkash celebrated marriages from the royal houses of *'Keonthal', 'Bilaspur', 'Baghat', 'Kuthar'* and *'Kumharasin'*. The elder Rani from Bilaspur bore him a child, the apparent heir, who however died shortly afterwards.

In 1827, a son, the next heir-apparent, was born of Rani Baghati and was known subsequently as Raghubir Parkash. She also gave birth to a daughter. The younger Rani of Kuthar gave birth to Raj Kumar Sujan Singh in 1829 and to Raj Kumar Bir Singh in 1832. In 1845, when Raja Fateh Parkash was on a pilgrimage to Gaya, some state officials and crafty courtiers conspired to create bad blood between father and the son. But conspiracy, however, proved abortive and fizzled out when the Raja returned. Raja Fateh Parkash, after a reign of thirty five years, died in A.D. 1850.

Raghubir Parkash succeeded his father in A.D. 1850. In the second year of his reign, crafty courtiers instigated him to confiscate the Jagirs granted to the Raj Kumars. The aggrieved Raj Kumars made an appeal to Lord Dalhousie, the Governor General of India and Kanwar Bir Singh himself went to Calcutta to present and pursue the case. This appeal was accepted and vide letter no. 674 dated the 27th October 1855, villages in question were restored to the Raj Kumars. Subsequently, on the request of the Raja, the Government proposed a grant of cash in lieu of villages. The Superintendent of Hill states, accordingly visited the villages of 'Baka', 'Jaibole Devni' and 'Bhud' in June 1856 and proposed cash payment of Rs. 1,899/- in lieu of the four villages. With this, the litigation came to an end.

By a memorandum dated 22nd July 1856, the Superintendent of Shimla Hill States, cautioned the Raja against his courtiers and deterioration of law and order and administration. The Raj was greatly distressed to learn about this and fell ill. In the 27th year of his age, he died of piles on the 20th January 1856. Raja Raghubir Parkash had married five Ranis. The second Rani from the House of 'Haithiali' had born him a son and heir-apparent, Shamsher Singh, in the year 1845. He had two more daughters and a son Surat Singh.

At the time of Raja's death, the Kanwars were living separately and their participation in state affairs was not looked upon with favour by the officials. Whereupon a committee was set up on the 19th February 1857 consisting of 'Mehta Devi Datta' and 'Moti Ram Bhandari' as administrator of the state. As both the appointees were illiterate and incompetent, the administration could not be run on desired lines and ultimately the Superintendent of Shimla Hill

States appointed the Kanwars and Judges for determinations of Judicial cases. Kanwar Surjan Singh remained associated with state administration during the minority of Raja Shamsher Parkash. *During 1857 uprising, Sirmaur assisted the British in both ways by material and manpower.* In recognition of their services, after the revolt had been quelled, certificate and *Khillat* (a robe of honour) were granted to the Kanwars. Both, Kanwar Sujan Singh and Kanwar Bir Singh invested their capital in business and in the purchase of property.

Raja Shamsher Parkash ascended to the throne in 1856 at the age of ten and ruled till A.D. 1898 for 42 years. *In lieu of his services during 1857 revolt, the British Government awarded him a costly robe and entitled him to a salute of seven guns.* For his administrative skill and performance, in 1867, gun salute was increased from seven to eleven. He had married to the daughter of the Raja of Keonthal. She was very adept in judicial and administrative skill and was an asset to the Raja. In her memory, Raja laid the garden known as 'Ranital Bagh'.

Raja Shamsher Parkash constituted Forest Department on organized and regular lines for the supervision and administration of forests. His next step was to organize state forces. In the subsequent years, the Raja had a well disciplined force of about four hundred infantry and one hundred and fifty cavalry. In the second Afghan war in 1879, he offered invaluable services to the British government. In 1880, a separate cantonment was built on a nearby hillock, known as 'Satyon-Ka-Pahar'. In 1888, Raja raised a body of Imperial Service troops, consisting of five infantry with thirty sappers, along with two companies of pioneers. In 1889, these were formed into the 'Imperial Service Sappers and Miners' and served with distinction in the 'Tirah campaign' of 1897-98 under the command of Major Bir Bikram Singh, younger son of the Raja, who received the Order Of Indian Empire in recognition of his services. In 1896, the Sirmaur State was taken out of the political control of Superintendent of Shimla Hill State, sanad was placed under Commissioner of Delhi.

To give a new look to the administration and to the process of organisation, Urdu knowing clerks were replaced by those conversant with the English language in A.D. 1890. The Raja *purchased a tea garden in 1890, named Enfield,* in *'Dehradun'* and yet another garden at *'Cherapani'* in the Kumaon district, to increase the state revenue and to improve economic condition of the people. *It was during Raja Shamsher Parkash's period that agricultural exhibitions and Dussehra celebrations were introduced in the state.* Nahan became first municipality in the principality during his time. His greatest achievement was said to be the colonization of Kayar-Da-Dun which was hitherto a wild dense forest track. By way of social reforms, the Raja prohibited the custom of 'Siyapa' (bewailing) at the time of death. Once, while in Kayar-Da Dun, the Raja had a stroke of paralysis and continued to suffer for about two and a half years and finally ended his life on 2nd October 1898.

Tikka Surinder Bikram Singh ascended to the throne on 27th of October

1898 after the death of his father Shamsher Parkash. The Raja was appointed a 'Knight Commander of the Order of the Star of India' (KCSI) on the 9th November 1901. In 1902, *he was appointed a member of the Imperial Legislative Council and remained so for five years.* In 1906, he was given unrestricted power to pass sentence of death upon his subjects. He had marriage alliance with the daughter of Raja of Suket. Raja Surinder Bikram Parkash was highly successful in integrating administrative, economic and political efficiency of the state. He took great interest in the development of communication and valuable forests of the state. He ruled for thirteen years. He helped the British army with men and material, in South Africa. He died on the 4th July 1911 at 'Musoorie'.

Maharaja Amar Parkash succeeded his father formally on 26th October 1911. He was installed with full powers by the Lieutenant-Governor. The Raja was born in 1887. His coronation ceremony was memorable. In 1910, he married the eldest daughter of Shri Deb Shamsher Jung Bahadur Rana, ex-Prime Minister of Nepal. The Maharani was a distinguished lady. On the 3rd June 1915, the Raja was honoured with the title of K.C.S.I. During first world war (1914-18), the Maharaja rendered invaluable service to the British government. In 1914, he sent his small well knit army, four hundred strong, of Sirmaur Sappers and Miners to Mesopotamia and when this unit was besieged, another unit was raised. Financial assistance provided by him runs into lakhs of rupees to the government during war period. It is for this friendly gesture he was given the title of 'Maharaja' on 1st January 1918 and in the same year, gazetted as Honorary Lieutenant-Colonel. For this, his salute was also raised from 11 guns to 13 guns as a personal distinction. In 1919, the Maharaja was invested with unrestricted powers to proclaim sentences of death. On 1st January 1921, he received the K.C.I.E. in further recognition of his services during the war. He inaugurated 'Mahima Library' and got the road metalled from Nahan to Kala Amb, which was completed in 1927. While in Europe in May 1933, for the treatment of the Maharani, he breathed his last in 'Vienna' on 13th August 1933. During the absence of the Maharaja, a council was set up to look after the administration of the state.

Maharaja Rajinder Parkash : Maharaja of Sirmur from 1933 to 1948, installed on the throne on 22nd November 1938 with full powers. The *'Raj Tilak'* ceremony was, however, performed on the 13th February 1935. He was born on 11th January 1913. He was member of the Standing Committee of the Princes' Chamber, married 1stly on 15th April 1936, Maharani Durga Devi who born in 1917, died in January 2000, daughter of Raja Yaduvendra Singh of Nagod, ('Nagad state' in Central India) and his fourth wife, Rani Vatsraj Kunwari, married 2ndly on 12th December 1941 to Maharani Indira Devi, daughter of Thakore Sahib Shri Sir Bahadursinhji Mansinhji of Palitana, and his wife, Thakorani Bai Shri Sita Ba Kunverba Sahiba. They had two daughters. In the year 1943-44, he was promoted to the honorary rank of a captain in the British Indian army. He was entitled to a salute of eleven guns.

Raja had no son to succeed him, so after his death there were many claimants to the ancestral property.

Maharaja Udai Prakash ji: Maharaja Udai Prakash ji (son of Maharajkumari Nalini Devi), who was adopted on 23rd September 1965 by his maternal grandmother, Shri Maharani Durga Kumari Deviji Sahiba after the death of her husband Lt. Maharaja RAJENDRA PRAKASH Bahadur. He subsequently assumed the headship of the Royal House of Sirmaur and the title of Maharaja of Sirmaur, but this never received a sanction or recognition from the Government of India along with a denial to Privey Purse. Because his grandmother had become estranged from the late Maharaja and was virtually repudiated by him over twenty years before his death, and they had long ceased to form part of a joint Hindu family. She, therefore, did not have the Maharaja's sanction nor enjoy the right to adopt any heir on his behalf. Furthermore, family custom required any adoption to be approved by members of the wider Royal family and clan, not given for the adoption at the time and never since. Lastly, Hindu custom usually requires that the eldest son in a family continue his paternal line and fulfil the duties and obligations pertaining to them, adoption to another clan being sanctioned for younger sons. The Kunwar fulfilled none of these requirements. Any adoption by his grandmother consequently had only a religious significance, enabling him to perform certain obsequies at her death and succeed to her own personal property, but no rights to either the succession or the property pertaining to her husband's house. The family inheritance remained a matter of legal dispute with his maternal aunt and grand aunts, including the Maharani of Jaipur, to whom her father had willed his estate according to the then Indian civil laws of inheritance. After many years, these were finally settled and disposed of by mutual agreement in 2011 at Lucknow, on 18th February 1984, Shri Rani Rasika Raje Sahiba (born on 4th December 1964), daughter of Maharaj Shri Balwant Singh Sahib, of Shahpura, by his wife, Rani Shri Alka Raje Sahiba.

The biradari (brotherhood) of Bhati Sardars of Simaur never accepted Udai Prakash ji as the Maharaja of Sirmaur. On 17th March 2013, Bhati Sardars of Sirmaur collectively had a meeting with Rajmata Sahiba Padmini Devi of Jaipur at City Palace Jaipur to request her to place Rajkumar Laksh Raj, son of Maharajkumari Diya Kumari of Jaipur and grandson of Maharani Saheba Padmini Devi to the throne of Sirmaur.

Lakshya Raj Singh: The ceremonial coronation of nine-year-old Lakshya Raj Singh as the Maharaja of Sirmaur was held with royal splendor at the Nahan Palace on 15th May 2013. Maharani Padmini Devi of Jaipur performed the "tilak" and installation ceremony of her grandson, Lakshya, as the successor to her late father, Maharaja Rajendra Prakash, the last ruler of the Sirmaur state. who had no male heir. It was perhaps for the first time after the death of the Maharaja in 1964 that the doors of the royal palace were thrown open for the public during the last two days preceding coronation ceremony. With only select royal guests being allowed inside the palace, the

ceremony started with 75-year-old Padmini devi leading the royal procession along with her grandson Lakshya. Ceremonies were performed by royal priests amid chanting of mantras. Diya Kumari and Narender Singh, Padmini's daughter and son-in-law, followed suit as their younger son assumed the title of the *'Maharaja of Sirmaur'*.

The silver throne of the late Maharaja, which had been taken away to Jaipur by Padmini Devi after his death, was specially brought here for the ceremony. The young Maharaja, whose paternal "gotra" had already been changed from *"manav"* to *"attri"* of the Sirmaur clan on April 13 in Jaipur was presented with a double-edged sword by Ajay Bahadur Singh, a member of the royal family of Nahan, who till now was its custodian and used it for ceremonial functions.

The history of the freedom movement in the erstwhile state of Sirmaur came to be written during the period of Maharaja Rajinder Parkash. In the initial stages, all political activities were suppressed by the British regime with an iron hand. It was not long before independence that people's representatives were allowed to associate themselves with day-to-day administration in the British territories, but such measures were discouraged in the princely states. Most of the Indian states at that time had personal despotic rule of the Indian princes.

All India State People's Conference was launched by Congress leaders to wage the freedom struggle in the Indian states. A number of branches of Praja Mandals (a movement for responsible government) was also formed throughout the states. The Ludhiana session of the All India State People's Conference (AISPC) passed a resolution recommending integration of smaller states into larger units so as to have adequate finances to enable the setting up of a healthy and strong administration. Till then, all Praja Mandals were working separately, decided to affiliate themselves as units of All India State People's Conference. The Praja Mandals from the borders of Jammu and Kashmir to the Tehri Garhwal state in Uttrakhand, previously United Provinces formed themselves into one organisation, called the 'Himalayan Hill States Regional Council', with its headquarters at Shimla, affiliated to All India State People's Conference. Like other princely states, Sirmaur also came under the influence of national resurgence. To begin with, people started agitating for social, economic and administrative reforms.

The 'Praja Mandal Sirmaur' was formed some time in 1935-36. The first demand which seems to have irked the officers of the state, was the one asking for inclusion of at least one representative of the public in the state ministry. The sons of the soil, especially Parmar brothers, were really giving a tough time to the rulers. Till 1936, the work was done from behind the curtain and it was only in 1937 that regular Praja Mandal was formed under the presidentship of Chaudhary Sher Jung, who joined the movement after his release from Ahmadgarh Jail. Some of the important leaders of the Praja Mandal is Sirmaur were, Sarvshri Nagendra Singh, Devendra Singh,

Rajendra Datt, Kishan Singh, Hari Chand and Hitendra Singh.

During 1943-45, the Praja Mandal became a force to reckon with, under the able leardership of late Shri Dharam Narain and Pt. S.N. Ramaul. In 1945, a turning point came when Dr. Y.S. Parmar, Dr. Pattabhi Sittaramaya (the then President of State People's Conference), Jai Narain Vyas and Devi Chand Ambalwi, visited Sirmaur and addressed the enthusiastic workers. Knowing fully, the magnitude of uprising, authorities decided to concede the demands for holding elections in the state, for the constitution of a legislative body, called *'Raj Parishad'* and appointment of one popular minister. The first popular minister was Shri S.D.S. Chauhan.

The history of Sirmaur state would remain incomplete if we fail to mention the 'Pajhota Andolan of 1942'. This movement was started under the aegis of the Kisan Sabha in which Shri Lakshmi Singh and Vaid Surat Singh played a pivotal role. The aims and objectives of the 'Kisan Sabha' were political as well as agrarian. The leaders of Pajhota Andolan had made some simple demand, that the ruler may himself visit the area and redress their grievances, but unfortunately no one paid heed to the problems. The ruler was made to believe by his advisers that the agitators were bent upon humiliating him. For this, police and military forces were deputed to suppress the movement. When the movement was finally suppressed by imposing martial law, about 70 people were tried as accused and out of these 17 were set free, eight were sentenced to two years imprisonment each and 50 were awarded life imprisonment.

Later on, all prisoners except Vaid Surat Singh, Shri Basti Ram Pahari and Shri Chet Singh were released in 1945-46 and these three were freed in 1948 only. In the meantime, the Praja Mandal movement, which had been successful in forcing the ruler to demorcatise the administration with the achievement of independence in 1947, started demanding merger of the state into Indian Union. *After initial hesitation, the ruler signed the merger document on 13th March 1948 at Nahan, but merger of the state was legally recognised from 15th April 1948.* In this whole struggle, the role of Dr. Y.S. Parmar, who was from village Bhagthan in Sirmaur district, should be written in golden letters.

GENEALOGY OF SIRMAUR

(1) Subhansh Parkash (1195-1199)
(2) Mahe Parkash (1199-1217)
(3) Udit Parkash (1217-1227)

(47) Rajinder Parkash (1933-1948)

People : Population of Sirmaur district is predominantly Hindus and next come Mohammedans and third being the Sikh. There is a sprinkling of Jains and Christians in the district. Traditionally in the Trans-Giri area, the inhabitants use to speak 'Giri Pahari' and in Cis-Giri area, they use to speak 'Sirmauri' or what is popularly called 'Dharthi'. But at present, with the spread of communication network, predominant population of the district speak Hindi, Punjabi and Pahari.

ECONOMY

Maize and wheat are the staple food of the people. People take three or four meals a day. The morning meal is called *'Jathalru'*, the midday one *'Checli'* and supper *(dinner) 'bailu'*. Sattu is also eaten very frequently. Potande is much liked in the hills. It is practically same as the Pura of the plains.

The soil in the district varies from light sandy to heavy clay and the nature of the soil in Paonta valley ranges sandy and sandy loam and in Pachhad, Renuka and Nahan tehsils medium loam to clay types. In the higher elevation, maize is predominant crop. Apart from this, ginger and turmeric are also grown in summer. Still in higher elevations, potato and wheat are grown. The Kayarda-Dun valley is known for wheat and quality rice. Amongst vegetable cultivation, peas, tomato and potato have become very popular in the district. *'Kinnauri Arkel'* and *'Lincon Boon'* Villas varieties of 'Peas' and *'Solan Gola variety'* of *'tomato'* is very famous. In the field of horticulture, apple, plum, walnuts, kagzi lemon and orange are grown on a very large scale.

In order to provide a market for horticulture products, the State government has started a Food Processing Unit at 'Dhaula Kuan', run departmentally. The HPMC is having fruit processing units at 'Rajgarh' and 'Bagthan'. Livestock is the chief wealth next to agriculture to the predominant population of the district. Every house invariably keeps a few cows or buffaloes, sheep, goats, pigs or ponies. For the first time in December 1960, Central Poultry

Farm was established by the Animal Husbandry Department. Since then, a good progress has been made in the poultry farming.

The Sirmaur district has been extensively crisscrossed by the rivers and the streams and most of them having perennial water flow of considerable volume. With the result, fishing in the rivers and streams has been a pretty old pastime in the district. *The Mulee, Masheer, Gid* and *Mirror cap* varieties are found on a large scale, helping in the economic well being of the people. Industrially, Sirmaur district was not much advanced. The first such unit was 'Nahan Foundry Ltd'. Set up by Raja Shamsher Singh in 1875 A.D. The chief items of production of this foundry are cane crusher, cast iron and black sheet panes, flour mills, centrifugal pumps, mono-block pump sets and other agricultural implements and accessories. Another oldest factory in Nahan is the 'Resin and Turpentine Factory', started in 1945. It came into operation from 1949 onwards. The Cement Corporation of India has set up cement factory at 'Rajban'. Other important factories are Himachal Mineral & Chemical, Paonta Sahib, Nahan Ceramics Paonta Sahib, Himachal Shaddy Mill Ltd., Paonta Sahib, Farm Fresh Fruit Pvt. Ltd., Bata Mandi, Paonta Sahib, Government Auyrvedic Pharmacy, Majra, Himachal Turpentine Products Ltd., Kala Amb, Himachal Mine Quarries, Bata Mandi etc.

The trade and commerce in Sirmaur district is confined to chief business centres as Nahan, Paonta Sahib, Dadahu and Sarahan where people usually display their products. The first bank in Sirmaur was called 'Nahan National Bank', which was established in 1893 and later in 1944, renamed as Bank of Sirmaur. In 1955, the Bank of Sirmaur was merged with H.P. State Cooperative Bank Ltd.

In district Sirmaur, there are 75 milk cooperative societies and each society has 50 to 250 members. The milk federation has six chilling plants at Renukaji, Bhagthan, Maryag, Rajgarh, Sarahan and Nauhradhar. Nahan and Kafota has two milk processing plants. NDRI Karnal and Agriculture Science center Dhaula Kuan imparting scientific training to the people associated with milk cooperative societies. Mother Dairy has declared milk quality of Himachal Pradesh dairy units the best in the country.

Fairs and Festivals: Like any other hill district, Sirmaur is full of fairs and festivals. Most of these fairs and festivals had their origin in some religious or otherwise holy or sacred concept or commemoration. The merry making and worship have long been mixed together in the celebration of fairs and festivals. Later, businessmen saw it as a great opportunity to excel their business interest and now third aspect, i.e. commercial, has also become an integral part of these events.

The following are some of the important fairs and festivals. 'Vyas Fair', near village Vyas in Tehsil Paonta, in the month of Chaitra. Vyas Rishi, it is believed, practised penance at the site of mela, where a temple is dedicated to the Rishi. 'Gandhi fair' at Amboa, Tehsil Paonta on 30th January each year, dedicated to Gandhiji. 'Nag Naona fair' at Purowala village in Paonta Tehsil

during Dussehra at an ancient flood damaged Nag-Naona temple. 'Bisu' (March-April), 'Haryali' festival (June-July), 'Magh festival', 'Janmashtami', 'Renuka fair', 'Navratras', 'Trilokpur fair' and 'Hola' in Paonta Sahib. By late Patalian Shivsthan, a place at Paonta, has also become quite famous.

Places of Interest: Banethi, Bhangani, Choor Peak, Dadahu, Deothal, Dhaula Kuan, Haripur, Jaitak, Mangarh, Nahan (famous for Guru Jawahar Singh fair and Sawan Dwadshi fair) Paonta Sahib, Rajgarh, Renuka Lake, Sarahan, Sirmaur, Trilokpur and Uttam Wala Bara Ban. (This place is famous for goddess locally called Katasan Devi).

The following table reveals the growth of population during the past years commencing from 1901-2011:

DECADEL VARIATIONS IN POPULATION SINCE 1901-2011

Year	*Persons*	*Males*	*Females*	*Decadel variation Variation*	*Percentage Decadel of males*	*Females per 1000*
1	2	3	4	5	6	7
1901	135,687	75,461	60,226	—	—	798
1911	138,520	76,044	62,476	+2,833	+2.09	822

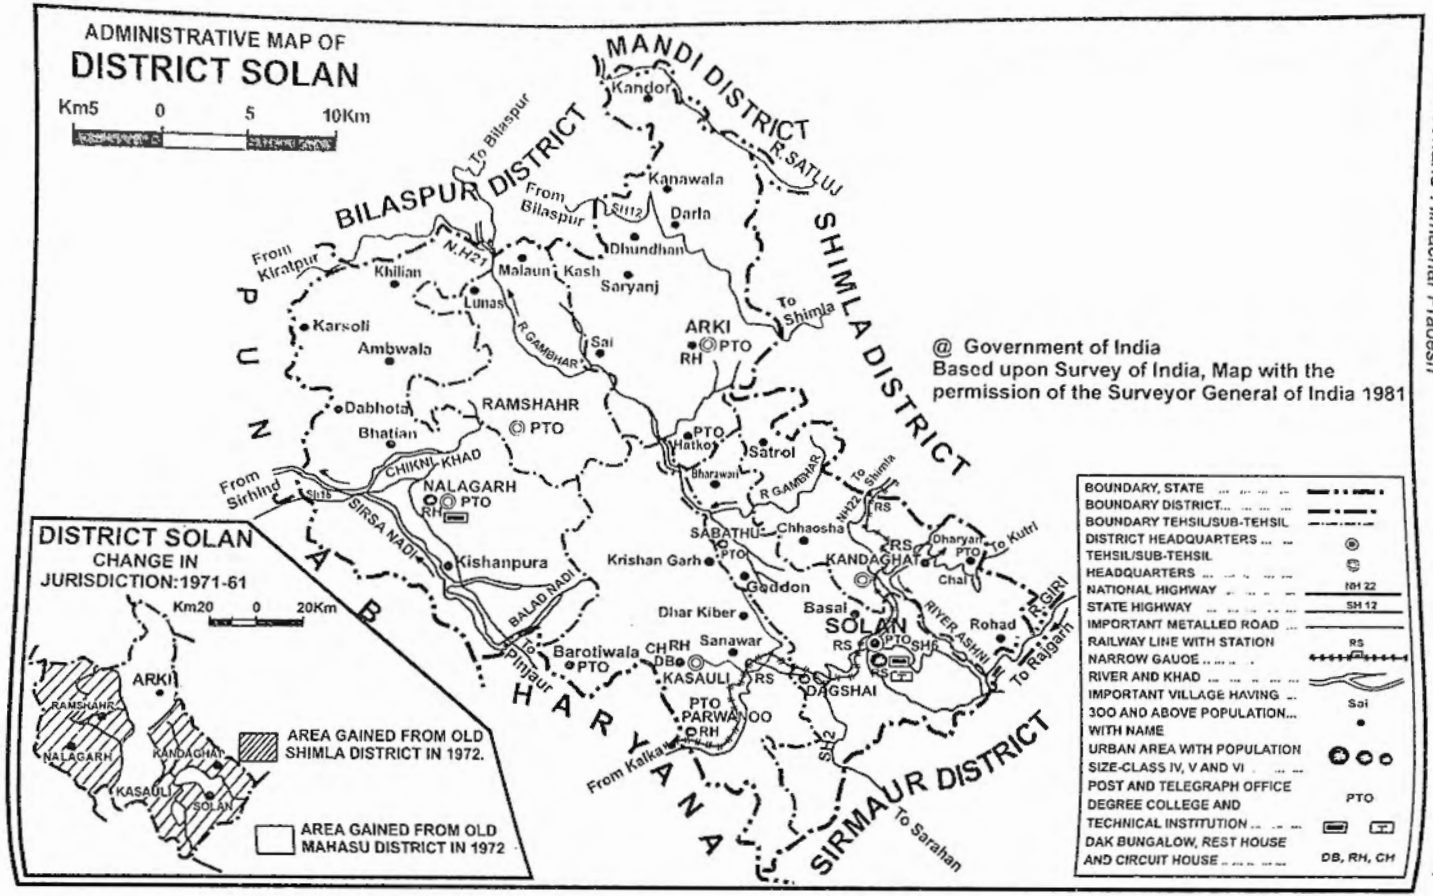
SOLAN

(HQ, SOLAN, ALTITUDE 1,463 METERS)

Languages spoken : BAGHATI, HANDURI AND HINDI



Solan is located between the longitudes 76.42° and 77.20° East and latitude 30.05° and 31.15° North. This district is bounded by Shimla district in the North and by Ropar district of Punjab and Ambala district of Haryana in the South, by Sirmaur district in the East and Bilaspur district in the West. Mandi district touches the boundary of Solan district in the North-East. The elevation of the district ranges between 300 to 3,000 meters above mean sea level. The terrains are mostly mountainous except 'valleys of Saproon' in Solan tehsil, 'Doon' in Nalagarh tehsil and 'Kunihar' in Arki tehsil. *Doon valley is the most fertile area of the district.*

The study of rocks has revealed that some 1200 to 1500 million years ago, this area was a part of sea called Tethys. The sea had its volcanoes which erupted lavas. These lavas' flow got layered with the rocks being deposited in the sea and classified as 'Mandi-Darla volcanoes' within Sundar Nagar formation. About 275 million years ago, the complete glaciation took place and the sea was covered with floating icebergs which carried large amount of icebergs. The formation containing these rock fragments are grouped as the *Balani'.*

It was some 25 to 30 million years ago when the Himalayan mountain ranges started rising. With the uplift of the Himalayas, a long narrow depression was formed in front of it, where again the sediments were deposited. The period had a very congenial climate for life and the shallow water was abound with a variety of fauna and flora. The fossil remains of these animals are now found in the rocks and their studies have linked up evolution of life from primitive to such advanced life as the modern man. About two to three million years ago, the complete glaciation took place and the sea was covered with floating iceberg these rock fragments are grouped as the *'Balani'.* It was some 25 to 30 million years ago that these rocks were also lifted up and folded by forces similar to that at the time of the Himalayan uplift into a low mountain chain now called as *Shivalik range.* Solan district is covered by catchment areas of three important rivers, namely Satluj, Yamuna and Ghaggar. Main tributaries of Yamuna is Asni and those of Satluj river are Kiar-Ka-Nala, Ghambhar, Dabar Khad, Kuthar Nadi etc. Kaushala Nadi is the main tributary of Ghaggar., Sirsa is the main stream in Nalagarh subdivision.

HISTORY

The district in its present form comprises of the erstwhile princely state of *Baghal, Baghat, Kunihar, Mangal, Beja, Mehlog, Hindur (Nalagarh)* and parts

of *Keonthal* and *Koti* and hilly areas of composite Punjab state which were merged in Himachal Pradesh on 1st November, 1966 on the reorganization of the composite Punjab on the linguistic basis. Most of these princely states, as per history, were subjected to onslaught of Gurkha's invasion from 1803 to 1815 A.D. It was in the year 1815 that the Gurkhas lost to the Britishers, these states were freed and restored to the respective rulers. To know more about the Solan district, it is indispensable to understand and study the history of princely states given below:

BAGHAT

One of the Shimla Hill states was lying between 30° 50' and 30° 58' North and 77° 12' East with an area of 36 square miles. Baghat lies 20 miles to the South and West of Shimla and extends from Solan to Subathu and Kasauli. The name is popularly derived from *'Bau'* or *'Bahu'* said to be hilly word meaning many and *Ghat* meaning pass. There are certainly many places in the erstwhile Baghat state, which were known as *Ghat.* The founder of the ruling family is said to be 'Basant Pal' or 'Hari Chand Pal' a Panwar Rajput from *Dharana Giri* in the Deccan, who settled in these hills many centuries ago and acquired their possession by conquest.

The founder Raja settled at a place which he named *Basantpur* and at present called *'Bassi'* in the close vicinity of the temple *'Jiaonaji'*. He took Keonthal Pargana from *Mavi* by force of arms. His son Baksh Pal annexed the pargana of *Basal, Bhuchali* and *Gharoli.* Rana Bhavani Pal added pargana of *Bachharang* of the then Patiala state and the territory of Rana of Kasauli. Rana Inder Pal added the *parganas* of *'Basal', 'Ghar'* and *'Taksal'* (Patiala).

The state was named Baghat by Inder Pal and it continued so till its merger with Himachal Pradesh in 1948.

Rana Janmai Pal (Dalel Singh), the 68th from Basant Pal, is stated to be a very great man. He was presented *Khillat* by Emperor of Delhi. It is not known how and when *Bhawana* detached from, Baghat. Rana Sarandhar Pal, grandson of Janmai Pal fought with Singhpuria Sirdar, to whom he lost 'Ghar' and *'Taksal'* but subsequently he recovered both the places. The state regained its independence from its feudatory Bilaspur state sometime in the year 1790 A.D.

During twelve years of Gurkha rule, Rana Mahender Singh of Baghat remained in undisturbed possession of his patrimony as he was an ally of the Bilaspur Raja, on whose invitation the Gurkhas extended their conquests beyond the Yamuna.

He was held by his old friends, when the British force under General Ochterlony drove back the Gurkhas. Rana Mahender Singh had set up family relations with Gurkha Commander Amar Singh Thapa. On the conclusion of the Gurkha war, eight *parganas* were therefore taken from him and sold to Patiala for Rupees one lakh thirty thousand. This reduced the area of Baghat state considerably.

The Rana was however, confirmed in his remaining *parganas.* Mahender Singh died issueless in A.D. 1839 and the state then lapsed to government and pensions to the extent of Rs. 1,282/- was sanctioned for the family of the late chief. In 1842, however, on representation of Umed Singh, first cousin of the deceased Raja, it was restored to Vijay Singh, brother of Mahender Singh, and the Government, Tehsil and Thanadari establishment were withdrawn. During the escheat, seat of cantonment of Kasauli had been established within the state and Raja Vijay Singh offered to present this area to the British government. The offer was refused, but the area was purchased by government for a sum of Rs. 5,000/-.

In 1849, on the death of Vijay Singh, without male issue, the state was again declared escheat. Lord Dalhousie annexed 'Baghat' state then under the doctrine of Lapse. Umed Singh, a cousin of Vijay Singh, then set up a claim on his own account. He represented, his case to England. Eventually, in 1860 Lord Canning recommended, the admission of Umed Singh's claim and it was recognised in 1862. Rana Umed Singh was on death bed and survived to the good news only a few hours before his death, after thirteen years of waiting.

Rana DALIP SINGH: Rana of Baghat from 1861 to 1911. He was born on 3rd February 1859, C.I.E. [1895], recognised as the successor to Rana Umed Singh on 31st January 1862, married firstly to the daughter of the Rana Fateh Singh of Dhami, married secondly in 1888 to the granddaughter of the Rana of Mangal, married thirdly another granddaughter of the Rana of Mangal, married fourthly the daughter of Kanwar Kedar Singh of Sirmaur, and had two sons. On the death of Umed Singh, his minor son, Dalip Singh, only two years old, was then appointed to the *gaddi* and new *sanad* issued to him in 1862, imposing an annual tribute of Rs. 2,000/-. This was secured by the reservation to British government of land within the state producing a gross revenues of Rs. 2,500/- per annum including a property which had been acquired by General Innes of the Indian army, during the period of escheat. Owing to financial problem, minor Rana requested the restoration of reserved area to the state, except the state of General Innes. In 1864, a revised *sanad* was issued which required the Rana to abide by the revenue settlement made during the second escheat and to respect the rights of the tenants recognised by government. After the death of General Innes in 1876, his estate was purchased by the Rana for Rs. 35,000/-. The estate was formally returned to Baghat in 1891.

In 1901, the Rana ceded jurisdiction over lands within the state required for the Kalka-Shimla Rail lime and land has been ceded from time to time for Solan and Kasauli cantonments and Subathu and Dagshai waterworks. In consequence of these concessions the tribute of Rs. 2,000/- was gradually reduced and the state paid no tribute by 1931.

The Rana's administrative powers resemble those exercised by other Shimla chiefs. Rana Dalip Singh was well educated and proficient in administrative

matters. Mian Amar Singh was the younger brother of Rana who was an asset in administrative affairs. The Rana received the K.C.I.E in 1896. He offered his services for employment with the Tibet mission in 1904. Rana Dalip Singh died in 1911 and was succeeded by his minor son Durga Singh.

DURGA SINGH: He was Rana of Baghat from 1911 to 1948, born on 12th September 1901, succeeded to the throne on 30th December 1911, formally installed on 23rd May 1913, and granted full ruling powers in September 1922, educated at Aitchison Chief's College, Lahore, C.I.E. [1939], elected Member of the Chamber of Princes in 1933, granted the hereditary title of Raja on 4th June 1928, married on 28th November 1917, Raj Kumari Sashi Prabha Kumari, born 1905, who died in April 1947, daughter of Raja Kirti Shah of Tehri Garhwal, and his wife, Rani Nepaliya, and had a daughter. He died on 30th March 1977. Raja Durga Singh was the last ruler of the state to enjoy the privilege of having the title of raja conferred on him. The state maintained a force of 36 Armed Police.

The Kasauli Pargana, on which stands the existing cantonment, was taken over from the Baghat Rana in 1842, in lieu of a cash payment of Rs. 5000/- and an annual charge of Rs. 500/-. This letter rental was not revived, when the state was restored to the Rana in A.D. 1861. In 1863 the lands under the present cantonment of Solan were acquired by the British government on an annual payment of Rs. 500/- and at the same time the Rana's tribute was reduced from Rs. 2000/- to Rs. 603/- per annum.

ISHWARI SINGH: Rana of Baghat (owner of ancestral property) from 1977 to 2004, born on 17th April 1921, as Kanwar Ishwari Singh, son of Mian Gopal Singh of Baghat, a cousin of the late Raja Durga Singh, who had no son or brothers. He married 1stly in 1949, Kumari Gita Kumari, daughter of Kanwar Mangal Singh of Koti, and his wife, Kanwarani Padmawati and married 2ndly in 1957, Kumari Nirmala Kumari, daughter of Kanwar Jivan Singh of Koti, and his wife, Kanwarani Parvati Kumari, and had four children. He died on 27th April 2004 at Solan, Himachal Pradesh.

KESHVINDER SINGH: Rana of Baghat (owner of ancestral property) since 27th April 2004. Born on 26th April 1967, educated at St. Mary's School, Kasauli and later at St. Luke's School, Solan; graduated from Government Degree College, Solan; married in 1995, and has a son.

BAGHAL (ARKI)

Baghal state was lying between 31° 19' North and 76° 52' and 77° 5' East in the Shimla Hills, with an area of 124 square miles. It was bounded on the North by towering highlands of small state of *Mangal*, on the East by the petty states of *Dhami* and *Kunihar*, on the South by the plains of *Ambala* and on the West by *Hindur* (Nalagarh).

It was founded by 'Aje Dev' a *Panwar Rajpur* who came from Ujjain. The headquarters of the state was *Arki*, twenty miles North-West of Shimla 'a picturesque town'. Its buildings are clustered below the fort, an imposing structures on the southern slope of a precipitous hill. The town includes a small stretch of level ground of which its inhabitants are proud, a number of temples and tanks and a garden noted for its almond trees. "Arki town is like

Chamba". A greater part of Baghal is in the basin of one of the tributaries of Gambhar. This is an exceptionally fertile, sloping from the wider mountains on the North which guards the Satluj Southwards into the rich valleys below *Sairi* and *Subathu*. At the top of every rise the line of snowy mountains which separate Kangra from Chamba comes into view. Just before Bilaspur the hills widen out and leave a great amphitheater of open space.

The descendants of the founder Panwar Rajput family have kept their blood singularly pure and have had considerable difficulty at time in finding wives of equally untainted descent. They have married much with Bilaspur family. Their clan name is *Bagalia* and the rulers used the title *'Rana'*. We have little information about the early history of the state.

As per some historical evidences probably the territory called Baghal was divided among various feudal lords, when *'Aje Dev'* first came and settled in Village *'Sairi'*. The earliest capital of the state was *Damras,* which was later on shifted by his son Nand Dev from *'Damras'* to *'Darla'* and then to *'Dhundhan'*. According to another version, Aje Dev first of all settled at village *'Sairi'* and his descendants probably shifted capital from *'Dhundhan'* to *'Dughli', Damraj', 'Darla'* and lastly in A.D. 1300 to *'Dhundhan'* respectively. Whatever is available on the early history of Baghal can't be considered authentic and reliable.

The first ruler of note seems to be *Rana Sabha Chand,* who made *'Arki'* the capital of the state in A.D. 1643. He ruled from about 1640 to 1670 and was succeeded by his son *Rana Prithi Chand,* who died in 1727. Rana Prithi Chand was succeeded by his son *Mehr Chand* (born in A.D. 1702). He was a patron of painters. There are a number of paintings of Rana Mehar Chand (1727-1734). The Characteristic features of these portraits is the *aquiline nose* which is a generic feature in the Arki family. He was succeeded by his son *Bhup Chand* (1734-1778 A.D.) who was a brave ruler. Rana Bhup Chand is remembered for the battles which he fought with the neighbouring states of Bilaspur and Nalagarh.

Gurkha invasion took place during the reign of Rana Jagat Singh (1778-1828). Baghal was overrun and occupied by the Gurkhas in the early nineteenth century, between 1803 and 1815. During this occupation, Rana Jagat Singh took refuge for seven years in Nalagarh. Arki was the headquarters of the Gurkhas when they invaded the western Himalayas from Nepal and fought with Kangra Chief Sansar Chand II and maharaja Ranjit Singh. Under the Gurkhas, the Western Himalayas, from Nepal to Satluj became a desert. The memory of the Gurkhas is vivid in these hills, especially their behaviour in the villages. The Gurkha's reputation for revenge was such that it was said that if a Gurkha on the road cut his foot on the stone, he would not go until he had smashed it to powder. The proverb famous about Gurkhas was 'जो गुरखयां ते बचे, सो बचे' ('living are they who lived when the Gurkhas left').

Anglo-Gurkha war took place in 1815, in which British drove the Gurkhas back to Nepal and Baghal was freed. Baghal was restored to Rana Jagat Singh in A.D. 1815 by a *sanad* granted to him by the British government. The usual

conditions imposed were of active assistance in case of war. The Rana's administrative powers remained unchanged, save in one respect, namely, that sentences of death passed by him required the confirmation of the Superintendent of, Shimla Hill States.

Shiv Saran Singh, son of Jagat Singh, succeeded to the throne of Baghal (1828-1840). He sheltered Raja Anirudh Chand (1823-1829) of Kangra on his flight from Kangra in 1828 to avoid arrest by the Sikhs on his refusal to marry his sisters to Raja Hira Singh, son of Raja Dhian Singh Dogra of Jammu. He also gave asylum to Anirudh Chand's sons, Mian Ranbir and Mian Parmod Chand. He also built *'Diwankhana'* at Arki.

Raja Shiv Saran Singh was followed by his son **Kishan Singh** (1840-1876). He was also a patron of building and painting. He reconstructed the Arki Bazar. In about A.D. 1850 he had the Diwankhana at Arki decorated with murals. At the time of 1857 revolt, Rana Kishan Singh, sent a contingent of forty men under his brother **Mian Jai Singh** to assist British in watching roads leading from Shimla to Jalandhar for his help during revolt. He was rewarded for his loyalty by receiving the *'title of Raja'* and *Khilat* were bestowed upon him and his brother Jai Singh in 1860.

In 1876, Kishan Singh was succeeded by his son **Moti singh**, who died a few months later, when his cousin **Dhian Singh** (1877-1904), son of Mian Jai Singh, succeeded after a family dispute. He was considered as the most popular and capable among the Minor Hill Chiefs. He had marital relations with the ruling houses of *Suket, Madhan* and *Bilaspur.* Some local revolts seemed to have occurred after 1897, for which British authorities had to intervene in 1902. He died in 1904 and was succeeded by his eldest son, *Tikka Bikram Singh,* born in 1893. In the year 1905, there was a revolt by the entire Kanet population which was successfully crushed with the help of Superintendent of Shimla Hill States.

During the minority of Tikka Bikram Singh, administration of state was conducted by a council, consisting of the brother of the late Raja and an official deputed by the British Government. Bikram Singh died in 1922 and was succeeded by his minor son **Raja Surinder Singh.**

SURINDER SINGH: Raja of Baghal from 1922 to 1945. He was born on 14th March 1909 in Arki, succeeded on 3rd October 1922, installed with ruling powers on 14th January 1932, married Rajkumari Laxmi Devi [Rani Laxmi Devi of Baghal], daughter of Rai Hira Singh of Sangri, and had six children. The Raja was entitled to be received by the viceroy. The state was liable to the operation of the *nazarana* rules upto 1911, when, on the occasion of the coronation Darbar, all such levies were abolished. The state had a local force of 25 infantry with one serviceable gun. The chief was allowed no salute. On the death of Surinder Singh in 1944, his son Rajinder Singh occupied the gaddi.

RAJENDRA SINGH: Raja of Baghal from 1945 to 1948, born on 29th February 1928, educated at Col. Brown's School in Dehra Dun and Govern-

ment College, Lahore; he overhauled the administration and introduced radical constitutional reforms, M.L.A., Commandant General of Home Guards, Director of Civil Defence, Himachal Pradesh, married 2nd November 1948, Rani Tara Devi, born on 31st October 1929, she died on 22nd February 2005, daughter of Raja Hemendra Sen of Keonthal, and had three children. But he got very little time to exercise his authority, because on 15 April 1948 Baghal was merged with Himachal Pradesh. Raja Rajinder Singh was eldest among four brothers and a sister. He took over the reign of the state on 23rd January 1946, was member of Territorial council twice and state legislative assembly once (1952-1967). He was the founder of Himachal Home Guards and remained its honorary Commandant General for 20 years. He had two sons and a daughter. She is married in the Jaipur royal family and elder son Pramod Kumar died in 2004. Raja Rajinder Singh was very popular among his people in the Bhagal area, died on 7th June 2010 at the age of 84.

HARSHVARDHAN SINGH: Currently owner of ancestral property of Baghal State Raja Saheb of Baghal since 7th June 2010. Born on 11th April 1980, married on 2nd December 2007, Rajkumari Ksheerja Kumari [Rani Ksheerja Kumari of Baghal], niece of Maharaja Lokendra Rajendra Singh Ju Dev Bahadur of Datia, and has one daughter.

(41) Surinder Singh (1922-1944) (42) Rajinder Singh (1944-1948)

Arki had a humble inheritance of patronage of arts. The family married chiefly in Bilaspur, which explains a style of painting influenced by and perhaps largely deriving from Kahlur. It seems that during Gurkha invasion a good number of paintings have been destroyed by the marauding forces. The best place of architecture is the *'Haveli'*, built in 1880. It is in the style of Rajputana architecture, perfectly proportioned and with a certain lightness and grace. Other parts of the palace are said to be around 250 years old. The *'Diwankhana'* built and decorated in 1850 has fresco on the walls and pillars. Those on the walls are in coarse and decadent Kangra style. Some paintings of eighteenth century European style have also been found on pillars. It is strange to see

two styles simultaneously side by side and without influencing each other.

There are six main temples at Arki and prominent one is of *Lakshmi Narayan* (Vishnu) of which probably the founder Raja had brought with him. In Arki, there is no official celebration of the festival of Holi, because a chief having once died during this festival.

KUNIHAR

Kunihar state was located between 31° 3' and 31° 7' North and 76° 59' and 77° 3' East about 35 Kilometres west of Shimla with an area of about 15 square miles. This was the smallest state among Nalagrah, Baghal, Baghat, Mehlog, Dhami, Keonthal etc. and so was under constant fear of aggression from the neighbouring state. This petty state was founded by one *"Abhoj Deo"*, who had come from *Akhnoor in Jammu* in 1154 A.D. The headquarters of the principality was at Hatkoti. Keso Rai (Keshav Dev) was the weakest ruler of the state in the 16th century. The position of the state started deteriorating and ultimately neighbouring state seized the territory.

On the expulsion of the Gurkhas, Thakur Mungeree Dass was confirmed in the chiefship. The obligation to supply 5 *begaris* imposed by *sanad* was later commuted to annual payment of Rs. 180. Mungeree Dass died in 1816 and was succeeded by his son Kishan Singh, who died in 1866. Kishan Singh was succeeded by his son Tegh Singh.

Rana Tegh Singh: He was Rana of Kunihar from 1866 to 1905. Tegh Singh born on 4 August 1834 and succeeded to gaddi in 1867. He was married and had three sons, namely- Tikka Shib Singh (born in 1872 and died young), Rana Hardev Singh (born on 26 August 1898), Kanwar Gopal Singh (born in 1901). Rana also had five daughters. Two of them married Rana Raghubir Chand of Koti, third to Rana Jagjit Chand at Kuthar, fourth to Raja Surendra Prakash of Sirmaur and fifth to Thakur Puran Chand of Beja. Tegh Singh was succeeded by his minor son and the last ruler Thakur Hardeo Singh.

Rana Hardeo Singh: Rana of Kunihar from 1905 to 1948, born on 26th August 1898 (1899), married Rani Laladi Kumari, daughter of Thakur Surat Singh of Tharoch, and had issues. He received his powers in 1917. The state was liable to the operation of *Nazarana* rules upto 1911, when, on the occasion of the coronation Darbar, all such levies were abolished. He had a son and a daughter. The son was Rana Vijay Singh and daughter's name was unknown. Rana Hardev Singh died in 1964.

Rana Vijay Singh: He occupied the family seat after the death of his father Rana Hardeo Singh in 1964 and continued till 1997. He married to Rani Lalita Kumari daughter Raja Jagat Dev Singh of Poonch. He had two sons and a daughter; namely Tikka Ajay Singh (born on 9th July 1956 and married in 1955 to RajKumari Bhavna Kumari, daughter of Rana Narendra Singh of Kokhai, both died in a road accident on 3rd March 1996). Kumari Varsha (married to RajKumar Sarangbhushan Singh of Balsan) and Rana

Sanjay Singh. Rana Sanjay Singh, succeeded to the ancestral property and Jagir, after the death of his father, as his elder brother had already died in 1996.

KUTHAR

Kuthar state was lying between 30° 55' and 31° 1' North and 76° 57' and 77° 1' East of Subathu, with an area of 20 square miles (near about 33 sq. km. It was founded by one 'Surat Chand' Rajput of Kishtwar in Kashmir, who had fled from the Mohammedan invaders. The territory in its early stage was divided among five *'Mavis'*, who were ruling at *Ghar, Sheel, Gharuth* and *Feta.* They had probably come from plains and adopted the title *Mavi.* Surat Chand defeated them and founded the state.

Kuthar in early times seems to have been tributary in turn to Nalagarh and Bilaspur. At the time of Gurkha invasion, Kuthar was a tributary to Keonthal and ruled by Rana Gopal Chand. He could not face the onslaught of the Gurkhas and ran away to *Manimajra* in Ambala district. He died on his way back to Kuthar at the end of the war and the state was conferred on his son Rana Bhup Chand. The *sanad* granted to Bhup Chand prescribed the maintenances of 40 *begaris* at the service of the government. This number was later on reduced to 30 and was commuted to an annual cash payment of Rs. 1,000/-. Rana Bhup Chand died in 1858 and was succeeded by his son Jai Chand, to whom a *Khilat* of Rs. 600/- was granted in consideration of his services rendered by the state during the mutiny. In 1895, when the state was at the verge of bankruptcy, Mian Durga Singh of Kotkhai was appointed by government as *'wazir'*, who administered the state for two years. Rana Jai Chand died in 1896 and was succeeded by his son Jagjit Chand, who on account of ill health, abdicated in 1930 in favour of his son, Rana Kishan Chand. Rana Jagjit Chand had occupied throne only in June 1908, because at the time of his father's (Rana Jai Chand) death, he maintained a force of 12 armed police. The state was liable to the operation of the *nazarana* rules upto 1911. When on the occasion of the coronation Darbar, all such levies were abolished. Kishan Chand, in the memory of his father, founded *'Jagjeet Nagar'* near Kuthar. Kuthar was merged with Baghat on 15th April 1948 and remained part of Mahasu district till August 1972, when later on it became a part of Solan district.

Rana Vijay Singh : Rana of Kunihar occupied the family property from 1964 to 1997. He was born in 1931, married Rani Lalita Kumari, daughter of Raja Jagat Dev Singh of Poonch, and his wife, Rani Padmawati Bhadwal, and had issue. He died in 1997.

MEHLOG

Mehlog was lying between 30° 52' and 31° 5' North and 76° 52' and 76° 58' East with an area of 43 square miles (70 sq km.) The state lies about 39 miles (50 sq km.) South-West of Shimla, at the foot of the Kasauli Hill between Nalagarh and Kuthar. Raja of Ayodhya **Bir Chand** (according to another version, the name of the founder was Hari Chand), who visited Mansarover lake in Tibet, founded the state. The Thakur of Mehlog were Rajputs and have been established in the Shimla Hills for some hundred years. The founder of the state, first settled at *'Patta'*, a village close to the Nalagarh border which has been the border of the state for twenty one generations. Upto the reign of 6th chief from the Bir Chand, the state is said to have waxed and

flourished and its boundary is said to have extended far to the South. Raja Uttam Chand was defeated by the Raja of Sirmaur and deprived of his state (1612 A.D.). Uttam Chand with the help of his father-in-law, Rana of Keonthal, recovered his state. He fixed his capital at *'Kot Gharsi'*.

Mehlog was a small state under the control of Keonthal. In 1780 a person named *'Khoshala'* conspired with a Brahmin named Devi Saran and poisoned the then chief Prithvi Singh. Khoshala with the help of *Kahlur* State ascended the throne. In place of Keonthal, Khoshala Chand accepted the overlordship of Bilaspur. He died in 1783. A.D.

Mehlog was occupied by Gurkhas from 1803-1815. During the Gurkha occupation Thakur Sansar Chand of Mehlog took refuge with Raja Ram Saran of Hindur who was himself at war with the Gurkhas.

At some place Khoshaal Chand has been referred as Ajit Chand. During his rule, Raja of Kangra annexed nine or ten *Parganas* of Mehlog state and handed over the same to Baghat and thenceforth the Mehlog chief came to be known as Rana instead of Raja. When Gurkhas were driven out of Shimla Hills by the British government, he was restored to his state in 1815. The *sanad* imposed on him the tribute of Rs. 1,440/- and he had to subscribe to the usual conditions of rendering service when required in time of war. The obligation to supply 40 begaris imposed by the *sanad* was later on commuted to an annual cash payment.

Thakur Sansar Chand died in 1849 and was succeeded by his son Dalip Chand who died in A.D. 1880. Dalip Chand was succeeded by his son Raghunath Chand. The latter was granted the title of *Rana* as a personal distinction. He died in 1902 and was succeeded by his son Durga Chand, who was recognised as successor to the *'gaddi'* by the title of *Thakur*. During his minority, the state was run by a council of four members till 1908, when owing to disturbances the council was abolished and a manager appointed for assistance. He came of age in 1920 and received his powers.

The state was liable to the operation of the *'Nazarana'* rules up to 1911 when, on the occasion of the coronation Darbar, all such levies were abolished.

After the death of Rana Raghunath Chand, his son Durga Chand (1902-34) succeeded him. His reign is famous for disturbances. He was succeeded by Thakur Narendra Chand in 1934. He was born an October 4, 1921. Mehlog state was merged with Himachal Pradesh on 15th April 1948 and formed a part of Solan tehsil of then Mahasu district.

Rana Narender Chand Sisodia: Born on 5th October 1921, Rana Narender was last ruler of Patta-Mehlog princely state. He had his education in Lahore. After independence and integration of princely Hill states with unified territory of Himachal Pradesh, he donated substantial part of his state for the setting up of offices of IPH, PWD, Electricity, Telephone, Forest, Revenue, Animal husbandry etc. in Mehlog. He was nominated director of Small Scale Industry Board and Animal Husbandry. Rana was quite popular among lo-

cals, died on 22nd January 2011. At present Mehlog is the part of Kasauli tehsil of Solan district.

(37) Durga Chand (1902-34)
(38) Thakur Narendra Chand (1934-47)

According to Vamshavali of Mehlog state, Veer Chand has been shown sixth in the hierarchy. This is also possible that while state was founded by Veer Chand and he traced his origin to his great grand father Hari Chand and mentioned it in the genealogy.

BEJA

Beja state was a tiny state in the Shimla Hills, lying between 30° 55' North and 76° 59' and 77° 1' East with an area of 4 square miles (7 sq km.). On its East was Patiala and Kasauli and certain parts of Patiala were also in the South. On the South was Kuthar state and Mehlog in the West.

The state was founded by a Rajput of *Tunar Gotra,* hailed from somewhere in the neighbourhood of Delhi. However, family tree of the rulers of Beja starts with Raja Dhol Chand. According to a version Gharav Chand, the 43rd descendant of Dholpal family, attacked Bhauch's Rana and annexed his state. He also captured Beja state. Beja remained a tributary of Kahlur for many years, but in 1790 when Hindur defeated Kahlur state in a battle, then Beja also declared itself independent.

At the time of Gurkha invasion Man Chand (1773-1817) or Bishan Chand was the chief of the state. He had good knowledge of herbs and medicines prepared from herbs. He also treated a good number of Gurkha

jawans and in lieu of his services Gorkha Chief Amar Singh Thapa gave him a *sanad* of his state. Later on Man Chand helped the British to expel Gurkhas from the territory. The state was restored to him under the title of *Thakur*. The obligation to supply 5 *begaris* imposed by the sanad (no LIX) was later commuted to an annual cash payment of Rs. 180. This was reduced to Rs. 50/- per annum in 1892, as compensation for a small area of land incorporated within the Kasauli cantonment.

Man Chand died in 1817 and was succeeded by his son **Pratap Chand**, who died in 1841 and was succeeded by his son Udai Chand, who died in 1905. He was succeeded by his minor son **Thakur Puran Chand** and the administration was conducted by a council. He was invested with powers in 1921. He was succeeded by his son **Laxmi Chand** in 1939. He was born on 21st March 1916 and married the daughter of the ruler of Darkoti. On 15th April 1948 Beja was merged with the then Solan tehsil of Mahasu district.

(27) Puran Chand (1905-1939)	(28) Laxmi Chand (1939-47)

MANGAL

A small state lying between 31° 18' and 31° 22' North and 76° 55' and 77° 1' East, with an area of 12 square miles (20 square kilometer). Mangal state was lying on the banks of Satluj near Bilaspur to which it was once a tributary. Mangal state was founded by an *'Attri Rajput'*, hailing from *'Marwar'*. It is said that the founder Raja was in service with the Raja of Kahlur. He was very brave and loyal. The Mangal state was given to him by the Kahlur Raja as a token of his loyalty and bravery. The state acquired its name from the name of Mangal Singh, the son of the founder Raja.

The state became independent after the expulsion of the Gurkhas in 1815. On the expulsion of the Gurkhas, **Rana Bahadur Singh** was granted an independent *'sanad'*. The obligation to supply *begaris'* imposed by this was commuted to an annual payment of Rs. 72/-.

Rana Bahadur Singh was succeeded by his son Prithvi Singh, who had three sons i.e., Rana Jodh Singh, Ajit Singh and Jagat Singh. Rana Jodh Singh died in 1844 issueless. He was succeeded by his brother Ajit Singh. He died in 1892 and was succeeded by his son Tilak Singh. Rana Ajit Singh had three sons Tilak Singh, Mian Nihal Singh (Died in 1916) and Mian Khajan Singh (died in 1911.). Tilak Singh died in 1920. He was succeeded by his son Shiv Singh, who had two sons. Tikka Vir Singh and Kanwar Singh (born in 1926). Rana Shiv Singh exercised sovereign powers subject to the usual political supervision of Superintendent of the Hill States. The state was liable to the operation of the *Nazarana* rules upto 1911 when on the occasion of the coronation Durdbar, all such levies were abolished.

In 1921 British government, took away all the rights of Rana Shiv Singh to rule over the state. Then Lala Bhagwan Dass. *Wazir* of Baghal state was appointed *wazir* of Mangal state. On 15th April 1948, Mangal was merged with Arki and became part of Himachal Pradesh.

GENEALOGY OF MANGAL

(1) Rana Mangal Chand (1240)	(2) Raghunath Chand

(5) Sartam Chand	(6) Man Chand
(7) Gulab Chand	(8) Tara Chand
(9) Sansar Chand	(10) Jai Singh
(11) Chittar Singh	(12) Inder Singh
(13) Veer Singh	(14) Amar Singh
(15) Karam Singh	(16) Bahadar Singh
(17) Prithvi Singh (Died in 1844)	(18) Jodh Singh (Died in 1844)
(19) Ajit singh (Died in 1844-92)	(20) Tilak Singh (1892-1920)
(21) Shiv Singh (1920-47)	(22) Ranbir Singh (Died in 1973)

NALAGARH (HINDUR)

Hindur was a small state in the Shimla Hills, twenty five miles long and about ten miles wide with an area of 256 square miles (nearly 410 sq. kms.). It was situated between 30° 54' and 31° 14' North and 76° 39' and 76° 56' East. It was bounded on the North by Kahlur (Bilaspur), on the North-East by Baghal (Arki), on the South-East by minor states of Shimla Hills and on the South and West by the Punjab plains of Ropar.

The state was anciently known as Hindur. But when its capital *'Nalagarh'* was founded during the 15th century onwards, it acquired a second name after this chief town. The Nalagarh Valley is a long strip bounded by the heavily eroded range of the Shivaliks towards the South and South-West and the spurs of the outer Himalayas to North-East. The town Nalagarh is at the very edge of the mountains and the fortress palace of the Raja is on a steep hill above it. The view from a distance is beautiful but like Arki the glamour fades at close approach.

Ajit Chand, it is said was installed there and founded the ruling dynasty of Hindur. *It was an offshoot of princely state of Bilaspur.* Yet another story is that, Ajit Chand conquered Nalagarh and gave it to his brother *Suchet Chand,* from whom the ruling family of Nalagarh descended. Ajit Chand succeeded his father. He and Ajai Chand had different mothers and it is sometimes said that Ajit Chand was the elder of the two.

According to another version Hindur was founded by **Ajay Chand** in A.D. 1100, the eldest son of Raja Kahan Chand of Kahlur. Ajay Chand killed *Thakur Handur* in a battle and set up his authority there. Handu was also not popular among his subjects. They were not happy with his style of governance. That is why people readily supported Ajay Chand to capture state. His younger brother Ajit Chand succeeded to the throne of Kahlur state. He started showing his authority and interest on Hindur, which was in the past under the suzerainty of Bilaspur (Kahlur) state. It was due to its distance from Bilaspur, that *Handu Thakur,* could establish his control over the territory. That is why, the Raja of Kahlur attacked Hindur repeatedly, but every time he failed to capture it.

Ajay Chand was a popular ruler. He started many developmental works. After ruling for a large period of time, he died in 1171 A.D.Above description seems improbable and unreliable that Raja Ajay Chand ruled for seventy one years. There is all possibility of having two Rajas of the same name or wrong entries might have been made in the *Vamshavali.*

The chiefs of Hindur and Kahlur, as also of *'Chaneni'* in Jammu Hills, trace their origin to a common ancestor, a Chandel Rajpurt, who came from *'Garh Chanderi'.* The fort at *'Ramshahr'* which commands a splendid view of the plains towards Ludhiana and Hoshiarpur as well as of the snowy peaks of Chamba is said to have been erected as a capital when the families were still united. It has largely been added by later Rajas, Agar Singh and Ram Saran.

At the time of Raja Ajai Chand's death, his son and heir apparent **Vijay Chand** was only four months old. The Rani took control over the administration and suppressed the revolt of Kanets successfully. In 1201 A.D. Vijay Chand died at the age of 30, leaving behind his minor son **Dham Chand.** During his reign Kanets again revolted, but once again they were suppressed. After ruling nearly for 35 years, Dham Chand died in 1236 A.D. He was succeeded by **Bairang Chand,** who died in 1276 A.D.

Laxman Chand ascended the throne at the age of eleven. During his minority, there was a revolt in the state which was expelled successfully. In 1398 Taimur Lang invaded India, the Raja of Hindur at that time was **Alam Chand** (1356-1406). Taimpur raided *'Delhi', 'Meerut', 'Haridwar', 'Kiar-da-Doon'* and then reached the border of Hindur, Raja Alam Chand, knowing it fully well that his force would not be able to counter Taimur Lang's force, extended full help to the invader and paid him rich tributes. This ploy of the Raja helped him to save his state. After Alam Chand royal race was continued by **Udham Chand, Vikram Chand, Kedar Chand** and **Jai Chand** whose reign was basically uneventful.

During the period of Raja Narayan Chand (1477-1522) Raja of Nurpur passes through Hindur to Haridwar. He proposed his daughter's marriage with the Raja of Hindur, which he (Narayan Chand) refused to accept. Later on Raja of Nurpur got his daughter married to the Raja of Kahlur and also provoked Kahluria Raja to attack Hindur. It was then that 'Satgarh fort' was occupied by the Kahlur. Narayan Chand was succeeded by his son Ram Chand (1522-68) who was great lover of architecture. *He built the fort of 'Ramgarh' and made 'Ramshahar' as summer capital of the state.* His son Sansar Chand (1568-1618) built a beautiful palace in Nalagarh and also got repaired an ancient *'Sarovar Kala Kund'.* He was succeeded by his son Dharam Chand (1618-1701). He twice had war like exchange with Aurangzeb's soldiers and both times emerged victorious.

There is also reference that when Kalian Chand came to power in Bilaspur in 1630 A.D., he built a fort on the border of Hindur, which caused hostile feelings and ultimately led to a war between the two states. The Raja of Hindur was killed, leaving behind his infant son. To avoid harm to the sate, the Rani took a bold step of throwing herself on Kalian Chand's protection, being a near relative and entrusted the younger prince to his care. Kalian Chand accepted the charge, installed the infant on the *gaddi* and as his guardian in the management of the state till he came of age.

Raja Himmat Chand (1701-1705) succeeded his father Dharam Chand. During his reign Pathan attacked the state thrice. Raja Himmat Chand along with Hinduria soldiers fought bravely and finally died in the battlefield. He was succeeded by Bhup Chand (1705-56).

Raja Man Chand ascended the throne in 1756. During his period Hindur state was rent with "dissensions and assassinations". The state was now divided by factions, the *Mattiana Kanets* siding with *Man Chand* and the *Thuana Kanets* with Padam Chand, younger brother of the late Raja Bhup Chand. Padam Chand assassinated his nephew Man Chand and occupied the throne but was in turn killed by the *'Mattianas'.*

Raja Ajmer Chand of Bilaspur (1712-41) built a fort called *Ajmergarh* on the border of Hindur. At some place there is also reference that along with Raja Man Chand his son was also killed. The people of the state then approached Devi Chand the Raja of Kahlur and invited him to take over the state. This however he declined and installed *Gaje Singh Hindurea,* a member of the Hindur ruling family as Raja from whom descended the future Rajas of Nalagarh.

But the state *Gazetteer* records a different story.....that a Sikh, named *Bhai Kharak Singh,* from the adjoining state of Mehlog, "affected a reconciliation between the factions and induced *Gaje Singh,* a distant *collateral* and *refused* to accept the *Gaddi'.* Raja Gaje Singh ruled from 1761-88. It adds "He was the founder of the present dynasty and, though a just ruler, was not on good terms with his son, *Ram Saran.*

Raja Ram Saran (1788-1848) succeeded his father Gaje Chand Singh.

He had long reign and died at the age of eighty six in 1848. He seemed to have possessed a *venturesome spirit.* For some time he was in alliance with Sansar Chand of Kangra and with his aid annexed a part of Kahlur state and burnt Bilaspur town. On the invasion of Kangra by the Gurkhas in 1805, he sided with Sansar Chand and resisted the Gurkha forces and was besieged in his capital for three years. Ultimately he was expelled for a short period by them and had to flee to **'Basal'** in Hoshiarpur. He then settled at *Palasi,* a fine fort on the plains between Nalagarh and Ropar living there for ten years. In the early part of his reign he had so extended his conquests that he was paramount from *Palasi* to *Mattiana* and eastwards as far as Ajmergarh on the Yamuna, Subathu was also held by his Kardar, *Dharma Negi,* but Sirmaur escaped from his grip.

Raja of Kahlur and Gurkhas jointly broke Ram Saran's power. The Gurkhas and Kahlurias besieged the fort of Ramshahr and though it was provided with large tanks and granaries, the garrison was obliged to capitulate. While Ram Saran was residing at Palasi, General Ochterlony and his forces came. A battle was fought at the *'pass of Ramshahr'* in 1814 and another at **'Lahar Ghati'** near Malaon Fort, where the Gurkha commander Bhakti Thapa was slained and Gurkha forces were expelled from the hills.

Ram Saran joined General Ochterlony when war was declared. Besides his natural dislikes for the Gurkhas, he had to take revenge upon the Bilaspur chief, who had caused all the trouble by calling in foreigners. He remained very loyal and disciplined with the British. On the conclusion of war, he was rewarded by being reinstated in his ancestral estates. To his credit it should be recorded that he absolutely refused to take over the districts he himself had recently conquered and annexed. He perhaps felt, when too late, that by his own ambition he had goaded the people of Bilaspur to measure which could only have adopted in their last extremity.

In 1815 the hilly district of **'Barauli'** which passed to the government as an escheat by the extinction of the reigning family was offered to Raja Ram Saran as a reward for his services in the war, which he refused. Barauli, then accordingly was transferred to another chief for the sum of Rs. 8,500/- which amount was accounted for to Ram Saran. Subsequently, Barauli again passed into the possession of the Shimla district and included the cantonment of Subathu. Three Barauli Villages were made over to the Maharaja of Patiala in 1830, in exchange for four villages now incorporated with the township of Shimla, which was in that year regularly founded by contributions of territory from Patiala and Keonthal.

Raja Ram Saran also received an indemnity of one lakh rupees, when, after the Nepalees war, he returned the *'Satgarha fort'* to the Raja of Bilaspur, from whom he had taken it. This sum he spent over the renovation and strengthening of Palasi lower town in the plains.

Earlier, the Raja of Hindur had invaded the territory of Bilaspur and captured the forts of *'Fatehpur', 'Bahadurpur'* and *'Ratanpur'* and annexed

the portion of Kahlur territory viz. entire parganas of Bahadurpur and Ratanpur adjoining his own state.

Raja Ram Saran died in 1848 and was succeeded by his son Raja Bije Singh. He died in 1857. After the death of Raja Bije Singh a doubt arose regarding the succession, as Ram Saran's other sons were not true Rajputs, being the offspring of a Brahmin mother. From 1857 to 1860, the administration remained with British government. After three years Agar Singh, brother of Bije Singh, was appointed ruler. He was efficient and behaved loyally during mutiny. His elder brother Fateh Singh was passed over as being of unsound mind. Raja Agar Singh ruled from 1860-78.

Raja Ishwari Singh was born in 1836 and succeeded to the throne in 1878. He had an unscrupulous *Wazir* who had made his subject annoyed with him. Later on wazir was expelled from the state. Raja Ishwari Singh was allied by marriage with the house of Guler, Kangra and Kuthar.

Raja Ishwari Singh was not looked upon as a capable ruler and the state was administered by a council of three members, whose conduct of affairs greatly improved the finances of the state. Under the bound of *sanad* Raja was to assist British with troops in time of war paying a fixed tribute of Rs. 5,000/-.

Ishwari Singh died in 1911 and was succeeded by his younger brother Raja Joginder Singh. He lived at Nalagarh, a town twelve miles from Ropar. His territories were bounded on the North by Bilaspur, on the South and West by Ambala district and on the East by Baghal, Mehlog and Patiala. The chief was entitled to be received by the viceroy. He helped Brithish during the 1st World war, bought war bond of Rs. 22,50,000/- and sent 220 armed men. In 1918 a revolt took place in Nalagarh, which was suppressed by the Raja with the help of British.

He raised the status of Ishwari Singh High School and also opened an Allopathic dispensary in Ramshahr. Raja Joginder Singh was succeeded by Surinder Singh.

Raja Surendra Singh: Raja of Nalagarh from 1946 to 1948, born on 13th January 1922, educated at Aitchison's Chiefs' College in Lahore, now in Pakistan; married on 7th January 1944 at Patiala, Maharaj Kumari Yadhunandan Kumari [HH Rani (now Rajmata) Yadhunandan Kumari], daughter of Maj.-Gen. HH Farzand-i-Khas-i-Daulat-i-Inglishia Mansur-i-Zaman Amir-ul-Umra Maharaja Dhiraj Rajeshwar Sir Sri Maharaja-i-Rajgan Bhupendra Singh Mahendra Bahadur of Patiala, and had issue. He died on 5th May 1971. During his period on 2nd May 1948 *'Kalsia'* and *'Nalagarh'* states were merged with Eastern Punjab states. On 15th July 1948 Nalagarh was merged with PEPSU. Finally, when in 1966 Punjab was reorganized on linguistic basis Nalagarh was merged with Himachal Pradesh and became a tehsil of Solan district.

Vijayendra Singh: Present owner of Nalagarh state property since 5th

May 1971. Born on 26th June 1946 in Dehra Dun, Uttar Pradesh (now Uttrakhand), succeeded to the throne on 5th May 1971, educated at the Woodstock School in Mussoorie, Uttrakhand and later at the Yadavendra Public School (Y.P.S.) in Patiala, Punjab. He finished his schooling from the Doon School at Dehra Dun, Uttrakhand in 1962 and then graduated from Hindu College, Delhi University, in 1966. Member of the Legislative Assembly in the State of Himachal Pradesh 1977 to 1999, Chief Parliamentary Secretary 1982-1983, Minister of State 1984-1985 and 1988-1989, married on 7th April 1968 in Chandigarh, U.T., Raymon Singh [Rani Sukriti Kumari], born 1st September 1948 in Delhi, educated at Welham Girls' High School in Dehra Dun, Uttrakhand, and graduated from Government Girls' College, Chandigarh, daughter of Sardar Jaspal Singh of Jandiala Guru in Amritsar District, Punjab, and of Sardarni Mohinder Kaur, daughter of the late Sir and Lady Sobha Singh of New Delhi and Hadali, and has one son and one daughter.

GENEALOGY OF HINDUR

(26) Joginder Singh (1911-1946)
(27) Surinder Singh (1946-48)
(28) Vijendra Singh

ECONOMY

The soil in the district varies from light to heavy sandy clay and in the valley areas, it is sandy and loam. Types of soil and climatic conditions are responsible for the variety of agricultural production. The main crops grown in district Solan are *wheat, maize, paddy, grams* and varieties of pulses. In the field of vegetables, *tomatoes, cauliflower, Mushrooms* and off season *peas* are providing good scope of income to the district. Apart from stone and citrus fruits— *apples, plums, apricot, almonds, walnuts and mangoes* of various varieties are also grown extensively. Irrigation plays an important role in the agricultural economy. Solan has been declared Mushrooms district of Himachal Pradesh. In the district. *'Kuhls',* wells, ponds and tubewells are the main sources of irrigation. In order to improve the standard of living, the

animal husbandry department is doing a pioneering job. At present, district, Solan has five milk chilling plants, namely *'Khandaghat Plant', 'Nalagarh', 'Kunihar', 'Darlaghat'* and *'Maryog', the lost one is* actually located in Sirmaur district, but catering to the needs of Solan district. Fishery and poultry farming are also being practised.

The district Solan has made tremendous progress in the industrial development. Before independence, it was being carried out to meet the local requirements. Before 1975, the district do not had much of industries though the first industrial estate was set up in the year 1961-62 at 'Solan'. Another industrial area at 'Barotiwala' was set up during the year 1964-65. Till the setting up of the industrial town 'Parwanoo', these estates could not make much stride. Parwanoo was declared industrial area in the year 1975 only. *It is noteworthy that of all the districts in the state, 'Solan' has the largest number of larger, medium and small scale industrial units.* Better infrastructural facilities, locational advantages, moderate climatic conditions and dust free atmosphere are mainly responsible for the fast pace of the process for development of Parwanoo. The important items being manufactured by the different units are parts of tractors, automobile bearings, filters, wrist watches, watch cases, watch jewels, fruit products and high density polythene films.

The maximum concentration of electronic units is at 'Chambaghat' and 'Jubbar Hatti'. The fruit processing unit by Himprocess at 'Jabli' and the apple processing plant of Himachal Pradesh Horticulture Produce Marketing and Processing Corporation at 'Parwanoo' have added to the industrial activities of the state in the matter of processing of non-marketable fruits. The important units which have come up in Barotiwala area are Thapar Paper Mills, Laljee Paper Mills, Desraj Paper Mills etc. Nalagarh, a sub-divisional headquarters of the district, is another fast developing industrial town. The district had only one industry to name, Mohan Meakin brewery. At present, Barotiwala, Dharampur, Parwanoo, Baddi and Chambaghat have emerged as big industrial centres.

Baddi: Baddi is an industrial town and a Nagar panchayat in the South-western Solan district of Himachal Pradesh. The town lies on the border of Himachal Pradesh and Haryana states in the Shivalik Hills, around 35 kilometers west of Solan. Chandigarh, a union territory is around 40 kilometers west of Baddi. Baddi is emerging as the pharmaceutical industry capital of India. More than half of India's pharmaceutical production, mainly formulations, would originate from Himachal Pradesh in few years as 200 odd medium and large-scale units are coming up in and around Baddi. The fortunes of Baddi began to change with the visit of the then Prime Minister, Mr. Atal Bihari Vajpayee to Uttrakhand and Himachal Pradesh during March 29 and 31, 2002, where he announced tax and central excise concessions to attract investments to special category states.

The major attractions for investors included 100 per cent outright excise duty exemption for a period of ten years from the date of commencement of

commercial production (the past budget stipulated it to industries starting on or before 31 March 2010), 100 per cent income tax exemption for an initial period of five years and thereafter 30 per cent for companies for a further period of five years, capital investment subsidy of 15 per cent on plant and machinery subject to a ceiling of Rs. 30/- lakhs, applicable also to existing units. The schemes are also available for existing units going in for expansions. The identified thrust sectors included nonpolluting pharma and herbal products. Besides, the State Government also announced a slew of attractive investment schemes, including single window clearance for projects. *The major investors at Baddi include:*

Alkem Laboratories Ltd, USV Limited, Glenmark Pharmaceuticals Ltd, Dr. Reddys Ltd, Indoco Remedies, Bangalore-based Bal Pharma, Unichem Labs, Delhi-based Wings Group, Delhi-based Promed, Hyderabad-based Pulse Pharma, Morepan Laboratories.

The town also has MNC's like

Colgate Palmolive, Procter and Gamble, Hindustan Unilever, Cadburys and Johnson & Johnson.

Baddi is an industrial centre of Himachal Pradesh, being part of an industrial corridor stretching from Barotiwala to Nalagarh along the western border of Solan district.

Parwanoo: Parwanoo is a city and a municipal council in Solan district of Himachal Pradesh. It is an industrial town. It borders Panchkula district of Haryana, and is after the towns of Pinjore and Kalka on the Chandigarh Shimla Highway. In fact it is separated by a river bed from the town of Kalka. Pinjore to Parwanoo is almost a continuous urban belt. From Pinjore there is also a road to Baddi. Another nearby industrial town of the district Solan.

The town is divided into 6 different sectors spread randomly across the Shivalik Range in a radius of about 4 km. Sectors 1, 2, 3 & 5 are Industrial with only a few residential areas. Parwanoo is essentially an industrial town with almost 80% of the local population engaged with the industries in one way or other. It is home to the largest fruit processing unit of HPMC and the HP Agro Industries have a Cattle Feed Unit and a Pesticide Unit located here. It also has a Large ESI hospital. The Kalka Shimla heritage rail line passes through this town. The railway station is known as Taksal.

To cash in on its proximity to Chandigarh and Panchkula the government set up industrial sectors and gave incentives that invited many small scale units to set up shop here. The incentives include exemption from taxes and financing incentives for expansion of existing projects. Dhalli on its northern outskirts (on the Shimla highway) is famous for its meat pickle shops. A resort with a cable car called Timber Trail is a few miles north of the town on the Shimla highway again.

To provide raw material to the local industries, following types of minerals are available in the district:

(i) Limestone (Darlaghat, Karadaghat range, Kakarhatti and Kunihar belts).

(ii) Dolomite Limestone (largely confined to the Nalagarh area).

(iii) Gypsum (near Kuthar).

Minor minerals namely *masonry stones, boulders, sand* and *roofing slates* are found in abundance in the district.

In the late 50s and early 60s, there was a general feeling that Himachal Pradesh is not suitable for industrialization. In spite of this view, the State government accepted the challenge to bring this hilly state on the industrial map of the country. In this regard, various corporations were set up and packages of incentives for the setting up of new industries and expansion of existing ones were provided. Before independence, Solan was known for the location of Mohan Meakin Brewery, a reputed house for the manufacture of Indian made foreign liquour and beverages. Besides, there were some cottage industries.

Mohan Meakin: In the late 1820s, Edward Dyer moved from England to set up the first brewery in India (later incorporated as Dyer Breweries in 1855) at Kasauli in the Himalayan Mountains. The Kasauli brewery launched India's and indeed Asia's first beer, Lion, which was in great demand by the thirsty British administrators and troops stationed in the sweltering heat of India. Lion was much appreciated as a beer, and one famous poster featured a satisfied British Tommy declaring, *"as good as back home!"*.

The brewery was soon shifted to nearby Solan (close to the British summer capital Shimla), as there was an abundant supply of fresh spring water there. The Kasauli brewery site was converted to a distillery, which Mohan Meakin Ltd. still operate. Dyer set up more breweries at Shimla, Murree (Murree Brewery), Rawalpindi, Mandalay, Quetta and acquired interests in the Ootacamund Brewery (South India).

Another entrepreneur, H G Meakin, moved to India and bought the old Shimla and Solan Breweries from Edward Dyer and added more at Ranikhet, Dalhousie, Chakrata, Darjeeling, Kirkee and Nuwara Eliya (Sri Lanka, formerly Ceylon). After the First World War, the Meakin and Dyer breweries merged and in 1937, when Burma was separated from India, the company was restructured with its Indian assets as Dyer Meakin Breweries, a public company on the London Stock Exchange. Following independence, N.N. Mohan raised funds and travelled to London where he acquired a majority stake in Dyer Meakin Breweries. He took over management of the company in 1949 and built new breweries at Lucknow, Ghaziabad and Khopoli (near Mumbai) and the company name was changed to Mohan Meakin Breweries in 1967.

On the death of N.N. Mohan in 1969, his eldest son Colonel V.R. Mohan took over as Managing Director. He introduced a number of new products that are brand leaders today but died in 1973, soon after taking the helm. In

the 1970s the manufacturing activities of the company were diversified into other fields including breakfast cereals, fruit juices and mineral water under the leadership of Brigadier (Dr.) Kapil Mohan V.S.M link title (Col. V.R. Mohan's brother). Subsequently the word brewery was dropped from the company name in 1982 to remove the impression that the company was engaged only in beer making. New breweries were built during the seventies and eighties at Chandigarh, Madras, Nepal and Kakinada near Hyderabad.

People: The population of Solan district is predominantly Hindus, followed by Sikhs and Mohammedans. The Jains and Christians constitute a microscopic proportion of the district population. Among Hindus, Brahmins are of two sects, *Gaur* and *Sarswat*. The Rajput families constitute of three categories, first is the ruling family, second is Thakurs or Mians and the third is Kanets, who are mainly agriculturists. Among scheduled castes, *'Kolis', 'Dumnas', 'Chanals', 'chamars', 'Lohars', 'Badis'* and *'Telis'* are found throughout the district. The scheduled tribes population constitute a negligible proportion of the total population of the district.

The staple food of the people in the district is wheat, maize and rice. With the spread of education and prosperity, the use of *'Sattu'* has almost been replaced by bread and rice. The agriculturist classes have 3 or 4 meals a day. The morning meal which consists of some maize or wheat *'chapatis'* is generally taken with *'Lassi'*, salt or pickle and is called *'Hajri'*. The mid-day meal consists of maize or wheat chapattis taken with some *dal* or *lassi*. In the evening, tea is taken along with one or two chapatis. In the dinner, maize or wheat *chapattis* and rice are taken with some *dal* or vegetable. Meat is not taken so frequently due to its high cost. The traditional preparations of *'Mandas', 'Putandas', 'Puras', 'Asnkalis'* and *'Chirals' are being replaced* by *'Puris'*.

No heavy clothing is required in most parts of the district. Ordinary clothing for men consists of a shirt and a *dhoti* or *pyjama*. The turban has been now replaced by a type of Gandhi cap. People now go more often bare headed. In winter, people use woollen clothes. In summer, *Khaddar* or cheap mill made cloth is used. The cotton clothes are gradually replaced by the polyester stuff. The women wear long shirt (Kurti) and pyjama or *suthan*. The head is covered with *dupatta*. The Punjabi *Kamij* and *Salwar* are commonly used and cheap rayons or nylons are used for dupattas and cotton and polyester stuff for shirt and pyjama. The villagers are attired in their best when they attend the fairs and festivals.

In the district, a number of fairs are held throughout the year. *These are:*

(1) Sharad Purniam fair (Kunihar) (2) Devi Bara fair (Mangal Kandar)
(3) Baishakhi fair (Kunihar) (4) Bani fair (Hardev Poorashaknli)
(5) Bari fair (6) Koti fair (Koti village) (7) Solan fair.

National Highway No. 22 Hindustan Tibet Road passes through district Solan.

Himachal Pradesh appeared on the administrative map of the country on the 15th April 1948 and the states of **Baghat, Baghal, Kunihar, Kuthar, Mangal, Beja, Keonthal and Koti** formed a part of the then Mahasu district. Nalagarh state which was merged after independence in **Patiala and East Punjab State Union (PEPSU)** later formed a part of Punjab when reorganization of the states took place in 1956. It remained as tehsil of Ambala district of composite Punjab till 31st October 1966. On the reorganization of Punjab, on 1st November 1966 the area of 'Nalagarh' tehsil of Ambala district and 'Kandaghat' were transferred to Himachal Pradesh. The reorganization of the district of the state was carried out in September 1972 and Solan district sprang up. *Solan district derives its name from Solan town which came into existence after the construction of the cantonment at that place around the last quarter of the 19th century.*

There are many places of historical and tourists interest in the district. Some of them are—*Chail, Kandaghat, Solan, Dagshai, Kasauli, Subathu, Parwanoo and Nalagarh. Ochhghat (Nauni)* has become an important place since the setting up of Dr. Y.S. Parmar Horticulture and Forestry University.

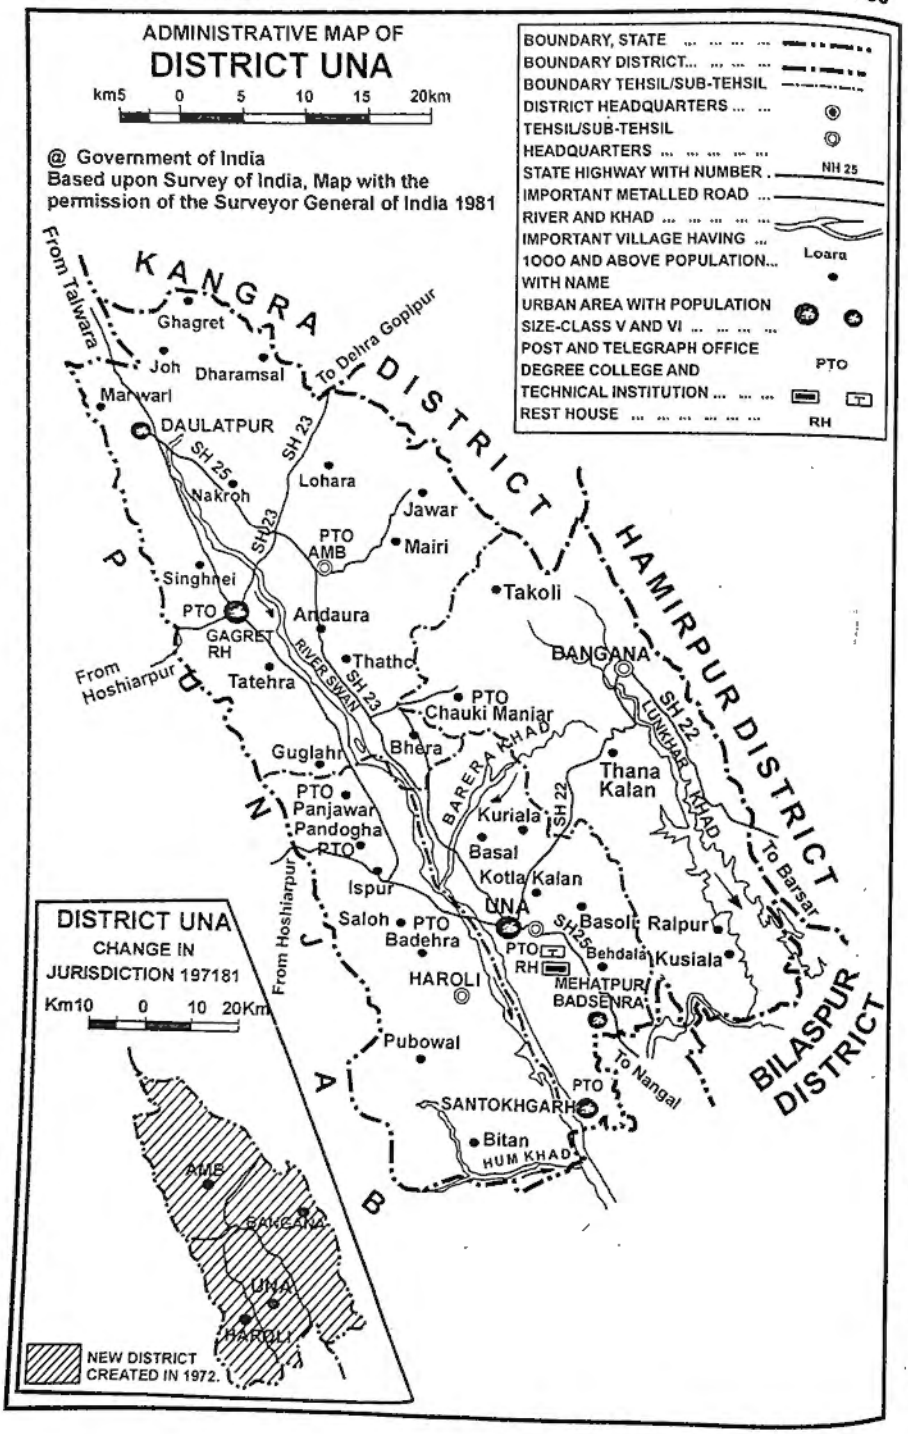
UNA

(HQ, UNA, ALTITUDE 750 METERS)



Languages spoken : PAHARI (PUNJABI), PUNJABI, HINDI ETC.

Una district is in the South–Western part of Himachal Pradesh. It is bounded by Kangra in the north, Hamirpur in the east and Bilaspur district in the of South, and Hoshiarpur district of Punjab in the West. It lies within North latitude 31° 21' and 31° 50' and East longitudes 71° 55' and 76° 28'. Una district is in Himalayan foothills zone bounded by plains of Punjab in the West and Solahansinghi Dhar in the East. In the western part also, there is hill range whose maximum height is about 600 meters. The altitudes vary from mere 350 meters to over 1,200 meters on the Solahsinghi Dhar. Shivalik ranges experience heavy rainfall. The hill ranges are covered by scanty vegetation comprising mostly of shrubs. The breadth of 'Jaswan Dun valley', ranges from 7 km. to 14 km. and the town of Una, which is near the middle of the Dun is on the elevation of 1,404 feet above mean sea level.

The sub–Himalayan hills commonly known as 'Solahsinghi or Jaswan Dhar' range commences near 'Talwara' on the Beas where the river touches the district running southeast. Its first 14 km. are in the Kangra district and its culminating ride forms the borders between this district and Kangra. Passing southwards, it increases steadily in width and elevation until its highest point reaches at 'Bharwain', which is 3,896 feet above sea level.

At the short distance South to Amb, the Solahasinghi range/Jaswan Dhar range recedes eastward ceasing to form the boundary of the district and the plains at this point form a kind of bay in the hills which is shut in by Solahasinghi to the north -east and on the south by another range commencing a few kilometers North of Una. Una is bounded by the river Beas on the north and the river Satluj in the East. The Swan river, which is basically a seasonal one, flows right across the Jaswan valley towards south until it submerges in the Satluj near Anandpur. *The Swan river indeed is the life belt of the Jaswan Dun valley.*

The main formation of this area is of alluvial fans, river terraces and gravel beds of recent age and the sandstone and clay stone. The Shivalik comprises conglomerates, friable sandstone, and clay stone. Conglomerates are loose, consisting mainly of cobbles and pebbles of quartzites and stray pebbles of granite limestones, sandstones and lumps of clay stones are also present. The matrix, when present, consists of medium to coarse grained sand and at place of calcareous cement which imparts certain degree of hardness to the otherwise loose conglomerates beds. They vary in thickness from 15 cm to 2.5 meters. The sandstones are poorly lithified and consequently are soft and friable. Alluvium occupies the vast stretch of the plain. They contain sand, silt and clay in varying proportions.

HISTORY

It is believed that the present Una district was formerly a part of the erstwhile Kangra state. Bulk of the present Una district, which is called Jaswan Dun, was ruled by the Katoch family of Kangra. The Jaswan state (for which reference has already been made as an offshoot of Kangra state) with its capital at *'Rajpura near Amb'* was founded by **Purab Chand** belonging to Katoch family of Kangra state in 1170 A.D. *Jaswan was the first off shoot of the Kangra state.* From Purab Chand to Umed Singh, 27 princes ruled the Jaswan state. Later on during Akbar's period, it became part of Mughal empire. On the decline of the Mughal empire and rise of the Sikhs, the Jaswan state came under their dominance and was annexed to Ranjit Singh's Kingdom in 1815 A.D. Ranjit Singh wanted Umed Singh of Jaswan State to attend the assembly at Sialkot, which he refused and consequently Ranjit Singh imposed fine on Umed Singh, which was beyond his capacity to pay and so Ranjit Singh brought under his control the State of Jaswan.

In 1848, during the second Sikh war, Umed Singh had joined revolt against the British which was successfully crushed and Raja and his son were deported to Almora where both died. In 1879, Ran Singh, grandson of Umed Singh, was restored his ancestral *'Jagir'* at Jaswan originally held by Raja Umed Singh. It was consisting of 21 villages in Jaswan Dun and also family garden at 'Amb' as well as the building at 'Rajpura', formerly the palace of Raja Umed Singh. He died in 1892 and was succeeded by his son Raja Ragunath Singh who also died in 1918. Thereafter, Laxman Singh succeeded him, who started residing at Amb. The present district of Una comprises of Jaswan Dun which was ruled by *Jaswal family* and Eastern side of it was ruled by the *Kutleria family* and the Northern extreme by *Siba family*— an offshoot of Kangra ruling family.

KUTLEHR STATE

Formerly princely state, Kutlehr is a part of Una district. It consisted of two provinces—*Chauki and Kutlehr*—hence the double name by which the state was originally known. It was situated among the Jaswan hills— *'Kutlehr was the smallest of all the principalities in the Kangra area'.* Forty generations of Rajas are said to have ruled the state. The progenitor of the family was a Brahmin, but on acquiring regal power, he was recognised as Rajput. The family records trace his descent from a Raja of Poona.

The capital of the state was fixed at Kot–Kutlehr, in tenth or eleventh century by the then head of the family, named Jaspal, who had conquered the taluqas of *'Talhati'* and *'Kutlehr'.* The states of Bhajji and Koti in the Shimla hills are said to have been founded respectively by his second son and grandson. The clan name is Kutlehria. The extent of territory kept on changing from time to time, but it was maximum in the reigns of early Mughal emperors, consisting of Chauki, Kutlehr, Man–Khandi in Nadaun and Talhati near Hoshiarpur.

The *sanads* granted by the Mughal emperors to local rulers addressing them as *'Rai'* with right to rule over the tracks on payment of tribute. The Mohammedan histories of the time are silent about the Kutlehr State. The Chauki and northern province of the State was annexed by Ghammand Chand of Kangra, soon after he was appointed the Governor by Ahmed Shah Durrani in A.D. 1758. In 1786, Sansar Chand completely dispossessed the Raja of the territory, but it was restored during Gurkha invasion. From 1809, the state was subject to the Sikhs and in 1825, Ranjit Singh laid seize to annex it, but Raja Narain Pal of the state stood like a rock and did not allow the progress of the seize.

It was on the payment of Rs. 10,000/- that Raja agreed to surrender the strong fort of Kotwalbah. Raja Narain Pal expelled the Sikhs from Kotwalbah during the first Sikh war and later, in consideration of his services, he was awarded a life grant of Rs. 10,000/- in addition to the Jagir of like value. Raja Narain Pal (died in 1864) was succeeded by his son, **Raja Ram Pal.** On his demise, he was succeeded by his son **Raja Rajendra Pal.** The last Raja of the family was **'Brij Mohan Pal'.**

Brij Mohan Pal: Raja of Kutlehar from 1928 to 1937. He was born in 1890, educated privately and at the Chiefs' College in Lahore; 5th Viceregal Darbari in Kangra District, married in 1911, Rani Saheb Shrimati Rattan Deiji, eldest daughter of HH Raja Saheb Shri Sir Bhuri Singh, Raja of Chamba, and had a son named Mahendra Pal. Brij Mohan Pal died in 1937. He was succeeded by his son Mahendra Pal in 1937.

Mahendra Pal: Raja of Kutlehar from 1937 to 1948, born on 4th July 1934 in Hari Kothi, Dharamshala, educated at Aitchison Chief's College, Lahore; married 1stly on 13th April 1955, Rani Lalita Devi, who was born on 29th March 1933, daughter of Raja Surinder Singh of Baghal, and his wife, Rani Laxmi Devi, married 2ndly in 1964 to Rani Saheb Shrimati Kamal Deiji, daughter of Kanwar Saheb Shri Nihal Singhji of Chamba, and his wife, Kanwarani Saheb Kanchan Devi, and had three sons and two daughters. Later on he joined Congress party and contested Vidhan Sabha election but defeated by a margin of three votes. After the merger of Kutlehar riyasat in Himachal Pradesh, he was associated with the implementation of welfare schemes in the area. Raja Mahender Pal was living at Raipur Maidan till his date on 20th July 2014 at Chandigarh. He was succeeded by his son Budheshwar Pal in 2014.

Budheshwar Pal: Presently the successor of Kutlehar Jagir since 20th July 2014, born on 6th July 1956 at New Delhi, he was installed on the gaddi of Kutlehar on 4th August 2014 at Chandigarh, married 1stly in February 1980 in New Delhi, Maharajkumari Kanika Kumari, daughter of HH Bisam-Samar-Bijayi Mahamahodya Pancha-Srijukta Maharaja Kirit Bikram Kishore Dev Varman Manikya Bahadur of Tripura, and his first wife, HH Maharani Padma Raje, married 2ndly on 27th February 1982, Rajkumari Bhuvaneshwari Kumari [Tikka Rani Bhuvaneshwari Kumari of Kutlehar], daughter of Rana

Ran Bahadur Singh Jandaive of Balsan, and his second wife, Rani Vidya Kumari, and has two sons (by second marriage).

The present district of Una, until 1966, was one of the tehsils of the Hoshiarpur district in Punjab. Consequent upon reorganisation of Punjab, all the hill areas including Una tehsil, which is East of outer Shivaliks, was transferred to Himachal Pradesh in 1966. From 1966 to 1972, it was part of Kangra district. In 1972, the Himachal Pradesh government reorganized the then Kangra district into three districts, namely *Una, Hamirpur and Kangra.*

The greater part of the district at present is inhabited by Brahmans, Rajputs, Jats, Sainis, Bhatis and Gujjars. The population of the district appears to be largely comprising of migrants from Western Punjab, Jammu and Rajasthan. The Oswals had migrated from Osia in Jaipur and some of the Rajputs migrated from 'Marwar' and the 'Khaudarwals', a village near Jodhpur. The Gujjars mostly cattle rearer came from Jammu side. In district Una, Punjabi, Hindi, Kutlehri or Pahari are common languages spoken.

ECONOMY

The predominant crops of the district are wheat, maize, barley, paddy, gram, sugarcane, urd, pulses etc. The Department of Agriculture has set up a seed multiplication farm at Rekhubella. This farm has gone a long way in providing the latest package of practices in agriculture in the district. Lately, great emphasis is being laid on the development of horticulture in the district. The Horticulture Department has been laying emphasis on the growing of citrus plants in the district, namely *Kagzi Lemon, Kinnoo, Malta, Santra, Orange, Baramasia Lime* and varieties of *Mangoes* like Safeda, Dussehri, Chausa, Langra and Warmalika. There is a fruit demonstration farm at 'Saloh'.

The Una forest division has with it the reserve forests, demarcated protected forests and under demarcated protected forests. The important species are *Cheel, Khair, Bamboo, Eucalyptus, Mulberry* and other broad leaved species. To popularize poultry, Government has set up poultry farm at *'Anjoli'.* Earlier, it was run by Panchayat Samiti, but since 1969, Government has taken full control of it and placed it under Animal Husbandry Department. There are three milk chilling centres—each at *'Jhalera', Bangana'* and *'Pubbowal'* in the cooperative sectors.

Compared to most of the other districts of the state, Una district is better developed in the industrial sector. Some of the main industries includes Turpentine oil factory, PVC Battery Separators factory, PVC Footwear factory, AAC and ACSR conductors factory, Spun pipes factory, Nuts and Bolts factory, Leather board factory, Pottery and Barbed Wire factory etc.

The Una district has distinction of celebrating the following festivals and fairs. These are—Chintpurani fair, Pir Nigaha in Basholi, Panjgotra at Babhaur, Mairi fair near Amb (Baba Barbagh Singh fair), Thakurdwara fair at Dharamshala, Sidh Badhmana fair, Baishakhi fair at Ambota, Jatoli fair, Bhadar Kali fair etc.

Dera Baba Rudru: Dera Baba Rudru, established by a celibate solitarian Baba Rudranand in village Nari about 10 kms. from Una, is situated on Una-Amb road near Basal village. It is said that Baba ji was named Rudra as he was considered to be a part of lord Shankar. As per a legend prevalent in the area, once the local *nambardar* gave a sound beating to Baba's cows and the herdsmen. Later on when herdsmen narrated the entire incident then Baba Rudranand enquired about the pain they felt. The herdsmen revealed that they simply felt as if the nambardar was simply tricking them by playing pranks. Then Baba Ji showed them his bare back which was full of bruises of lathi blow . After being initiated as a disciple by revered celibate Brahmanand of Kashi, Baba Rudranand Sat in penance under a cluster of five 'peepals' which still exist with in the precincts of the 'dera' Baba Ji established an *'akhand dhoona'* in 1850 which is still burning constantly without break. It is believed that there is some spiritual bondage in between the five peepal tree and the *'vibhuti' (holy* ashes) of the 'akhand dhoona', because anyone afflicted with a snake bite after being given a dose of 'vibhuti' is made to sit or lie under the five peapul tree, is cured by Baba Rudru's grace and blessings of the snake bite.

The important fairs and festivals celebrated at Dera Baba Rudru which draws a large number of devotees are ***Panch Bhisham Mela, Nirjala Ekadashi Fair, Baba Rudru's Jayanti*** on the Shukla navmi of Phalgun month and Vyas Puja (Guru Purnima).

Freedom Struggle to Statehood

To let you live another day, he had the guts to fight and die.
To keep the freedom you live by, by his dying your life he buys.
But who cares if a soldier dies!

- Rachel

History of Himachal Pradesh and its people will remain incomplete if no reference is made to the various movements launched by the hill folks for their liberation from colonial yoke and oppressive and undemocratic rule of the princely rulers, among whom this territory was divided and subdivided. The intensity of struggle may not have been that much deep rooted as it was in the other parts of the country but undoubtedly it was well directed and was indigenous in nature. There were many young men and women who participated at the local and national level liberation movement in different parts of the state.

First opposition to the British in India was expressed on the day they landed on this soil. But struggle in organized form, started only with the setting up of the Indian National Congress (INC) on 28th December 1885 at Bombay. It was a strange fact that the idea for the formation of INC was given by a retired British Civil Servant, Mr. A.O. Hume, from his residence *Rothney Castle,* Shimla. A.D Hume experienced an undercurrent of unrest among the people of India and formed Indian National Congress, which gave different direction for ensuing independence. In the initial years, it was working as a *'safety valve'* against anti-British feelings, but with the passage of time, INC emerged as the sole force to accumulate people of various shades of opinion under its umbrella to wage unified and aggressive fight against the mightiest empire on the earth.

The battle which was waged with the policy of *political mendicacy* ended with that *'clarion call' 'Quit India'* and *'Do or Die'* by the apostle of peace and nonviolence, Mahatma Gandhi. In the initial years of his political life, Gandhiji had full faith in the fair play and justice of the British, which eroded with that single incident of Jallianwala Bagh tragedy (1919), which shook the whole world. Since then, Gandhiji threw his heart and soul into India's struggle for freedom and took the reins of the Indian National Congress in his hands. He became the national hero and launched a number of popular movements like *Champaran movement* (1917, Bihar). *Ahmedabad Mill Workers strike* (1918, Gujarat), *Khilafat Non-Cooperation movement* (1920), *Civil Disobedience* (Salt Satyagraha, 1930) and *Quit*

India Movement (1942) against the colonial rule. Interestingly Mahatma Gandhi visited Shimla in the years, 1921, 1931, 1939, 1945 and 1946. In 1945 he stayed at the residence of Raj Kumari Amrit Kaur in Manorville and in 1946 at Chadwick in Summer Hill. *Till 1915, every single leader was following the policy of Indian National congress but since then Congress started following Gandhiji.*

The rulers of Punjab hill states were tired of Maharaja Ranjit Singh's policy of annexation and extinction and now they were looking for an opportunity to get rid of the growing power of the Sikhs. It came to them, after the death of Maharaja Ranjit Singh in the war which ensued between the Sikhs and the British in the autumn of 1845. Raja Shamsher Singh of 'Guler' raised a force from among his retainers and turned the Sikhs out of Haripur fort. Bir Singh of Nurpur rallied his men and laid seize to the fort of Nurpur. Raja Narain Pal of 'Kutlehr' also expelled the Sikhs from Kotwalbah. Ugar Sen of 'Suket' and Balbir Sen of 'Mandi' also joined hands to tendering their allegiance to the British Government for the expulsion of the Sikhs from hills. The Sikhs were defeated in the *'battle of Sabraon'* on 10th February 1846. On 9th March 1846, a peace treaty was signed at 'Lahore' between the Sikhs and the British. According to this treaty, the Sikhs ceded to the British all territories to the South of Satluj, together with the extensive Jalandhar Doab lying between the Satluj and the Beas.

The Punjab hill chiefs, who had given their unconditional support to the British in the Anglo-Sikh war were under impression that their territories will be restored to them as it was done in the case of Shimla hill states on the conclusion of Anglo-Gurkha war in A.D. 1815. But the hopes of most of the hill rulers were belied after the victory of the English in the first Anglo-Sikh war. Instead of restoring the ceded territory to the hill chiefs, the British retained the portion between the Satluj and the Ravi as British territory and disposed of the rest to 'Maharaja Gulab Singh' of Jammu. With the result, the hill states of Kangra, Guler, Jaswan, Datarpur, Nurpur, Suket, Mandi, Kullu (except the Jagir of Waziri Ruppi to which Thakur Singh was confirmed with sovereign powers). Lahaul-Spiti (though it fell under Raja Gulab Singh of Jammu, was exchanged with him for other territory) came under the direct control of the British.

A heavy war indemnity, amounting to one and a half crore of rupees, was paid by the Lahore Durbar, fifty lakh rupees in cash and balance by ceding to the British the hill districts between the Beas and the Indus, Including Kashmir and Hazara. As the chief of Mandi and Suket had tendered their allegiance to the British Government at Bilaspur on 21st February 1846 and their territories were ceded to the British Government by the treaty, they were granted a separate *Sanad* on 24th October 1846, according to which they were required to pay fixed tribute to the British Government in half yearly installments and agreed to abolish transit duty on goods.

In Bilaspur, Raja Jagat Chand was allowed to retain the possession of

the territory held since A.D. 1809 and also exempted to pay tribute, but required to abolish transit duties in his country on British goods. Raja Narain Singh of Kutlehr was awarded a life grant of Rs. 10,000 in addition to the Jagir of like value and this was afterwards confirmed to his heirs, in perpetuity, subject to a *nazrana* of Rs. 1188. On 16th March, 1846, a separate treaty was signed at Amritsar by the British Government with Maharaja Gulab Singh of Jammu. This treaty put him in possession of the entire hilly area and the British dependencies between the Ravi and the Indus, Including Kashmir, Ladakh, Gilgit and Chamba, excluding Lahaul. In return, Maharaja had to pay Rs. 75,00,000 to the British Government. As regards the Chamba, there cropped up a different type of problem with the transfer of territory to the Raja of Jammu.

The Ravi river divides the state into two parts. Now the question was as to whether the English intended to include the whole state in the transfer, or only the portion to the west of the Ravi. Finally, an agreement was reached by which Gulab Singh of Jammu acquired *'taluka Lakhanpur'* in exchange for the *'cis-Ravi'* portion and Chamba surrendered all claim to *'Bhadrawah'*, thus preserving the ancient integrity of the state. Had the provisions of the treaty of 16th March been fully carried out, Chamba would have gone to Jammu States permanently. It was saved from this fate by the patriotic zeal and astuteness of 'Wazir Bhaga', who presented the case of the State before Sir Henry Lawrence convincingly and succeeded in securing his sympathy and support. *On 6th April 1848, a sanad was granted to the Chamba Raja, restoring him full possession of the State, on the usual conditions of annual tribute of rupees twelve thousand and its allegiance to the British Government.*

It was, after this treaty that anti-British feelings developed among the rulers of the hill states. They were all disappointed with the new conditions. Such an arrangement of ceded territory which deprived the hill rulers of the chance of restoration of their dominions came as a bolt from the blue. That is why in the second Anglo-Sikh war (1848), the rulers of Kangra hill states decided to support the Sikhs, who had promised them restoration of their territories in the case of success after the war. *The hill rulers who revolted in 1848 were mainly from Nurpur, Kangra, Jaswan and Datarpur.* A force was sent against them under Mr. Lawrence, the Commissioner, who secured easy surrender of them and revolt was suppressed. They were all captured and transported to Almora as political prisoners, where they died. However, Ram Singh, the wazir of Nurpur proved to be a difficult person to deal with. It was after great difficulty that he was defeated at 'Dalle Kee Dhar', a rocky ridge of the Shivaliks area, North-West of Shahpur and overhanging the Ravi.

He was betrayed for gold by a Brahmin 'Pahar Chand', whom he trusted as a friend. He was transported to Singapore where he died. For his undaunting courage, his exploits are sung by the hill bards. In spite of the fact that Nurpur was first state to revolt, the British dealt generously with Jaswant Singh, the minor son of Raja Bir Singh of Nurpur. Jaswant Singh was conferred the annual

'Jagir' of Rs. 5000 and Nurpur state was merged with the Kangra state. With the coming of the British directly in touch with the hill rulers, an entirely a new phase started in the governance of the territories, which were under the control of paramount power of the British. In 1857, when *first war of independence* broke out in the Central and Northern Indian states, it did not have much affect on the hill territories. The people of hill states, socially, economically and intellectually, were far less advanced than those of the plains and, therefore political rights did not matter much to them. Economic exploitation was more a phenomenon of the native rulers and *Jagirdars* than that of the British. There was no religious interference by Christian Missionaries, whatsoever by the time revolt started. The rulers of Punjab states had remained loyal and rendered valuable services to the English. The first news of the revolt reached Shimla on 12th May 1857 from Ambala.

The news of Meerut and Delhi massacres reached Shimla on the night of 12th May. The Commander-in-Chief of Shimla hills at the time of revolt was General Anson and Deputy Commissioner Shimla was Lord William Hay. At that time, the first and second Fusiliers and the *Gurkhas (Gorkhas) regiment known as Nasiri Battalion,* were in the hill cantonments along with the Commander-in Chief and his staff. The entire staff was ordered to move to Ambala, to which Gurkha battalion refused to comply.

The soldiers of 'Kasauli Guard' numbering about 80 also revolted and marched off with a huge sum of Government money to join their fellow soldiers at 'Jutogh' (Headquarters). After some time, a rumour that the Gurkhas regiment Stationed at 'Jutogh' had mutined and were coming to *loot* shimla, created panic. *Many English women and children became nervous and some of the English army officers also failed to show the courage expected of them.* To pacify the temper of the mutineers, William Hay, the Deputy Commissioner, sent a message through Mian Rattan Singh, uncle of the Raja of Mandi for immediate redressal of their grievances. But mission did not succeed.

The Raja of *'Keonthal'* came to the rescue of the European inhabitants. He gave to the panic-stricken Britishers, shelter, first in his palace at Shimla and later at Junga, not very far off Shimla. Some others stayed with the Thakurs of *'Koti'* and *'Balsan'* states, while rest sought safety in the hill cantonments of *'Dagshai', 'Subathu'* and *'Kasauli'.* They received much kindness from the hill chiefs. Hill chiefs remained loyal to the British. Fifty well armed soldiers from Bilaspur were stationed at Boileauganj Bazar, sixty Sirmauri soldiers under the command of 'Kanwar Bir Singh', the uncle of the Raja of Sirmaur were posted in *'Bara Bazar'* and sixty men were furnished by the Ranas of *'Keonthal', 'Dhami'* and *'Bhajji'.* Besides, Mian Jai Singh of Baghal, the Ranas of Keonthal, Dhami, Koti and Jubbal were also ready with about 250 followers in Shimla to meet any emergency with short notice. For his services during the revolt, 'Raja Hari Singh of Bilaspur' was granted a salute of eleven guns and also a valuable *Khillat* and other gifts. 'Raja Sri Singh' of Chamba also sent troops to Dalhousie under Mian Avtar Singh and kept a close vigil along the

frontier for any rebels who might enter the state territory. **Rana Krishan Singh** was keeping guard over the road from Shimla to Jalandhar, where the 3rd, 31st and 33rd Bengal regiments had revolted. He was conferred with the title of *'Raja'*. Both the Rana and his brother Jai Singh, who was at Shimla were rewarded with a *'Khillat'*. **'Rana Govardhan Singh'** of Dhami, in recognition of his services, got half the tribute excused from the British. **'Thakur Jograj'** of *'Balsan'* was made a Rana and presented a valuable *Khillat* in a public durbar. Taking advantage of the worsening law and order situation at Shimla, there were some disturbances in Nalagarh state, but soon order was restored by Lord William Hay with the support of Mian Jai Singh of Baghal (brother of the Rana of Baghal). About this time, one **'Ram Prasad Bairagi'** of Subathu, was suddenly arrested on the charge of being the writer of certain seditious letters. He was sent to Ambala and executed.

On 10th June, troops at Jalandhar mutinied and started moving towards *'Pinjaur'*. But they could not reach beyond Nalagarh, where they were captured or killed. In a precautionary measures, the 4th Native Infantry stationed in the forts of *'Kangra'* and *'Nurpur'* was disbanded. *Throughout the Kangra hill states, there was a friendly feeling towards the British Government, signalled by capturing the fugitive mutineers of the Sialkot Brigade, Raja Ram Singh of Siba and Raja Jodhbir Chand of Nadaun went in person to reassure the Commissioner of their support.* At the request of the commissioner, **'Wazir Gashaon'** of Mandi supplied 125 match lockmen to the local authorities of Hoshiarpur and sent some 50 men to escort him to Jalandhar. Early in June 1857, an attempt was made in Kullu to excite the people to rise in rebellion against the British. This movement was organised by one *Pratab Sing,* who pretended to be the rightful Raja of Kullu. He was being assisted by a *Negi* of Seraj area. But this revolt could not last long. Within three days, Pratab Singh and his brother-in-law Veer Singh were arrested and deported to Dharamshala in Kangra, where on 3rd August 1857, both were hanged. The other supporters of Pratab Singh were given rigorous imprisonment.

The only Raja who acted with hostility and discourtesy towards the British was **'Raja Shamsher Singh of Bushahar'**. He kept back his tribute, offered no aid, treated officials travelling through his territory with discourtesy and refused ordinary supplies. Lord William Hay, the Deputy Commissioner of Shimla, wanted to send a force to Rampur to coerce the Raja, but idea was abandoned in the dearth of troops. Nothing was done against the Raja after the revolt and his behaviour was overlooked.

The revolt of 1857 was suppressed, but it brought about far reaching changes in the political and administrative structure of the country. The most important change was the transfer of power from the East India Company to the British Crown, to set up direct rule of Crown over India. *On 1st November 1858, a proclamation was issued by Queen Victoria , popularly known as 'Magna Carta' of Indian Civil Liberties, which assured the princes and common people of just, democratic and unbiased rule in the country , keeping in view the*

demands of indigenous people and long traditions for parliamentary democracy in Britain. For their active cooperation during the revolt, a very favourable attitude was adopted towards hill rulers by the crown. 'Raja Ram Singh', son of Raja Jai Singh of Jaswan, was allowed to return from Almora and was restored in A.D. 1877 the Jagir held by Raja Umed Singh. 'Mian Dev Chand', Son of Raja Jagat Chand of Datarpur, was also allowed to return, but his Jagir was not restored. The pension of the Raja of Nurpur was doubled in 1861 and *according to the Sanad dated 11th March 1862, Chamba chiefs were granted the right of adoption on the failure of direct heirs.* The generosity of the Crown was expressed through various ways, such as bestowing honours, grants of territorial possession, *'Khillats'* and other valuable gifts.

When the Delhi Durbar was held in 1877, during the viceroyalty of Lord Lytton, some of the hill rulers like *Raja Sham Singh of Chamba, Raja Bajai Sen of Mandi and Raja Hira Chand of Bilaspur were invited to grace the occasion and they attended this great event which was unprecedented in the history of colonial India.* The increasing intensity of relations with the crown, hill chiefs acquired a great degree of control on political, administrative, social and economic issues, which used to consume a large amount of time in the preceding years. The appointment of the British Superintendents minimised the possibility of trouble in the states. *The principle of deposing the ruler in case of misgovernment or oppressive rule was applied in Himachal only in the case of Rud or Sen of Suket.* He succeeded Ugar Sen in 1876 and was deposed in 1879, when his rule had become quite oppressive and had created a great disaffection. *Some other hill states, where the British Government had to interfere on account of misrule and not altogether satisfactory state of affairs were:*

Dusht Nikandan Sen (Suket) (1902), Rana Bir Pal Singh of Bhajji (1940), Raja Karam Chand of Jubbal (1859-62), Raja Gopal Singh of Chamba (1873), Raja Samsher Singh of Bushahr (1866), Raja Balbir Sen Keonthal (1899), in 1875 Baghal State, after the death of Raja Kishan Singh and again in 1902 and 1905 and finally in 1914 Kumharsain during the period of Hira Singh. Under the British Crown, hill states recorded good progress in various fields.

The hill chiefs were also invited to attend the **CORONATION DURBAR OF DELHI, in December 1911, when Delhi was made capital in** place of Calcutta. The prominent among those who attended the imperial Durbar, were Raja Amar Prakash of *'Sirmaur'*, Raja Amar Chand of *'Bilaspur'*, Raja Bijai Sen of *'Keonthal'*, Raja Bhim Sen of *'Suket'*, Raja Bhuri Singh of *'Chamba'*, Rana Bagat Chand of *'Jubbal'* and Raja Dip Singh of *'Baghat'*. During the first World war (1914-1918), almost all hill chiefs remained loyal and also rendered valuable services to the British, both with men and materials. Each ruler tried to excel the other in providing as many recruits as possible for the army. Thus on the one hand, the princes earned the gratitude of their subjects, who suffered from poverty and unemployment and who now got an opportunity to obtain employment and, on the other, it secured them a raise in their status apart from earning goodwill of the officers of Political

Department. However, something which they had not bargained for, occurred after the close of the war and the return of army men to their respective states. During war period, these army men came in contact with people of other countries, which were free and people there were living free, democratic and dignified life. This very knowledge generated discontentment and became a cause of political awakening amongst the hillmen. They also started talking about *'liberty', 'equality'* and *'justice'*, which are common features of all democratic rule. So the fire of liberation started brewing in the hearts of hill folks slowly but surely, which ultimately resulted in the form of local movements against tyrannical and undemocratic rule.

But history reveals that the hill people took up arms against slavery and feudalism well before the formation of any large scale political organization. There are many instances of the people revolting against the rule of terror and injustice. In 1859, the people of Rampur Bushahr revolted against the high handedness of the Government officials in the recruitment of labour force. In 1862 and 1876, the people of Suket state revolted against the ruler and his minister Narottam. In 1876, the people of Nalagarh rose against the atrocities committed by Ghulam Qadir Khan, a minister.

In 1883 and 1930, the subjects of Bilaspur revolted against the rule of oppression and injustice of State officials. In 1995, the people of Baghal state too revolted against their chief. At Mandi in 1909, **'Sobha Ram'** struggled against corruption indulged in by the rulers. A pitched battle took place between the forces of Mandi Raja and the 20,000 strong force of local people, in which state forces were defeated and corrupt officials including Wazir were jailed by the volunteers. The Raja then sought help from the British Commissioner at Jalandhar. Armed forces from Jalandhar, Kullu and Kangra were rushed to Mandi. Once again, guns boomed in Mandi. In this battle, Sobha Ram was caught and tried for treason and deported to **'Andamans'**. Twenty three persons were sentenced to seven to fourteen years imprisonment and sent to Lahore Jail.

The present day Himachal Pradesh consists of two types of hill areas. There are areas which were ruled by native princes. Though he people's struggle in these areas was influenced by the nationalist movement in British India, yet cannot be characterized as freedom movement, since its objective was never the overthrow or total elimination of their princely rulers. The main aim of the Praja Mandal Movement was the ***'democratisation of the administration'***. The other hill areas which came to Himachal Pradesh in 1966, had come under direct administrative control of British. The people in these areas participated in the struggle for freedom with the specific objective of overthrowing alien British rule. Thus in the hills, there were two types of movements going on simultaneously, i.e: the **'Praja Mandal Movement'** and the **'Freedom Movement'**. This distinction, however, does not imply that there was not overlapping in the personnel of these movements. The Praja Mandal workers participated in various agitations and struggles launched in

the British administered areas and members of the various political organization in the British areas crossed over to the state territories to help the Praja Mandal workers in their agitation.

In the beginning, people organized themselves against certain social and religious evils existing in the society. There came to be organized 'Rajput' and *'Brahman Sabhas', 'Sanatana Dharam' and 'Arya Samaj Sabhas', 'Sewak Sanghs'* and *'Sudhar Sammelans', 'Prem Sabhas'* and *'Seva Samities'*. The 'Evils' against which campaigns launched were 'Reet', untouchability, child marriage, anti widow re-marriage, against 'Bethu' land tenure system, against levies at the time of marriages, deaths, accession to the throne and other religious ceremonies in the princely houses. As all these levies were imposed arbitrarily and collected ruthlessly, the associations began to raise their voices for their abolition.

To redress the grievances of their subjects, the rulers of Shimla Hill States formed an executive council constituted with Raja of Baghat (Solan) as its chairman. The executive committee recommended a number of reforms in political, police, education and general administration of the states. For the active cooperation among the member states, the rulers of 'Sirmaur', 'Bilaspur', 'Baghat' and 'Mandi' contemplated the idea of 'All India Federation' in 1935. The rulers of princely states were becoming acutely aware of the momentum gained by the states people as a result of their participation in the *'Quit India Movement'* of 1942.

The states of Bilaspur, Bushahr, Mandi and Sirmaur had already introduced some constitutional reforms. Màndi ruler had constituted a legislative council as early as in the year 1933. The Executive Council of the State consisted of two legislative council members, one to be elected by it and the other to be nominated by the Raja. 'Mandi Legislative Council' passed a *'Panchayat Act'*, which was assented to by the Raja, Similarly, the rulers of Sirmaur and Bilaspur enacted Panchayat Acts on the same model. Judicial system was also strengthened and modelled on modern lines. *Among the Shimla hill states 'Mandi' was first princely state to enact the Panchayati Raj Act.*

However, the princes were touchy on the point of interference or dictation either by the 'British Government' or by the 'National Interim Government' constituted in 1936, under the premiership of Pt. Jawahar Lal Nehru. Later on, the Raja of Bilaspur opposed the idea of 'grouping' and wanted each state to be 'Sovereign' once the paramountcy of British government is lapsed. In independent India, he wanted to keep himself as a separate entity and that is why among the all hill states, he emerged last to merge his state with Himachal Pradesh. *Although a number of reforms were introduced in the princely states, yet princes failed to asses fully the strength and aspirations of their people and could not carry their people with them to any workable solution in respect of their future political set up of the country.*

Before 1920, INC's participation was confined to certain elite sections of the society. But with the assumption of Congress leadership by M.K. Gandhi,

it became a mass movement. First, time it was successful in developing political consciousness among people and ferment caused by its activities began to tickle down to hill people and they also began to make efforts to set up people's organizations. Whenever it was not possible to do so inside the state's territory in view of Princes coercion, adjoining British territories were made centre of political activities. In Himachal, for instance, Pt. Padam Dev of Bushahr made Shimla his headquarters to launch struggle against hereditary rulers of the hill states. In its resolution of September 1920, Congress for the first time asked the princes to grant their people full responsible government. However, it refused to interfere with the internal affairs of the states, while people were free to become member of Congress party.

The INC continued its policy of *'Noninterference'* for a long, but made it clear that it would not sacrifice the interests of the state's people in any future settlement with the British Government about the independence of the country. However, after the Congress formed ministries in 1936, its policy of keeping itself aloof from the state's polity rapidly gave place to a more *'activist'* policy—a policy of undisguised hostility to the State Government and of open encouragement to agitation within and without the states against them.

The attitude of the Congress further underwent a change when it, saw undying spirit of state's people to undergo sufferings to set their grievances redressed. The resolutions passed by INC at its *Haripur* (1936) and *Tripuri* (1938, Jabalpur district) sessions called for "the ever increasing identification of the Congress with the state's people". It made the *'Quit India'* Movement more popular in the hill states and people of these states joined movements in British India now in greater numbers. In 1945, the INC appointed a subcommittee consisting of Jawahar Lal Nehru, Bhulabhai Desai, Vallabh Bhai Patel and J.B. Kriplani to bring the people of the states within the fold of the Congress organisation. The greater participation of hill peoples in the Congress programmes ultimately paved the way for the Praja Mandals in the Hill States to join Indian National Congress and later on integration of princely states with Indian Union.

The All India States People's Conference (AISPC) and the Hill States: The appointment of the Indian States Committee under the chairmanship of 'Sir Harcourt Butler' on 16th December 1927 was necessitated to coordinate the activities of various Praja Mandals in the native states. The first meeting of the AISPC took place on 17th December 1927 and was attended by 700 delegates, however no delegate from Hill States attended the session. The aim of AISPC was to influence the states as a whole to initiate the necessary reforms in the administration by the force of the collective opinion of the people of the states. The hostile attitude of the princes and lack of modern means of transport and communication created many difficulties in the functioning of the AISPC and its units.

The Praja Mandals and the organizations of State subjects, were organized on the *'Gandhian principles'* and were successful in a great magnitude to

develop political consciousness among hill people. The exposure provided by the various national organizations to the hills people led to the formation of a number of local bodies, which ultimately became *'breathing images'* of people's aspirations and aims. The Praja Mandal movement in Sirmaur and Bushahr states derived sustenance from the adjoining district of Dehradun, of United Provinces of Agra and Oudh and it served as a launching ground for them, as did Shimla, for Shimla Hill States and Bilaspur, Kangra and Gurdaspur for Chamba, Kangra, Hoshiarpur for Mandi, Bilaspur and Suket.

Some popular movements in Himachal Pradesh against native rulers and the British Government were follows as:

Mandi Conspiracy (1914-15): First signs of the people's latent resentment coming to surface were discernible in 1909. The chief cause of the agrarian disturbance was the acute discontentment with the administration of 'Wazir Upadhya Jiwa Nand'. His atrocious attitude towards the *'Kisans'* at the face of bad crops and scarcity and system of 'Begar' which he forced inhumanly, developed strong ill will towards the state administration. The smouldering fire first burst into a flame when a suitable leader was found in the person of 'Sobha Ram' of Sarkaghat.

The Mandi conspiracy in 1914-15 was the result of the influence of some members of Ghadar Party, who had returned from America and had been carrying a revolutionary work in Punjab. They had spread themselves out in Mandi and Suket mobilizing more and more people. Extracts from *'Ghadar-Ki-Gunj', 'Ghadar Sandesh', 'Ailan-e-jung',* etc. were read out by them to influence the people. 'Mian Jawahar Singh' and 'Rani of Khairgarhi', Mandi came under their influence and helped them financially. Meetings were held in December 1914 and January 1915 and it was decided to *'murder the Superintendent and Wazir of Mandi State', looting the treasury, blowing up the Beas bridge, seizing the states of Mandi and Suket* and *to join up with Punjab revolutionaries.* But except for the Nagchala dacoity, the revolutionaries could not succeed in any of their objectives. Soon the conspiracy was unearthed. Five men—Jawahar Naryal, Mian Jawahar Singh, Badri Sidhu and Kharara were arrested, tried and sentenced to long terms of imprisonment. The ex-Rani of Khairgarhi, Mandi was exiled. In the Mandi conspiracy, Bhai Hirda Ram played an important role. He did commendable work for Ghadar Party in close association with Ras Bihari Bose, Dr. Manthra Singh, Kartar Singh, Bhai Parmanand etc. at Amritsar and Lahore.

In 1933, a nominated council was instituted, which was expanded in 1944-45 and was given an elected majority. The franchise, however, was based on high property qualifications and was not fair. The leaders of the Praja Mandal Movement, Krishnanand, Purnanand, Shri Gauri Shankar, Shri Krishna Chand, Shri Sadhu Ram and Tej Singh 'Nidharak' were not satisfied. The leaders of the Praja Mandal were arrested in August 1947 but released soon after five months. The Raja of Mandi agreed to the establishment of a responsible government and leaders of the Praja Mandal were invited to

form the ministry. The invitation was accepted and ministry functioned till the formation of Himachal Pradesh in 1948.

Bilaspur Struggle: The first land revenue settlement of 1905 had already doubled the incidence of land revenue as compared to that obtained in adjoining British territories of *'Kangra'* and *'Hoshiarpur'* districts. In 1930, (Bhoomi Bandobast Abhiyan) a year in which economic slump had suddenly hit India, some Kisans of *'Bhadarpur Pargana'* refused to supply free fire wood to the newly set up settlement staff working in their villages. There were other grievances too, such as high rates of *'Nazarana', 'fishing licence fee'* and other taxes, *indiscriminate policy of forest officers* and *high-handed behaviour of the revenue staff,* who were publicly accused of *molesting village ladies.* The authorities failed to satisfy people and so agitation continued unabated. The small police force of the state was found inadequate to cope with the situation and then armed police was called from Punjab.

The police arrested some ring leaders and brought them to Bilaspur town. The crowd demanding the release of their leaders were mercilessly beaten up by the Punjab police. In order to control situation, the companies of troops were sent on flag march for three months in different parts of the state. Meanwhile, 19 more leaders were arrested. A collective fine of Rs. 25,000 was imposed on the Villagers, who had participated in the popular movement.

On 9th January 1933, when Raja Anand Chand was invested with full powers, he followed a twin policy of repression and reform. Meanwhile, a secret organisation continued its work secretly. Some educated persons, however, organized themselves into a **'Sewa Samiti'** and a **'Sanatana Dharam Sabha'**, with apparent objective of social and religious reforms, but used these meeting for political messages. Raja Anand Chand fixed very stern punishment for participation in any movement against state and its administration. Confiscation of property and exile were common punishments. Post Second World War developments in India and the return of Indian National Army (INA) personnel to their homes in the state had its own repercussion. A few young men from the state (Shri Daulat Ram Sankhyan, Narottam Datt Shastri and Devi Ram Upadhyay) secretly attended the *Udaipur* session (1945) of AISPC and on their return, they laid the foundation of **'Bilaspur Rajaya Praja Mandal'** (BRPM). The demands put-forward by this organisation before the Raja were not accepted and so, on 21st December 1946, 'Satyagraha' was launched, which was suppressed with a heavy hand.

The Standing Committee of AISPC in a resolution passed on *27th December 1946* criticised the attitude of the Raja with regard to civil liberties and fundamental rights of the people and his policy of repression and active hostility towards the popular movements and organisation. In support of Bilaspur Satyagraha, demonstrations were organized in Shimla. It was the result of the efforts of Sarvshri Daulat Ram Sankhyan, Sadanand Chandel, Sant Ram Kanga, Sant Ram Sant etc. and setting up of National Interim government, that certain reforms and teachings of Gandhiji were given

practical shape by Raja Anand Chand. He introduced basic education through Hindi medium right upto Matriculation standard, complete prohibition, Panchayati Raj, Harijan Upliftment programme, rigid enforcement of Child Marriage Act etc. He was the only prince to give up his title of His Highness, K.C.I.E. and the salute of guns. However, all such activities of the Raja were devices to deceive the outsiders. The Bilaspur Rajya Praja Mandal was forced to remain in exile. *"Hands off Bilaspur"* was his open challenge to the Indian National Congress and AISPC. The Raja of Bilaspur had raised an army called the *'Swadheen Kahloor Dal'* to suppress all liberation activities, associated with INC, AISPC and BRPM. After several rounds of discussion, the Raja was persuaded to merge his state with India. The merger agreement was signed on 15th April, 1948. The state was merged with Himachal Pradesh on 1st July, 1954. The credit for integration of states goes to Sardar Patel, otherwise Congress party had so many sympathiser of princely rulers in its garb.

Rampur Bushahr Movement: In 1906, the people of Rampur Bushahr had already started 'DUJAM', a *form of non-cooperation movement* to register their protest against some state officials and exploitation of state forests by British. In the twenties of the 20th century, a Brahmin youth, Pt. Padam Dev, waged a struggle on behalf of low castes against social practices such as 'Reet' *(a custom involving sale and purchase of women for matrimonial purposes)*, untouchability and child marriage. He was also instrumental in the conversion of Samuel Evans Stokes to Hinduism. He brought upon himself the wrath of the Raja and the higher castes, but continued with his work without fear. In Kotgarh, Satyanand Stokes (S.E. Stokes) launched struggle against 'Begar' *(a system of forceful labour, without giving just wages).*

The "Himalayan Riyasti Praja Mandal" (HRPM) was organized in December 1938 and was made responsible for directing the activities of political and social workers in numerous hill states. The founder members of HRPM were *Sarvshri Chiranji Lal Verma, Bhag Mal Sautha, Pt. Padam Dev, Govind Singh, Gian Chand Totu, Surat Parkash (Theog), Devi Dass Musafir (Madhan), Bhaskra Nand (Bhajji), Mansha Ram Chauhan, Hira Singh Pal, Sita Ram* etc. To arouse people, it undertook the programme of organizing public meetings at different places in a number of Shimla Hill States. Pt. Padam Dev, Secretary HRPM, was a great force to launch a number of social and political activities. Entry of Praja Mandal workers was banned by the *Ranas of* small states like , *'Ghund', 'Theog', 'Balsan', 'Baghal', 'Bhajji', 'Beja', 'Darkoti'* and *'Keonthal'* on the pretext that this was the policy of their state that no outsider be allowed to represent the case of their subjects. The local workers of HRPM were arrested. The British authorities too became suspicious and watchful. They also warned state governments against the activities of HRPM and its sister organizations. This followed the famous *'BHAI DO, NA PAI MOVEMENT'* (neither to give recruits for the British army nor money for war funds). *In a way, it was the extension of civil disobedience movement, which led to the imprisonment of Praja Mandal workers.*

The activities of Praja Mandal, which were suppressed under severe repression, were re-activised in 1945. During this period, other organizations like **'Sudhar Sammelan', 'Sewak Mandal Delhi'** and **'Bushahr Prem Sabha'** were also organized by the people of Rampur Bushahr. At a number of places *'Begar'* was refused. *Pt. Padam Dev* was working from Shimla but *Pandit Ghanshyam, Satya Dev Bushahri* and many other continued working from within the state. 'The Bushahr Praja Mandal' (Satya Dev Group) launched a Satyagraha in March 1947, followed by large scale arrests and at places firing by state police. In the later years, Thakur Sen Negi also took active part in the Praja Mandal Movement. The low paid employees of the state also established a **"Bushahr Rajya Karamchari Sangh"**. Finally, the Raja conceded the demand for setting up a representative assembly on 18th April 1947, but his sudden death did not allow this to take a concrete shape. On 18th May, 1947, the Political Agent in consultation with the Council of Regency and Council of Administration, nominated an interim council without taking Praja Mandals into confidence. On this Praja Mandal (PM) agitation continued. However, when the interim council decided to hold elections for Vidhan Parishad in October 1947, the PM group led by Satya Dev Bushahri decided to cooperate and contested the elections. The Praja Mandal won all the seats. On 15th April 1948, the state became part of Himachal Pradesh and merged with India.

Chamba Agitation: The first agitation against the 'unjust revenue collection system' and 'Begar' was made by the people of **'Bhattiyat Wazzirat in 1896'**. However, government suppressed it with heavy hands and cowed down the people for almost four decades. For a long, they continued suffering silently and finally in 1922, state subjects working in Lahore urged the Raja to set up a representative advisory council, working as a link between government and the governed to deal effectively with the problem of mal-administration. A few persons exiled from Chamba state organized **"The Chamba People's Defence League"** with its headquarters at Lahore in 1932. The League highlighted the issues of monarchical regime, irresponsible administration, exorbitant taxes and restrictions that were imposed on the economic and civil liberties of the peasants.

In 1936 **'Chamba Sewak Sangh'** (CSS) came into being as a social service organisation to provide assistance to the victims of a devastating fire in Chamba city. It was patronized by the State and some of the state employees also became its members. However, soon afterwards, it emerged as the vanguard the people's movement and highlighted the issue of *'Begar'*, favoured of the *'sons of the soil'* to the posts in the state; *the separation of judiciary from executive,* permission for only *legally qualified pleaders to practice in all the state courts,* improvement of the *means of communication* and increased *medical facilities* and nepotism indulged by the Dewan of the State. As a result of such activities, 'Sangh' was banned in Chamba and authorities started using freely the means of repression.

On this CSS shifted its centre of activities to Dalhousie. A number of articles were published on the Chamba State's condition in *'The Kesari', 'the Inquilab', 'the National Congress', 'the Ghadar', 'the Paigaime Sulah', 'the Ahsaan', 'the Eastern Times', 'the Tooth', 'the Sunrise', 'the Tribune', 'the Outlook', 'the Daily Heralad'*, etc. After some time, 'Chamba Riyasti Praja Mandal' was organized and it sent a delegation comprising Sarvshri Vidya Sagar, Vidhya Dhar, Gulam Rasool and Prithi Chand to attend the AISPC session held at Ludhiana. For a few years, the repressive measures, such as censorship of the *'dak'* (post) and screening the people entering the state, did not allow the Praja Mandal to strike its roots inside the state. Towards the end of 1944, the state authorities revoked the *'Registration of societies Act'*, under which Chamba Riyasti Praja Mandal (CRPM) was banned and as such, it shifted its headquarters to Chamba town in 1954 and when the Himalayan Hill States Regional council was organized in 1946, its representative participated in its deliberation. The leading lights of CRPM were Sarvshri Jaswant Rai, Daulat Ram, Vidya Sagar, Vidhya Dhar Negi etc. Another association, namely CHAMBA STATE PEOPLE'S FEDERATION was organized in 1947. Finally, Chamba was merged with Indian Union on 15th April 1948 and became a part of Chief Commissioner Province, named Himachal Pradesh.

Dhami Tragedy (1939): Dhami a small principality ruled by a 'Rana', lay some sixteen miles west of Shimla and six miles from Jutog. The people of this tiny state had numerous grievances against the ruler, and they demanded, abolition of *'Begar', reduction of land revenue by fifty percent 'recognition of Riyasati Praja mandal', 'Dhami'* and the *'grant of civil liberties'*. Aware of the denial of civil liberties in their state, they, in the first instance, decided to concentrate on carrying out certain social and religious reforms. **A 'Prem Pracharini Sabha, Dhami State'** was organized some time in 1937. It converted itself into 'Dhami Riyasati Mandal' on the 13th July 1939. The Dhami Praja Mandal led by Shri Sita Ram put forward three main demands before Rana Dalip Singh of Dhami. These three demands were:

(a) Abolition of Begar;
(b) Reduction in land revenue
(c) Recognition to the Dhami praja Madal

The Rana rejected these demands outrightly. On 16th July 1939, a delegation of seven members headed by, Bhag Mal Sautha' proceeded towards Dhami to present the charter of demands by hand to the Rana. At the border of the state, the deputation was joined by crowd, estimated to be 1500. At a place called *'Ghanahatti'*, Bhag Mal Sautha was arrested and the Congress flag carried by him was snatched away and burnt. Hardly had Bhag Mal and police gone to safe distance, when without any warning and order of dispersal, police started lathi charge, volleys of stones and bullets upon the peaceful crowd. Two persons, Shri Uma Dutt and Durga were killed and number of others were injured. Now people started demanding an independent enquiry into the Dhami firing. But the Rana did not pay any heed. Letters were also written to

Shri M.K. Gandhi and Jawahar Lal Nehru by the people.

A deputation comprising Sarvshri Sita Ram, K.S. Sautha, Bhaskara Nand and Raj Kumari Amrit Kaur also met Gandhiji. Gandhiji and Nehru both did not approve of the demand of the Praja Mandal, for setting up a responsible government in so small a state, at so short a notice. Gandhiji, however, felt that the firing was uncalled for and that it was the duty of the paramount power to deprive the chiefs of the states powers of which they did not make judicious use. Pt. Jawahar Lal Nehru sent **'Shri Shanti Swarup Dhawan'** to present on the spot report. He met the Rana and the people of the state. Later on, a nonofficial enquiry committee was set up on 30th July 1939 headed by **'Lala Duni Chand Ambalvi'** and its two members were *Shri Dev Suman* (Tehri-Garhwal) and *Shri Shyam Lal Khanna* (President, Shimla District Congress Committee). The Committee presented its report to Pt. Jawahar Lal Nehru with following suggestions:

(a) Firing incident should be inquired by a judge of the High Court.

(b) Punishment to those involved in the unprovoked firing, and

(c) Improvement in the civil administration.

Whatever were the other results of Dhami Firing tragedy, it can't be denied that it exposed the deplorable state of affairs not only in Dhami but in other small Hill States too and this incident occupies an important place in the growth of political consciousness in the Hill states. It gave a great boost to freedom struggle movement in the Hills. Thereafter, the public movement gathered further momentum in these Hill States.

Kunihar Struggle: It was a small state near Shimla with an area of seven square miles. The first voice against the autocratic behaviour of the Rana was raised in 1920. The Rana of the state at that time was **Hardev Singh.** The leaders of the movement were charged with sedition and imprisoned. On their release in 1928, they made **'Shimla'** as their headquarters. ***Kunihar Praja Mandal was organized in Shimla in 1939.*** The chief leaders of Kunihar Praja Mandal were **Shri Babu Kanshi Ram, Gauri Shankar** etc. On 13th June 1939, Kunuihar Praja Mandal was declared unlawful body by the Rana. On 8th July 1939, a deputation waited upon the Rana to acquaint him with their demands. These demands were:

(a) Release of political workers,

(b) 25% reduction in the land revenue,

(c) To lift the ban imposed upon the Praja Mandal, and

(d) Setting up of a Reforms Committee.

The Rana decided to accept the demands and agreed to preside over a meeting of the Praja Mandal on 9th July 1939. Not only the people of Kunihar but also of *Dhami, Bhajji, Nalagarh, Mehlog* and *Baghal* and General Secretary of HRPM were present in the meeting. This was the first victory of democratic forces against an autocratic ruler. Kunihar success had only emboldened the Dhami Praja Mandal to try some tactics against the Rana of Dhami.

Sirmaur Satyagraha: The first signs of political awakening in Sirmaur was discerned in 1920, when a Secret Society was formed by those who derived inspiration from the revolutionary activities of the terrorists in Punjab. Leader of this Society was 'Chaudhary Sherjang', who was involved in a train dacoity, later apprehended and imprisoned by the British Government. Although in Sirmaur state, administrative reforms were introduced, yet they were well below the expectation of people. To carry on struggle in an organized manner, 'Sirmaur Praja Mandal' (SPM) was set up in 1939. The leading lights of SPM were Shri Chadudhary Sherjang, Shivanand Ramaul, Devinder Singh, Nahar Singh, Naginder Singh, Harish Chander etc. However, its popularity soon became eyesore to the state authorities. Two cases, that is, conspiracy to murder the Raja and throwing stones on him with intent to killing him, were concocted against the workers of the Praja Mandal. The workers implicated were Sarvshri Devinder Singh, Harish Chander, Nahar Singh, and Jagbandan Singh.

The Session Judge (former Chief Minister, Dr. Y.S. Parmar) discharged the accused in the conspiracy case. This naturally annoyed the authorities and case was transferred to a special tribunal, which convicted the accused. To suppress the Satyagraha *'Jehlami Police'* was deployed. The Sirmaur agitation reached a high pitch when the war efforts of the state authorities began with the object of collecting money and foodstuffs for aiding the British war efforts in 1942.

'Pajotha movement' which was an extension of *'Quit India movement 1942, has been discussed in a chapter on sirmaur district.* It started in October 1942. Its main leaders were Shri Surat Singh Vaid, his wife Sunahari Devi, Matha Ram and his wife Atma Devi, Deep Ram, Daya Ram, Sita Ram Sharma, Shiva Nand Ramaul etc. Vaid Sural Singh's other associates were—Gulab Singh, Mian Chu-Chu, Mehar singh, Attar Singh, Jalim Singh and Madan Singh.

A 'SIRMAURI ASSOCIATION' and "SIRMAUR RIYASTI PRAJA MANDAL' was established in 1944. Its office along with the General Secretary Shri Shiva Nand Ramaul shifted to Nahan as early in 1946. To accommodate the demands of the Praja Mandalists, certain steps were taken, but it largely remained partial and limited in scope. Ultimately the problem was settled in 1948 with the merger of state with Himachal Pradesh.

Suket Satyagraha: Like Mandi, Suket also came under the influence of Ghadar Movement in 1914. But soon authorities became active and all the supporters of Ghadar were convicted, which silenced the opposition for some time. However, when *maladministration, high taxes* and *'Begar'* became unbearable, there were spontaneous uprisings in 1924, which forced the Raja to flee to Dehra Dun. The intervention of political department could only restore law and order and the Raja to the throne.

For nearly two decades, Suket remained silent. Praja Mandal inside the state came to be recognised in 1945. 'Mian Rattan Singh' was its President.

Like elsewhere, Praja Mandal Suket also started demanding responsible government and by 1947 was ready to launch Satyagraha. The Raja used repressive measures to suppress it, but was unsuccessful. Finally, to win over the people, he decided to set up a *'Rajya Sabha'*. The Suket Rajya Praja Mandal did not take part in its elections. In February 1948, a Provisional Government of the Himalayan Prant was set up by Himalayan Hills States Regional Council (HHSRC) with the approval of AISPC. The HHSRC was established (in 1946) with the purpose to coordinate the activities of Praja Mandals in different States. It was an affiliate of the All India States People's Conference. *Its headquarters was at Shimla.* The Regional Council had amongst its stalwarts, Pandit Padam Dev Bushahri, Dr. Y.S. Parmar, Sada Ram Chandel, Daulat Ram Sankhyan and Mansa Ram, who took upon themselves the duty to establish a separate hill state.

The President of Provisional Government was Pt. Shiva Nand Ramaul (Sirmaur) and other members were Sada Ram Chandel (Bilaspur), Padam Dev (Bushahr) and Mukand Lal (Suket). The leaders of Provisional Government met at 'Suni' (Bhajji State) in February 1948 and resolved that a movement be launched to secure the setting up of a full-fledged province under the centre with all features of a democratic state. Suket was chosen as its first target. On 18th February 1948, under the leadership of Pt. Padam Dev, a non-violent attack was launched on Suket by satyagrahies. Within five days, three - fourths of the state had fallen and came under the control of Satyagrahies. Even the police personnel of the State did not put any resistance to prevent the onward march of the Satyagrahies. On 23rd February, Raja Laxman Sen requested the Indian Government to send army to end the revolt. On 25th of March 1948, the States Ministry, Government of India, ordered the taking over of the Suket State and thousands of persons marched gloriously into Sunder Nagar. On 15th April 1948, Suket was also merged with Himachal Pradesh.

Freedom Movement in Kangra, Kullu and Lahaul-Spiti: The strategic importance of Kangra, Kullu and Lahaul-Spiti impelled the Britishers not to restore these hill areas to their erstwhile rulers, unlike other hill states, after Anglo-Sikh war of 1846. It was decided to pension off the Rajas and to take these areas under the direct British administrative control. All these areas were grouped together and organized into one district of Kangra, with headquarters at Dharamshala. Ram Singh Pathania of Nurpur raised his voice, but was suppressed soon and Nurpur was captured by the British. Ram Singh fought bravely but died in the attempt.

The control of British administration gradually tightened and with an appeal to the martial traditions of hill people, they were able to turn these hills into fertile recruitment area for their 'DOGRA REGIMENTS'. The British rulers were, therefore, very sensitive to any growth of the feelings of nationalism in these areas and were extra vigilant to curb and suppress any beginnings of national movement. However, all these measures and precautions could not

prevent the spread of nationalistic feeling, especially after Mahatma Gandhi's efforts to transform INC into a mass movement. A great number of people from Kangra hills were staying in relation to their jobs, business and study in Amritsar, Lahore, Delhi etc. They eagerly came under the influence of Gandhi's call for *'boycott'* and *'noncooperation movement'* and gave up their jobs and studies and returned to their villages, they organized branches of INC, enrolled a large number of workers, held conferences and took out procession. In 1927, a conference took place at 'Tal' in Sujanpur Tira, was attended by prominent local workers such as Thakur Hazara Singh, Baba Kanshi Ram (PAHARI GANDHI), Gopal Singh and Chatur Singh. Mela Ram Tair and Master Kundan Lal were sent from Lahore. The conference was attended by a large number of people. Pledges were taken by all leaders and people to work for the freedom of the country. *Pahari Gandhi took a pledge to wear only black clothes until the country became free.* The *'Baluchi'* police in order to break the spirit of the people, mercilessly beat them, snatched their Gandhi caps and looted their shops and houses. In spite of all repressive measures, by 1930 the foundation of National movement had been deeply and firmly laid in the Kangra district.

The contributions made by Baba Kanshi Ram and Thakur Hazara Singh are noteworthy. They and their co-workers were convicted and sent to prison at Gurdaspur, Lahore, Attock and Multan. Baba Kanshi Ram was given the title of 'Pahari Gandhi' by Pt. Jawahar Lal Nehru in *'Ghadriwala'* conference. *(Some historians have disputed this fact).*

May be slow, but government could not stop the spread of nationalistic feelings among the people. *The decision of the INC to contest elections to the legislative assemblies in 1937, provided that necessary push and national movement gained momentum once again. Congress won all four seats from Kangra. Thakur Pancham Chand, Thakur Dalip Singh, Shri Beli Ram and Pt. Bhagat Ram, were declared elected.* When the Congress ministries resigned in 1939, Congress workers launched a large scale movement and dissuaded the people from joining the army. The Individual Satyagraha (1940) launched by Mahatma Gandhi, with a view to dispel the impression that India was supporting Britain's war efforts, was conducted in Kangra district very successfully, where a large number of Congress leaders offered Satyagraha. The 'Quit India' movement (1942) also received a great response from Kangra people. In this galaxy of freedom fighters were luminaries like Mangat Ram Khanna, Hem Raj Sood, Comrade Ram Chandra, Paras Ram, Sarla Sharma, Brahma Nand and Pt. Amar Nath Sharma. Pt. Amar Nath Sharma, a freedom fighter from Lahore, after having evaded his arrest by Police for participation in the national movement, came to Palampur. In addition to political activities, he also started concentrating upon the social and educational work. He opened a number of educational institutions and *Aushadhalayas* (dispensaries). In these activities, he was helped by Shri Kanahaiya Lal Butail, who had gained fame as the large hearted host of national leaders like Pt. Jawahar Lal Nehru, Indira Gandhi, Raj Kumari Amrit Kaur, Jagjivan Ram and many leaders of Punjab.

The contribution of the people of Kangra district (Kangra, Una, Hamirpur, Kullu and Lahaul-Spiti) in the Indian National Army (INA) was of very high order. For exceptional courage in INA, Major Mehar Dass (Naharpukhar) was awarded with *'Sardar-i-jung'* and Captain Bakshi Pratap Singh (Chadhiyar) with *'Tagma -i Shatrunash'* Two Gurkha Brothers from Dharamshala, Shri Durga Mal and Shri Dal Bahadur Thapa were executed in Delhi. Others who were decorated by INA were Shri Hari Singh (Sarkaghat Mandi) *'Sher-i-Hind'* and Lt. Amar Chand (Hamirpur) got medal for their exceptional courage.

The Spirit and light of national movement was kept alive in Una areas by Baba Laxman Dass, Bakshi Satya Parkash 'Bagi', Satyamitra, Pt. Hari Ram and Tirath Ram. *It may be mentioned that Thakur Hazara was one of those leaders of Kangra who, as early as 1946, gave a call for the creation of a separate hill state.*

Theog, Madhan Movement: The first sign of revolt became visible in the erstwhile princely states of Theog and Madhan in 1926-28. Here also, *'Baluchi'* and *'Jehlemi'* police was deployed to suppress the movement. They perpetuated large scale atrocities against the people, to kill their spirit of freedom movement. Mian Kharak Singh provided a good leadership to the people in Theog. He was also assisted in this mission by his wife Devwati. Similar movements continued in other areas such as Madhan, Kumharsain, Ghanahatti, Ghund etc., which provided a new zeal and inspiration to the people in Theog. With the coming of freedom on 15th August 1947, Praja Mandal captured the state Theog and set up an independent government, in which ***Surat Parkash was Chief Minister*** and ***Dr. Y.S. Parmar, his advisor.*** Shri Devi Dass was made Secretary. It was incredible at that time, when other erstwhile princely states were opposing their merger with India, that Theog was merged with independent Himachal. However, after five to six months, the Rana made an armed attack and looted the treasury and ancient records of the state. This news was conveyed to Sardar V.B. Patel by Dr. Y.S. Parmar, who sent police force and the Rana was arrested and exiled from the state.

Shimla Hill States Conference (1939): On the suggestions made by Lord Linlithgow to the rulers of Shimla Hill States to ensure active cooperation and participation of their subjects in the states administration, took place from 5th to 7th June 1939. It was attended by the rulers of Bilaspur, Jubbal, Baghal, Kuthar, Baghat, Dhami, Bushahr, Keonthal, Kunihar, Mahlog etc.

Himalayan Hill States Regional Council Session (1946): This session of HHSRC took place at Mandi from 8th to 10th March 1946 and was attended by 48 princely states from Tehri Garhwal to Shimla. The trio of INA, Dhillon, Sehgal and Shahnawaj were present along with Deshbandhu and Pattabhi Sitaramaya. It was presided by Col. J.S. Dhillon. There a number of resolution were passed for achieving a responsible government in Himalayan states.

Integration of Praja Mandals (1945-48): The political developments

taking place in British India, inspired the hill people to organize themselves into a single political organisation, to better protect their rights and co-ordinate their activities for the democratisation of the princely orders. By 1945, a network of Praja Mandals had been set up in the Hill States of Himachal Pradesh. The Praja Mandal volunteers since long had been meeting at the session of All India States Peoples Conference (AISPC), reviewing the progress of their movements and exchanging ideas on various issues. *These Praja Mandals were integrated into the Himalayan Hill States Regional Council (HHSRC) at Udaipur session of AISPC in 1946.* The office of the President of HHSRC was at MANDI and that of the General Secretary at Shimla.

The Executive Committee was formed at Udaipur itself with Shri Swami Purnanand of Mandi (President), Pt. Padam Dev of Bushahr (General Secretary), Shyam Chand Negi of Tehri Garhwal (Vice-President) and Pt. Shiva Nand Ramaul of Sirmaur (Joint Secretary). Under the auspices of HHSRC, a conference took place at Mandi from 8th March to 10th March, 1946. There a number of resolutions were passed for the realization of responsible government and removal of various social, economic and political hindrences. The conference proved a miles stone in the growth of political awakening among masses and self-realization and introspection among princely rulers too.

On 31st August to 1st September 1946, a Conference of HHSRC took place at Nahan, where the issue of the fresh election of the office bearers was raised. Dr. Pattabhi Sittaramaya and Shri Jai Narain Vyas, the President and General Secretary, AISPC also supported the demand. On 1st March 1947, under the supervision of Shri H.L. Masurkar, Office Secretary of AISPC, election of the new office-bearers for HHSRC took place. The delegate elected were Shri Paripurna Nand, Ram Swaroop, Guna Nand, Dr. Gaureela and Pt. Daulat Ram of Tehri, Padam Dev, Bhaskara Nand and Surat Ram Prakash from small states of Shimla. Y.S. Parmar and N.D. Rattra from Sirmaur and Satya Dev from Bushahr. Dr. Y.S. Parmar was elected the President of the HHRC at this meeting with Pt. Padam Dev as the General Secretary. Somehow, after some time mutual dissent developed among the members of HHSRC on the issue of election, which jeopardized its meeting and programmes for the time being. To this, the six members of the Shimla and Punjab Hill States decided to organize themselves into a Himalayan Hill States Sub-Regional Conference (HHSSRC), to fill the vacuum created on account of the failure of the Regional Council to function. An ad hoc committee was formed with Dr. Y.S, Parmar, the President and Shri Padam Dev, the General Secretary. However, HHSSRC was not a parallel body to HHSRC, but a subordinate one.

It approved of the merging of all states in one union of the Himalayan Hill States on lines similar to *'Deccan States Union'* to which all powers would vest in the People's Assembly and the rulers Boards would act only as Advisory Board to lead and guide the people. The HHSSRC criticized the scheme of confederation as being proposed by the princes, for it did not take people into

their confidence. The idea of grouping the states was wholesome but since power was not to be transferred to the people, it failed to elicit any response. *Soon the leadership of the HHSSRC and the Praja Mandal workers in the Hill States split into two groups, one in favour of total elimination of the princes and the other desiring their association with the administration in an advisory capacity.* Pro-merger group was led by Dr. Y.S. Parmar. Some old Praja Mandalists like Pt. Padam Dev (Bushahr), Pt. Shiva Nand Ramaul (Sirmaur), Daulat Ram Sankhyan and S.R. Chandel (Bilaspur), Sant Ram (Kangra), Swami Purna Nand (Mandi) and Daulat Ram Gupta (Chamba) supported this view. Pro-confederation and conservative group was led by Pt. Satya Dev Bushahri (Bushahr). The other members were Surat Ram Parkash (Theog), Tej Singh Nidhark (Mandi), N.D. Rattra (Sirmaur), Bhaskara Nand Sharma (Bhajji), Bhag Mal Sautha (Jubbal) and Kashmir Singh (Mandi).

The Praja Mandals in the states of Bushahr, Baghat, Baghal, Beja, Bhajji, Bilaspur, Mahlog, Sangri, Sirmaur, Tehri Garhwal, Suket, Kalsia, Mandi, Chamba, Kunihar, Keonthal, Kumharsain, Kuthair, Koti and Theog exerted great pressure on the princes for the setting up of responsible government. Deprived of the support of the British and sympathetic attitude of the States Department' Government of India, towards the people's movement, made the princes realize and to read writings on the walls. Jubbal State set up an Enquiry Commission of eight members, five elected and three nominated to study people's problems. Later on, a representative government was also set up with **Bhag Mal Sautha as Chief Minister and Jai Lal, K. Raghubir Singh and B. Dula Ram as ministers.**

The Thakur of Kunihar supported this movement and associated people with his administration. At. Koti, the Rana announced the setting up of a *'Vidhan Parishad'* on 25th November 1947. The 'THAKUR' of Theog conceded to form responsible government on 15th August 1947 and constituted a 13- member Mantri Parishad with *Surat Ram Prakash as a 'Pradhan Mantri'.* The Raja of 'Beja' set up a responsible government in January 1948. A number of other rulers also followed the suit.

After India became independent, there was a demand in some quarters for the merger of the hill states with the East Punjab; but it met with strong opposition from the rulers as well as the people. In view of the fast changing situation, the princes of Shimla Hill States began to plan the setting up of a *'Confederation'* of Hill States and met in Delhi in the first week of January 1948. In the meeting, they passed a resolution stating that *'after detailed consideration and prolonged deliberation, the rulers unanimously decided to constitute a 'Shimla Hill States Union' for the greater good of the Himalayan States People'.* Instructions were issued to all the states to conduct elections on the basis of adult franchise (one representative for every 1,000 population) within a specified time limit and representatives were to reach at Solan on 26th January, 1948 for the inaugural session of the constitution making body. In the meantime, Raja Durga Singh of Baghal and the Raja of Mandi met

Mahatma Gandhi in Birla House, Delhi who also appreciated their idea.

Solan Constituent Assembly: The assembly of representatives of the Shimla Hills rulers and the Praja Mandal took place at Solan from 26th to 28th January 1948, under the chairmanship of 'Raja Durga Singh of Baghat'. This was attended by popular leaders like Thakur Sen Negi and Satya Dev Bushahri from Bushahr, Bhag Mal Sautha from Jubbal, Hira Singh Pal from Baghal, Devi Ram Musaffir, Surat Ram Parkash, Devi Ram Kewala, S.D. Verma, Bhaskara Nand and many others. The assembly decided to set up a Union of States and eight members negotiating committee was also set up to carry on negotiations with all concerned parties, with Raja Durga Singh of Baghat as Chairman and Thakur Sen Negi as Vice-Chairman. *The announcement for the formation of Himachal Pradesh was made in a public meeting at Solan itself.* Raja Durga Singh tried to remove the misgiving in certain quarters about the future status of Himachal and declared it as an integral part of India with equal rights to all Indian citizens in the state. But in reality, it was a plan to set up sovereign state within India.

However, a section of Praja Mandalists led by Dr. Y.S. Parmar and Pt. Padam Dev were against this move. Both these leaders were not allowed to enter the assembly at Solan by Organizing Secretary *'Mahaveer Singh'*. On 26th January 1948, a meeting was held under the aegis of AISPC at Shimla, where Dr. Y.S. Parmar made it clear that proposed union would be acceptable only if power was transferred to the people and individual states ceased to exist by creating a unified Himalayan Province. These proposals were not acceptable to the rulers and the constitution making body fixed 15th March 1948 as the 'D' line for the preparation of the Constitution.

The Constitution making conference at Solan was described by some prominent Praja Mandal workers as a conspiracy to deprive the people of hills of their legitimate share in the fruits of freedom which they had obtained at a considerable sacrifice along with their brethren in other parts of India. Dr. Y.S. Parmar and Pt. Padam Dev rushed to Delhi and apprised Sardar Patel of the intentions of the princely rulers. To force the issue of merger of Hill States with the rest of the country, a Himalayan Prant Provisional Government was set up at 'Shimla' (H.Q.) headed by Shiva Nand Ramaul'. In the following days, ultimatums were issued to various princely rulers to merge their state with the Indian Union.

In the meantime, 'Ministry of State' (Union of India) invited the rulers to a conference at Delhi on 2nd March 1948. There the princes of Shimla Hill States were persuaded to merge their states with India. The rulers were led by Raja Joginder Sen of Mandi. An agreement was drawn up and signed by the Rulers on 8th March 1948. It was also agreed that new province be named Himachal Pradesh instead of Himalayan Prant as suggested by the Himalayan Hill States Regional Council.

Merger of States: Himachal Pradesh was constituted as a separate administrative unit (Chief Commissioner Province) by merging some twenty

six Shimla Hill States (Except Nalagarh) and three Punjab Hill States of, Sirmaur, Chamba and Suket on 15th April 1948, Mandi following suit on 1st May 1948. The crowning events of the long drawn struggle against autocratic and feudal order were the Solan Conference of the Praja Mandals meeting the Princes held on 26th January 1948 and Suket Satyagraha, when thousands of people marched into Suket State on 18th February 1948. The thirty erstwhile princely states were— Chamba, Mandi and Suket; Bushahr and its tributaries, Khaneti and Delath; Keonthal and its tributaries Koti, Theog, Madhan, Ghund and Ratesh; Baghal and Baghat and Jubbal with its tributaries. Rawin and Dhadi, Kumharsain, Bhajji, Mahlog, Balsan, Dhami, Kuthar, Kunihar, Mangal, Beja, Darkoti, Tharoch, Sangri and Sirmaur. It was then divided administratively into four districts of Chamba, Mandi, Mahasu and Sirmaur. The districts of Chamba and Sirmaur comprised of the areas of the erstwhile princely states bearing same name. Mandi and Suket and rest of the Punjab Hill States were joined to form the Mahasu district. At the time of its inception, the total area of Himachal was 27,018 sq. Km.with a population of 9,35,000.

In 1950, the enclaves of Solan Cantonment, Kotgarh and Kotkhai from East Punjab (now Punjab), two villages namely Sangog and Bhattar from Uttar Pradesh and the area called Kufri, villages of Dhar Kulag, Goila, Jamrarha, Nathal, Kunjiara, Sureta and Baragaon jungle from *'Patiala and East Punjab States Union'* (PEPSU) (now Punjab) were transferred to Mahasu district of Himachal Pradesh. From Mahasu district, the built up areas of Sanjauli, Bharari and Chakkar including the Himachal Pradesh portion of prospect hill and built up areas of Kasumpati and Patti Rihana were transferred to East Punjab. Two small portions of Himachal Pradesh consisting of Rampur Vanka and Kotah villages lying between Shimla and Bharuli were transferred to PEPSU,

The people of Himachal were not happy with the bureaucratic set up provided to them in the form of Chief Commissioner Province. The first Chief Commissioner was 'Mr. N.C. Mehta', his deputy Mr. Penderal Moon and an Advisory Council consisting of three erstwhile rulers and six representatives of the people. This Council was set up on 30th September 1948. The Advisory council was to advise Chief Commissioner in matters of general policy, and development and legislative matters. The public representatives were Leela Vati, Dr. Y.S. Parmar, Avtar Chand Mehta, Swami Purna Nand, Sh. Padam Dev and L. Shiv Charan.

The people continued to bear with Mehta-Moon misrule, with the hope that constitution which was under preparation would bring them some relief. To represent Assembly had appointed a committee under the headship of Pattabhi Sittaramaya, to report on the constitution of Chief Commissioner's provinces, recommended the establishment of legislatures and responsible ministries, though certain powers of supervision and control were to be retained in the hands of the centre.

This arrangement was the result of the constitutional battle waged inside and outside the constituent assembly, for democratization of administration in these centrally administered areas. The representative of Himachal Pradesh in the Constituent Assembly Dr. Y.S. Parmar had played a great role. With the inauguration of the constitution on 26th January 1950, Himachal Pradesh became a part 'C' state. There was, however, no immediate change in the pattern of government. The old bureaucratic set up continued. The Chief Commissioner, 'Mr. E. Penderal Moon', was an Englishman who ruled the Pradesh autocratically from January 1950 to March 1951. He hardly consulted Advisory Council on important matters and where the council was consulted its recommendations were not implemented.

In utter disgust, Congress members of the advisory council resigned and anti-Chief Commissioner day was observed throughout the state. In March 1951, Mr. Moon was replaced by an Indian officer, Mr. Bhagwan Sahai. The change of incumbent, however, did not satisfy the people and once again relentless struggle was waged for the democratization of administration. This led to the enactment of the GOVERNMENT PART 'C' STATES ACT in September 1951, which conceded responsible government of a limited character to Himachal Pradesh along with some other Part 'C' States. Elections to the 36 members Vidhan Sabha created under the new Act were held in November 1951. The INC won 24 seats and first popular ministry headed by Dr. Y.S. Parmar was sworn in on 24th March 1951.

The two other ministers Pt. Padam Dev and Gauri Prasad were also sworn in. Little earlier, on 1st March 1951, Chief Commissionership gave way to Lt. Governorship and **'Major General (Retired) Himmat Singh Ji'** was first to hold this upgraded office. Under the Act of 1951, the Lt. Governor was to preside over the Cabinet meetings. This seriously degraded the influence and authority of Chief Minister.

Towards the end of 1952, there were rumours that Punjab had demanded the merger of HIMACHAL and PEPSU in it and that central cabinet had held preliminary discussions on the proposal. A year later, on 29th December State Re-organisation commission (SRC) to go into the question of the reorganization of States on the linguistic basis. The Commission was headed by Mr. Justice Fazil Ali and had two members, K.M. Pannikar and H.N. Kunzru. In the meanwhile, the popular ministry won a big success when it was able to convince the centre of the incongruity of keeping Bilaspur as a separate Part 'C' state. On 1st July 1954, the Part 'C' state of Bilaspur comprising erstwhile state of Bilaspur was also merged into Himachal Pradesh through an Act of Parliament called H.P. BILASPUR (NEW STATE) ACT, 1954. *Thus Bilaspur was added as the fifth district of Himachal Pradesh in 1954.*

The SRC presented its report on 30th September 1955. *The majority verdict of the Commission recommended Himachal's integration with Punjab, though its Chairman dissented and recommended its retention as a separate entity.* To the people of Himachal, it was the most shocking verdict. It was with great

difficulty that Dr. Y.S. Parmar could convince Pt. Nehru of the necessity of a separate Himachal Pradesh. But the Pradesh had to pay a heavy price for this concession; it had to revert to the old pattern of bureaucratic rule. It lost its assembly and popular ministry. *'No sacrifice is too great to save Himachal Pradesh, said Dr. Y.S. Parmar at the time of laying down the office of Chief Minister on 31th October 1956. The next day 1st November 1956, Himachal Pradesh became a union territory.* To reachieve the lost glory of democratic rule, Dr. Parmar redoubled his efforts, through a peaceful struggle. A Committee of a Vidhan Sabha had already been formed (in April 1956) to negotiate with the Central Government with regard to granting of democratic set-up to Himachal Pradesh. The Committee succeeded in getting Clause 239 (seventh amendment, administration of Union Territories) of Act, 1956, altered in such a way as to retain in the hands of Parliament, power to legislate for the government of Union territories through an Act of Parliament.

A little later, Union Parliament introduced a sort of *'dyarchy'* in which some subjects were transferred to popularly elected TERRITORIAL COUNCIL. This was done by passing, towards the end of 1956, the Territorial Council Act. The Council (Himachal Pradesh) had 40 elected and two nominated members. Elections were held in May-June 1957, in which Congress won a comfortable majority. The Council was inaugurated on 15th August 1957. Karam Singh Thakur headed it at its formation.

The regime ushered in by the Territorial Council Act was a queer mixture of the Minto-Morley and Mont For Reform schemes. The Territorial Council was a body corporate and the major part of the administration was with the Lt. Governor. In December 1959, a Negotiating Committee was formed, headed by Dr. Parmar to take up the matter with the Congress High Command and centre, for the restoration of democratic rule. An official committee headed by Ashok K. Sen, then Union Law Minister, was appointed to examine the question of Union Territories under the persistent demand of the local people.

On 1st May 1960, Mahasu district was reduced in size when **'Kinnaur'** district was carved out of **'Chini tehsil'** and including fourteen villages of Rampur tehsil. It became **sixth district** of Himachal Pradesh, divided into three subdivisions, i.e. **Nichar** (Nichar tehsil), **Kalpa** (Kalpa and Sangla tehsils) and **Pooh** (Moorang and Pooh tehsils and Hangrang sub-tehsil).

The Ashok K. Sen Committee, which reported in June 1962, recommended the transfer of more subjects to the 'Territorial Council' to bring them at par with the administration of other states of Indian Union. But popular leaders of Himachal Pradesh, Manipur and Tripura (Manipur and Tripura also had Territorial Councils) were not satisfied with this concession and insisted on full-fledged legislative assembly and responsible executives. Ultimately, government of India decided to go beyond the recommendations of the Ashok Sen Committee and restored Legislative assemblies and Ministries in Himachal Pradesh, Mainpur and Tripura. This was done by Constitution (14th Amendment) Act, 1962 and Government of Union Territories Act, 1963. Late

Lal Bahadur Shastri who was Home Minister of India at that time, favoured this demand of democratization. In 1963 while speaking in Parliament he said, "It is better not to take half hearted steps and half hearted measures. It is better to delegate whatever power we want to give them at a stretch and give the power to the representatives of the people to run their government. Under the Union Territories Act, the Territorial Councils elected in 1962 were turned into Vidhan Sabhas. In Himachal Pradesh, a three-man popular ministry headed by *Dr. Y.S. Parmar* was sworn in on *1st July 1963*. Thakur Karam Singh and Hari Dass were sworn in as ministers.

As long as the strong man **Pratap Singh Kairon** remained at the helm of affairs in Punjab, he was able to contain the movement for Punjabi Suba. But after him, political stability of the Congress was in shambles and the Akalis were able to gather strength. The question of the re-organisation of Punjab cropped up in 1965. A Parliamentary Committee, headed by Speaker 'Hukam Singh' was formed in September 1965 to report on the problem. The Committee favoured the demand of Punjabi Suba and it was conceded in March 1966. A Boundary Commission (J.C. Shah Commission) was appointed in April 1966 to adjust the boundaries of the proposed state.

The Punjab hill areas having received only a scant regard for their needs from the plains-oriented government and looking with admiration at the progress made by Himachal on account of the advantage of having its own government, the people of Punjab hill areas strongly demanded their integration with Himachal Pradesh. Linguistic and cultural affinity, besides the similarity of development problems and administrative viability, were cited by them in support of this claim. These developments presented Himachal Pradesh a golden opportunity to acquire its proper shape. On the recommendation of Punjab into two separate states of Punjab and Haryana, decided to integrate the Punjab hill areas with Himachal Pradesh on 1st November 1966. The following districts and tehsils formed the new administrative divisions of the integrated area:

(a) Kangra District: Kangra, Palampur, Nurpur, Dehra Gopipur, Hamirpur and Una tehsils (Una was a tehsil of Hoshiarpur district) and Pathankot tehsil of Gurdaspur was also transferred to Kangra.

(b) Kullu District: Kullu tehsil and Banjar, Anni and Nirmand sub-tehsils.

(c) Shimla District: Shimla, Kandaghat and Nalagarh (area of Ambala district)

(d) Lahaul-Spiti District: Lahaul and Spiti tehsils.

With the integration of these areas, the territorial area of the state increased of 55, 673 sq. km. and population to 28,12,463 (1961 census). The number of district, which was six earlier, went up to ten with the merger of new areas. On the integration, all the MLAs representing the Hill areas of Punjab Vidhan Sabha were declared the members of the Himachal Vidhan Sabha in January

1967 and two more ministers, Lal Chand Prarthi and Bakshi Pratap Singh from new areas were added to the existing ministry.

Himachal Pradesh went to polls in February, 1967 for 60 seats of the Vidhan Sabha while 3 more members had to be nominated thus making total of 63 seats. After the completion of elections and nominations, the party position in the Vidhan Sabha was as congress 37, Jan Sangh 7, CPI 2 and Independents 17 (as against this the party position in the next election on July 15, 1970 was as Congress (R) 43, Jan Sangh 7, CPI 2 and Independents 10). On March 14, 1967 Dr. Y.S. Parmar became Chief-minister for the third time, while L.C. Prarthi and Chaudhary Hari Ram were sworn in as Ministers. On 22nd April 1967, cabinet was expanded when Sukh Ram, Ram Lal were made ministers and Daulat Ram Sankhyan, Kartar Singh Wazir, Mehnga Singh and Nek Ram Negi were sworn in as deputy ministers. Again on 20th July 1967 cabinet was expanded when Karam Singh and Padam Dev were included as Ministers and Vidya Sagar was sworn in as deputy minister.

Now that the proper shape of the Pradesh had been achieved, it was natural for it to demand its due status, i.e. full-fledged statehood. But for the time being, undivided attention could not be paid due to many other responsibilities, which had come upon the government with the merger of new areas from Punjab State. The Pradesh Congress Executive Committee had, as early as 5th July 1965 through a resolution, demanded that the final stage of the constitutional development of the Pradesh, as envisaged in Sarder Patel's letter of 1948, should be implemented and Himachal Pradesh should be made a state of the Indian Union. The offensive started on 24th January 1968 when the Pradesh Vidhan Sabha unanimously passed a resolution demanding statehood. A negotiating committee headed by Prof. Tapinder Singh was appointed to take up the matter with the Congress High Command and the Centre.

The administration of Union territories was being looked after by Union Home Ministry. The officials there were in no mood to let these territories slip out of their hands. Dr. Parmar, therefore, decided to shift the scene of the battle from the corridors of the Home Ministry to the lobby of Parliament. In both the houses, private members resolutions on the demand for Himachal Pradesh statehood got overwhelming support. The question of the economic viability of the proposed state was discussed thoroughly. The discussions continued through the later part of 1969 and beginning of 1970. On 31st July 1970, the bill for the grant of statehood was introduced in the Parliament.

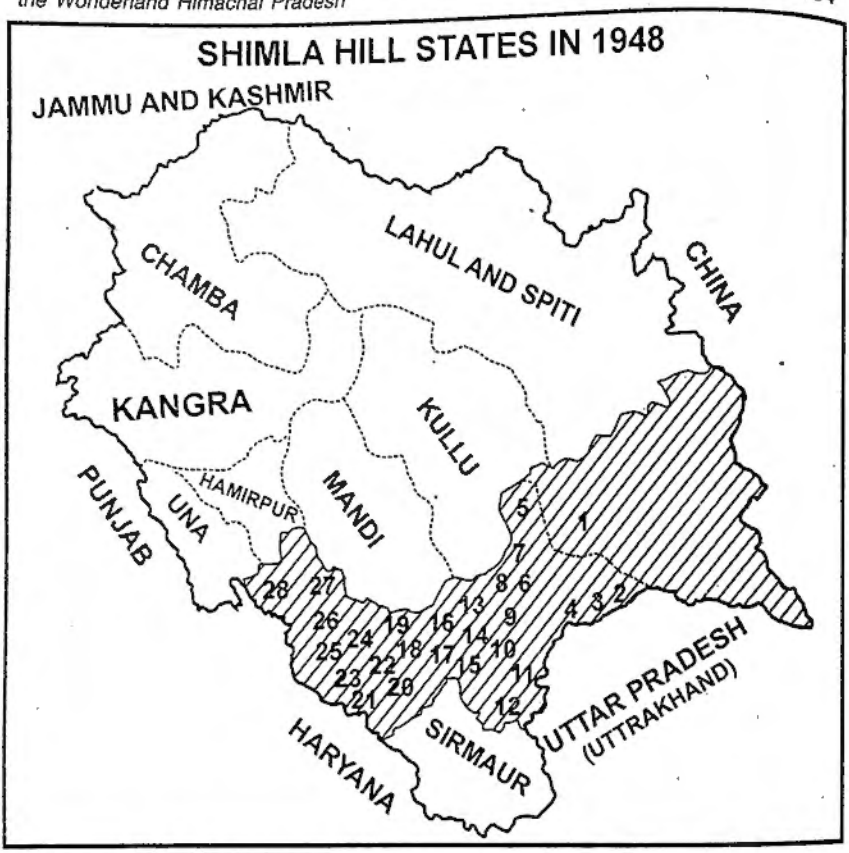
The members belonging to different political parties, extended their full-fledged support to the bill in both Houses of the Parliament. On 18th December 1970, the 'STATE OF HIMACHAL PRADESH ACT' was passed and the new state (18th State of Indian Union) was inaugurated on 25th January 1971 by late Prime-minister Mrs. Indira Gandhi. While passing the bill for the grant of statehood to Himachal Pradesh, glowing tributes were paid by members of Parliament belonging to different political parties, to the manner in which the peaceful struggle for the achievement of statehood was waged

by the people and leadership of Himachal Pradesh. While inaugrating the historic statehood function, she unveiled a marble plaque by pushing button at a well attended public function held on the ridge Shimla amidst divine showering of snow flakes (snow fall) and multitudinous thrilled hill folks. This was no instance of undoubtedly a unique case, where there was not even a single act of violence and unparliamentary or disgraceful language was committed. This was very much according to the nature and culture of the people of the state, reflected through their actions and commitments.

9

HIMACHAL PRADESH ADMINISTRATIVE HISTORY

"I have nothing but contempt for the kind of governor who is afraid, for whatever reason, to follow the course that he knows is best for the State."



-Sophocles

Modern state is a welfare state, where it has to perform wide variety of functions to prove its worth and justify its existence. Gone are the days when rulers used to rule with iron hand and despotically, ignoring people's participation in the administration as such, which could reassure them a dignified place in the political and administrative structure. *'Rajas', 'Ranas', 'Thakurs'* etc., as per their status known in different areas, had final say in the matter of administration. All employees were nominated according to the whims and fancies of this powerful class known as *'ruling class or elite'.*

India got independence in 1947. The great task before the national leadership was integration of princely states and to constitute them into a unified country. With the pioneering efforts and strong will power of Sardar Vallabh Bhai Patel, India i.e. 'BHARAT', emerged in its present form, which was never like this before. After independence the whole country was reconstituted into different category of states, for administrative convenience. *Himachal Pradesh came into existence of 15th April 1948 with the merger of twenty six Shimla hill states and four Punjab hill states into a centrally administered area. The headquarters was located in the building of the British India foreign office at Shimla, which was destroyed by fire on 5th May 1957.* This centrally administered territory was headed by a Chief Commissioner and his deputy.

The first Chief Commissioner was Mr. N.C. Mehta and his deputy was Mr. E. Penderal Moon. They both were from Indian Civil Services. On 30th September 1948, an Advisory Council was also formed to advise the Chief Commissioner in the discharge of administrative work. *The Council consisted of three erstwhile rulers from Mandi, Chamba and Baghat (Solan) and six representatives of the people were, Smt. Lilavati, Dr. Y.S. Parmar, Mehta Avtar Chand, Swami Purnand, Shri Padam Dev and L. Shiv Chand Dass.* But on all important matters, the Council was ignored and decisions were taken arbitrarily by the Chief Commissioner, ultimately, the Congress members of the Council resigned in utter disgust and frustration. The following were Chief Commissioners of Himachal Pradesh:

(i) Mr. N.C. Mehta 25.04.1948 - 09.01.1950

(ii) Mr. Penderal Moon 10.01.1950 - 29.03.1951
(iii) Mr. Bhagwan Sahai 30.03.1951 - 19.02.1952

The secretariat in those days was called **'Himachal Dham'**. The Chief Commissioner and his deputy were aided by about half a dozen officers taken from the Punjab Civil Service for providing uniform pattern of administration in all the princely states, merged into a new set up. But due to their parochial loyalties to their parent states and most of the time consumed of the senior officer in dealing with the representations from officers regarding their service matter, the aim of evolving a uniform administrative structure remained a distant goal. Thus *'Mr. R.S. Bhandari'*, an official of Ministry of Defence, was brought to deal with the service matters of these employees.

In an effort to systematize the working of different departments in 1951 *'Rules of Executive Business and Secretariat Instruction'* were drawn and enforced from July 1951. Subsequent revisions were made in it in the following years:

(i) The H.P. Rules of Business July 1952.
(ii) The H.P. Rules of Business, 1953.

(iii) The H.P. Rules of Business, 1955.

(iv) The H.P. Business of the Government (Allocation) Rules, 1963.

(v) The Business of the Government of H.P. (Allocation) Rules, 1967.

(vi) Rules of Business of the Government of H.P. 1971.

(vii) Rules of Business of the Government of H.P. (Allocation) Rules, 1971.

(viii) Rules of Business of the Government of Himachal Pradesh 30th November 1976 and

(ix) Rules of Business of the Government of Himachal Pradesh 20th November 1980.

The Government of India in 1951 enacted the Government of 'Part 'C' States Act' 1951 elevating the status of Himachal Pradesh. On 24th March 1952, Dr. Yashwant Singh Parmar was sworn in the first Chief Minister with three members forming strong popular ministry. With this, came the end of the office of Chief Commissioner. In March 1952, Mr. K.L. Mehta, ICS, became the first Chief Secretary of the State. Popular government in 1952 took upon itself the task of setting up direct link between government and its people. Accordingly, in the beginning of 1954, the 'Department of Public Relations' was created to initiate the process of cordial relations and for publicizing government activities.

On 1st July 1954, Bilaspur, a part 'C' state, was merged with Himachal Pradesh and this once again confronted with the problem of integration of two different sets of services. In 1956, a big change took place in the administrative set up of the State with the promulgation of State Re-organisation Act, 1956. The State of Himachal Pradesh was made a Union Territory with effect from 1st November 1956. This placed secretariat directly under the control of the Chief Administrator and secretariat was reorganized afresh. In 1957, the Government of India created joint IAS/ IPS cadres for Himachal Pradesh and Delhi, functioning directly under the control of Ministry of Home Affairs. To provide democratic look to the Government of the State, Indian Parliament passed in December 1956 the 'Territorial Council Act', 1956. According to the provisions of this Act, a Territorial Council was constituted on the model of a district board. This new arrangement may be termed as *'dyarchy'*.

The subjects were divided into two parts. All important subjects and issues were with the central government, while territorial council was left to face the wrath of public opinion. There was duality in command and responsibility. This new arrangement created a confusion of a very serious nature in the ranks of services. There was general demand from all quarters in favour of scrapping of this system. To look into the loopholes of the system, the Central Government appointed a committee under Mr. Ashok Sen, the then Union Law Minister.

The Committee in its report in 1962 recommended transfer of more subjects to the 'Territorial Council' to enhance its powers and bring it at par

with the administration of other states. By this time, people of the state had already started making demand for full-fledged legislature. The Government of India, keeping in view the wishes of the people under 'The Government of Union Territories Act 1963' provided legislative assembly in place of territorial council. The re-organisation of the services took place with the amalgamation of the services of the administration and that of the territorial council. In 1965, it was decided to constitute separate civil and police cadres for Union Territories. Therefore, Delhi-Himachal Pradesh-Andeman Nicobar (DHAN) cadres were created on 1st December 1965. In 1966, on the reorganization of Punjab State, hilly areas of Punjab were transferred to Himachal Pradesh.

In the wake of this integration came numerous problems like the integration of the services and the removal of the disparity in laws, rules and the tax structure. With the integration of the hilly areas of Punjab to Himachal Pradesh, about 8% of the entire staff of the Punjab Government was passed on the Himchal Pradesh. It had been an uphill task to provide unification of services with different pay scales and working conditions to the government of the State with its meagre economic resources.

In December 1964, Himchal Pradesh unit of Administrative Reforms (AR) was set up to study the economy and on promoting administrative efficiency in all branches of administration and introduction reforms in the problem areas. When this unit of AR was engaged in its study, the Secretary, Administrative Reforms Commission, Government of India, in his letter of December 1967, asked the State Department of AR to undertake a study of organisation, structures and procedures of the Himachal Pradesh administration as a whole to suggest a general reorganization with a view to securing maximum efficiency and economy. In 1968, State unit of Administrative Reforms presented a detailed organizational study to the Central Administrative Reforms Commission. *The first ARC - 1964 of Government of India was headed by Mr. Morarji Desai.*

The suggestions made by the State AR unit to the Central ARC were accepted and included in their 'Report of the Study Team — Administration of Union Territories and NEFA' brought out in September 1968. The recommendations of the AR were implemented one by one after 1971.

Himachal Pradesh got full statehood in 1971 and so its own IAS and State Administrative Service called Himachal Administrative Service (HAS) cadres and its own Public Service Commission also came into existence. This was fifth reorganization of the services in twenty-three years. As against some 50 gazetted and some 3000 non-gazetted regular employees in 1971, their number increased to about 1500 and 64,000 respectively by March 1973. The number of all categories of employees of the State Government rose to about 1,52,000. As per the 1988 survey, there were 5,954 gazetted and 97,257 non-gazetted, totalling 1,03,211 regular employees and 85,438 non-regular including contingent, work charged and daily paid employees.

The number of all categories of employees was about 1,88,695. As on 31st March, 1991, economic survey, there were 7,523 gazetted, 1,06,328 non-gazetted, totalling 1,13,851 regular and 68,071 non-regular including contingent, work charged and daily paid. As on 31st March 1994, there were 7,704 gazetted, 105,335 non-gazetted thus total numbering of 1,130,39 regular employees. 5426 contingent paid, 6455 work charged and 60124 Daily paid. On 31st March 1999, there were approximately 9.1 thousand Gazetted and 108.8 thousand Non-Gazetted employees. Thus the total number of regular employees were 117.9 thousand.

On 31st March 2010, there were 9796 gazetted, 180764 Non-gazetted, 2167 work charged, 13088 part time, 11551 daily paid and 12937 others. In March 2014 there were 10204 gazetted, 177215 non-gazetted, 11780 work charged, 9979 part time and 19231 daily paid.

Himachal Non Gazetted Employees Federation

Himachal Non Gazette Employees Federation was set up on 20th November 1966, by Sh. Ramesh Sharma, Madhukarji, Kanwar Hari Singh, Ranjeet Singh, Gopal Dass Verma, Ganga Singh Thakur, Krishan Kumar, Ashok Sharma etc. With the passage of time this federation became very popular and many a time forced state government to heed to the demands of the employees from 1970 onwards. In the past years federation has been playing active role in state politics.

Himachal Pradesh Public Service Commission

The Public Service Commission, whether union or state, consists of minimum four members and a Chairman (the total number of members in UPSC at present is ten including Chairman). The member of SPSC are appointed by the Governor for a period of six years or upto the age of sixty two years with overlapping tenure of service. The articles 315 to 323 of the constitution provides the Union and state Public Service Commissions impart constitutional safeguards for their independent and autonomous functioning. The constitution provides that one half of the members of the Commission must be persons who, at the time of their appointment, have held office at least for ten years under the Union or State Government. Their salaries and tenures of service are fixed by the Constitution and they can't be altered to their disadvantage during their tenure of office. They can't be removed from the office before the expiry of their term except in the following cases:

(i) on the ground of misbehaviour,

(ii) adjudged as insolvent.

(iii) unfit to continue in office by reason of infirmity of mind and body, (iv) Involvement in any contract or agreement by or on behalf of the Government of India or State Government, would be deemed to be guilty of misbehaviour.

Not only that, a member can't hold office of profit under the Government, Central or State-even after his retirement, except that he can be appointed a

Chairman of the Commission. Further same person can't hold that office more than once. The members including Chairman of SPSC are appointed by the Governor of the concerned State, but are removable by the President. This appointing and removing provision have been kept separate with a view of ensuring independence and integrity of Commission members.

Himchal Pradesh got its own Public Service Commission in 1971. Prior to this, the functions of Public Service Commission in respect of civil services and posts connected with the affairs of Union Territory of Himachal Pradesh were discharged by UPSC under Article 315 of the Constitution of India. By the notification issued by the Governor on 25th April 1971, the post of Chairman for the SPSC was created and by another notification on 23rd April 1971, Lieutenant-General K.S. Katoch (Retd.) took over as the first Chairman of the Commission.

The Himachal Pradesh Public Service Commission was established on 25th April, 1971 at Shimla having a Chairman and two members. Simultaneously, the Himachal Pradesh Public Service Commission (Exempted from Consultation) Regulations, 1971 were notified to bring all those posts, which carried maximum pay of Rs. 300 or above within the purview of the Commission. Besides, certain other categories of posts were also exempted from its purview by the Government. Amendment to these Regulations were made from time to time bringing more posts within its purview or withdrawing some posts from its jurisdiction. At present, all posts except Class-IV and certain Class-III are under the Commission's purview.

The Public Service Commission has a very important role to play in the shaping of administrative structure and in providing efficient administrative machinery for the State. In this regard, its functions are: It is-

(a) consulted on all matters relating to methods of recruitment to civil services and civil posts.

(b) Principles to be followed in making appointments to civil services and posts and making promotions and transfers and suitability of such actions taken.

(c) on all disciplinary matters affecting a person serving under the State Government in a civil capacity including memorials of petitions relating to such matters.

(d) on any claim or in respect of a person who is serving or has served under the State Government in a civil capacity that any costs incurred by him in respect of acts done or purporting to be done in the execution of his duty should be laid out of consolidated fund of the State.

(e) on any claim for the award of a person in respect of injuries sustained by a person while serving the State Government in a civil capacity of any question as to the amount of any such award.

Thus, Commission is a recruiting agency par excellence. The advice of the Commission, however, is generally accepted, for there is a fear in the mind

of the Government that nonacceptance of recommendations would surely attract the attention of the legislature, for commission submits an annual report to the Government which is also required to be placed before legislature.

The Himchal Pradesh Public Service Commission conducts following types of examinations:

(a) H.A.S., H.J.S., Subordinate and Treasury Services (all graduate level) and Clerks grade (matriculation and above). In all these recruitments, marks of written examination are added with marks scored in the interview for maintaining merit list. By late screening test has been introduced with main examination for Subordinate and Treasury Services and Clerks Grade recruitment.

(b) Screening tests are conducted for reducing the number of candidates so that it is not more than three times, to the actual requirements. In this case, marks scored in the screening tests are not counted for final selection. Examination for Junior Lecturers (school level) and Lecturers for Colleges come under this category.

Other than these, various other tests and interviews are also conducted by HPPSC as per the demand of the various departments. The functions performed by HPPSC are of great importance for successful and efficient functioning of the administrative machinery of the Pradesh. The building of HPPSC is located at 'Nigam Vihar' in Shimla.

NEW SYSTEM FOR HPAS EXAM

The state Public Service Commission introduced a new system for conducting the Himachal Pradesh Administrative Service (HPAS) Combined Competitive (Preliminary) Examination -2010 There will be two papers for HPAS (Preliminary) Examination. Apart from general studies, the candidates will also have to undertake a general aptitude test. The papers will be of 200 marks each. There will be 100 multiple choice objective type questions in each paper for which the candidates will be given two hours. There will be provision for penalty (negative marking) for wrong answers marked by a candidate in the objective type questions papers from 2010 onwards. This system is based on the pattern followed by UPSC since 2009.

Looking back at the functioning of Public Service Commissions at the state level and UPSC at the centre, it seems that these bodies have failed miserably to select the young officers of integrity, wisdom, honesty, vision and dedication to the larger democracy of the world. This is a known fact that if not the whole then substantial part of our bureaucracy is corrupt, feudalistic in its mindset and elitist in its approach. These brown *sahib* are beyond the reach of common citizens and having expensive and royal life style at the cost of toiling millions. Work or no work, performance or no performance, their promotion is time bound, facilities are immense and accountability is to none.

HIMACHAL PRADESH SUBORDINATE SERVICES SELECTION BOARD, HAMIRPUR

To bifurcate the functions and responsibilities of the Himachal Pradesh Public Service Commission Shimla; dated 6th October 1998 under the notification of Himchal Pradesh Government PER (AP-B) BID-I/98 the Himchal Pradesh Subordinate Services Selection Board was created. In the beginning it was provided with a Chairman and a member and administrative staff headed by a Secretary. The first Chairman of the Selection Board was Mr. K.C. Malhotra, who joined on 10th Oct. 1998 and retired on 19th August 1999. Mr. Surinder Mohan Katwal became the first member of the Subordinate Selection Board and joined on 10th October 1998. The first Secretary of the board (with additional charge) was Mr. Nirmal Singh and on the first regular appointment as a secretary was Mr. Tek Chand Thakur (H.A.S).

The Himachal Pradesh Subordinate Services Selection Board is neither constitutional body nor autonomous one, it is a government body which has been created to expedite the process of recruitment for class three posts excepts the posts which are falling vacant in H.P. High Court, H.P. Vidhan Sanha, H.P. Public Service Commission and the posts which are excluded from its purview by the government from time to time. The government may include or give the board additional responsibility to conduct examination for any such posts which Himachal Pradesh government deems fit. The HPSSSB is functioning directly under the government control unlike the HPPSC which is a constitutional body.

ADMINISTRATIVE DIVISIONS

Himchal Pradesh as a distinct entity came into being on 15th April 1948 with the merger of 30 erstwhile former Himalayan princely states. On the eve of its formation as a Chief Commissioner province, State was at the different level of socio-economic development. To organize and reorganize State on proper footing, in the beginning, administratively it was made out into four districts, twenty four tehsils and two sub-tehsils. Since then, district, tehsils and sub-tehsils have been re-organized a number of times to accommodate the popular demands and ensure speedy development of all the areas.

ADMINISTRATIVE DIVISIONS ON 15th APRIL 1948

S.No.	Districts	Tehsils/Sub-Tehsils
1.	Chamba	(1) Chamba; (2) Churah; (3) Bhattiyat; (4) Bharmaur (sub-tehsil), (5) Pangi (sub-tehsil).
2.	Mandi (by integrating Mandi and Suket states.)	(1) Mandi Sadar; (2) Chachiyot; (3) Sarkaghat; (4) Joginder Nagar; (5) Sundernager (Suket state area); and (6) Karsog.
3.	Sirmaur	(1) Nahan; (2) Paonta; (3) Renuka; (4) Pachhad.

4. Mahasu (by integrating 26 Shimla hill states)

(1) Arki (by integrating Baghal, Kunihar and Mangal states); (2) Solan (Baghat, Beja, Kuthar States); (3) Kasumpati (Junga portion of Keonthal state, Dhami and Koti state); (4) Theog (Theog, Ghund, Ratesh and portion of Balsan state); (5) Kumharsain (Kumharsain state) (6) Rampur (Rampur tehsil of Rampur-Bushahr state); (7) Rohru (Rohru tehsil of Rampur-Bushahr); (8) Chinni (Chinni tehsil of Rampur Bushahr); (9) Jubbal (Jubbal tehsil of Jubbal state, Rawingarh state and Dhadi state); (10) Chaupal (Chaupal tehsil of Jubbal state); (11) Sunni (Bhaji state).

In 1950, under the *'Absorption of Enclave order'* some readjustment was effected in the boundaries of Mahasu district: **'KOTKHAI'** was made Protectorate sub-tehsil in which were merged proper *'Kotkhai'* area, ' and *'Darkoti'* and some areas of Kumharsain and Balson tehsils. Kotgrah was merged with Kumharsain tehsil. Two villages of Uttar Pradesh **'Sangog'** and **'Bhandar'** were included in Jubbal tehsil. *'Chabrot'* area of PEPSU was merged in Kasumpati Tehsil. In exchange of these seven villages, seven villages of Kasumpati tehsil were given to Punjab. These were:

(1) Sanjauli (2) Wakna (3) Bhari (4) Bharari
(5) Kasumpati (6) Kato (7) Rampur

Bilaspur, a part 'C' State, was merged with Himachal Pradesh on 1st July 1954 and converted into two tehsils - 'Bilaspur' and 'Ghumarwin'.

On 1st May 1960, Kinnaur was carved out of 'CHINNI' tehsil of Mahasu and fourteen villages of Rampur tehsil were also added to it. Kinnaur was divided into three sub-divisions, viz. (1) Nichar (Nichar tehsil); (2) Kalpa (Kalpa and Sangla tehsils); and (3) Pooh (Moorang and Pooh tehsil and Hangrang sub-tehsil).

Kinnaur was carved out of 'CHINNT' tehsil of Mahasu and fourteen villages of Rampur tehsil were also added to it. Kinnaur was divided into three subdivisions, viz. (1) Nichar (Nichar tehsil); (2) Kalpa (Kalpa and Sangla tehsils); and (3) Pooh (Moorang and Pooh tehsil and Hangrang sub-tehsil).

In 1966, with the merger of Punjab hill areas with Himachal Pradesh, the new administrative divisions created were:

S.NO.	Districts	Tehsils/Sub-Tehsils
1.	Kangra	(1) Kangra; (2) Palampur; (3) Nurpur; (4) Dehra Gopipur; (5) Hamirpur; and (6) Una tehsils, Una till 1966 was a tehsil of Hoshiarpur district of Punjab.
2.	Kullu	(1) Kullu tehsil; [(i) Banjar; (ii) Anni and (iii) Nirmand - three sub-tehsils]

3.	Lahaul-Spiti	Lahaul and Spiti two tehsils.
4.	Shimla	Three tehsils were formed for Shimla district; namely Shimla, Kandaghat and Nalagarh.

Himachal Pradesh got Statehood on 25th January 1971, as the eighteenth state of Indian Union. On 29th August 1972, Kangra, Mahasu and Shimla districts were reorganized vide Government Notification No. 3-32/71 GAC.

S. No.	Districts	Headquarters	Tehsils/Sub-Tehsils
1.	Kangra	Dharamshala	(1) Kangra; (2) Palampur; (3) Nurpur; and Dehra.
2.	Hamirpur	Hamirpur	(1) Hamirpur; (2) Badsar.
3.	Una	Una	(1) Una; [Amb (sub-tehsil)]
	Mahasu and Shimla districts were re-organized as under:		
	(a) Shimla	Shimla	(1) Shimla (Kasumpati tehsil was merged with Shimla tehsil); (2) Theog; (3) Rampur; (4) Chaupal; (5) Jubbal; (6) Rohru; [(i) Kumharsain sub-tehsil; (ii) Sunni (sub-tehsil); and (iii) Kotkhai sub-tehsil].
	(b) Solan	Solan	(1) Solan; (2) Kandaghat; (3) Arki; (4) Nalagarh.

To fulfil the long cherished demand of the people of the state, to make administration easily approachable, the Government by its notification of 17th September 1979, grouped the districts into two divisions of Shimla and Kangra, under the charge of Divisional Commissioner.

On 24th January 1980, the Government vide notification No. GAD (GI) G (F) 12-77/77-GAC, effected the following adjustment.

S.No.	Districts	Sub-division	Tehsils	Sub-tehsils
1.	Bilaspur	Bilaspur and Ghumarwin	Bilaspur, Sadar, and Ghumarwin	Sri Naina Deviji
2.	Chamba	Chamba, Churah, Pangi, Bharmpur and Dalhousie and Bhattiyat	Chamba, Churah, Pangi Bharmaur	Saluni and Sihunta
3.	Hamirpur	Hamirpur	Hamirpur and Badsar	Nadaun, and Badsar
	Sujanpur Tira, Bhoranj			
4.	Kangra	Kangra, Palampur, Nurpur, Dehra	Kangra, Nurpur, Palampur and	Lambagraon, Fatehpur, Indora

	Gopipur	Dehra-Gopipur	and Khuddian
5. Kinnaur	Nichar, Kalpa and Pooh	Nichar, Kalpa, Sangla, Pooh and Moorang	Hangrang
6. Kullu	Kullu and Anni	Kullu, Banjar, Nirmand and Anni	—
7. Lahaul-Spiti	Lahaul-Spiti	Lahaul and Spiti	Udaipur
8. Mandi	Mandi, Joginder-Nagar, Sarkaghat, Suder Nagar and Karsog	Mandi, Thunag (Chachiyot), Jogindernagar, Sarkaghat, Sundernagar and Karsog	Chachiyot, Balichowki, Ladbharol and Sandhol
9. Shimla	Shimla, Theog	Shimla, Sunni, Rampur, Chaupal	Nakhari, Theog, Kotkhai and Rohru
Kumharsain, Rampur, Chaupal, Rohru and Jubbal		and Nerwa	
10. Sirmaur	Nahan, Paonta-Sahib and Rajgarh	Paonta-Sahib Nahan, Renuka, Shillai, Pachhad and Rajgarh	—
11. Solan	Solan, Nalagrah Arki and Kandaghat	Solan, Kasauli Nalagrah, Arki and Kandaghat	Ramshahr
12. Una	Una	Una, Amb and Bangana	Haroli

Again vide Notification No. GAD (GI) 6(F) 5/80-GAC dated 13th November 1981, the following sub-tehsils were created:

S.No.	Districts	Tehsil	New Tehsils	Headquarters
1.	Kangra	Kangra Dehra	Baroh Rakkar	Baroh Rakkar
2.	Shimla	Rohru	Chragaon	Caragaon

Vide a notification of 17th December 1981, another sub-tehsil was created as detailed underneath:

1.	Kangra	Palampur	Baijnath	Baijnath

On 1st January 1982, Baldwara sub-tehsil was created of Sarkaghat tehsil of Mandi district and Dodra Kawar tehsil out of Rohru tehsil of Shimla district.

Vide its notification No. GAD-1A (1) 86 dated 13th May 1986, the

Government reorganized the Kangra and Shimla divisions as under:

1.	Kangra Division	Comprising the districts of Una, Kangra and Chamba with headquarters at Dharamshala
2.	Mandi Division	Hamirpur, Bilaspur, Mandi, Kullu and Lahaul-Spiti with headquarters at Mandi.
3.	Shimla Division	Shimla, Kinnaur, Solan, Sirmaur, with headquarters at Shimla.

As on 31st March 1999, Himachal Pradesh had twelve districts, three divisions, fifty-one sub-division, sixty-eight tehsils, thirty-three sub-tehsils, 72 blocks and two thousand nine hundred and twenty-two panchayats.

S.No	Districts	Subdivision	Tehsils	Sub-tehsils
1.	Bilaspur	Bilaspur, Ghumarwin	Bilaspur Ghumarwin	Sri Naina Deviji and Jhandutta
2.	Chamba	Chamba, Churah, Pangi, Bharmaur Dalhousie and Bhattiyat	Chamba, Churah, Pangi Bharmaur, Salooni, Bhattiyat and Dalhousie	Holi and Bhallai
3.	Hamirpur	Hamirpur, Barsar and Nadaun	Hamirpur, Barsar, Nadaun, Bhoranj and Sujanpur	Bijri (at Dhatwal)
4.	Kangra	Kangra, Palampur, Dharamshala, Nurpur, Dehra Gopipur, Jawali Jaisinghpur, and Baijnath	Kangra, Palampur, Baijnath, Nurpur, Jaisinghpur, Jawali, Indora, Baroh, Shahpur, Dharamshala, Fatehpur and Khuddian	Rakkar, Dheera, Harchakkian
5.	Kinnaur	Nichar, Kalpa and Pooh	Nichar, Kalpa, Sangla, Pooh and Moorang	Hangrang
6.	Kullu	Kullu, Anni and Banjar	Kullu, Banjar and Nirmand	Anni and Sainj
7.	Lahaul-Spiti	Keylong, Kaza and Udaipur	Kelyong and Kaza	Udaipur
8.	Mandi	Mandi, Joginder Nagar, Sarkaghat, Chachiyot,	Mandi, Chachiyot, Thunag, Joinder-Nagar, Sarkaghat,	Balichowki, Lad Bharol, Sandhol, Kotli, Baldwara, Paddar, Aut,

	Sunder Nagar and Karsog	Sunder Nagar and Karsog	Dharmpur and Nihri
9. Shimla	Shimla Urban Shimla Rural, Theog, Rampur, Chaupal, Rohru and DodraKawar	Shimla Urban, Shimla Rural Sunni, Theog, Chaupal, Rohru, Kotkhai, Rampur, Kumharsain, Chaupal, Rohru, Jubbal,DodraKawar and Chiragaon	Cheta (Kupvi) Nankhari, Tikkar Junga and Nerwa
10. Sirmaur	Nahan, Rajgarh and PaontaSahib	Nahan, Renuka, Shillai, Paonta-Sahib, Pachhad, and Rajgarh	Dadahu, Kamrau and Nauhradhar
11. Solan	Solan, Nalagrah Arki and Kandaghat	Solan, Kasauli Nalagrah, Arki and Kandaghat	Ramshahr and Kishangrah (Kuthar)
12. Una	Una and Amb	Una, Amb and Bangana	Haroli

In March 2012 the government created new subdivisions with headquarters at Bangana in Una district and Sangrah in Sirmaur district for the convenience of local people. The decision was taken by the state Cabinet which met under the chairmanship of the then Chief Minister P.K Dhumal, Bangana subdivision have 38 patwar circles and serve 73,054 persons of 40 gram panchayats under its jurisdiction, while Sangrah subdivision cater to a population of 70,406 spread over 41 gram panchayats and will have 25 patwar circles under its jurisdiction as per the census data 2011.

ADMINISTRATIVE DIVISIONS/SUB-DIVISIONS/TEHSILS & SUB-TEHSILS (AS ON 31-3-2013)

S.No Districts	Subdivision	Tehsils	Sub-tehsils
1. Bilaspur	Bilaspur, Ghumarwin	Bilaspur Sadar, Sri Naina Deviji, (at Swarghat) Ghumarwin and Jhanduta	Namhol and Bharari
2. Chamba	Chamba, Camp at Salooni-Dalhausie, Bhattiyat, (at Chowari) Bharmaur,	Chamba, Dalhausie, Salooni, Bhattiyat, Bharmaur, Churah at Bhajraroo and Pangi at Killar	Sihunta, Holi and Bhallai

	Churah at Bhajraroo and Pangi at Killar		
3. Hamirpur	Hamirpur, Bhoranj, Barsar, and Nadaun	Hamirpur, Sujanpur Tira, Bamsan, Bhoranj Barsar, and Nadaun	Dhatwal Bijjari and Galore
4. Kangra	Kangra, Dharamshala, Palampur, Baijnath, Jaisinghpur, Dehra Nurpur and Jawali	Kangra, Nagrota-Bagwan, Baroh, Dharamshala, Shahpur, Palampur, Baijnath, Multhan, Jaisinghpur, Dehra, Jawalamukhi, Rakkar, Jaswan Kotla, Khuddian Nurpur, Fatehpur, Jawali and Indora	Harchakkian Dhira, Thural and Nagrota Surian
5. Kinnaur	Pooh, Kalpa at Reckong Peo and Nichar at Bhawanagar	Pooh, Moorang, Kalpa, Sangla, and Nichar at Bhawanagar	Hangrang (at Yangthang)
6. Kullu	Kullu, Banjar Ani and Manali	Kullu, Banjar Nirmand and Manali	Sainj, Anni and Nithar
7. Lahaul-Spiti	Lahaul (at Keylong) Spiti (at Kaza) and Udaipur	Lahaul (at Keylong) Spiti (at Kaza)	Udaipur
8. Mandi	Mandi sadar, Sundernagar, Sarkaghat, Chachiyot (at Gohar) Jogindernagar, Padhar and Karsog	Mandi sadar, Sundernagar, Sarkaghat, Sandhol, Baldawara, Chachiyot (at Gohar) Thunag, Padhar, Jogindernagar, Larbhrol and Karsog	Balichowki, Lad-Bharol, Aut, Kotli, Nihri Tihra and Dharmpur
9. Shimla	Rampur, Theog, Rohru, DodraKawar, Chaupal, Shimla (Urban) and Shimla (Rural)	Rampur, Suni, Theog, Kotkhai, Rohru, Chaupal, Chiragaon, Jubbal, Dodra Kawar, Shimla (Urban), Shimla (Rural) and Kumharsain	Nankhari, Tikkar, Nerwa, Cheta (at Kupvi), Junga and Dhami

10. Sirmaur	Nahan, Sangrah, Paonta Sahib, and Rajgarh	Nahan, Sanhrah (Renukaji) Paonta Sahib, Rajgarh, Shillai, and Pachhad (at Sarahan)	Dadahu, Nohradhar Kamrau and Ronhat
11. Solan	Solan, Kandaghat, Arki and Nalagarh	Solan, Kasauli, Kandaghat, Arki, Nalagarh and Baddi	Kishangrah, Darlaghat, and Ramshehar
12. Una	Una, Bangana and Amb	Una, Haroli, Bangana and Amb	Ispur and Bharwain

Today, Himachal Pradesh is one amongst the ten states of Indian Union, in the race of speedy development in various fields. All this could be possible due to effective democratic decentralization process followed in this tiny state, situated in the Western Himalayas. A great deal of stress has been laid on the delegation and decentralisation of powers at various levels of administrative hierarchy. Chief Secretary is the head of all department, headed by a Secretary (an IAS or senior servant recruited by State Public Service Commision). At the division level, there is a Divisional Commissioner for each division and a Resident Commissioner for Pangi subdivision.

The administrative unit called district is headed by *District Collector* or Commissioner or Deputy Commissioner, assisted by a number of subordinates at various levels to discharge his functions. Superintendent of Police (SP) has been assisting in the maintenance of law and order at the district level (either IPS or HPS). Block is the lowest tier of administrative hierarchy headed by Block Development Officer (BDO) who is recruited by State Government through State Public Service Commission.

On 27th August 2014, the state Government classified tehsils and sub tehsils on the basis of patwar circles. The tehsil having 30 patwar circle was put in A category, 15-29 circle in B category and a tehsil having less than 15 patwar circles in C category. In the same way a sub tehsil having 10 patwar circle will have the status of A grade and less than 10 patwar circle B grade. This classification have been effected to speed up the matter pertaining to revenue issues. The notification in this regard was issued on 5th July 2015. This will help to increase efficiency in the revenue department at the tehsil and sub tehsil level and also ensuring easy access to the officials such as Naib Tehsildar at the sub tehsil and Tehsildar at the tehsil level.

The political nucleus of the greatest democracy of the world (India) is Panchayati Raj, which is providing a ready agency at the village level for the speedy implementation of government schemes. Since 1968, Panchayati Raj system is working on proper footing in Himachal Pradesh.

THE HIMACHAL PRADESH INSTITUTE OF PUBLIC ADMINISTRATION

(FAIRLAWNS SHIMLA)

The dictionary meaning of training is, instructions and discipline in a particular art, profession or occupation. It is a conscious effort made to improve or increase an employee's skill, power or intelligence and to develop his attitudes and schemes of values in a desired direction. Training of public employees, in its specialized sense, is a conscious effort directed towards achievement of some specific purpose or purposes. Training should not be confused with education. Its scope is narrower and more specific than that of education. Education is related to the formation of character, of habits and manners and of mental and physical development.

The central object of training in one word is EFFICIENCY, i.e., *to increase the effectiveness of the work of the officials for the purposes of administration.* A comprehensive statement of the objects of the training of civil servants was given by the 'Arsheton Committee' on the Training of the Civil Servants, in its report (1944). These are five; namely:

(a) To produce reliable work-skill in the employee.

(b) Flexibility, i.e., to attune the public servants to the tasks in a changing world.

(c) To save him from mechanization by making him community conscious.

(d) To fit him for higher duty and responsibility and

(e) To broaden the mind of the trainee and to inculcate the basic principle that he is a public servant and not a master.

Training has been a familiar feature of the military profession since the ancient times. The practice of training craftsman through formal apprenticeship goes back to the middle ages. After the industrial revolution as the machines grew more and intricate demanding greater skill to operate them, the need for careful training became more and more manifest. Training in modern period, first began in the sphere of private business and industry. Public organizations were very late to introduce and make it as part of their process.

During British rule in India, it was generally assumed that the general or special education which a young man received before entering the public service was sufficient to qualify him for his job and for the rest he was left to pick up the necessary training in the course of time and his work. The only case in which a training course was provided after entry into service, were in some of the technical departments or in some of the highest grades, i.e. All India Services. For the Indian Civil Services, an initial general training of one to two years was provided at English Universities, the subjects taught being Law, Indian languages, Judicial procedure, Riding, Shooting etc. The advent of independence and the adoption of the policy of the planned development of the country to realize the ideal of a welfare state have resulted in a new

emphasis being placed on training to enable the employees to cope with the new tasks and challenges.

The role of bureaucracy in the colonial age was of a *'tax collecting'* and *'law and order'* keeping agency. But now it has become an agency capable of regulating the entire economic and social process in the country. The new task of Government call for an increasing degree of specialization, modern skills and techniques. Today, Government is mainly concerned with increase in per capita income, total employment, industrial development, housing, education, etc. and hence there is need for a capable team in the services to fulfil these objectives. The services have to establish a balance between democracy and efficiency, politics and expert knowledge, representatives Government and businesslike administration, to safeguard respect for human rights without distinction as to caste, creed, colour, sex, language and religion.

The different aspects of the changing environments and their effect on the administration call for skills and competence on the part of the public services. These skills should match the needs of the society. The need for training of public services, therefore, has received considerable attention in past years all over the world and a number of useful programmes are being organized. Training of officers is all the more important in a developing country like ours, where we are involved in the process of raising living standards of people and in consequence, significant changes are appearing in the character of governmental activities. The expansion of governmental activities and their increasingly technical nature has not only resulted in a large scale recruitments in various fields but has added new dimensions to the responsibilities of the administrative personnel who combine policy, advisory and managerial functions.

Soon after the attainment of statehood in 1971, the awareness of the importance of training of the officers of the State Government with a view to inculcating in them attitude and skills needed for the developmental administration, led the Government of Himchal Pradesh through the decision of cabinet taken on 27th December 1971 to recommend the creation of a new agency for giving training in administrative matters to the government servants engaged in the affairs of the State. Earlier the officers, required *inter alia* for the Union Territory of Himachal Pradesh, were trained at the Training Institute for the Union Territories Civil Services, New Delhi.

The Director of this Institute, Mr. B.K. Sharma (IAS) Himachal Pradesh cadre, was asked to prepare the first blueprint of the Institute, named as *'The H.P. Institute of Public Administration'* in January 1971. After a careful study of the syllabi of different similar institutes in the States, a more detailed scheme was framed in pursuance of the directive of the State Cabinet. The Government of Himachal Pradesh allotted the 'FAIR LAWNS' circuit house for starting the Institute. The environment of this building is well suited for the Training Institute. In the beginning. Rs. 10 lakh budget provision was made for the Institute. The need for a separate Training Institute was felt on account of the peculiar climatic conditions here with difficult terrain which makes the work

of the public servants much more difficult and different as compared to their counterparts in other State of Indian Union. The Himachal Pradesh Institute of Public Administration was set up on 1st January 1974 at Fair lawns in a building which has a historical past.

The original building has serene and picturesque surroundings with well laid out spacious and luxuriant lawns, which got constructed by 'Mr. R. Dixon' of the foreign office of British India. It was later on taken over by Nawab Muzaffar Ali Khan Qizzalbash; and on his migration to Pakistan in 1947, it was converted into a circuit House by the Punjab Government. At the time of reorganization of states in November 1966. the building along with other assets was transferred to Himachal Pradesh Government which subsequently selected it for establishing its own Institute of Public Administration, for imparting training to the officers of the State.

From a sole wooden building, the additional structures of hostel, mess, administrative block, conference hall, guest house, residential quarters, rural development-cum-library building and pre-examination coaching hostel, this Institute has acquired an adequately impressive infrastructure. The director heads the institute and functions as head of the department. He is assisted in the performance of functions by faculty members. The secretarial assistance is available for faculty members from a pool of class III/IV staff. The following functions are being performed by HIPA:

(a) Induction and in-service training.
(b) Peripatetic training.
(c) Training to field staff through a network of ten district training centres.
(d) Conduct of departmental examination for gazetted officers.
(e) Conduct of seminars and courses in the field of rural development under the aegis of State Centre for Research and Training in Rural Development.
(f) Management Development Programme
(g) Administrative Research.
(h) Consultancy.
(i) Pre-examination coaching for various competitive examination.
(j) Pre-examination coaching for subordinate accounts services, Part-I and II.

HIPA has been conducting short and long term courses and the areas covered are related to Management and General Administration, Public Administration, Planning, Financial Administration and Office Procedure, Public Relations, Behavioural Science, Revenue/Criminal Law, Local and Special Laws, Social, Cultural and Administrative History of Himachal Pradesh, Agriculture, Horticulture, Animal Husbandry, Cooperation, Public Health, Industries, Forest Farming etc. Besides professional courses, the Institute conducts courses on Revenue Administration, Office Procedure and Financial Administration, Behavioural Science, Personnel Administration, Management,

Rural Development etc.

The Institute has been looking after the need of following categories of officers through its various programmes and available infrastructure.

(i) Foundation Courses for Direct Recruits to the Gazetted Posts under the Himachal Pradesh Government

A foundation training programme is in the nature of orientation and is based on the view that new officers, in order to be effective and efficient, should have an understanding of the organisation of government, its purpose and objective at the time they join it. They should know their place in the system, the problems they have to tackle and the total environment of their work. The duration of this course is two months.

(ii) Professional Course for IAS Officers

The IAS probationers, on completion of the first phase of their training in the **'Lal Bahadur Shastri National Academy of Administration, Mussoorie'**, are sent for state training for a period of one year in the month of June each year. Initially they remain at the Institute for a period of three weeks. Thereafter, they go to various districts for completion of their training. After the completion of one year, the probationers leave for the Academy to Mussoorie.

(iii) Professional Course for Officers of the Himachal Pradesh Administrative Services

(a) The professional training programme for promotee officers of Himachal Pradesh Administrative Service has been condensed and prescribed for a period of three months including foundation training. Besides this, such officers have to undergo three months settlement training in case they have not undergone such training earlier in the service career. Those who have already done settlement training, have to apply for exemption from this training.

(b) Directly recruited HPAS officers have to undergo professional training for two months. Such officers immediately on completion of their foundation course in the Institute have to undergo this course, followed by three months settlement training and five months district/field attachments.

(vi) Professional Courses for Block Development Officers

The objective of this course, which is conducted for Block Development Officers is to make them fully conversant with various programmes of Rural Development, their concepts, implementation, behavioural skills, understanding the rural situation, planning, strategies of rural development over past four decades, Public Administration, Panchayati Raj and democratic decentralization, extension and community organisaiton, role comprehension and office procedure and financial management. The duration of this course has been fixed one year.

(v) Pre-examination coaching centre

The Government of Himachal Pradesh has started pre-examination

coaching facilities at the Institute to prepare candidates who are bonafide residents of Himachal Pradesh for the following competitive examination:

(a) Civil Services Examination (Preliminary).
(b) Civil Services Examination (Main).
(c) H.A.S. and Allied Services Examination.
(d) Bank Probationary Officers Examination.
(e) Assistant Grade Examination in Central Services.
(f) Assistant Grade Examination in General Services, (Clerical Cadre).
(g) Pre-Medical Test [PMT].
(h) Coaching for viva-voce for Himachal Pradesh Administrative Services and Allied Services Examination.

Intake capacity for every coaching course is 40, out of which 50% seats are reserved for candidates belonging to reserved categories (Scheduled Castes/ Scheduled Tribes and OBC), who are provided free board and lodging. Others have to pay a nominal fee of Rs. 25/- per month in addition to the board and lodging charges.

(vi) Research Activities.

A centre for Research and Training in Rural Development has been set up in the Institute with the 50% aid by the government of India for imparting training to the functionaries engaged in rural development programmes and conduct case studies to serve as an input for training. This Centre started functioning at the Institute from the year 1982-83.

(vii) Subordinate Accounts Services Part I and II Training Courses.

S.A.S Part I and II training was introduced in this Institute during 1987-88. Those candidates who qualify preliminary examination conducted by HPPSC are admitted to S.A.S. (Part-I) training course and after qualifying Part-I examination, which is to be conducted by the HPPS, they would be admitted to S.A.S. (Part-II) training course at the Institute. The duration of S.A.S. (Part-I) is five months and that Part II is 3½ months.

(viii) Resource Group on Hill Area Development

The Institute has been selected by the Government of India for establishment of a Resource Group on Hill Area Development. The Himachal Pradesh Institute of Public Administration has acquired a great reputation for its various training programmes and orientation.

HIMACHAL PRADESH LOKAYUKTA

The rise of democracy has changed the old concept of a *'Police state'* and replaced it by a newer image of Social Welfare State. Under the old concept of 'Police State', the functions of the state were limited and confined and relation between the citizen and the administrator was that of a servant and master. Now its scope has been extended to cover all the dimensions of human activity.

Its administrative machinery influences every aspect of human life in many ways like executive control and orders, permits, licences etc. Along with the increasing dependence of the citizens on the administrative machinery of the state, the hardship and grievances of the citizens have been increasing. There is difference between allegation and grievances. *Allegation arises out of the misuse of authority by a public official for an illegal gratification, whereas complaint arises out of maladministration, such as delay, discourtesy etc.* Knowing it fully that traditional system of administration and complaint handling was either not available or inadequate, too formal, too costly and time consuming. It was felt necessary that there should be a machinery which should be less costly, less formal and quicker.

The beginning was made in Sweden where its constitution of 1809 provided for a unique institution of *'ombudsman'* to protect the citizens against administrative injustice or abuse of power by a public official. In Sweden, the ombudsman is appointed by Parliament to supervise as an independent authority, the functioning of all public officials, civil, military and judicial. The powers of Swedish ombudsman are very wide. Even courts and judicial officers are not excluded from his purview. An ombudsman has also been given power to prosecute any erring public official or recommend departmental action for his removal or dismissal for any grave negligence in performance of duties. The ombudsman can initiate action either on the basis of an individual complaint or *'suo motto'*. Ombudsman is independent of the legislature as well as executive and the judiciary. An important feature of the Swedish ombudsman scheme, however, is that the ombudsman himself can't punish an official but can only report to the higher authorities for taking necessary departmental or other action. After the success of the institution of ombudsman, more than 40 countries of Europe, Africa and Asia like U.K., Australia, Newzealand, Ghana, Zambia, Nigeria, Pakistan etc. have adopted this institution with such changes and modification as may suit to their political and administrative structure.

The demand for the setting up of such an institution was first made in India by K.M. Munshi, an a member of Parliament in 1960. Thereafter in 1962, M.C. Setalvad, the then Attorney General of India and in 1963, the Chief Justice of India supported this demand. L.M. Singhvi, an MP, raised this issue in Parliament in 1963. The matter continued to be raised in Parliament in 1964-65 till a special consultative group of MPs on Administrative Reforms was constituted. In its report on the subject submitted in October 1966, the Administrative Reforms Commission recommended a two-tier machinery of *'Lokpal'* (at the centre) and *'Lokayukta'* (in each state) to deal with complaints against other officials.

The ARC recommended following features for Lokpal and Lokayukta institutions:

(i) They should be demonstrably independent and impartial.

(ii) Their investigation and proceedings should be conducted in private

and should be informal in character.

(iii) Their status should compare with the highest judicial functionaries in the country.

(iv) They should deal with matters in the discretionary field, involving acts of injustice, corruption or favouritism.

(v) Their proceedings should not be subject to judicial interferences and they should have the minimum latitude and powers in obtaining information relevant to their duties.

(vi) They should not look-forward to any benefit or pecuniary advantage from the executive government.

The Lokpal and Lokayukta Bill was introduced in Lok Sabha in May 1968, then in April 1971 and again in 1977, but without any result. The latest bill was introduced in the Lok Sabha in August 1985. At the centre, due to one reason or the other, the institution of Lokpal has not been set up so far. However, the position in this regard is encouraging in the states. Orissa became the first state to enact the Lokayukta Act. Maharashtra was the first state to appoint a Lokayukta. Rajasthan enacted the Act in 1973.

In Bihar, the office of Lokayukta was created through issuing an ordinance in 1973. Uttar Pradesh passed the Lokayukta and up-Lokayukta Act in 1975. Karnataka promulgated an ordinance in February 1983. Andhra Pradesh Assembly passed the Lokayukta and Up-Lokayukta Bill in 1982. In Madhya Pradesh Lokayukta and UP - Lokayukta Bill was passed in 1981. In Himachal Pradesh, an ordinance for the creation of Lokayukta was issued on 25th May 1983, which was later introduced on 1st June 1983 as a bill in the Vidhan Sabha and passed. In Kerla, there is Publicmen (Prevention of Corruption) Act 1983 and in Nagaland, there is the Vigilance Commission to combat corruption.

The Himachal Pradesh Lokayukta Act, 1983 had following provisions:

Appointment: For the purpose of conducting investigations in accordance with the provisions of this Act, the Governor of the State shall, by warrant under his hand and seal, appoint a person to be known as Lokayukta. Lokayukta shall be appointed after consultation with the Chief Justice of the High Court of Himachal Pradesh and the leader of the opposition in the Legislative Assembly or if there be no such leader, a person selected in this behalf by the members of the opposition in that house in such a manner as the Speaker may direct. Only a person who has been judge of the Supreme Court or a Chief Justice of High Court in India is eligible for the appointment. Every person appointed as the Lokayukta shall, before entering upon his office, make and subscribe, before the Governor, or some person appointed in that behalf by taking on oath and affirmation to the Constitution of India to perform his duties without fear or favour, affection or ill-will.

Conditions of Appointment: The Lokayukta shall not be a member of Parliament or member of the Legislature of any state and shall not hold any

other office of trust or profit or be an officer of a co-operative society and shall not be connected with any political party or carry on any business or practise any profession and accordingly before he enters upon his office, a person as Lokayukta shall:

(a) if he is a member of Parliament or the Legislature of any state, resign such membership; *or*

(b) if he holds any office of trust or profit, resign from such office; *or*

(c) if he is connected with any political party, severe his connections with it, or

(d) if he is carrying on any business, severe his connections with the conduct and management of such business; or

(e) if he is practising any profession, suspend practice of such profession.

Terms of office and other conditions of service of Lokayukta

(1) Every person appointed as the Lokayukta shall hold office for a term of *five years* from the date on which he she enters upon his office and shall not be eligible for reappointment thereafter.

Provided that-

(a) the Lokayukta may, by writing under his hand addressed to the Governor, resign his office and such resignation shall be effective as soon as it is tendered and

(b) the Lokyaukta may be removed from the office by an order of the Governor passed after an address by the Himachal Pradesh Legislative Assembly, supported by a majority of the total membership of the Legislative Assembly and by a majority of not less than two-thirds of the members thereof, present and voting, has been presented to the Governor in the same session for such removal on the ground of proved misbehaviour or incapacity. The investigation and proof of the misbehaviour or in capacity shall be conducted under the *Judges (Inquiry) Act, 1968,* related to the removal of a Judge.

(2) A vacancy occurring in the office of the Lokayukta shall be filled in as soon as possible, but not later than six months from the date of occurrence of such vacancy.

(3) On ceasing to hold office, Lokayukta shall be ineligible for further employment in any other capacity under the Government of Himachal Pradesh for any employment under, or office in, any such local authority, cooperative society, government company, university, corporation, or a corporate body under the administrative control of the Government of Himachal Pradesh.

(4) The Lokayukta shall be paid as decided by the assembly of the state.

(5) The allowances payable to and other conditions of service of Lokayukta shall be such as may be prescribed:

Provided that in prescribing the allowances payable to and other conditions of service of, the Lokayukta, regard shall be paid to the allowances payable to

and other conditions of services of a serving judge of the Supreme Court or the Chief Justice of a High Court, as the case may be:

Provided further the allowances payable to and other conditions of service of, Lokayukta shall not be varied to his disadvantage after his appointment.

(6) The salaries and allowances payable to, or in respect of, the Lokayukta shall be, expenditure charged on the consolidated fund of the State.

Jurisdiction: On receiving a complaint, the Lokayukta may proceed to enquire into the allegations made against a public servant. *"Public servant"* means a person, who is or has been-

(a) a Minister, means a member of Council of Ministers by whatever name called, for the State of Himachal Pradesh, that is to say, Chief Minister, Minister of State, Deputy Minister and shall also include the Chief Parliamentary Secretary and Parliamentary Secretary.

(b) a member of the Legislative Assembly of Himachal Pradesh,

(c) appointed to public service or post in connection with the affairs of the Board of Directors of Chief Executive Officer, by whatever name called, of a government company (Companies Act, 1956),

(e) a Mayor, Deputy Mayor, Councillors or Commissioner of a Municipal Corporation constituted by or under the *Himachal Pradesh Municipal Corporation Act, 1980,*

(f) a President, Vice-President, a member or Administrator of a Municipal Committee or Notified Area Committee constituted or deemed to have been constituted by or under the Himachal Pradesh Municipal Act, 1968,

(g) a Vice-Chancellor or Pro-Vice Chancellor of a University, set up under the Law of the State Legislature,

(h) a Chairman or Vice-Chairman of the Zila Parishad or Panchayat Samiti constituted by or under the Himachal Pradesh Panchayati Raj Act,

(i) a President, Vice-President, Managing Director or a member of the Board of Directors of such other cooperative societies, constituted under the Himachal Pradesh Cooperative Societies Act, 1968,

(j) a Chairman, Vice-Chairman, Managing Director or the Chief Executive Officer of any statutory or nonstatutory body incorporated or set up by the State Government,

(k) in the service of body referred to in sub-clauses (4) to (10) of this clause, and

(i) holding any other post or office under the control of the State Government or an authority referred to in subclause (11) and notified by the State Government in the Official Gazette from time to time.

"Officer" means and includes-

(i) the Chief Secretary, Secretary, Principal Secretary, Additional Secretary, Special Secretary, Joint Secretary, Deputy Secretary and Under Secretary to the Government of Himachal Pradesh;

(ii) the head of the Department of the State Government; and

(iii) any other government servant to be notified by the State Government.

"Competent authority" in relation to the purpose of recommendations of Lokayukta –

(i) in the case of Chief Minister, or a member of the State Legislature the Governor acting in his discretion is the competent authority

(ii) in the case if a Minister, other than the Chief Minister and the officers, the Chief Minister or during the period of proclamation,

(iii) in the case of any other public servant, such authority as may be prescribed from time to time.

Scope of Functions: Lokayukta can't conduct any investigation in the case of complaint involving a grievance or allegation in respect of action taken:

(a) in respect of which a formal and public inquiry has been ordered under the Public Servants (Inquiries) Act, 1850; or

(b) which has been referred for inquiry under the Commission of Inquiry Act, 1952, or

(c) which is not connected with the discharge of functions as public servant of the person against whom allegation is made; or

(d) relating to an allegation against a public servant, if the complaint is made after expiry of a period of five years from the date on which the conduct complained against is alleged to have been made.

Manner of making complaint: A complaint involving a grievance has to be made by the aggrieved person; if the aggrieved person is incapacitated or dead, then complaint has to be made by a person who in law represents the estate of the aggrieved person or any other person authorized by the former. A complaint involving an allegation can be made by any person other than a public servant.

Every complaint has to be made in such form and must be accompanied by such affidavits as may be prescribed from time to time. Letters written to Lokayukta by persons in police custody or in jail or in any asylum for insane persons have to be forwarded unopened and without delay by the concerned authorities to Lokayukta who may, if he is satisfied, treat such letters as bonafide complaints.

Lokayukta can initiate investigation on receipt of a complaint properly filed before him or on his own motion. But before initiating any investigation, he must forward a copy of the complaint or a statement setting on the grounds for investigation, where he is acting *'suo-motto'* to the concerned public servant and to the competent authority and afford the concerned public servant and opportunity to offer his comments.

Investigation is to be conducted in private on the identity of the complainant and the concerned public servant must not be disclosed to the

public or the press before, during or after the investigation. However, Lokayukta may conduct public investigation in cases of definite public interest if he thinks fit to do so. The discretion to investigate a complaint or to determine whether there are sufficient grounds for investigation rests in Lokayukta.

For the purpose of any enquiry, the Lokayukta-

(a) may require any pubic servant or any other person, who in his opinion, is able to furnish information or produce document relevant to such inquiry, to furnish any such information or produce any document;

(b) shall have all the powers of a civil court while trying a suit under the *Code of Civil Procedure 1908*, in respect of the following matters, namely:

(i) summoning and enforcing the attendance of any person and examining him on oath;

(ii) requiring the discovery and production of any document;

(iii) receiving evidence of affidavits;

(iv) requisitioning any public record or copy thereof from any court or office and

(v) issuing commissions for the examination of witnesses or documents:

Provided that no person without the prior permission of the appropriate government shall be required or authorized by virtue of the provisions contained in this Act to furnish any such information or answer any such question or produce so much of any document might involve the disclosure of any information or production of any document which is punishable under the provisions of the *"Official Secrets Act, 1923"*.

Any proceeding before the Lokayukta shall be deemed to be a judicial proceeding within the meaning of Section 193 and Section 228 of the Indian Penal Code, 1860.

Contempt of Lokayukta: *The Lokayukta shall deemed to be a court within meaning of contempt of Courts Act, 1971.* If any person intentionally insults, interrupts the investigation or does anything to bring Lokayukta into dispute, he can be punished for contempt with six months simple imprisonment or fine or both.

Reports of Lokayukta: Besides the special report to competent authority, Lokayukta is required to submit a consolidated annual report on his performance to Governor, who is required to place a copy of the report before Legislative Assembly at the commencement of the session with explanatory memorandum, if any.

Lokayukta is binding that nothing should be made public regarding documents and information provided to him by government agency or servant.

Protection: No proceeding of Lokayukta is liable to a challenge in any court of law or any account except on the ground of jurisdiction. No suit, prosecution or other legal proceeding shall lie against the Lokayukta or

against any officer, employee, agency or person for anything under the act of good faith.

Staff of Lokayukta: The Lokayukta may appoint, or authorize any officer subordinate to the Lokayukta to appoint officers and other employees to assist the Lokayukta in the discharge of his functions under the Act. The categories of officers and employees who may be appointed and other conditions of service and the administrative powers of the Lokayukta shall be such as may be prescribed after consultation with the Lokayukta.

The Lokayukat may for the purpose of conducting enquiries under this Act utilizes the service of:

(i) any officer or investigation agency of the state or the Central Government with the concurrence of that Government; or

(ii) any other person or agency.

But nothing in this Act shall be construed as authorizing the Lokayukta to investigate any action which is taken by or with the approval of-

(a) the Chief Justice or any Judge of the High Court or an officer, the control whereof vests in the High Court by virtue of Article 235 of the Constitution;

(b) any officer or servant of any civil or criminal court of India;

(c) the Account General of Himachal Pradesh;

(d) the Chief Election Commissioner, the Election Commissioners and the Regional Commissioners referred to in Article 324 of the Constitution and the Chief Electorial officer, Himachal Pradesh state; and

(e) the Chairman or a member of the Himachal Pradesh Public Service Commission. The Lokayukta act has been revised to make it more purposeful in the year 2011, by the BJP led government.

Lokyayukta Bill 2012

March 2012, the Himachal Pradesh Lokayukta Bill was finally passed by the Vidhan Sabha in an amended form after incorporating an additional clause empowering the Lokayukta with powers under the Contempt of Court Act to make it a more effective institution. The Bill was passed in the absence of the Congress members, who staged a walkout earlier during question hour and did not return to the House. There was not much debate and only two BJP members, Suresh Bhardwaj and Khushi Ram Balnahta, spoke on the bill, which was passed after Chief Minister PK Dhumal's reply.

The Proceedings of the Lokayukta will be conducted in open court and deemed as judicial proceedings with powers under the Contempt of Court Act for which an amendment had been moved. Regarding Khushi Ram Balnahta's suggestion that cooperative societies, non-governmental organisations and sports bodies be brought under its ambit, the Chief minister said that these could be brought under its ambit by a notification for which there was a pro-

vision in the Bill. The Government clarified that a penalty of Rs 10 lakh and imprisonment of one year was provided for only in case someone filed a false complaint against the Lokayukta and not other complainants who were only required to file an affidavit.

Besides *suo moto* powers, the Lokyaukta had been provided in investigating and prosecution wings and he could review, amend and even cancel contracts, agreements, lease deeds and other record if corruption is found to be involved in these. Tainted companies could be blacklisted on the Lokayaukta recommendations. Not only that, the Lokyaukta is empowered to recommend changes in the procedures and conditions for awarding contracts and the transfer of an officer under investigation for causing obstruction in his inquiry, which would be binding. It also provided protection to whistle-blowers.

In 2012 with the change of government the script of Lokayukta bill 2012 was also changed. The new government decided to included some more stringent provisions in the existing bill. The new bill came to be known as Lokayukta bill 2014.

HIMACHAL PRADESH ADMINISTRATIVE TRIBUNAL

Modern State has wide variety of functions to perform, so it has led to multiplicity of Jurisdictions. The exercise of these jurisdictions in a common law would affects the individual much more than the judgements of courts of law. In the new situation, it is difficult, if not impossible, to label the function of the state as executive, legislative and judicial in the conventional sense of these terms. Because of this, not only structures but also functions necessarily overlap and are interlinked, judicial decisions have not thus far been able to arrive at definitive criteria for testing state actions separately. This has resulted in the prodigious growth and development of a system of administrative justice.

Since the administrative authorities do carry out administrative policies, they tend towards a departmental bias in favour of their own actions or those of their subordinates. In matters in which the administration has to act quasi-judicially, it is required that the authority acts objectively and in accordance with the principles of natural justice. The growth of administrative justice in India has been gradual. During the last six decades in which administrative power has been functioning in India, a considerable amount of litigation on matters involving the administration and the individual has amassed, out of which the courts have created a body of case law that is satisfactory by and large.

The setting of administrative tribunal as *quasi-judicial body* led the Indian courts to make extensive pronouncements on the definition of quasi-judicial functions. In the absence of statute prescribing definite procedure for the functioning of these bodies, courts occasioned to stipulate directions from time to time. The Law Commission of India, apprised of this problem, went on

recommending the procedure of natural Justice for administrative tribunals in dealing with matters coming to them. Later on, Government of India when appointed the Administrative Reforms Commission, it was asked to make its own assessment. The team of the Administrative Reforms Commission confined its deliberation to the advisability of setting up administrative tribunals for: (a) confirmation, promotion, disciplinary action etc, of employees under the state; (b) orders of assessment and adjudication under customs or central excise matters; and (c) orders of assessment in sales tax matters, both central and state; (d) orders of assessment in state excise matters; (e) orders under the Motor Vehicles Act.

The courts accepted the existence of Administrative Tribunals and the Law Commission recommended further expansion of the system. While courts conceded the exercise of administrative policies warranted eager disposal of issues through administrative jurisdiction, they wanted it to operate within judicially defined and prescribed parameters. On the other hand, the implementation of administrative authorities.

The use of judicial power by administrative bodies and limitation imposed on them by courts ignited lot of heat and generated wide spread debate which eventually led to the restriction of the powers of the high courts on matters in which government had an interest. To end the controversy of well defined jurisdiction, the 42nd Amendment in 1976, added to the constitution Part XIV-A. This part provides for the establishment of administrative tribunals to deal with disputes and complaints relating to services of person appointed to public services and posts in connection with affairs of the union, state or local governments or those of public corporations. Under the provision for the establishment of a hierarchy of tribunals, specifies the jurisdiction, powers and authority that may be exercised by each of the tribunals.

According to new provision, the jurisdiction of all courts (except the jurisdiction of the Supreme Court under Article 136) with respect to all or any of the matters falling within the jurisdiction of the said tribunals has been excluded. The law also provides for the transfer to each tribunal of any case pending before any court or any authority immediately before the establishment of the said tribunal, which would have fallen within the jurisdiction of such tribunal if the cause of action on which the suit or proceedings are based had arisen after the establishment of the tribunal. For the speedy disposal of function/cases, legislature may make necessary provisions.

The amended act clearly refers that administrative tribunals can come into existence only through a law enacted for this purpose by the Parliament or the State Legislature, as the case may be. The civil courts jurisdiction in such matters could be excluded but the jurisdiction of the High Court (44th amendment) and that of Supreme Court (under Article 136 of the Constitution) would remain unchanged.

In view of increasing burden of cases in the formal courts of justice and

their complex nature, in the State of Himachal Pradesh, Central Government on 1st January 1986, in the exercise of the powers conferred by subsection (4) of Section 1 of the Administrative Tribunals, set up administrative tribunal for Himachal Pradesh. The provisions of the Act shall be as they relate to the Gujarat Administrative Tribunal, the Karnataka Administrative Tribunal, the Kerla Administrative Tribunal, the Madhya Pradesh Administrative Tribunal and the Orissa Administrative Tribunal.

Jurisdiction: The administrative tribunal is a consequence of welfare state. These tribunals, although not conceded to be courts of law, are taken for all practical purposes to have the trapping of a court. A tribunal has to work within the framework of and on the basis of, the principles laid down in the statute under which it has been created. The jurisdiction of Himachal Pradesh Administrative Tribunal, extending over all matters within the state and employees of the State Government, wheresoever they are, within or outside the territory of the state except the matters falling in the purview of Supreme Court. In brief, its jurisdiction can be discussed as follows:

(a) It has no power to pronounce on the validity or constitutionality of a statute.

(b) The question of *ultra vires* is foreign to the scope of a tribunal's jurisdiction.

(c) Tribunal is vested with a power to grant a stay order in a proceeding. By virtue of the power vested in a tribunal, it may choose to stay proceedings before it in the interest of justice.

(d) A judicial or quasi-judicial tribunal has no right to appeal against an order of a judge of the High Court quashing any decision it has made. It is merely an agency for the implementation of developmental policy and can only work within the framework of the law.

(e) tribunal has no inherent power to review its own decisions.

The Supreme Court, as an apex Judicial body of the country, has power of Jurisdiction over tribunals. In exercise of its power, Supreme Court can grant special leave to the affected parties to appeal against decisions, awards or orders of the tribunals. The Supreme Court has Jurisdiction over tribunal on the following grounds:

(i) Wherever the tribunal has acted in violation of the principles of natural justice.

(ii) Whenever an award has been passed beyond the time originally fixed by the Government.

(iii) Whenever the tribunal acts in violation of the procedure prescribed under the statute.

(iv) Whenever there appears to be an error of law which is apparent on the face of the record.

(v) Whenever the decision of the tribunal has been found to be without

Jurisdiction, or in excess of its Jurisdiction; or where the tribunal exercises its Jurisdiction in an illegal or materially irregular manner.

(vi) Whenever tribunal has refused to perform its duty under the law.

(vii) Whenever the finding of the fact by the tribunal is based on no evidence, or based on inadmissible evidence, or arrived at by ignoring the admissible evidence or record, or ignoring the relevant material on record, or by taking into consideration the irrelevant materials, or when based on partly relevant and partly irrelevant materials, which have influenced the said finding.

Organisational Structure: The Chairman is the judicial as well as administrative head of the departments of the Himachal Pradesh Administrative Tribunal. The office functions under the supervision of the Registrar. The Registrar is assisted in judicial as well as in administrative matters by a Deputy Registrar and an Assistant Registrar. There are three branches in the organisation., i.e. *Judicial Branch, Administrative Branch* and *the Accounts Section.*

Powers and functions of the Registrar:

(1) The Registrar shall have the custody of the records of the Tribunal and shall exercise such other functions as may be assigned to him under rules by the Chairman.

(2) The Registrar, may with the approval of the Chairman, delegate to Deputy Registrar any function required by rules to be exercised by the Registrar.

(3) In the absence of the Registrar, the Deputy Registrar or any other officer of the Tribunal authorized in writing by the Chairman on his behalf, may perform or exercise all or any of the functions and powers of the Registrar.

(4) The Registrar shall keep in his custody official seal of the Tribunal.

(5) The Registrar shall, subject to any general or special direction by the Chairman, affix the official seal of the Tribunal on any order, notice or other process.

(6) The Registrar shall have the power to authorize in writing the affixing of the seal on a certified copy of any order of the Tribunal.

In addition to these, the Registrar shall have to perform certain additional duties and powers subject to any special or general order of the Chairman or the Vice-Chairman.

Language of the Tribunal: The language of the Tribunal shall be English:

Provided that the parties to a proceeding before the Tribunal may file documents drawn up in Hindi, if they so desire: Provided further that a bench may, in its discretion, permit the use of Hindi in the proceeding. However, the final order shall be in English.

The setting up of Himachal Pradesh Administrative Tribunal has come handy to the people to get speedy, inexpensive and fair judgments in the cases

pertaining to the various administrative organs of the State Government. It has also provided relief to the traditional avenues of justice (i.e. courts) by reducing workload and unnecessary litigation pending for years.

On September 6, 1994 Himachal Pradesh Government agreed to set up a Law Commission with the Lokayukta headed by Justice P.C. Balakrishan Menon as its Chairman. Besides, the Commission will have one more member either Secretary of the Lokayukta or a retired Judge. It has to suggest reforms in the Judicial system reviewing all existing laws in conformity with the provisions of the Constitution and various judgements of the Supreme Court and State High Courts.

The tribunal ceased to exist in the year 2008. In July 2008, BJP led state government annulled the administrative tribunal and transferred all cases pending with the tribunal to the state high court. But on July 5th 2013, the state government led by Vir Bhadra Singh restored the tribunal on the basis of the report of Chief secretary Sudripto Rai and Narender Chauhan. The government also declared to setup circuit branches of the tribunal in Dharamshala and Mandi.

HIMACHAL PRADESH HIGH COURT

Judicial system is the backbone of democratic institutions and ethics. No democracy can survive for long in the absence of free, fair and impartial judiciary. It has also been recognised as one of the essential organs of the Government in any State. Traditionally, the role of the judiciary has been to try and punish those violating the laws of the land. In the modern society with the development of the idea of constitutionalism, which primarily is based on the principle of limited government, an independent judiciary has become *'sin-qua-non'* of democracy. Along with this, in a federal polity, where the powers of government are not only limited vis-a-vis the citizens but also divided between two set of government, the need of an independent judiciary becomes rather vital.

The highest court of the land in India is Supreme Court, located in Delhi. At the state level, there is a hierarchy of courts with the *High Court* at the apex. According to Article 214 of the Indian Constitution, *"there shall be a High Court for each state"*. However, Parliament may by law establish a common High Court for two or more states and a Union Territory. At present, Punjab and Haryana (at Chandigarh) on the one hand and Assam, Nagaland, Meghalaya, Manipur, Tripura, Mizoram, Sikkim and Arunachal Pradesh (at Guwahati) have a common High Court. Tamil Nadu and Puddichery also have a common High court at Madras. Out of seven union territories only Delhi has a separate High Court. *In all, there are twenty one High Courts in India.*

Every High Court is a court of record, which means its decisions have an evidently high value which can't be questioned in the lower courts and it has the power of punishing for contempt of court. Every High Court consists of a Chief Justice and such other judges as the President may from time to time

deem it necessary to appoint (*Article 216*).

The Judges of the High Court are appointed by the President after consultation with Chief Justice of India, the Governor of the State and in the case of appointment of Judge, other than the Chief Justice, the Chief Justice of the High Court concerned. Every Judge of the High Court including the Chief Justice holds office until he attains the age of sixty two years (before Seventh Amendment Act 1956, the retirement age for a High Court Judge was sixty years). The Judge of a High Court can also be removed by the President on the ground of proved misbehaviour or incapacity. If each House of the Parliament passes resolution by a majority of the total membership of the House and by a majority of not less than two-thirds of the members present and voting in the same session for his removal [Article 217 (b)]

The Constitution also puts restrictions on practice of the person who has held office as a permanent Judge of a High Court except in the Supreme Court or in the other High Court (Article 220). This restriction does not apply to additional or acting Judges. The Judges of the High Court are paid such salaries as are mentioned in the Second Schedule of Indian constitution. Indian Parliament has power to determine from time to time the salary and allowance of Judges, which cannot be varied to the disadvantage after appointment and *their salary is charged on the consolidated fund of the State.* At present, (2014) the Chief Justice of a High Court gets Rs. 90000/- per month and other Judges Rs. 80,000/- per month, while their pension is Rs. 54,000/- and Rs. 48,000/- per month respectively.

Jurisdiction: (a) The High Court has the power of issuing directions, orders or writs including the writs in the nature of *habeas corpus, mandamus, prohibition, quo-warranto* and *certiorari,* or any of them against any person or authority within its territorial jurisdiction for the enforcement of the Fundamental Rights or for any other purpose (Article 226).

(b) The High Court has the administrative as well as judicial supervisory jurisdiction over all the courts and tribunals of judicial and quasi-judicial nature excluding tribunal relating to armed forces within its territorial jurisdiction just to keep the subordinate courts within the bonds of their authority.

(c) The High Court has the power of transferring cases from the subordinate court to itself, if it is satisfied that the case lying with the subordinate court involves a substantial question of law as to the interpretation of the Constitution, the determination of which is necessary for the disposal of case (Article 228). It may also be noted that the High Court and not the Government has the power of confirmation, transfer and to taking a disciplinary action against the district or subordinate Judges.

(d) The appointment of officers and servants of a High Court is made by the Chief Justice of the Courts or by such other judge or officer whom he may direct. The governor may by rule can get these appointments made by State Public Service Commission. The service conditions of these officers and servants

shall be those laid down by a law made by the State Legislature. Their salaries will be charged on the consolidated fund of the State [Article 229 (3)].

Judicial System in Himachal Pradesh: After the formation of Himchal Pradesh on 15th April 1948, it was provided with its own judicial administration in a re-organized form. Accordingly, a Judicial Commissioner's court and two district and session Judges courts and 27 various subordinate courts were constituted. The regular functioning of judicial commissioner court started from the 15th of August 1948. The Punjab High Court rules and orders with necessary modification were adopted and notified to provide a cohesive judicial system all over the state. On 29th April 1967, two new district and session courts - one for 'Shimla' and the other for 'Kangra' - were established.

In the year 1967, the Government of India enacted the jurisdiction of Delhi High Court act, 1966 and from 1st May 1967, extended the jurisdiction of Delhi High Court act, 1966 to the Union Territory of Himachal Pradesh (Himachal was Union Territory from 1956-1971). So judicial commissioner court was replaced in 1967 by the *Himachal Bench of Delhi High Court* at Shimla. In 1971, when Himachal Pradesh achieved its long cherished goal of statehood, it was provided with a separate High Court of its own, consisting of a Chief Justice and two judges. At present, the strength of judges in Himachal High Court is eleven, consisting of one Chief Justice and ten other judges. Mrs. Leila Seth, who was sworn in the Chief Justice of Himachal High Court on 5th August 1991, was the *first woman Chief Justice of a High Court* within the territory of India.

Himachal Pradesh Judicial Academy

The Himachal Pradesh Judicial Academy was set up vide State Government Notification No. Home (E) 3-17/2003-II dated 24th November 2005. The Academy is situated at Curzon House, which is a heritage building in the beautiful outskirts of Himalaya. The Academy is running in the Complex of Curzon House which was residence of Lord Curzon during British Rule in India. The Academy has been established under the Leadership of Hon'ble Chief Justice, (Hon'ble Patron of the Academy), Himachal Pradesh High Court- Shimla, with a contemplation of the following functions:

- To impart induction training to newly recruited Judicial Officers
- To impart refresher and orientation training and education to Judicial Officers.
- To provide training to ministerial staff of Judicial Courts from time to time.
- To provide such other judicial training and education related services, as may be necessary to improve the efficacy of the justice delivery system.
- To provide and impart refreshers, orientation or any other type of training in justice and law related subjects to Officers and Officials outside Judiciary, if so requested or required.

SHIMLA DISTRICT COURT COMPLEX

The new district Shimla court complex is the first structure in the erstwhile British summer capital inspired by ***Gothic architecture*** with several features of the colonial era lending it a distinct look completed in December 2012. Spread over 16494 square meters, the sprawling complex at Chakkar is one of the biggest judicial complexes and probably the most elegant in the country. Its arches, railing, balconies, corridors, verandahs, rainwater pipes and rainwater harvesting system are built on the pattern of the Viceregal Lodge, a fine specimen of British architecture housing the Indian Institute of Advanced Study.

It is for the first time that the Public Works Department has tried to incorporate typical features of colonial architecture in a building. Constructed at a cost of Rs. 41 crore, it has two blocks. One block has four storeys and the other has six. The total built-up area is 12250 square metres. It has 21 courtrooms, including two huge ones, a library, separate Bar rooms for male and female lawyers and a consultation room. The total area of the floor housing the Bar rooms and the library is 15000 square feet. The rainwater harvesting structure has a storage capacity of 1.5 lakh liters. The complex has space for police lockups, a malkhana bank, a post office, stamp vendors, a dispensary, a creche and three separate canteens for the staff, advocates and the public.

Legal Aid Clinic: On the pattern of national free legal aid tribunal, Himachal also setup 49 legal aid clinic in all districts to help destitute in their need of legal help. The then chief justice of India justice P. Sadashivam inaugurated the scheme on 24th January 2014. The National Commission for Protection of Child Rights (NCPCR) was set up in March 2007 under the Commission for Protection of Child Rights Act, 2005, an Act of Parliament (December 2005). The Commission's Mandate is to ensure that all Laws, Policies, Programmes, and Administrative Mechanisms are in consonance with the Child Rights perspective as enshrined in the Constitution of India and also the UN Convention on the Rights of the Child. The Child is defined as a person in the 0 to 18 years age group.

The Commission visualises a rights-based perspective flowing into National Policies and Programmes, along with nuanced responses at the State, District and Block levels, taking care of specificities and strengths of each region. In order to touch every child, it seeks a deeper penetration to communities and households and expects that the ground experiences gathered at the field are taken into consideration by all the authorities at the higher level. Thus the Commission sees an indispensable role for the State, sound institution-building processes, respect for decentralization at the local bodies and community level and larger societal concern for children and their well-being. In Himachal Pradesh the Commission was set up in the state under JJ Act on 28th January 2014 on the pattern of national commission. Ms. Shyama Dogra became its first chairperson.

Himachal State Consumer Commission and a District Forum

The Government of India enacted a Statute through Parliament named as Consumer Protection Act, 1986. Its implementation was left to the State Governments. The State Government implemented it on different dates. Under the Act, there is a provision for the formation of State Consumer Protection Councils and National Consumer Protection Council. There is a provision for the establishment of three tier redressal machinery known as National Consumer Disputes Redressal Commission i.e. National Commission, the State Consumer Disputes Redressal Commission known as State Commission and the District Consumer Disputes Redressal Forum known as District Forum.

In Himachal Pradesh, the State Government has established the State Commission and a District Forum in the first instance with its headquarters at State Capital Shimla which started functioning w.e.f. 01.11.1989 and also the H.P. State Consumer Protection Council was formed. The posts were created in the Department of Food and Supplies, Himachal Pradesh and Director Food and Supplies, being the Head of Department filled up all these posts.

In the lone District Forum, at Shimla, staff was provided by the Director Food and Civil Supplies, H.P. The First President of State Commission was Mr. Justice V. P. Gupta a retired Judge of Himachal Pradesh High court. There were two whole time Members. The male Member was Mr. Hem Chand , a retired I.A.S. Officer and the other was the Female Member Mrs. Devendera Kumari from Chamba. At that time the peculiar jurisdiction of the District Forum was up to 1 lac and that of the State Commission was from 1 lac to 5 lacs. Mr. Justice V. P. Gupta assumed the charge on 01.11.1989 and retired after attaining the age of 65 years on 24.01.1991.

The State Government then appointed Mr. Justice D. P. Sood, a sitting Judge of High Court of Himachal Pradesh as its President in addition to his own duties as a Judge of the High Court. The Member Mrs. Devendera Kumari resigned .After the resignation of Mrs. Devendera Kumari, Mrs. Subh Mahajan was appointed as Member of the State Commission. After the 2 year tenure of Mr. Hem Chand as its Member , Mr. V. Verma, a retired Secretary, Vidhan Sabha was appointed as its Member. During the year 1992, Mr. Justice R. B. Mishra, a retired Judge of Supreme Court of India was appointed as President of the State Commission. Thereafter in 1993, the State Government appointed Mr. Justice S. K. Seth, a retired Chief Justice of the High Court of Himachal Pradesh as President, State Commission. During March, 1995, the State Government established two more whole time District Forums one at Mandi and the other at Kangra at Dharamshala in addition to one at Shimla which was already functioning as whole time District Forum. The Jurisdiction of these District Forums was notified as under:

Shimla District Forum: Shimla, Solan, Sirmaur and Kinnaur Districts.

Mandi District Forum: Mandi, Kullu, Lahaul Spiti, Bilaspur Hamirpur

and Una Districts.

Kangra District Forum, at Dharamshala: Kangra , Chamba and Una Districts.

The State Government during the year 1997, set up another whole time District Forum, at Una with its jurisdiction for the Districts of Una, Hamirpur and Bilaspur. With the opening of this District Forum, the jurisdiction of all the whole time District Forums, is as under:-

Shimla District Forum: Shimla, Solan, Sirmaur and Kinnaur Districts.

Mandi District Forum: Mandi, Kullu, and Lahaul Spiti Districts.

Una District Forum: Una , Hamirpur and Bilaspur Districts.

Kangra District Forum at Dharamshala: Kangra and Chamba Districts.

State Commission for Protection of Child Rights

The state set up a commission for Protection of Child-Rights on dated April 24, 2013 to ensure that the rights of children are not infringed upon or exploited. The first chairperson of the commission became Ms Shyama Dogra, former member of Central Administrative Tribunal (CAT), with Puja Sharma, Kusum Vohra and Rajinder Kumar as members. There is provision for two more members of the commission. As per the Central Act under which the commission had been set up, at least two members should be women. The panel would visit places where children were exposed to exploitation and jails to see the condition of children of prisoners. The panel had powers to take *suo moto* notice of new reports regarding violation of rights of children and take action against the defaulters.

The commission would also examine the complaints of mental and physical torture of children. The statutory body has been set up on the analogy of the National Commission for Protection of Child Rights, constituted in 2007, under the commission for Protection of Child Rights Act, 2005.

The function of the commission is to:

- Examine any law or constitutional provisions to ensure that the safe-guards of the law protect child rights

- Provide the state government with recommendations to improve correct the safeguards

- Inquire into child rights violations

- Examine the risk factors for children affected by terrorism, communal violence, riots, natural disasters, domestic violence, HIV/ AIDS, trafficking, maltreatment, torture and exploitation, pornography, and prostitution and recommend appropriate remedial measures

- Look into the special care and protection of children from distress, marginalised and disadvantaged backgrounds

- Study and ensure implementations of child rights treaties

- Conduct research in the field of child rights

- Create awareness through various mediums

- Inspect any children's home or observations homes where children have been detained

- Inspect any juveniles custodial home, or place of residence or institution for children, under the control of the central government or any other authority and take up with authorities for remedial action.

- Inquire into complaints and take suo motu notice of matter relating to deprivation and violation of child rights or on implementation of laws providing for protection and development of children or on compliance of policy decisions, guidelines or instructions to ensure welfare of the children.

10

State Politics & Political History
(1948 -Till Date)

In 1948, the people of Himachal launched struggle for democratic rule in the state. This led to the passage, in September 1951, of the Government the Part 'C' States Act, by which responsible government of a limited character was installed in Himachal Pradesh along with some other Part 'C' States, under a Lieutenant Governor. Elections to the 36 member Legislative Assembly created under the new Act were held in November 1951. The Indian National Congress Party won 24 seats and the first popular ministry headed by Dr. Yashwant Singh Parmar was sworn in on March 24, 1952. A little earlier, on March 1, 1952, the Chief Commissioner was replaced by a Lieutenant Governor. Major Gen. (Ret.) M.S. Himmat Singhji who was made first Lieut. Governor. The two Ministers, Pandit Padam Dev and Gauri Prasad were also sworn in while Pandit Jaiwant Ram was elected the first Speaker of Himachal Pradesh Legislative Assembly. Mr. K. L. Mehta (I.C.S.) was made the first Chief Secretary of the state in March 1952. Shri Padam Dev was made Home Minister and Shri Gauri Prasad was given the portfolio of Public Works. Other departments were kept by Dr. Y.S. Parmar with him. The first Vidhan Sabha had following members.

On 1st July 1954, the part 'C' state of Bilaspur (1167 sq Km.) was merged with Himachal Pradesh as the 5th district namely; Bilaspur. Because of its merging, the total area of Himachal increased to 28,185 sq km. On 1st July, 1954, when the union territory of Bilaspur was merged with Himachal Pradesh, it was converted into a district with Bilaspur and Ghumarwin as its tehsils. The States Reorganization Commission 1956, by a majority verdict, recommended the integration of Himachal with Punjab, but its Chairman, Justice Fazil Ali, desired it to be kept separate for development purposes for some years. The Union Government allowed the state to continue as a separate entity but its assembly was abolished and it became a Union Territory. From November 1, 1956 onwards Himachal remained a union territory under an Administrator, designated as Lieutenant Governor till 1st July 1963, when democratic set up was restored and a popular ministry reinstalled. On 1st May 1961 the district of Kinnaur was created comprising the erstwhile Bushahar State. Lahaul and Spiti, two different geographical units beyond Rohtang and Kunzum Passes bordering Tibet were merged to form a new district in 1960. It was part of Kangra district of Punjab then.

On 1st May 1960, Mahasu district was reduced in size when Kinnaur district was carved out of Chini tehsil and by including 14 villages of Rampur tehsil.

Himachal As Union Territory

On 1st November, 1956 Himachal became Union Territory under an Administrator designated Lieutenant Governor and first occupant of this post was, Raja Bajrang Bahadur Singh of Bhaduri. It was a great set back to democracy. The legislative assembly was replaced by territorial council. Karam Singh Thakur headed the territorial council, which was formed on 15th August, 1957.

The then home minister of India Shri Lal Bahadur Shastri, spoke in Parliament on the democratization process and strongly recommended the popular governments in all centrally administered territories. Consequently in 1963 democratic setup was restored to Himachal Pradesh under the Territorial Council, elected on universal adult suffrage in 1962 and was converted into Legislative Assembly.

2. Shri Mohan Lal Aukta (Chopal) was elected in the by-election held in November, 1963 after the demise of Shri Arjun Singh.

3. Shri Hitender Singh Thakur (Sangrah) vacated his seat by resigning in favour of Dr. Y.S. Parmar, Chief Minister who was then not the Member of the Assembly- Dr. Parmar was therefore, elected from Sangrah in the by-election.

4. Smt. Subhadra Amin Chand and Shri Balwant Singh Negi were nominated to the Legislative Assembly.

Abbreviations: *Ind.= Independent, Cong.= Congress, SWAT= Swantara Party , CPI(M)= Communist Party of India (Marxist).*

Dr. Parmar was once again made the Chief Minister of Himachal Pradesh along with two ministers namely, Karam Singh and Hari Das on 1st July 1963. The Ministry formed, had following ministers with portfolios.

Dr. Yashwant Singh Parmar; Chief Minister: General Administration, Home & Vigilance, Planing, Education & Welfare, P.W.D., Power, Public Relations, Tourism, Cooperation, Panchayats, Agriculture and Animal Husbandry.

Shri Karam Singh; Revenue Minister: Revenue, Finance, Excise & Taxation, Law, Local self government, Elections, Medical and Public Health.

Shri Hari Das; Development Minister: Development, Industries, Transport, Forests and Civil Supplies.

Reorganization of Punjab

The question of the reorganization of Punjab on linguistic basis cropped up in 1965. The Punjab hill areas having received only a scant regard for their needs from the plains oriented Government and looking with admiration at the progress made by Himachal on account of its having the advantage of its own Government the people of Punjab hill areas strongly demanded their integration with Himachal. The state reorganization commission while creating two sperate states vis Punjab and Haryana decided to merge Punjab hill areas of districts of Kangra, Shimla, Kullu and Lahaul-Spiti, Nalagarh area of Ambala district, parts of Una tehsil of Hoshiarpur district, and of Pathankot tehsil of Gurdaspur district. The integration came about on November 1, 1966, and Himachal's area increased to 56,019 sq km.

On the integration of Punjab hill areas, all the MLAs representing the Hill areas of Punjab Vidhan Sabha were declared the members of the Himachal Vidhan Sabha, in January, 1967 and two more Ministers, Lal Chand Prarthi and Bakshi Pratap Singh from new areas of Himachal were admitted into the existing 3 members cabinet of Dr. Y. S. Parmar. On the merger of Punjab Hill areas the ministry was expanded and it gained the strength of 5 ministers.

In 1967, the state went to polls for 60 seats of legislative assembly, while 3

more members had to be nominated thus making a total of 63 seats. The election results were absolutely on expected lines. The party position in the Vidhan Sabha was: Congress 37, Jan Sangh 7, CPI 2, and Independents 17 (as against this the party wise position in the next election on July 15, 1970 was: Congress (R) 43, Jan Sangh, CPI 2, and independents 10.

Shri Karam Singh Finance, PWD & MPP Law.

Shri Padam Dev; Forest Minister: Forest, Industries, Elections.

Shri Vidya Dhar; Deputy Minister: Welfare (attached with Revenue Minister), Public Works, Multipurpose Projects and Power (attached with Finance Minister) and Elections (attached with Forest Minister).

On January 24, 1968, the Himachal Pradesh Legislative Assembly passed a unanimous resolution which stated : "This house earnestly feels that it is high time for Himachal Pradesh to be recognized as a full fledged state and to that end, it strongly urges that the Central leadership and the Union Government concede the demand of the Pradesh for statehood by bringing about the necessary legislation without further loss of time." The demand of various political parties was appreciated by the union parliament and leaders of all political parties voiced their consent in favor of complete statehood to Himachal Pradesh. On July 31, 1970, the Prime Minister Mrs. Indira Gandhi made a declaration in the Parliament that Himachal would be granted statehood at the earliest. This was widely hailed not only in Himachal Pradesh but also elsewhere.

This was the period when political parties were voted to power merely on the issue of popularity and affiliation, rather than on ideological standing. The Indian National Congress took best advantage of this situation as it was thought to be the sole crusader of India's Independence. The myth which was exploited by the successive leadership of the Indian National Congress all over the country. Mahatma Gandhi wanted to disband the Congress party after independence, but Jawahar Lal Nehru wanted to retain this party as legacy of freedom struggle. The political aim of Jawahar Lal Nehru Prevailed over the nationalistic wisdom of Mahatma Gandhi. In the following decades country paid very heavy price of this distorted and misleading fact. Every single Indian was part of freedom movement, run under the leadership of Indian National Congress Party from 1885 to 1947, despite their being of

different ideology and opinion. Because the sole objective at that time was freedom from colonial yoke and not the political power for governance. The slogan of *pioneer organisation* of freedom movement was used by the leaders of Indian National Congress to scuttle democracy in India since its early phase of post independence period. The hollowness of Indian Nation Congress was exposed in the fact that majority of Princely rulers joined Indian National Congress after independence and for which they were handsomely rewarded with political patronage in one or other form. The uneducated and innocent masses could never see through the game of Congress leadership, which slowly emerged as a dynastic organisation.

On 18th December, 1970 the union Parliament passed the bill namely the State of Himachal Pradesh Act, which was introduced in the Parliament on July, 31st, 1970 to elevate the status of Himachal Pradesh to a full-fledged State. It was under the dynamic leadership of the then Prime Minister Mrs. Indira Gandhi that the status of full statehood was bestowed upon Himachal Pradesh. While inaugurating the historic Statehood function she unveiled a marble plaque by pushing button at a colossal attended public function held on the historic Ridge Shimla on 25th January, 1971 amidst divine showering of snow flakes (snow fall) and multitudinous thrilling mass. The first Governor of Himachal Pradesh Mr. S. Chakravarti sworn in the first Chief Minister of the full-fledged state Dr. Yashwant Singh Parmar. With this Himachal Pradesh emerged as the 18th State of the Indian Union. It also brought to close that prolonged period of perpetual struggle that had started in the middle of 20th century. On gaining statehood the old ministry continued to function till the next general election.

The period from 1971 to 1976 was a period of political dominance of Congress party at the state as well as at the national level. In 1972 Vidhan Sabha election the Indian National Congress got 53 seats, Bhartiya Jan Sangh 5, Independents and others 10. In the 68 Vidhan Sabha the Indian National Congress got 3/4 majority, as there was hardly any opposition to the INC at that time from any national or regional political outfits. The Indian National Congress had projected itself as the only well wisher of masses in general and SC/ST's in particular. This was the time when Congress party had started playing caste and communal card to gain votes, as in other parts of the country some new formations had started making roots to challenge the supremacy of the Congress party. The problem from within for congress party was also gaining strength day by day.

Parmar, Congress(Renuka); (69)Shri Zalim Singh (SC), Congress, Pachhad)

Note: *1. Smt Vidya Stokes was elected in the by-election held in 1974 after the death of her husband Shri Lal Chand Stokes from Theog Constituency.*

After 1972 election 8 member ministry was sworn in along with Dr. Y.S. Parmar as Chief minister and later on two Parliamentary secretaries were also included. The ministers were-

Dr. Yashwant Singh Parmar; Chief Minister: General Administration (including Confidential, Cabinet, Parliamentary Affairs and Border), Home & Personnel (including Appointments, Secretariat Administration, Administrative Reforms and Vigilance), Planning, Finance (including Treasuries, Economic Affairs and Local Audit), University Education and Technical Education, Public Relations, Horticulture, MPP & Power.

Shri Ram Lal Thakur; Public Works Minister: PWD, Transport, Tourism, Law, Elections.

Shri Des Raj Mahajan; Education Minister: Education (including Youth Welfare excluding University Education & Technical Education), Revenue, Rehabilitation, Welfare (including Social Welfare & Prisons), Community Development and Panchayats.

Shri Lal Chand Prarthi; Forest Minister: Forest, Industries, Excise & Taxation, Local Self Government, Housing and Arts, Language & Culture.

Dr. Salig Ram; Agriculture Minister: Agriculture, Animal Husbandry, Fisheries, Civil Supplies Cooperation, Health & Family Planning.

Shri Hardyal; Minister of State for Welfare: (including Social Welfare and Prisons), Community Development, Panchayats (attached with Education Minister).

Shri Mansa Ram; Minister of State for Industries: Industries, Local Self Development and Arts, Language & Culture (attached with Forest Minister).

Smt. Sarla Sharma; Minister of State for Civil Supplies: Civil Supplies, Cooperation, Health & Family Planning (attached with Agriculture Minister).

Chief Parliamentary Secretary & Parliamentary Secretary appointed and Portfolios allotted on 20.9.1972

Shri Babu Ram Mandial; Chief Parliamentary Secretary: Parliamentary Affairs & Planning (attached with Chief-minister) and Transport (attached with P.W.D. Minister).

Shri Kishori Lal Tadu; Parliamentary Secretary: Parliamentary Affairs & Public Relations (attached with Chief-minister) and Industries (attached with Agriculture Minister).

At this time the political scene at national level became very turmoil because central Government under Indira Gandhi suffered a set back on account of adverse judgement of Allahabad High Court against her. In 1975 Mrs. Indira Gandhi imposed Internal emergency and put all opposition leaders in jail. The emergency continued for 19 months. However, the emergency proved to be boon in disguise as it brought discipline and a genuine sense of responsibility in the Government functionaries. Strikes became outdated and files started moving fast banishing red tapism etc. On 7th June, 1975, a cabinet

reshuffle was made and in all nine member new ministry was installed. This step was taken to streamline the administration as Congress party was under serious threat from within at National level. Price rise and hoarding were increasingly creating resentment among people in the state as well. The new ministry had following members.

Dr. Yashwant Singh Parmar; Chief Minister: General Administration (including Cabinet, Parliamentary Affairs and Border), Home & Personnel (including Appointments, Secretariat Administration, Administrative Reforms and Vigilance), Planning, Finance (including Treasuries, Economic Affairs and Local Audit), University Education and Technical Education, Public Relations, Horticulture and Forest.

Shri Ram Lal Thakur; Public Works Minister: PWD, Health & Family Planning, Tourism, MPP & Power and Excise & Taxation.

Shri Des Raj Mahajan; Revenue Minister: Revenue, Transport, Rehabilitation, Civil Supplies, Elections and Law.

Shri Lal Chand Prarthi; Agriculture Minister: Agriculture, Animal Husbandry & Fisheries, Industries, Irrigation, Housing and Ayurveda.

Shri Hardyal; Minister of State for Education: Education & Panchayats (Ind. Charge), Law (attached with Revenue Minister), Arts, Language & Culture (attached with Agriculture Minister).

Shri Mansa Ram; Minister of State for Welfare: Welfare (including Social Welfare and Prisons) Cooperation (Ind. Charge), Irrigation, Agriculture, Animal Husbandry and Fisheries (attached) with Agriculture Minister).

Smt. Sarla Sharma; Minister of State for Community Development: Community Development & Local Self Government (Ind. Charge), Health & Family Planning (attached with Public Works Minister) and Industries (attached with Agriculture Minister).

Shri Babu Ram Mandyal; Chief Parliamentary Secretary: Parliamentary Affairs, Planning, Forest (attached with Chief-minister), Tourism (attached with PWD Minister).

Shri Kishori Lal Tadu; Parliamentary Secretary: Parliamentary Affairs, Public Relations (attached with Chief-minister), Civil Supplies and Transport (attached with Revenue Minister).

The 20 point programme for the welfare of the general masses was taken with all earnestness. The state, to some extent, witnessed a virtual transformation by the year 1976, when it stood on the threshold of self-sufficiency in food production, etc. But various restrictions imposed on the fundamental rights annoyed the people at large. The period of internal emergency is known as dark period of Indian democracy, as people were made to suffer in different ways. Civil liberties were curtailed, high-handedness by Government official was the order of the day, *family planning* was forced on, irrespective of the age of couples, traders and businessman were put in jail on petty pretexts, *bhoodan scheme* was implemented forcefully to take

away land from agriculture farmers and distributed to scheduled castes and tribes irrespective of the land share the original owner had. On 22nd April 1977, Dr. Y.S Parmar resigned and Mr. Ram Lal Thakur was made the Chief minister. The new ministry had following members.

Shri Ram Lal; Chief Minister: General Administration (including Confidential, Cabinet, Parliamentary Affairs and Border), Home & Personnel (including Appointments, Secretariat Administration, Administrative Reforms and Vigilance), Planning Public Relations and Cooperation.

Dr. Salig Ram; Public Works Minister: PWD, MPP & Power, Health & Family Welfare (including Medical Education).

Shri Karam Singh; Finance Minister: Finance (including Treasuries, Economic Affairs and Local Audit), Tourism, University, College and Technical Education and Houses.

Shri Des Raj Mahajan; Revenue Minister: Revenue, Rehabilitation, Food & Supplies and Law.

Shri Lal Chand Prarthi; Industries Minister: Industries (including Printing & Stationery), Labour, Employment and Training, Arts, Language & Culture and Ayurveda.

Shri Sukh Ram; Agriculture Minister: Agriculture, Horticulture, Animal Husbandry and Irrigation.

Shri Thakur Sen Negi; Forest Minister: Forest Farming & Environmental Conservation, Local Self Government, Elections and Fisheries.

Smt. Sarla Sharma; Minister of State for Rural Integrated Development: (Ind. Charge), Local Self Government (attached with Forest Minister).

Shri Vidya Dhar; Minister of State for Welfare: Welfare (including Social Welfare & Prisons) Independent Charge) Public Works Department (attached with Public Works Minister).

Shri Hardyal; Minister of State for Education: Education, (excluding University, College & Technical Education) (Ind. Charge), University, College & Technical Education (attached with Finance Minister).

Shri Guman Singh Chauhan; Minister of State for Transport: (Ind. Charge), Horticulture (attached with Agriculture Minister)

Shri Lekh Ram; Minister of State for Panchayat: (Ind.. Charge), Health & Family Welfare (including Medical Education) (attached with PWD Minister).

Shri Vikram Singh Katoch; Minister of State for Excise and with Chief Minister).

Shri Mehnga Singh; Deputy Minister: Agriculture and Irrigation attached with Agriculture Minister).

Shri Sunder Singh; Deputy Minister: Revenue (attached with Revenue Minister) and Housing (attached with Finance Minister).

Smt. Chandresh Kumari; Deputy Minister: Tourism (attached with Finance Minister) and Public Relations (attached with Chief Minister).

Shri Babu Ram Mandyal; Chief Parliamentary Secretary: Parliamentary Affairs (attached with Chief Minister), Industries (including Printing & Stationery) and Labour, Employment & Training (attached with Industries Minister).

Shri Sita Ram; Parliamentary Secretary: Parliamentary Affairs (attached with Chief Minister) Food & Supplies (attached with Revenue Minister), Ayurveda (attached with Industries Minister). In Himachal president rule was imposed for the first time from 30th April 1977 to 22nd June 1977. The atrocities committed by Congress party at National and State level, made people aggressive against the ruling party. As a result, in 1977 elections, Congress party was defeated and Janta government came into power with Morarji Desai as the Prime-minister of India and Shanta Kumar as Chief Minister of Himachal Pradesh. The Janta party was voted to thumping majority having won 54 seats out of total of 68 seats. The Indian National Congress had secured only 9 seats while 5 seats went to independent candidates.

On June 24th 1977 State Governor Mr. Aminuddin Ali Ahmad Khan administered the oath of office to the first non-Congress Government, under the Chief-ministership of Mr. Shanta Kumar. The new ministry had following members.

Shri Shanta Kumar; Chief Minister: General Administration (including Confidential & Cabinet, Parliamentary Affairs and Border), Home & Personal (including Appointments, Secretariat Administration, Administrative Reforms and Vigilance), Planning, Finance (including Treasuries Economic Affairs and Local Audit) Public Relations and University Education.

Shri Kishori Lal; Public Works Minister: P.W.D., MPP and Power, Tourism, Health & Family Welfare (including Medical Education), Ayurveda, Irrigation.

Shri Jagdev Chand; Revenue Minister: Revenue, Excise and Taxation, Transport, Elections and Welfare.

Shri Daulat Ram Chauhan; Industries Minister: Industries Labour, Employment and Training, Education, Technical Education, Local Self Government, Arts, Language & Culture and Horticulture.

Shri Devi Singh; Forest Minister: Forest Farming and Environmental conservation, Rural Integrated Development, Tribal Development, Cooperation and Prisons.

Shri Bachittar Singh; Agriculture Minister: Agriculture, Animal Husbandry, Fisheries and Housing.

Kumari Shyama Sharma; Minister of State for Panchayats: Panchayats, Food and Supplies and Law.

Immediately after coming to power, Janta Government faced credibility crisis and serious charges of corruption and nepotism were labelled against the ministers. After the debacle of 1977, Congress party faced another division and now Indian National Congress became non exist. Mrs. Indira Gandhi formed a new party and named it Congress (Indira) with hand as its election symbol. In 1979 Shanta Kumar reshuffled his cabinet. The new ministry was as follows-

Shri Shanta Kumar; Chief Minister: General Administration, Home & Personnel, Finance, Antodaya, Public Works Department (Irrigation & Public Health) Planning and Tourism).

Shri Daulat Ram Chauhan; Industries Minister: Industries, Agriculture, Horticulture, Animal Husbandry, Fisheries, Local Self Government, Printing & Stationery.

Shri Jagdev Chand; Revenue Minister: Revenue, Public Works Department (Building and Roads), MPP & Power, Transport and Welfare.

Shri Sarvan Kumar; Health & Family Welfare Minister: Health & Family Welfare, Ayurveda and Excise & Taxation.

Shri Roop Singh Thakur; Forest Minister : Forest, Mining and Environmental conservation, labour, Employment & Training and Law.

Shri Shiv Kumar; Education Minister: Education (including University Education) Technical Education, Election, Arts, Language and Culture.

Shri Roop Singh ; Minister of State for Public Relations: Public Relations and Housing.

Shri Kunj Lal Thakur; Minister of State for Rural Integrated Development: Rural Integrated Development and Tribal Development.

Shri Gulab Singh; Minister of State for Panchayats and Prisons: Panchayats and Prisons.

Shri Sadhu Ram; Minister of State for Food and Supplies: Food and Supplies.

Shri Nagin Chander Pal; Minister of State for Cooperation: Co-operation.

In 1980 Lok-Sabha elections Congress (I) won all four seats and this victory of the congress party proved last nail in the coffin of Janta Party Government in the state. The politics of defection transformed the fortune of 9 member Congress party to emerge as a ruling Junta under the Chief-ministership of Thakur Ram Lal. Janta Government lasted for 30 months. After the fall of Janta Government and mass scale defection, Thakur Ram Lal formed government with two ministers Shri Shiv Kumar and Shri Hardyal on 23rd February 1980. The Government remained in power till 1982. The ministry was as follows-

Shri Ram Lal Thakur; Chief Minister: General Administration, Home, Personnel, Finance, Antodaya, Public Works (including Building and Roads, Public Health and Irrigation), Planning, Tourism, Industries, Agriculture,

Horticulture, Animal Husbandry, Local Self Government, Printing & Stationery, Multipurpose Projects and Power, Transport, Welfare, Labour Employment and Training, Elections, Public Relations, Housing, Rural Integrated Development, Tribal Development, Panchayats and Prisons.

Shri Shiv Kumar; Education Minister: Education (including University Education), Technical Education, Arts, Language and Culture, Cooperation, Food and Supplies, Health & Family welfare and Ayurveda.

Shri Hardyal; Forest Minister: Forest, Farming and Environmental Conservation, Revenue, Excise & Taxation and Law.

In 1982 Vidhan Sabha elections, a number of MLAs who were elected on Janta Party ticket in 1977 joined the Congress (I). The prominent among them were—Daulat Ram Sankhyan, Ranjeet Singh Verma, Vijay Joshi, Ram Nath Sharma, Thakur Kaul Singh, Yog Raj, Pt. Shiv Kumar and Sujan Singh Pathania. Thakur Gulab Singh and Moti Ram contested as independent. The 1982 election was fought more on political allegations rather on real issues related to common man. In the election, Janta Party was replaced by Bhartiya Janta Party. Out of 68 seats, Congress (I) won 31, B.J.P. 29, Independent 6 and Janta Party, 2. In the political history of the state, it was the first occasion when independents played an important role in the formation of the Government. Congress (I) had majority in the Centre, so it was successful in convincing the independents in its favour. Thakur Gulab Singh, Mansa Ram and Gangu Ram Mussafir joined Congress party.

Note: *1. Shri Vir Bhadra Singh replaced Thakur Ram Lal as Chief Minister (the former took over the Governorship of Andhra Pradesh) and was elected from Jubbal-Kotkhai Constituency in the by-election thus caused.*

2. Shri Natha Singh and Shri Kishori Lal were also elected in the election from Dharampur and Banikhet Constituencies at the demise of Shri Bhikham Ram and Shri Des Raj Mahajan respectively.

After the fall of Janta Government at the centre all political parties who had come together to form this new party, opted for their independent existence. The Bhartiya Jan Sangh now became Bhartiya Janta Party, under the able leadership of Shri Atal Bihari Vajpayee and Lal Krishan Advani. Mr. Vajpayee became the first President of the party in 1980. In Himachal Pradesh Shri Shanta Kumar and Shri Jagdev Chand Thakur were the top brass of the party.

The Bhartiya Janta Party is the most prominent member of the family of organisations known as the "Sangh Parivar" and nurtured by the Rashtria

Swyamsevak Sangh (RSS). Like the RSS, the BJP is wedded to India's unity and integrity, its intrinsic identity and the social strength, individual character and cultural uniqueness that have been the hallmark of this great country and its people for millennia.

History is the philosophy of nations. And the Sangh Parivar has a very clear and clean conception of Indian history. Here was a great civilization whose influence and imprint spread from Sri Lanka to Tibet, from Southeast Asia to Central Asia, from one end of the Indian Ocean to the other. It weathered the storms of invaders, from the Greeks to the Huns, from the Shakas to the Islamic armies of Turks and Afghans. It fought and resisted external oppression and its essential civilization and culture survived great challenges and attempts at effacement. The glory of Vijayanagara and the heroism of Maharana Pratap, of Shivaji and of Guru Govind Singh are testimony to the Indian spirit. In more recent times this torch of nationalism and Indian identity was carried forward by Swami Dayanand and Swami Vivekanada. And in the 20th century the good work had been carried on by Sri Aurobindo, Lokmanya Tilak, Mahatma Gandhi and others. The RSS, founded by Dr K.B. Hedgewar in 1925 and consolidated by Shri Guruji M.S. Golwalkar after 1940, sees itself as the legatee of this heroic tradition. It believes in the principle of: *"Justice for all and appeasement of none"*. It has no doubt about Hindu identity and culture being the mainstay of the Indian nation and of Indian society. This identity and this culture informs all Indians, irrespective of religious or denominational faith. To the RSS, all Indians, irrespective of religious background, notwithstanding their mode and place of worship, are equal.

After the gap of 30 months Congress (I) returned to power on 23rd February 1982, under the Chief-ministership of Mr. Ram Lal Thakur. This was the largest ever ministry with 16 members and one Chief Parliamentary Secretary. The member were-

Shri Ram Lal Thakur; Chief Minister: General Administration, Home, Personnel, Finance, Science and Technology and Technical Education, Vocational and Industrial Training, University Education.

Shri Sukh Ram; Public Minister: Public Works (including Building and Roads, Public Health and Irrigation), Multi Purpose Projects and Power and Housing.

Shri Shiv Kumar; Industries Minister: Industries, Labour and Employment, Printing and Stationery, Tourism, Transport.

Shri Desh Raj Mahajan; Transport Minister: Transport, Elections, Law, Youth Services and Welfare.

Shri Guman Singh Chauhan; Agriculture Minister: Agriculture, Horticulture and Fisheries.

Shri Sat Mahajan; Revenue Minister: Revenue, Planning, Implementation of New 20 Point Programme and Public Relation.

Shri Devi Singh; Forest Minister: Forest Farming and Environmental

Conservation, Soil Conservation and Tribal Development.

Shri Sant Ram; Education Minister: Education (excluding University Education), Arts, Language and Culture, Rural Integrated Development.

Shri Rangila Ram Rao; Minister of State for Excise and Taxation: Excise and Taxation, Animal Husbandry, Law (Independent Charge) and Rural Integrated Development (attached with Education Minister).

Shri Daulat Ram Sankhyan; Minister of State for Food and Supplies: Local Self Government (Independent Charge) and Building and Road (attached with Public Works Minister).

Shri Gulab Singh Thakur; Minister of State for Cooperation: Cooperation, Welfare (Prisons) (Independent Charge) and Education (attached with Education Minister)

Shri Mansa Ram; Minister of State for Welfare (Social Welfare): Panchayat (Independent Charge) and Youth Services and Welfare (attached with Transport Minister).

Shri Gangu Ram; Deputy Minister: Forest Farming and Environmental Conservations (attached with Forest Minister) and Industries (attached with Industries Minister).

Shri Moti Ram; Deputy Minister: Agriculture (attached with Agriculture Minister) and Transport (attached with Transport Minister).

Shri Dharam Singh; Deputy Minister: Soil Conservation (attached with Forest Minister) and Public Health and Irrigation (attached with Public Works Minister.

Shri Hans Raj Akrot; Deputy Minister: Horticulture (attached with Agriculture Minister) and Implementation of New 20 Point Programme (attached) with Revenue Minister.

Shri Vijayendra Singh; Chief Parliamentary Secretary.

But very soon Chief-minister, Ram Lal Thakur had to face very serious charges of corruption on account illegal forest fellings by his close relatives. The then prime-minister of India Mrs. Indira Gandhi took serious note of this and recommended the name of Mr. Vir Bhadra Singh, member Lok Sabha, as the next Chief Minister. He took over on 8th April 1983. The new ministry had only seven members. The were-

Shri Vir Bhadra Singh; Chief Minister: Animal Husbandry, Cooperation, Education, Finance, General Administration, Health and Family Welfare, Home, Industries, Labour, Employment and Training, Local Self Government, Language & Culture, M.P.P. and Power, Personal, Panchayats, Parliamentary Affairs, Printing and Stationery, Public Relation, Science & Technology.

Shri Sukh Ram; Public Works Minister: Public Works (Building and Roads), Housing, Excise & Taxation.

Shri Sant Ram; Rural Development Minister: Rural Development, Public Works (Public Health and Irrigation), Elections.

Shri Guman Singh Chauhan; Agriculture Minister: Agriculture,

Horticulture, Fisheries, Law & Legal Remembrances's Office.

Shri Shiv Kumar; Revenue Minister: Revenue, Planning, Implementation of New 20 Point Programme.

Shri Sat Mahajan; Transport Minister: Transport, Tourism, Food Supplies.

Shri Devi Singh; Forest Minister: Forest, Farming and Environmental Conservation, Soil Conservation and Tribal Development.

Mr. Ram Lal Thakur, the out going Chief Minister was appointed, governor of Andhra Pradesh. There he dismissed the democratically elected government of Telgu Desham Party (TDP) headed by Mr. N.T Rama Rao. When Mr. Rama Rao was abroad for treatment, the governor supported the group led by Mr. Chander Babu Naidu, the son-in-law of Mr. Rama Rao to create defection and formed the government. This was the first instance in the political history of independent India when a Chief minister was over thrown while he was having absolute majority in the house. In 1985 elections to state assembly, Congress (I) returned to power under the leadership of Mr. Vir Bhadra Singh in the state and Rajiv Gandhi as Prime Minister at the centre.

HIMACHAL PRADESH VIDHAN SABHA – 1985

Shri Ram Lal Thakur; Minister of State for Law: Youth Services and Sports (Ind. Charge), Law and Legal Remembrance's Office (Ind.. Charge), Local Self Government and Ayurveda (Ind. Charge).

The period from 1980 to 1991 was the period of great turmoil and instability in Indian politics. The problem of terrorism was taking heavy toll all over the country. Mrs. Indira Gandhi was assassinated by her own Sikh security guards in New Delhi on 31st October 1984. After the gap of seven years, Mr. Rajiv Gandhi was killed in Tamilnadu by a suicide bomber, while on his way to address an election rally at Sriparambadur. Congress (I) remained in power from 1985-90 in the state with thumping majority. During this period B.J.P. strengthened its party cadre and exploited the weaknesses of Congress party within and outside the Vidhan Sabha. Mr. Shanta Kumar led a Yatra from Palampur to Shimla, which received overwhelming support. In 1989 Lok-Sabha election, Shanta Kumar won from Kangra seat. In National Politics the period from 1989-91 was the period of political turmoil and treachery.

In the 1990 Vidhan Sabha election, both Mr. Vir Bhadra Singh and Mr. Shanta Kumar contested from two constituencies Mr. Shanta Kumar won from Sulah and Palampur both, while Vir Bhadra Singh lost Jubbal-Kotkhai seat to Mr. Ram Lal Thakur, ex-Chief-Minister and a Janta Dal candidate but retained Rohru seat. In all B.J.P. emerged victorious with 46 seats, followed by Janta Dal 11, Congress (I) 9, C.P.I. and independents one each.

This election is known for *"Shanta Wave"*. Congress stalwarts who lost in this election were J.B.L. Khachi, Sant Ram, Sagar Chand, Asha Kumari, Kaul Singh, Rangeela Rao etc. In the 1990 elections to the state assembly, Bhartiya Janta Party under the leadership of Mr. Shanta Kumar once again came to power. The new ministry had following members:

Shri Shanta Kumar; Chief Minister: General Administration, Personnel, Home, Finance, Public Relation, Irrigation and Public Health, Tourism, All

other Departments not allotted to any other Minister.

Shri Jagdev Chand; Public Works Minister: P.W.D., Housing, Local Self Government and Transport.

Shri Kishori Lal; Industries Minister: Industries, Agriculture, Animal Husbandry, Fisheries and Integrated Rural Development.

Shri Nagin Chander pal; Revenue Minister: Revenue, Excise & Taxation, Elections, Social Welfare and Tribal Development.

Shri Roop Singh; Forest Minister: Forest, Law, Planning, Labour & Employment, Printing & Stationery.

Shri Sadhu Ram; Minister of State for Food & Supplies: Food & Supplies (Ind. Charge), Panchayat (Ind. Charge) and attached with Chief Minister for Irrigation and Public Health.

Shri Vidya Sagar; Minister of State for Health and Family Welfare: Health and Family Welfare (Ind. Charge), Ayurveda (Ind. Charge) and Parliamentary Affairs.

In 1992, the state assembly was dissolved on account of Babri Masjid demolition at Ayodhya in Uttar Pradesh. This was an example of unethical political values being practised in India, because not a single incident of communal violence had occurred in Himachal Pradesh at that time. But the governor of the state Mr.Virender Verma, a hard core Congress man, took this undemocratic action on behalf of ruling Congress party government at the centre. Mr. P.V. Narasimha Rao, the then Prime Minister of India, to save his secular image dismissed all BJP ruled state governments.

The second stint of Mr. Shanta Kumar also lasted two and a half years. But in his second tenure he took certain policy decisions which proved his farsightedness and deep concern for the economic health of the state. The ministry was reshuffled in 1991 and following were made ministers :

Shri Shanta Kumar; Chief Minister: General Administration, Personnel, Home, Finance, Irrigation and Public Health, Tourism, All other Department not allotted to any other Minister.

Shri Jagdev Chand; Public Works Minister: P.W.D., Housing, Local Self Government and Transport.

Shri Kishori Lal; Industries Minister: Industries Agriculture, Animal Husbandry, Fisheries and Integrated Rural Development.

Shri Nagin Chander Pal; Revenue Minister: Revenue, Excise & Taxation, Elections, Social Welfare and Tribal Development.

Shri Roop Singh; Forest Minister: Forest, Law, Planning, Labour & Employment and Printing & Stationery.

Shri Radha Raman Shastri; Education Minister: Education, Art Language & Cultural Affairs, Science & Technology and Technical Education, Youth Services & Sports and Public Relations.

Shri Kunj Lal; Horticulture Minister: Horticulture, Food and Civil

Supplies, Cooperation and Antyodaya.

Shri Sadhu Ram; Minister of State for Panchayati Raj: Panchayati Raj (Ind. Charge), and attached with Chief Minister for Irrigation and Public Health.

Shri Vidya Sagar; Minister of State for Health and Family Welfare: Health and Family Welfare (Ind. Charge), Ayurveda (Ind. Charge) and Parliamentary Affairs (Ind. Charge).

He initiated the process of privatization of power and Transport sector, *No work No pay*, *Kam bhi apna, Gaon bhi apna, Van lagao Roji kamao* and drinking water facility to each census village. To streamline the administration he initiated the step, "Government to the door of each house". Although Shanta's policies and decisions were right infavour of masses and state's prosperity, yet Government employees and leaders within B.J.P. resented his initiatives. Agitation by apple growers, Government employees and groupism within party, all led to anarchy and stagnation in the state. To suppress the growing resentment among people and party cadre the ministry was reconstituted by the Chief Minister in 1992 with following members:

Shri Shanta Kumar; Chief Minister: General Administration, Personnel, Home, Finance, MPP & Power and all other Departments not allotted to any other Minister.

Shri Jagdev Chand ; Revenue Minister: Revenue, Agriculture, Fisheries, Elections and Law.

Shri Kishori Lal; Industries Minister: Industries, Labour & Employment, Printing & Stationery, Planning and Public Relation.

Shri Nagin Chander Pal; Public Works Minister: Public Works, Housing, Local Self Government, Social and Women Welfare and Tribal Development.

Shri Roop Singh; Health and Family Welfare Minister: Health and Family Welfare, Ayurveda and Excise & Taxation.

Shri Radha Raman Shastri; Education Minister: Education, Art Language & Cultural Affairs, Science & Technology and Technical Education, Youth Services & Sports.

Shri Kunj Lal; Horticulture Minister: Horticulture, Animal Husbandry, Tribal Development and Antyodya.

Shri Vidya Sagar; Irrigation & Public Health Minister: Irrigation & Public Health, Parliamentary Affairs.

Shri Dile Ram; Food & Supplies Minister: Food & Supplies and Co-operation.

Shri Desh Raj; Minister of State for Rural Development : Rural Development and Panchayati Raj.

Shri Harbans Singh Rana; Minister of State for Forest Farming & Soil Conservation)

Shri Mohinder Nath Sofat: Minister of State for Tourism: Tourism & Transport.

Shri Roop Dass Kashyap; Parliamentary Secretary: Parliamentary Affairs (attached with IPH Minister), Public Relation (attached with Industries Minister) and Youth Service and Sports (attached with Education Minister).

Smt. Leela Sharma; Parliamentary Secretary: Parliamentary Affairs (attached with IPH Minister), Social & Women Welfare (attached with PWD Minister).

In 1993 elections, Congress (I) again came to power under the leadership of Mr. Vir Bhadra Singh. In this election Congress (I) Party got 52 seats, BJP 8, Independent and others also 8 seats. This election was forced by the Congress led government in the centre, under Mr. P.V Narasimaha Rao, when after demolition of so called Babri Masjid in Ayodhya by kar sewaks of Vishwa Hindu Parishad on sixth December 1992. The then governor of the state dismissed the Shanta Kumar government and imposed president rule in the state. This was the second time when state came under president rule. Second time president rule was imposed from 15 December 1992 to 3rd December 1993, after dismissal of democratically elected government of Shanta Kumar. The election for new assembly held in 1993 and following members were elected.

HIMACHAL PRADESH VIDHAN SABHA – 1993

Total Members – 68

Speaker : Shri Kaul Singh Thakur (67 Darang)

Deputy Speaker – Shri Kuldip Kumar (SC), (29- Gagret)

In Nov. 1995 Sh. Ishwar Das was elected as Deputy Speaker

MEMBERS

(1)Shri Vir Bhadra Singh (Congress (I), Rohru); (2)Shri Sant Ram (Congress (I), Baijnath); (3)Shri Jai Bihari Lal Khachi (Congress (I), Kumharsain); (4)Shri Narain Chand Prashar (Congress (I), Nadaun); (5)Shri Rangila Ram Rao (Congress (I), Gopalpur); (6) Chander Kumar (Congress (I), Guler); (7)Shri Gangu Ram Musaffir (Congress (I), Pachhad); (8)Shri Gulab Singh(Congress (I), Jogindernagar); (9)Shri Man Chand Rana (Congress (I), Sulah); (10)Shri Vidya Dhar (Congress (I), (SC), (Rajnagar); (11)Shri Anil Sharma (Congress (I), Mandi Urban); (12)Shri Satya Prakash Thakur (Congress (I), Banjar); (13) Smt. (Congress (I), Jawalamukhi); (30)Shri Kishan Kapoor (BJP), (Dharamshala); (31) Km, Krishna Mohini (Congress (I), Solan); (32)Shri Kuldeep Singh (Ind). (Bhattiyat); (33)Shri Kuldeep Singh Pathania (Congress (I), Bamsan); (34)Shri Kush Parmar (Congress (I), Nahan); (35)Shri Lajja Ram (Congress (I), Doon); (36)Shri Mahinder Singh (Congress (I), Dharampur); (37)Shri Manjit Singh (Ind), (Nadaunta); (38)Shri Mast Ram (Congress (I), Karsog); (39) Dr. Milkhi Ram Goma (Congress (I), (Rajgir); (40)Shri Moti Ram (Congress (I), Chachiot); (41)Shri Nek Ram (Congress (I), Balh); (42)Shri O.P. Rattan (Congress (I), Una); (43)Shri Phunchog Rai (Congress (I), Lahaul-Spiti); (44)Shri Prem Singh (Congress (I), Renuka); (45)Shri Raghu Raj (Congress (I), Kasauli); (46)Shri Raj Krishan Gaur (Congress (I), (Kullu); (47)Shri Rakesh Singha [CPI (M)] (Shimla); (48)Shri Rakesh Verma (BJP), (Theog); (49)Shri Ram Das Malangar (BJP), (Kutlehar); (50)Shri Ram Lal Thakur (Congress (I), Kot-Kehloor); (51)Shri Rattan Singh (Congress (I), Paonta-Doon); (52) Shri Ravinder Singh Ravi (BJP), (Thural); (53)Shri Sat Mahajan (Congress (I), Nurpur); (54)Shri Sher Singh (Congress (I), Sundernagar); (55) Shri Singhi Ram (Congress (I), Rampur); (56)Shri Sujan Singh Pathania (Congress (I), Jawali); (57)Shri Tek Chand (Ind), (Nachan); (58)Shri Thakur Ram Lal (Congress (I), Jubbal-Kotkhai); (59)Shri Thakur Singh (Ind), (Bharmaur); (60) Major Vijay Singh Mankhotia (Congress (I), Shahpur); (61)Shri Vijay Kumar Joshi (Congress (I), Santokhgarh); (62) Shri Vijyendra Singh (Congress (I), Nalagarh); (63) Smt. Viplove Thakur (Congress (I), Jaswan); (64)Shri Virender Kumar (BJP), (Pragpur); (65) Shri Yogendra Chandra (Ind) (Chopal); (66)Shri Jagat Singh Negi, (Congress (I), Kinnaur); (67)Shri Adarsh Kumar (Congress (I), Shimla); (68)Shri Ranjit Singh Bakshi (Congress (I), Nurpur).

Note: *(i) Man Chand Rana died in 1994 and in his place Kanwar Durga Chand was elected in the by-election in1995*

(ii) Dr. Dev Raj Negi was elected from Kinnaur seat but died on 30 October, 1994 and in his place Mr. Jagat Singh was elected in a by-election in 1995.

(iii) Rakesh Singha's election from Shimla was declared illegal and in by- election Adarsh kumar Sood was elected on 6th June, 1996.

(iv) Sat Mahajan got elected to Lok Sabha and so he resigned from Nurpur Seat and Mr. Ranjit Singh Bakshi was elected in his place in October 1996 in a by election.

(v) Smt. Anita Verma was elected in a by-election at the demise of Shri Jagdev Chand who died immediately after the declaration of results.

The demise of Thakur Jagdev Chand was a big set back to BJP in the state in general and Hamirpur segment in particular. He was one of the eight legislators, who were elected to Vidhan Sabha in 1993, yet the first time MLA Mr. J.P Nadda was made leader opposition by BJP by ignoring the natural claim of Jagdev Chand Thakur. This announcement proved fatal for a leader who was full of self-respect and party discipline. He suffered massive heart attack in Shimla and breathed his last there. The demise of Jagdev Chand was a set back to clean politics of the state. His popularity and mass appeal

was acknowledged by the central leadership of the BJP, the day he was cremated on the bank of Hathli Khad in Hamirpur. A sea of followers had accumulated there to bid farewell to their leader, not seen in the history of the state before.

The following were the members of Council of Ministers :

Shri Vir Bhadra Singh; Chief Minister: General Administration, Personnel, Home, Finance, M.P.P. & Power and all other Department not allocated to any other Minister.

Shri Sant Ram; Forest Minister: Forest Farming & Conservation and Excise & Taxation.

Shri J.B.L. Khachi; Public Works Minister: Public Works, Housing and Local Self Government.

Shri Narain Chand Prashar; Education Minister: Education (Primary & Secondary) and Language & Cultural Affairs.

Shri Rangila Ram Rao; Industries Minister: Industries, Parliamentary Affairs and Labour, Employment & Training.

Shri Chander Kumar; Irrigation & Public Health Minister: Irrigation & Public Health, Science & Technology, Technical Education, Vocational & Industrial Training.

Shri Gangu Ram Musafir; Rural Development Minister: Rural Development and Panchayati Raj.

Shri Gulab Singh; Revenue Minister: Revenue and Planning.

Shri Man Chand Rana; Agriculture Minister: Agriculture, Animal Husbandry and Fisheries.

Shri Vidya Dhar; Minister of State for Welfare: Social & Women's Welfare and attached with the Chief Minister for Health & Family Welfare.

Shri Anil Kumar Sharma; Minister of State for Youth Services & Sports : Youth Services & Sports and attached with the Forest Minister for Forest Farming & Conservation.

Shri Satya Prakash Thakur; Chief Parliamentary Secretary (appointed on 29.12.1993): Horticulture (Ind. Charge)

This period of governance is known for high scale corruption in recruitments for government jobs. Hundreds of candidates were appointed without any test and recruitment criteria. Mr. Vir Bhadra Singh reconstituted his ministry in 1995, which had following members :

Shri Vir Bhadra Singh; Chief Minister: General Administration, Finance, Home, Personnel, M.P.P. & Power, Public Relation and Food & Civil Supplies.

Shri Sant Ram; Forest Minister: Forest Farming & Conservation and Excise & Taxation.

Shri J.B.L. Khachi; Public Work Minister :Public Works, Housing and Local Self Government.

Shri . N. C. Prashar; Education Minister : Higher Education and H.P.

University, Language & Cultural Affairs and Printing & Stationery.

Shri . Rangila Ram Rao; Industries Minister : Industries, Parliamentary Affairs and Labour, Employment & Training

Shri .Chander Kumar; Irrigation & Public Health Minister : Irrigation & Public Health, Science & Technology and Technical Education, Vocational & Industrial Training.

Shri . Gangu Ram Musafir; Rural Development Minister : Rural Development and Panchayati Raj.

Shri . Gulab Singh; Revenue Minister : Revenue and Planning.

Shri . Vidya Dhar; Welfare Minister : Social & Women's Welfare and Elections.

Shri . Ram Lal Thakur; Health Minister : Health & Family Welfare.

Shri . Vijay Singh Mankotia; Tourism Minister : Tourism and Law.

Shri . Anil Kumar Sharma; Minister of State for Youth Services & Sports : Youth Services & Sports (Ind. Charge) and attached with Forest Minister for Forest Farming & Conservation

Shri . Satya Prakash Thakur ; Minister of State for Horticulture : Horticulture (Ind. Charge) and Town & Country Planning (Ind. Charge)

Shri . Kuldeep Kumar ; Minister of State for Cooperation : Cooperation (Ind.- Charge) and attached with Education Minister for Higher Education & H.P. University.

Shri . Sujan Singh Pathania; Minister of State for Agriculture : Agriculture (Ind.- Charge).

Shri . Kewal Singh ; Minister of State for Transport : Transport (Ind.- Charge).

Shri . Raghu Raj; Minister of State for Animal Husbandry : Animal Husbandry (Ind.- Charge) and attached with I & PH Minister for Irrigation & Public Health.

Smt. Asha Kumari ; Minister of State for Primary Education :Primary Education (Ind. Charge).

Smt. Viplov Thakur; Minister of State for Ayurveda : Ayurveda (Ind. Charge) and attached with Industries Minister for Industries.

Shri. Phunchog Rai; Minister of State for Tribal Development : Tribal Development (Ind. Charge) and attached with Health Minister for Health & Family Welfare.

To accommodate few more members of the Congress party the post of Parliamentary Secretaries were created in which the following MLAs were made Chief Parliamentary Secretary on October 20, 1995 :

Shri . Brij Bihari Lal Butail ; Chief Parliamentary Secretary: Attached with the Chief Minister for Public Relation Department with Public Works Minister for PWD and Local Self Government.

Shri Kashmir Singh ; Parliamentary Secretary: Attached with the

Chief Minister for MPP & Power and with Industries Minister for Parliamentary Affairs.

Smt. Anita Verma ; Parliamentary Secretary: Attached with the Rural Development& Panchayat Minister for Rural Development and Panchyati Raj Departments and with Industries Minister for Parliamentary Affairs.

Shri Rattan Singh ; Parliamentary Secretary: Attached with the Minister of State for Transport for Transport Department.

Shri Harsh Mahajan ; Parliamentary Secretary: Attached with the I & PH.Minister for Science & Technology and Technical Education, Vocational & Industrial Training.

In 1998 Vidhan Sabha election, Congress (I) won 29, BJP 29 and independents 4. The followings were elected member of Vidhan Sabha.

Note: *1. Mr. Sant Ram (Cong.I) was elected from Baijnath in March 1998, Died on June 30th, 1998. Mr. Dulo Ram was elected in by-election on Ist December 1998.*

2. Smt (Major) Krishna Mohini was unseated by a Supreme Court Judgement dated 26.10.1999. In the by-election Dr. Rajeev Bindal was elected from Solan.

The Congress party forcefully captured independents and put its claim for the Government formation. Mr. Ramesh Chand Dhwala was under the siege of Congress Party for few days. Mrs. V.S. Rama Devi the governor of the state asked Mr. Vir Bhadra Singh to prove his majority in the house. Mr. Vir Bhadra Singh formed a proxy government in the state after the elections. Mr. Ramesh Chand Dhwala, an independent candidate was made to support this government with an understanding that he shall be made a cabinet minister. He constituted his council of minister on 9th March, 1998 with following members:

Shri Vir Bhadra Singh ; Chief Minister : General Administration, Finance, Home, Personnel, Information & Public Relation and all other Departments not allocated.

Shri Sant Ram; Forest Minister Forest, Excise & Taxation.

Shri J.B.L Khachi ; Public Works Minister: Public Works, Housing and Urban Development.

Shri Rangila Ram Rao ; Industries Minister : Industries. Parliamentary Affairs and Labour & Employment.

Shri Chander Kumar ; MPP & Power Minister : MPP and Power, Science & Technology, Technical Education, Vocational and Industrial Training.

Shri Gangu Ram Musafir ; Rural Development and Panchayat Minister : Rural Development and Panchayati Raj.

Shri Gulab Singh ; Revenue Minister : Revenue and Planning.

Shri Ram Lal Thakur ; Health Minister : Health and Family Welfare and Medical Education.

Shri Ramesh Chand Dhwala; Irrigation & Public Health Minister: Irrigation & Public Health, Youth Services and Sports.

Note : *Resignation of Chief Minister Shri Vir Bhadra Singh was accepted from 12.03.1998.*

Mr. Prem Kumar Dhumal, who was heading BJP Legislature party, conveyed the Central leadership and ensured the support of Mr. Ramesh Chand Dhwala, a staunch supporter of Shanta Kumar. BJP formed Government on 26th March, 1998, under the leadership of Prem Kumar Dhumal. After the election to tribal constituencies, the strength of BJP increased to 34. The following were the members :

Shri Prem Kumar Dhumal ; Chief Minister : General Administration, Finance, Home, Personnel and all other Departments not allocated to any other Minister.

Pandit Sukh Ram; Public Works Minister: Public Works and MPP and Power.

Shri Kishori Lal; Industry Minister: Industries, Labour & Employment and Fisheries

Shri Mohinder Singh ; Rural Development & Panchayat Minister : Rural Development. Panchayati Raj & Excise & Taxation.

Shri J.P. Nadda ; Health Minister: Health & Family Welfare and Parliamentary Affairs.

Shri Kishan Kapoor; Transport Minister : Transport and Tribal Development.

Shri Ramesh Chand Dhwala ; Irrigation & Public Health Minister : Irrigation and Public Health.

Shri Mansa Ram; Food & Supplies Minister : Food and Supplies and Social and Women's Welfare.

Shri Prakash Chaudhary; Minister of State for Animal Husbandry : Animal Husbandry (Ind. Charge).

In 1998 elections, Bhartiya Janta Party came into power with slender majority. Mr. Prem Kumar Dhumal became the Chief-minister. The 1998 election were pre-pond a year before the scheduled time. This was a gamble which proved counter productive to Mr. Vir Bhadra Singh. His scheme of early election was encouraged by the results of elections in other parts of the country in favour of Congress party.

While this political drama was being enacted in the state with the constitutional support of the governor Mrs. V. S. Rama Devi, Mr. A. B. Bajpai formed BJP led NDA government at the centre. This was the end of political interest shown by the governor in Mr. Vir Bhadra Singh's government. This proxy government continued from 5th March 1998 to 23rd March 1998.

For 20 days the capital Shimla, was the capital of violence and naked truth of political lust. All means were deployed by the Congress party to ensure

its continuance in power, but failed to negotiate the pressure of minority support. In April, 1998 the ministry was expanded with following members :

Shri Prem Kumar Dhumal ; Chief Minister : General Administration, Finance, Home, Personnel and all other Departments not allocated the any other Minister.

Pandit Sukh Ram; Public Works Minister : Public Works and MPP & Power.

Shri Kishori Lal; Industry Minister : Industries, Labour & Employment and Fisheries.

Shri Mohinder Singh; Rural Development and Panchayat Minister : Rural Development, Panchayati Raj and Excise & Taxation.

Shri J.P. Nadda; Health Minister : Health and Family Welfare and Parliamentary Affairs.

Shri Kishan Kapoor; Transport Minister : Transport and Tribal Development.

Shri Ramesh Chand Dhwala ; Irrigation and Public Health Minister : Irrigation and Public Health.

Shri Mansa Ram; Food and Supplies Minister: Food & supplies and Social & Women's welfare.

Shri Roop Singh Thakur ; Forest Minister : Forest.

Shri Vidya Sagar; Agriculture Minister : Agriculture.

Shri I.D. Dhiman; Education Minister : Education.

Shri Prakash Chaudhary ; Minister of State for Animal Husbandry : Animal Husbandry (Ind. Charge).

Shri Karan Singh; Minister of State for Primary Education : Primary Education (Ind. Charge).

Shri Narinder Bragta; Minister of State for Horticulture : Horticulture (Ind. Charge).

Shri Roop Dass Kashyap; Chief Parliamentary Secretary : Attached with Chief Minister for Urban Development.

Smt. Urmil Thakur ; Parliamentary Secretary: Attached with Chief Minister for Information and Public Relation.

In June, 1998, elections were held for three tribal constituencies of Kinnaur, Lahaul Spiti and Bharmaur; and all three went in favour of BJP, improving its tally in the house and making it a majority Government, with 35 members of its own party and five members of Himachal Vikas Congress extending their support to the Government. Few independents also supported the government. The period from 1998 to 2003 was a golden period in the political and administrative history of Himachal Pradesh from the point of view of non-Congress party government and the financial help provided by the union government under the leadership of Mr. Atal Bihari Bajpai to Himachal Pradesh. In May, 1998, another expansion was made by the Chief Minister

with following members :

Shri Prem Kumar Dhumal; Chief Minister : General Administration, Finance. Home, Personnel, MPP & Power and all other Departments not allocated to any other Minister.

Shri Kishori Lal; Industry Minister : Industries, Labour & Employment and Fisheries

Shri Mohinder Singh ; Rural Development & Panchayat Minister : Rural Development, Panchayat Raj, Excise & Taxation and Public Works.

Shri J.P. Nadda; Health Minister : Health & Family Welfare and Parliamentary Affairs.

Shri Kishan Kapoor ; Transport Minister : Transport and Tribal Dev.

Shri Ramesh Chand Dhwala ; Irrigation and Public Health Minister : Irrigation and Public Health.

Shri Mansa Ram; Food & Supplies Minister : Food and Supplies and Social & Women's Welfare.

Shri Roop Singh Thakur ; Forest Minister : Forest.

Shri Vidya Sagar; Agriculture Minister : Agriculture.

Shri I. D. Dhiman; Education Minister : Education.

Shri Prakash Chaudhary ; Minister of State for Animal Husbandry: Animal Husbandry (Ind. Charge.)

Shri Karan Singh ;Minister of State for Primary Education : Primary Education (Ind. Charge).

Shri Narinder Bragta; Minister of State for Horticulture : Horticulture (Ind. Charge).

Shri Roop Dass Kashyap; Chief Parliamentary Secretary: Urban Development.

Smt. Urmil Thakur; Parliamentary Secretary: Information and Public Relation (Attached with Chief Minister.)

During this period, Bhartiya Janta Party again faced internal problems on account of *Mitra Mandals (disgruntled group of B.J.P.)* activists. These were the people having deep rooted association with Bhartiya Janta Party, but ignored by the state leadership in the elections and political appointments. A group of minister led by Hari Narain Saini, presented an informal report against Mr. P. K. Dhumal's government. This was a unique instance in the political history of Himachal Pradesh, when ministers of the government were up against their own establishment. This turmoil was put under the carpet by the central leadership of the party and tolerance reflected by the chief-minister. But the tussle between P.K. Dhumal and Shanta Kumar groups continued unabated. Three more expansion were made by Chief Minister in his council of ministers in 1998 itself :

Council of Ministers (As on 10.10.1998)

Shri Prem Kumar Dhumal; Chief Minister : General Administration,

Finance. Home, Personnel, MPP & Power and all other Departments not allocated to any other Minister.

Shri Kishori Lal; Industry Minister : Industries, Labour & Employment and Fisheries.

Shri Mohinder Singh; Rural Development & Pancharyati Raj Minister : Rural Development, Panchayati Raj, Excise & Taxation and Public Works.

Shri J.P Nadda; Health Minister : Health & Family Welfare and Parliamentary. Affairs.

Shri Kishan Kapoor; Transport Minister : Transport and Tribal Development.

Shri Ramesh Chand Dhwala ; Irrigation and Public Health Minister : Irrigation and Public Health.

Shri Mansa Ram ; Food & Supplies Minister : Food & Supplies and Social & Women's Welfare.

Shri Roop Singh Thakur; Forest Minister : Forest.

Shri Vidya Sagar; Agriculture Minister : Agriculture.

Shri I. D Dhiman ; Education Minister : Education.

Shri Prakash Chaudhary ; Minister of State for Animal Husbandry : Animal Husbandry (Ind. Charge.)

Shri Karan Singh ;Minister of State for Primary Education : Primary Education (Ind. . Charge)

Shri Narinder Bragta ; Minister of State for Horticulture : Horticulture (Ind. Charge)

Shri Roop Dass Kashyap; Minister of State for Urban Development : Urban Development & Housing (Ind. Charge) and Attached with Food and Supplies Minister for Social & Women's Welfare Department .

Shri Rikhi Ram Kaundal; Minister of State for Cooperation : Cooperation (Ind. Charge) and attached with Chief Minister for Department of Election.

Shri Mohan Lal ; Minister of State for Ayurveda : Ayurveda (Ind. Charge) and attached with Health Minister for Health and Family Welfare Department.

Dr. Rajan Sushant; Minister of State For Revenue : Revenue (Ind. Charge) and attached with Chief Minister for Law.

Shri Ravinder Singh Ravi; Minister of State for Technical Education : Technical Education (Ind. (Charge) and attached with Chief Minister for MPP and Power Department.

Shri Parveen Sharma; Minister of State for Youth Services and Sports : Youth Services & Sports (Ind. Charge) and attached with Rural Development Minister for PWD.

Shri Hari Narayan Singh; Minister of State for Town and Country Planning : Town & Country Planning (Ind. Charge) and attached with

Industries Minister for Labour Employment and Training Department.

Smt. Urmil Thakur ; Parliamentary Secretary: Attached with Chief Minister for Information and Public Relation.

Shri. Chet Ram Negi ; Parliamentary Secretary: Attached with Transport Minister for Tribal Development Council of Ministers (as on 3.11.1998)

Shri Prem Kumar Dhumal ; Chief Minister : General Administration, Finance, Home, Personnel, MPP & Power and all other Departments not allocated the any other Minister.

Shri Kishori Lal; Industry Minister : Industries, Labour & Employment and Fisheries

Shri Mohinder Singh ; Public Works Minister : Public Works and Excise & Taxation.

Shri J.P Nadda; Health Minister : Health & Family Welfare and Parliamentary Affairs.

Shri Kishan Kapoor; Transport Minister : Transport and Tribal Development.

Shri Ramesh Chand; Irrigation and Public Health Minister : Irrigation and Public Health.

Shri Mansa Ram; Food & Supplies Minister : Food & Supplies and Social & Women's Welfare.

Shri Roop Singh Thakur; Forest Minister : Forest.

Shri Vidya Sagar; Agriculture Minister : Agriculture.

Shri I. D. Dhiman; Education Minister : Education.

Shri Prakash Chaudhary; Minister of State for Animal Husbandry : Animal Husbandry (Ind. Charge).

Shri Karan Singh ; Minister of State for Primary Education : Primary Education (Ind. Charge).

Shri Narinder Bragta; Minister of State for Horticulture : Horticulture (Ind. Charge).

Shri Roop Dass Kashyap; Minister of State for Urban Development : Urban Development & Housing (Ind. Charge) and Attached with Food and Supplies Minister for Social & Women's Welfare Department .

Shri Rikhi Ram Kaundal; Minister of State for Cooperation : Cooperation (Ind. Charge) and attached with Chief Minister for Department of Election.

Shri Mohan Lal ; Minister of State for Ayurveda : Ayurveda (Ind. Charge) and attached with Chief Minister for Health and Family Welfare Department.

Dr. Rajan Sushant; Minister of State For Revenue : Revenue (Ind. Charge) and attached with Chief Minister for Law.

Shri Ravinder Singh Ravi; Minister of State for Technical Education : Technical Education (Ind. (Charge) and attached with Chief Minister for MPP

& Power Department.

Shri Parveen Sharma; Minister of State for Youth Services & Sports : Youth Services & Sports (Ind. Charge) and attached with Public Works Minister for PWD.

Shri Hari Narayan Singh; Minister of State for Town and Country Planning : Town & Country Planning (Ind. Charge) and attached with Industries Minister for Labour Employment & Training Department.

Dr. Ram Lal Markande; Minister of State for Rural Development & Panchayati Raj : Rural Development (Ind. Charge) and Panchayati Raj (Ind.Charge).

Smt. Urmil Thakur ; Parliamentary Secretary: Attached with Chief Minister for Information and Public Relation.

Shri. Chet Ram Negi ; Parliamentary Secretary: Attached with Transport Minister for Tribal Development

Smt. Sarveen Chaudhary ; Parliamentary Secretary: Attached with Industries Minister for Labour & Employment.

Mr. Prem Kumar Dhumal, proved a competent Chief-minister who introduced a number of administrative and financial reforms in the state. In 1998, for the first time in the history of Himachal Pradesh Subordinate Services Selection Board was setup in Hamirpur as an administrative organ of the government to make recruitments for class III & IV jobs. HPSSSB made thousands of recruitments for the posts that were lying vacant with the government for decades. The Congress party, which was issueless in the state, made HPSSSB's recruitments an issue of corruption and propagated against the government of the day. The issue of corruption was so vocally preached by the Congress party that even every single aspirant of job thought that he/she has been denied justice in the recruitment.

A lie spoken by Congress party hundred times, sounded as truth, culminated in the form of defeat to Bhartiya Janta Party in the 2003 assembly elections. Mr. Vir Bhadra Singh became Chief-minister for 5th time in 2003. This election taught a very bitter lesson to B.J.P. and its state leadership that *united we win divided we fall.* In 2003, Congress party came to power with 43 seats, BJP 16 and independent and others 9.

HIMACHAL PRADESH VIDHAN SABHA – 2003

Total Members – 68

Speaker : Sh. Ganguram Musafir (SC) Congress (I)
Deputy Speaker : Sh. Dharam Pal Congress (I)

MEMBERS

Shri. Harsh Mahajan; Animal Husbandry Minister : Animal Husbandry, Fisheries.

Shri. G.S. Bali; Transport Minister : Transport.

Shri. Mukesh Agnihotri ; Chief Parliamentary Secretary : Attached with the Chief Minister for the Department of Housing.

Since 2003, it seemed that state was not being governed but ruled not by a democratic leader but a traditional prince who has very little concern for the economic development of the state. The issue of recruitment in government jobs became a mockery at the wake of growing unemployment in the state. The attitude of central government towards Himachal Pradesh during this period had not been very conducive, keeping in view the special geographical and economic conditions of the state. The state came under heavy financial debt trap. There was decline in the performance of the administrative, social and economic sector. By the end of 2006, the total debt of the state government was nearly Rs. 18,000 crore, that means, that every single citizen of the state was under Rs. 24,000/- debt trap.

In April, 2005, appointment of Chief Parliamentary Secretaries and Parliamentary Secretaries was made to accommodate more members of Congress Legislature party in the governance.

Shri. Thakur Singh Bharmauri ; Chief Parliamentary Secretary:

Attached with the Chief Minister for Higher Education and H.P. University Department.

Smt. Anita Verma ; Chief Parliamentary Secretary: Attached with the Chief Minister for Health and Family Welfare Department.

Dr. Prem Singh ; Chief Parliamentary Secretary: Attached with the Revenue Minister for Rural Development and Panchayati Raj Department.

Shri. Tek Chand; Chief Parliamentary Secretary: Attached with the Chief Minister for PWD.

Shri. Harsh Wardhan Chauhan; Chief Parliamentary Secretary: Attached with the Chief Minister for Primary Education Department.

Shri. Mukesh Agnihotri ; Chief Parliamentary Secretary: Attached with the Chief Minister for Information and Public Relations Department and attached with the I and PH Minister for Irrigation and Public Health Department.

Shri. Lajja Ram; Chief Parliamentary Secretary: Attached with the Horticulture Minister for Food, Civil Supplies and Consumer Affairs Department.

Shri. Harbhajan Singh Bhajji ; Chief Parliamentary Secretary: Attached with the Chief Minister for Technical Education, Vocational and Industrial Training Department.

Shri. Jagat Singh Negi ; Parliamentary Secretary: Attached with the Chief Minister for Tribal Development Department and attached to Forest Minister for Youth Services and Sports Department.

Shri. Surinder Kumar; Parliamentary Secretary: Attached with the Excise and Taxation Minister for Social Justice and Empowerment Department.

Shri. Sudhir Sharma; Parliamentary Secretary: Attached with the MPP and Power Minister for MPP & Power.

Shri. Raghubir Singh; Parliamentary Secretary: Attached with the Chief Minister for Ayurveda Department and attached with the Excise and Taxation Minister for Town & Country Planning Department.

Himachal Pradesh has, taken rapid strides from a primitive feudalistic society to a vibrating progressive democracy and developing economy. Still we find, what W.G.Riggs has called the prismatic society in Himachal Pradesh, where there is much of overlapping as the same functions are being performed by different structures. For example, at the time of need people approach their local *devta* as well as different government departments. Government agencies have still to seek the permission of local *devata* for undertaking some projects. Without the permission of local god or goddesses they cannot execute the projects in hand. For example, Thakur Ram Lal, the then Chief Minister of Himachal Pradesh wanted to construct airport near Theog in Shimla district but the goddess of the village Kanaga did not permit. As a result, the idea of constructing the airport had to be dropped.

Similarly the project of developing a lake as a tourist place in Karyali village of Sunni tehsil in Shimla district could not be executed in as much as the goddess of the village refused the permission.

Tensions between the traditional theocratic system and the modern administrative system have also been observed. In the past Dushehra festival at Kullu, some of the local gods and goddesses were not given due respect as a result of which they got annoyed with the district administration. This has happened many a time in Shivratri fair at Mandi also. Anyway, there is a need for reconciliation between the traditional and modern systems. Modern administrative system has to understand the traditional values, motivation and aspirations of the people. Recently in the case of Manali Ski village, local *devtas* took very tough stand against the project, which was given to an American company by state Government. The project was of Rs. 3500/- crore, covering an area of five hectare land. Till September 2014, no headway could be made at the face of strong opposition from Kullu Valley's God and Goddesses.

The regional factor came into play after the hill areas of the Punjab were merged into Himachal Pradesh during the reorganization of states in 1966. As leaders from the old Himachal continued to dominate the ruling Congress, discontent started brewing among party men in the merged areas who felt ignored. In a bid to upstage the established leadership of the party, leaders of the new areas raised the issue of discrimination on regional consideration.

The BJP, then Jan Sangh which had significant presence in these areas, took a cue from the disgruntled Congressmen and exploited the regional sentiment to expand its base. As the influence of the BJP largely remained confined to the new areas and the Congress continued to maintain its hold over the old areas, the people were emotionally divided on regional lines. While in power, Mr Dhumal earned the wrath of Kangra as three ministers and as many legislators from the district revolted against him. The BJP paid a heavy price for it in the 2003 Assembly elections. The situation was not so disquieting for the Congress as Maj. Mankotia had emerged as the lone voice of dissent against the Vir Bhadra Singh government from 2003-2007. The charges of discrimination against Kangra levelled by him certainly damaged the Congress (I) in 2007 election.

The congress party in the state since 2003 assembly election, had also been plagued with the problem of groupism. One group led by Mr. Vir Bhadra Singh and another by Mrs. Vidya Stokes, a prominent congress leader, having blessed by Mrs. Sonia Gandhi, the national chief of the Congress party. In 2005, some minor reshuffle was made in the Cabinet with following members :

Shri. Vir Bhadra Singh ; Chief Minister : General Administration, Personnel, Home, Finance, Public Works, Tribal Development, Health, Education and all other Department not allotted.

Smt. Vidya Stokes ; MPP & Power Minister : M.P.P. & Power , science and Technology.

Shri. Kaul Singh Thakur ; Irrigation & Public Health Minister : Irriga-

tion & Public Health, Urban Development Law and Parliamentary Affairs.

Shri. Sat Mahajan ; Revenue Minister : Revenue, Rural Development and pancharyati Raj.

Shri. Rangila Ram Rao; Excise & Taxation Minister : Excise & Taxation, Social Justice and Empowerment and TCP.

Shri. Ram Lal Thakur; Forest Minister : Forest, Youth Services and Sports and Elections.

Shri. Raj Krishan Gaur; Agriculture Minister : Agriculture and LEP

Shri. Kuldeep Kumar ; Industries Minister :Industries and Cooperation.

Shri. Singhi Ram ; Horticulture Minister : Horticulture, Food and Civil Supplies and Consumer Affairs.

Shri. Harsh Mahajan; Animal Husbandry Minister : Animal Husbandry, Fisheries and Housing.

Shri. G.S Bali ; Transport Minister : Transport , Tourism and Civil Aviation.

The election of Mrs. Viplov Thakur as the state Congress president in the year 2005, tilted the balance of power in favour of Mrs. Vidya Stokes. The tussle within BJP was also touching new heights. The inability of the state unit of the congress to elect its state president unanimously in the year 2006 reflected the inherent political ambitions of the state leaders. In 2007 Vidhan Sabha election Congress party got 38.90 per cent votes and only 23 seats, while BJP got 41 seats with 43.78 per cent of votes. The result of 2007 Vidhan Sabha election was on expected line.

HIMACHAL PRADESH VIDHAN SABHA – 2007

Total Members : 68

Speaker : Sh. Tulsi Ram (BJP), ST Bharmaur
Dy Speaker : Sh. Khimi Ram (2008-09), (BJP), Banjar
Sh. Rikhi Ram Kaundal (2009-12), (BJP), SC Geharwin

MEMBERS

(1) Shri Anil Kumar Sharma, (Cong.I, Mandi); (2) Shri Atam Ram (BJP, SC, Rajgir), (3) Shri Balbir Singh (BJP, SC, Gagret) (4) Shri Baldev Sharma, (BJP, Nadaunta); (5) Shri Bal Krishan Chauhan, (BJP, Chamba); (6) Shri Des Raj, (BJP, SC, Gangath); (7) Shri Dile Ram, (BJP, SC, Nachan); (8) Shri Gangu Ram Mussafir (Cong.I, SC, Pachhad) (9) Shri Gobind Ram Sharma (BJP, Arki); (10) Shri Govind Sing Thakur, (BJP, Kulu); (11) Shri Gulab Singh Thakur, (BJP, Jogindernagar); (12) Shri G.S. Bali (Cong.I, Nagrota); (13) Shri Hari Narayan Singh, (BJP, Nalagarh); (14) Shri Harshwardhan Chauhan (Cong.I, Shillai); (15) Shri Hira Lal (IND, SC, Karsog); (16); Shri Inder Singh Thakur, (BJP, Gopalpur); (17) Shri Ishwar Dass Dhiman, (BJP, SC, Mewa); (18) Shri Jagat Parkash Nadda, (BJP, Bilaspur); (19) Shri Jai Ram Thakur (BJP, Chachiot); (20), Shri Kaul Singh Thakur, (Cong.I, Drang); (21), Shri

Urmil Thakur, (BJP, Hamirpur); (63) Smt. Vidya Stokes, (Cong.I, Kumarsain); (64) Smt. Vinod Kumari Chandel, (BJP, Doon); (65) Shri Vipin Singh Parmar, (BJP, Sulah); (66) Shri Virbhadra Singh, (Cong.I, Rohru); (67) Shri Virender Kanwar, (BJP, Kutlehar); (68) Shri Yog Raj, (Cong.I, SC, Pragpur).

Note: *Consequent upon election of Shri Vir Bhadra Singh, MLA (Congress- I) from Rohru and Dr. Rajan Sushant, MLA (BJP) from Jawali to 15th Lok Sabha from Mandi and Kangra Parliamentary constituencies respectively and their subsequent resignation from State Assembly resulted in vacancies in the House. Notification declarig election programme for these two Assembly seats was issued on 14th October, 2009 and the poll was conducted on November 7, 2009.*

As a result of the by-election, two new Members Sh. Khushi Ram Balnahta (Rohru, BJP) and Sh. Sujan Singh Pathania (Jawali, Congress-I) were declared elected to the 11th Vidhan Sabha on 10th November, 2009.

From 2007 to 2012 BJP had full opportunity to implement its much publicized election manifesto to ensure the repeat of Government. During this period 75 awards were received by the state Government for its excellent performance in education, tourism, law and older, economic growth, rural development implementation of various schemes launched and sponsored by Central Government.

After winning 2007 election, BJP formed a majority goverment in the

state under the leadership of Mr. Prem Kumar Dhumal, who became Chief Minister for the second time. The members of ministry were following-

Mr. Prem Kumar Dhumal; Chief Minister: All the Departments not allocated to any of the Cabinet Ministers.

Shri Gulab Singh Thakur; Public Works Minister: Public Works, Revenue

Shri Ishwar Dass Dhiman; Education Minister: Higher Education, Elementary Education

Shri J.P. Nadda; Forest Minister: Forest, Environment & Scientific Technologies, Parliamentary Affairs

Shri Ravinder Singh; Irrigation & Public Health Minister: Irrigation & Public Health

Shri Kishan Kapoor; Transport Minister: Transport, Town & Country Planning, Housing

Shri Narinder Bragta; Horticulture Minister: Horticulture, Technical Education, Vocational & Industrial Training

Shri Ramesh Chand; Food, Civil Supplies & Consumers Affairs Minister: Food, Civil Supplies & Consumers Affairs, Labour & Employment

Dr. Rajiv Bindal; Health & Family Welfare Minister: Health & Family Welfare, Ayurveda

Smt Sarveen Choudhary; Social Justice & Empowerment Minister: Social Justice & Empowerment. The Former Primary education minister and BJP member Karan Singh, younger brother of Raja Maheshwar Singh left BJP and joined congress -(I) on 4th October 2008. The resignation was seen as a rift in the Kullu unit of BJP.

The only MLA of Bahujan Samaj Party (BSP) elected in 2007 from Kangra, Sanjay Chaudhary joined BJP on 17 December 2008.

On 9th July 2009 Sh Jai Ram Thakur and Sh Mahender Singh were inducted into the Council of Minister and Sh. Satpal Singh Satti, Sh. Virender Kanwar and Sh. Sukh Ram Chaudhary were appointed by the Chief Minister as Chief Parliamentary Secretaries. On the same day portfolios of some other Minister were also changed or reshuffled.

In 2010, on May 12th, ministry was reshuffled to accommodate few more members as minister and parliamentary secretaries. The new team was as followed-

Mr. Prem Kumar Dhumal; Chief Minister: All other Departments, which are not allocated to the minister.

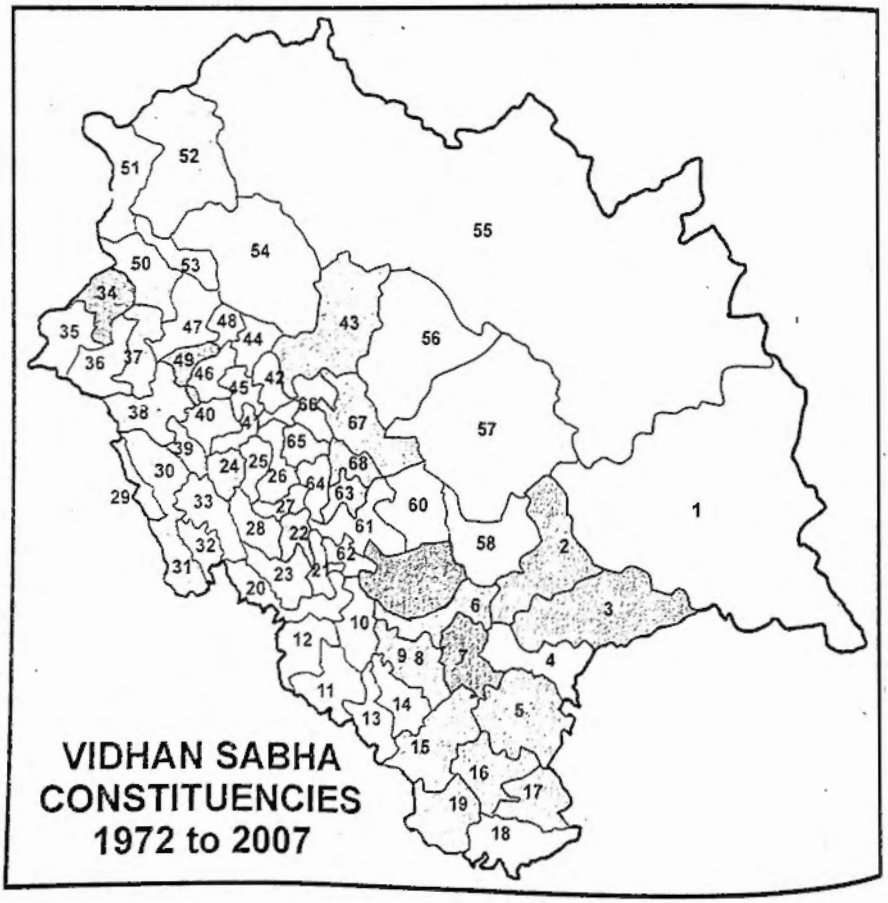
Thakur Gulab Singh; Public Works Minister: Public Works, Revenue

Shri Ishwar Dass Dhiman; Education Minister: Higher Education, Elementary Education

Shri Ravinder Singh; Irrigation & Public Health Minister: Irrigation & Public Health, Printing & Stationery

Shri Kishan Kapoor; Industries Minister: Industries, Labour & Employment, Sainik Welfare

Shri Narinder Bragta; Horticulture Minister: Horticulture, Technical Education, Vocational & Industrial Training



Shri Ramesh Chand Dhwala; Food, Civil Supplies & Consumers Affairs Minister: Food, Civil Supplies & Consumers, Fisheries

Dr. Rajeev Bindal; Health & Family Welfare Minister: Health & Family Welfare, Ayurveda, Medical Education

Smt Sarveen Choudhary; Social Justice & Empowerment Minister: Social Justice & Empowerment

Shri Jai Ram Thakur*; Panchayati & Rural Development Minister: Panchayati Raj, Rural Development

Shri Mahender Singh*; Transport Minister: Transport, Town and Country Planning , Housing, Urban Development

Sh. Satpal Singh Satti*; Chief Parliamentary Secretary: Attached with Chief Minister for MPP & Power and Youth Services and Sports.

Sh. Virender Kanwar*; Chief Parliamentary Secretary: Attached with PWD Minister for PWD and for Elementary and Secondary Education with the Education Minister.

Sh. Sukh Ram Chaudhary*; Chief Parliamentary Secretary: Attached with Chief Minister for Agriculture and Animal Husbandry.

J.P Nadda resigned from state cabinet on 15th November 2010 as a rule one man one post, since he became National General Secretary of BJP in October 2010. Mr. Khimi Ram MLA from Banjar, was inducted in the ministry as Forest and Tribal affairs minister on 23rd February 2011. Dr. Rajan Sushant was suspended from BJP on 11th March 2011 for his Anti party tirade. J.P Nadda was elected to Rajya Sabha unopposed on 22nd March 2011.

In December 2011, by-election were held for two seats i.e. Renuka and Nalagarh. Congress lost Renuka seat after 29 years to BJP. Mr. Hirda Ram of BJP won by defeating Vinay Kumar of Congress. From Nalagarh Mr. Lakhvinder Rana of congress defeated Ms. Gurnam Kaur of BJP by a slender margin of 1599 valid votes. Radha Raman Shastri and Maheshwar Singh resigned from BJP on 23rd December 2011, on the issue of negligence and corruption in their own government. To resolve the issue of disenchantment, national general secretary J.P Nadda and state incharge Shyam Jaju came to Shimla on 12th February 2012, but the issues remained unresolved.

Mr. Khimi Ram MLA from Banjar was inducted in the state ministry as forest and tribal welfare minister on 23rd February 2012. This move was to counter the power and threat of Maheshwar Singh in Kullu district. Dr. Rajan Sushant, another leader of the BJP from Kangra was suspended from BJP on 11th March 2012, for his anti party statements. Dr. Rajiv Bindal, a strong supporter of Chief minister P.K Dhumal, resigned on 12th March 2012 from state cabinet on account of corruption charges leveled against him by Congress party. But Chief minister refused to accept his resignation.

Mr. J.P Nadda was elected to Rajya Sabha unopposed on 23rd March 2012, on his election to Rajya Sabha Mr. J.P Nadda resigned from Vidhan Sabha on 3rd April 2012. Dr. Rajan Sushant was expelled from party earlier, launched scathing attack against BJP state government. After their resignation from BJP, Maheshwar Singh and Radha Raman Shastri formed a new party called "Himachal Lokhit Party" (HLP). But soon after R.R Shastri on 23rd May 2012 resigned from HLP and joined National Congress Party (NCP) of Sharad Pawar. On 25th June 2012, health minister Rajiv Bindal's resignation was accepted and additional charge of health was giver to Ravinder Singh Ravi, which he refused and then Narender Bragta was given the charge of health and ayurveda department. Keeping an eye on election some more party leaders started showing trouble in the party (BJP). Mr. Khushi Ram Balnahta also quit party in July 2012.

In August 2012, Congress party state president Kaul Singh Thakur resigned and paved the way for Mr. Vir Bhadra Singh to take over the reign of Congress party in his hand. The move was not appreciated by the majority of senior party leaders in the state. The Congress party quickly judged the situation and as a balancing act Ms. Viplov Thakur was made Chairperson of election campaign committee.

Assembly Election 2012: The wheel turned a full cycle for the opposition Congress (I) since it was ousted from power five years ago. Old war horse Vir Bhadra Singh, who was carted out of state politics following the party's 2007 electoral debacle, was back in the saddle to lead the Congress (I) in the forthcoming Assembly election. With plans of the high command to bring in new leadership falling flat, the party, which dominated the political scene for decades, was making a determined bid to stage a comeback in rather adverse circumstances. The return of Vir Bhadra Singh as PCC chief infused new life in the party cadres, but the problem of factionalism persists. Leaders of the rival camp, which had been calling the shots in the state party unit for the past five years, were finding themselves in an awkward position.

The party had to bear the fallout of its failure to contain the infighting over the five years and take decisions on merit rather than factional considerations. Senior leader Kaul Singh was given two successive terms as the state Congress chief, but when the real test came, the party had to again fall back upon Vir Bhadra Singh, who was otherwise being gradually marginalised. Apart from the indomitable spirit of Vir Bhadra Singh, who relentlessly fought his rivals in the party and the high command all this while, political developments at the national level and the electoral losses of the party suffered across the country during that period forced the high command to redraft its strategy on the eve of election

National Fallout: The Congress (I) was going to the polls this time under circumstances that were much changed since the 2007 elections. The political environment at the national level was becoming increasingly unfavourable for the party due to the 'mega scams' that have hit the UPA regime. The anticorruption campaign of Arvind Kejriwal was only adding to that. More importantly, the defeat of the party in Punjab and its below par performance in Uttarakhand had added to its nervousness in Himachal. These developments were supposed to weaken the impact of the anti-incumbency factor, which has been playing a decisive role in Assembly polls, giving alternating shots at power to the Congress (I) and BJP. There was a strong anti-incumbency sentiment against the Dhumal government this time too, as was manifested during the Shimla municipal elections four months back. However, it was the CPM that took advantage, and won the two top posts of Mayor and Deputy Mayor. Had the Congress been in good health, it would have been the automatic beneficiary of the anti-incumbency.

Lacking Leadership: Obviously, the party was lacking requisite organisational strength to convert the resentment among the people into votes.

The reasons were not far to seek. Instead of taking the Dhumal regime head on, senior party leaders were busy fighting each other and the rather prolonged leadership tussle had left the cadres vertically divided. It all started after Pratibha Singh, wife of Vir Bhadra Singh, was denied the ticket for the Rohru by-election. Backed by the high command, the anti-Vir Bhadra Singh camp led by Kaul Singh gained strength. An array of senior leaders, including Asha Kumari, G.S. Bali, Viplove Thakur and a number of second-rung leaders, started gunning for him. They also enjoyed the support of Union Minister Anand Sharma.

With so many leaders opposing him, he was virtually pushed to the wall. Even his efforts to stage a comeback by ensuring a huge victory of his son Vikramaditya in the first-ever direct organisational elections for the State Youth Congress were thwarted as the election was quashed and the young entrant was also debarred from contesting polls in future.

Defence in Offence: As the situation turned desperate, Vir Bhadra Singh started attacking Kaul Singh and his team for being soft on the Dhumal government. Over the past nine months, he had demonstrated his strength by celebrating occasions like his birthday, completion of 50 years in state politics, and some informal get-together, which were attended by most of the sitting MLAs. He also patched up with Leader of the Opposition Vidya Stokes to take on Kaul Singh. Keen to win elections, the high command decided to make Vir Bhadra Singh the state party president in place of Kaul Singh after the final show of strength, during which his supporters camped in Delhi in August 2012. The decision came rather late, but the party tried to put its best foot forward. Vir Bhadra Singh is the tallest party leader with a mass base and capable of taking on the challenge. Aware of the organisational weakness, the party was cautious in ticket allotment. It selected candidates who were seen as capable of winning on their own. Unity was never the Congress (I)' strong point, but after the ticket distribution, it looks in better shape.

To cap it all, the shrewd politician that Vir Bhadra Singh is, he played a master stroke by bringing his *bete noire* Vijay Singh Mankotia back into the party-fold. Mankotia, who had released a controversial CD against Vir Bhadra Singh, was being used by the BJP to attack him. It was yet to be seen if Mankotia boomerang on the BJP. Vir Bhadra Singh had also sent message across to detractors that he was prepared to put rivalries behind. Most Assembly elections have been a tough call for the Congress, despite having been the dominant player for so long. It had polled more than 50 per cent only twice since 1951, that too in special circumstances. In 1972, the elections followed the historic victory in the Indo-Pak war, while in 1985 the Congress swept the polls in the wake of Indira Gandhi's assassination. Its popularity hit the nadir during Emergency, polling the lowest-ever 27.21 per cent votes in the 1977 elections, when it was ousted from power in Himachal for the first time by the Janta wave. Its highest-ever vote share was 55.4 per cent in 1985.

The challenges from within for BJP from Dr. Rajan Sushant Lok Sabha

member from Kangra, Raja Maheshwar Singh from Kullu, Khushi Ram Balnahta and Dr. Radha Raman Shastri from Shimla and above all idealistic approach of Mr. Shanta Kumar continued damaging the image of the party. These leaders without any substantial proof, made serious allegation of corruption against their own Government led by Mr. Prem Kumar Dhumal. With every passing day, each one of them intensified his tirade against the Government. In the process, Congress (I) under the headship of Mr. Kaul Singh Thakur was a divided house. Two prominent leaders, Mr. Vir Bhadra Singh and Mr. Anand Sharma of the party at central level were at loggerheads. Both of them had their own group and supporters in the state political arena. This was the period when Mr. Vir Bhadra Singh facing opposition within the party and was being isolated by the rival group.

The charges of corruption were also weighing heavily against him. In March 2012, he was made to resign from the Union cabinet on account of corruption charges. This was the turning point of his political career. The people in general and political leaders in particular thought this as an end of his political journey but destiny had something else for him.

Mr. Kaul Singh Thakur on the other side started projecting himself as the Chief-minister in waiting as election for 12th Vidhan Sabha were due by the end of December 2012. BJP was in jubilant mood as it was predicted that party will return to power with increased number of seats. In August 2012 Congress high command under pressure appointed Vir Bhadra Singh, the State Chief and demoted Kaul Singh Thakur to second position. It was said that had Vir Bhadra Singh not been given the charge of state at that time he would have probably formed a regional party as in any case this was the last and only opportunity for him to head the new Government of Congress party if voted to power. Till September 2012, pre-election survey predicted BJP government with increased number of seats. But from September 2012 to 3rd November 2012 Himachal Pradesh saw a truly fierce battle between two individuals i.e., Prem Kumar Dhumal and Vir Bhadra Singh having common charges of corruption against each other and also opposition from within the party. Both of them addressed hundreds of rallies all over the state. BJP all of sudden pressed panic button and came to defensive approach. This made people believe of having something wrong with the party ruling the state for past five years.

For the students of development administration, it is important to know that although direction of development is controlled and guided by the political executives yet it is not certain that reward of that development would also go to them. Since 1971 this was for the first time, when state achieved very high growth rate in GDP and sectors associated with infrastructure such as roads, health, education, social sectors employment etc. In comparison to other states of northern India, Himachal achieved very high rate of growth. On the basis of this, it was presumed that people of the state would reassert their-self positively in favour of BJP government of the state. But on 20th December

2012, BJP got the real shocker from the ballot boxes, when its dream of reforming the government came to naught. In the recent past all governments as in Gujarat, Madhya Pradesh, Punjab, Orissa, Chhattisgarh etc. were repeated, wherein development work done by the government was of very high order except Himachal Pradesh. This trend of changing Government alternatively could prove detrimental and counter productive for the masses.

Taking the change for sure work or no work, then why should party in power waste its efforts. This message has gone down well with the politician of the state after 2012 Vidhan Sabha election, where a party was penalised for its massive development works. There was hardly any such parallel in the post-independent history of India in regard to state politics. When a performing government was replaced. Was it a continuation of tradition of change or role played by self-centered leaders of BJP, who always wanted to have a lion share in state politics irrespective of their contribution and mass appeal?

State Politics : Six decades of democratic process has seen the hill state mature from a Congress monopoly to a bipolar polity, with the BJP coming up as the primary alternative. The growth of the electoral process is also apparent from the fact that in the first Assembly elections held in 1951, only 25 percent of the 5,31,018 strong electorate cast their vote, whereas in the 2007 elections, the polling percentage saw as high as 71.61 per cent. The first election was held with 28 constituencies, but as there were eight double-member constituencies, the House had 36 strength.

In 1957, the state was converted into a Territorial Council, with 29 constituencies (12 double-member seats), with a House strength of 41. In 1961, the double-member seats were abolished, and instead 12 new reserved constituencies were created for the Scheduled Castes. The Assembly was again revived in July 1963, and the existing members of the Territorial Council became its members. The number of the constituencies increased to 60 when the hill areas of Punjab were merged in 1966, and there were also three nominated members then.

Rise of Opposition: There was no organised opposition in the state till 1966, and the Congress dominated the political scene, though a large number of candidates were elected as Independents. It was only after the merger of Punjab areas that the Jan Sangh appeared on the scene, winning seven seats in 1967, with a vote-share of 13.87 per cent. The CPI also bagged two seats.

The complexion of the Assembly changed again when Himachal became a full-fledged state in 1971. The number of constituencies was raised to 68, and the first election was held in 1972, which was swept by the Congress, polling 53.24 per cent votes to bag 53 seats. The Jan Sangh won just five seats, but seven Independents were also among the winners. The Congress citadel was finally demolished by the Janata wave in 1977, when the Congress polled only 27 per cent votes, and its tally of seats came down to nine, while the Janata Party won 53 seats, polling 49 per cent votes. The vote share of

Independents increased to 21.1 per cent, and six of them were elected. The Janata Party disintegrated in 1980, but it had ended the Congress monopoly and laid the foundation for a virtual two-party system in the state.

BJP Joins Fray: The BJP emerged as the main opposition in the state following a split in the Janata Party. In the 1982 Assembly polls, it won 29 seats, with 35.15 per cent votes, while the Congress got only 31 seats — despite a vote share of 42.52 per cent — and failed to get a clear majority. The Janta Party, CPI and the CPM accounted for just 8 per cent votes. Taking advantage of the sympathy wave in the wake of Indira Gandhi's assassination, the Congress went for snap Assembly elections in 1985, and secured a massive majority, winning 58 out of the 68 seats. The BJP could win only seven.

Thereafter, the Congress and the BJP have been winning Assembly election by turns. The BJP won the 1990 polls, contesting in alliance with the Janata Dal which got 11, while the Congress came in a poor third with just nine. However, the BJP government could not complete the term, as it was dismissed after LK Advani's Rath Yatra, which helped the Congress stage a comeback with a thumping majority in 1993, winning 54 seats. The BJP managed just eight.

Taking Turns: In 1998, the BJP failed to get a majority, but managed to form the government with the support of the Himachal Vikas Congress, a break away group of the Congress led by Pt. Sukh Ram. The Congress again turned the tables on the BJP in 2003 bagging 43 seats. The BJP won 16 seats, but the HVC was almost wiped out, getting only one. Continuing the alternating sequence, the BJP again came to power in the 2007 polls, winning 41 seats, while the Congress dropped to 23.

The old Himachal areas have been traditionally the Congress' stronghold, but after 1998 its support base started shrinking in these areas also. While it has been winning the majority of seats in Shimla and Sirmaur districts, the margin of victory has been on declining. The decision to go to the polls under the leadership of Vir Bhadra Singh help recover some of the lost ground. Similarly, it was no longer as strong in Mandi district as it used to be. The exit of leaders like Sukh Ram, Gulab Singh and Mohinder Singh (the last two were ministers in the Dhumal government) weakened the party's base considerably.

The Congress had the wherewithal to stop the BJP from accomplishing its *"Mission repeat"*, but it could not work unless the senior leaders had put up a united fight. Having witnessed a split for the first time in the history of Himachal, BJP the party in the run up to the Assembly elections appeared to be a divided house, making its "Mission Repeat" a daunting task. The ceaseless battle between its two giants, Chief Minister Prem Kumar Dhumal and Rajya Sabha MP and BJP national Vice-President Shanta Kumar had become the bane of the state unit. Shanta had in no uncertain terms made it clear that he was not in the race for chief-ministership and also no intention of returning

to state politics, but the slighting of his loyalists, especially in Kangra, had left him fuming.

Faced with the hurricane task of creating history by repeating its 2007 victory, the BJP was banking heavily on Dhumal who was clearly a head above other state party leaders. The BJP had an advantage over the Congress to the extent, there was no ambiguity over its chief ministerial candidate yet the chasm between rival factions could cost dear. The BJP had won the 2007 polls by getting 41 of the 68 seats, and received the support of three independent MLAs, who later became the party's associate members. Its strength in the 12 Vidhan Sabha rose to 42 when the lone Bahujan Samaj Party MLA, Sanjay Chaudhary (Kangra) also joined.

Din of Dissidence: Despite the backing of party bigwigs, Dhumal had to contend with dissidence from Shanta loyalists ministers Kishan Kapoor and Ramesh Dhwala, and MLAs Khushi Ram Balnahta, Vipin Parmar, Des Raj and Praveen Sharma. During the past years, they had been actively running an anti Dhumal campaign, and had even approached the high command seeking change in the leadership and raising the issue of corruption. They had also made known their discomfort with the prominence being given to he Himachal Pradesh Cricket Association, headed by Anurag Thakur, Hamirpur MP and Dhumal's son. The majority of these leaders, hailing from the politically sensitive Kangra the stronghold and home district of Shanta Kumar had expressed anguish over the "slighting of dedicated party workers" and the rise of a select few close to the Chief Minister. In fact Balnahta, MLA from Rohru even wrote to then BJP President Nitin Gadkari, seeking change in leadership. He said the BJP could well win once again provided Dhumal was changed. The argument apparently did not find favour. Rajan Sushant, Lok Sabha MP from Kangra too had accused Dhumal of shielding the corrupt. The party suspended him but there was no follow-up action. Later on, he quit BJP as he was seeking the ticket for his wife, which was denied.

The Split: One branch of dissidence that started as a murmur also culminated in the formation of a new political outfit the Himachal Lokhit Party (HLP) on February 2, 2012. The party headed by Maheshwar Singh a former state BJP chief and also former ministers and MLAs, including Shyama Sharma, Mohinder Sofat and Naveen Dhiman. The HLP was expected to dent the BJP vote bank in these leaders areas. However despite several disgruntled former MLAs joining the Party, none of them could make the HLP a force to reckon with. The HLP which had already announced around 40 candidates was hoping to net some senior BJP and Congress leaders who have been denied the ticket. The party also joined hands with the CPM and CPI to forge the Himachal Lok Morcha, which contested the election under a seat sharing arrangement. To make matters worse, Balnahta finally *bid adieu* to the BJP on October 7, 2012 announcing his plan to contest from Kasumpti on the HLP ticket. He threatened to expose the corrupt face of the BJP regime" and the "politician- corporate nexus".

Weak Organisation: The single largest factor that caused the divide in the party was Dhumal's complete control over both government and party, which resulted in his faction having its way in everything and Shanta loyalists being marginalised. The feud between Chief Minister Prem Kumar Dhumal and Shanta Kumar gave the young Satpal Singh Satti the chance to head the state BJP. After the induction of Jai Ram Thakur state BJP chief under whom the party won in 2007 into the Cabinet, the organisational structure started crumbling.

The new incumbent, Khimi Ram Sharma, remained a rubber stamp for the Chief Minister. Sharma's removal on demand from the dissidents and installation of a young and fiery Satpal Singh Satti happened too late to resolve matters. Satti, despite his young age focused on the task of handling the party bickering, a fact appreciated even by his detractors. But not everyone was ready to listen to him which adds to the woes of the party. The BJP did create history of sorts by winning two by-elections, **Rohru** and **Renuka** which had been Congress bastions. It however lost out to the Congress in Nalagarh following the death of its legislator Hari Narain Saini. He remained vocal and critical of Dhumal since 1998.

The BJP was banking heavily on Dhumal for victory, as he had his stamp on everything, and the performance of his government was put to test. Whether Shanta would campaign extensively was not known, there was a possibility that he may confine himself to Kangra and Chamba proved true. There was a dispute with in the party over whether its main slogan should have been *"Kaho dil se, Dhumal Phir se"* or *" Kaho dil se BJP fir se"* the bitterness from Dhumal's efforts to dislodge Shanta loyalist Dhwala from Jwalamukhi to make way for his blue eyed boy Ravinder Singh Ravi made matters worse. In fact it provoked Shanta to openly air resentment over ticket distribution.

At Their Own Peril: The perception of pandemic corruption had touched a raw nerve with the common man across the country. Such was the flurry of allegations in Himachal, that the voter was hard pressed even deciding which party is relatively clean. Even as both the main protagonists in the fray, the Congress and the ruling BJP, level corruption charges at each other, they were also forced to consider the skeletons in their own cupboards. Neither was sure what effect raising the issue would have. As for the voter, he had no way to know the truth from political gimmick.

The Congress was trying to project the BJP regime led by Chief Minister Prem Kumar Dhumal as the most corrupt ever in Himachal. But with its own party chief Vir Bhadra Singh in the dock over the latest controversy involving alleged kickback from a steel company, the main opposition party find itself on sticky wicket. The BJP was gleefully playing up the charge against Vir Bhadra, questioning the 'wisdom' of the Congress high command in handing over the reins of the party to a man facing "serious corruption allegations". This had blunted the Congress campaign on the issue of corruption, as

hardly any senior leader from the Centre or state came out openly in defence of Vir Bhadra Singh.

The BJP also raked up the infamous 'CD episode' involving Vir Bhadra Singh. "The fact that charges had been framed by a local court against him in the CD case should have deterred the Congress high command from making him the state party chief,". It was on similar grounds that Vir Bhadra had to resign from the Union Cabinet, how could he be considered fit to lead the party in the elections. The CD in question had a purported recorded conversation of Vir Bhadra Singh, his wife and a bureaucrat regarding some financial transactions. The BJP was also pointing to the "political compromise" arrived at by Vir Bhadra Singh with the very person who accused him in the case, Vijay Singh Mankotia. Mankotia, who had been expelled from the Congress, now was given the party ticket from the Shahpur constituency.

The voter also did not know what to make of the 'compromise', as till recently Vir Bhadra and Mankotia were sworn enemies. Mankotia had vowed to fight corruption. Vir Bhadra then- said that the compromise is in the *"interest of the party"*, adding that personal differences still exist. He accused the BJP of being behind the fresh charges against him in the steel ministry controversy as they "fear his sway among the electorate". Another Congress candidate facing corruptions charges was former minister Asha Kumari. A local court in Chamba had framed charges against her in a land deal case. She was the party candidate from Dalhousie.

Happy to pursue charges against the Congress, the BJP's own slate was hardly clean. It fielded former Lok Sabha member Suresh Chandel from Bilaspur, whose name had figured in the cash-for-query sting operation, which put the BJP on the defensive. However, Chandel said, "Since the case is still pending in court, the matter is *sub-judice*. Charges have not been framed, and the action of the then Speaker, Somnath Chatterjee, was disciplinary in nature, and the charges have yet to be proved." BJP Lok Sabha member from Shimla Virender Kashyap also faced corruption charges when a video purportedly showing him accepting money from people setting up a private university was released.

Cases against former minister and BJP nominee from Nahan Rajiv Bindal were still pending with the Vigilance Bureau, which had sought sanction to prosecute him from the Vidhan Sabha Speaker. The challan was likely to be put up in court but was not. The vigilance Bureau did not make much headway in the complaints that had been filed with it against ministers in the Vir Bhadra regime, an issue that had also figured in a "charge sheet" prepared by the BJP against the Congress regime. Only in the matter related to resale of land by Himalayan Fertiliser in Nalagarh was case registered against Vir Bhadra Singh and his entire Cabinet.

Congress Charge Sheet : The Congress prepared an 85 pages charge sheet, listing "irregularities" in various departments and allegations of corruption against the Chief Minister, his family and ministers. Raising the

slogan of *"Himachal on Sale"*, the Congress alleged that permission had been granted for purchase of thousands of acres of land by private universities, religious and charitable institutions and real estate developers in violation of Section 118 of the Tenancy and Land Ceiling Act, which prohibits purchase of land by non-Himachalis. This, they pointed out, had led to several *'benami'* land deals.

The Bemloe housing project, located amidst a thick deodar forest on the outskirts of Shimla, was one such case. The Congress alleged that Dhumal regime granted all required permissions for the plush cottages in a day. It also raised questions over the "delay" in the acquisition of the heritage property of Bantony on the Mall, which was being converted into a hotel by a London-based NRI. The Congress also attacked the Dhumal regime for the "benevolence" in giving prime land at Dharamshala, Shimla, Nadaun and Gumma to the HP Cricket Association headed by Anurag Thakur, Dhumal's son and MP. They also accused the government of trying to hand him over the Annandale Ground in Shimla, currently with the Army, to convert it into a cricket stadium.

The UPA Shadow: Adding to the Congress' unease was the pervading shadow of scams involving Central ministers, regarding which the party has had to do a lot of explaining. Charges referring to Robert Vadra had only made things more difficult. The ban on the number of subsidised LPG cylinders imposed by the Centre too emerged as a major poll issue in the hill state, which has long winter months. Vir Bhadra Singh tried to counter this by announcing that if voted to power, the Congress would provide subsidy on three more cylinders.

The other issues which equally impacted the mind of the voters were, setting up of large number of Private Universities, creation of new districts, financial health of the state, economic liabilities, Status of Public Sector Units etc. To understand the complete background of 2012 Vidhan Sabha election, these issues have also been discussed here thread-ware.

Private Varsities: The BJP government set out to make the hill state a hub of higher education, but what prevails was academic anarchy caused by the 'indiscriminate' opening of private institutions of doubtful credentials, without assessing the requirement. The manner in which private universities were allowed to open without any vision, justification or plan raised questions over the intentions of the government. The Congress and the CPM had made it a major issue, accusing the government of serving the interests of the land *mafia* in the garb of promoting higher education.

The fact that no uniform policy was followed while granting permission for acquiring land under Section 118 of the Land Reforms and Tenancy Act, lends currency to the allegation. While some institutions were allowed to purchase huge chunks of land, some did not fulfil the minimum stipulated quantum, making it obvious the entire process was arbitrary and not based on

legitimate stipulations. With no social science streams, most of the universities offering engineering and management courses. Out of the total 16 universities set up so far, 10 came up in Solan district, which accounts for just 9 per cent of the state's population. In fact three universities set up in one panchayat. Arni University in Kangra district was allowed to acquire 624 bigha of land, while Sai University Palampur, could set up in only 52 bighas. Eyebrows were raised when it became known that former Haryana minister Gopal Kanda, who came into limelight with the suicide case of his Secretary had acquired Arni University.

Intriguingly, the government prescribed a minimum requirement of 50 *bigha* of land at one place, but did not fix any upper limit. However even the minimum limit was not adhered to as evident from the case of Manav Bharti University, which had only 30 bighas at Sultanpur in Solan. The other piece of 45 bighas and 10 biswas was at Kaunihat in Sirmaur. The Baddi University of Engineering Sciences was allowed to acquire 131 bighas, Mahrishi Markandeshwar University 232 bighas. Chitkara University bought 67,835 sq m, APG University 219 bigha and Career point 10 bigha, while the Institute of Chartered Financial Analysts of India University purchased 1,97,790 sq m land from HIMUDA. Indus University, Una was allowed to acquire 57 bighas. The Kalighar Trust which sponsored Eternal University, Badu Sahib was already in possession of 102 acres.

Some of the private universities also indulged in gross irregularities and committed illegalities, making a mockery of UGC rules and regulation. Some even admitted students after Class X, instead of plus two as laid down under the law jeopardizing the future of hundreds of students whose degrees cannot be recognised. The universities claimed they have got approval but, it is meaningless as the government is not competent to grant permission in contravention of the law and UGC regulations. On the other hand many universities had enrolled students for Ph. D in violation of UGC regulations, as they do not have any postgraduate classes or qualified faculty.

True dimensions of the admission scam were revealed when the State Private Educational Institutions Regulatory Commission carried out inspection of Manav Bharti University. It was revealed that 115 students had been admitted in violation of norms in the 2011-12 session alone and Rs 41.92 lakh had been charged as fee from them. The commission imposed a fine of Rs 1 core for a number of irregularities. There had been instances of private universities admitting students even before coming into existence. The government promulgated ordinances to set up private universities, even though there were few taker for the seats. Most universities lack qualified faculty, as was evident from the meagre spending on salaries, which range from 20 to 40 per cent of receipts, as against the normative 60 per cent. In case of state universities, it is as high as 80 per cent.

Chief Minister Prem Kumar Dhumal and other ministers had repeatedly been quoting Union minister for Human Resource Development Kapil Sibal's

statement that the country needs 50,000 colleges and 1,000 universities to raise the gross Enrolment Ratio (GER) in higher education from the existing 12 per cent to 25 per cent by 2020. While 16 private universities are already functional and five more letters of intent had been given, the government had not bothered to open any colleges in the private sector. Rather it has taken over many private colleges. The only apparent reasons is that private universities are competent to award degrees, whereas students of private colleges will have to clear the examinations conducted by the university they are affiliated to.

Instead of raising the academic standards, the government had been consistently lowering the minimum eligibility criteria. The minimum marks for admission to B.Ed. colleges have been lowered and admissions at times are allowed mid-session as late as January, with examinations held in May for a one year course. It is of common knowledge that most students do not attend classes and only take the exams. In fact the government was also allowing its own universities to carry out admissions in violation of the law. The decision of the newly set up State Technical and vocational Educational Institutions (Regulations of Admission and Fixation of Fee) Act was an example. The Act says admission will be carried out on the basis of a national or state-level entrance test, but the newly set up university allowed affiliated private institutions to admit students without having appeared in the All India Engineering Entrance Test (AIEEE).

That it is more the business interest that decides matters was apparent from the fact that despite bypassing the entrance test, more than 40 per cent of the seats in 17 engineering colleges affiliated to the university are lying vacant. The pass percentage of the first-semester examination was a dismal 11 per cent. Some polytechnic institutions even recorded zero per cent result. The State Private Educational Institutions Regulatory Commission took some measures to bring transparency in admissions and streamline the functioning of private universities, but it will take a long time to restore credibility. The issue of private Universities remained as a focal point during 2012 Vidhan Sabha election.

The Issue of New Districts : The issue of carving out new districts from Kangra, the biggest district in the state in terms of population and number of Assembly constituencies, remained a hot issue through out the last year of the BJP government. The government - egged by Chief Minister Prem Kumar Dhumal's loyalists, Minister for IPH Ravinder Ravi and Independent MLA from Nurpur Rakesh Pathania first floated the idea of creating of new districts casually. The move was aimed at assessing the public sentiment on the issue. It was also hoped it would help the BJP counter the anti-incumbency factor in the district, which accounts for more than 20 per cent of the Assembly segments.

Rakesh Pathania spearheaded the movement, demanding district status for Nurpur subdivision. Since Dehra subdivision is part of the Hamirpur parlia-

mentary constituency, represented by Anurag Thakur, Dhumal's son, one lobby also wanted district status for Dehra. However the idea was opposed by national Vice-President of the BJP Shanta Kumar and his loyalists. They believed the move was aimed at finishing the veteran's clout in Kangra. Those opposed included Minister for Industries Kishan Kapoor, who represented the Dharamshala Assembly constituency, which is district headquarters of Kangra. The group opposing new districts would not provide any political gain to the BJP. They cited the example of a similar move by the then BJP government in 2002 when just before election on the government had appointed ADCs in Palampur, Nurpur and Dehra to suggest the subdivision would be converted into districts after elections. However, the BJP lost the elections in most of the affected areas. Shanta Kumar was also miffed at the thought that despite his being from the district, no party leader consulted him on the issue before making announcements. His stand forced the government to shelve the issue.

This was rather shocking that how Shanta Kumar attached his sentiments to the Kangra district. While the people of the district have ignored and defeated him both for Vidhan Sabha and Lok Sabha many a time. The creation of more districts should be viewed as a step for speedy actions on various plans and easy access to the administration. He should not forget that Hamirpur and Una were also part of Kangra district before 1972 and represent the same social, cultural and economic values as their parent district i.e. Kangra does. Should we merge these two districts with Kangra as an excuse of their being of same social and cultural ethos.

The Congress also found itself in a catch-22 situation. Fearing backlash in areas where there was a demand for new districts, party leaders like G.S Bali merely questioned the timing of the move, but didn't oppose the idea. The most curious argument at the time had come from Vijay Singh Mankotia, who said Kangra had never displayed unity as a district. Has there been unity, the post of Chief Minister would never have gone out of the area, Major Mankotia advocating smaller districts also from the administrative point of view. The issue, however remained more political than administrative. The existing districts lack infrastructure. In Kangra, there is shortage of space for government offices and courts, despite a new secretariat being built at Dharamshala. New districts would only spread the resources thinner.

A group of senior leaders within BJP formed *'Bhrastachar Mukati Morcha'* (BMM) against their own Government Ministers. These leaders were Maheshwar Singh, Radha Raman Shastri, Sarla Sharma, Mohinder Sofat, Naveen Dhiman and Tikku Thakur. When they could not get their grievances redressed within the party framework, then on 3rd February 2012, they formed Himachal Pradesh Lokhit Party (HLP), under former party president of BJP Mr. Maheshwar Singh. The BJP which had been hoping to ride the *"Anna wave"* to retain power in the state found itself in an embarrassing situation with a group of senior leaders deserting the party on the issue of corruption. Things would not have gone that far if the party high command had taken

due notice of the issues raised by these leaders and had taken corrective measures. The dissidents have been raising the issue of corruption and other grievances pertaining to the functioning of the party organisation and the government for the past some time.

Himachal Progressive Alliance : In their bid to give a "third alternative in the state Assembly election in 2012", a motley group of political fronts had announced the launch of the Himachal Progressive Alliance (HPA) of non-BJP and non-Congress parties with the nationalist Congress Party (NCP) taking a lead in this regard in Mandi, political hub in the central range, which has 10 Assembly seats. HPA's executive president, Anirudh Sharma, who was also the state president of the NCP took the initiative.

The issue of financial health always come up during election time. The state's resources had grown by just Rs 1,729 crore over the past three years from 2009 to 2012 as against its committed liabilities of Rs. 2,540 crore. To come out of this mess, the government was expected to stay clear of populism, lighten the salary burden and address the losses on account of PSUs and power board. With the fiscal responsibility and Budget Management the state was forced to exercise a degree of fiscal discipline.

The government no longer has the luxury of raising indiscriminate loans, but it is not providing any respite from the perennial financial crisis and only leading to compression of expenditure. The fiscal woes of the state multiplying with each passing day due to the mounting wage bill, interest burden and other committed liabilities. The issue of loan, subsidy, debt, salary, pension etc. had been frankly discussed and misused to malign each other.

The Liabilities : The financial health of the debt-ridden state had been steadily worsening due to the inability of successive regimes to contain the swelling wage bill and mobilise resources. The gravity of the situation can be judged from the fact that the government expenditure on committed liabilities was higher of its own tax and non-tax revenue in 2013-14. The committed expenditure on salaries, pensions and interest liability mounting with each passing year but the state's revenue was not growing at the same pace. The annual outgo on account of salaries shot up from Rs. 2,615 crore in 2007-98 to Rs. 6,956 crore in 2013-14 and projected to reach Rs 9,520 crore by 2016-17 Similarly, the pension burden increased from Rs. 880 crore to Rs. 2,839 crore and likely to touch Rs 3,990 by 2016-17 while the interest liability will swell from Rs. 1,778 crore to Rs. 2,431 crore and to Rs. 3,374 by 2016-17.

The state's own resources grew by just Rs. 1,729 crore over the past three years (2009-2012) whereas the committed liabilities on account of salary, pension and interest on loans increased by Rs. 2,540 crore over the period. The outstanding debt increased from Rs. 21,241 crore on March 2008 and Rs. 28,513 crore in 2013. It is set to cross the Rs 31,000 crore by the end of 2014. The only redeeming feature is that the outstanding debt as percentage of the Gross State Domestic product (GSDP) was projected to improve from

39.58 per cent in 2012-13 to 33.86 per cent in 2016-17.

As per the fiscal correction path chalked out by the World Bank while granting the Rs 900 crore development policy loan to pull the state out of the debt trap, the ratio of fiscal deficit to the GSDP was to be reduced from 3.4 per cent in 2007-08 to 2.2 per cent in 2011-12 by implementing the approved *"policy matrix"* The figure of 2.85 per cent for 2013-14 was higher though it was within the norm of 3 per cent. Over indulgence in populism and inability to raise resources has been undermining fiscal stability of the state and hurting the pace of development. The tax revenue as percentage of the GSDP was set to decline from 7.03 per cent in 2012-13 to 6.59 per cent in 2013-14 As per the medium term fiscal plan statement, the figure will increase only marginally to 6.66 per cent by 2016-17.

Pay Panel Must : There was no downsizing of the administration despite switch over to governance and the number of employees has been increasing. The number was projected to go up from 2,25,113 in 2012-13 to 2,28,409 in 2013-14. The fact that the state is committed to grant pay scales on the Punjab pattern does not help. Given the scant resources and limited scope for revenue generation the state should have set up its own pay commission but no government has the courage to do so as it will have adverse political fallout. The BJP government lost a golden opportunity when it responded negatively to the advice of the state High Court to consider the option of having its own pay commission.

Successive governments have been coming out with ad hoc schemes like voluntary teachers and PTA teachers to avoid recruitment of "expensive" regular staff. Even appointments of doctors and other hospital staff have been made through 'Rogi Kalyan Samitis' for the same reason. Such measures affecting the quality of services, particularly in the education and health sectors, as evident from the declining learning levels at school and the mess created by indiscriminate opening of private universities at the higher level. Both political parties have been misusing the clout of Union leaders, to generate support for the party in power.

The lack of funds was also hurting development as almost 88 per cent of the budget was being utilised to meet the committed expenditure and only 12 per cent was available for development. The roads were in bad shape as there was not enough money for maintenance. The policy to recruit employees on contract basis has lost its purpose due to competitive populism. Initially, there was no provision for regularisation and periodical increase in wages did not put much burden on the state exchequer. However, subsequently the government came out with a policy for regularisation of contract employees after eight years of service, which was reduced to six years on the eve of election. It would have been better for the state to have its own pay structure for new employees.

The Public sector units have also been contributing to the poor economic

position of the state. These are purely white elephants, where party workers have been given employment. The financial position and functioning of public sector undertakings (PSUs) deteriorating due to lack of political will to carry out fiscal reforms. The aggregate losses of the 20 PSUs exceeded the equity share of the government for the first time in 2011-12. The cumulative losses shot up during the year from Rs. 1,666 crore to Rs. 522 crore, (2011-12) exceeding the government investment to Rs. 2,022 crore form Rs. 1,877 crore. As many as 12 PSUs have been perpetually in the red. The number of employees in these units declined marginally from 43,165 to 42,386 during the 2010-12. It is obvious that the stringent norms laid down by the 13th Finance Commission to restrain the government from extending "soft" loans or make "imprudent" investments to bail out inefficient PSUs has not helped. As per, a minimum of 5 per cent return on investment was made mandatory and an interest of 7 per cent was to be charged on all loans advanced to sustain loss-incurring units. These norms have not been followed over the past three years.

OUTSTANDING DEBT (Rupees in Crores)

2007-08	2008-09	2009-10	2010-11	2011-12	2012-13
Rs.124	Rs.23,151	Rs.23,164	Rs.24,960	Rs.26,494	Rs.28,513

Gross State Domestic Product

2012-13	2013-14	2014-15	2015-16	2016-17
Rs. 72,045	Rs. 81,582	Rs. 92,810	Rs. 1,05,099	Rs. 1,19,560

Committed Liabilities

Year	Salary	Pension	Interest	Subsidies
2012-13	Rs. 6,146 cr	Rs. 2,494 cr	Rs. 2,297 cr	Rs. 623 cr
2013-14	Rs. 6,956 cr	Rs. 2,833 cr	Rs. 2,431 cr	Rs. 697 cr
2014-15	Rs. 7,775 cr	Rs. 310 cr	Rs. 2,768 cr	Rs. 733 cr
2015-16	Rs. 8,575 cr	Rs. 3,560 cr	Rs. 3,052 cr	Rs. 792
2016-17	Rs. 9,520 c	Rs. 3,990 cr	Rs. 3,374 cr	Rs. 855 cr

Year	Tax revenue	Non-tax revenue	Plan exp.	Non-plan exp.
2012-13	Rs. 5,068 cr	Rs. 1,902 cr	Rs. 1,693 cr	Rs. 14,217 cr
2013-14	Rs. 5,373 cr	Rs. 2,393 cr	Rs. 1,718 cr	Rs. 15,720 cr
2014-15	Rs. 6,125 cr	Rs. 2,613 cr	Rs. 1,805 cr	Rs. 17,506 cr
2015-16	Rs. 6,983 cr	Rs. 2,757 cr	Rs.1,895 cr	Rs. 19,390 cr
2016-17	Rs. 7,960 cr	Rs. 2,910 cr	Rs.1,990 cr	Rs. 21,489 cr

Consequently, the PSUs plunged deeper in the red. The state electricity board, with the highest number of 25,208 employees, accumulated the maximum loss of Rs 1,406 crore including Rs 512 crore during 2011-12 as on March 31,2012. It crossed the Rs 2,000 crore mark by the end of the financial year 2012-13. The failure of the government to carry out proper restructuring to segregate the functions of distribution, generation and transmission turned a

profit-earning board into a loss-incurring unit within a short period. The state has been blaming the "faulty" recommendations of the 13th Finance Commission for its woes and maintaining that it underassessed its committed liabilities as a result of which the state received a much less revenue deficit grant.

The uncovered gap in committed liabilities of the state on account of pensions, salaries and interest worked out to Rs 3,522 crore during 2012-13 and increased to Rs 4,043 crore during 2013-14. It sought a special economic package of Rs 7,565 crore to tide over the difficult financial situation but the centre refused to do so. The only ray of hope was that the state may get the arrears of its claim in the BBMB pockets. The amount worked out in accordance with the Supreme Court verdict by the committee set up for the purpose was Rs 4,250 crore, but the centre reduced it by Rs 850 crore after taking certain aspects into consideration. So for centre neither helped the state with special package nor BBMB's liability was fixed as per original arrangement.

Finally Election Commission of India declared the election schedule for Vidhan Sabha election 2012 in October, 2012. The election day was fixed on 4th November, 2012 and counting day on 20th December, 2012, as there were some more states going to poll in November-December, 2012. All political parties declared their candidates and jumped in the election fray, which was presumed to be fierce and bitter one. Himachal Pradesh, otherwise perceived as a poor state, had a billionaire amongst its ranks of politicians contested the Assembly elections in the state. Brij Behari Butail, the Congress (I) candidate from Palampur in Kangra district, was the richest politician contesting elections, owning movable and immovable assets worth more than Rs 100 crore. He owes it to the value of tea gardens he owns in Palampur. Butail is a former revenue minister and belongs to the family that has been affiliated with the Congress (I) from the very beginning.

His elder brother Kunj Behari Lal Butail was a former head of the HPCC. Brij Behari Butail won his first election in 1985 from Palampur. Right from the start of his political career, he had been squaring off against BJP stalwart Shanta Kumar, with both leaders defeating each other consecutively from the Palampur Assembly constituency. In the last Assembly elections 2007 Brij Behari Butail was defeated by BJP candidate Parveen Sharma, a Shanta's protege. He is a leading tea planter of the state and owns maximum land in Palampur town. The Butail family was able to retain a majority of its land even after the land ceiling of 300 kanal per person was imposed in the state, as the state government exempted the tea garden land from the land ceiling Act. The exemption had come with the condition that the land could not be diverted for any other purpose. But Butail family's tea garden land was diverted for housing colonies in Palampur. G.S Bali, the Congress candidate from Nagrota Bagwan, had disclosed an annual income of Rs 1,06,02,721 in his tax return for 2011-12.

In their affidavits of income filed before the returning officers, a majority of contesting candidates have disclosed meager annual incomes despite

having assets worth crores of rupees. The annual income of some candidates from Kangra district: Kishan Kapoor (BJP-Dharamshala) Rs 7,35,000; Ravinder Ravi (BJP-Dehra) Rs 5,42,032; Rakesh Pathania (Independent-Nurpur) Rs 5, 31, 640; Ajay Mahajan (Con.-Nurpur) Rs 3, 89,707; and Sujjan Singh Pathania (Cong.-Fatehpur) Rs 3,47,436. The election of 2012, Vidhan Sabha was not issue based, it was more focussed on personal rivalries. In some cases derogatory language was also used to malign each other. Character assassination, fake charges and misuse of public platform were common every where. Sponsored/ paid news were also used to mislead the voters.

In 2012 legislative assembly, a loss of 5.31 per cent in its vote share cost the Bhartiya Janata Party (BJP) 15 seats while the Congress romped home with 13 more seats in its kitty with an increase of a mere 3.27 per cent compared to the 2007 elections. The Congress got 42.81 per cent of the total votes polled this time compared to 39.54 per cent in the last Assembly elections in 2007. In the 68 member House, its tally went up from 23 in 2007 to 36 this time. On the other hand, the BJP got a vote percentage of 38.47 compared to 43.78 in the last elections, reducing its legislators from 41 to 26. Significantly, it lost four seats to its rebels who won as Independents. The performance of the Communist Party of India, the Bahujan Samaj Party the Samajwadi Party, the Trinamool Congress, the Lok Janatantrik Party and the Shiv Sena was poor.

These parties had a mere token presence in the elections. The Communist Party of India (Marxist) did well in a handful of its traditional pockets, but could not manage a win. The collective share of the two main political parties, which was 83.32 per cent in the last elections, declined marginally to 81.28 per cent this time.

The performance of the Himachal Lokhit Party (HLP) was far from impressive. Aiming to repeat the performance of the Himachal Vikas Congress (HVC) floated by former Telecommunications Minister Sukh Ram in 1998, it could not replicate a Power-deciding swing. This was a strange coincidence that HVC and HLP were allotted the same election symbol *"Telephone"*. While HVC's founder was Pt. Sukh Ram a rebel of Congress (I) and hailing from Mandi district and HLP founder Maheshwar Singh from Kullu, and a rebel of BJP. Both these leaders had contested against each other from Mandi Lok Sabha seat in the past. Mr. Sukh Ram had the privilege to be minister in the Union Cabinet and also at the state level, and Maheshwar Singh state BJP President, Member of Lok Sabha and Rajya Sabha. Both leaders had enough from their respective parties, yet for their personal gains they formed new political outfits without much clout in the larger part of the state. The formation of political parties by these two leaders was nothing but political resentment against their parent organization.

While the HVC had won five seats in 1998 and polled about nine per cent of the votes, the HLP managed to win only one seat and got barely 2.5 per cent of the total votes. Compared to the HLP, the performance of Independent candidates was impressive, with five of them winning. The share of votes polled

infavour of 106 Independent candidates this time showed a slight increase over last time, when 60 of them were in the fray. This time, about a dozen Independent candidates, mostly rebels from the Congress and BJP, did well by polling more than one lakh votes. The 60 Independent candidates in the fray in 2007 had got a vote share of 14.2 per cent and had won three seats.

National Parties Fail to Make Impact: None of the national parties like the Samajwadi Party (SP), the Bahujan Samajwadi Party (BSP), the CPM and the CPI, nor the latest outfit floated by BJP dissidents, Himachal Lokhit Party (HLP), could touch the one lakh figure in terms of votes they polled in the Assembly elections this time. Among the 15 political parties who had put up candidates, none except the Congress and the BJP crossed the one lakh mark.

The performance of the HLP can at best be termed decent as its 36 candidates polled 81,024 votes with the poll percentage touching 2.39 per cent. Barring the Congress and the BJP, it is only the 106 Independents who managed to put up a good show by polling 4.10 lakh as compared to 2.62 lakh in the 2007 poll. In fact, six of them, as compared to three in the previous poll, won. A total of 33,81,023 votes were polled this time as compared to 32,91,666 votes in 2007. The vote share of the BSP showed a tremendous decline from 2.38 lakh in 2007 to 39,575 this time with a mere 1.17 per cent. With former minister Vijay Singh Mankotia as its state convener, the BSP had not only won the seat of Kangra as Sanjay Chaudhary emerged victorious, but its candidates also performed well in districts like Kangra, Una, Hamirpur and Bilaspur.

The CPM also enhanced its vote share marginally as compared to 18,916 votes polled last time its candidates polled 39,081 votes at 1.15 per cent. The share of the CPI remained almost static as compared to 6,366 votes it polled in 2007, this time it touched 6,525 votes. Notwithstanding the loud shrill created by the All-India Trinamool Congress in its campaigning in the hill state, its party candidates got merely 16,495 votes in its favour at a mere 0.48 per cent. The votes polled for the Congress went up from 12.80 lakh in 2007 to 14.47 lakh this time, thereby giving a gain of 13 Assembly seats. The Congress had a total of 23 seats in the last assembly while this time it got 36 legislators. The BJP's vote bank dipped from 14.41 lakh to 13 lakh this time, thereby denying it the chance to create history by returning to power. As such the number of BJP legislators too went down from 41 in 2007 to 26 this time.

CPM	39,081	1.15
AITMC	16,495	0.48
Loke Jan Shakti Party	14,880	0.44
CPI	6525	0.19
Himachal Swabhiman Party	6571	0.19
SP	3882	0.11
Shiv Sena	1220	0.03

Assets of 47 MLAs up 184% in 2007-12: The assets of newly elected legislators grew by a staggering 184 per cent, on the average, in the last five years, according to the National Election Watch (NEW), non-government organization that monitors elections in the country. Rajiv Sazal, the Bhartiya Janata Party (BJP) legislator from Kasauli, leads the pack. His assets were grown by 1,936 per cent, from Rs 1.53 lakh in 2007 to Rs 29.52 lakh in 2012.

The assets of Anil Sharma, the Congress legislator from Mandi, who was the richest, have increased from Rs 3.11 crore in 2007 to Rs 29.70 crore in 2012. The assets of G.S Bali, the Congress legislator from Nagrota Bagwan, Who was the second richest, increased from Rs 3.81 crore in 2007 to Rs 24.85 crore in 2012. The assets of Brij Bihari Lal Butail, the Congress legislator from Palampur, increased from Rs 91.92 crore in 2007 to Rs 169.21 crore in 2012. He had lost in 2007. Vir Bhadra Singh had shown an increase from Rs 24.18 crore in 2007 to Rs 33.65 crore in 2012. His assets grew by 39 per cent. Outgoing Chief Minister PK Dhumal showed an increase of 119 per cent. KD Dharmani, the BJP legislator from Jhandutta, had an increase of 874 per cent.

Vidya Stokes, the Congress legislator from Theog, had shown a growth of 724 per cent. Ajay Mahajan, the Congress legislator from Nurpur, had shown an increase of 624 per cent. Sudhir Sharma, the Congress legislator from Dharamshala, showed a growth of 484 per cent. Gobind Thakur, the BJP legislator from Manali had shown an increase of 444 per cent. The assets of outgoing BJP ministers Sarveen Chaudhary (Shahpur), Ravinder Singh Ravi (Thural), Jai Ram Thakur (Seraj), Rajiv Bindal (Nahan) and Gulab Singh Thakur (Jogindernagar), All reelected, had increased by 426, per cent, 404 per cent, 334, per cent. 301 per cent and 178 per cent, respectively. The average assets of newly elected BJP legislators, also elected in 2007, increased by 181 per cent and all of them are *'crorepatis'*. The average assets of 12 Congress legislators, all reelected, gone up by 184 per cent.

In 2012 Vidhan Sabha election, there were 459 total candidates, 425 male and 34 female. Total voter were 4608359, out of that 2876857 were male and

2231972 female. Dehra constituency had maximum contestants i.e. 16 and Churah and Nadaun minimum 3 each. In total 9191 EVM machines were used (including reserve). In total 68 constituencies, 7252 polling station were created, Sulah had maximum voters 89293 and Lahaul-Spiti minimum 22344 voters. After the result of 2012 Vidhan Sabha election four independent candidates; Kirnesh Jung (Paonta), Balvir Verma (Chaupal), Manohar Dhiman (Indora) and Rajinder Rana (Sujanpur) became associate member of Congress (I), in January 2013, thus making ruling party much stronger.

Kangra District the Decider : With the Assembly poll result in most districts being a mixed bag, Kangra once again proved to be the deciding factor in favour of the Congress, which not only won 10 of the 15 seats in the largest district, but also strengthened its hold over its bastion, Shimla distinct. The inroads made by the Bhartiya Janata Party (BJP) into the Congress stronghold of Sirmaur proved futile as Kangra, in keeping with its reputation of alternative swing in favour of either party, ensured the formation of the Vir Bhadra Singh-led government.

During the last elections, the BJP had won eight seats in Kangra when the total number of seats was 16. Its tally later went up to nine as the Bahujan Samaj Party legislator from Kangra, Sanjay Chaudhary, joined the party in power. This time, Shimla played a crucial role in bringing the Congress back to power with six of the eight seats in its kitty. The party marginalised its rival, with the BJP winning just one seat. One seat was won by an Independent. In 2007, the Congress had won five seat and the BJP two while one went to an Independent.

The BJP also received a setback in Hamirpur, the home district of Prem Kumar Dhumal. The party had swept all five seats in 2007. Contrary to its prediction of sweeping the elections in the districts again, the BJP managed only three this time. While the Congress won one seat, one went to a BJP rebel who contested as an Independent. The situation was reversed in Sirmaur, where the BJP won three seats compared to one in 2007. The Congress was left high and dry with just one seat in sharp contrast to the four it won in the last elections. One seat was won by a Congress rebel who contested as an Independent. In Solan, where the BJP had swept all five seats in 2007, the party lost two seats this time. In Mandi, with 10 seats, the scale was evenly balanced as the Congress and the BJP won five each. In 2007, the BJP had won six seats and the Congress three while one was won by an Independent.

The three tribal seats of Kinnaur, Lahaul-Spiti and Bharmaur, which were won by the BJP in the last Assembly elections, were wrested by the Congress this time. The rest of the districts, Kullu, Bilaspur, Chamba and Una, gave mixed

Vir Bhadra Singh was Lok Sabha member when he became Chief Minister, so he resigned and proposed his wife's name for Parliamentary election from Mandi seat, which was readily accepted. The new ministry was formed under the headship of Mr. Vir Bhadra Singh, who became Chief Minister for the sixth time. The other members were as follows-

Shri Vir Bhadra Singh; Chief Minister: All the Departments, which were not allocated to other minister.

Smt. Vidya Stokes; Irrigation & Public Health Minister: Horticulture & Information Technology

Shri Kaul Singh Thakur; Health & Family Welfare Minister: Revenue, Law & Legal Remembrance & Medical Education

Shri G.S. Bali; Food, Civil Supplies & Consumers Affairs Minister: Transport, Technical Education, Vocational & Industrial Training

Shri Sujan Singh Pathania; MPP & Power Minister :Non- Conventional Energy Sources & Agriculture

Shri Thakur Singh Bharmauri; Forest Minister: Fisheries

Shri Mukesh Agnihotri; Industry Minister: Labour & Employment, Parliamentary Affairs, Information & Public Relations

Shri Sudhir Sharma; Urban Development Minister: Housing, Town & Country Planning

Shri Prakash Chaudhary; Excise & Taxation Minister: Sainik Welfare

Shri Anil Kumar; Rural Development Minister: Panchayati Raj & Animal Husbandry

CHIEF PARLIAMENTARY SECRETARY

Shri Neeraj Bharti; Chief Parliamentary Secretary : Education (Attached with Chief Minister)

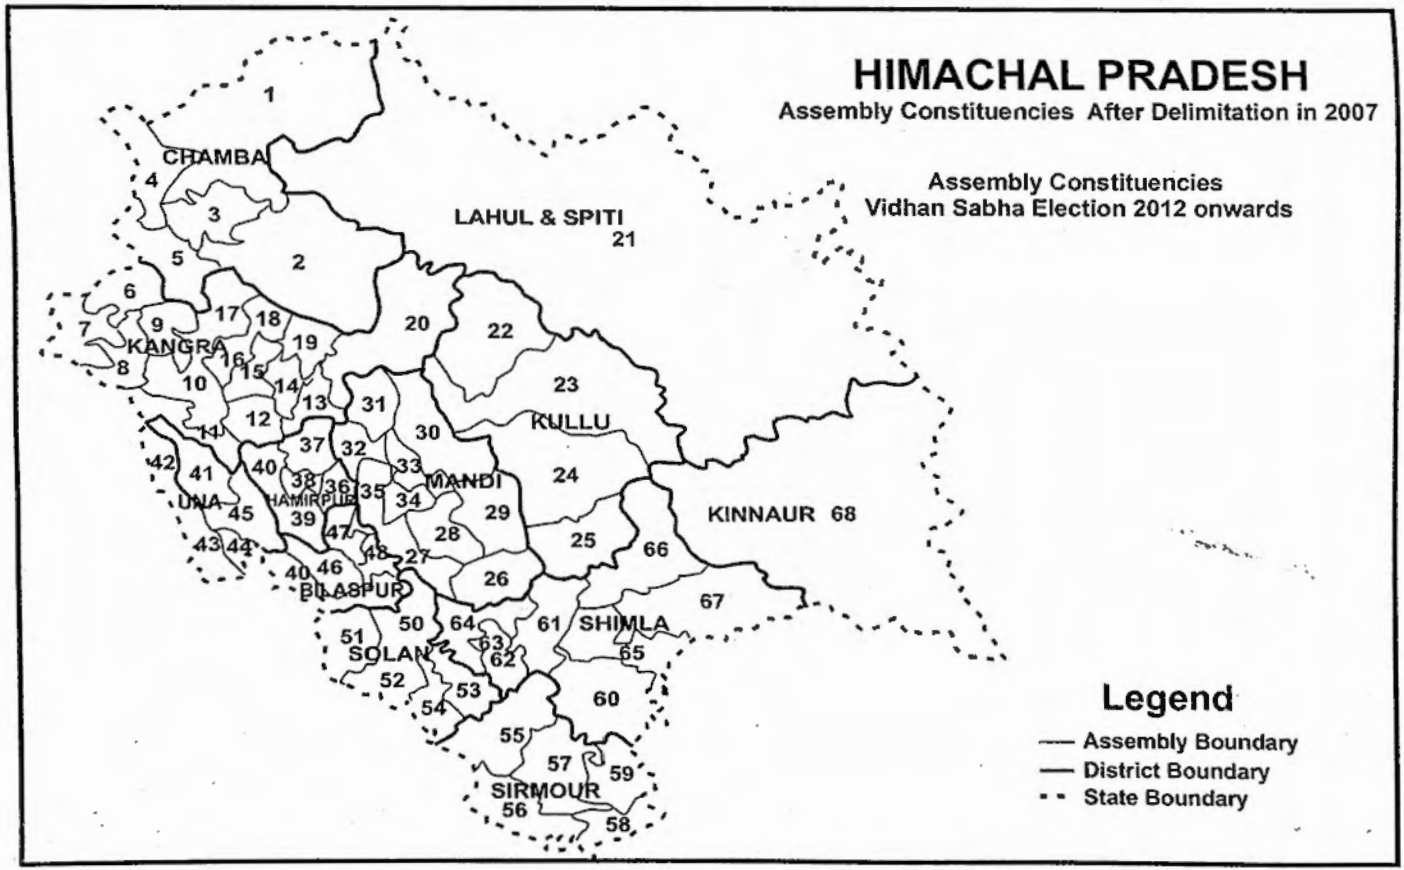
Shri Rajesh Dharmani; Chief Parliamentary Secretary : Forest (Attached with Chief Minister)

Shri Vinay Kumar; Chief Parliamentary Secretary : Public Works (Attached with Chief Minister)

*Shri JagjiwanPaul; Chief Parliamentary Secretary : Irrigation & Public Health (Attached with Irrigation & Public Health Minister)

*Shri Rakesh Kalia; Chief Parliamentary Secretary : Ayurveda (Attached with Chief Minister)

*Shri Nand Lal; Chief Parliamentary Secretary : Health (Attached with Health & Family Welfare Minister)



*Shri Rohit Thakur; Chief Parliamentary Secretary : Agriculture (Attached with MPP & Power Minister)

*Shri Sohan Lal Thakur; Chief Parliamentary Secretary : Panchayati Raj (Attached with Rural Development Minister)

*Shri Inder Dutt Lakhanpal; Chief Parliamentary Secretary: Rural Development (Attached with Rural Development Minister)

On 13th May 2013 six more Chief Parliamentary secretaries were inducted. They were- Mr. Jagjivan Pal (Sulah), Rakesh Kalia (Gagret), Nand Lal (Rampur), Rohit Thakur (Jubbal-Kotkhai), Sohan Lal (Sunder Nagar) and Inder Dutt Lakhan Pal (Barsar).

Mandi Lok Sabha by election 2013: A swing of 14.52 per cent in votes in the party's favour in the Mandi Lok Sabha in the by- election 2013, came as a new arsenal for the Congress ahead of the 2014 Lok Sabha poll. The BJP suffered a drastic drop of about 8.62 per cent in its vote share as compared to the 2009 Lok Sabha poll. In 2009, the Congress vote share was around 47 per cent while the BJP's was 45.85 per cent. The mood of voters was understandable as it is the second largest constituency in

the country and influences voters in six districts - Mandi, Kullu, Shimla (Rampur), Kinnaur, Lahaul-Spiti and Chamba (Pangi and Bharmaur). The voters gave a massive mandate to ruling Congress candidate Pratibha Singh, wife of Chief Minister Vir Bhadra Singh. She defeated her BJP rival Jai Ram Thakur by 1,36,704 votes that pressed a virtual panic button for the BJP in the state. The Congress increased its vote share and the BJP lost its four Assembly seats - Nachan, Sarkaghat, Jogindernagar and Manali - to the Congress and its vote share dropped by 8.62 per cent.

Pratibha Singh got 60.09 per cent of the votes polled, which was the highest for any Congress candidate in the last three Lok Sabha elections. Vir Bhadra's 22 day campaign again demonstrated that his mass base remained unchallenged in Mandi. The BJP that fielded its best candidate almost exhausted its "Modi card" and the good performance of Pratibha Singh as the mood of voters indicated that they followed the ruling party in the state. Vir Bhadra made the Congress sweep in 16, Assembly seats - eight out of nine seats in Mandi, all four in Kullu and all three tribal seats. Jai Ram led only in Seraj by 2,556 votes. Pratibha Singh secured a lead of 48543 votes in Mandi district, 32946 votes in Kullu district and 33674 votes in three tribal segments - Bharmaur (16,117 votes), and the flood-hit Kinnaur (11566 votes) and Lahaul-Spiti (5991 votes) against Jai Ram. Vir Bhadra united all local factions and even detractors like Kaul Singh Thakur campaigned in his Darang constituency. Pratibha Singh improved the congress victory margin and percentage of votes polled in 2004 as well. She had got 53.41 per cent of votes polled in 2004, while then BJP candidate Maheshwar Singh had secured 43.47 per cent. The total polling was 62.91 per cent then.

For Mandi Lok Sabha seat in 2013 by-election only 52 percent voters cast their vote.

The politics in Himachal is basically turning out to be personality oriented conglomeration since 1980. Since 1980 BJP remained coiled around Shanta Kumar and from 1998 Prem Kumar Dhumal, while the Congress remained under the control of Vir Bhadra Singh. In the last week of December 2013 BJP revived its old charges of corruption against Chief minister Vir Bhadra Singh with solid documentary proof. The politics of vendetta continued in the state as Congress Government initiated vigilance enquiry against Himachal Pradesh Cricket Association (HPCA) and its president Mr. Anurag Thakur, son of ex-chief-minister Prem Kumar Dhumal. On 26 October 2013 State Government at the midnight operation, sealed all stadiums of HPCA and its property. The lease granted to HPCA for its stadiums at Dharamshala, Amtar (Nadaun) Luhnu (Bilaspur) Gumma (Mandi) was cancelled and local administration took over the whole property. Shimla Municipal Corporation, headed by Communist party also initiated action against Lalpani Cricket Academy.

On 4th November 2013, the state high court quashed the order of the state Government and restored *status quo* with the order that all stadiums

should be handed over to HPCA or its authorised body. Defeated in the legal spectrum Congress Government initiated vigilance enquiry against many officials of HPCA including its President. On 18 November State Government withdrew the lease cancellation order of 26th October 2013. The year 2014 started in Himachal with more venomous attitude of political parties against each other. The democratic process, legality, welfare schemes, development and pragmatism took back seat as Government rallied behind Chief-minister to protect him against serious charges of corruption and channelling the whole government machinery against HPCA and Ex-chief-minister's family.

1967	Congress	6	48.40	BJS	0	19.10
1971	Congress	4	75.80	BJS	0	10.60
1977	BLD	4	57.20	Congress	0	38.60
1980	Congress	4	52.10	Janata Party	0	36.40
1984	Congress	4	67.60	BJP	0	23.30
1989	BJP	3	45.30	Congress	1	42.00
1991	Congress	2	46.20	BJP	2	42.80
1996	Congress	4	54.30	BJP	0	39.60
1998	BJP	3	51.40	Congress	1	41.90
1999	BJP	3	46.27	HVC	1	12.37
2004	Congress	3	52.00	BJP	1	44.20
2009	BJP	3	49.58	Congress	1	45.61

Total Seats— 1952 : 3, 1957 & 62 : 4, 1967 : 6, 1971 : onwards : 4

HVC : Himachal Vikas Congress BLD; Bhartiya Lok Dal : BJS-Bhartiya Jan Sangh, KMPP-Kisan Mazdoor Praja Party. RPI : Republican Party of India, PSP : Praja Socialist Party.

Since the first decade of 21st century, the polity of the state has become fiefdom as both political parties pushing forward their own family members by dishonouring the claim and contribution of party workers, who aspire to give leadership to their respective parties. All traditional political houses have carved tailored cut role for their progeny. On 20th October 2013, Ms. Meera Kumar, Speaker Lok Sabha presided over the goiden jubilee function of state Vidhan Sabha.

LOK SABHA ELECTION 2014

Contrary to the general mood in the country where political leaders of different hues were jumping into Narendra Modi's bandwagon, the BJP in

Himachal had not only failed to bring back its break away group, but also witnessed the exit of a sitting MP. Efforts to merge the Himachal Lokhit party (HLP) with the BJP also failed. In another embarrassment to the state BJP, Rajan Sushant who won the Kangra seat in 2009 on the BJP ticket joined the Aam Aadmi Party ahead of the Lok Sabha polls. Sushant had accused the Prem Kumar Dhumal-led government of corruption. The party was aware of its weaknesses and had made desperate attempts to bring back the rebels. However most of the leaders who rejoined the party were 'expelled' leaders and not those who quit the party on their own. The lack of enthusiasm in the state BJP leadership, despite the Modi hype, could also be related to the general trend in Himachal, which usually goes with the ruling party. The BJP had to fall back upon veteran leader Shanta Kumar to contest from Kangra who was marginalised and had even announced his retirement from electoral politics. The party had no other leader to challenge the Congress.

BJP's Vote Percentage in Lok Sabha Polls (1977-2009)

Year	Vote percentage	Seats won
1977	57.19 (then JP)	4
1980	36.38 (then JP)	0
1984	23.27 (BJP)	0
1989	45.25 (BJP)	3
1991	42.79 (BJP)	3
1996	39.62 (BJP)	0
1998	51.44 (BJP)	3
1999	46.27 (BJP)	3
2004	44.25 (BJP)	1
2009	51.89 (BJP)	3

The party was hoping to bring back Maheshwar Singh to challenge Pratibha Singh sitting Congress MP from Mandi and Chief Minister Vir Bhadra Singh's wife. However its efforts did not succeed. In 2009 Maheshwar Singh lost by a slender margin of about 10,000 votes from Mandi and after his exit the BJP fared badly in the Mandi Lok Sabha by-poll in June 2013. The BJP was in power in the state during the 2009 Lok Sabha polls and won three out of four seats. The party got 51.89 per cent votes. It was ousted in the 2012 Assembly polls and its vote share shrunk to 38.47 per cent. There was strong anti-incumbency against the sitting MPs who wanted to contest polls again.

BJP's Performance in Parliamentary Election 1980-2014: The Janta party of which Jan Sangh was the biggest constituent emerged as a strong alternative in 1977 ousting the Congress from power for the first time. It won all the four Lok Sabha seats and 53 out of 68 Assembly seats in the state. In the 1980 Lok Sabha, the Congress won all four seats. After the disintegration of the Janta party, the BJP emerged as a new incarnation and filled the space of the Opposition. The Congress could only win 31 out of 68 seats in

the 1982 Assembly polls and failed to get majority. The party was wiped out in 1984 Lok Sabha and routed in the midterm Assembly polls in 1985, but bounced back winning three out of four Lok Sabha seats in 1989, polling 45.25 per cent votes. The Congress was routed in the Assembly polls in 1990 while BJP swept the polls wining 46 Assembly seats.

The 1991 Lok Sabha saw a decline in popularity of BJP, but being in power, it managed to win Kangra and Hamirpur seats and was polled 42.79 per cent votes. The BJP lost all four seats in 1996 when Congress was virtually wiped out in the north and central India. Its vote share dwindled to 39.62 per cent. However, in 1998 the party won three out of four Lok Sabha seats with a vote percentage of 51.44 per cent and also managed to form the government in the state by forging post poll alliance with the Himachal Vikas Congress (HVC). In 1999, the BJP-HVC alliance swept the polls and the BJP won three seats with 46.27 per cent votes. The Congress returned to power after the 2003 Assembly polls and won three out of four Lok Sabha seats in 2004 elections, while the BJP could only retain the Hamirpur seat. In the 2007 Assembly polls, the BJP for the first time got a clear majority on its own and wrested three Lok Sabha seats in 2009, while Congress candidate Vir Bhadra Singh won the Mandi seat with a margin of over 10,000 votes.

Major Concerns For BJP: After the failure of *"mission repeat"* of BJP in 2012 Assembly polls, allegedly on the issue of corruption, the party now was facing the challenge to retain the three Lok Sabha seats won by it in 2009. The Mandi Lok Sabha by-election held in June 2013 was jolt for the party as Congress candidate Pratibha Singh won the seat by huge margin of 1.34 lakh votes. The BJP had won the Shimla Lok Sabha seat for the first time in 2009 but retaining the seat in the Congress stronghold would be a herculean task as the Congress party was in power. However, the BJP having a strong hold in Hamirpur seat, which it won in all the subsequent polls and two by-elections but its vote share, was on decline.

The party candidate won the Hamirpur Lok Sabha by-election in June 2008 by 1.72 lakh votes but the margin reduced by 1 lakh in 2009 general elections and in 2012 Assembly polls, the total lead of the party in 17 Assembly segments falling in this parliamentary constituency, shrunk to 22,000 votes. Whether, the Modi wave will sweep Himachal or Vir Bhadra Singh would stem the tide as he did in the 1996 polls was a mute question which was to be answered only after the elections.

Govt. Employees Count Big: As always, over four-lakh serving and retired government employees in the small hill state play a significant role in deciding the fate of candidates both for Parliamentary and Vidhan Sabha elections. This explains the reason for the overindulgence and pampering of employees by various political parties ahead of the polls. It is not just the number which indicates that they constitute a sizeable chunk of the electorate, but they are politically animated, making it impossible for any party to ignore them. As such the employees exert pressure tactics, especially before

the election, to extract their pound of flesh by raising their demands for financial benefits and higher pay scales. Sensing the employee power in Himachal politics, both the Congress and the BJP when in power have tried to woo them by doling out sops ahead of elections.

Old-timers vividly remember the strong agitation by non-gazetted employees in the early 1980s against the Congress government led by Thakur Ram Lal, continued for almost 20 days. He had to bow before the employees might. Baring BJP leader Shanta Kumar who drew the employees' wrath by enforcing *"no work-no pay"* policy, no other Chief Minister has had the courage to take on the *babus* considering their influence. In Himachal, employees comprise 3.94 per cent of the total population, is among the highest in the country. In Punjab this ratio stands at 1.55 per cent Haryana at 1.5 per cent and in Uttrakhand, it is 1.46 per cent. With a population of 68.64 lakh (2011 Census), there were over 1.87 lakh regular government employees, 39,000 working in various boards and corporations and 45,000 contractual and daily wagers. Besides, the state had more than 1.5 lakh strong contingent of retirees, who too joined hands with employees in getting their demands fulfilled by the incumbent government.

Keeping up with this tradition of employee appeasement, Chief Minister Vir Bhadra Singh also made it a point to announce 10 per cent dearness allowance to the employees and retirees in the budget he presented in the Assembly on February 7, 2014. Vir Bhadra also assured the pensioners that their demand for 5,10 and 15 per cent increase in basic pension would be met shortly. Notwithstanding the grave financial health of the state, every government succumbs to the demands of the employees whose support in the polls is a crucial factor in deciding the fate of candidates. The importance accorded by every political party in its election manifesto to the employees is a clear indicator of their exalted position in the eyes of politicians.

The fact that 53 per cent of the government's budget is spent on paying salaries and pensions to serving and retired employees has been a cause for concern. With such a burden on the exchequer, barely 37 per cent of the money is available for development works. With limited job avenues in the state, except in the industrial belts, which too are confined to the fringe areas, a government job has been the first and foremost priority of Himachalis. The craving for a government job can be well understood since job avenues are scarce and the unemployment figure has almost touched nine lakh. There is a government employee or at least a pensioner in every family in the state, which has a direct bearing on the voting pattern by almost half the electorate of the state.

The election for Government employees in Himachal as elsewhere in the country has reduced to their personal goals and benefits. Issues of larger interest such as country's security, unemployment, poverty education, corruption etc. are no where in their priority. It is this very class of the society, which is highly paid for their under performance, negligence and corruption.

The Government job is not a responsibility but luxury. The hard earned income of business sector is wasted on babus salaries.

Women, Youth Hold Key in Himachal: With the literacy rate among youth and women being considerably high in Himachal, it is not wrong to say that they play a decisive role in the state politics. The share of women in the panchayati Raj Institutions also registered a sharp increase after the state government reserved 50 per cent seats for them. The emergence of a large number of women-led cooperative societies further enhanced women's participation in politics. As many as 93,636 first time voters were enlisted up to March, 2014 and the number of youth voters in the age group of 18-19 years was 62,133. Out of the total 46,74, 185 registered general voters, 48.04 per cent were below 40 years and 48.86 per cent were women.

THE SOARING POWER

Constituency	Women voters
Bhoranj	51.61
Sujanpur	51.76
Hamirpur	50.11
Barsar	51.13
Nadaun	50.36
Dehra	50.16
Jaisinghpur	51.63
Sulah	50.65
Jogindernagar	50.57
Mandi	50.59
Dharampur	51.27
Balh	50.17
Sarkaghat	50.30
Lahaul Spiti	50.00

Interestingly, up to 2013-14 state never saw a woman member of Parliament (MP) being elevated as a Union minister, although several MPs, including Vir Bhadra Singh, Shanta Kumar and Sukh Ram, have remained Union ministers and held key portfolios. The presence of only three women MLAs in the state Assembly is also a reminder of how political parties ignored them. The Congress had two women legislators-Vidya Stokes and Asha Kumari while Sarveen Chaudhary is the lone BJP legislator in the state. The number of women MPs in the Lok sabha has also been less in the state with the BJP never fielding a woman candidate for any of the four parliamentary seats. The party however sent Vimla Kashyap to the Rajya Sabha in 2010.

The Congress, on the other hand had Pratibha Singh the sitting MP from Mandi in the Lok Sabha, and Viplov Thakur as its Rajya Sabha representative. The women voters in several constituencies in Hamirpur, Lahaul and

Spiti, Mandi and Kangra districts surpass men. Key issues such as *price rise, lack of ration availability in fair price shops, fewer job opportunities,* little relief in the state budget from the spiralling price and essential commodities such as the LPG are the issues affecting the women, while shrinking job opportunities, corruption, growing devaluation of the rupee, higher rate of interest of education loans and the rising EMI are the burning issues concerning the youth.

The figure of youth enrolled in employment exchanges touched 11,97,681 and with 48 per cent of the electorates between the age group of 18 and 40 years, their resentment has the potential to turn the tide against the ruling party. The state government could provide jobs to only 4,609 youth in 2013-14 through employment exchanges. Despite notification of 141 vacancies through its Central Employment Cell and sponsoring of 1,571 names, only 17 youth were employed till December 2013. This is a reflection of the low skill availability and shrinking job opportunities in the state. Although the government disbursed Rs 6.69 crore as the Skill Development Allowance to 34,235 youth since May 2013, it failed to provide jobs. Eligible youth are getting Rs 1,000 per month under this scheme.

Member of Parliament from Mandi Pratibha Singh was elected to power with a huge margin in June 2013 after her husband Vir Bhadra Singh resigned to become Himachal Pradesh Chief Minister. With support of the state and the Central governments, people in the constituency had high expectations from her. Though she claimed that she had pursued many projects for the benefit of her constituency and the state during her six-month stint, many of her projects were yet to begin when election was held in May 2014. Unemployed local youth regret that even though Vir Bhadra Singh remained Mandi MP and the Union Cabinet Minister for more than four years, he failed to set up any major industrial project in the area.

The political couple was also being criticised by BJP leaders for allegedly seeking "unexplained loans" amounting to several crores from a businessman and allegedly concealing facts regarding details of Pratibha's assets in her affidavit submitted to the returning officer (Election Commission) while filing her nomination in 2013. Mrs. Pratibha Singh asked 11 questions in Parliament "Since she took oath in the middle of Parliament session only 11 of the 38 questions asked could be taken up".

On 20th November 2013, an NGO named Common Cause filed a petition in Delhi high court against Vir Bhadra Singh on the issue of corruption and disproportionate assets. On 22nd November high court asked CBI to submit the status report. The winter session of state Vidhan Sabha was completely ruined, as both BJP and Congress party were at loggerheads on the controversial statement made by Chief minister Vir Bhadra Singh, against leader of opposition P.K Dhumal. On 1st January 2014, Mr. Vir Bhadra Singh discussed the corruption matter with state incharge Ms. Ambika Soni and decided to impress upon Rahul Gandhi, about his innocence.

In the political history of modern Himachal for the first time opposition boycotted Governor's address to the Vidhan Sabha on the first day of the budget session on 3rd February 2014. Later on BJP also boycotted the budget presentation. Keeping an eye on 2014 Lok Sabha election BJP opened its doors to the rebels and ex-party workers and leaders. On 8th February Roop Singh Thakur ex MLA from Sundernagar and Mahant Chaudhary were readmitted in the party fold. K.D Dharmani former BJP MLA from Ghumarwin, who had joined HLP, rejoined BJP on 8th March 2014, H.N Kashyap on 9th March, Khushi Ram Balnahta former MLA from Rampur rejoined on 16th March and Ravi Dhiman on 18th March 2014.

On the one side BJP was making all efforts to bring back its former workers and leaders to the party to present united face, on the other side congress could not do much in this direction. It could only convince Rajinder Rana, MLA from Sujanpur, to join the party and contest from Hamirpur Lok Sabha seat. He resigned from his Vidhan Sabha seat and joined congress on 14th March 2014.

Sujanpur Assembly By-poll-2014: Going to the polls within 16 months of the last Assembly elections in 2012, the Sujanpur Vidhan Sabha seat in Hamirpur district witnessed a keen contest between a political greenhorn, Anita Rana, of the Congress and Bhartiya Janta Party's Narinder Thakur, who was banking on the political legacy of his father. The by-poll was necessitated by the resignation of Rajinder Rana, who had won as an independent in 2012 and was now contesting as the Congress candidate from Hamirpur parliamentary constituency. Rana, the latest blue-eyed boy of Chief Minister Vir Bhadra Singh, managed to secure the ticket for his wife (Anita Rana), who was a novice in politics. Having been carved out by merging 42 polling booths, which formed part of the Bamsan Assembly segment and 102 booths that were under the Hamirpur Assembly seat, this was the second election from the Sujanpur segment after the delimitation of Assembly and Lok Sabha seats in Himachal. With a sizeable number of areas that earlier formed part of Bamsan segment, represented by former BJP Chief Minister Prem Kumar Dhumal, Sujanpur was considered to be a BJP stronghold.

In fact, Rana, once a protege of Dhumal had sprung a surprise when he defeated his nearest Congress rival Anita Verma by 14,166 votes as an independent after being denied the BJP ticket. The BJP candidate, Urmil Thakur, a former Chief Parliamentary Secretary in the Dhumal regime, stood at the third position.

Though Anita Rana was the Congress candidate, "she was just a proxy nominee with her husband running the show". The BJP this time fielded Narinder Thakur, a turncoat and son of former minister Jagdev Chand Thakur, who was trying his luck for the fifth time. He made his unsuccessful electoral debut after the demise of his father in a by-poll in 1994. He also contested the 2003 Assembly election from Hamirpur as an independent with the support of *"Mitra Mandals"*. Following sharp differences with Dhumal, he quit the

BJP in 2008 to join the Congress to contest the 2009 Lok Sabha election and the 2012 Assembly poll against the BJP. Rana was able to win full confidence of Chief Minister Vir Bhadra Singh and, he managed to get Congress ticket for the Hamirpur Lok Sabha seat for himself and the Assembly seat for his wife. Despite stiff opposition by state Congress president Sukhwinder Singh Sukhu, the complete backing of Vir Bhadra ensured that the Rana couple reign supreme.

Urmil-Anita Factors : The fact that Rana's BJP opponent in the 2012 poll, Urmil, joined the Congress and was actively campaigning for Anita Rana strengthened the ruling party's prospects. Moreover, Urmil is the elder daughter-in-law of Jagdev Chand and was campaigning against her own brother-in-law Narinder. She herself been a two-time BJP MLA from Hamirpur but moved to the Congress after she was denied the BJP ticket.

The preference was given to Narinder following his patch up with Dhumal. Narender Thakur a die hard opponent of Prem Kumar Dhumal was brought back to BJP by his relative and former IPH minister Ravinder Singh Ravi. Anita Verma, a former minister and two-time MLA, was the claimant for the Congress ticket for the by-poll. Though she did not quit the party and announced her support for Congress nominee Anita Rana, she did not campaign actively and instead preferred to go and campaign outside the state. The fight was between the Congress and the BJP. The Congress hoping to gain from the 15 month performance of Rajinder Rana and the complete backing of Vir Bhadra and Urmil. On the other hand, the BJP was hoping to ride on the "Modi wave" and Jagdev's legacy. But with divisions within the family, the gains from the legacy was thought to be limited.

Record Turnout in Lok Sabha Election 2014: The efforts of the Election Commission of India (ECI) yielded results as Himachal broke all previous records as over 66 per cent voters turned up to vote, the highest in all Lok Sabha elections held since Independence. The polling was peaceful as there were no reports of any violence from anywhere. However, people boycotted poll at nine polling stations with the maximum of seven falling in Mandi district. The Sujanpur segment witnessing a by-poll registered 69.83 per cent polling. The highest polling in the state was in the 1998 poll when 65.31 per cent of the electorate cast their vote. The polling in the last two elections of 2009 and 2004 was 58.4 and 59.7 per cent. The highest polling was registered in Una district at 70.97 per cent followed by 69.64 in Sirmaur district and Hamirpur a close third at 69.16.

The lowest turnout was witnessed in the districts of Shimla (59.24) followed by Kullu (62.17) and Lahaul Spiti (61.94). The electorate of Shimla showed relative indifference towards elections by registering one of the lowest turnout of 59.43 per cent in the entire state. The Assembly segment of Paonta Sahib registered the highest polling at 77 per cent followed by Haroli (76) and Hamirpur (72). The stakes were very high for Chief Minister Vir Bhadra Singh whose wife Pratibha Singh was contesting from Mandi, his

predecessor Prem Kumar Dhumal, whose MP son Anurag Thakur was in the fray from Hamirpur, and Shanta Kumar who was the BJP nominee from Kangra. It is only after the results are declared one could know the exact reason for the high turnout, could be an indicator of the anti-incumbency and an undercurrent in favour of one party. Another reason for the high turnout could be the extra efforts put in by the cadres of the Congress and the BJP anticipating a very close fight in all four segments.

Living up to its reputation of being the district registering the lowest voter turnout, Shimla district recorded a poll percentage of mere 59.24 per cent even though this was almost seven per cent higher than the last Lok Sabha election. Despite the best efforts of the Election Commission of India (ECI) to motivate people to turn out in large numbers to cast their vote, the electorate of Shimla district gave a lukewarm response. The poll percentage in the 2009 polls for Shimla district was 52.71 per cent while in the 2004 Lok Sabha polls it was a mere 49.81 per cent. The Kasumpti Assembly segment, a part of the Shimla Municipal Corporation registered the lowest turnout of 54.97 per cent followed by adjoining segment of Theog with 56.52 per cent, Karsog in Mandi (53.66) and Arki in Solan (59.66 per cent) were amongst the other lowest turnout assembly segments in the state.

Shimla (Rural), the Assembly segment of Chief Minister Vir Bhadra Singh registered an extremely low turnout of merely 57.58 per cent while Rohru the segment represented by Congress candidate for the Shimla Lok Sabha, Mohan Lal Brakta was much better at 66.12, the highest in the district. The segment of Rampur in Shimla, the hometown of Vir Bhadra registered a better polling of 62.87 as it forms part of Mandi Lok Sabha seat from where his wife was contesting. On the contrary, Hamirpur, the Assembly segment represented by former Chief Minister Prem Kumar Dhumal, recorded 70.27 per cent polling and Sujanpur, which was earlier represented by Rajinder Rana, the Congress candidate recorded 71.76. His wife Anita Rana was the Congress candidate for the Sujanpur Assembly by-poll. Palampur home town of Shanta Kumar registered 68.09 per cent.

Sirmaur district which recorded a polling of over 70 per cent showed a considerable improvement over the polling percentage of 61.35 in 2009 polls and 55.05 in 2004 election. While Paonta recorded more than 77.0 per cent polling, Nahan segment also registered 71.81 polling and Pachaad recorded 71.98 per cent. Jawali assembly segment from where the Congress candidate Chander Kumar hails, the polling percentage was 68.78 per cent.

Mr. Narender Thakur contested 2003 Vidhan Sabha election as an independent (Mitramandal Candidate), but was defeated. Later on he joined congress (I) and contested 2007 Vidhan Sabha and 2004 lok Sabha Election on Congress ticket but lost both. On 28 March 2009 Hamirpur Unit of congress terminated his primary membership of the party, for his anti party outrage. In between congress party decided to field Madan Lal former crickter from Hamirpur Lok Sabha seat against Anurag Thakur. But Mr. Madan Lal

backed out due to his ill health. Ultimately under pressure from state leadership Narender Thakur was readmitted in the party on 1st April 2009 and declared party candidate for Hamirpur Lok Sabha seat. This time also he lost, because congress workers at the grass root had never accepted him in the party.

District wise Polling Percentage In Last Three Lok Sabha Elections

Districts	2014	2009	2004
Chamba	65.18	56.04	61.67
Kangra	64.83	55.04	61.05
Lahaul Spiti	61.94	68.72	66.14
Kullu	62.17	67.29	65.90
Mandi	64.03	61.42	60.81
Hamirpur	69.16	59.04	59.62
Una	70.97	61.48	62.27
Bilaspur	67.02	57.86	64.32
Solan	66.57	57.99	54.17
Sirmaur	69.64	61.35	55.05
Shimla	59.24	52.71	49.81
Kinnaur	67.82	68.71	64.21

Voting in previous Lok Sabha elections

Polls (Year)	% turn out	Polls (Year)	% turn out
1967	51.20	1991	56.95
1971	41.19	1996	57.98
1977	63.96	1998	65.30
1980	58.70	1999	56.70
1984	61.45	2004	59.70
1989	63.29	2009	58.40
		2014	66.50

Modi Magic Weaves Victory : The BJP scripted history by winning all four Lok Sabha seats as well as the Sujanpur Assembly by-poll with Chief Minister Vir Bhadra Singh's wife Pratibha Singh also falling victim to the saffron wave that swept Himachal Pradesh like elsewhere in the country. Leading the BJP's victory march was the party veteran and former Chief Minister Shanta Kumar who won by a convincing victory margin of over 1,70,072 lakh votes as he led in each one of the 17 Assembly segments under the Kangra seat. BJP's Narinder Thakur also won the Sujanpur by-poll by a slender margin of 538 votes. He defeated Anita Rana, wife of Hamirpur Lok Sabha seat candidate Rajinder Rana, in a close contest.

Anurag Thakur, sitting MP from Hamirpur and son of the two time Chief Minister Prem Kumar Dhumal, also registered a comfortable win of 98,403

votes though political analysts had predicted a close fight for him. It was a hatrick of victories for Anurag, who was also the national president of the Bhartiya Janta Yuva Morcha (BJYM). The saffron wave appeared so strong that Pratibha Singh, who had won by a margin of 1.37 lakh votes in the Mandi by poll in June 2013, also suffered defeat at the hands of BJP candidate Ram Swaroop Sharma who made his electoral debut in these polls. In the 2009 Lok Sabha poll, the BJP had won three seats while the Congress had only one in its favour. In fact, it was a sweet victory for Anurag who had been at the receiving end of the state Vigilance Bureau that has registered three cases against him in the probe against the HPCA headed by him.

LOK SABHA ELECTION POLLING PERCENTAGE
2004 TO 2014

Constituency	2014	2009	2004
Kangra	64.71	55.21	55.89
Mandi	65.00	64.11	62.91
Hamirpur	69.00	58.88	62.32
Shimla	65.20	55.73	61.47

"The verdict was a befitting reply to the politics of vendetta unleashed by the Vir Bhadra regime as the people reject such personalized victimisation, which had been the only agenda of Vir Bhadra Singh, since December 2012". The BJP further strengthened its grip on the traditional Congress bastion of Shimla by retaining the seat for the second consecutive time. Sitting BJP MP Virender Kashyap proved that his last victory was not a flash in the pan.

This was for the first time in Himachal that the BJP won all four seats. The Congress had achieved this feat on four occasions in 1971, 1980, 1984 and 1996. The fact that the people of Himachal for the first time voted in favour of a party which was not in power in the state clearly established the fact that it was a vote against the 10 years rule of the Congress led UPA regime. The lackluster performance of the Congress regime in the state too seemed to have adversely affected the party's poll prospects. A majority of the ministers in the Vir Bhadra Cabinet could not ensure a lead in their segments with BJP getting a lead of 10,564 in G S Bali's segment of Nagrota, 8,092 in Dharamshala represented by Sudhir Sharma, 9,899 in Fatehpur represented by Sujan Singh Pathania, 6,394 in Mandi represented by Anil Sharma, 5,372 in Solan represented by Dhani Ram Sandil and 3,321 in Vidya Stokes segment.

It was only three segments, Haroli represented by Mukesh Agnihotri where the Congress had a lead of 6,960, 1,648 in Darang represented by Kaul Singh Thakur and 1,564 in Bharmaur represented by Thakur Singh Bharmauri. The BJP also got a lead of 3,822 from Nadaun, the segment of state Congress president Sukhwinder Singh Sukhu.

As expected, the Aam Aadmi Party (AAP) and the CPM failed to cut ice with the electorate, proving again that the two party system remains well en-

trenched in the state. Sitting Kangra MP Rajan Sushant, who contested on the AAP ticket, could barely got nearly 25,000 votes. The fact that the congress managed to secure a lead in only eight of the 68 Assembly segments in the state was a clear indication of the falling graph of the party within 15 months since it assumed power in the state. Most of the heavyweights, including ministers, failed to fight the BJP onslaught. The vote share of the Congress (I) had shown a steady decline of more than 5 per cent in each of the last three Lok Sabha polls. The vote polled to the Congress in the 2009 Lok Sabha election was 45.61 which now came down to 40.7 per cent. The party's vote share in the 2004 polls when it had won three seats was 51.89 per cent.

The Congress (I) as well as the government took defence in the plea that nothing worked against the unassailable Modi wave as was the case in other parts of the country, but the fact remained that party should pull up its socks to prevent its graph from falling further. Leaders with a strong base should be given prominence in the organisation and not those who have personal allegiance. The Congress could not secure a lead even in one Assembly segment out of a total of 17 constituencies in Kangra where former Chief Minister Shanta Kumar won by over 1.70 lakh votes. Similarly, in the Hamirpur Lok Sabha segment, the congress secured a lead of 6,960 only in Una district represented by Mukesh Agnihotri. The only other minister in whose segment the congress led was Thakur Singh Bharmouri and Kaul Singh. In the eight segments from where the congress did get a lead, five were part of the Mandi Lok Sabha segment.

The five include the three tribal segments of Kinnaur, Bharmaur and Lahaul Spiti and Rampur in Shimla district and Seraj in Mandi. The Congress managed to get a lead from three segments of Rohru (in Shimla) and Shillai and Renuka in Sirmaur district. Despite a majority of the Chairmen and Vice-chairmen of boards and corporations hailing from Shimla and Sirmaur district, the Congress suffered a real drubbing. The fact that the strong base of the party in its citadel of Shimla crumbling was also a cause of major concern and a pointer towards the fact that the leaders with a strong base must not be ignored. The not so good relations between the party organisation and the government also impacted the party prospects adversely. The lackluster performance of the state government coupled with an erratic public distribution system (PDS) and price rise also led to resentment among the masses.

Polling in 8 Assembly segments of Shimla	
Constituency	% age
Chopal	55.89
Theog	56.72
Kasumpti	54.97
Shimla	59.27
Shimla (Rural)	57.58
Jubbal Kotkhai	61.60
Rampur	62.87
Rohru	66.12

The fact that there was a lack of coordination between the party organisation and the [illegible]nt also adversely affected the party's poll prospects. In fact,

Himachal Pradesh Congress committee (HPCC) president Sukhwinder Singh Sukhu failed to get a lead in his own Assembly segment of Nadaun in Hamirpur. The performance of the party was no better in the segments of maiority of the state office bearers. The election results of 2014 Lok Sabha clearly gave edge to BJP in the state, as Vir Bhadra Camp was already having a tight rope walk in the party organisation as well as in the Government. Eighteen months Governance had not gone well with the aspiration of the youth, Farmers and Government employees. In the political history of Himachal Pradesh the worst tragedy occurred to Rajinder Rana, who resigned from Vidhan Sabha and contested Lok Sabha election and to reward his courage and efforts, his wife was made Congress candidate from Sujanpur Assembly by ignoring the claim of Anita Verma, a dedicated worker of the party and both lost.

The dynasty politics has made so much inroads in the system that every politician has a feeling that their constituency is their fiefdom and this is what was exemplified by Vir Bhadra Singh, Prem Kumar Dhumal, Rajinder Rana and the likes in the state. May be Modi wave helped Anurag Thakur this time, but at the root level workers of all political parties have started feeling ignored and cheated in the hands of dynasties.

Mandi Lok Sabha seat could be termed as fiefdom of royal families. Since 1952 to 2014, the following members of royal family represented this seat. Rajkumari Amrit Kaur (Faridkot state 1952), Raja Jogender Sen (Mandi state 1957), Raja Lalit Sen (Mandi state 1962), Raja Vir Bhadra Singh (1972, 1980 and 2009 Rampur Bushahar state), Raja Maheshwar Singh (Kullu state 1989, 1998 and 1999), Rani Pratibha Singh (2004 and 2013 Rampur Bushahar state). Till date only three candidates, Pt. Sukh Ram (1984, 1991 and 1996), Mr. Ganga Singh (1977) and Ram Swaroop Sharma (2014) were non-royal members, who won election from Mandi seat. Kangra Parliamentary seat was twice represented by scion of a royal family till 2014. Once in 1977 Kanwar Durga Chand and in 1984 Ms. Chandresh Kumari.

Himachal in Union Cabinet: Himachal being a small state never had much share in the union cabinet, but some influential leaders have been able to make place in the union cabinet. Rajkumari Amrit Kaur was first MP from Himachal Pradesh elected from Mandi -Mahasu seat to become member of first cabinet of Pt. Jawahar Lal Nehru as a Health Minister in 1952. Then from December 1976 to March 1977 Mr. Vir Bhadra Singh was inducted in Ms. Indira Gandhi's cabinet as Deputy Minister of Tourism and Civil Aviation. From September 1982 to April 1983, he was State Industry Minister. In 2009, he again became minister of cabinet rank in the ministry of Dr. Man Mohan Singh as a minister of Steel and later on minister of Small Scale Industries. Mr. Vikram Mahajan was third MP from Himachal to join union cabinet of Ms. Indira Gandhi in 1980 as state Energy minister.

He was the one who laid the foundation of NJPC. Mr. Sukh Ram (1993-98) was firstly State Defence minister in P.V Narasimha Rao's cabinet, then

State Planing Minister and lastly Tele Communication Minister with Independent charge. During his tenure as Tele-Communication minister, India had revolution in this sector and he is remembered as *father of telecom revolution* in India.

In 1999, Mr. Shanta Kumar became member of union cabinet led by Mr. Atal Bihari Vajpayee. He was made Food and Civil Supplies minister with cabinet rank and later on Rural Development minister. He initiated *Antodaya Aan Yojna* to provide cheap food grains to 10 crore poor living below poverty line. It was his vision that made India to export food grains to 25 nation of the world during NDA regime. In 2004-05, Mr. Anand Sharma got elected to Rajya Sabha from Himachal Pradesh and was made state External Affairs minister, in 2008 additional charge of Information and Broadcasting was given. He opened Regional Passport office in Shimla. After 2009, he became Commerce minister with cabinet rank and remained so till 2014.

Because of lesser number of seats, Himachal representation in union cabinet could never be that much effective. It was only from 2009 to 2012, when Himachal had two representative Mr. Anand Sharma and Mr. Vir Bhadra Singh in the union cabinet as cabinet rank minister.

Dynasties in Himachal Politics

The politics of dynasties has been making inroads all over the country. The work which was considered social service and a zeal of dedication has become now a prerogative of politician and their families. The politics of India since the last quarter of 20th century is largely dominated by families in all states. In Himachal Pradesh the creep of political dynasty flourishing in almost all districts and in all political parties. Some of the glaring examples are-

Shimla District

Mr. Vir Bhadra Singh- Ms. Pratibha Singh (wife), Mr. Vikramaditya Singh (son) and Mr. Anirudh Singh brother in law.

Mr. Radha Raman Shastri - Mr. Sanjay Shastri (son)

Late Mr. Ram Lal Thakur- Mr. Rohit Thakur (grandson)

Late Mr. Lal Chand Stokes- Smt. Vidya Stokes (wife)

Hamirpur District

Mr. Prem Kumar Dhumal- Mr. Anurag Thakur (son)

Late Thakur Jagdev Chand - Ms. Urmil Thakur (daughter in- law and Narender Thakur (son)

Late Mr. Prem Chand Verma- Mr. Ramesh Chand Verma (son) and Ms. Anita Verma (daughter in-law)

Chamba District

Late Shri Deshraj Mahajan- Ms. Vimla Mahajan (wife) and Mr. Harsh Mahajan (son)

Mr. Vidyadhar- Mr. Surender Bhardwaj (son)

Kangra District

Late Shri Sat Mahajan- Mr. Ajay Mahajan (son)

Smt. Chandresh Kumari- Mr. Aishwarya Katoch (son)

Late Smt. Sarla Sharma- Ms. Viplov Thakur(daughter) and Mr. Nikhil Rajaur (blood relation)

Late Shri Sant Ram- Mr. Sudhir Sharma (son)

Shri Chander Kumar- Mr. Neeraj Bharti (son)

Late Shri Virender Kumar- Ms. Nirmala Devi (wife) and Naveen Dhiman (son)

Una District

Shri Omkar Sharma- Mr. Mukesh Agnihotri (son).

Mandi District

Shri Peeru Ram- Mr. Prakash Chaudhary and Mr. Mahant Ram Chaudhary (family members)

Late Shri Sher Singh- Mr. Sohan Lal (brother)

Pt. Sukh Ram- Mr. Anil Sharma (son)

Kullu District

Mr. Maheshwar Singh- Mr. Karan Singh (brother)

Mr. Kunj Lal Thakur- Mr. Gobind Thakur (son)

Sirmaur District

Dr. Y.S Parmar- Mr. Kush Parmar (son)

Late Shri Gumman Singh- Mr. Harsh Vardhan Chauhan (son)

Nearly 30 families in the state are having the pleasure of political status which clearly reflect that 45 percent of the total Vidhan Sabha seats are captured by the dynasties and remaining 55 percent are left for others but not necessarily to the party workers.

11

Police Administration Himachal Pradesh

"In the happiness of his (Kings) subjects lies his happiness, in their welfare his welfare, what pleases him, he shall not consider as good, but whatever pleases his subjects he shall consider as good"

-(Kautilya)

The history of Police administration, defence and justice is as old as the history of organized human society and the process of human beings settlement. But it is quite difficult to trace down the history of Police administration as a separate organization in the ancient India as such. The Indian Police system is a creation of the British Government and rests on the basic ideals of efficiency and subordination to the law of the land.

On the whole, it represent a complete break away from all pre-British systems which can be traced in India, chiefly because it provides a professional and regularly organized police force, with strictly defined powers, privileges and duties, and because it separates the preventive and investigation agency from the authority which tries and punishes criminals. Before coming to the question of Police administration in Himachal Pradesh, it would be pertinent to understand the history of Police Administration at all India level.

It is difficult to trace in India anything like police systems, as the British introduced, before the establishment of British rule in the country. Certainly, from the beginning of Indian history, we find State officials or private persons vested with police functions, but nothing like the present ubiquitous, regularly organized and legally controlled force. Such indigenous police systems as we can trace were, generally, based on land tenure. Great landholders were required to apprehend disturbers of the peace and restore stolen goods, or, sometimes, in default, to make good the losses sustained within the area of their influence. Responsibility duly devolved on subordinate landholders in their various degrees. Village responsibility was enforced through the local headmen, who were helped by an appropriate number of village watchmen, the real executive police of the country, who kept watch at night, reported the arrival of strangers within the village bounds, and helped to detect crimes. To some extent, this feature of the indigenous police system has been incorporated in the present system also.

As early as the laws of Manu, we find references, necessarily vague, to police systems in India. The Chief duty of a king, according to these laws, is to restrain violence and punish evil doers. He has to keep up patrols and what we

should now call police stations or fixed posts, and also many spies. There is an interesting approval of the use of *agents provocateurs* (anathema, according to English ideas), and all the King's subjects were required to assist him in the criminal administration.

Later, in the *Arthashastra of Kautilya*, which is believed to have been written about 300 B.C., there is detailed and fascinating description of the use of spies in the criminal administration. Kautilya advises the King to have his spies controlled by reliable and capable ministers. There are nine different groups of spies, according to this authority, who are to be used to watch different kinds of people. One group of spies is to consist of men skilful in reading the minds of others. Another group should be ascetics, third agriculturalists, to detect crimes among the rural population, a fourth be chosen from among ruined merchants, to spy on the industrial and commercial community, a fifth group to be recruited from the gladiator class, and so on. It is possible that no modern C.I.D in any country has ever been so ubiquitous or so highly organized as the system of espionage described by Kautilya, which must have corresponded largely with the actual arrangements. The *'Arthashastra'* contains amazingly interesting accounts of the work of individual spies, whose names are given and whose subterfuge and disguises are described. Again the Sanskrit drama, particularly the play called *'The Little Clay Cart'*, describes police methods in the India of those far-off days.

Between the days of the Maurayas and their immediate successors and the Muslim invasions, we catch practically no glimpse of police in India. It is disappointing that Fa Hien and Hiuen Tsang make no mention of police in their accounts of their travels in India, although the latter, who toured the dominions of the great Harsha, mentions that he was several times robbed by footpads. The 'Harsha Charita', too, is provokingly silent on the subject. Not until Mughal times do we see anything like a definite police organization, and even then we must beware of translating the medieval Mughal arrangements into modern terms. The ideas which we have already seen to be the basis of Indian indigenous police systems survived unchanged into Mughal times. The villages were still left responsible for their own safety and that of travellers within their limits. A Mughal province was a replica of the Empire, and provincial government centered in the provincial capital. Outside that, the people were left alone as long as they paid their revenue and did not disturb the peace. The Governor of a province was called the Subedar or Nazim; under him, incharge of subdivisions, living in smaller towns, were a number of officials called *faujdars.*

The Faujdar's duties were mixed. Primarily he was a revenue official, but he was also vested with powers enabling him to keep the peace and cope with bands of highwaymen, rebellious chiefs, and other turbulent persons. He had to guard roads and to prevent blacksmiths from making firearms; and to help him in these specifically police duties he had a number of subordinates called *thanadars*, or officers incharge of posts, whose name survives to this

day in the Indian Police, to denote the officer incharge of a thana, or police station. Perhaps the nearest parallel to the Faujdar in the administration of British India was the Magistrate-Collector of a district before 1860, who was responsible for both the revenue and the executive police administration of his district. But we must not import the idea of a later age into the Mughal system of administration, for the police activities of the Faujdar were limited to intervening with military force when widespread violence or rebellion compelled him to do so. Similarly, the Mughal thanadars were but editions in *petto* of the faujdars. They never investigated cases of ordinary crime or carried on any of the many routine duties of the present-day thanadars. Ordinary crime, as we have seen, was the affair of the people of the locality in which it occurred and the village agency which attended to it was not paid from the state or provincial revenues.

There was one Mughal official who bore some resemblance to an Indian Inspector in the modern Police. This was the *kotwal,* the chief of the city police, and to this day in many cities in northern India, the Indian officer incharge of the city police is called the kotwal and his headquarters, the *kotwali.* A vivid description of his duties is given in the *Ain-i-Akbari,* the diary of the great Akbar. He had to be present at all royal and viceregal durbars. He received daily reports from watchmen and sweepers of doings in the city, and he maintained a number of paid informers. He arranged the watch and ward of streets at night, and at all places of public gathering he kept subordinates to look out for pickpockets and other sneak thieves. The control of prostitutes, the distillation of liquors and the sale of intoxicants were within his jurisdiction. All these duties were the same as those of his modern counterpart; but in addition he had others which are now no longer entrusted to the police. Thus, he had to look after people in prison, hear the charges against them and decide many of these, and also execute sentences. It is clear from the accounts of the doings of kotwals which have come down to us that these officers were very efficient, but of course, often abominably cruel and tyrannous according to our notions. It must be remembered, too, that kotwals were only to be found in very big cities.

The modern *Criminal Investigation Departments* were represented by different classes of news writers, some of whom were high in the confidence of Governors of provinces and even of the Emperors. These men were stationed all over the empire, and reported at irregular intervals the more important happenings in their districts.

In short, the Hindu and the Mughal systems of government were autocratic and military. Under Ashoka, Akbar and the Peshwas the principles were the same, with considerable differences in detail. The ruler and his principal agents combined in their own persons the functions of military commander for internal security purposes, revenue collector, judge, magistrate and head of the Police. Subedars incharge of provinces, Faujdars and Deshmukhs incharge of subdivisions of provinces had these powers.

Zamindars or tax-farmers were responsible for crime. Village headmen were revenue and police officials and had also magisterial powers.

As the Mughal Empire declined, their system of administration began to disappear. The British starting from their trading settlements at Bombay, Calcutta and Madras gradually assumed control of province after province. The administration of justice in the original settlements was based on English law, but in dealing with the Indians, in the jurisdiction of those settlements, due regard was paid to indigenous law and custom. Hence there was, for instance, a *Kazi*, as an exponent of Mohammedan law, in the staff of the courts in Bombay from the earliest times until 1862. As they took over the government of the provinces in the interior, the British adopted the system of administration as they found it in each locality, making, as a rule, as little change as possible.

In both cases- in the capitals and the provinces - the administration of criminal justice was profoundly unsatisfactory. After many experiments and many failures a good working system was gradually developed. Thus, the present system, has only been in force since the second half century. Its distinguishing features are that it is a civil not a military system; and that the machinery of the administration of criminal justice consists of Supreme Court, High Courts, independent of the executive Government, Sessions Judges and Magistrates whose orders are subject to an appeal to the High Court, and Supreme Court and an organized Police Force.

The transition from a military autocracy to the fully development modern system was slow and often painful. Different experiments were tried in different parts of the country, and the various provinces did not progress simultaneously by the same stages. The history of police in British India for the century prior to 1860 was, as a part of the general administration, that of a long series of experiments, often of unsuccessful experiments.

Even in the Presidency Cities, Calcutta, Bombay and Madras, where Europeans were settled in considerable number, the Police were very inefficient, and the dissatisfaction of the residents was forcibly and frequently expressed. The available records have been examined in the case of Bombay, and the results published in the *'History or the Bombay City Police,'* 1672-1916, by S.M. Edwardes. His book shows that the records are far from complete. A body of *militia* was formed about 1672, which served as *'night-watches against surprise and robbery'* and otherwise performed duties which now appertain to the civil police. In 1771 this body was styled the *'Bhandari Militia'*, and in this year it was reorganized and more definitely employed on police duties. The results were not satisfactory, and in 1778 the Grand Jury demanded a thorough reform of the Police. The first appointment of an executive Chief of Police followed in 1779 with the title of *Lieutenant of Police.* At that date there was a *'Superintendent of Police'* in Calcutta.

In 1765 the acquisition of the *Diwani*- that is, the revenue administration of Bengal with its somewhat indefinite responsibilities- had brought the British

to the point at which their duty to ensure the safety and welfare of the people who had now come under their care caused them to take an active interest in the suppression of violent crime, and in the criminal administration generally. By a regulation of 1772, Civil and Criminal Courts were established for each district of Bengal, practically that is for what is now Bihar.

In certain proceedings of the Governor in Council, dated April 19th, 1774, Warren Hasting develops his ideas on the subject of Police. While congratulating his administration on the establishment of the above Courts, he says that the country is yet too unsettled to allow their full benefits to be reaped. Numerous gangs of *dacoits* (robbers) are infesting the province. He alleges that they are being protected by zamindars (landowners) and are preying on the latter's tenants, who dare not complain. Some villages are even said to pay regular tribute to the robbers. He believes all this evil to have been produced by the disappearance of the Mughal faujdars and their subordinate thanadars, by the resumption of lands allotted to the thanadars in reward for their services, and lastly by the system of farming the revenues. The old zamindars had an interest in keeping down robbery because their tenants looked to them to recompense their losses. The tax-farmers who have taken the places of the zamindars have no such liabilities and are indifferent to the increase in robbery. The Governor finds that the very fairness of our Courts is giving encouragements to evildoers, since the standard of evidence demanded makes punishment difficult. Many notorious leaders of dacoit gangs have been arrested and let off for want of evidence.

It is interesting, in parenthesis, to read this opinion concerning the standard of evidence demanded by British Courts of Justice, as every police officer of the present day must have heard similar views expressed by many Indians, official and unofficial. Warren Hasting considered that it might be advisable to introduce some extraordinary legislation against dacoits as a temporary measure. He proposed, therefore, to restore the *faujdars* for the suppression of violent crime and for the communication of intelligence; and to require all landowners to assist them in these duties.

Eighteen months after writing the above minute, Warren Hasting returns to the subject of police. Obviously the Zamindars and tax farmers have not been giving the faujdars the help demanded of them. In the proceedings of the Governor in Council dated the 9th December 1775, he directs the Deputy Governor of the province, who had been given the oversight of criminal justice, to order zamindars and tax-farmers to deliver to the several faujdars an account of the number of the indigenous police posts in their districts together with the names of the persons by whom they were held. He was to see that they strictly obeyed the earlier orders to help the faujdars in all matters relating to his jurisdiction.

At first only four Faujdars were appointed, and their jurisdictions did not cover the whole province. Where there were no faujdars the ancient system of village police responsible to the zamindars was left in operation. These arrangements did not prove satisfactory, and in 1781 all the faujdras except

one, the faujdar of Hooghly, were withdrawn.

This first British attempt to institute a system of police in an Indian province having failed, violence, crime and dacoity continued to grow in strength. When Cornwallis became Governor-General of Bengal, he found the criminal administration in a state of utter chaos. Life and property were insecure throughout the province. His first act towards remedying this state of affairs was a most salutary one. He took the administration of criminal justice out of the hands of the Deputy Governor (a zamindar), and removed the chief Criminal Court to Calcutta. He also established four courts of circuit.

Cornwallis insisted that a regular Police Force was necessary to apprehend criminals. Zamindars and other who had hitherto maintained thanadars and police establishments were required to disband them forthwith and entertain them no more. Magistrates of districts were ordered to divide them into police jurisdiction, each to be incharge or *Darogah*, or supervising officer, with appropriate establishment. These darogahs were to be appointed by the magistrate, but they could only be dismissed by the Governor-General in Council. They were empowered to receive reports of offences and arrest accused persons, sending them to a magistrate within twenty-four hours of arrest. Once a person had been arrested, the *darogah* had no power to release him; only a magistrate could do that. Village watchmen made subject to the orders of the *darogahs* and had to supply them this information. Finally, *darogahs* were given authority to pursue criminals to other darogahs; to keep the peace at markets, fairs and other places of public gathering and to submit monthly reports on the state of their jurisdiction to their District Magistrate.

These reforms, salutary though they were and obviously in the right direction, did not remedy very greatly the deplorable state of affairs which had moved Cornwallis to action. Following Cornwallis, Wellesley and Bentick both tried to cope with the flood of crime which was engulfing Bengal, and at the beginning of the nineteenth century, Madras. Also. This was period of chaos and internecine war throughout a large part of India. The island of Bombay did not escape the consequences, but 'was the scene of constant robberies by armed gangs', even after a Grand Jury of 1793 had again drawn pointed attention to 'the total inadequacy of the police arrangements' and a committee had been appointed and various measures taken by Act of Parliament, by a Commission of the Peace, by the appointment of a Superintendent of Police and by a reorganization of the subordinate personnel.

Wellesley held an inquiry into police affairs in 1801, and in 1806 Bentick appointed a committee to consider the possibility of improving the police system in Madras. Nevertheless, the state of crime in three presidencies continued to grow more and more serious. In 1809 the Bombay Government appointed a committee which recommended the adaptation to Bombay of Colquhoun's system for improving the Police of London. By 1813 things had reached such a pitch that the intervention of the Court of Directors was rendered necessary, and they appointed a special committee of their own. On receipt of the

committee's report, they issued orders in 1814. These orders, while condemning the Darogah system, insisted on the maintenance of the old village police as the best means of ensuring internal peace. The Court quite rightly emphasized the view that the village police were organized according to the ancient customs and circumstances of the land, and held that for that reason they must be better than a totally insufficient agency such as the darogah system provided. Their most far-reaching direction was one by which the duties of district magistrate and control of the police were transferred from the District Judge, with whom they rested, to the Collector. This resulted, at any rate outside Bengal, in the control of the existing executive establishment of Government being in the hands of a man with a knowledge of the local conditions in his district. In Bengal owing to the permanent settlement, there was no subordinate revenue establishment, and the darogah system was in consequence retained, but in an improved form.

In Madras a Regulation (No. XI of 1816) was issued to give effect to the orders of the Court. The famous Sir Thomas Munro was one of the Commissioners appointed under this Madras Regulation.

The Bombay Government took over the administration of the territories of the Peshwas in Pune in 1817. At first the functions of judge, magistrate and head of the police were combined in the hands of one man, and little or no change was made in the powers of the existing Maratha functionaries. In 1826 the duties of judge and magistrate were separated, and by Regulation XII of 1827 effect was given to the orders of the Court of Directors (the orders of 1814) and the police system was made to conform in all essentials to that of Madras. The Sadar Fauzdari Adalat, or Chief Criminal Court, was constituted at the same time, with powers of general control over the Police.

Meanwhile, in Bengal further developments had been taking place, and an attempt had been made to introduce special and expert control of the police. In 1808 an officer was appointed with the title of Superintendent of Police to supervise the Police of three divisions of Bengal-namely, Calcutta, Dacca and Murshidabad. The main idea of this office was that its incumbent should collect the information from over a wide area so as to make possible extensive police operations against dacoit gangs. The Superintendent of Police was also magistrate of the 24 Parganas and had superior concurrent criminal jurisdiction with the several district and city magistrates. He could grant pardons and he worked largely through informers and spies, thus anticipating in an interesting fashion, the methods of the later *Thuggee and Dacoity Department*. This system worked so well that it was extended to Patna, Benaras and Bareilly. It continued to flourish until the end of the twenties, when the office of Divisional Commissioner was created. The powers of superintendence over the police of a number of districts were then transferred to the new Commissioners, while the executive charge of the district police was left in the hands of the collector, who had now acquired the functions of district magistrate.

The change proved so disastrous that the Select Committee of Parliament, which considered the affairs of the East India Company, drew attention in the famous 'Fifth Report' (in 1813) to the deterioration in the Police, particularly in Bengal. The removal of the Superintendents gave the Darogahs-who had been left there-ample opportunities for illegal gain. The Select Committee collected much information about the malpractices of the darogahs and their subordinates, and showed that these arose party from the necessarily inefficient supervision of the commissioners who were fully occupied in discharging their many other function. With Peel's reforms of 1827 in mind, the Court of Directors issued a dispatch urging the consideration of similar measures in India. They gave orders that expense was not to stand in the way of improvement. On receipt of the directors' dispatch Sir Thomas Metcalfe circulated a number of questions throughout India, and appointed a committee in 1838 to consider the replies. This committee found that the chief cause of inefficiency was inadequate supervision.

Thus, after worrying the question for nearly seventy years the British authorities in India were beginning to perceive the truth, and the time was ripe for the solution. This does not mean that the system of government which they devised was not efficient. It was certainly more efficient than the system which it superseded, inspite of the fact that its methods were less drastic and its spirit was more liberal; inspite of the fact that it introduced, from the beginning, personal freedom under the rule of law in place of capricious autocracy, among the people who knew no other form of government. Its efficiency impressed the great Abbe' Dubois, who left India in 1823; and no man ever had a more intimate knowledge of the people of India than he. There is something dramatic about the next development in the long search for a solution of the problem of upholding the law and maintaining order, by lawful measures, in India. It was though the moment brought by the man and his measure.

The solution was found, not in the place where Englishmen and Scotchmen had settled-and grumbled since the sixteenth century about the inadequate policing of the neighborhood on their Grand Juries and otherwise-not in the districts of Bengal or Madras where so many attempts had been made, but in the newly won province of SIND. This might seem more remarkable in view of the evil reputation of the country, 'the Unhappy Valley' as it was soon called, hard to get at, and hard to get away from, wild and uncivilized, ringed in by desert coasts, desert mountains and desert sands, unendurably hot, unknown to and shut off from the India to which it had given a name. Sind had been a province in the Persian Empire, and later in that of Macedonian successors of Alexander, the Great. Hence the name of its great river was transferred in Western tongues to cover the whole of the peninsula for which there has never been a native name, although the Arabs and Pathans, learning from the Greeks and Persians, gave its people the generic name of Hindus, Medes and Macedonians, Scythians, Huns, Arabs, Pathans,

Mughals and Baluchis overran and overlorded the province in such an unending succession of swarms as to obliterate all trace of the village organization of the *'Vedic'* people. The people of Sind, Baluchi and Sindhi (claiming Rajput descent), were in tribal state of society when the British arrived, and even the remnants of the Mughal system of administration had almost disappeared.

There were neither village police nor the servants of a centralized revenue administration to confuse the issue, and the genius of the rough, but very ready, old conqueror of Sind took him straight to the point when Sir Charles Napier based his Sind Police on the model of the Royal Irish Constabulary. The secret of his success was that he made the Police a separate and self- contained organization under their own superior officers, whose sole duty and responsibility was to supervise them, and to see that they had adequate means to deal with crime.

Elsewhere in India at this time the Police under the District Magistrates were inadequately supervised and they had no superior officer with personal responsibility for keeping crime within bounds and an adequate organization for the purpose. The District Magistrate had other functions and he did not-he could hardly be expected to-personally supervise the investigation of important and serious offences. These district police, which had partly grown from the darogah system and partly from the subordinate revenue establishments, were commonly known as the 'Barquandazi Police'. The name comes from the Persian words *barq* and *andaz* which means *'a thrower of lightning'*. It was not given in jest, as might appear, but was obviously the name given to soldiers when firearm were first introduced and, like many Persian words, it was retained in India after it had fallen into disuse in Persia. To this day, watchmen and messengers in some parts of India are called barqandazis. The evidence given before the 1860 Commission showed that the barqandazi police were ineffective and inefficient in dealing with crime. They could not even, despite their name, be entrusted with more than a small number of arms, so they were useless for such purposes as escorting treasure, guarding treasuries and quelling disturbances. Troops had to be employed on these duties, and this, of course, reacted unfavourably on military efficency.

In certain places, irregular Regiments and Police Battalions were employed on such duties, especially where the countryside was seriously given to disorder. Such were the Ahmednagar Battalion, the Satara Irregular Battalion, the Bhil Corps, Tyrwhit's Horse, General Jacob's irregulars on the Sind Frontier, the six Punjab police battalions raised by Sir Henry Lawrence after the second Sikh War, various police battalions in Bengal, and so on. These were raised to meet the special conditions arising from the disordered state of the country following on the dissolution of the Mughal Empire. Some of these were subsequently absorbed in the district Police Forces of the reorganized constabulary.

Sir Charles Napier had annexed Sind in 1843. In 1847, Sir George Clerk,

Governor of Bombay, visited Sind, and was so greatly impressed by the efficiency of the Sind Police that he decided to reorganize the barqandazi police of the Deccan on those Lines. In 1853 a Superintendent of Police was appointed to each district in Bombay, Indian officers being appointed under them to each *Taluka* or division, and the general control of the Police in the whole province was taken from the Sadar Fauzdari Adalat, the chief Criminal Court, and placed in the hands of the Provincial government. A change on similar lines was effected in Madras soon afterwards. In Oudh, the day after the fall of Lucknow, Outram asked Colonel Bruce to submit a scheme for police. This was done, again on the Sind model, and for the town of Lucknow a force was constituted on the lines of the London Police.

Thus by 1860 the solution had been found and adopted in some parts of India. The Commission of that year was directed to examine all systems of police existing in India and to draft proposals subject to the following general principles:

1. The Indian Police to be subject to the Civil Government, and its duties to be civil not military.

2. Its functions to be (a) protective (as to the public) and repressive (as to the criminal); (b) detective; police and judicial functions being separated.

3. The organization and discipline of the force to be similar to that of the Indian Army and to be centralized in the hands of the executive Government.

4. The pay of the lowest ranks to be superior to that of an unskilled labourer.

5. The interior economy of the force to be in the hands of police officers.

6. There was to be only one force in any locality, not one under the police officer and one under a magistrate.

7. The village police to be primarily as sources of information and not employed on executive duties.

The Commission recommended that a Civil Police Force should be formed in every part of India on the model of the British Constabulary Forces and that it should be organized on a provincial basis. The police powers of Commissioners should be abolished and for each province an Inspector-General of Police should be appointed to be responsible to the provincial government for the control of provincial force. The duties of the latter should be the maintenance of peace, the prevention and detection of crime, the escorting and guarding of prisoners and treasure. The village police should be supervised in all their public duties by the superintendent of Police with a view to making them a useful supplement to the regular constabulary.

POLICE ORGANIZATION

The Indian Police Act of 1861 is a short one. It has only forty seven sections and of these about half deal with such matters as police powers with regard to public assemblies, the punishment for certain offences committed on roads and so on. The members of the Police Commission set up in 1860 were clearly

instructed to keep these facts in mind. Since the preventive functions were going to form only the subsidiary role of the police, the civil constabulary was also designed on the model of the army. Initially, all the senior officers (all of them Europeans) were drawn from the army. Direct recruitment for these posts through a competitive examination started in England in 1893, when the army sources dried up, partly because subordination to the District Magistrate was galling to army officers and partly because a transfer to the police adversely affected their future prospects. The police located in public stations were reorganized as a kind of civilian army of occupation and their main task was to quell the local disturbances. Special armed reserves were stationed at all the district headquarters to help the civilian public whenever the need arose. The armed police kept growing. While even the sanctioned vacancies were not filled up in the civilian police. Naturally, therefore, when the policemen started getting proper training, the syllabi was tilted more towards the use of firearms and regimentation, than techniques for investigation.

Initially the senior officers were drawn from the army and the practice continued till the army officers were themselves reluctant to get transferred to the police. Even though an open competitive examination for recruitment to the officer cadre of the police started in 1893, the post was not open for the Indians till 1920. Even then Indians were taken only on a restricted basis. Educational qualifications for the Indian (Imperial) Police was kept lower than the ICS so that the SPs would not have any objection to being subservient to the DMs. The Police Commission (1902) recommended a certain number of Superintendentship for *'native'* officers on an experimental basis. Since the recruitment of the Indians to the superior police posts was deliberately barred, a new rank of Dy. SP, equal in status with an ASP, to be selected in the provinces, was recommended by the Commission.

The British were not prepared to take any chance. Their distrust of Indians was also reflected in the system of recruitment of SIs. The SIs were to be recruited on nominations jointly by the DM and the SP of each district. The British showed special preference for the candidates who were near-relations or the loyal subjects of the Crown. For constabulary the British preferred illiterate villagers. Two considerations went in favour of such preferences; *firstly,* there was little chance of revolt form the lowest stratum of society, since they were used to being exploited and pushed around and *secondly,* they could be made to use force against their own people without any mental reservations. The emoluments of the constabulary were kept even lower than the wages of the unskilled labour. The argument given in support of this decision was that unlike labour, they had continuous employment and pensionary benefits.

In spite of these precautions, the British wanted to keep a close surveillance over the police administration. Initially, some Inspectors General of Police (IsGP) were drawn from the army, but later most of them came from the ICS. This system could not have continued without creating dissatisfaction among the European police officers. Therefore, in 1919 this post was transferred

to the IP. But the system of DM's control and other legal provisions showing the distrust of the police continued and they continue to this day. Only the three Presidency towns of Bombay, Calcutta and Madras were made the exception to this, where the police was designed on the model of the LONDON METROPOLITAN POLICE. The Commissioner of Police in these towns was the Justice of Peace and completely free from the magisterial control, though he could not try cases as the Magistrate. These towns were made exceptions because there was a large European population in these towns.

POLICE SINCE INDEPENDENCE

Little structural changes have taken place in the police organisation since Independence. A system which was designed due to situational constraints existing about a century ago, continues to serve India despite various limitations and shortcomings. It is strange that a Police Commission appointed by the British, consisting mainly of the British (only two members were Indians) pointed out various shortcomings of the system, though most of the recommendations were turned down by the Government. In independent India, nobody ever thought of going into the working of the police administration and seeing if reforms were necessary.

It was only in 1977 that a National Police Commission was appointed to review the working of the Indian police. It must be pointed out that the very philosophical foundations on which the system is based is redundant. Besides other considerations that went into the creation of the present structure, it was created at a time when the Government service was the only avenue of employment for people. Hence, a pyramidal structure was created for providing jobs for various strata of society-gazetted posts *'for the scions of the falling feudal chiefs and the rapidly growing educated higher middle class'*, non-gazetted officers' posts (SI and Inspector) for 'the lower middle class' and the post of constables for 'the surplus landless labour of the country'. Since the All-India cadre of the IP was initially reserved for Europeans only, the post of Deputy Superintendent of Police (Dy. SP) was created for the upper and upper middle class Indians, who were recruited in the provinces with a lower salary and slightly inferior service conditions. Later, some vacancies in the IP cadre were kept for Indians as well, but the parallel system of recruitment continued. This system was retained in Independent India too and it continues without much rationale behind it.

The anomaly is reflected in the service conditions of the two cadres. The only difference between two of them is that one belongs to An All-Indian Cadre and the other to the State cadre, one is selected through an all-India competitive examination conducted by the UPSC and the other through the examination conducted by various SPSCs. Both of them start from the same level, but the former is designated as Additional Superintendent of Police ASP and the latter Dy. SP. The former gets charge of a district in four to six and latter in eight to ten (at times more) years. The former ascends the hierarchical ladder more swiftly than the latter.

Similarly, an anomaly can also be seen in the dual control of a Circle Inspector (CI) and a SDPO over a police station. A circle consists of roughly two to six police stations. At times there is only one circle in a subdivision (or taluka). In that case, *Is the concept of a circle not superfluous*? In certain cases it has been found that the police stations in a circle fall under two subdivisions. For the sake of convenience the circle is placed under one SDPO but the CI has to run to two sub-divisional courts for court-proceedings. The redundance of a circle is also revealed when we find circles with single police stations. These two levels of supervision over police stations also leads to duplication of work and results in confusion and the prolonging of the bureaucratic procedure.

The constable, being the lowest rung of the administrative hierarchy, constitute the backbone of Police Organisation. Since most of them were illiterates, their training was only in wielding lathis and using firearms. This was the purpose, the British needed them for. But now their strength would lie in their courteous behaviour and their efficiency. But where the main consideration for recruitment is physical fitness (educational qualifications varies from matriculation in Delhi to class VIII in some other States), what efficiency can we expect in wielding lathis? Many of the older generation of constables can barely sign their names. Since the intake is so poor, little improvement in the intake is expected. Poor salary, bad service conditions and little chances of promotion would not have attracted good human material, nor would these have provided an incentive to work to those who join because of paucity of employment opportunities. Now a large number of states have increased the educational criteria either Matric or +2 level for constables.

A Sub-Inspector (SI) is the nucleus of the police department. He is the first officer to come into contact with crime. He is the officer whom the Criminal Procedure Code (Cr. PC) recognizes as an officer who has to take the initiative when a case is reported. The status, powers and qualifications of a SI are not proportionate. Looking at his duties, powers and importance in police work, his status in the hierarchy is incommensurable.

He is a non-gazetted officer. In many States, his minimum qualifications for the post is still intermediate or its equivalent. It is true that graduates and even postgraduates compete for this rank but they do not opt for it willingly, often they are compelled by deteriorating employment situation. Even during the service there is little incentive to work. Their responsibilities are enormous. But the incentive they get besides low salary, poor service conditions and limited chances of promotion, ill-treatment from the senior officers, suspension and censures rather than rewards for shouldering the responsibilities and criticism and hatred from the public.

The ill-treatment of junior officers is because of a tremendous gap between the senior gazetted officers and the junior or non-gazetted officers. The main reason for this gap is the pyramidal structure of the police departments in which some people start not from the bottom of the pyramid but from the

middle, rather, from near the top. The people who start from the bottom do not even reach the middle of the pyramid. Unfortunately, in the Indian police, there is a separate cadre of leaders (leadership does not evolve, it is imposed). A person who starts from near the top of the hierarchy might not succeed as a leader, since he would not consider himself a part of the force and would not be aware of the problems his subordinates face in job-performance. Therefore, he might not be able to appreciate their difficulties. This would also affect their reactions to the successes and failures of their subordinates. Man-management is an important quality of leadership. There are two cardinal principles of leadership, (i) example is better than precept and (ii) personal conduct should be such that it can be emulated and not taken advantage of. It should be above approach. The welfare and interests of subordinates should be looked after before thinking of his own comforts. In army, they say 'a **good officer is a servant of his men first and master second'**. This holds good in the police too. A good leader inculcates self-discipline and corporate discipline and develops *espirit-de-corps* in his unit.

Nowadays, proper leadership is lacking in the superior officers of the Indian police, specially in the higher echelons. The superior officers, instead of being impartial, are mostly governed by casteism, favouritism and nepotism and other predilections and are also influenced by political leaders on whom they tend to lean heavily for their early promotion and choice posting. This has led to inefficiency among them. The superior officers have no time even to make out plans and propose them to the Government for the constructive development of the force in proportion to the population explosion and to meet the challenges of multiple problems and that have been and are cropping up due to changed social and political contexts and outlook of the masses. A superior officer must also have the qualities of a good supervisor. A good and strict supervision is essential for the efficient functioning of an organisation. Only a good supervisor can be aware of the Planning.

In Himachal Pradesh there are deficiencies of the field officers and their genuine problems in job-performance. He is a trainer and developer of human resources. In performing this function, he is instilling confidence and improving not only the job but also an understanding of the goals of the police service, of its methods for accomplishing these goals, of its organisational philosophy and of the various career paths available within it.

Very few of these qualities are to be found in the supervisory officers in the Indian police. Very rarely (and very few of them) do they try to know and understand their subordinates. Nor do they carry out supervisions properly. Most of them avoid going to the field and thus directions given by them are, most of the time, theoretical and hypothetical, having little practical base. Cases are supervised with much delay and no proper directions are given by them to the investigating officers. Advice tendered by experienced subordinates is either not heeded to or contemptuously turned down. Some of the senior officers, it has been pointed out, regard inspection as a means to punish the

junior officers and look upon punishment as an effective instrument for maintaining discipline. They, very seldom realize that too many punishment affect the morale of the officers.

An imposed leadership renders supervision ineffective. The IPS officers generally start with a superior air because they have a huge body of subordinates to control. They get charge of a district in four to six years, but do not get sufficient training and experience for the running of a district in such a short period of time. This is an anomaly that has developed after independence. Even the British took care not to place a district incharge of a junior IPS. There is a provisions for training in police stations for them, but the officer-in-Charge of the police station (SI or CI) dare not impose discipline on a person who would be his 'boss' in five years time and would have his ACR in his hands. The leadership could be inspiring only if it evolves from within.

MAGISTERIAL CONTROL OVER POLICE

One of the clauses of section 4 of the Police Act of 1861 reads as follows:

The administration of the police throughout the local jurisdiction of the Magistrate of the district shall, under the general control and direction of such magistrate, be vested in a District Superintendent and such Assistant Superintendents as the Local Government shall consider necessary.

This provides the magistracy with operational control over the police. This extra-departmental control has led to several controversies and debates on this issue have been going on since the days of the British administration. The Indian Police Commission set up in 1902 took up this issue in detail. The mass evidence available to the Commission was against this duality of control and favoured the Bombay pattern of police administration. The Commission, however, rejected this proposal. But they were of the view that the DM's control and intervention was not intended to be constant or detailed, though they did find greater interference by some DMs in some provinces. Some specific recommendations made by them on this issue were: (i) that Divisional Commissioners should be relieved of direct interference in the details of police administration and their responsibility should be limited to the duty of supervising and advising DMs; (ii) that the responsibility of the DM for the criminal administration of the district must be preserved and that he must, therefore, be given authority over the police; but that this authority should be of the neutral of general control and direction and not of a constant and direction and not of a constant and detailed intervention. Orders passed by the Government of India on this report were clear and explicit.

It declared that the DM was to continue to be the chief executive authority of the area under his jurisdiction. The police, therefore, must be completely under his control and direction. To avoid undue interference by the DM and clash of personalities in law and order administration the Government orders made it clear that the DM should not interfere in the matters of departmental management and discipline, except where the conduct or efficiency of the

police officer affected the law and order administration in the district.

PROFESSIONALISATION AND SPECIALISATION

Greater professionalisation and specialization of police functions should have taken place since independence. But it has not been so. This aspect of police organisation has also been ignored. Due to the increasing complexity of the police functions, professinalisation and specialization of functions become necessary. For example, the riot police needs a separate kind of skill than the beat police, or the investigation police. Therefore, greater professionalisation of the police force and specialization of police functions have been urged. Professionalisation in case of the police refers to careful selection, training, skills and pride in work.

The police often complain that they are so busy with crowd control and VIP duties that they seldom get the opportunity to pursue investigations of crime. Torn between enormous and varied responsibilities, they often tend to be cynical and neglect their duties. Specialisation and proper division of work in Police Stations would solve their problem. The **Khosla Committee** had recognised the need for separate staff in police stations for the investigation of crime and maintenance of law and order.

RURAL POLICING

Village policing in Himachal is in a mess. No serious thought has even been given to improving and reorganising the police system in village and the antiquated system introduced in the mid-nineteenth century, reformed at the beginning of 20th century, has been allowed to continue even today. Improvements have been brought in urban policing, though marginal, but the rural police system has been left in a state of neglect. Village Himachal has understaffed police stations covering large areas with difficult terrain and practically no transport and communication facilities. Under the circumstances an officer - in - charge can seldom maintain effective control over the area under his jurisdiction with the assistance of 'an ill - organised, ill -equipped and ill - trained force'. Eight or ten constables would not be able to keep a vigil over such a large and difficult areas where they have to walk on cycle for miles together without proper roads.

The Chaukidari system introduced by the British for village policing has become outdated. Chaukidars are part-time employees recruited from the bulk of landless labourers BPL families at a nominal salary. These illiterate, untrained, unskilled, ill-paid, ill-fed and starved labourers would spend much of their time arranging two meals for their families than supply information about criminals. If higher officials of the force, who get better salary and facilities, go corrupt, there should be no surprise if a Chaukidar supplies wrong information for monetary gains. The Bihar Police Commission has argued in favour of gradual reform in the present structure itself as *'the Rural Police has its roots in the soil of the area and has grown with local traditions and customs....therefore', any radical change in its character may not be conducive*

to efficient administration'.

First of all, the jurisdiction of the rural police stations should be redelineated. Delineation should be based on following considerations: (i) the territorial extent and its terrain; (ii) the population, its density and socio-economic characteristics and (iii) the volume and complexity of police work in terms of police duties, particularly connected with investigation and prevention of crime.

In addition to this, outposts should be created to help the police stations if the volume of police work is greater and it seems difficult to limit the jurisdiction of the police station any further. A separate cadre of *Beat Constables* should be created. Adequate institutional checks should be provided so that solitary constable in remote areas does not become oppressive and irresponsible. The improved quality of constables equipped with good training and given a good salary, better promotion prospects and service conditions should be able to deal with situation better.

The Chaukidari system should certainly be abolished. But it would create a gap which will have to be filled up with a trained and well-organized body of volunteers to serve as part-time employees. They would be able to serve as the auxiliary wing of the rural police stations and to perform watch and ward functions in village. Able-bodied and literate persons should be recruited with the help of Gram panchayats and put through a short course to training. These should be locally recruited and posted. A provision could be made for annual training camps for them. It would not be difficult to organize this kind of an auxiliary wing as many of the States already have village-based civil defence organizations known as a Gram Raksha Dal or Village Volunteer Force.

It would not be advisable to put them under the Gram Panchayat till the system of Local Self-Government takes firm root in our country. Looking at the violence that takes place during Panchayat elections, when the powers and functions of Panchayats be entrusted with the control of the proposed Gram Raksha Dal. The enhanced prestige of the Panchayats might result in increased violence for their control.

URBAN POLICING IN HIMACHAL

Migration of the rural population to urban industrial centres has been a characteristic feature of all the industrializing societies. Heavy and unprecedented concentration of population in a city or town creates congestion and results in the growth of slums, greater use of vehicles, emergence of places of entertainment and an ever-increasing population due to the *'pull-factor'* and various other complexities.

The problem which growing cities and the city administration face today have not been faced ever before. These problems require a police system, capable of going into action at short notice under well-organized leadership. These problems also require greater specialization from the force in various aspects of police work. For example, the control of traffic has become problematic than before. The police not only have to regulate the traffic but

also have to catch the offenders who indulge in over speeding, driving under the influences of liquor and other traffic violations. Similarly, big cities also require a network of mobile patrols to prevent and limit criminal offences. Therefore, urban policing requires reorganization and reorientation.

The introduction of the Metropolitan Police system in Calcutta and its extension to Bombay, Madras, Hyderabad and Delhi is a recognition of the fact that policing in big cities requires a different system and orientation. Some police Commissions have recommended similar systems for big cities in respective States. But the mere introduction of a Metropolitan Police system does not solve the problem. The fundamental causes of inefficiency cannot be done away with by the mere introduction of a new system. There is a need to develop greater professionalisation in the various aspects of police work. In most of the cities, traffic is regulated with the help of automatic light system. Still, the volume of traffic accidents in Indian cities is more than in some of the more congested cities of the other countries.

The use of computer and a television system have been suggested for traffic control. Greater automation may not be possible in our country due to limited resources and lack of adequate power supply. Hence, while the use of modern technical know-how should be made as far as practicable, the traffic police should be well-trained in their duties.

The organisation and operation of mobile patrols would require a thorough knowledge of the city and a certain amount of professionalism. The city police also have to control and manage demonstrations. Political demonstrations often turn violent and even a little carelessness might amount to fanning the fire. The police in cities must have *'professionalism in handling unruly crowds'*. In Himachal Pradesh, all district headquarters are developing as big trade and commercial centres. There traffic congestion, theft, robbery, murder, rape etc. are speedily growing. To keep control on such crimes, we need efficient urban policing.

The Metropolitan Police system can be recommended for an introduction in big cities only. Smaller cities and big towns face similar problems, though the volume may not be as great. The emphasis, therefore, should be on providing better training to the policemen to meet the challenges thrown up by urbanization. The orgnisational structure need not be changed for this purpose.

MILITARISATION OF POLICE

Over the years, militarization of the Indian police has been taking place at a very fast rate. The British had reasons to increase the strength of the armed police at the cost of the civil police. The over-emphasis on the militarization of the Indian police is, perhaps, one of the reasons why the incidence of crime has been rising and the prevention and detection of crime is in a state of utter neglect. The civil police has lost its sophistry in dealing with crime. The problems such as terrorism, naxalism, communalism all have contributed to militarisation of police.

POLICE TRAINING IN INDIA

The process of training of police officers as a conscious efforts to impart professional knowledge and technical skills in a desired direction is largely determined by three factors viz:

(1) the importance of training as a cohesive force binding together large bodies in the organisation.

(2) the impact of training in disciplining the minds and emotions of individuals and

(3) the effect of training enterprise on the field performance of the police force.

Training is specially relevant for police officers because of the presence of three elements in police organisation -*danger, authority* and *efficiency.* Training in police is aimed at making lasting improvements in the role enactment capabilities of the police trainees as well as developing their ability to assume higher levels of responsibilities. In particular, training prepares them for effective performance of their roles as:

(1) law enforcing agency

(2) executive arms of the government

(3) protection of the rights and liberties of the citizens

(4) Agents of social change and

(5) formative role in political development.

It also prevents the police officers' obsolescence and keeps them fully aware to the situational context of their operational, politico-economic social environment.

THE CONCEPT OF TRAINING

In the context of police organisation, training generally means doing the following four things:

(1) Imparting knowledge including its application to various situation of law enforcement.

(2) Cultivating skills and techniques required in law enforcement work including that of appreciating different situations in a given time frame.

(3) Building appropriate work habits necessary for doing the police work and developing work experience and

(4) Shaping attitudes, value orientations and behaviour pattern of the trainees.

Police training consists of a series of interrelated, interacting, precisely controlled teaching/learning experiences that are designed to achieve specific objectives in a well-knit unified dynamic whole for fulfilling the police roles. Training in police can be informal institutionalized or non-institutionalized and also includes roll-call training, training circulars, instructions, orders on the job direction and instructions on various subjects by supervisory authorities.

SYSTEMS APPROACH TO TRAINING

Training is an integrated, comprehensive process in which development of job standards and job expectations, identification of training needs determination of training objective, development of course curriculum, selection of training methods and material, obtaining of instructional staff, conduct of actual instructional activity, evaluation and feed back are the basic steps. For developing a training programme, development of job standards take the form of job analysis, job description and statement of various tasks. The training concepts can be arranged in the form of an acronym as given below:

T Transference and Transmission of knowledge, skills and attitudes by the trainers (instructors) to the receivers (trainees).

R Reception and assimilation of knowledge, skills and attitudes by the receivers (trainees).

A Appropriate course design and content.

I Instructional techniques/tools and methods.

N Need identification

I Instructional environment and institutional arrangements.

N Need for *"systems-approach"* to training and application of managerial techniques to training enterprises.

G General evaluation and follow-up.

IDENTIFICATION OF TRAINING NEEDS

Training needs of police organizations can be categorized in terms of those which can an individual has; a group has; must be met immediately, can be met in the future training activities; call for on the job instructions; call for off the job instructions; the police organisation can meet best within itself, the organisation can meet best through "out - house" resources, a police officer can meet in concert with others and as police officer can meet only by himself. In police organisation, training needs can be determined through a three faceted approach of organizational analysis operational analysis and man analysis. In police organisation training groups can be divided into three distinct levels on the operational basis-

(1) Policy level-the supervisory level
(2) Supervisory level-the middle level
(3) Action level-operational level
(4) Formative role in political development.

HISTORICAL PERSPECTIVE OF POLICE TRAINING

The history of police training has four distinct phases of evolution and growth. The first phase commenced with the establishment of first regular police training school in the year 1859. The second landmark in the history is the publication of the report of the All India Police Commission of 1902. The establishment of Central Police Training College at Mount Abu in the year

1948 marks the beginning of the third phase and the report of the Committee on Police Training, Ministry of Home Affairs, with Prof. M.S. Gore as chairman in 1974 symbolises the beginning of the fourth phase. Though there is remarking continuity and each stage slides smoothly into the succeeding one, yet each stage has characteristics which distinguish it from the rest.

The first phase-seminal phase-bought about establishment of a number of training institutions for the police laying the edifice for the training systems. The second phase-expansion phase-witnessed expansion of various training efforts on the basis of recommendations of police commission 1902, followed by subsequent reviews by a number of committees. In the post-independence phase a number of central training institutions were started bringing uniformity and coordination in police training effort.

The fourth phase-specialization phase began with the acceptance of the Committee Report on Police Training (Gore Committee) and the resultant emphases on specialized training. The first two phases laid a solid foundation for a police training system. Police Training in India has been organized essentially as an in-house exercise with very little outside support as is the practice in U.K. which is opposed to that obtained in U.S.A. where police training as primarily imparted by Universities in consultation and collaboration with police specialists. All the States have gradually built up their own police training institutions for basic and refresher training. Outside support is taken only for specialized and advanced courses like unarmed combat, weapons and tactics, internal security intelligence and like and even for those officers are deputed to other training institutions managed by police or paramilitary orgainsations. During recent years there has been a knowledge explosion particularly in the fields of management, behavioural sciences and social sciences, all of which are essential for police.

The training institutions of police cannot build up and keep pace with his increase in knowledge by themselves and, therefore, must seek support of specialized agencies and institutions outside the police organisation. Thus it is necessary to evolve a system of training in which the outside support in blended and harmonized with *in-house* training system.

ORGANISATION OF POLICE TRAINING

The organisation of police training in India is much more diverse and plural than in Japan and Great Britain. It is certainly better knit than the one obtained in U.S.A. The constitution of India leaves enough scope for this desired plurality. It enumerates police as an item in the State list of the seventh schedule, yet the Central Government have been assigned a definite role in terms of police coordination, personnel control, police research and modernization of police training in the country. The organisaiton of police training is largely in the hands of the Government agencies of the State which is one of the unique features of Indian polity.

The Directorate of Police wireless is conducting initial and upgrading

training courses in radio telecommunication for wireless operators of the all the State police. The Sardar Vallabh Bhai Patel National police Academy, Hyderabad, Internal Security Academy, Mount Abu and the Institute of Criminology and Forensic. Science are other important Union Government organizations which undertake functions of training police officers and coordination of research activities. More than 120 training institutions are functioning in the country to impart training to police officers of the country. The structural pattern of training in various States differs according to the size and nature of duties of the police force. There are three kinds of training institutions in the State engaged in task of training of the police personnel:

(1) Police Training Colleges/Academies for the training of Dy-Superintendents of Police, Inspectors and Sub-Inspectors of the State.

(2) Training Schools/Centres for the training of Head Constables and Constables.

(3) Armed Police Training Centres for the training of the junior members of the armed Police battalions.

Besides this, Detective Training Schools provide training to the police investigators. At present the Bureau of police Research and Development, through its training division, coordinates training efforts of various training institutions of the States. Induction of civil staff in training institutions indicates that there is a shift from outdoor training to indoor training and non-police subjects like criminology, sociology and behavioural sciences have been introduced in the police training curriculum. At the All India level, there is National Police Academy, Hyderabad, Internal Security Academy, Mount Abu, Institute of Forensic Science and Criminology to impart training to senior police officers of the country. Training Division of the Bureau of Police Research and Development is acting as coordinating agency for training of police officers in India.

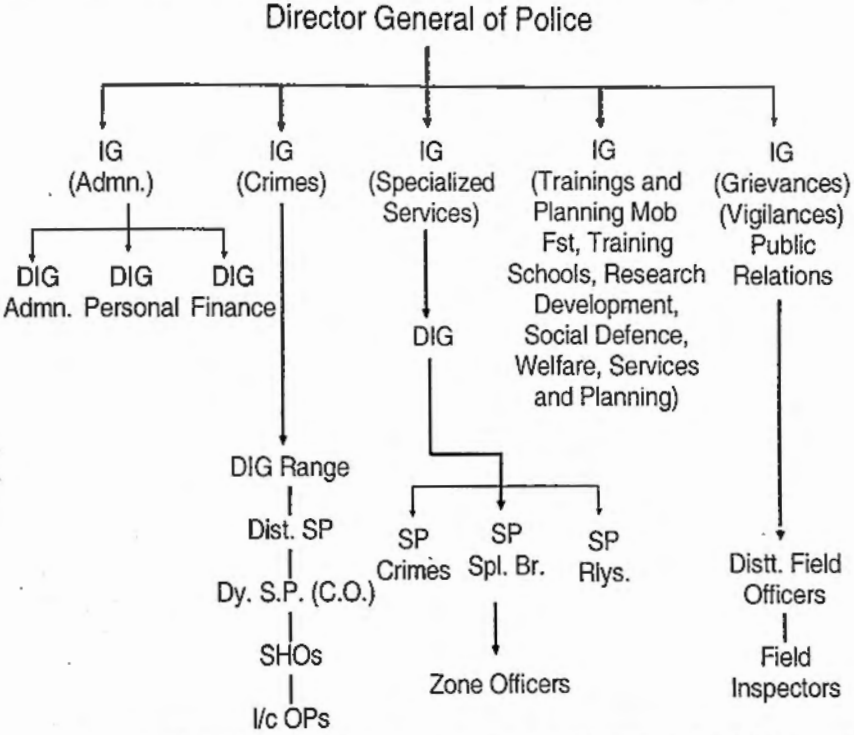
SARDAR VALLABHBHAI PATEL NATIONAL POLICE ACADEMY, HYDERABAD: The Academy can be well compared with the F.B.I. Academy of U.S.A. and Bramshill Police Academy of Great Britain. It represents the greatest effort at police training designed to develop leadership in the police. Besides conducting Basic Course and Terminal Course for IPS Probationers, Senior Officers course, Crime preventive course, Trainer of trainers course and Top management Development Programmes are being organized by the Academy. Academy has procured all available latest training aids and equipments and has become a model police institution for the developing countries of the world in respect of physical facilities.

INTERNAL SECURITY ACADEMY, MOUNT ABU: Internal Security Academy is basically a training institution of the Central Reserve Police Force (CRPF) under the Minister of Home affairs. It is conducting internal security training for Deputy Inspectors General of Police, Superintendents of Police and Deputy Superintendents of Police of the country

and for security officers of the public sector undertakings. In Himachal Pradesh Police training school was located at Junga district Shimla, now has been shifted to 'Daroh' in district Kangra. But trainees are also sent to Phillaur in Punjab, Madhuban in Haryana and other states training centres for specilalisation.

RECOMMENDATIONS AND SUGGESTIONS

Police training in India needs to be revitalized and reorganized so that it may produce efficient and competent police officers having appropriate attitudinal change in their life style necessary to meet the complex challenges of a modern society. Police officers should build up a thinking apparatus of the social being who can properly deal with the decent citizens in the process of sorting out social deviants and criminals. Police Training should try to usher in a new era of policing where policemen are loved and adored by the citizens and they may become their true "Friends, Philosophers and Guides". Police Training has to completely bridge the existing gap between role enactment, role expectation and the idealized role of the police.



THE DISTRICT POLICE

The District tier of State police organisaiton in India controls the network of police stations spread all over the country. The Superintendent of Police, who presides over the organisation is the key functionary through whom the State government operates and the police stations below look for command, guidance and action. Hierarchically speaking, the district police in most of the States stands organized into police sub divisions and police circles, which comprise a cluster of police sub divisions and police circles, which comprise a cluster of police stations. The Additional or Deputy Superintendents of Police look after the work of police subdivisions, while the Circle Inspectors deal with the supervisory work of police stations falling within their respective circle. A number of staff agencies, such a Crime Bureau, Special Branch and Special Investigating Agency etc. stand converged into the office of the District S.P., who in turn operates through a network of line units, such as Police Stations, Special Squads, Prosecuting Branch, Traffic Police and Reserve Police Lines. The organizational profile of the district police can be presented through the following chart:

The District police organisation, which on an average covers about 3,600 square miles and population of over a million and a quarter people, has a large jail and store houses for arms and ammunitions and clothing equipment. Constables are recruited and partly trained here. Armed police and sometimes mounted police also have their reserve lines or barracks here. The C.I.D. organisation operates from its headquarters. Working under the overall supervision of the D.M., the S.P. looks after the problems of law and order and that of administration of crime and vice. To perform these twin functions, the S.P. has to collect intelligence, cultivate good police-public relations and keep his junior personnel in good trim. As a central person in the district administration, the S.P. has to deal with his juniors, seniors, non-colleagues,

people, political parties and an endless variety of political and quasi-political pressure group. His office, which has a large confidential cell, handles a lot of conventional material of sensitive nature. All this makes the position of the S.P. pivotal in the district administration. In Himachal Pradesh S.P has some what less political pressure in comparison to other states. Being a small state and peaceful atmosphere, here the nature of job and expectations are entirely different.

HIMACHAL PRADESH POLICE DEPARTMENT MODEL

The Police Subdivisions in a district are administered by Additional Deputy Superintendents of Police. These functionaries have two major roles to play *viz.*, (1) they function as Police Chiefs of their subdivisions and (2) also act as staff Aids to the S.P. at the headquarters. In the former role, their functions in their respective subdivisions are almost similar to that of the S.P. in his district. In the latter capacity they perform staff functions of delegational nature and aid and advise the S.P. in their respective areas of professional specialization.

The Police Circles, Circles in a subdivision have a special historical significance in India. The promotee Sub-Inspectors, who function as Circle Inspectors keep the Dy. S.P. and S.P. informed about the conduct of the Sub-Inspectors and other occurrences and movements having a direct bearing on

Police functions of the district. The office has been criticized for its irrelevance, duplication of work and proverbial corruption obtained in the Inspectorates. Yet it has a justification in its expertise and on-the-spot-supervision of field agencies by experienced police officers of the State.

The Crime Bureau, the Special Investigation Agency and the District Special Branch are the major staff units in the district police office. The Bureau collects, collates and disseminates all information regarding organized crime and criminal gangs in the district. Different states have given different names to this Bureau, such as Crime Record Section, M.O.B. and Crime Information Centre. The district level information is processed and finally passed on to the Central Crime Information Bureau of the State on asking as well as through periodical reports. *The Special Investigation Agency* investigates cases of embezzlement, fraud, forgery and misappropriation. It also collects criminal intelligence in general and keeps the S.P. informed about the activities of confirmed criminals. *The Special Branch* which represents an extension of the state special Branch, collects Political intelligence and attends to other secret works connected with foreigners, V.I.Ps and national security. It submits periodical reports on political and communal movements, labour and student activities, agitations by organized groups and other allied matters to the S.P. of the district.

In big districts, separate sections of *Traffic Police* exist. Some districts maintain special enforcement squads to enforce antismuggling laws and antiblack marketing and anti-hoarding orders. For the prosecution of police cases, there are *Assistant Police Public Prosecutors* for the magisterial courts, but *Public Prosecutors* have been appointed from the bat couets conduct cases in the Session Courts. The recent amendment in Cr. P.C. has not materially changed the position with regard to Public Prosecutors, but the Assistant Public Prosecutors can no longer be police officers in the district. *The District Reserve Lines,* which exist to meet contingencies, such as leave, sickness and vacancies caused by resignations, suspensions and dismissals have a special role to play in district police establishments. They not only keep the line in good shape, but provide useful training and much needed change from the drudgery of the field.

THE STATE POLICE ORGANISATION

The police organisation at the State level performs distinctively staff-cum-line functions. These functions are quite complex and have to be discharged *vis-a-vis:* (a) the Union Government and its auxiliary agencies, (b) the Home Department of the State Government and (c) the line officials of the district police below. Most of these line and staff functions are performed simultaneously. Some of the staff agencies operate from the State headquarters and may or may not have field units. The line functions of the State level police administration include implementation of policies pertaining to law and order and detection and investigation of crimes with the help of district units. The Home Minister, the Home Secretary and their Home Department constitute the civilian wing of the State police. The professional wing has its

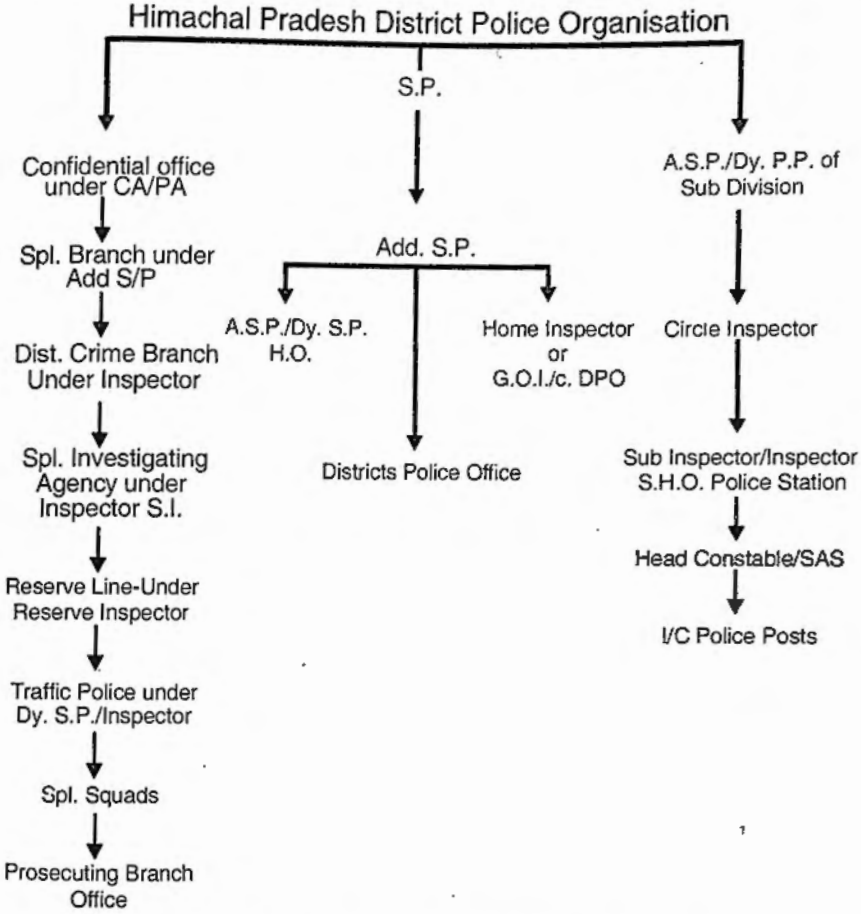
unarmed and armed wings.

Thus the professional wing of the State police works under the overall command and supervision of the *I.G.P.* or *D.G.P.* of the State. He has a couple of special assistant and additional Inspector General of Police to aid and advise him at the police headquarters. They may also administer some of the specialized police functions, like anticorruption, vigilance, civil defence, traffic etc. at the State level. The *I.G.P.* or *D.G.P.* is the Chief of the State police and the police Act assigns specific responsibilities to him in the arcas of police policy formulation and line operations involved in the execution of the policy. He is the chief personal officer of his department and has wide powers and discretions with regard to financial management and disciplinary matters in his organisation. As an administrative leader of his team, he functions through a number of *Deputy Inspectors General of Police* working on territorial or functional bases.

The D.I.G. incharge of a police range supervises the work of 4 to 6 administrative district, which constitute the intermediary level in the administrative hierarchy, just below the State and above the district. The functional D.I.G. at the State level take care of auxiliary units, such as C.I.D., the intelligence department, the Railway Police, the Police Training Institutions, the police headquarters and the armed battalions at the State level. There is no uniform pattern about the number and work of the D.I.Gs in various States of the Union. The D.I.G. range exercises a general supervision over the District Superintendents of Police and the latter look at him for advice, guidance, leadership and coordination of police work in the range. As incharge of specialized branches, like C.I.D., Intelligence, Anit-corruption, Traffic, Railway and armed police forces, the D.I.G. has his own independent hierarchy and functional network, depending upon the nature and scope of his operations. For instance, the D.I.G., C.I.D. has a horizontal orgainsation to which M.O.B., Finger print Bureau, Forensic laboratories of the state and Dog Squads are attached as subordinate offices. The police training institutions in the States have their quasi-autonomous organizations and are generally headed by Senior Superintendents of Police.

The Railway Police Organisation follows district and State systems of jurisdiction in different States. This jurisdiction conforms to the railway limits, extending between outer signals and the running trains. The functions of the railway police are similar in all the States and it functions as an island of police administration within the large oceans of police administration of the State. The exchange of personal between two kinds of civil and railway police at each level brings home the complementary nature of the railway police organisation.

The State Armed Police force represents the continuation of military police and the Crown Representative Police of pre-Independence days. It is called by different names in different States; PAC in UP and Rajasthan, Special Armed Police in Madhya Pradesh, Armed Police in H.P., Military Police in



Bihar, Assam Rifles in Assam and Malabar Police in Tamil Nadu. They are in the nature of reserves at the disposal of the I.G.P., who can deploy them on the requisition of the D.I.G.of the range. As a reserve striking force, they are employed in special situations or on security duties in sensitive area. A battalion has 4 to 6 companies, each of a hundred to 120 constables. A headquarters company has transport, signals, stores and training units. The Company, the Platoons and the Sections are commanded by Subedar Major, Naib - Subedar and Havaldars respectively. The organisation of the *Traffic Police* at the State level police administration is a recent phenomenon emerging in the wake of increasing urbanization. At the State level, the functions of the traffic police fall mostly within the arena of staff duties, such as planning, road research, coordination of district level efforts and advice to the IGP in matters pertaining to movement of heavy vehicles and road safety in the cities. The wings of *Women Police* and *Mounted Police* represent welcome additions to the State Police Organisations in view of the changing nature and techniques of crime, vice and public disorder in free India.

The organisation of *Home Guards*, sponsored and financed by the Union government as an auxiliary unit of the State police administration in most of the States, is a statutory attempt of raising a 'citizen police' as a secondary police organisation, functioning as an adjunct to the regular police organisation of the State. In the past years Armed Police has been denigraded to a position, where they hardly make distinction between citizen and criminals. Peaceful demonstrators are dealt by them with iron hand mercilessly.

The Police Commissioner system in the three Metropolitan cities of Calcutta, Bombay and Madras, which free India has extended to six more capital towns of Hyderabad, Bangalore, Ahmedabad, Nagpur, Pune and Delhi is a unique and very promising experiment in State police administration. The Police Act 1861 is inoperative in these cities and DMs do not function as guardians of law and order. The Police Commissioners in all these cities, except in Calcutta and Delhi are equivalent to D.I.Gs in States and the Deputy and Assistant Police Commissioners have similar functions as that of S.P.s. and Dy. S.Ps. in State administrations respectively.

The unique features of the system are its independence, autonomy and functional specialization in urban setting. The Administrative Reforms Commission appointed by the Union Government (ARC) had recommended a wider application of the experiment adjudged on the criterion of high ideals, enshrined in the constitution. They have to work under different kinds of compulsions and constraints at national, State and local levels. In place of playing the master they have become prisoners of the political system. While explaining this they come out with usual *alibis* and poor police performance is one such alibi, which they have repeatedly used during the decades of the past. Conversely, the police also holds the political masters responsible for its present plight and professional predicaments. The objective reality is that police and polity are negatively interacting in present day India and a positive

readjustment of their relationship can prove mutually reinforcing and a rewarding experience for both of them in future.

POLICE AND THE CONSTITUTION

The Indian Constitution, notwithstanding its details, has not cared to issue any directive about a new police system for the welfare policy, which it seeks to envisage. The Chapter on Directive Principles of State Policy, talks about uniform law codes, separation of judiciary from the executive and equitable distribution of national wealth, but observes a meaningful silence about democratisation of law and order machinery and a purposeful readjustment of police system with the Fundamental Rights of Citizens, institutions of panchayati Raj, communal harmony and judicious procedures of criminal justice. In place of highlighting the basic problem of Police- Polity relationship, the Indian constitution has rather retained the colonial structure of bureaucracy.

It envisages All - India Services, including that of the police and enumerates, maintenance of law and order and police in the State List of the VII Schedule. The perusal of the Indian Constitution does not yield any gainful insight and clarity about the police philosophy and the kind of policing, the founding fathers conjured up in their vision of a free society in India. The compelling needs of centripetalism forced them to concede the creation of some Union Police agencies and merit-oriented leadership of the I.P.S. But this apart, they were obviously not inspired by any positive philosophy of citizen police or decentralization of coercive structures of power. Any concept of depoliticisation in the professional working of police through autonomous agencies, attached to local self-government was beyond the pale of their comprehension. They assigned police along with local bodies to the cares of state politics, which by its very nature and limitations cannot be in a position to afford decentralisation or induct nucleus changes of national dimensions. The State police system, as ordained in the constitution of India, does not permit the evolution of a national perspective on police reform and is obviously detrimental to all experiments, leading to decentralized municipal policing.

It is interesting to note that when fundamental rights of the citizens have been duly protected through judicial safeguards, correspondingly less care has been bestowed upon some of those measures, which could have minimized their infringement by the executive authority of the government, more especially the police. The lawyer politicians among founding fathers took it for granted that abuse of power by the police and the misuse of police by the executive arm of the government are natural and normal weaknesses of the democratic system and an independent guardian judiciary is the infallible agency to protect individual rights and defend the constitution against violations.

The widely shared national consensus on this issue was a legacy and it did not allow a free and creative discussion on the nature of the permanent executive, *i.e.* bureaucracy (including police) against whose pervasive roles and arbitrary activities the citizen need to be protected almost every day. The Westminister model of parliamentary democracy was tempered at times and quite seriously also by the Constituent Assembly to indigenize the model. But then the historical hangovers, the elitist ethos and the security needs of the country in the fifties were so paramount that any quest for a new philosophy or pattern of bureaucracy was simply out of place in the interest of continuity. Consequently, the Constitution which has provided for a representative and responsible government through the mechanics of adult suffrage has left administrative bureaucracy in the elitist and unrepresentative mould.

Experience reveals that this has potentiality of a thread to the fundamental freedom of the citizens and the welfarist character of the Indian polity. The political masters, on whom developed the responsibility of hammering out a new philosophy or pattern of administration in the context of changed goals of the Constitution, did not live up to this challenge. The result has been that the infrastructure that has grown around the Constitution has bureaucratized

Indian politics much more easily and effectively than Indian politics politicizing its elitist bureaucracy.

The facts that police administration is a constitutional responsibility of the State governments and the All India Police Service is a Secondary Service to the I.A.S. tell upon the calibre of the Police personnel and expose the citizens to the vagaries of coercive power of the executive. It is no solace for the citizen to listen that 'Rape of Freedom' can be punished and restored through and independent judiciary in a society, where the Constitution does not spell out any administrative philosophy for the guidance of the Bench. The historical continuity has kept the constabulary or the junior officials of State Police in their colonial formations and formulation without violating the letter and spirit of the Constitution. The entire machinery of criminal justice has neither been dismantled nor reshaped into spirit of social justice and individual dignity by the Constitution.

The Preamble and its laudable objectives to not get concretized into the pages of the text. This meaningful absence of a constitutional mandate about any philosophy, structure and procedures of bureaucracy and especially that of police in the Constitution of India has not allowed the infrastructure to grow in accordance with the spirit of the Preamble. Rather it has bred the monolith in such a manner that the formal political system has been made to play the second fiddle.

Himachal Pradesh came into existence on 15th April 1948 as a centrally administered Chief Commissioner's province. The administration of the state including law and order was controlled by the central government.

At the time of the formation of Himachal Pradesh in 1948, states like Mandi, Chamba, Sirmaur, Suket and Bilaspur had their regular Police forces. Other smaller states had a common Police Force. The Rulers of Punjab Hill States, with the exception of Sirmaur and Bilaspur, realized the advantage of establishing a common system of Policing in their States. The system was adopted as an experiment for three years from 1st April, 1943. This was, in the true sense, the beginning of Himachal Pradesh Police. For proper administration of the scheme, an Executive Committee, consisting of 5 members was constituted. Four members of this committee were elected by the Rulers from amongst themselves. The 5th member was nominated by the Political Agent of the Punjab Hill States to represent such states which may be under his direct administration due to minority of the Rulers or for other reasons. The Committee elected one of them as it's chairman.

In order to ensure proper administration of Police work, an officer of the status of Supdt. of Police in British India was appointed. He had the authority to exercise general supervision over the Police Cadre in these States.

In 1948, after the constitution of the Union Territory, efforts were made to stream line the Police force in the State to bring it at par with other forces of the India Union. The Police force drawn from different States having varying backgrounds and traditions were amalgamated to form the H.P. Police. The

Police Administration in the State was headed by an Inspector General of Police who was also Inspector General of Police for Union Territories of Delhi and Ajmer. Sh. S.R. Chaudhary IP, was the first IGP. In 1953, a separate Inspector General of Police was appointed for Himachal Pradesh. This officer of the Imperial Police Services was from Punjab Cadre on deputation.

The Union Territory of H.P. was given statehood on 25th January 1971. Initially there was only one Range in the entire State with Hqtrs. at Shimla with all the 12 Districts under it. On 16th Feb, 1974 the Northern Range with Headquarters in Dharamshala was created and seven Districts viz. Chamba, Una, Kangra, Mandi, Lahaul & Spiti, Kullu and Hamirpur were placed under it. The Southern Range with Headquarters in Shimla was left with five Districts viz. Shimla, Kinnaur, Bilaspur, Solan and Sirmaur. On 24th April, 1986, the Central Range with Headquarters at Mandi was created and five Districts viz. Mandi, Kullu, Lahaul & Spiti, Hamirpur and Bilaspur were placed under its jurisdiction.

The Recruit Training Center, which was functioning at Chamba since the beginning was shifted in 1974 to Junga in District Shimla and on 25th July 1995 it was shifted to Drongarh (Daroh) in district Kangra, after it attained the status of full fledged Police Training College (PTC). It is headed by a Dy.Inspector General of Police as its Principal.

There are seven armed police battalions in Himachal Pradesh - one of the HPAP and six India Reserve Battalions. The 1st Armed Police Battalion was created in 1971 and located at Junga. The purpose was to meet the emergent duties at Shimla and to assist to local police whenever required. The first India Reserve Battalion was raised in June, 1993 with its Hqtrs. initially in Darongarh. Its present Hqtrs. are located at Bangarh District Una. The 2nd IRBn has been raised in 2005 with the reorganization of the existing 2nd and 3rd HPAP Bns. with its headquarters at Dharamshala. The 3rd IRBns. was also raised in 2005 with its Headquarters at Pandoh, Distt. Mandi. The 4th IRBn raised on 09 July 2008 at its Hdqrs. at Jungleberi in Hamirpur District, 5th IRBn (Mahila) raised on 26 August 2008 with its Hdqrs. at Bassi in Bilaspur District and 6th IRBn raised on 17 November 2009 with its Hdqrs. at Kolar in Sirmaur District. The main function of these Battalions is to assist the State police in maintenance of public order and to render assistance to other States on the request of the Centre.

In the year 1988, the State Forensic Science Laboratory was established at Shimla, which was later shifted to Junga on 26th August 1996. The laboratory has been designed as per National Standards. Presently 6 areas viz. Biology/ Serology, Chemistry & Toxicology, Documents/Photography and Physics & Ballistics divisions are functional. Presently two FSLs are also functional at Mandi and Dharamshala.

H.P. Police Wireless Organization came into existence during 1954 and has two wings i.e. Cryptography and Wireless Communication. An officer of the rank of Dy. Inspector General of Police is the overall Incharge of this organiza-

tion. The wireless organization has been renamed as Directorate of Police Communication & Technical Services (C &TS) in 2007 and it has been reorganized. The Vigilance department was established in 1965 to investigate cases involving corrupt public servants and those who misuse their official position for pecuniary benefits. It is headed by an officer of the rank of Addl. Director General of Police. There are two Zones and Twelve anticorruption units.

The Enforcement directorate was created in 1981 as a specilised wing to prevent to leakage Govt. revenue and to investigate cases involving all economic laws applicable to the State. It is headed by an officer of the rank of Addl. Director General of Police. There are two Zones - Northern Zone with Hqtrs at Dharamshala and Southern Zone with Hqtrs in Shimla.

As per H.P. Government Notification No.Per (Vig.) A(4)-2/99 dated, 15 November 2006 the existing Vigilance and Enforcement Departments have been merged to form one new Department namely The State Vigilance and Anti-Corruption Bureau (SVAB) with its Headquarters at Shimla. The Bureau is headed by an officer of the rank of Director General of Police/Addl. Director General of Police.

Today there are 114 Police Stations in the State including 12 Police Stations of SVACB, 2 Police Stations of TTR and 1 Police Station of CID. 112 Police Posts located in the 12 Districts and 1 Police District Baddi of the State.

TABLE - 1

GROWTH IN POLICE STRENGTH (H.P.)

Year	Officers*	Head Constables**	Constables**	Others**	Total
1981-82	968	1,200	5,869	473	8,510
1983-84	1,042	1,427	6,530	556	9,555
1985-86	1,159	1,576	7,506	591	10,832
1987-88	1,263	1,768	8,143	670	11,844
1989-90	1,292	1,845	8,404	712	12,253

Source: Police dept. Himachal Pradesh

from Inspector General Police (IGP) to accommodate more officers of senior ranks in the hierarchy. It will be imprudent to compare Himachal Pradesh politically, economically and socially with other states of Indian Union. Because the state is politically highly mature, economically a highly developing one and socially a well unified unit. Crimes are rare and people are generally peaceful and law abiding. Police in the state is much feared agency.

The visit of police to a village or to a house is not considered very good. The very sight of a policeman is sufficient to create terror and fear in the minds of the people. In a state like Himachal Pradesh police should not only remain as an agency meant for enforcing law but an agency of social welfare. The following tables show the rate of crime in H.P. distribution of crime and the growth of police force in the state.

The study of the table 2 and 3 shows that there are more incidents of crimes in the areas where there is greater flow of tourists and the district adjoining to Jammu & Kashmir, Punjab and Haryana. The growth in the crime rate can also be attributed to the factors such as *unemployment, urbanization, industrialization, high population growth* and *crime oriented politics.* It is high time for the police administration in Himachal Pradesh to realized the need of this peaceful and traditional society to bring down the crime and create an atmosphere, which is conducive to healthy social, cultural, economic and political development. The man in *Khaki* (uniform) should not represent the reign of terror but create a sense of confidence and faith among the masses for police force.

The police administration is in bad shape in Himachal Pradesh. It looks that no serious efforts were made in the past years to improve the functioning of this law and order maintaining agency. Neither of the government cared to provide the required facilities to the police. Most of the police stations in the state have inadequate police force, causing delay in attending to public complaints. There has been a manifold increase in the population of the state during past decades. The crime graph has also shown a sharp increase but no efforts have been made to enhance the police force. Despite repeated requests by the district police chief, the budget allocation for the purpose of fuel, repair of vehicles and for other day-to-day needs remained uncharged.

There is no vehicle worth the name in police stations. Even the vehicles being used by district police chiefs are quite old. Likewise funds for the payment of telephone bills are meagre. Despite tall claim made by the government from time to time, nothing fruitful has been done to improve the working of this institution. If one goes by the record, a number of posts of Additional Director General of Police, Inspector-General of Police, Deputy Inspector-General of Police and Superintendent of Police have been created, but no attention has been paid to increase the force in Police Stations. At present 60 per cent police station have inadequate police force. Similarly, the strength of policemen in police lines is also much less than the requirement.

The condition of police stations located in the border areas of the state like

Indora, Nurpur, Gagret, Nalagarh and Parwanoo is the worse. In these police stations there have been more incidents of serious crime.

Jails Reforms In Himachal Pradesh

Mahatma Gandhi has rightly said that hate the crime and not the criminal. Because all men are born equal and are endowed with their creator with some basic rights. These rights are mainly right to life and liberty, but if any person doesn't comply with ethics of the society then that person is deprived of these rights with proper punishment. Many experts believe that the main objective of prisons is to bring the offenders back to the mainstream of the society. Various workshops have been organized by the State Government in collaboration with NGO's to bring reforms in the current prison systems.

The rehabilitation of inmates is an important issue. Rehabilitation of inmates is meaningful only if they are employed after release and for that purpose educational facilities should be introduced or upgraded. In many jails, inmates including hardcore criminals and women have joined various courses offered by IGNOU and their respective State Universities. Courses mainly offered are BA, MA, MBA and other post graduation courses. The inmates can also join the classes of 10th and +2 for basic guidance. In many jails, with a view to imparting vocational training, full fledged computer training centres have been established. The inmates are also provided training in carpentry and fabric painting. Many jails have also initiated programmes for women empowerment by imparting them training in weaving, toy-making, stitching and making embroidery items. Wage earning and gratuity schemes and incentives are also used to reduce the psychological burden on the convicts.

The Government of Himachal Pradesh has lifted ban on wearing Gandhi cap in jails. Various seminars are organized by jail authorities to enlighten the prisoners on their legal rights, health and sanitation problems, HIV/AIDS and issues of mental health, juveniles, minorities and steps to reduce the violence in prisons. The constitution assigns the custody and correction of criminals to the States and Union Territories. Day-to-day administration of prisoners rests on principles incorporated in the Prisons Act of 1894, the Prisoners Act of 1900 and the Transfer of Prisoners Act of 1950.

Jails and Welfare

Details of welfare facilities being provided to the prisoners in the Jails in Himachal Pradesh are as under:-

i) **Food etc:-** Food, beverages etc are being provided as per laid down norms in the Jail Manual. However, special diet to the sick prisoner is also being provided on the prescription of Medical Officer concerned.

ii) **Other Recreational Facilities:-** For recreation of the prisoners Badminton, Volley Ball, Carrom Board, Chess, Playing Cards and TV sets have also been provided. The prisoners are also provided newspapers, magazines, books, etc.

iii) **Activities for Reduction of Stress Level:-** Programmes of Art of

Living, Yoga, Bhajan-Kirtan, Cultural activities, moral lectures, etc, are arranged in the jails of the State which help the prisoners to reduce the stress and develop positive thinking.

iv) **Grant of Parole:-** Parole is sanctioned to the convicted prisoners in accordance with the provision of HP, Good Conduct Prisoners (Temporary Release) Act, 1968 and the rules made there under. Requests for parole as rejected in a very few cases mostly on the grounds of non recommendations made by the District Authorities or on the grounds of overstay for long periods. In emergent cases like serious illness or death in the family and sometimes on the basis of conduct of individual prisoner, the convicts are allowed parole on verifications of facts by the local Police/SP. Ordinarily, prisoners avail of the parole facility more than once in a year.

Modernization of Prisons Scheme

Modernization of Prisons Scheme has commenced from the financial year 2002-03 by the Government of India. The implementation of the recommendations made by various Jail Reforms Committees and orders and directions passed by the Hon'ble Supreme Court / Hon'ble High Courts from time to time are being implemented. The accommodations for the prisoners in the Jails are being raised by constructing additional barracks / accommodations. The overcrowded jails, because of increasing prison population, are being administered with less than desired/ideal staff resulting in physical and mental stress on the staff, which is true not only in case of Himachal Pradesh but for other States also.

Inspections

Quarterly inspections of Jails are carried out by the District and Session Judges and compliance in this regard is submitted by the Superintendent, Jail concerned as well as by the Prison Headquarters to the Hon'ble High Court. The officers from the Prison HQs also visit Jails to supervise the working of the Jails.

Jail Industries

The Jail Industries are being run at Model Central Jail Nahan, Kanda (Shimla) and District Jail, Dharamshala to train the prisoners in few trades so that after their release they may be able to rehabilitate themselves. The details of trades and the items manufactured in the respective jail industries where training is imparted to them are as follows:-

Sr. No.	Name of the Jail	Name of Industry
1.	2.	3.
1.	Model Central Jail, Kanda	Shawl Weaving, making mats, blankets, cotton cloth and bed sheets.
2.	Model Central Jail, Nahan	Shawl Weaving, making mats, durries, blankets and bed sheets.
3.	District Jail, Dharmshala	Carpentry.

Inmates working in these jails are paid the minimum wages at the rate fixed by the Government of HP in case of unskilled workers. No amount is deducted and the wages earned by the inmates are paid to them in full. The requirement of clothing articles and blankets for prisoners is met out of the items produced by the jail industries.

Forensic Lab Junga: Himachal Pradesh got full statehood on 25th January 1971 and since then the State has progressed by leaps and bounds. Efforts were on to have its own State Forensic Science Laboratory which came to fruition in 1988 so as to become self reliant in the application of science in the investigation of crime and the administration of justice besides keeping pace with the modernized criminals and to meet their challenges in the times ahead. Thus, State Forensic Science Laboratory, Himachal Pradesh was established in 1988 at Shimla with basic infrastructure of Biology, Serology, Chemistry and Toxicology Divisions. With the increasing requirement of investigation agencies, two more Divisions comprising four specialties vis. Documents, Photography, Physics and Ballistics were added by the State Government in 1997, which became functional in the subsequent years. The State FSL was shifted in December 2004 and at present functioning from Junga. In 2006, the HP Government created two more specialties in the State FSL vis. DNA Profiling Division and NDPS Division and two Regional Forensic Science Laboratories one each at Dharamshala and Mandi.

Junga is situated at a distance of 26 km from Shimla, 22 km from Kandaghat and 18 km from Chail. It is a hilly place having a forest cover of Kail, Deodar, Cheel, Oak and other trees. Temperature ranges between 4°C in winter to 35°C in summer months at Junga.

There are six scientific Divisions:

i.) Biology and Serology Division.

ii.) Chemistry and Toxicology Division.

iii.) Physics and Ballistics Division.

iv.) Documents and Photography Division.

v.) Narcotics Drugs and Psychotropic Substances Division

vi.) DNA Profiling Division

Biology and Serology; Chemistry and Toxicology Divisions are fully functional since 1990. In Physics and Ballistics Division, examination of some physics cases has started in 1999, however, for Ballistics work examination of cases started during the year -2002 and the division is fully functional. As regards Documents and Photography Division, the division is fully functional since October 2000. The analysis of narcotics drugs and psychotropic substances started in November 2006. Also in changing crime scenario measures are being taken to address new challenges of modernized crimes timely and objectively by adopting innovations of science and technology in the Forensic Sciences. On 26th October 2008, Lab started conducting DNA test, which is of immense help for police and crime investigation agencies.

To ensure the secular and uniform character of state police, on 14th June 2011, the department of police issued direction for banning the use of surname and caste name by all personnel of the police department even in common parlance. Video Conferencing in prisons launched: Himachal Pradesh became the first state in the country in 2013, to have the video-conferencing facility in all prisons which will not only come in handy for the prison department and the judiciary, but also enable the relatives and friends of inmates to interact with them. Not only Indians, but foreigners also could avail this facility from any part of the world. It would help save time and money spent on travelling to prisons.to meet the inmates.

Police Medals: The President's Police Medal is a decoration awarded to members of law enforcement in India. Established on 1st March 1951, the medal was originally called the President's Police and Fire Service Medal. The medal is awarded for either gallantry or distinguished service, with the gallantry version of the medal being accorded a higher precedence. The medal is awarded annually on Republic Day and Independence Day.

Awards and honours of the Commonwealth realms ceased to be awarded in India after the promulgation of the Constitution of India on 26 January 1950. Upon becoming a republic, it was necessary for India to establish its own honours system. For police, that meant replacing the King's Police and Fire Service Medal and the Indian Police Medal. The President's Police Medal was established 1 March 1951 by the President of India. Originally, the medal was called *the President's Police and Fire Service Medal.* At the same time a lower ranking decoration was established, the Police Medal. Eligible service for the medals was made retroactive to 26 January 1950.

The President's Police Medal for Gallantry is awarded for, *"gallantry in saving life and property, or in preventing crime or arresting criminals."* The medal may be awarded to any member of a police service in India, and is awarded without regard to rank or time in service. Recipients of the medal are granted a monthly stipend that is paid to them even in retirement, and upon the recipient's death it continues to be paid to their surviving spouse.

The President's Police Medal for Distinguished Service is awarded for long and distinguished service to individuals who have served at least 21 years in the police service or in the central police and security organizations. Individuals must be prior recipients of the Police Medal for Meritorious Service and must have held that medal for at least six years. In Himachal Pradesh a number of police men have received President's Police Medal and President's Police Medal Distinguished Service in the past years. The list of such brave policemen is given in the appendices.

12

Local Self Government
(Panchayats and Urban Local Bodies)

The philosophy of development that emerged in India after independence, emphasized the need for involvement of the members of national community in the web of relationship and institutional framework, to enable them to participate in the process of decision making, implementation and channelling the process of development. The operation of government and politics in the past century has opened new channels for mobility of the individual in society. Pt. Jawahar Lal Nehru describing the importance of local self-government in India's context said, *"Democracy is not merely parliament at the top or in the states but something that excites every person and something which trains everyone to take his proper place and indeed any place in the country, if need arises. I have said and I mean it, that all this Panchayati Raj, whatever things we are doing, are ultimately meant to train up every individual in India to be a potential prime-minister of India .* Local self-government should be looked upon as force mobilization of both political and socio-economic development.

The role and importance of Panchayati Raj grows much, since almost 80% of India's population lives in villages and it is this part of population which always draws attention of planners and policy makers for the development of Indian Society. Local self-government is a body representing the local inhabitants, possessing a large degree of autonomy. Local self-government in the modern sense is essentially a British creation. However, Panchayat in India basically is a very ancient institution, which lost its shape because of centuries of ruthless exploitation of village republics by foreign invaders.

Historical Legacy: Independent India inherited, a well-articulated system of central administration; but nothing much to name local self-government. Under British Raj, scattered and unintentional efforts were made towards devolution of powers. Some attempts, in this direction were, Lord Rippon's 1882 resolution to associate local people with District Boards, 1917 Democratic Declaration, 1919 Montague Chelmsford reforms, 1928 Nehru Report, 1931 Karachi session of Congress, which discussed the need of Fundamental Rights for natives; and formation of popular ministries in 1937. During the independence movement, the Panchayats of ancient times were eulogized as democratic *"Little Republics"*. Gandhiji was very particular about the

revival of these republics. To give representation to Gandhian ideology, **Article 40** in the *Directive Principles of State Policy,* instructed the states to take steps to organize village panchayats and endow them with certain powers necessary to function as units of self government.

Local-self government at higher levels, received little or insufficient attention barring the introduction of Janapadas in the central provinces and Berar (Madhya Pradesh) in 1948. Local participation in development was envisaged through the **'Community Development'** (CD) on 2nd Oct. 1952. But C.D. remained an utopian idea in the absence of any real efforts towards devolution. To support the ideology of C.D., **National Extension Scheme** (NES) was introduced on 2nd Oct., 1953, but neither of the two could generate required enthusiasm amongst villagers. The Planning Commission in the second five year plan, recommended review of these programmes. Then a study team under the Chairmanship of **'Balwant Rai Mehta'** was appointed in 1956.

It recommended the replacement of old district boards by of three tier system at the district, block and village level, with an organic link among them. ***"Democratic Decentralisation"*** was the thrust of B.R. Mehta Committee's recommendation. Panchayats and local self-government have been included in the 'state list'. The recommendation of B.R. Mehta Team came into effect on 1st April 1958. This was earlier approved by *'National Development Council'.* Panchayati Raj Institution was inaugurated by Pt. Jawahar Lal Nehru on 2nd Oct,. 1959 in Rajasthan and Andhra Pradesh followed it.

The whole edifice of Panchayati Raj was to be built on the foundation of the 'Gram Sabha', comprising all the adult members of the village, required to participate at least pour a year. Like many other states, Himachal was also provided with three tier system and Gram Sabha with statutory status. The functions allotted to the Gram Sabh a are: consideration of the annual statement of accounts, audit reports of the Gram Panchayat, administration report of the Gram Panchayat, work programme for the ensuing year, taxation proposals and any other specific development schemes.

At the moment, when other states of Indian Union were thinking in terms of introducing local self government at village level the people of Himachal were struggling for the restoration of popular government at the state level. From 1956 to 1963 Himachal had the status of Union Territory without popular support and participation. It was only in 1963, when popular assembly was restored within the status of Union Territory (Territorial Council).

But Panchayati Raj in Himachal Pradesh had existed since the regime of the first popular ministry in 1953. Some 600 Gram Panchayats and an equal number of Nayaya Panchayats were formed later on. After the integration of Punjab Hill areas, the number of Panchayats was raised to 1900. Gram Sabha in Himachal Pradesh hardly met to discuss any issue. The possible reason for this state of affairs are unsuitable timings, apathy of Sarpanch inadequacy of powers, lack of consciousness, poor literacy rate, caste distinction, domination

of male chauvinists and lack of proper publicity of Punchayat programmes. The situation is more or less the same in other states too. A genuine step towards the reintroduction of Panchayati Raj in Himchal Pradesh was taken in 1968, when hilly areas of Punjab were handed over to Himachal in 1966 and it became almost certain that increase in area and population plus administrative responsibility will help gain long cherished demand for *'statehood'.*

Himachal Pradesh Panchayati Raj Act, 1968: Panchayati Raj was given new deal in the shape of a unified Himachal Pradesh Panchayati Raj Act 1968, which came into force on 15th November 1970. Under this scheme, Gram Panchayats at the village level, Panchayat Samities at the block level and Zila Parishad at the district level were established. After the general election to Gram Panchayats in 1972-73, 2038 Gram Panchayat and an equal number of Nayaya Panchayats were set up. According to 1968 Panchayati Raj resolution, the entire Pradesh will have Gram Panchayats for one or more villages and Panchayat Samities at block Level as corporate bodies, but Zila Parishad will function as an advisory body because the work executed by Zila Parishad such as construction of roads and their maintenance. This work will now be done by government departments in consultation with Zila Parishad. This act also provides separate Nayaya Panchayat. Number of Nayaya Panchayats with coextensive territorial Jurisdiction of the concerned Gram Panchayats will be equal to Gram Panchayat.

A Nayaya Panchayat shall comprise five to seven Panchas including the Sarpanch and Naib Sarpanch and these Nayayas panchas will be elected by the members of Gram Panchayat from amongst themselves. Nayaya Panchayats, are independent units of the control of Gram Panchayats and vested with ample powers to deal with delinquents and impose adequate penalties. The Nayaya Panchayat have been fully replaced by Gram Panchayats now. In 1977 when Janta Government came into power at the centre, on its own commitment to decentralization, a 13 member committee headed by 'Ashok Mehta' was set up to study the decay of Panchayati Raj (PR) and to make suggestions for their improvement.

Following suggestions were made by Ashok Mehta Committee:

(a) Committee does not lay down any rigid pattern for the whole country and make efforts at built-in-flexibility.
(b) Placed the idea of *'Mandal Panchayats'* for a group of villages.
(c) Members of Zila Parishad should be directly elected for a term of four years.
(d) Committee recognizes the utility of Political parties in Panchayati Raj institutions and wants them to be allowed to participate in elections and
(e) Great responsibility (development) should be shouldered at the district and Mandal levels.

Since the recommendations of Ashok Mehta Committee report, Panchayats have been politicized. In most of the states including Himachal, Panchayat elections have become real test of the credibility and popularity of political parties. Politics of National and state level elections has started showing

its colour and crap on grass root levels too.

Panchayats (district wise) in Himachal Pradesh

(As on 31st January 2014 A.D.)

Source: Directorate of Panchayats Himachal Pradesh 2013-14

At present there are 12 Zila Parishad, 75 Block Samities, one for each block, 3243 village Panchayats for 17,882 inhabited villages of the Pradesh. Under various five year plans lakhs of Rupees have been approved for various Panchayat Programmes. Following schemes have been undertaken under this head:

1. **Loans for creation of Remunerative Assets,** such as raising of orchards, construction of stalls, shops and residential quarters etc. so that Panchayats could yield perennial income from these assets.

2. **Matching Incentives Grant to Panchayati Raj bodies** for stepping up of their tax efforts. This scheme was introduced during *'Fourth Five Year Plan'* on the basis of the recommendations of the working group on community development and Panchayati Raj government, according to which, an amount equal to the collection of house tax by a Panchayat is given as *'grant in aid'*.

3. **Construction of Panchayat Ghars**— Under this scheme it is planned to construct Panchayat Ghars, to accommodate local bodies at proper place to work in a smooth and constructive way and also utilize these facilities for publicity of various schemes and programmes.

4. **Assistance to panchayat Library.**

5. **Panchayat Prize Competition Schemes**— In order to create working atmosphere and competitive culture, this schemes has been introduced. Cash prizes are awarded by the government to Panchayats, which on the basis of

their performance are adjudged first, second and third in the manner given below:

(i) District level Panchayat competition, one cash prize of Rs. 10,000/- to one Panchayat adjudged the best Panchayat in the district every year for 12 districts.

(ii) State level Panchayat competition I, II, III, prizes are awarded.

6. Construction of Building of 'Panchayati Raj Training Institute Mashobra and Baijnath', to impart training with regard to proper application of the provision of *'Himachal Pradesh Panchayati Raj Act'* and rules made there under the functionaries of the Panchayati Raj bodies, their employees and the department staff directly connected with the supervision of the Panchayats.

7. Construction of well-furnished Samiti and Zila Parishad Bhawan.

8. Grant to Panchayats for the discharge of Municipal functions:

There are some Panchayats in which some areas have almost taken the shape of small towns and in such a town, amenities like 'street lights', 'public water tap', toilets and other sanitation facilities have become essential. To cater the financial need of such Panchayats grant system has been introduced.

Panchayati Raj in Practice: With the enactment of 'Panchayati Raj Act 1968', constitutional obligation was completed by government, to set up local self government at village level. It was conceived of as an Institution for development, with decentralized administration and voluntary popular participation. Himachal Pradesh where ninety per cent of the population is directly dependent on villages, was thought to be a real playground for grass root democracy. Panchayats here were considered as a means to bring social and economic changes, in hitherto neglected and backward masses of the area.

But past experience shows, that these lofty declarations such as decentralization, devaluation of power, power to the people, Gram Rajya, setting up of Cooperative Movement and Social Justice have remained a far cry, because of the following reasons:

- Domination of Panchayats by rural elites and richest groups.
- Panchayat bodies have become an arena for the play of power politics.
- Various tricky methods, such as bribery of both officials and voters, pressure, terror, caste loyalties and false promises are used blatantly to capture the local bodies.
- Member of Panchayat bodies are bribed at the time of election by the Political Parties to declare their loyalties in favour of such Political Party as influence the electorates political behaviour.
- Panchayats perform their simple duties most inadequately.
- The growth in the production of wheat and fruit cannot be attributed to Panchayati Raj, but to various individual or joint efforts out of the purview of

Panchayats. Himachal is one amongst the few states of Indian Union to implement the recommendations of Ashok Mehta Committee 1977 on Panchayati Raj. Due to the creation of Panchayati Raj Minister portfolio in the state council of minister, it is expected that, panchayats in Himachal Pradesh will play constructive and goal-oriented role towards bringing changes in the social, economic and political structure of an otherwise backward society. From 1968 to 1994, a good number of amendments have been made in the Panchayati Raj Act. The latest is Himachal Pradesh Panchayati Raj Act 1994. In 2006 Panchayat election, for the first time state election commission fixed different colour for different category of posts, such as white ballot paper for ward member, pink for panchayat pradhan, green for BDC member and yellow for zila parishad. Earlier it was green for ward member, brown for panchayat pradhan, pink for BDC and white for zila parishad.

Himachal Pradesh Panchayati Raj Act, 1994: In 1994 Himachal Pradesh Government Amended the panchayati raj act and defined various parts of the panchayati raj institution.

GRAM SABHA

The Government may, by notification, declare any village or group of contiguous villages with a population of *not less than one thousand and not more than five thousand* to constitute one or more Sabha areas for the purposes of this act and also specify its headquarter:

Provided that in a Scheduled area the Government may by order declare any village or group of contiguous villages with a population of less than one thousand to constitute a Sabha area:

Provided further that the Government may, after having due regard of the geographical location, lack of means of transport and communication and administrative convenience, declare an area comprising a village or group of contiguous villages having a population either less than one thousand or more than five thousand to constitute a Sabha area.

The Government may, at the request of the Gram Sabha concerned or otherwise, and after previous publication of a proposal by a notification, at any time

(a) increase any Sabha area by including within such Sabha area any village or group of villages; or

(b) diminish any Sabha area by excluding from such Sabha area any village or group of villages; or

(c) alter the headquarters of any Sabha area; or

(d) alter the name of any Sabha area; or

(e) declare that any area shall cease to be a Sabha area:

When on account of the reason that the Sabha area is, during the term of the Gram Panchayat, increased or diminished or ceased under sub-section (2), the increase or diminution or cessation of the Sabha area shall not affect the term of the office bearers of Gram Panchayat, till the expiration of the

duration of the Gram Panchayat specified in sub-section (1) of section 120 or its dissolution under section 140 of this Act.

(3) If the whole of the Sabha area is included in a municipality, the Sabha area shall cease to exist and its assets and liabilities shall in the manner prescribed be disposed of.

Every Sabha shall hold four general meetings in each year and every meeting shall held on the first Sunday of January, April, July and on second October. It shall be the responsibility of the Pradhan to convene such meetings

Functions of Gram Sabha-*the Gram Sabha shall perform the following functions, namely:-*

(a) mobilise voluntary labour and contribution in kind and cash for the Community Welfare Programmes;

(b) identification of beneficiaries for the implementation of developmental schemes pertaining to the village;

(c) rendering assistance in the implementation of developmental schemes pertaining to the village;

(d) approve plans, programmes and budget, prepared by the Gram Panchayat, for economic development and social justice;

(e) authorise, after being satisfied, issuance of utilization certificate of funds spent on the implementation of the plans, projects and programmes of the Gram Panchayat;

(f) promotion of unity and harmony among all sections of society in the Sabha area;

(g) seek clarifications from the Pradhan, Up-Pradhan and members of the Gram Panchayat about any particular activity, scheme, income and expenditure; and

(h) such other maters as may be prescribed.

The Gram Sabha shall consider the following matters, and make recommendations and suggestions to the Gram Panchayat, namely:-

(a) the annual statement of accounts of the Gram Panchayat, the report of the administration of the preceding financial year and the last audit note and replies, if any, made thereto;

(b) the report in respect of development programmes of the Gram Panchayat relating to the preceding year and development programmes proposed to be undertaken during the current year;

(c) the promotion of unity and harmony among all sections of society in the village;

(d) the programme of adult education within the village;

(e) any other matter which the Panchayat Samiti, Zila Parishad, the Deputy Commissioner or any other officer authorised in this behalf may require to be placed before the Gram Sabha; and

(f) such other matters as may be prescribed.

The Gram Panchayat shall give due consideration to the recommendations and suggestions of the Gram Sabha.

The Gram Sabha may also form one or more vigilance committee(s) consisting of not less than five persons, who are not members of the Gram Panchayat, to supervise the Gram Panchayat works, schemes and other activities and to put up reports concerning them in its meeting and shall also send a copy of the said report to such an authority as may be prescribed for this purpose:

The village level functionaries of the Agriculture, Animal Husbandry, Primary Education, Forest, Health and Family Welfare, Horticulture, Irrigation and Public health, Revenue and Welfare Departments shall attend the meetings of the Gram Sabha in whose jurisdiction they are posted, and if such village level functionaries fail to attend the meetings, the Gram Sabha shall report the matter to their controlling officer through the Gram Panchayat, who shall take disciplinary action against such functionaries within one month from the date of receipt of the report and shall intimate the action taken on such report to the Gram Sabha through the Gram Panchayat.

GRAM PANCHAYATS

There shall be a Gram Panchayat for a Gram Sabha and every Gram Sabha shall, in the prescribed manner, elect from amongst its members [Pradhan and Up-Pradhan] of the Sabha who shall also be called the Pradhan and Up-Pradhan of the Gram Panchayat and shall also elect from amongst its members an Executive Committee called the Gram Panchayat consisting of such number of persons *not being less than seven and more than fifteen*, including Pradhan and Up-Pradhan, as the Government may by notification determine:

Provided that the number of members excluding Pradhan and Up-Pradhan]to be assigned to each Gram Sabha, shall be determined on the following scale:-

(a) with a population not exceeding 1750 .. five
(b) with a population exceeding 1750 but not exceeding 2750 .. seven
(c) with a population exceeding 2750 but not exceeding 3750 .. nine
(d) with a population exceeding 3750 but not exceeding 4750 .. eleven
(e) with a population exceeding 4750 ..thirteen

Provided further that the number of members of a Gram Panchayat, excluding Pradhan and Up-Pradhan, shall be determined in such a manner that the ratio between the population of the Gram Sabha and the number of seats of members in such a Panchayat to be filled by election shall, so far as practicable, be the same throughout the Sabha area:

Provided further that the member of the Panchayat Samiti, representing a part or whole of the Gram Sabha area shall also be the member of the concerned Gram Panchayat(s) and shall have the right to vote.

(2) Seats shall be reserved in a Gram Panchayat—

(a) for the Scheduled Castes, and

(b) for the Scheduled Tribes,

and the number of seats so reserved shall bear, as nearly as may be, same proportion to the total number of seats in the Gram Panchayat as the population of the Scheduled Castes or the Scheduled Tribes in the Sabha area bears to the total population of the Sabha area:

Provided that in case no reservation of seats is possible as aforesaid due to small population of the Scheduled Castes and the population of Scheduled Castes of the Sabha area is atleast five percent of the total population of the Sabha area, one seat shall be reserved for the Scheduled Castes in such a Gram Panchayat:

Provided further that where there is no eligible candidate belonging to the Scheduled Castes to be elected as a member of the Gram Panchayat, no seat shall be reserved for Scheduled Castes:

Provided further that in non-tribal areas where there is Scheduled Tribes population in a Gram Sabha, seats shall be reserved for such members of the Scheduled Tribes within the reservation provided for the members of the Scheduled Castes and the determination of seats to be reserved amongst the Scheduled Castes and Scheduled Tribes shall be in proportion to their population in that Gram Sabha.

The State Government may, by general or special order, reserve such number of seats for persons belonging to Backward Classes in a Gram Panchayat, not exceeding the proportion to the total number of seats to be filled by direct election in the Gram Panchayat as the population of the persons belonging to Backward Classes in that Gram Sabha area bears to the total population of that area and may further reserve one-half of the total seats reserved under this sub-section for women belonging to Backward Classes.

The meeting of the Gram Panchayat: The meeting of the Gram Panchayat shall be public and shall be held at least once a month at the office of the Gram Panchayat and at such time as the Pradhan may fix:

Provided that the Pradhan, when required in writing by a majority of the members to call a meeting, shall do so within three days, failing which the said members shall, with the previous approval of the prescribed authority, be entitled to call a meeting after giving a notice of one week to the Pradhan and the other members.

(2) Subject to the provisions of this Act and the rules framed thereunder *one-half of the office bearers* of the Gram Panchayat shall form a quorum.

(3) The decisions of the Gram Panchayat shall be by majority and when the voting is equal, the Pradhan, in his absence, the Up-Pradhan, shall have an additional or casting vote.

Functions of Gram Panchayat - The Gram Panchayat shall perform

the functions specified in Schedule-I.

Notwithstanding anything contained in this Act the State Government may, by general or special order, entrust to the Gram Panchayat preparation of plans and implementation of schemes for economic development and social justice 3[including those matters specified in Schedule-II and the Gram Panchayat shall perform such functions.]

The State Government may, by general or special order, add to any of the functions of the Gram Panchayat or withdraw the functions and duties entrusted to such a Gram Panchayat, when the State Government under takes the execution of any of the functions entrusted to the Gram Panchayat, the Gram Panchayat shall not be responsible for such functions so long as the State Government does not re-entrust such functions to the Gram panchayat.

The Government may, by notification and subject to such conditions as may be specified therein -

(a) transfer to any Gram Panchayat the management and maintenance of a forest situated in the Gram Sabha area ;

(b) make over the Gram Panchayat the management of waste lands, pasture lands or vacant lands belonging to the Government situated within the Gram Sabha area ;

(c) transfer to the Gram Panchayat the protection of any irrigation work and its execution and the regulation/distribution of water from any such work ;

(d) transfer to the Gram Panchayat any public property situated within the jurisdiction of the Gram Sabha ;

(e) entrust the gram Panchayat with the collection of land revenue on behalf of the Government and the maintenance of such records as are connected therewith; and

(f) entrust such other functions as may be prescribed:

Provided that when any transfer of the management and maintenance of a forest is made under clause (a) or the transfer of any irrigation work is made under clause (c), the Government shall direct that any amount required for such management and maintenance or an adequate portion of the income from such forest or irrigation work be placed at the disposal of the Gram Panchayat.

A Gram Panchayat shall have powers to do all acts necessary for or incidental to the carrying out of the functions entrusted, assigned or delegated to it and, in particular, and without prejudice to the foregoing powers, to exercise all powers specified under this Act.

Penalty for disobedience of a special or general order of the Panchayat.- Any person who disobeys an order of the Gram Panchayat made under sections 12 and 13 shall be liable to a penalty which shall be imposed by the Gram Panchayat and may extend one thousand rupees; and if the breach is a continuing breach, with further penalty which may extend to

ten rupees for every day after the first during which the breach continues:

Provided that recurring penalty shall not exceed the sum of five thousand rupees. The penalty, if not paid shall be recovered as arrears of land revenue.

Power to contract for the collection of taxes and other dues.- A Gram Panchayat may, notwithstanding any law to the contrary, in respect of any area within its jurisdiction, enter into contract with the Government or a local body to collect land revenue or any tax or dues payable to the Government or a local body on being allowed such collection charges as may be prescribed. A Gram Panchayat may also within its jurisdiction, enter into a contract with all or any of the land owners to collect rent on his or their behalf on being allowed by the landowner such collection charges as may be prescribed.

Power to manage fairs and markets.- The Gram Panchayat may start, manage and regulate fairs and markets within the Sabha area in the prescribed manner.

JUDICIAL FUNCTIONS AND POWERS OF GRAM PANCHACYAT

Bar for Panches to take part in certain cases.- (1) No Panch shall take part in any case, suit or proceedings to which he or she or his or her near relation, employed or employee, or partner in business is a party or in which any of them is personally interested.

(2) If by reason of the number of Panches disqualified under sub-section (1) there remains no quorum the Gram Panchayat shall send the case or the suit to the Judicial Magistrate or the Sub-Judge or the Collector having jurisdiction, as the case may be, for disposal in accordance with law.

Territorial jurisdiction.- (1) Notwithstanding anything contained in the Criminal Procedure Code, 1973(2 of 1974), every case instituted under this Act shall be instituted before the Pradhan, or in his absence before Up-Pradhan, of the Gram Panchayat of the Sabha area in which the offence was committed.

(2) Notwithstanding anything contained in the Civil Procedure Code, 1908(5 of 1908) , or in the Himachal Pradesh Tenancy and Land Reforms Act, 1972 (8 of 1974), every suit instituted under this Act shall be instituted before the Pradhan, or in his absence before Up-Pradhan, of the Gram Panchayat of the Gram Sabha area in which the defendant, or any of the defendants, where they are more than one, ordinarily resides or carries on business at the time of the institution of the suit irrespective of the place where the cause of action arose.

(3) Notwithstanding anything contained in the Himachal Pradesh Land Revenue Act, 1954 (6 of 1954), every proceeding specified under section 48 shall be transferred by the revenue court concerned to the Gram Panchayat within the local area in which the land concerned is situated and the Gram

Panchayat shall decide such proceedings in the manner prescribed:

Provided that where land is included in the local area of more than one Gram Panchayats, the revenue court concerned shall transfer the proceedings to the Gram Panchayat within the area of which the greater part of the land is situated.

Offences Cognizable by Gram Panchayat.- (1) Offences mentioned in Schedule-III or declared by the State Government to be cognizable by a Gram Panchayat, if committed within the jurisdiction of a Gram Panchayat, and abetment of and attempts to commit such offences shall be cognizable by such Gram Panchayat.

(2) Application for maintenance under section 125 of the Code of Criminal Procedure, 1973 (2 of 1974), shall be heard and decided by the Gram Panchayat. A Gram Panchayat may grant a maintenance allowance not exceeding five hundred rupees per month on such application without prejudice to any other law for the time being in force in this behalf.

Penalties.- A Gram Panchayat may impose a fine not exceeding one hundred rupees but shall not inflict a sentence of imprisonment either substantive or in default of payment of fine.

No cognizance by Courts.- No Court shall take cognizance of any case suit or proceeding which is cognizable under this Act by a Gram Panchayat established for the area to which the case, suit or proceeding relates, unless an order has been passed under section 67.

Transfer of criminal proceedings to the Gram Panchayat in certain cases.- If, at any stage of the proceedings in a criminal case pending before a Magistrate, it appears that the case is triable by a Gram Panchayat, he shall at once transfer the case to that Gram Panchayat which shall try the case de-novo.

Certain persons not to be tried by the Gram Panchayat.- No Gram Panchayat shall take cognizance of any offence where the accused—

(a) has been previously convicted of an offence punishable with imprisonment of either description for a term of three years or more; or

(b) has been previously fined under section 379 of the Indian Penal Code (45 of 1860) by any Gram Panchayat or has been previously convicted and sentenced under the said section by a Court; or

(c) has been bound over to be of good behaviour under section 109 or 110 of the Code of Criminal Procedure, 1973(2 of 1974); or

(d) has been previously convicted of gambling; or

(e) is Government servant and act complained of is the one done in his official capacity.

Application for transfer of cases from one Gram Panchayat to another Gram Panchayat.- (1) Notwithstanding anything to the contrary contained in this chapter, if in any criminal case or civil suit or revenue proceeding before a Gram Panchayat any party intimates, at any stage before

the pronouncement of the final order or decree, that it intends to put up an application under this section to the Judicial Magistrate or the Sub-Judge or the Collector, as the case may be, for transfer of the case, suit or proceeding, the Gram Panchayat shall direct the applicant to make such application within a reasonable time to be fixed by the Gram Panchayat, which shall not be less than fifteen days and adjourn the case, suit or proceeding for such period as will afford sufficient time for the application to be put up and an order to be obtained thereon:

Provided that nothing herein contained shall require the gram Panchayat to adjourn the case, suit or proceeding upon a second or subsequent intimation form the same party.

(2) The Judicial Magistrate or the Sub-Judge or the Collector, as the case may be, may upon such application, for reasons to be recorded in writing, transfer the case, suit or proceeding to another Gram Panchayat within his jurisdiction which shall try or hear the case, suit or proceeding, as the case may be.

Protection to Gram Panchayats.- The provisions of the Judicial Officers Protection Act, 1850 (18 of 1850) shall apply to the members of the Gram Panchayat, in respect of the acts done by it or them in judicial capacity.

Duty of police towards Gram Panchayats.- Every police officer shall give immediate information in the prescribed manner to the Gram Panchayat of an offence coming to his knowledge which has been committed within the jurisdiction of the Gram Panchayat and is triable by the Gram Panchayat and shall assist all Panches and servants of the Gram Panchayat in the exercise of their lawful authority.

PANCHAYAT SAMITI

For each Block there shall be a Panchayat Samiti, having jurisdiction, over the entire block excluding such portions of the block as are included in a Municipality constituted under any law for the time being in force.

Every Panchayat Samiti shall consist of-

(a) the directly elected members from territorial constituencies as determined under the Act;

(b) the Members of the House of the people and the Members of the Legislative Assembly of the State representing constituencies which comprise wholly or partly the Panchayat Samiti area;

(c) the Members of the Council of States, where they are registered as electors within the Panchayat Samiti area;

(d) one-fifth of the Pradhans of Gram Panchayats in the Panchayat Samiti area, by rotation, for such period as the prescribed authority may determine, by lot:

Provided that a Pradhan who was a member under this clause for one term shall not be eligible to become member for a second term during the remainder of his term of office as Pradhan;

(e) the member of the Zila Parishad, representing the ward which comprises wholly or partly the Panchayat Samiti area.

The Pradhans of Gram Panchayat and other members of the Panchayat Samiti whether or not chosen by direct election from territorial constituencies in the Panchayat Samiti shall have the right to vote in the meetings of the Panchayat Samiti except in the election and removal of the Chairman or Vice-Chairman only the elected members shall have the right to vote.

The number of elected members of a Panchayat Samiti under clause (a) of sub-section (1) shall consist of persons elected from the territorial constituencies in the Samiti area as may be notified from time to time by the Government at the rate of one member for every three thousand five hundred population or part thereof:

Provided that in a Panchayat Samiti area having a population of not exceeding fifty two thousand five hundred there shall be minimum of 15 elected members:

Provided further that where the population of a Panchayat Samiti area is more than one lakh and forty thousand, it shall be divided into territorial constituencies in such manner that the total number of constituencies shall not exceed forty and the population of each constituency shall, as far as practicable, be the same in each constituency:

Provided further that the Government may, irrespective of the population of the Panchayat Samiti area, declare, by a notification, that the provisions of this section shall apply to a Panchayat Samiti in a scheduled area, subject to such exceptions and changes as may be specified by it in such a notification.

Seats shall be reserved in a Panchayat Samiti for the:-

(a) Scheduled Castes; and (b) the Scheduled Tribes;

and the number of seats so reserved shall bear, as nearly as may be, the same proportion to the total number of seats to be filled by direct election in that Panchayat Samiti as the population of the Scheduled Castes in that Panchayat Samiti area or of the Scheduled Tribes in that Panchayat Samiti area bears to the total population of that area and such seats may be allotted by rotation to different constituencies in a Panchayat Samiti in such manner, as may be prescribed.

One-half of the total number of seats reserved under sub-section (4) shall be reserved for women belonging to the Scheduled Castes or, as the case may be, the Scheduled Tribes.

One-half (including the number of seats reserved for women belonging to the Scheduled Castes and the Scheduled Tribes) of the total number of seats to be filled by direct election in every Panchayat Samiti shall be reserved for women.

The State Government may, by general or special order, reserve such number of seats for persons belonging to Backward Classes in a Panchayat Samiti, not exceeding the proportion to the total number of seats to be filled by direct

election in the Panchayat Samiti as the population of the persons belonging to Backward Classes in that Panchayat Samiti area bears to the total population of that area and may further reserve one-half of the total seats reserved under this sub-section for women belonging to Backward Classes.

The seats reserved under sub-sections shall be allotted by rotation to different constituencies in the Samiti area in such manner as may be prescribed.

Election of Chairman and Vice-Chairman of Panchayat Samiti.- After the declaration of result of election of the elected members of the Panchayat Samiti in the prescribed manner, the Deputy Commissioner concerned or any Gazetted Officer appointed by him in this behalf shall as soon as possible but not later than one week of such declaration call under his Presidentship a meeting of all elected members for the purpose of oath, or the affirmation of allegiance under section 127.

Immediately after oath or affirmation of allegiance under section 127 is administered or made, the elected members of a Panchayat Samiti shall, in the prescribed manner, elect one of its members to be the Chairman and another member to be the Vice-Chairman of the Panchayat Samiti:

Provided that if the office of the Chairman or Vice-Chairman, as the case may be, is vacated or falls vacant during the tenure on account of death, resignation or no-confidence motion, a fresh election within a period of two months from the date of occurrence of vacancy shall be held from the same category, in the prescribed manner.

Meetings.- A meeting of a Panchayat Samiti shall be either ordinary or special and, except as otherwise provided under this Act, the meetings of the Panchayat Samiti shall be convened by the Chairman and in his absence by the Vice-Chairman.

A Panchayat Samiti shall ordinarily meet at its headquarters atleast four times in each year for the transaction of its business and not more than three months shall be allowed to elapse between any two successive meetings.

Notice of every meeting specifying the time and date thereof and the business to be transacted there at shall be sent to every member of the Panchayat Samiti and exhibited at the office of the Panchayat Samiti not less than ten clear days before an ordinary meeting and seven clear day before special meeting:

Functions of the Panchayat Samiti.- Subject to the provisions of this Act and the rules made thereunder, and subject to general or special orders, as may be issued by the State Government, from time to time, it shall be the duty of a Panchayat Samiti so far as the Panchayat Samiti funds allow to make reasonable provision in the Samiti area for the following matters:-

(a) Integrated Rural Development, Agriculture, Social Forestry, Animal Husbandry and Fisheries, Health and Sanitation, Adult Education, Communication and Public Works, Co-operation, Cottage Industries, Welfare of Women, Youth and Children, Welfare of disabled and the destitutes and wel-

programmes;

(b) provision of emergency relief in cases of distress caused by fires, floods, drought, earthquake, scarcity, locust, swarms, epidemics and other natural calamities;

(c) arrangement in connection with local pilgrimage and festivals;

(d) management of public ferries;

(e) management of public markets, public melas and exhibitions; and

(f) any other function with the approval of the State Government or Zila Parishad.

Entrustment of certain functions of State Government to a Panchayat Samiti.- The State Government may entrust, to a Panchayat Samiti functions in relation to any matter to which the executive authority of the State Government extends or in respect of functions which, have been entrusted to the State Government by the Central Government and the Panchayat Samiti shall be bound to perform such functions. It shall have necessary powers to perform such functions.

Where functions are entrusted to a Panchayat Samiti under sub-section (1), the Panchayat Samiti shall in the discharge of those functions, act as an agent of the State Government.

There shall be paid by the State Government to the Panchayat Samiti such sum as may be deemed necessary for discharging the functions entrusted to it under this section.

The Panchayat Samiti shall, for the purposes of discharging the functions entrusted to it under this section, be under the general control of the State Government or any other authority appointed by it and shall comply with such directions as may from time to time, be given to it.

ZILA PARISHAD

For each district there shall be a Zila Parishad, having jurisdiction, over the entire district excluding, such portions of the district as are included in a Municipality constituted under any law for the time being in force.

Constitution of Zila Parishad.- Every Zila Parishad shall consist of-

(a) the directly elected members from territorial constituencies in the district as determined under this Act;

(b) the Members of the House of People and the Members of the State Legislative Assembly representing a part or whole of the district whose constituencies lie within the district;

(c) the members of the Council of States, where they are registered as electors within the district; and

(d) the Chairmen of all Panchayat Samitis in the district:

Provided that when the total number of members under clauses (b), (c) and (d) exceed the total number of members under clause (a), only one-fifth of the members under clause (d) shall be selected by rotation for such period

as the prescribed authority may determine, by lot. Subject to the condition that a Chairman who was a member under this clause for one term shall not be eligible to become member for a second term during the remainder of his term of office as the Chairman of Panchayat Samiti.

The number of elected members of a Zila Parishad under clause (a) of sub-section (1) shall consist of persons elected from the territorial constituencies in the district as may be notified from time to time by the Government at the rate of one member for every 2[twenty five thousand] population or part thereof :

Provided that in a district having population of not exceeding 3[two lakhs and fifty thousand], there shall be minimum of ten elected members in a Zila Parishad:

Provided further that the Government may irrespective of the population of the district, declare, by a notification, that the provisions of this section shall apply to a Zila Parishad in a scheduled area, subject to such exceptions and modifications as may be specified by it in such a notification.

All members of Zila Parishad, whether or not elected by direct election from territorial constituencies in the district shall have the right to vote in the meeting of the Zila Parishad except in the election or removal of the Chairman and Vice-Chairman only the elected members shall have the right to vote.

Seats shall be reserved in the Zila Parishad-

(a) for the Scheduled Castes; and (b) for the Scheduled Tribes;

and number of seats so reserved shall bear, as nearly may be, the same proportion to the total number of seats to be filled by direct election in the Zila Parishad as the population of the Scheduled Castes in the district or of the Scheduled Tribes in the district bears to the total population of the district.

One-half of the total number of seats reserved under sub-section (4) shall be reserved for women belonging to the Scheduled Castes or, as the case may be, the Scheduled Tribes.

One-half (including the number of seats reserved for women belonging to the Scheduled Castes and the Scheduled Tribes) of the total number of seats to be filled by direct election in every Zila Parishad shall be reserved for women.

The State Government may, by general or special order, reserve such number of seats for persons belonging to Backward Classes in a Zila Parishad, not exceeding the proportion to the total number of seats to be filled by direct election in the Zila Parishad as the population of the persons belonging to Backward Classes in that district bears to the total population of that district and may further reserve one-half of the total seats reserved under this sub-section for women belonging to Backward Classes.

The seats reserved under sub-sections (4), 5[(5), (5-A)] and (6) shall be allotted by rotation to different constituencies in the district in such manner as may be prescribed.

Election of the Chairman and Vice-Chairman.- After the declaration of the results, the Deputy Commissioner shall, as soon as possible but not later than one week of such declaration, call under his presidentship a meeting of elected members of the Zila Parishad for the purposes of oath or affirmation or allegiance under section 127.

Immediately after oath or affirmation of allegiance under section 127 is administered or made, the elected members of a Zila Parishad shall, in the prescribed manner, elect from amongst themselves one of its members to be the Chairman and another to be the Vice-Chairman of the Zila Parishad:

Meetings of Zila Parishad.- A meeting of a Zila Parishad shall be either ordinary or special and except as otherwise provided under this Act, the meetings of the Zila Parishad shall be convened by the Chairman and, in his absence by the Vice-Chairman.

A Zila Parishad shall ordinarily meet at its headquarters at least *four times in each year* for the transaction of its business and not more than three months shall be allowed to elapse between any two successive meetings.

Notice of every meeting specifying the time and date thereof and the business to be transacted thereat shall be sent to every member of the Zila Parishad and exhibited at the office of the Zila Parishad not less that ten clear days before an ordinary meeting and seven clear days before a special meeting:

Provided that wherever it is considered expedient to do so in the public interest the requirement of the time limits specified in this sub-section may be relaxed with the approval of the prescribed authority.

The Chairman, or, in his absence, the Vice-Chairman may whenever he thinks fit, and shall, on requisition made in writing by not less than one-third of the total members of the Zila Parishad, or if required by the Government or the Director, convene a special meeting within two weeks of the receipt of the written requisition.

Any meeting of a Zila Parishad may, with the consent of the majority of the members present, be adjourned to any other date; but no business other than that left over at the adjourned meeting shall be transacted at the next following meeting:

Functions of the Zila Parishad.- Subject to the provisions of this Act and rules made thereunder, it shall be duty of the Zila Parishad to-

(i) control, co-ordinate and guide, the Panchayat Samiti and Gram Panchayat within the district;

(ii) co-ordinate and consolidate the Panchayat Samiti plans;

(iii) co-ordinate the demands for grants for special purpose received from the Panchayat Samiti and forward them to the State Government;

(iv) secure the execution of the plans, projects schemes, or other works common to two or more Panchayat Samitis in the district;

(v) advise the State Government in the developmental activities, social

forestry, family welfare, welfare of the disabled, destitutes, women, youth and children and sports;

(vi) exercise and perform such other powers and functions as the State Government may, confer on or entrust to it;

(vii) distribute grants received from the Government for development works and to monitor the implementation of such works.

The Zila Parishad of two or more adjacent districts may jointly undertake and execute any development schemes on such terms and conditions as may be mutually agreed upon.

Entrustment of certain functions of State Government to a Zila Parishad.- The State Government may entrust, to a Zila Parishad functions in relation to any matter to which the executive authority of the State Government extends or in respect of functions which have been entrusted to the State Government by the Central Government and the Zila Parishad shall be bound to perform such functions. It shall have necessary powers to perform such functions.

Where functions are entrusted to a Zila Parishad under sub-section (1), the Zila Parishad shall in the discharge of those functions, act as an agent of the State Government.

There shall be paid by the State Government to the Zila Parishad such sum as may be deemed necessary for discharging the functions entrusted to it under this section.

The Zila Parishad shall, for the purposes of discharging the functions entrusted to it under this section, be under the general control of the state Government and shall comply with such directions as may from time to time, be given to it.

Elections and establishment of three tier PR System: As per the requirements of the provisions of the Constitution and the State Panchayati Raj Act, 1994, the three tier Panchayati Raj system was established in the State during the year 1995-96.

First general elections of PR bodies of this State, except in Development Block Lahaul and Development Block Pangi, were held during December, 1995 and the Panchayats started functioning w.e.f. 23rd January, 1996 and the 5 years term expired on 22nd January, 2001. In Development Block Lahaul and Development Block Pangi the first general elections were held during May, 1996.

Second general elections of PR bodies of this State, except in Development Block Lahaul and Development Block Pangi, were held during December, 2000 and the Panchayats started functioning w.e.f. 23rd January, 2001 and the 5 years term expired on 22nd January, 2006. In Development Block Lahaul and Development Block Pangi the second general elections were held during May, 2001.

Third general elections barring 48 Gram Panchayats i.e. 28 Gram

Panchayats of Sub-Divisions Lahaul of District Lahaul-Spiti and 16 Gram Panchayats of Sub-Division Pangi of District Chamba and 4 Gram Panchayats of District Kullu, two Panchayat Samitis namely Lahaul and Pangi and Zila Parishad Lahaul Spiti were held during December, 2005 and the elected office bearers started functioning w.e.f. 23rd January, 2006. The elections of remaining 48 Gram Panchayats, 2 Panchayat Samiti and 1 Zila Parishad were also held during June, 2006.

Fourth general elections barring 48 Gram Panchayats i.e. 28 Gram Panchayats of Sub-Divisions Lahaul of District Lahaul-Spiti and 16 Gram Panchayats of Sub-Division Pangi of District Chamba and 4 Gram Panchayats of District Kullu, two Panchayat Samitis namely Lahaul and Pangi and Zila Parishad Lahaul Spiti were held on 28th and 30th December, 2010 and 1st January, 2011. The elected office bearers started functioning w.e.f. 23rd January, 2011. The elections of remaining 44 Gram Panchayats, 2 Panchayat Samiti and 1 Zila Parishad held during June, 2011, whereas elections of remaining 4 Gram Panchayats of Kullu District were held during February, 2012.

Cantonment Area: Himachal Pradesh has 7 cantt. areas, governed as per the Cantt. Board Area Act 2006, which replaced earlier Act of 1924, passed during British period. The oldest cantonment is Subathu, which came into existence in 1815. The other six are Jatog (1843), Kasauli (1850), Dalhousie (1857), Dagshai (1867), Yol (1941) and Dharamshala cantt. (1942).

Municipal Bodies: At the town level there are local bodies known as Municipal Committees and Corporation to look after the needs of the people of towns. Municipal Committees are provided with such functions as, supply of pure and wholesome water, maintenance of public hospitals, setting up of primary schools, cleaning public streets, places and sewers, maintenance of public streets, regulation of offensive and dangerous trade; naming streets and numbering houses and many other functions given to it from time to time.

In Himachal Pradesh, there are 21 Municipal Committee 29 Notified Area committee and one Municipal Corporation. Political executive of municipality is known as *Municipal Chairman* and official executive *Municipal Commissioner,* who is appointed by the state government. The members of municipal committee are elected on the basis of adult suffrage. These committee are governed by the Municipal Acts of the state. Total number of members varies from committee to committee. Reservation of seats are provided for Scheduled Castes and Tribes.

Shimla Municipal Corporation: The capital town (Shimla) of Himachal, has Municipal Corporation. The Corporation comprises of member called COUNCILLORS . These Councillors are elected on adult suffrage. SCs and STs have seat reservations. The History of Shimla Municipal Corporation goes back to 1851, when under Act 26 of 1850, the first municipal government was formed here. The first election to Municipal government were held in 1855, before this its members were nominated by the British government.

Shimla Municipality was first in the then Punjab province and one of the oldest in the country. On 31st July 1871 Shimla municipality was designated category -1 status. Since then a number of provisions were amended in its constitution. In Shimla municipality, the Punjab state municipality act remained in force from 1911 to 1966, when it was transferred to Himachal Pradesh along with other hilly areas. In 1968, Himachal Pradesh municipality act was enacted, which had the provision of president and Vice president elected by members amongst themselves. The tenure was fixed three years. Municipality had right to appoint its own medical officers, Engineer etc. to help in its functioning. Since 1968 to 2012, a sea changes have taken place in the municipality act and its functioning. The term of corporation in Shimla is five years.

The political executive is known Mayor, who is annually elected from among the members of the Corporation. Official Executive is Municipal Commissioner, who is appointed by state government. Owing to abolition of Octroi from April 1982, the government has been giving grants-in-aid to urban local bodies, which have been deprived of their major source of income of sustaining their normal activities and to ensure normal functioning of local bodies. In many other cases grant-in-aid is provided by both centre and state government to these local bodies. In Himachal Pradesh urban bodies are playing their role in somewhat good manner and interest. In 1992, Union government made 73rd amendment to the constitution, providing uniform administrative and functional provision of the Panchayats all over the country. This amendment is based on the recommendations of *L.M. Singhvi Committee*. In 2012, for the first time direct election were held for the post of Mayor and Dy. Mayor. Out of 25 ward, 13 were reserved for women. The total electorate in 2012 in Shimla municipal corporation were 81040. The post of Mayor Dy. Mayor were won by CPI, Mr. Sanjay Chauhan and Mr. Tikendar Panwar respectively. Out of 25 seats, BJP won 12, Congress 10 and CPI 03. Two person were nominated by the government making it 27 in all.

To increase the revenue of Shimla municipal corporation, Green tax has been levied on the vehicles bearing other state number plates from 1st September, 2012.

The Panchayati Raj Training Institute, Mashobra: The Panchayati Raj Training Institute, Mashobra was established as a Government Institute, under the Panchayati Raj Department in the year 1978, by the Government of Himachal Pradesh. The Himachal Pradesh Government by the notification dated 31st July, 1978 took over the Institute under its control and also shifted the campus to a place called Mashobra in District Shimla. Before 1978 it was run as an autonomous body at a place called Salogra in district Solan of Himachal Pradesh.

The Present Office Campus of Himachal Pradesh Panchayati Raj Training Institute Mashobra, is located at a place called *'Craigneno'*, 3 Kilometers from the Mashobra Block Office and 18 Kilometers from the General Main

Bus Stand of Shimla City. Before the year 1999 the Institute was being run in a rented private building in the main MARKET of Mashobra. The building in which the Institute is functioning at present, was constructed during the year 1994 to 1999. The Institute was shifted to this new building in December, 1999.

The Panchayati Raj Training Institute, Mashobra is also recognised as an Extension Training Centre (E.T.C) under the Ministry of Rural Development, Govt. of India. Being an E.T.C., it has been receiving an annual recurring grant of Rupees Twenty Lacs and also Non recurring grants under different heads from the Ministry of Rural Development, Govt. of India.

The state of Himachal is divided into 12 Districts, 77 Blocks (75 Panchayat Samitis) and 3243 Gram Panchayats at present.The Panchayati Raj training Institute Mashobra has 4 districts full (i.e. Shimla, Solan, Sirmour and Kinnaur) and one Block (i.e Kaza) of district Lahaul-Spiti under its jurisdiction. Institute gives direct training to the elected representatives of Panchayati Raj Institutions e.g. Pradhans/Up-Pradhans of village(Gram) Panchayats, Member of intermediate Panchayats (Panchayat Samitis) and District Panchayats (Zila Parishads)etc. The Institute also imparts training to the officials serving PRIs. and of Panchayati Raj and Rural Development Department, like, Panchayat Inspectors,Auditors/Panchayat Sahayaks/Panchayat Secretaries etc.

13

EDUCATION IN HIMACHAL

"so long as the millions live in hunger and ignorance, I hold every man a traitor who, having been educated at their cost pays not the least heed to them....."

—Swami Vivekananda

The concept of popular and progressive education, as it is understood today, did not exist in the ancient and medieval period. Whatever educational system prevailed, was indigenous in character, religious in context and unscientific in nature. Barring Luminous exceptions, rulers, by and large, of the erstwhile princely states were orthodox and conservative for generations. Education for them meant sticking to customs and rites as preached by the ancient religious books. Religion was dominant with them and they scarcely left or departed from these practices. Under these circumstances, general education was offered little chance to take roots. Education would not seem to have been the object of the bulk of the populations as it was not at all considered a sure means of earning the bread. Such conditions continued to hold sway till the emergence of institutions of modern period. The old system of education in the memorable past in Himachal Pradesh seems to be the religious initiation of the pupils. It is conjectured that then education was imparted at '*temples*' and '*ashrams*' and, well to do people formed the pupils community.

HISTORY: Of the traditional educational institutions that existed in Himachal Pradesh in 1947, four may be mentioned. 'Phagu', 'Gurukula' residential institution in Sirmaur district , 'Sanskrit Vidyalaya' at Sundernagar, 'Sanatana Dharam Pathshala' at Chamba and 'Tarni Sanskrit pathshala' at Solan. These educational institutions catered to a very small number of students and provided facilities not always adequate for higher studies in Hindi and Sanskrit. Out of these four, the two institutions at Solan and Sundernagar have been taken over by the Education Department. During 1958–59, the enrolment in these two institutions was 142. The credit for doing pioneering educational work in the erstwhile states of the Pradesh goes to certain progressive institutions and imaginative individuals.

Among institutions, the names of the Arya Samaj, Chamba; the Sanatan Dharam Sabha, Chamba; the Dayanand Vidya Pracharni Sabha and Kalishthan Mandir Trust deserve mention. Among the notable persons who have contributed significantly to the cause of education in the Pradesh are '*Pandit Ram Saran*', who opened a girls school in Chamba; '*Sri Satya Nand Stokes*', an American Missionary, who embraced Hinduism and gave

a fillip to education work in Mahasu district (now Shimla district). '*Shri Ram Dayal*', a landlord of Kotgarh, who became the first Headmaster of Kotgarh school and '*Shri Pratap Singh Negi*', who established a High School and a number of middle schools in Sirmaur district.

The state Education Department was set up after April 1948. It was then headed by Chief Education Officer, At the dawn of independence of country, Himachal Pradesh was faced with many problems. Progress of education in various constituent of the Pradesh had been far from uniform. The education of women had been sadly neglected. The teachers were mostly untrained with meager and different pay scales in different parts of the Pradesh. The educational institutions were accommodated in dilapidated houses, ill–equipped and poorly staffed. There was no proper organizational set up for education. There was no institution for higher learning in any part of the Pradesh. Above all, the public at large, was apathetic to education.

In 1949, State Education Department was headed by a Chief Education Officer, assisted by four District Inspectors of Schools and one lady Supervisor. The post of Chief Education Officer was redesigned as Deputy Director of Education in 1950. With the formation of a popular ministry in 1952, the organizational set up for education in the Pradesh was strengthened and streamlined. Control of the State Education Department was vested in the Hon'ble Education Minister. *In 1952–53, a post of 'Director of Education' was created, but it remained vacant till 1957.* As a result of 'State Reorganisation Commission' Report, the Pradesh become a 'Union Territory' on 1st November 1956. Under an Administrator designated as Lt. Governor. In 1957, a Territorial Council was formed in place of the Assembly in order to administer certain transferred subjects. Accordingly, the post of Deputy Director of Education was designated as the Principal Education Officer.

The post of Director of Education was first filled up in January 1958 and 'Shri K.L. Sethi' was the first Director of Education who continued upto 31st May 1967. In 1961–62, the higher secondary system of education was introduced in the Pradesh and quite a number of high schools were upgraded to the secondary pattern. In 1963, the Territorial Council was converted into Vidhan Sabha and a popular ministry was sworn–in during July 1963. With the abolition of the Territorial Council, the Director of Education was also assigned the job of Education Secretary. He continued to hold charge till 1970, when his functions were bifurcated and a separate Education Secretary was appointed.

With the reorganization of the erstwhile state of Punjab in 1966, the hilly areas of Kangra, Kullu, Lahaul & Spiti. Shimla, Una, Nalagrah tehsil of Ambala district etc. were added to Himachal Pradesh. The State then was divided into two zones, South and North, with one Deputy Director of Education in each zone responsible of school 'inspection', 'control' and 'supervision' of education. The Pradesh became full-fledged state of Indian Union on 25th January 1971. In 1972, a '*Statistical Unit*' was created under centrally sponsored scheme which was headed by a Statistical Officer. In 1975, one post of

Joint Director (Colleges) was created and filled up. In 1976, the post of the Deputy Director (Hqrs.) was upgraded to Joint Director (Schools). As a mark of International Year of Women, the post of Assistant Director (Women Education) was upgraded to that of Deputy Director in 1975.

In 1980, the post of Deputy Director (Women Education) was converted into Deputy Director (Primary Education). In 1979, a cell known as 'Technology Cell' was created. The Director of Education is now assisted by two Joint Directors of Education, one Deputy Director (Primary Education). One Deputy Director (Adult Education), seven Assistant Directors of Education, one Statistical Officer, one Deputy Director (physical Education), three Zonal Deputy Directors of Education, two CSD at the zones, twelve District Education Officers, eighteen Deputy District Education Officers, 114 Block Education Officers, apart from supporting ministerial staff. The district education officer has been redesignated Deputy Director of education.

For pre–service training, prior to the merger of hilly areas, there was only one training college at Solan. But in 1966, two more training colleges, one each at Shimla and Dharamshala, were inherited with the merger of hilly areas. The training college of Shimla was subsequently handed over to Himachal Pradesh University which named it as the 'School of Education'. The Government College of Education at Solan was converted into '*State Institute of Education*'. The Government College of Education at Dharamshala Continues to perform the function of pre–service and in–service training of teachers. '*Lalit Kala Academy*' was established in Nahan in 1962.

The music section was transferred from Nahan to Chamba, so as to form as Government College of Fine Arts in 1966. However, in 1968, both these institutions were shifted to Shimla for better utilization of the facilities provided in these institutions. It was decided by the government to stop admission to the Arts College, Shimla as there was not much of job opportunity in the State for the products of this college. Accordingly, further admission was stopped with effect from the session of 1973–74. In 1973, M.A. Music classes of College of Fine Arts were transferred to H.P. University. The diploma course classes in music and dance being run in the college of Fine Arts were finally transferred to Government College, Shimla and now this section is functioning at centrally located building in Lakkar Bazar, Shimla.

The standard of literacy at the time of independence in Himachal Pradesh as well as when it came into existence, was very low, only about seven percent. Before 1951, there were only 369 schools in the State. In 1951, when Himachal Pradesh became Part 'C' State, special efforts were made by the popular Government for the spread of literacy. New State set before it two objectives, viz:

(i) Expansion and improvement of educational facilities in keeping with people's need and

(ii) To develop an integrated system of education.

In pursuit of these goals, successive Governments in Himachal Pradesh have made great efforts. It is a measure of the people's hunger for education that there have been large increase in the enrolment figures for all age groups in the schools. The state Cabinet on 8th July 2011, approved a policy for the takeover of government-aided private schools, which were receiving 95 percent of the salaries as grant, to end dual control. The policy provides for total takeover of the institutions where the management agrees to hand over all assets like buildings and land along with the staff to the government. In case the managements have reservations in transferring the assets, only the staff will be taken over and thereafter the institutions will not be eligible for any further grants from the government.

After the takeover, the staff will be placed in the initial pay scale, but the salaries will be protected by granting personal pay. There were 40 such schools in the state which receive Rs 11.50 crore as grant from the government. Of these, the managements of 19 schools had already expressed willingness to hand over both assets and liabilities. The policy provides for the takeover of the institutions where the management agrees to hand over all assets like buildings and land along with the staff to the government. In case the management has reservations in transferring the assets, only the staff will be taken over and thereafter the institutions will not be eligible for any further grants from the government. This step was taken to ensure greater transparency of system and reducing disparity in the functioning of educational institutions.

The following tables are direct indication of the progress made after the formation of the state in the field of education:

TABLE - 1

Educational Institution in Himachal Pradesh

TABLE - 3 LITERACY (PERCENTAGE)

Year	Male	Female	Percentage
1951	12.97	2.49	7.98
1961	32.30	9.50	21.30
1971	43.19	20.23	31.96
1981	64.27	37.72	42.48
1991	75.36	52.13	63.54
2001	85.03	67.04	76.05
2011	89.53	75.39	82.80

For the spread of literacy, many programmes have been introduced by the state Government. For example

(a) ADULT EDUCATION: Under this programme, by the end of December 1998, 2,900 adult education centres were sanctioned, in which about 65, 000 adults were on the roll.

(b) TRAINING PROGRAMME: In addition to ten JBT schools. Functioning in the Pradesh, B.Ed training is imparted in H.P. University and College of Education at Dharamshala and Sunder Nagar. By the end of 2013, there were 73 B.Ed training colleges in the state now 12 destrict Education afficers have been designated as deputy director of Education.

(C) SCHOLARSHIPS: Government provides scholarship and stipends at different levels to the students of various categories. In tribal areas, free text books are given to all the students studying in class I–X, Scheduled Tribe girls have been given special incentive to join school and colleges.

Himachal Pradesh is the first state in the country to announce free

education to girls from the academic year 1995–96 at all levels i.e. from the time of enrolment in government schools till university education including technical courses. In the year 2011-12 state Government launched free uniform scheme to all school students, under the banner of Atal uniform yojna.

The government is working constantly to prepare various plans in order to strengthen the health education system of Himachal. The state government has decided to start up with 3 major nursing colleges to develop the health system in the state. Himachal has one of the highest literacy rates in India. Hamirpur District is among the top districts in the country for literacy. Education rates among women are quite encouraging in the state.

Himachal Pradesh is home to many educational institutions offering a wide variety of courses. There are four universities, two medical colleges, four dental colleges and two engineering colleges in the state. There are over 10,000 primary schools, 1,000 secondary schools and more than 1,300 high schools in Himachal. In meeting the constitutional obligation to make primary education compulsory, Himachal has now becaome the first state in India to make elementary education accessible to every child in the state. Himachal Pradesh government is also very keen to transform this state into an education hub. In March 2008, Government of India made an announcement stating that as part of the 11th five year plan, an Indian Institute of Technology will be established in this state. Further, Atal Bihari Vajpayee Government Engineering and Technology Institute has been started at Pragatinagar, in Shimla distt. This college will have engineering related courses such as ITI, Diploma and Degree all in same campus.

TEACHER ELIGIBILITY TEST (TET)

The state government on 28th August 2011, decided to introduce Teacher Eligibility Test (TET) for all those who are interested to join teaching profession as trained graduate teacher. This has been done as per the direction of ministry of Human Resource Development. Now onwards to become a teacher one must qualify this test, to whichever stream one belongs to.

Technical Education: There are six Polytechnics, one Junior Technical School, 34 Industrial Training Institutes including one Industrial Training Institute for Physically Handicapped, 4 Industrial Training Institutes for women, one Industrial Training School for boys in the Pradesh. These technical institutes provide well trained manpower for government, semi–government and private sector. The Polytechnics conduct three-year-courses in civil, mechanical, electrical, automobile, architecture engineering, electronics and communications. Regional Engineering College at Hamirpur (Renamed as National Instituted Technology NIT) is also functioning in the State since 1986–87 academic year, where 30 students each in civil engineering and electrical engineering are admitted every year. The polytechnic institutes are in Sundernagar, Hamirpur, Rohru, Kangra Gagret and Kandaghat for women, one Government Junior Technical School is at Kangra.

** Functioning under H.P. University*

Source: *Statistical Oulines H.P.*

In Himachal Pradesh, at present five Government Universities are running various courses smoothly. These are:

(i) H.P. University, summer Hill, Shimla
(ii) H.P. Agriculture University, Palampur; and
(iii) Dr. Y.S. Parmar Horticulture & Forestry University Nauni (Solan).
(iv) Central University Kangra

HIMACHAL PRADESH UNIVERSITY – SHIMLA

The Himachal Pradesh University came into existence with effect from Ist July 1970 to begin with, only the following Post–Graduate course were introduced; English, Hindi, Economics, Political Science, Sanskrit and History. Later on, at the second stage few more courses were stated, such as:

M.Ed, B.Ed (Non–Medical) M.A. Sociology, Geography, M.Com, Public Administration, Law and LLM, MBA, DCA., MCA, DMM and DPM,M. Phil in Hindi, Sanskrit, English, History, Economics, Political Science, Sociology, Geography, Public Administration, Commerce and Science Subjects. M.Sc in Chemistry, Physics, Maths and Bio–Science and Diplomas in German, French and Russian.

The University is nestled amidst tall and lush green trees of deodars, oats, pines and rhododendrons. The location of the University presents a panoramic natural view among the woods, settled around Summer Hill. The camps where one half bathes in the fresh sun towards the east and another half in the grandeur of unique sunset on the West. Overlooking snow peaked majestic mountain ranges add to the lofty ideals and vision of the university. Its salubrious climate and calmness presents congenial atmosphere to pursue higher studies.

The University campus occupies an area of 200 acres and has been designed to possess a distinctive architectural style. Himachal Pradesh University is the only multi-faculty and affiliating University in the state. It firmly believes in what India's first Prime Minister Jawahar Lal Nehru said in his often cited convocation address at the University of Allahabad, *"A University stands for humanism, for tolerance, for region, for progress, for the adventure of ideas and for the search for truth. It stands for the onward march of the human race towards even higher."*

Major Thrust-Research Areas

- Integrated Himalayan Studies
- Application of Biotechnology in Forestry, Agriculture and Horticulture
- Mycorrhizal Technology, Ecology, Taxonomy, Ethno Botany, Biodiversity, Wood Science, Honeybees, Cytogenetics, Plant and Animal Physiology, etc.
- Polymer Chemistry, Analytical Chemistry.
- Computer Applications in Software Development.
- Computational Physics, Nuclear Physics, Condensed Matter Physics,

Solar Neutrino Physics.

- Hydrodynamic and Hydromagnetic Stability, Plasma Physics, Fuzzy Algebra, Motion of Non-newtonian Fluids.

- Sustainable Development, Poverty, Tribal Studies, Human Resource Development.

- Human Geography, Remote Sensing, Population Studies, Environment.

- Trade and Commerce, Tourism, Export Marketing, Banking, Rural Development, Agricultural and Horticultural Studies.

- Cultural Studies, Folk Literature, Handicrafts.

- Clinical Psychology, Post-colonial and Subaltern Perspectives on History, Art, Culture and Media and

- Women Studies, Canadian Studies, Teacher Education, Adult Education and Extension.

The Directorate of Correspondence Course (DCC), Himachal Pradesh University, Shimla is also doing a pioneer service to cater to the requirements of candidates who cannot attend regular courses to meet their appetite for knowledge. The correspondence courses division Himachal Pradesh University. Shimla was started in the year 1971 with its first Director, Dr. K.P. Pandey. In the beginning, following new courses were introduced:

M.A. in Hindi, Political Science, Sanskrit, Economics, History, English and M.Com., B. Ed Arts and Under–Graduate Courses in the subjects of Hindi, Political Science, Economics, English, Sanskrit, History and Sociology. After 1971, the B. Ed in Arts courses was discontinued.

Now, the following new courses have been introduced to enlarge its scope:

M.A. in Maths, M. Ed and Public Administration. The new name of DCC is International Centre for Distance Education and Open Learning (*ICDEOL*) changed since 1995.

Computer Centre in the Himachal Pradesh University was established in 1986 with initial FINANCIAL support of the University Grants Commission. Spread over an area of about 3000 sq. feet, the Computer Centre started functioning with a 68010 based Super Micro – 32 with just five terminals. Now it is equiped with latest hardwares like Compaq Servers and Pentium based nodes and latest software. It offers computing facilities to students of dept. of computer science as well as to students of other departments. It provides consultancy to various departments as and when required.

HPU GETS ITS OWN ANTHEM

It is after four decades that Himachal Pradesh University in July 2011 (HPU) finally have its own university anthem, *'Kul Geet'*, placing it in the bracket of some elite universities like Benaras Hindu University (BHU) and Shantiniketan, that swear by their anthems. The special executive committee meeting of HPU approved the Kul Geet, the vision for which was seen by

Vice-Chancellor ADN Bajpai. The lyrics of the mellifluous composition with seven stanzas penned by Prof Rajendra Mishra, a former professor in the Sanskrit Department of HPU. The music composed by the Music Department of HPU.

The lyrics of the Kul Geet describe HPU as a modern seat of learning by referring to it as "naval Nalanda" (new Nalanda). It elaborates the natural beauty of the state in the form of the Dhauladhar ranges, rivers, and famous pilgrim shrines.

H.P. KRISHI (AGRICULTURE) VISHAVIDYALAYA (UNIVERSITY), PALAMPUR

In the year 1961 the Himachal Pradesh Government established a College of Agriculture at 'CHAMBAGHAT' (Solan) (renamed as Himachal College of Agriculture and Research Institute in 1965). This college was affiliated to the Punjab University, Chandigarh to cater to the needs of the hills area of the erstwhile Punjab State, another College of Agriculture was established in May 1966 at Palampur under the aegis of Punjab Agriculture University, Ludhiana, which was transferred to Himachal Pradesh as a result of reorganization.

With the trifurcation of Punjab Agriculture University, Ludhiana, consequent upon reorganization of Punjab and the incorporation of Himachal Pradesh University, Shimla in January 1970, the two colleges along with their satellite stations came to comprise the Agriculture Complex under Himachal Pradesh University. The Agriculture complex was later on upgraded to the status of full-fledged Agriculture University in '1978' with headquarters at Palampur. The University College of Agriculture at Solan became its constituent campus. With the establishment of Dr. Y.S. Parmar University of Horticulture and Forestry, Solan in December '1985', the Solan Campus along with the Research Stations Catering to the research and teaching needs of Horticulture and Forestry were transferred to the new University.

The territorial jurisdiction of Himachal Pradesh Krishi Vishvavidyalaya extends to the entire state of Himachal Pradesh, the University is to run its activities in teaching, research and extension education mainly in agriculture which includes Basic and Applied Science of Soil and Water Management, Crop Production, Home Science, Food Science, Agriculture Engineering and Technology, Animal Husbandry including Veterinary and Dairy Science, Fisheries, Mushroom Growing, Bee–keeping, Tea Cultivation, Sericulture, Vegetable Land Use and Management and Economic and Social Uplift of the rural people of the State. The Department of Forestry has been separated and incorporated in a Department of Forestry and Environment.

The Himachal Pradesh Krishi Vishvavidyalaya is located with its main campus at Palampur with an area of 416.12 hectares. Its Regional Research Stations are located at Bajaura (District Kullu), Dhaulakuan (District Sirmaur) and Kukumseri (District Lahaul Spiti). Besides, there are eleven research

substations, at Kangra, Nagrota, Malan , Sundernagar, Katrain, Akrot, Berthin, Salooni, Leo and Lari. On the establishment of Agriculture University on 1st November 1978, the existing faculty of Agriculture and Forestry of the then Agriculture Complex of erstwhile H.P. University was bifurcated into two faculties, viz. (i) Faculty of Agriculture and Animal Science and (ii) Faculty of Horticulture and Forestry. But now after separate University of Horticulture and Forestry at Solan is established the Faculty of Horticulture and Forestry at Solan stands transferred to that university and the Faculty of Agriculture and Animal Science is with this University.

The Under–Graduate and Post–Graduate degrees leading to B.Sc., M.Sc and Ph. D are awarded by the constituent colleges in the University. Through its instructional programmes leading to B.Sc. (Agriculture), B.Sc, (Home Sciences), B. Sc., B.V.Sc., M.Sc. (Agriculture), M.V.Sc., M.Sc. (Food Science & Nutrition) and Ph.D degree, the university continues to meet technical manpower requirement of the state, bank, agro–based industries etc. in the subjects of Agriculture, Home Science and Veterinary Sciences. The semester system of education, which was adopted during the Sixth Five Year Plan, is continuing both at Under–Graduate and Post–Graduate level.

During the Seventh Five Year Plan and annual plans 1990–91 and 1991–92, the academic programmes of the university were started/strengthened. A milestone was achieved in 1986 when a College of Veterinary and Animal Science was established and degrees leading to B.V.Sc. and Master' in Animal Production were awarded by the University. First batch for B.V.Sc. passes out in 1991. From 1991–92, the number of departments of the college has increased from six to thirteen. With effect from 1991–92, the University has established two more colleges, viz., (i) College of Basic Sciences and (ii) College of Home Science. The College of Basic Sciences has six departments and the College of Home Science has five departments.

Department of Agriculture Engineering was reorganized to strengthen the same to meet the present requirement. Post–Graduate programmes were started in the Departments of Plant Pathology (M.Sc. and Ph.D.), Entomology (M.Sc.) and Vegetable Crops (M.Sc.). The University has been renamed as Chaudhary Sarvan Kumar University, after the name of Vidhan Sabha Speaker

Extension Education

The Directorate of Extension Education shares the responsibility for planning, implementation and coordination of various extension education programmes of all the departments of four constituent colleges and research stations in close collaboration with the State Departments of Agriculture, Animal Husbandry, Fisheries and other concerned departments and institutions. It conducts a large number of training programme for farmers, livestock keepers, farm ladies, rural youth, etc. at main campus and at its eight Krishi Vigyan Kendras (Farm Science Centres) at Bajaura, Dhaulakuan, Hamirpur, Una, Mandi, Kangra, Berthin and Kukumseri. The Agricultural

Technology Information Centre is serving as a single window service to the farmers.

Due to the earnest and strenuous work during the past thirty five years in the University, the State has traversed new paths of progress in the area of farming and it has become almost self sufficient on the food front. Harvests have become bountiful and the socioeconomic status of the farming community has undergone a sea change.

Two invention of CSK University Palampur got patents in October 2010. One is by Dr. D.C Sharma i.e. *bio insecticide* (prepared for citrus variety fruits) and other by late Dr. Asha Bansal, who developed *natural dye.* Dr. Sharma was associated with the department of Ontology.

DR. YASHWANT SINGH PARMAR UNIVERSITY OF HORTICULTURE & FORESTRY (NAUNI) DISTRICT SOLAN EST. 1985

In order to provide a forum for exclusive attention and to cater to the needs of teaching, research and extension education in Horticulture and Forestry, Government of Himachal Pradesh by Act 6 of 1986 (Act No. 4 of 1987) established Dr. Yashwant Singh Parmar University of Horticulture and Forestry with its headquarters at Nauni (Solan).

The territorial jurisdiction of the University extends to the State of Himachal Pradesh. The College of Horticulture and College of Forestry are located at the headquarters of the University. This University has adopted semester system of education with the internal evaluation. A significant feature of the system is that teacher frames the curriculum, tailors the programme of work according to the actual need of the students and evaluates students on the basis of their day–to–day performance. Planning and conduct of research pertaining to Horticulture, Forestry and allied disciplines is administered by the Director of Research assisted by two Deputy Directors of Research, one each in Horticulture and Forestry.

The research programme of the University is geared to tackle the need based and location specific problems of the farmers. The research activities of the University are carried out at the main campus in eight departments located at the College of Horticulture and six departments located at the College of Forestry and four Regional Research Substations located in different agro–climatic zones of the State, i.e., at Jachh (Kangra), Bajaura (Kullu), Mashobra (Shimla), (Kinnaur), Dhaulakuan (Sirmaur), Nagrota Bagwan (Kangra), Kandaghat (Solan), Seobagh (Kullu), Kotkhai (Shimla), Manali Rahla (Kullu), Tabo (Spiti) and Kalpa (Kinnaur).

EXTENSION: Extension Education Programmes in respect of Horticulture and Forestry are planned, coordinated and implemented in the state in collaboration with department of Horticulture, Forestry, Farming and Conservation, Agriculture and other department and agencies of the State.

It conducts demonstrations and training programmes. It also organizes exhibitions, AIR and TV programmes, horticulture and other produces shows and exhibition besides bringing out publications in a popular form for dissemination of technology. The Directorate of Extension Education also imparts training to the officers, functionaries of the said Departments/ Agencies to train them about the latest technical know-how by organizing workshops, seminars, symposia, training programme, AIR schools, polytechnics and land to land programme with the aim of providing economic and ecological security.

On 28 November 2013, first Energy Park of the state was setup in Dr. Y.S Parmar University of Horticulture and Forestry Nauni, with the investment of Rs. 96/- lakh. The park has capacity to generate 5 kw. solar energy daily.

SATYA NAND STOKES LIBRARY: The University library named after Satya Nand Stokes, the visionary, who introduced delicious varieties of apples in Himachal Pradesh, thus ushering in a horticulture revolution, is housed in a vast ventilated building offering conducive environment for study. The library has, at present, a stock of 42769 books covering areas of horticulture, forestry and allied sciences, and subscribes to 116 scientific journals.

Besides, with effect from 27th July, 2008, access to more than 2000 electronic journals through CERA (Consortium for e-Resources in Agriculture) has been provided for easy tracking of literature by students and faculty. It has acquired all important databases on CD-ROM accessible on CD-NET like AGRIS, HORT-CD, TREE-CD, CAB-CD, Encyclopedia Britanica and Mc Graw-Hill Multimedia Encyclopedia of Science & Technology, etc.

THE NATIONAL INSTITUTE OF TECHNOLOGY HAMIRPUR

The National Institute of Technology, Hamirpur (commonly referred to as NIT Hamirpur) is a public engineering college located in Hamirpur, Himachal Pradesh. It is one of the thirty National Institutes of Technology established, administered and funded by Government of India. It conducts undergraduate and postgraduate programmes in Engineering and Architecture and Doctor of Philosophy programme in Engineering, Pure Science and Humanities. Established in 1986 as Regional Engineering College, Hamirpur in Hamirpur district of Himachal Pradesh, it was a joint enterprise of the Government of India and the Government of Himachal Pradesh. On 26 June 2002 REC Hamirpur was awarded the status of deemed-to-be university and upgraded into an NIT. As a result of this transition the institute came under the sole purview of the Government of India. It has been awarded the status of Institute of National Importance by an Act of Parliament, and judged best NIT in terms of infrastructure by the World Bank. For getting admission in NIT Hamirpur one has to clear the JEE MAINS examination in INDIA.

Computer Center is a central facility, which caters to the needs of academic departments. The aim of the center is to provide professional services, promote

and assist the use of new computing technology among the students, staff and administration. The Computer Center manages computing and communication facilities throughout the campus. The institute library was set up in 1986 in one room of Government Polytechnic Hamirpur and was shifted to the institute campus in 1988 in Visvesvarya Block. At present it is in a separate building with the floor area of 3200 square meters. The library can seat 500 people in reading halls and 100 readers in the audiovisual hall. The institute campus is situated in the Hamirpur district of Himachal Pradesh, India, at an altitude of 900 meters above sea level.

Engineering Colleges In Himachal Pradesh

Private universities

1. Abhilashi University, Mandi Distt. Mandi

Engineering institutions

Govt. University Departments

1. University Institute of Information Technology, Himachal Pradesh University, Shimla (2000)

Private University Departments

1. Akal College of Engineering and Technology, Eternal University, Baru Sahib, Dist Sirmaur (2007)
2. Arni School of Technology, Arni University, Indora, Distt. Kangra (2009)
3. Chitkara School of Engineering and Technology, Chitkara University, Barotiwala, Distt. Solan (2008)
4. Institute of Engineering and Emerging Technologies, Baddi University of Emerging Sciences and Technologies, Baddi (2002)
5. School of Engineering and technology, Indus International University, Bathu (2009)
6. Faculty of Engineering and Technology, Shoolini University of Biotechnology and Management Sciences, Solan (2009)

Colleges affiliated to Himachal Pradesh University

1. Green Hills Engineering College, Kumarhatti (2003)
2. Himalayan Institute of Engineering and Technology, Kala Amb, Dist Sirmaur (2009)
3. IITT college of Engineering, Kala Amb (1997)
4. Jawahar Lal Nehru Government Engineering College, Sundernagar (2006)
5. K.C. Institute of Engineering and Technology, Distt. Una (2009)
6. L.R. Institute of Engineering and Technology, Solan (2008)
7. M.G. Institute of Engineering and Technology, Badhoo, Dist Mandi (2007)
8. Mahant Ram Institute of Technology College of Engineering and Management, Bani, Distt. Hamirpur (2009)

9. SAI Ram Educational Trust Group of Institutions, Bullah Tipper, Dist Hamirpur (2009)

10. Shiva Institute of Engineering and Technology, Bilaspur (2009)

11. Sirda Institute of Engineering and Emerging Technology for Women, Distt. Mandi (2009)

12. T. R. Abhilashi Memorial Institute of Engineering and Technology, Tanda, Distt. Mandi (2009)

CENTRAL UNIVERSITY DHARAMSHALA (KANGRA)

The foundation of Central University Dharamshala was laid on 15th August 2007 and final approval was accepted on 20th March 2009. Prof. Purkan Quamar was appointed its fonder and first Vice-chancellor on 20th January 2010. Before this he was Vice-chancellor of Rajasthan University. The objective of central university Dharamshala is inclusive education access, excellence in higher education and conducive atmosphere for research work. The central university planned to have 17 school of studies and 90 departments.

JAYPEE UNIVERSITY OF INFORMATION TECHNOLOGY WAKNAGHAT

Jaypee University of Information Technology is recognised by the state government of Himachal Pradesh, India. It was set up by Act No. 14 of 2002 vide Extraordinary Gazette notification of Government of Himachal Pradesh dated 23 May 2002. JUIT was approved by the University Grants Commission under section 2 (f) of the UGC Act, the University commenced academic activities from July 2002. Waknaghat is a small town in Solan district in the Indian state of Himachal Pradesh which falls on the way to Shimla, from Kalka, India. It is located on National Highway 22. Waknaghat is around 22 km from Shimla and 25 km from Solan. Other nearby villages and towns. Wakna, Domehar, Aanji-Sunara, Sabathu, Mamlig, Shoghi and Kandaghat. Near Railway Station is Kaithli-Ghat 3 km from Waknaghat and Kandaghat is 12 km from Waknaghat.

The university offers the following programmes:

- Bachelor Of Technology in Computer Science & Engineering
- Bachelor Of Technology in Information Technology
- Bachelor Of Technology in Electronics & Communications Engineering
- Bachelor Of Technology in Civil Engineering
- Bachelor Of Technology in Bioinformatics Engineering
- Bachelor Of Technology in Biotechnology Engineering
- Bachelor Of Pharmacy in Pharmacy
- Master of Pharmacy in Pharmacy — specialization in Medicinal -

Chemistry, Pharmacology, Pharmaceutical Biotechnology

- Doctoral programs (Ph.D. degree) in Biotechnology, Bioinformatics, Pharmacy, Physics, ECE, CS, IT, PD and applied sciences.

Anti Ragging Act 2009: On 19th March 2009, the state government passed Anti - Ragging law to ensure healthy atmosphere in the educational Institutions. The act was neccessitated after the death of a medical student Aman

Kachru at Tanda Medical College. The act came into force on 25th March 2009.

Ragging in the state has been put in the category of serious offence which is unbailable and on the permission of the court shall be a compound offence. If a student found involved in ragging he/she can be -

- rusticated from the institution;
- will not be allowed to take admission in any institution for the next three years;
- there is provision for three years jail and Rs. 50,000/- fine;
- the concerned authorities will have to make enquiry within 24 hours of complaint by the victim.

If delay is caused by the concerned officials in registration of the case, then criminal proceeding could be initiated against such persons for negligence and delay in action.

PRIVATE UNIVERSITIES REGULATORY COMMISSION

The H.P Private Educational Institutions Regulatory Commission has been established by the Govt. of Himachal Pradesh under Section 3 of the Himachal Pradesh Private Educational Institutions (Regulatory Commission) Act, 2010 for the purpose of providing a regulatory mechanism in the State and for working as an interface between the State Government and Central Regulatory Bodies for ensuring appropriate standards of admission, teaching, examination, research and protection of interest of students in the Private Educational Institutions and for matters connected there with or incidental there to. In January 2013, the state government introduced an amendment to the Private University establishment rule and made it mandatory to run educational institutional till 40 years, earlier it was 25 years. On 9th May 2014, Supreme Court of India reinstated the Private Educational Institutions Regularly Commission by reverting the order of state high court dated 19 October 1913 of its annulment. The commission was set up in 2010 by an act, to monitor 16 universities and 255 other private educational institutions.

In the early stages, concentration was on opening of primary and middle schools to impart elementary education to the people of the Pradesh. But since the reorganization of state in 1966 and achieving statehood in 1971, a large number of colleges and other advanced educational institutes have been opened. The table 1-4 show, the progress made towards this direction in the past years:

In the past years, quantum growth has taken place in the enrolment of students in various colleges with different courses. In the year 1971–72, total enrolment in colleges was 13, 362, while in 1985–86, it grew to 30, 501. The percentage of female students to total number was 25 per cent during 1985–86 (7,551 females). In 1988–89 the total number of students was 27, 424 and the percentage of female to the total was 29(7,968). In the year 1997–98 the total enrolment at college level was 57.6 thousand and the percentage of female was 32 per cent (18432). The total enrolment in the year 1999 was nearly 60.2

thousand. Hamirpur district occupies top position in the literacy percentage with 74.88, while Chamba lowest with 44.70 percentage rate. In all, Himachal literacy percentage was 63.86 in total, and 75.36 for males and 52.13 for females according to 1991 census. In 1998 Hamirpur was declared first fully literate district of Himachal Pradesh.

Under the census of 2011 children below 7 years of age have been treated illiterate, even if he or she may be able to read and write with understanding. Of the total population 68,64,602 in the state, 51,04,506 persons have been recorded literates in 2011 census. These literates are 27,91,542 males and 2,3,1,2,964 females. The provisional percentage of literates to the total population excluding the children below 7 years of age comes to 82.80 per cent in the state. The proportion of literates has increased from 82.80 per cent in 2001 census to 83.78 per cent in 2011. The proportion of total literates in the state is more than all India's average of 74.04 per cent literates in 2011 census.

Table–4 given depicts the data at district level of total population, Population in age group 0-6 years, number of literates and percentage of literates. The highest percentage of literates is recorded in Hamirpur district where this proportion of literates comes to 88.15 per cent and is closely followed by Una (86.53 per cent) and Kangra (86.69 per cent) district.

Ranking of Districts by Literacy Rate and Sex: 2011
Himachal Pradesh

Rank	Persons		Males		Females	
	District	Literacy%	District	Literacy %	District	Literacy%
1	2	3	4	5	6	7
1	Hamirpur	88.15	Hamirpur	94.36	Hamirpur	82.62
2	Una	86.53	Una	91.89	Una	81.11
3	Kangra	85.67	Kangra	91.49	Kangra	80.02
4	Bilaspur	84.59	Bilaspur	91.16	Bilaspur	77.97
5	Solan	83.68	Mandi	89.56	Solan	76.97
6	Shimla	83.64	Solan	89.56	Shimla	77.13
7	Mandi	81.53	Shimla	89.59	Mandi	73.66
8	Kinnaur	80.00	Kullu	87.39	Sirmaur	71.36
9	Kullu	79.40	Kinnaur	87.27	Kinnaur	70.96
10	Sirmaur	78.80	Lahaul & Spiti	85.69	Kullu	70.91
11	Lahaul & Spiti	76.81	Sirmaur	85.61	Lahaul & Spiti	66.84
12	Chamba	72.17	Chamba	82.59	Chamba	61.67

The other district having literacy rate above the state average of 82.80 per cent are Shimla (83.64 per cent), Bilaspur (84.59 per cent) & Solan (83.68 per cent). In remaining Six districts, the literacy rate is below the state average. The lowest population of 72.17 per cent literates is shown by Chamba district and is followed by Lahaul & Spiti (76.81 per cent), Sirmaur (78.80 per cent), Kullu (79.49 per cent), Kinnaur (80.00 per cent) and Mandi (81.53 per cent) districts.

The literacy among the male population is 89.53 per cent of the total males excluding the children of 0-6 years age group in 2011 census. The literacy among the female population is still behind and it is 75.93 per cent in the state. The female literacy in district, Chamba continues to be at bottom having the 61.67 per cent female literates whereas in all other districts, this poportion is above 66.00 per cent. The percentage of female literates to total females excluding the age group of 0-6 years is above the state average of 76.60 per cent in Kangra, Hamirpur, Una, Bilaspur, Solan and Shimla districts. The districts which fall below the state average are Chamba, Lahaul & Spiti, Kullu, Mandi, Sirmaur and Kinnaur.

The state of Himachal Pradesh has made tremendous progress in the field of literacy during the last three decades. The percentage of literacy which was only 31.96 per cent (excluding age group of 0-4 years) in 1971 rose to 42.48 per cent (excluding age group of 0-6 years) in 1981 census. However, the increase in the proportion of literates in earlier decades is not much but in subsequent decades the literary rate grew rapidly. The proportion of literates which was 63.86 per cent in 1991 census rose to 82.80 per cent in 2011 census. The proportion of male literates has almost doubled from 43.19 (excluding age group 0-4) per cent in 1971 to 89.53 (excluding 0-6 age group) per cent in 2011 census. The percentage of female literates which was 20.23 (excluding 0-4 age group) in 1971 has risen to 75.93 per cent (excluding 0-6 age group) in 2011 census showing more than three fold increase in the literacy of females.

Table given in this population depicts the data literacy rates by sex for state and district 2001-2011. The proportion of literates in the state as well as in districts has increased considerably during the decade 2001-2011. The percentage of total literates excluding 0-6 age group was 76.48 per cent in 2001 which has risen to 82.80 per cent in 2011 thus, resulting in net increase in the proportion of literates by 6.32 per cent during 2001-2011. All districts in the state show improvement in literacy in 2011 census over 2001 census of varying order. As regards the male literacy percentage of male literates has increased from 85.35 per cent to 89.53 per cent yielding an increase of 4.18 per cent in the proportion of male literates. During 2001-2011, female literacy rate has changed from 67.42 per cent in 2001 to 75.93 per cent in 2011 census showing a net increase of 8.51 per cent in the proportion of female literates.

The period from 2001 onwards could be treated as watershed in the educational field of the state, as after 2001 a large number of private schools were opened in all districts of the state. The opening of new schools in private sector also brought changes in the pattern and nature of education with the introduction of English as medium of instruction.

The number of primary schools in 2001-02 were 10,633, which went up to 10,767 in 2011-12; middle and senior basic from 1672 in 2001-02 to 2,303; high and senior secondary 1506 to 2094 and colleges of general education from 37 to 67 in 2011-12. The number of private schools also increased with great speed during this period. In 2001-02 Himachal had

only 49 private schools, which went upto 912 in 2011-12. This was also the period when number of private colleges reached at 44 from just 7 in 2001-02 . The state owned B.Ed colleges were 4 in 2001-02 and remained same till 2011-12, but in private sector 69 B.Ed. colleges were opened. The polytechnic institutions were 6 in 2001-02 went upto 9 in 2011-12 in government sector, while in private sector their number reached at 20.

The opening of schools, colleges and technical institutions in both public and private sector has contributed in a big way in the spread of literacy in the state. The difficult terrain and lack of finance which were main hurdles in the building of strong educational base in the traditional society of the state are now the old story of 20th century . The concerted efforts of successive state Governments in the field of education have resulted in the emergence of the state as educational hub. In 2001-02 Himachal Pradesh had only two private universities and their number went upto 16 in 2011-12.

To improve the present scenario of education, Himachal Pradesh Government has planned to introduce some new techniques, viz:

- Opening of more Primary School for Redressal of Regional Imbalances.
- Employment for Educated Youths.
- Strengthening of Administration and Supervision.
- Drinking water facilities.
- Incentives to students.
- Cold weather charges.
- Construction of school buildings near natural environment.
- Monitoring and Evaluation.
- Incentives to reduce dropouts.
- Grants to H.P. Education Society.
- Opening of non–formal education centres.
- Additional Staff for JBT Schools.
- Introduction of Vocational centres in the state.
- Improving teachers efficiency.
- Talent Search Scholarship Scheme.
- Science Exhibition
- Setting up of Community Science Centre
- Earn while learn scheme.
- Popularising UNICEF Aided Projects
- Environmental Education; and
- Arrangements for modernization of laboratories/workshop, purchase of books for library and reading centres.

To prevent drop out tendency of socially and economically backward students studying in primary classes various types of incentives and scholarship schemes have been introduced viz. free clothing and text books and free writing material in DPEP Districts and tribal areas for girls, scholarship or/

RDP/Lahaul–Spiti pattern and free education to girls at all levels. In addition various centrally sponsored schemes such as DIET, Mid–Day meal and IEDC are also in operation. In 2011, state government introduced free uniform to all students upto 12th class.

In the State, in order to provide sports training to talented youth, training centres have been set up at all district headquarters. Besides providing regular training, these centres also organize training camps. To encourage sports, right from the grass–root level, a network of construction of stadium has been framed by the Department of Sports. Till 1989, seven stadiums at Kalpa, Dhami, Rampur, Rohru, Nankhari, Nalati and Sanawar (swimming pool) had already been constructed and 29 other arenas were under construction at various places in the State. For promoting national integration, Himachal Youths are also sent to other states under Inter–State Youth Exchange Programme. For excellence in sports activities, the *'Parshuram award'* is given by the State Government. The department of Youth Services and Sports was created in July 1982 in Himachal Pradesh with the twin objectives of including sports consciousness and infusing the spirit of patriotism and comradeship.

NAVODAYA SCHEME: At present, to provide quality education to intelligent student, eight Navodaya Vidyalayas viz. (i) Kotla Khurd (District Una); (ii) Pandoh (District Mandi); (iii) Nahan (District Sirmaur); (iv) Sarol (District Chamba); (v) Rekong Peo (District Kinnaur); and (vi) Tarkwari (District Hamirpur). (vii) Kothipura (Bilaspur) and (viii) Theog (Shimla).

Jawahar Navodaya Vidyalayas (JNVs) are a system of alternate schools for gifted students in India. They are run by Navodaya Vidyalaya Samiti, New Delhi, an autonomous organization under the Ministry of Human Resource Development, Department of Education, Government of India. JNVs are fully residential and co-educational schools affiliated to Central Board of Secondary Education (CBSE), New Delhi, with classes from VI to XII standard. JNVs are specifically tasked with finding talented children in rural areas of India and providing them with an education equivalent to the best residential school system, without regard to their family's socio-economic condition. JNVs exist all over India, with the exception of Tamil Nadu. There are approximately 593 JNVs across India (one school per district) as of 2010.

JNVs give great emphasis to sports. Every JNV provides facilities for football, volleyball, basketball, kho-kho, badminton, kabaddi, and cricket. The daily schedule allots at least two hours a day toward sports or other play activities. The campuses also provide a gymnasium and multi-purpose room for indoor games. Inter-school competitions are also yearly held once at cluster, regional, national, and SGFI (Sports and Games Federation of India) level.

SAINIK SCHOOL: There is One 'Sainik School' opened at Sujanpur Tira in district Hamirpur. The concept of the Sainik school originated in the mind of late V K Krishna Menon, who was India's first Defence Minister (1957-1962). He felt that a school run on military lines, in each state of India, would

provide the intake to the National Defence Academy. Moreover, the high levels of physical, mental and intellectual attainments needed for induction into the Officer Cadre could not be nurtured in the common schools, mainly because of the lack of infrastructure facilities.

Sainik Schools were set up on the lines of Public Schools and were designed to cater to the needs of the common masses who could not afford to send their wards to expensive and elitist public schools. Sainik School Sujanpur Tira (HP) was set up to cater to the needs of the people of Himachal Pradesh and was inaugurated by His Excellency Shri Neelam Sanjeeva Reddy, the President of India on 02 Nov 1978. He said, *"A fine Institution. My best wishes for its progress".*

Sainik School Sujanpur Tira was 18th in the series of 24 Sainik Schools in the country. Sujanpur Tira is located 24 Km from district HQ Hamirpur and is connected to all other places in the state by road. Its nearest broad-gauge rail head is located 99 Kms away at Una. A narrow gauge train operates between Pathankot and Maranda (Palampur) which is 45 Kms away. Kangra Airport at Gaggal is located 75 Kms from Sujanpur Tira.

Sainik School Sujanpur Tira admits students in class VI and IX on the basis of All India Entrance Examination. The school has extensive playground with lush green silken grass, which looks splendid against the Dhauladhar ranges and Baradari hall. The school has independent NCC unit and NCC is compulsory for all students from VI to XI standards. Sports facilities exist in Football, Hockey, Volleyball, Handball and Basketball besides other minor and indoor games.

The aim of Sainik School Sujanpur Tira is to prepare boys academically, physically and mentally for entry into NDA, Khadakwasla and other walks of life. A sound character, team spirit, a patriotic outlook and a desire to serve the country with dedication are the qualities promoted by all the Sainik Schools.

HIMACHAL PRADESH BOARD OF SCHOOL EDUCATION

The Himachal Pradesh Board of School Education, Dharamshala came into existence in 1969 as per Himachal Pradesh Act No. 14 of 1968 with its head quarters at Shimla later shifted to Dharamshala in January 1983. The Board started with a staff of 34 officials which has subsequently increased to 438. The Education Board prescribes syllabus, courses of instructions and text books for school education in Himachal Pradesh besides conducting examinations based on courses listed.

At present, the Board conducts examination for the following classes and courses: 10th, 10+2, J.B.T and T.T.C. As many as 5 Lakh candidates annually appear in the examination conducted by the Board. Presently more than 8000 schools are affiliated with the Board.

The Board has set up 1650 Examination centres throughout the state. Board

also publishes text books for class 1st to 12th. Apart from a Liaison Office at Shimla, the Board has also established 19 Sale Book Depots/Information Centres in the state to cater to the needs of students. To improve the quality of teaching and select the most be fitting and eligible persons, Teachers Eligibility Test was introduced in the year 2011. Leather shoes were banned in government schools on 4th February 2011, as a mark of respect to animal wealth. The only state of Indian Union to do so.

HIMACHAL PRADESH TAKNIKI SHIKSHA BOARD

The Himachal Pradesh Takniki Shiksha Board came into existence on 15th day of July, 1986 under the H.P. Takniki Shiksha Board Act, 1986 (Act No. 14 of 1986). Presently 15 Government Polytechnic Colleges, 24 Polytechnics in Private Sector and 73 Government Industrial Training Institutes, 95 Industrial Training Centres in Private Sector are affiliated with this Board . The Board is located at Dari in Dharamshala. Which is in the lap of Dhauladhar range of Himalayas.

New Education Policy: The new education policy of government of India has been formed according to the constitutional provisions. The State shall endeavour to provide, says Article 45, "*within a period of ten years from the commencement of the Constitution for free and compulsory education for all children until they complete the age of fourteen years*". A noble ideal indeed, towards which, the State has to move. To achieve this goal, new education policy of 1985 is an attempt with close conformity with the national objective, to reach 100 percent coverage in elementary education for children upto the age of 14 years.

The new education policy is an attempt to relink learning with life as it is in India. Whether in rural, in urban areas, in the tribal areas, in the hills, mountains or in the forests, it must be such that it gives opportunity for employment in these very areas. An attempt will be made through available resources and sources to provide, formal vocational and non–formal education to every one who is reachable. Education is after all basically a communication method, for communicating knowledge, communicating ways of thinking, communicating perspectives, communicating values from one generation to next and preparing the next generation to face thunderous challenges that it will be called upon to undertake. Education should not remain prerogative of one section of the society. It should also become double ways system, not one way. New education policy has laid special emphasis on:

(a) Attention to teachers
(b) Vocational training
(c) Non–formal education
(d) Education for weaker section
(e) Community participation, and

(f) New pattern of organisation etc.

The approved Seventh 6 Plan Outlay under head 'General and University Education (1985–90' was Rs. 51 crore. This was about five per cent of the outlay of Seventh Plan for Himachal Pradesh. Under the Eighth Plan (1992–97), the allocation for education was 441.99 crore, that was 13.21 percent of the total while in the ninth plan the allocation was 817.21 crore. That was 14.3 per cent of the total state plan outlay. In the 10th five year plan 2002-2007, total allocation for education was 2732.66 crore, which was nearly 23 per cent of the total plan outlay. Which was 12070 crore. The 11th five year plan came into force from 2007-2012 , with greater emphasis on modernization of elementary education with exposure towards information technology.

The total outlay was 14000 crore and allocation for educational and allied activities was 3413.88 crore nearly 24.5 per cent of the total outlay. The 12th five year 2012-17 had total outlay of rupees 22800 crore, which was almost 65 per cent higher to the 11th five year plan. The allocation for education was 2868.37 crore, which was 12.5 per cent of the total outlay. The implementation of Right to Education has put extra burden on the state governments all over India and in the case of Himachal Pradesh which is a fund starved state, any additional burden is seen as a squeezing of its tight positions to breathlessness.

Development of any society should not only be judged from its economic progress, but also mental horizon and its immediate use in the prevailing conditions. No society or nation can progress culturally, morally, ethically and economically which is lagging behind educationally. In the process of development, special care should be taken of educational facilities and approaches through which we can enhance the mental calibre of the masses. To diffuse knowledge, should become first target of the educational institutions. Special care, therefore, should be taken of Women's education. As someone has rightly said that '*if you teach a man, you teach an individual, if you teach a woman, you teach the whole family*'. Standard of any society can be gauged from the status of women in that particular society.

Enrolment in Govt Schools on a decline: Despite free text books, uniforms, shoes and mid-day meal, enrolment in government schools are declining sharply and more and more people are sending their children to private schools. As per the latest data, the enrolment at the elementary level (up to Class VIII) in government schools has over the last five years declined by 1,96,165 students and there is an increase of over 1 lakh students in the rolls of private schools . The total enrolment in 15,052 government schools has plunged from 8,39,615 in 2007-08 to 6,43,450 students in 2012-13. The enrolment up to primary level (Class V) dwindled between 1,11,803 and 85,462 students at the upper primary level (Class VI to VIII).

At the same time, enrolment in 2,300 private schools has increased from 2,44,620 to 3,44,039 students. There has been an increase of 63,898 students up to Class V and 34,621 students from Class VI to VIII. The alarming shift

ENROLMENT (ELEMENTARY SCHOOLS) INCREASE/ DECREASE PERCENTAGE						
Year	Boys	Girls	Total	Boys	Girls	Total
2012-13	320761	322689	643450	-6.63	-5.75	-6.19
2011-12	342031	341236	683267	-8.00	-6.92	-7.48
2010-11	369516	364881	734397	-7.87	-4.24	-4.56
2009-10	387522	380350	767872	-4.83	-4.19	-4.52
2008-09	406253	396294	802547	-4.96	-4.27	-4.62
2007-08	426385	413230	839615	-2.51	-2.13	-2.32

also reflects on the quality of teaching in government and private institutions. It is of common knowledge that teachers of government schools are sending their children to private schools. It is obvious that ill-paid teachers of private schools, which lack requisite infrastructure, are doing a much better job than their highly paid counterparts in government schools. Enrolment in government schools, which was as high as 90 per cent in the 1990s, came down to 78 per cent in 2008-09 and has declined by a whopping 10 per cent to 67.93 per cent over the last five years (2008-2013).

The main reason for the decline is that teachers in the private sector are held accountable by the management, whereas there is no accountability in government schools. The Centre had mandated that staff should be made accountable to the school management committee (SMC), but this has not been implemented due to "pressure" from teacher unions. Consequently, more and more private schools are coming up in rural areas and are considered a better option as they teach English, enforce discipline, have a dress code and more importantly, there is one teacher for each class, unlike government schools. Despite a declining enrolment, the government is opening more schools and the new state government decided to reopen a few schools closed by the previous government as part of its election promise. Many of the schools with an enrolment in single digit are being retained just to accommodate ***"politically influential"*** teachers.

The continuous policy of the successive Governments to lower the percentage for B.Ed entrance has steadily eroded the quality teachers strength in the schools, consequently contributing to the poor teaching in the government schools. Teaching has now become profession for leisure seeking.

Mid-Day Meal No Attraction: The sharp decline in enrolment in government schools over the past decade has put a big question mark on the mid-day meal scheme introduced in 2004 to enhance enrolment, retention and attendance at the elementary level. The official data said the strength in the primary schools came down from 589741 in 2003-04 to 465960 in 2008-09 and fell further to 380699 in 2012-13. The overall decline comes to a whopping 35.45 per cent. Similarly, in upper primary schools, it dwindled from 381582 in 2003-04 to 336587 in 2008-09 and declined rather sharply to 262778 in 2012-13. The decrease of 31.13 per cent over the period was slightly less than the decline at the primary level. There were 626 primary schools and 113 upper primary schools with an enrolment of less than 10 students each. Interestingly the state was doing well in primary education even before

the launch of the District Primary Education Project (DPEP) or Sarv Shiksha Abhiyan (SSA) and as per the Public Report on Basic Education in India (PROBE), it was on the verge of achieving 100 per cent enrolment in elementary education as early as 1995. It did not require the mid-day meal scheme to boost enrolment. The implementation of the midday meal scheme in 2004 only made a negative impact as on the one hand the enrolment came down and on the other the learning levels of the students took a plunge. This led to flight of students from government to private schools.

The main reason for the slide in learning levels is that the scheme had shifted the focus to peripheral issues rather than on learning. The main thrust was that the child must go to school not to learn but for eating meal. The teachers were preoccupied with managing the mid-day meal kitchen instead of teaching. The scrapping of the exams conducted by the state Board of School Education for Class V and Class VIII only made things worse as it is evident from the shocking performance of the students who appeared for the scholarship examination under the *Medhavi Chhtravriti Yojana.* Out of a total of 13777 students who appeared for the scholarship examination, over 90 per cent failed to secure 35 per cent marks. The performance was worst in environmental science with 96 per cent of students ending up in grade E followed by mathematics (94 per cent) and English (92 per cent).

The DPEP and the SSA have indeed helped to build infrastructure but focus on nonacademic issues made the situation irretrievable. The schools now have a much better infrastructure but there are not many children. The teachers have to pay from their own pockets when the grants are not received on time.

Scholarship scheme for young children: In a new initiative to encourage young children to excel in academics, the Education Department decided to award scholarships to meritorious students at the elementary level on the basis of a competitive test from the year 2011. About 500 students will be given three-year scholarship from class VI, for which the competitive test will be conducted for students of class V at the block level. The objective is to recognise merit at an early stage, instil the competitive spirit among children and motivate them to excel in academics by recognizing their merit at an early stage.

The scholarship will be available for a period of three years, during which the academic performance of the students will be monitored. The scholarship will be discontinued in case beneficiary students fail in the annual examination. The department will have to conduct the test as there is no board examination at the class V level to ascertain merit. Scholarships for various categories of students at the senior secondary level are awarded on the basis of the merit in the matriculation examination. In another initiative, the department decided to introduce an on-line system for processing and disbursing all scholarships in a phased manner. This will not only ensure the timely release of scholarships to meritorious students, but eliminate the paperwork involved in forwarding and processing cases through field offices as well.

The students selected will be required to open bank account. After processing cases, the scholarship amount will be deposited in the accounts. The decision to disburse the scholarship through core banking will benefit over 2,000 students in the first phase. The state has procured special software for e- disbursement from the centre of Excellence in Good Governance, set up by the Andhra Pradesh Government, which provides scholarship worth Rs 2, 500 crore a year.

Students to Evaluate Teachers: The appraisal of college and varsity teachers by students made mandatory by Himachal Pradesh University but only students, who are regular in attending classes, will be able to do so. The students with a minimum 75 per cent attendance will be eligible to give feedback on the performance of teachers in the classroom. They will be required to fill the feedback form at the end of each semester. The stub at the bottom of the form containing the particulars of the students will be submitted separately to maintain anonymity. Students will now have a role in improving academic standards in institutions of higher education, with the state government making "evaluation of teachers" by students is mandatory from the session 2014-15 under the Rashtriya Uchachtar Shiksha Abhiyan (RUSA). The basic objective of the move is to seek feedback to strengthen the quality of teaching-learning environment and to look for opportunities to improve teacher performance in classroom engagement with students to bring excellence in teaching and learning.

However, the initiative will also have a bearing on the career graphs of teachers. The University Grants Commission (UGC) has made it obligatory for teachers to get the feedback proforma filled from students and the same could be produced at the time of submitting their *academic performance indicator* (API) scores. Universities and other higher education institutions are required to have accreditation from the National Assessment and Accredation Council (NAAC) in which the *"teachers' evaluation"* by students is one of the essential components. Teachers will be rated on the five-level Likert scale—***below average, average, good, very good*** and ***excellent*** —on six broad parameters pertaining to their performance in the classroom.

Only students with a minimum 75 per cent attendance will be eligible to give feedback on the performance of teachers. Evaluation points include punctuality and regularity in taking classes, coverage of syllabi, self-confidence, communication skills, use of teaching aids and innovative methods, transparency in evaluation of answer books, ability to address inappropriate behaviour of students and delivery of structured lectures. Feedback will be provided on 41 points for objective evaluation of performance of teachers covering all relevant areas. Himachal Pradesh University has already approved the feedback proforma, designed by its internal quality assurance cell. On 20th June 2005 GSSS Himri (district Mandi) was first to start computer education program in Himachal Pradesh. This was inaugurated by Mr. Vir Bhadra Singh. On 2nd August 2005, Gujarat Ambuja Cement foundation adopted 30 primary school in Solan district as a part of social responsibility scheme.

First Skill Development Centre

Chief Minister Virb Badra Singh dedicated the first Centre of excellence for Skill Development in the state to people by inaugurating its newly constructed building at ITI, Nahan in July 2013. Constructed at a cost of Rs. 1.21 crore in the public-private partnership mode by the Department of Technical Education, it is a joint venture of the National Skill Development Council of the Government of India and IL & FS Skill development Corporation Limited.

Govt Schools told to register under Food Safety Act: All government schools serving mid-day meal have been registered under the Food Safety Act, 2006 and obtained licence from the Health Department. The government issued the direction to all government schools in the wake of the death of 23 children after being served midday meal at a school in Bihar in March 2013. To obtain licence under the Food Safety Act, the schools serving the mid-day meal would have to fulfil certain requirements and take several measures for the purpose of serving healthy and hygienic meal. The District Food safety Officers have also issued guidelines to schools for maintaining hygienic conditions. All schools have been directed to test the raw material and maintain hygienic condition while cooking and serving mid-day meal to students.

RUSA for Academic Reforms : The state was irked by the condition of 2 per cent mandatory spending on higher education as proposed by ministry of Human Resource development. At present it is spending Rs. 300 crore annually on higher education It will have to be increased to Rs. 1,500 crore to meet the condition and further to Rs 2400 crore by the end of the 13th Plan The state government has termed the condition as irrational and unreasonable. The state government says it is committed to implementing the Rashtriya Uchchatar Shiksha Abhiyan (RUSA), but it has reservations about a condition. It is against the Central government's condition asking it to spend 2 per cent of the gross state domestic product (GSDO) on higher education.

The centre had set the deadline of October 31-2013, for states to decide whether or not they were keen on implementing RUSA for revamping and strengthening of higher education infrastructure and sought a firm commitment. Keen to secure central funds under the scheme, the state had taken initiative to carry out academic reforms on the basis of draft RUSA document and was awaiting final notification by the Centre. However, it was irked by the condition of 2 per cent mandatory spending, which is almost impossible to adhere to for the fund-starved state. The state government had termed the condition as irrational and unreasonable and stressed that the allocation for various sectors was made on the basis of the annual Plan and not on the basis of the GSDP.

An increase in the GSDP does not lead to a proportionate increase in tax revenue. The state had taken an initiative to carry out academic reforms on the basis of the draft RUSA document in 2012 and by the time it was approved

and notified by the Centre in November 2013, major components like switch over to semester system, introduction of choice-based credit system (CBCS) and continuous comprehensive evaluation (CCE) had already been implemented. The state will get 90 per cent of the funds under the scheme as outright grant and it will have to contribute only 10 per cent. The scheme will be implemented over a period of 10 years up to the 13th Plan. The state will be required to prepare perspective plan for the development of higher education, set up an independent higher education council and annual plan immediately to secure fund during the current financial year.

The scheme provides for the upgrade of autonomous colleges to universities and funds for creation of infrastructure and appointment of faculty required to meet norms set under RUSA. There are five autonomous colleges in the state and with the UGC insisting that a university should not have more than 100 affiliated colleges some of these could be upgraded to a university. The state's gross enrolment ratio of 24 is better than the national average of 18 and it has to be increased to 32 over the next 10 years under the scheme.

TRANSFER POLICY FOR TEACHERS

In January 2011, the state government formulated a new transfer policy for teaches to ensure the availability of teaching staff in the rural and tribal areas throughout the academic session and facilitate appropriate deployment of teachers in educational institutions. The normal tenure at a place for all categories of teachers will be three academic years, subject to good performance and administrative requirements. However, the normal stay in case of first appointment in the tribal, difficult, hard and rural areas will be five years. Also, the first posting will be preferably in the tribal and hard areas and it will be ensured that those who have already served in tribal or difficult areas are not sent to these areas again. A continuous process of change will be followed whereby all employees are made to serve in the tribal and difficult areas and those who have managed to remain posted in the urban areas are posted to remote, tribal and difficult areas in the transfer season.

A continuous service within the radius of 25 km in the urban areas and 15 km in the rural areas will be clubbed for counting the stay of teachers for the purpose of transfer. General transfers will normally be ordered in April and there will be a ban on transfers after April 30. Thereafter, transfers can be ordered with the prior approval of the Chief Minister, under circumstances such as promotion, retirement, death, deputation, resignation, suspension, proceeding on long leave of a teacher , creation, abolition or shifting of post on rationalization, on the basis of complaint after verifying fact, due to poor academic performance, misconduct, from institutions of lower enrolment of institutions of higher student enrolments.

The controlling officer will ensure that in the event of transfer , a teacher will join duty only after the person occupying the post is relieved and only thereafter the joining the incumbent is accepted. In the event of transfer of

controlling officer, he or she will be deemed as relieved on the submission of joining report by the other incumbent. If the controlling officer does not comply with this procedure, the salary of incumbent will be drawn from the salary of the controlling officer.

More Colleges added to unemployment in State: The policy of opening degree colleges being pursued by successive governments has resulted in lopsided expansion of higher education, further aggravating the problem of unemployment in the state. The state already has 97 degree colleges, 68 in the government sector and 29 in the private sector, five Sanskrit colleges and 72 B.Ed colleges, which are far too many for the small state. These colleges churn out 50,000 qualified youth annually for whom there are hardly any jobs. Yet the government is keen on opening more colleges. Annual jobs available for graduates in the government sector are only around 5,000 and thus, over 40,000 persons are being added to the ranks of unemployed annually. The situation is worse in case of B.Ed, with the number of unemployed already exceeding 60,000 and 8,500 more are being added every year. The jobs available for them are less than 2,000, according to an official data.

Worse, the pass outs from these institutions are not employable in the industrial sector in which most of the jobs are being created of late. Out of the 8.61 lakh enrolled unemployed, 2.10 lakh are graduates and postgraduates. "While the pass outs from industrial training institutes and polytechnics are finding placement, degree holders are jobless". Unemployment problem will get worse progressively as the government plans to raise the gross enrolment ratio (GER) from the current 24, which is already higher than the national GER of 18 to 32 over the next 10 years under the Rashtriya Uchhtar Shiksha Abhiyan (RUSA).

National Teacher Award : National awards are conferred on individuals for providing outstanding service to the community in one field or the other. Such awards serve two objectives simultaneously *Firstly* they serve as inspiration to countrymen in their pursuit of excellence and *secondly* they infuse the sense of patriotism and commitment among citizens. It is, therefore, indispensable that the names of men and women, who receive these coveted awards, are recorded in the annals of history and they are–eulogized for posterity to be proud of its heritage. It was in 1958–59 that the thought of honouring teachers at the national level was first conceived and it was decided to celebrate 5th September, the birthday of Dr. S. Radhakrishan, the first Vice–President and second President of India, as Teachers' Day. Dr. K.L. Shrimali, then Union Education Minister was the originator of these awards.

Mess In Higher Education A Challenge: In the academic session 2011-12, 55 per cent of the sanctioned seats remained vacant. Of the 11, 592 seats, only 5,329 were filled. The Institute of Chartered Financial Analysts of India, University not admit any student for the last three sessions. It is obvious that the state does not require such a large number of universities and there is no feasibility there of. There are gross financial irregularities and statutes are

not being followed. The government should come out with an exit policy to close the universities which have flouted University Grants Commission (UGC) norms or which are un-viable instead of allowing those to indulge in malpractices.

The best course will be to convert some of those into off-campus centres of the Himachal Pradesh University (HPU) and the Central University. The gravity of situation can be judged from the fact that students have been admitted to various courses after clearing the class X examination in violation of UGC norms which clearly lay down that minimum qualification for admission to a university is class XII. Some universities have committed a fraud on hundreds of students as their degrees cannot be recognised. The government will not only have to take deterrent action against the erring institution, but find a way out to get their degrees recognised.

Institutions which do not have any postgraduate classes or qualified faculty have enrolled students for Ph.D. courses, which is in violation of UGC regulations. The Congress had made private universities a major issue and termed those as a ploy to allow outsiders to acquire huge chunks of land. Section 118 of the Land Reforms and Tenancy act debars non-agriculturists from acquiring land in the state without prior permission of the government. The charge stuck as the previous government did not follow any land norms. The authorities of the Armi University in Kangra district were allowed to acquire 624 bigha. It was acquired by former Haryana minister Gopal Kanda, who came into the limelight with the infamous Geetika Sharma suicide case.

On the other hand, the Sai University in Palampur was set up on just 52 bigha. The government should set up norms and acquire surplus land, which can be used to set up information technology parks, tourism ventures and environment-friendly projects to generate employment. The government must review the decision to open the Himachal Pradesh Technical University (HPTU) without feasibility. The new university, along with the upgrade of some affiliated institutions into private universities, has seriously undermined the financial position of the HPU. Engineering and management colleges affiliated to the HPU have now been affiliated to the HPTU, which is not viable. The HPTU has committed blunders by lowering standards to help private colleges get students and allowed admission without the All-India Engineering Entrance Examination.

The government also needs to review the B.Ed and nursing colleges which are not getting enough students to avoid malpractices. It should not hesitate in closing the institutions which lack the requisite infrastructure and staff so that the rest are financially viable. There is an urgent need to strengthen the State Private Educational Institutions Regulatory Commission, which had taken some steps to run in private universities. The relevant law should be amended and the enforcement of norms for all universities, including state ones, should be assigned to it. The HPTU have failed to enforce norms in affiliated institutions. This is evident from the fact that 40 per cent of the seats in

the 17 affiliated engineering colleges lying vacant despite by passing the entrance test.

The pass percentage of the first-semester examination as low as 11 per cent. Some polytechnic institutions even recorded zero per cent result. As the Leader of the Opposition, Vidya Stokes had said on record in the House that Himachal Pradesh had virtually become another Bihar due to the indiscriminate opening of private universities. Now that the Congress is in power, it is incumbent on its government to take all possible steps to stem the rot in higher education and salvage both the reputation of the state and the future of student.

First Yuva Red Cross: On 18th October 2008 RKMV Shimla became the first college of the state to have its own Red Cross Unit. The then governor Mr. V.S Kokje inaugurated the unit, with 10 students as executive member, principal Ms. Meera Valia as president and Dr. Saroj Bhardwaj as convener.

E. learning: Government Senior Secondary School Mundkhar (near Jahu), district Hamirpur became first government school to go digital on 6th September 2014. The students and teachers of this school can setup direct link with any school of the country through visual classroom and E. learning.

14

WILD LIFE IN HIMACHAL

"Walk in kindness toward the Earth and every living being. Without kindness and compassion for all of Mother Nature's creatures, there can be no true joy; no internal peace, no happiness. Happiness flows from caring for all sentient beings as if they were your own family, because in essence they are. We are all connected to each other and to the Earth."

— Sylvia Dolson

Forests in Himachal Pradesh, roughly occupay an area of 35,407 square kilometers. This accounts for about 63.5 per cent of the total geographical area of the State. The major portion of the trees in the forests are of Deodar, Kail, Chil, Spur, Oak, etc. The forests provide employment to nearly five lakh persons, and grazing facilities to about twenty lakh animals. The snowclad mountain ranges of the Himalayas extend from East to West. The areas above permanent snow line are bereft of vegetation, but the strip between the snow line and the tree is interspersed with rolling meadows and valleys.

The lower elevation support conifer forests of Pine, Spruce and Fir, while Oaks, Laurds, Chestnuts and Mangolias grow in moist localities and under favourable conditions. On drier slopes, the Chir Pine appears.Forest plantation is being carried out under productive forestry scheme and soil conservation schemes. The schemes include improvement of tree cover, raising nurseries for departmental Plantation and public destribution, pasture imporvenemt, fuel and fodder, minor forest produce, *sanjhi van yojna,* backward area sub-plan and soil and moisture conservation.

Because of unique geographical location and divergent climatic conditions, India has always a large variety of Wild Life. According to an estimate, in our forests there are about 359 species of mammals, 1,200 speciesof birds and 2,100 subspecies of birds and more than, 20,000 species of insects. In its diversity of life forms, India is the second largest country of the world. Archeological and historical records show that North–Western India was once very rich in flora and fauna. But due to unmindful attitude of foreign invaders, local rulers and growing population towards natural wealth many species are now facing extinction. The following reasons led to the decline of animals number:

— Capturing wild elephants and training them for use in wars;

— For improving efficacy of the armed forces, rhinos were killed for making shields with their skin;

— Tragic growth in the population;

— Indiscriminate cutting of forests for the development of agriculture, industry and other developmental projects; and

— Advent of deadly and more effective firearms to use against dumb animals.

In 1972, Government of India passed 'Wild Life (Protection) Act, 1972' to care and make it sure that no further loss occurs to our inherited natural wealth. This Act has been accepted by all the States and Union Territories of India except Jammu & Kashmir. This State has its own Wild Life Protection Act, which is essentially similar to the general Act. The Wild Life (Protection) Act of 1972 was promulgated out of a long–felt need to have a central legislation dealing not only with hunting, but also with the creation of protected areas, and control of trade in wild life products.

In Himachal Pradesh, no less than 31 preserves, some of them well over 100 sq. km in area are listed as sanctuaries in this comparatively small state. The sanctuaries are in the lower Himalayas and in the Shivalik range immediately below, where the climate is temperate and sub–tropical. Himachal Pradesh is known for its diversity of animal and bird habitat and wild population. The scheme aims at Improving the habitat and facilitating provision of areas (Sanctuaries and national park) so as to afford protection to the various species of birds and animals facing extinction. The Act was amended in January 2003 and punishment and penalty for offences under the Act have been made more stringent. The Ministry of Forest has proposed further amendments in the law by introducing more rigid measures to strengthen the Act. The objective is to provide protection to the listed endangered flora and fauna and ecologically important protected areas.

For offences relating to wild animals (or their parts and products) included in schedule-I or part II of Schedule- II and those relating to hunting or altering the boundaries of a sanctuary or national park the punishment and penalty have been enhanced, the minimum imprisonment prescribed is three years which may extend to seven years, with a minimum fine of Rs. 10,000/ -. For a subsequent offence of this nature, the term of imprisonment shall not be less than three years but may extend to seven years with a minimum fine of Rs. 25,000. Also a new section (51 - A) has been inserted in the Act, making certain conditions applicable while granting bail:

'When any person accused of the commission of any offence relating to Schedule I or Part II of Schedule II or offences relating to hunting inside the boundaries of National Park or Wildlife Sanctuary or altering the boundaries of such parks and sanctuaries, is arrested under the provisions of the Act, then not withstanding anything contained in the Code of Criminal Procedure, 1973, no such person who had been previously convicted of an offence under this Act shall be released on bail unless -

(a) The Public Prosecutor has been given an opportunity of opposing the release on bail; and

(b) Where the Public Prosecutor opposes the application, the Court is satisfied that there are reasonable grounds for believing that he is not guilty of such offences and that he is not likely to commit any offence while on bail.

In order to improve the intelligence gathering in wildlife crime, the existing provision for rewarding the informers has been increased from 20% of the fine and composition money respectively to 50% in each case. In addition to this, a reward up to Rs. 10,000/- is also proposed to be given to the informants and others who provide assistance in detection of crime and apprehension of the offender. At present, persons having ownership certificate in respect of Schedule I and Part II animals, can sell or gift such articles. This has been amended with a view to curb illegal trade, and thus no person can now acquire Schedule I or Part II of Schedule II animals, articles or trophies except by way of inheritance (except live elephants).

Stringent measures have also been proposed to forfeit the properties of hard-core criminals who have already been convicted in the past for heinous wildlife crimes. These provisions are similar to the provisions of 'Narcotic Drugs and Psychotropic Substances Act, 1985'. Provisions have also been made empowering officials to evict encroachments from Protected Areas.

WILD LIFE SANCTUARIES AND PARKS IN HIMACHAL PRADESH

Himachal Pradesh has rich flora and fauna. There are three national parks and twenty–eight sanctuaries found in Himachal Pradesh. Since 1972, all parks and sanctuaries in the state are being set up under the Wild Life (Protection) Act, 1972. Prior to this, areas were declared sanctuaries under the Punjab Wild Birds and Wild Animals Act, 1933 or the Himachal Pradesh Wild Birds and Wild Animals Protection Rules, or under both of these. Ordinarily, all those areas that were set up as National Parks or Sanctuaries under any earlier Act would automatically becomes national parks or sanctuaries under the Wilds Life (Protection) Act, 1972, (Section 16 (3). The total area under national parks is 1,29,500 hectares which is 2.33% of the State area. The total area under both categories of protected area is 3,94,788.65 hectares covering 7.10% of the state area. This is over double the percentage of the area under national parks and sanctuaries in India as a whole (3.3%). Himachal Pradesh has following areas declared as national parks and sanctuaries:

THE GREAT HIMALAYAN NATIONAL PARK

(WORLD HERITAGE PARK)

(District Kullu, altitude 1500 meters to 5805 meters). The Great Himalayan National park consists of the upper catchment areas of the *Tirthan*, *Sainj* and *Jiwa* rivers, which flow westwards and feed the Beas River. Though *"large scale fellings in easily accessible areas"* were carried out during the second World War, the area is one of the least disturbed in the state. It, therefore, consists of relatively good forests and meadows, which support an extremely diverse wild life population. This includes the largest remaining population of Himalayan '*tahr*' in Himachal Pradesh. The park is also one of the only two places in India, where anything more than a remnant population of '*western tragopan*' is known to survive.

Total area occupied by the Great Himalayan National Park is 62,000 hectares (620 sq. km). Part of the present area (8,396 hectares) was declared sanctuary (Tirthan) on 17th June 1976. On 1st March 1984, The Great Himalayan National Park was set up. In 1999, the government of India gave it the status of National park formally. Besides the Tirthan sanctuary (8,396 hectares) which is the part of National Park, it is also bordered by Pin valley National Park on the North East, Kanawar sanctuary on the North–West and Rupi Bhaba Sanctuary to the east; all these together constitute Himachal Pradesh's largest protected wild life region. In 2013 Sainj and Tirthan sanctuaries were merged with this park and so its area went upto 906 sq.km. At present (2014) the total area of the park is 1171 sq.km.

FAUNA: Mammals – Himalayan Black Bear, Brown Bear, Jungle Cat, Leopard Cat, Himalayan Palm Civet, Barking Deer, Musk Deer, Red Fox, Goral, Ibex, Jackal, Langur common or Hanuman, Leopard, Snow Leopard, Rhesus Macaque Himalayan yellow throated Marten, House Mouse, Himalayan Mouse–hare, Serow, Blue Sheep, Grey Shrew, Himalayan Water Shrew, Squirrel Kashmiri Flying and Common Giant Flying. Himalayan Tahr, Royle's vole, Himalayan Weasel and Wolf. There are about 354 varieties of birds , insects, animals and other living being in this park.

REPTILES: Viper and Himalayan Pit.

Locally threatened species–Snow Leopard, Musk Deer, Serow, Blue Sheep, Ibex, Wolf, Leopard, Western Tragopan and Chir Pheasant.

FLORA: Forest types include–Ban–Oak, Moist deodar, mixed coniferous. Montane Bamboo Brakes and Temperate Pastures.

On 23rd June 2014 The Great Himalayan National Park was declared world natural heritage by United Nations Educational, Scientific and Cultural Organization (UNESCO) at its 38th session held at Doha(Capital City of Qutar). In 2013, at Cambodia it was nominated by the Indian Government for the world heritage status. This is the 11th Natural site of India to get the status of world Natural heritage. In total uptill now 38 Indian

locations have got the status of world heritage. The park has 805 kinds of plants, trees and wild life, 209 species of birds, 230 species of butterfly, 250 species of herbs, 125 species of insects and 35 species of other wild life.

The main benefits of being declared world natural heritage would be-

- Recognition at world level
- Impetus to tourism
- Additional budget for the protection of wild life and natural wealth
- Protection to endangered species
- Increase in employment opportunities.

PIN VALLEY NATIONAL PARK

Lahaul–Spiti, altitude 3,300 to 6,632 meters, temperature 19.7° to 26.8°C, mean annual rainfall 170.3 mm. A high altitude Pin Valley National Park containing a variety of rare animals such as the woolly hare, Tibetan gazelle and snow leopard. The entire area is a cold desert, interspersed with a few alpine meadows. There is a heavy pressure on the meadows by the seasonal influx of livestock of migratory graziers. It was declared a National Park on *9th January 1987.* It occupies an area of 67,500 hectares (67.5 sq. km.)

FLORA: Forest types found include, Dry Alpine, Scrub and Dwarf Juniper Scrub.

FAUNA (Mammals): Red Indian Fox. Tibetan Gazelle Woolly Hare. Snow Leopard, Himalayan Marmot, Himalayan Mouse-hare, Indian Hodgsoris Porcupine, Blue Sheep and Wolf.

BANDLI SANCTUARY

Mandi district, altitude 762 to 2160 meters, temperature 1° to 35°C. mean annual rainfall 1524.2 mm. A heavily disturbed sanctuary with a small population of Chir pheasant and Leopard. The area was earlier a protected forests. It was first notified in 1962 and renotified on 27th March 1974. occupying an area of 4133 hectares (4.33 sq. km). It is seven kilometers from Sundernagar town.

FLORA: Forest types include, Himalayan sub–tropical pine forest, Ban oak forest and Chir Pine forests.

FAUNA (Mammals): Himalayan Black Bear, Common Palm Civet, Himalayan Palm Civet, Barking Deer, Goral, Indian hare, Common Langur, Leopard, Himalayan yellow throated Marten. Rhesus Macaque, Common Mongoose and Indian Porcupine.

CHAIL SANCTUARY

In districts Solan and Shimla, area 10,854.36 hectares (108.54 sq. km), altitude 701 to 2180 meters, temperature 4° to 28°C, mean annual rainfall 1602.7 mm, notified a sanctuary on 21st March 1976. Nearest town other than Chail is Shimla.

Formerly a private game reserve of the erstwhile Maharaja of Patiala, it is

now heavily degraded. Yet it contains one of the world's most significant population of the greatly threatened '*Chir Pheasant*' as well as a herd of European Red Deer, introduced in the first half of the 20th century by the former Maharaja of Patiala.

FLORA: Forest type found in the sanctuary include Himalayan sub–tropical pine forests, Ban oak forest and Moru Oak forest. The dominant forest tree is the white or Silver Oak. Mixed at lower altitude with Chil Pine. Tree Rhododendron forms pure stands in a few places and Deodar trees have been sown in some areas.

FAUNA (Mammals): Himalayan Black Bear, Indian Wild Bear, Leopard Cat, Barking Deer, Red Deer, Goral, Indian Hare, Common Langur, Leopard, Rhesus Macaque, Himalayan Yellow Throated Marten, Indian Porcupine, Sambar, Common Giant and Kashmiri Flying Squirrel. Locally threatened species are–Leopard, Chir Pheasant and Red Deer. A chir pheasant breeding and rehabilitation programme was stated in 1988.

CHURADHAR SANCTUARY

District Sirmaur and Shimla, altitude 2000 to 3647 meters, total area 5615 hectares (56.15 sq. km.) and notified a sanctuary on 15th November 1985 and the nearest town is Nohra.

One of the state's newest sanctuaries, Churadhar has amongst the last good stretches of forest left in Southern Himachal Pradesh. In the past, it was the stronghold of Musk Deer, now at the point of local extinction, Churadhar still contains good habitat for Monal and other pheasants. The sanctuary gets its name from Chur peak, on the top of which sits a majestic statue of Lord Shiva commanding a breathtaking view of the valleys and forests below.

FLORA: Forest types include, western mixed coniferous forests, Khasru Oak forest and Alpine forests. Deodar and Oak are the famous species.

FAUNA (Mammals): Himalayan Black Bear, Indian Wild Bear, Barking Deer, Musk Deer, Goral, Common Langur, Leopard, Rhesus Macaque, Himalayan Mousehare and Indian Porcupine. Musk Deer has been severely depleted by hunting.

DARANGHATI SANCTUARY

District Shimla, altitude 2,100 to 3,315 meters, temperature 8° to 17° C, mean annual rainfall 750 mm, first notified in 1962 and renotified on 27th March 1974, total area 16,740 hectares (167.40 sq. km.) and the nearest town is Rampur Bushahr. This sanctuary forms an important habitat for Musk Deer, Himalayan Tahr and Pheasants. The area was earlier a hunting reserve of the former Raja of Bushahr state. The sanctuary is in two segments, with villages and cultivated area in between. Animal movement takes place over snow clad peaks into the Rakchhan Chitkul sanctuary in the South–East and Talra sanctuary in the South.

FLORA: Forest types include, Ban Oak forest, Moist Deodar forest west-

ern mixed Coniferous, moist temperate Deciduous, Kharsu Oak, dry broad leaved and coniferous, dry temperate coniferous and Himalayan subalpine forests.

FAUNA (Mammals): Himalayan Black Bear, Brown Bear, Himalayan Palm Civet, Barking Deer, Musk Deer, Flying Fox, Goral, Indian Hare, stripped Hyena, Himalayan Ibex, Leopard, Himalayan yellow throated Marten, Serow, Blue Sheep, Common giant flying Squirrel, Himalayan Tahr and Himalayan Weasel. Locally threatened species are–Himalayan Tahr and Western Tragopan.

DARLAGHAT SANCTUARY

District Solan and Bilaspur, altitude 1075 to 2069 meters, temperature 1° to 30°C, rainfall 1040 mm, area 9226.80 hectares (92.27 sq, km.) nearest town Shimla, first notified a sanctuary in 1962 and renotified on 27th March 1974. A heavily disturbed area with some small population of Kaleej pheasant and Chukor patridge. Much of the area is under cultivation. Majathal Sanctuary adjoins the North–East boundary.

FLORA: Forest types include Tropical Euphorbia Scrub and Ban Oak Forests.

FAUNA (Mammals): Indian wild Bear, Himalayan Palm Civet, barking deer, red Indian Fox, Goral, Indian Hare, Jackal, Leopard, marten and Indian Porcupine. Locally threatened species are Chukor Partridge and Barking Deer.

GAMGUL SIAHBEHI SANCTUARY

District Chamba, altitude 1800 to 3919 meters, temperature 10° to 35°C, rainfall 1430.2 mm, annual snowfall 1143 mm, area 10,885.40 hectares (108.85 sq. km), first notified in 1949 and renotified on 27th March 1974. A high altitude sanctuary harbouring small population of musk Deer, Himalayan Tahr and Pheasants. This is the only sanctuary in Himachal Pradesh which has reported the presence of *Kashmir Stag.* The sanctuary is under severe human pressure and is heavily grazed. Nearest town is Chamba.

FAUNA (Mammal): Himalayan black Bear, brown Bear, Jungle Cat, Leopard Cat, Goral Cat. Ibex, Jackal, Common Langur, Leopard, Rhesus Macaque, long tailed Marmet, Himalayan yellow throated Marten. Himalayan mouse–hare, Himalayan Palm Civet, barking Deer, Musk Deer, Red Fox, Indian Porcupine, Indian bush Rat, Serow, Common Giant Flying Squirrel, Kashmir Stag. Himalayan Tahr, Royle's Vole, Himalayan Weasel and Wolf.

GOVIND SAGAR SANCTUARY

District Bilaspur and Mandi, altitude 350 to 500 meters, temperatures 2° to 45°C, rainfall 1,155 mm, nearest town Bilaspur, area 10,034 hectares (100.34 sq. km.), first notified a sanctuary on 5th December 1962, renotified on 27th March 1974, controlled by the Bhakhra Management Board. The sanctuary is constituted out of the Bhakhra Dam reservoir and forms a habitat for

several species of fish and a winter refuge for migratory waterfowl. The area adjoining the South–West boundary of the reservoir has been notified as the Naina Devi Sanctuary.

FLORA: Primarily wet land. Forest types on the periphery include Northern Dry Mixed Deciduous forest.

FAUNA (Fish): Singhara, Chilwa, Catla, Jhalli, Mrigal, Grass crap. Miror crap, Topra, Silver crap, Beta, Gid, Kuni rohu, Guj, Ticto, Sarena, Gungli and Masheer.

KAIS SANCTUARY

District Kullu, altitude 2,800 to 3,680 meters, temperature –5° to 30° C, annual rainfall is 1071 mm, nearest town Kullu, area 1419.03 hectares (14.19 sq. km), notified a sanctuary on 26th February 1954 under the Punjab Wild Birds & Wild Animals Protection Act, 1933. This small heavily disturbed sanctuary reportedly harbours population of the endangered musk Deer, as well as of several species of pheasants. It includes part of the catchment of the Kais Nala, and important tributary of the Beas River.

FLORA: Maple, Fir, Deodar, Poplar, Rai and Walnut.

FAUNA (Mammals): Himalayan black Bear, brown Bear, Musk Deer, Leopard, blue Sheep, Kashmiri and Common giant flying Squirrels and Himalayan Tahr.

KALATOPE KHAJJIAR SANCTUARY

District Chamba, altitude 1185 to 2768 meters, temperature– 10° to 35°C, rainfall 2647.68 mm, nearest town Dalhousie, area 2026.89 hectares (20.27 sq. km.), notified a game sanctuary on 1st July 1949, renotified on 29th August 1958 under the Indian Forest Act 1927 and the Punjab Wild Birds & Wild Animals Protection Act, 1933 notified once again on 14th December 1982. This small sanctuary lies in the catchment of the Ravi river and contains patches of good coniferous and oak forests. A lovely bowl–shaped meadow at Khajjiar, with a lake and '*floating*' Island is a popular tourist spot.

FLORA: Mixed blue pine and Deodar forest with some green oak and tree rhododendron

FAUNA (Mammals): Himalayn black Bear, Leopard Cat, barking Deer, Goral, Jackal, Langur, Leopard, Marten, Serow, Kashmiri and Common giant flying Squirrel.

KANAWAR SANCTUARY

District Kullu, nearest town Mani Karan, altitude 1800 to 4833 meters, temperature–10° to 25°C, annual rainfall 1000 mm, snowfall 321 mm, area 6070 hectares (60.7 sq. km), first notified a sanctuary on 26th February 1954 under the Punjab Wild Birds and Wild Animals Protection Act, 1933. A high altitude sanctuary, mostly to precipitous with rocky cliffs and narrow valleys. It is famous for one of the India's largest remaining popu-

lation of Himalayan Tahr.

FLORA: Forest types include, Ban–oak, Moist Deodar, mixed Coniferous temperate Deciduous, Kharsu Oak, sub–Alpine Fir, and Alpine Pastures.

FAUNA (Mammals): Himalayan black Bear, brown Bear, Jungle Cat, Himalayan Palm Civet, barking Deer, Red Fox, Goral, Ibex, Jackal, common Langur, Leopard, snow Leopard, Marten, Rhesus Macaque, Himalayan Mouse Hare, Indian Porcupine, Serow, Squirrels, Himalayan Tahr, Himalayan Weasel and Wolf.

KHOKHAN SANCTUARY

District Kullu, altitude 1500 to 2787 meters, temperature –5° to 28°C, rainfall 850 mm, snowfall 330 mm, nearest town Bhunter, total area 1405 hectares (14.05 sq. km), notified a sanctuary on 26th February 1954 under the Punjab Wild Birds & Wild Animals Act, 1933. This sanctuary is home for one of the largest reported diversity of mammals in Himachal Pradesh, including endangered species like the Himalayan Tahr and Musk Deer. Khokhan sanctuary is unfortunately heavily disturbed by humans and livestock. It is connected to Nagra sanctuary in the South West, across the Bagi Dhar. Wild animals are reported to move between the sanctuaries across this ridge.

FLORA: Forest types include moist deodar, moist temperate deciduous forest and Kharsu oak forest.

FAUNA (Mammals): Himalayan black Bear, Jungle Cat, Himalayan Palm Civet, barking Deer, Red Fox, Goral, Jackal, Common Langur, Leopard, Marten, Rhesus Macaque, Porcupine, blue Sheep, Squirrels, Himalayan Tahr, Himalayan Weasel and Wolf.

KUGTI SANCTUARY

District Chamba, altitude 2,250 to 6,044 meters, temperature –10° to 25°C, rainfall 445 mm, area 37,886.68 hectares (378.87 sq. km), nearest town Chamba, first notified in 1962 as a sanctuary and renotified on 27th March 1974. This sanctuary is rich in high altitude Himalayan Wild life, and is one of the last homes of Himalayan Tahr in Himachal Pradesh. It is also well known as a source of many medicinal plants. Abundant water resources, many originating from glaciers and a diverse topography adds to the attraction of the area. To the west it is connected with Tundah Sanctuary by a forest corridor. There is an annual pilgrimage by thousands of people to the Mani Mahesh temple inside the sanctuary.

FLORA: Forest types include, moist deodar forest, western mixed coniferous and Alpine pastures.

FAUNA (Mammals): Himalayan Black Bear, Brown Bear, Leopard Cat, musk Deer, Red Indian Fox, Goral, Ibex, Common Langur, Leopard Marten, Himalayan, Serow and Himalayan Tahr.

Species believed to be locally threatened are Serow, must Deer, Ibex Hi-

malayan brown Bear, Monal Pheasant, Himalayan Tahr and Chir Pheasant. Species believed to be locally threatened are Serow, musk Deer, Ibex, Himalayan brown Bear, Monal Pheasant, Himalayan Tahr and Chir Pheasant.

LIPPA ASRANG SANCTUARY

District Kinnaur, altitude 4,000 to 5,022 meters, temperature –10° to 15°C, mean rainfall 226.3 mm, nearest town Morang, area 3,089.90 hectares (30.89 sq. km.), first notified a sanctuary in 1962 and renotified on 27th March 1974. This sanctuary is located on the high altitude area and one of the fewest in India from where the yak has been reported, though it may well be feral. Musk Deer and Ibex are also present. The area is largely flat. Like a huge plateau, and a part of it is barren cold desert. This sanctuary is among the few in Himachal Pradesh, which is not open to tourists.

FLORA: Forest types include lower western Himalayan temperate forest, upper western Himalayan temperate forest, Kharsu oak forests, dry broad leaved and coniferous forest, dry coniferous forest, dry alpine scrub and dwarf juniper scrub.

FAUNA (Mammals): Himalayan back Bear, Musk Deer, Goral, Ibex, Leopard, blue Sheep and Yak.

Species believed to be locally threatened are musk Deer, Leopard, Goral brown Bear, Ibex, Monal and Himalayan snow cock. The Yak may be feral.

MAJATHAL SANCTUARY

District Solan and Shimla, altitude 900 to 1966 meters, temperature–1° to 29°C, mean annual rainfall 1040 mm, nearest town Shimla, area 3,938.86 hectares (39.39 sq. km.), first notified as a sanctuary in 1962 and renotified on 27th March 1974. This oak forest area is located in the catchment of the Satluj River and contains typical low altitude western Himalayan flora and fauna. Studies have established this sanctuary to be possible "*the single most important locality for chir pheasant in the world*".

FLORA: Only Ban Oak forest.

FAUNA (Mammals): Himalayan black Bear, Indian wild Bear, jungle Cat, Common Palm Civet, Himalayan Palm Civet, Barking Deer, goral, jackal, Common Langur, Leopard, Rhesus Macaque, Himalayan yellow throated Marten and Sambar. A species believed to be locally threatened is the Chir pheasant.

MANALI SANCTUARY

District Kullu, altitude 2,273 to 5,173 meters, temperature –4° to 30°C, rainfall 1,080 mm, nearest town Manali, area 3,180 hectares (31.80 sq. km.), notified a sanctuary on 26th February 1954 under the Punjab Birds and Wild Animals Protection Act, 1933. The sanctuary forms part of the catchment of Manalsu Nala, an important tributary of the Beas river, The higher reaches are good habitat for Pheasants, Musk Deer and Ibex. Gujjars and Gaddis cause

great disturbance to this sanctuary. There are some lovely Alpine meadows carpeted with a variety of wild flowers. Beas Kund, the source of Beas river, is located just north of the sanctuary, and the Pir Panjal range along with its western boundary.

FLORA: Forest types include Ban oak, moist Deodar forest, mixed coniferous moist temperate deciduous and Kharsu oak forest.

FAUNA (Mammals): Himalayan black Bear, Brown Bear, jungle Cat, Himalayan Palm Civet, Barking Deer, Musk Deer, Indian Fox, Goral, Ibex, common Langur, Leopard, snow Leopard, Iynx, Rhesus Macaque, Himalayan yellow throated Marten, Indian Porcupine, Serow Kashmir flying Squirrel and Himalayan Tahr.

Locally threatened species are–Chir pheasant, Musk Deer, Ibex, Serow, Western Tragopan and Iynx.

NAINA DEVI SANCTUARY

District Bilaspur, altitude 500 to 1,019 meters, temperature –2° to 40°C, annual rainfall 1,155 mm, nearest town Nangal (Punjab), area 12,268 hectares (122. 68 sq, km.), first notified a sanctuary on 5th December 1962 and renotified on 27th March 1974. This sanctuary is located in the inner Shivaliks, harbours flora and fauna more akin to that found in the forests of the northern plains of India than in the Himalayas. It adjoins the Govind Sagar sanctuary to the North–East and its North–West boundary is close to the Bhakra Dam.

FLORA: Forest types include, Northern by mixed deciduous, Shivalik chir pine and dry bamboo brake forests.

FAUNA (Mammals): Indian wild Bear, jungle Cat, Indian Fox, Ghoral, Indian hare, Jackal, Common Langur, Leopard, Rhesus Macaque, Himalayan yellow throated Marten, Common Mongoose, Indian porcupine Sambar, Serow and common giant flying Squirrel.

REPTILES: Indian Cobra, North house Gecko, common Indian Krait, Common Indian monitor and common Rat snake.

NARGU SANCTUARY

District Mandi, altitude 970 to 4,034 meters, temperature –5° to 20°C, rainfall 1,380 mm, nearest town Mandi, area 27,837 hectares (278.37 sq. km.), first notified a sanctuary in 1962 under the Punjab Wild Birds and Wilds Animals Protection Act, 1933, and renotified on 27th March 1974. This sanctuary has a heavily degraded area which has only a few good patches of wild life habitat left in its higher, inaccessible reaches. This sanctuary is among the most densely populated sanctuaries in Himachal Pradesh. Towards the South–East, it adjoins Khokhan sanctuary.

FLORA: Forest types include sub–tropical pine, Ban oak, Moru oak, Moist Deodar, western mixed coniferous, moist temperate deciduous, Kharsu oak and sub Alpine forests.

FAUNA (Mammals): Black Bear, Brown Bear, Himalayan Palm Civet, Barking Deer, Goral, Indian hare, Common Langur, Leopard, Rhesus Macaque, Himalayan yellow throated stone Marten, Indian Porcupine common giant flying Squirrel and Himalayan weasel.

SECHU TUAN NALA SANCTUARY

District Chamba, altitude 2,550 to 6,072 meters, temperature –20° to 27°C, rainfall 500 mm, nearest town Chamba, area 10,295 hectares (102.95 sq. km.), first notified a sanctuary in 1962 and renotified on 27th March 1974. This sanctuary is located on a very high altitude, with significant population of Ibex, Musk Deer and pheasant. Snow Leopards are also reported from here.

FLORA: Forest types include, lower western Himalayan temperate, Moist Alpine scrub and dry Alpine forests. Species of medicinal interest found in the sanctuary include Aconitum heterophyllum, jurinea morcocephal and epherdra gerardiana.

FAUNA (Mammals): Brown Bear, Himalayan black Bear, Jungle Cat, Musk Deer, Goral, Ibex, Common Langur, Snow Leopard, Markhor, Himalayan mouse–Hare, Serow, Blue Sheep and Himalayan Tahr.

SHIKARI DEVI SANCTUARY

District Mandi altitude 1800 to 3359 meters, temperature –10° to 30°C, rainfall 1,038 mm, nearest town Sundernagar, area 7,200 hectares (72 sq. km.), first notified a sanctuary in 1962 and renotified on 27th March 1974. This sanctuary is named after the goddess Shikari Devi, to whom a temple situated within the sanctuary is dedicated.

FLORA: Forest types include Ban Oak, Western Mixed Coniferous, Kharsu oak, West Himalayan upper oak, Moist temperate deciduous forest, Sub Alpine and Alpine pastures.

FAUNA (Mammals): Himalayan black Bear, Cat Leopard, Himalayan Palm, Civet, barking Deer, musk Deer, Goral, Common Langur, Leopard, Snow Leopard, Marten, Indian Porcupine, Kashmir flying and common Squirrel.

SHILLI SANCTUARY

District Solan, altitude 1,230 to 1,845 meters, temperature –4° to 30°C, rainfall 1,150 mm. Nearest town Solan, area 213.3 hectares (2.13 sq. km.), first notified as a sanctuary in 1963 and renotified on 27th March 1974. ***This is the smallest sanctuary in Himachal Pradesh.*** Being located within a thickly populated area, it is highly disturbed, but has one of the last stretches of oak in the area. It was earlier a protected forest.

Flora: Forest types include Northern tropical dry deciduous forest and Ban oak forest.

Fauna (Mammals): Barking Deer, Goral, Indian hare, Jackal, Common Langur, Leopard, Marten and Indian Porcupine.

SHIMLA WATER CATCHMENT SANCTUARY

District Shimla, altitude 1,900 to 2,620 meters, temperatures –5.4° to 32°C, rainfall 1,600 mm, nearest town Shimla, area 1,025.3 hectares (10.25 sq. km), first notified as a sanctuary on 29th July and renotified on 4th December 1982. This is one of the few sanctuaries in Himachal Pradesh free from habitation, this area has been preserved since the 19th century as the catchment area providing water to Shimla town. It was earlier the part of the Koti State and came under the State control in 1947–48. It has perhaps the highest density of '*Kokloas pheasant*' among the State's national parks and sanctuaries.

Flora: The vegetation consists predominately of temperate coniferous forest, dominated by Deodar and mixed at lower elevations with white oak and patches of chir pine, and at higher elevations with blue pine, green oak and spruce.

Fauna (Mammals): Leopard Cat, Barking Deer, Musk Deer, Goral, Common Langur, Leopard, Rhesus Macaque, Marten, Indian Porcupine, Sambar and Squirrel.

SIMBALBARA NATIONAL PARK

District Sirmaur, altitude 400 to 600 meters. Temperature 10° to 46°C, rainfall 1,260 mm, nearest town Paonta Sahib. Area 1,903 hectares (19.03 sq. km.), first notified as sanctuary on 8th February 1958 and renotified on 27th March 1974. This sanctuary is located in Paonta valley. The area was earlier a hunting preserve of the former Maharaja of Sirmaur; historical records indicate the presence of elephant in the past. It is believed that the hydel channel at Haridwar barrage cut off the migratory route of elephants. It was declared National Park in 2013.

Flora: Forest types found here include moist sal Bearing.

Fauna (Mammals): Indian wild Bear, Leopard Cat, Barking Deer, Spotted Deer, Goral, Indian hare, Jackal, Common Langur, Leopard, Rhesus Macaque, Indian pangolin, Sambar and Tiger.

REPTILES: Common Indian monitor and Indian Python.

TALRA SANCTUARY

District Shimla, altitude 1,500 to 3,324 meters, temperature –7° to 28°C, rainfall 874.5 mm, nearest town Jubbal, area 4,093.31 hectares (40.49 sq. km), first notified in 1962 and renotified on 27th March 1974. This sanctuary was formerly a popular hunting spot and continuous to have human pressure in the form of hunting spot and in the form of commercial logging and grazing. Only a few good patches of wildlife habitat reportedly remain, primarily in steep and inaccessible areas, still harbouring a population of musk Deer and five species of pheasants.

FLORA: Forest types include lower western Himalayan temperate and west Himalayan upper oak/fir forests.

FAUNA (Mammals): Himalayan black Bear, barking Deer, musk Deer, Goral, common Langur and Leopard.

TIRTHAN SANCTUARY

District Kullu, altitude, 2,100 to 4,875 meters, temperature –5° to 30°C, rainfall 1,500 mm, area 6,112.98 hectares (61.13 sq. km), nearest town Banjar, notified a sanctuary on 17th June 1976. This high altitude sanctuary is quite rich in floral and faunal species. The northern part of the sanctuary now has been included in the Great Himalayan National Park.

FLORA: Forest types include ban oak, moist Deodar, Western mixed coniferous, Moist temperate deciduous, Kharasu oak and Apline pastures.

FAUNA (Mammals): Brown and Himalayan black Bear, Jungle cat, barking and musk Deer, red Indian Fox, Goral, Ibex, Jackal, common Langur, Leopard, snow Leopard, Rhesus Macaque, Marten, Mouse– Hare, Porcupine Indian, Serow, Blue Sheep, Squirrel, Himalayan Tahr, Himalayan Weasel and Wolf.

TUNDAH SANCTUARY

District Chamba, altitude 2, 074 to 5,532 meters, temperature –10° to 30°C, rainfall 800 mm, area 6,422.08 hectares (64.22 sq. km), nearest town Chamba, first notified as a sanctuary in 1962 and renotitfied on 17th September 1975. This sanctuary is located on high altitude and keeps variety of flora and fauna.

Flora: Forest type includes moist deodar, western mixed coniferous, moist temperate deciduous and alpine pastures.

Fauna (Mammals): Brown and Himalayan black Bear, Jungle Cat, Himalayan and Common Palm Civet, Barking and Musk Deer, Red Fox, Goral, Ibex, Jackal, common Langur, Leopard, Rhesus Macaque, long tailed Marmot, Yellow Throated Himalayan Marten, Himalayan Hare–Mouse, Indian Porcupine, Indian bush Rat, Grey Shrew, Squirrel, Serow, Himalayan Tahr, Royale's Vole, Himalayan Weasel and Wolf.

PONG LAKE SANCTUARY

District Kangra, altitude 335.14 to 435.16 meters, temperature 5.6° to 44.3°C rainfall 1,780 mm, nearest town Dehra–Gopipur, area 30,729 hectares (307.29 sq. km.), notified as a sanctuary on 1st June 1983. The Pong lake was created in 1976 by damming the Beas river. This reservoir attracts a large number of migratory water birds and is the only place in India where the rare *'Red necked grebe'* has been recorded. The lake contains "*one permanent island and several others that are intermittently connected to the shore*".

FLORA: The sanctuary is a wetland. Forest types include dry deciduous scrub, dry bamboo and Himalayan pine forest.

FAUNA (Mammals): Indian Wild Bear, Barking Deer, Red Indian Fox, Indian hare, Hedgehag long eared, Jackal, Common Langur, Rhesus Macaque,

3. Location maps of National

Mongoose, Nilgai, Indian Porcupine and Sambar.

REPTILES: Indian Cobra, Book's Gecko Common Indian monitor and Indian Python.

FISH: Tor Putitora (Masheer), Wallago Attu (Mallip) and Ophiocaphalus Marulius (soal).

RAKCHHAM CHITKUL SANCTUARY

District Kinnaur, altitude 3,200 to 5,486 meters, temperature –10° to 15°C, rainfall 463.9 mm, snowfall 1,129.7 mm, nearest town Kalpa, area 3,411 hectares (34.11 sq. km), first notified in 1962 and renotified on 27th March 1974. This sanctuary is located at high altitude and is good habitat for the endangered Musk Deer, 'Govind Pashu Vihar sanctuary', in Uttrakhand, falls adjacent to its southern boundary and little beyond the eastern boundary of the sanctuary lies the Tibetan Plateau of China.

FLORA: Forest types included lower western Himalayan temperate, upper western Himalayan temperate, dry Broad leaved coniferous, dry temperate coniferous and dry alpine scrub.

FAUNA (Mammals): Himalayan Black Bear, Brown Bear, Musk Deer, Goral, Leopard and Blue Sheep.

FISH: Brown trout.

RENUKA SANCTUARY

District Sirmaur, altitude 200 to 887 meters, temperature 1° to 45°C, rainfall 2,000 mm, nearest town Dadahu, area 402.80 hectares (4.03 sq. km.), first notified on 22nd July 1964 under Punjab Wild Life Act, 1933 and renotified on 25th March 1987. One of the smallest sanctuaries in Himachal Pradesh, more famous as pilgrimage spot and for its lion safari, than for wild life: one of the memorable sights here is that of hundreds of huge fish jumping and darting in and above the water to catch the food mossels thrown to them by the pilgrims.

FLORA: Forest types include northern dry mixed deciduous and dry deciduous scrub forest.

FAUNA (Mammals): Himalayan Black Bear, Jungle Cat, Himalayan Palm Civet, Barking Deer, Goral, Indian hare, Jackal, Common Langur Leopard, Rhesus Macaque, Indian Porcupine and Sambar.

FISH: Tor putitora (Masheer), cyprinus carpio (Mirror Crap), mastacmbelus armatur (Guj) and ophiocapharus marulius (Seul).

REPTILES: Indian Cobra, Indian Python and common Ratsnake.

RUPI BHABA SANCTUARY

District Kinnaur, altitude 909 to 5,650 meters, temperature–10° to 20°C, rainfall 45 mm, snowfall 300 mm, nearest town Rampur Bushahr, first notified a sanctuary on 28th March 1982 and renotified on 30th June 1982.

A remarkably wide variation in altitudes supports a large diversity of habitats and wild life in this catchment area of the Satuj river. The Great Himalayan and Pin Valley National Parks are located on its western and northern boundaries, respectively. Sanjay Vidyut Hydel Scheme is a great threat to the sanctuary. To counter the threat of power project, afforestation has been done on a large scale.

Flora: Forest types include lower Western Himalayan Temperate, Kharsu Oak, Dry Broad Leaved Coniferous, Dry Temperate Coniferous and Alpine pastures.

Fauna (Mammals): Brown Bear, Himalayan black Bear, barking and musk Deer, red Fox, Goral, Ibex, Leopard, snow Leopard, Serow, blue Sheep and Himalayan Tahr.

Western Tragopan : Not satisfied with having made all kinds of birds, the gods took time off to create the Western Tragopan. The unparalleled beauty of the Tragopan, comes from a feather each contributed by all the bird species that exist and offered to the gods to clothe this beautiful monarch among birds, speak the legends of Kullu Valley.

The male bird's flame-red breast, a scarlet face and nape with a spiky black crest, crowns it with majesty. A bright starlike white spot in the middle of each black feather of the belly and the dark wings give it grandeur. In contrast the female is a dull brown.

The Western Tragopan inhabits a relatively small range in the Western Himalayas. As a region specific specie, perhaps the maximum sighting anywhere of this rare bird in recent times have been reported in Himachal Pradesh by renowned bird watchers of the world. In the State, this bird has been sighted in the higher reaches of Beas valley in Kullu, the Chenab and Ravi valleys in Chamba and parts of Satluj valley in the upper Shimla hills and Kinnaur regions.

The tragopan prefers to dwell in a limited variety of vegetation consisting mainly of coniferous, broadleaf, deciduous or mixed forests with ringal bamboo, in moist temperate and sub alpine zones.

In other places, tragopan sighting have been recorded from parts of western Uttrakhand, the higher reaches in Kashmir on both sides of Indo-Pak line of control and in the North-Western Frontier Province of Pakistan.

Biologically named Tragopan melano-cephalus, the Western Tragopan, belongs to a highly specialized group of pheasants of the *Phasianidae* family. In all five species of tragopans are known to occur the world over-of which four are found in India and one in China. In the Indian region itself, it is one of the sixteen species of pheasants which are considered as threatened and endangered.

Beauty doth provoke thieves faster than gold and so has the Western Tragopan been a victim of its spectacular looks. Hunted down the ages for its

plumes and bright feathers, to an extent that today it figures in the red book of animals and birds that are on the verge of extinction around the world.

International conservation efforts have helped to establish the Great Himalayan National Park in the Beas valley of Kullu as a safe sanctuary for the Western Tragopan. Encompassing the Parvati, Jiwa Nal, Sainj and Tirthan Valleys of Kullu region, the Himalayan Park today probably has the largest concentration of tragopan population anywhere. A breeding centre at Sarahan has bred the western tragopan in captivity and an internationally assisted breeding programme has been chalked out in an attempt to replenish the birds depleting numbers in the wild. To sight the bird in the wild, the chances of coming across this shy and elusive bird at relatively lower altitudes between October to late April are a good time. In April, the pheasants are calling and the leaves on the deciduous trees are still in a bud stage, offering better chances of sighting the bright male tragopan in the undergrowth. Later in the year it moves to higher reaches which are harder to access.

CHEER PHEASANT (Catreus wallichii): This pheasant's small population is naturally fragmented because it lives in small patches of successional grassland. Human population pressure, hunting and changing patterns of land use are resulting in its decline, classifying it as Vulnerable. From Himachal Pradesh it is reported from the following sites: Gamgul Siahbehi Sanctuary; Sara Reserve Forest, Kugti Sanctuary, Manali Sanctuary, Kalatop and Khajjiar Sanctuary; Kais Sanctuary; Kanawar Sanctuary; Nargu Sanctuary, Tirthan Sanctuary, Shikari Devi Sanctuary; Bandli Sanctuary, Daranghati, Majathal Wildlife Sanctuary, Talra Sanctuary, Chail Wildlife Sanctuary and Churdar Wildlife Sanctuary.

CHEER PHEASANT ENTERS RED DATA BOOK: Cheer, as the cheer pheasant, a rare bird of beauty, has entered the REd Data Book of International Union for Conservation of Nature. The high-piercing *"chewewoo"* notes of the grey brown puff-tailed chir are alive and kicking in the Bandli Wildlife Sanctuary in Mandi district.

SNOW LEOPARD PROJECT: In February 2011, Central government approved Rs 80/- lakhs for setting up of Snow Leopard centre in Kinnaur at Kibber, the second only in the world set up on the pattern of existing center in Mangolia. This centre is meant to have research on the snow leopard.

The integrated project formulated by the Mysore-based Nature Conservation Foundation (NCE) implemented in five trans-Himalayan states where the prized animal is found. The project was approved in principle in 2007 but for the implementation in the field, a comprehensive management plan was to be formulated after conducting a base line survey. The NCF which has been working in Spiti since the last decade finalized the plan. With relatively less biotic interference, the Spiti valley was the stronghold of the endangered cat in India. An important feature was that the project would involve the local communities in monitoring and conservation to help reduce the snow leopard-migratory grazier conflict which has taken a heavy toll of the animals. It

is a unique collaborative project on which snow leopard expert are working closely with the senior wildlife officials to develop a good, participatory management plan for the unusual Spiti landscape on the basis of authentic scientific data.

The painstaking research conducted over 4000 sq km by wildlife experts in upper Spiti revealed the presence of 4 or 5 snow leopard per 100 square km. The presence of other high altitude species like ibex, snow cock, blue sheep and grey wolf has also been noted during the research study to correlate it with the snow leopard on through the prey-predator relationship and delineate its domain and movement. It is for the first time that so much research has been carried out in preparing a management plan before starting implementation of the project, Besides Himachal, the project is implemented in Jammu and Kashmir, Uttrakhand, Sikkim and Arunachal Pradesh where the animal is found.

100 NEST HOMES FOR HOUSE SPARROWS IN SHIMLA: In its endeavour to arrest the trend of dwindling of house sparrows, a voluntary organisation, Himachal Birds, installed 100 nest homes for these birds in the state capital and 10 each at every district headquarters. The initiative was formally launched with the installation for a nest home at Oakover, the official residence of Chief Minister. The campaign launched coincided with the World Sparrow Day, which is observed across the world.

RARE MIGRATORY BIRD BACK AFTER 113 YEARS: The rare migratory bird *'whopper swan'* was spotted in the Pong Lake in the Kangra valley after a hiatus of 113 years in 2013. Coming from Central Asia and Europe, whopper swans were last spotted in the country in 1900, near the Beas by British civil servant E.H. Aitken. Whopper swans were recorded in the notes of A.O Hume's book 'Swans of India' in 1878. The whopper swan is one of the heaviest flying birds, with an average body weight of 9.8 kg to 11.4 kg for females. Whopper swans stay in large bodies of water as their legs are unable to support their weight for long periods. They spend much of their time swimming and feeding.

The reappearance of Finland's national bird in the Pong Lake after such a long gap showed that the man-made lake on the Beas was fast growing as a favourite among migratory birds. The whopper swan became the 418th bird species to be recorded at the Pong Lake a significant number considering that the entire known bird diversity for the subcontinent was around 1250 species. On January 20, 2013 Forest Department experts spotted another new visitor to the area, the *'ruddy breasted crake'*, in the periphery of the Pong wetland.

MONKEY POPULATION DECLINES IN STATE: The monkey and langur census undertaken in the state after almost a decade has shown a considerable decline in the number of simians with the latest figure being 2.36 lakh as compared to an estimated population of 3.19 lakh recorded in 2004. The Wildlife wing of the Forest Department for the first time revealed the

figures of the census that was undertaken on June 29-2012.

The department compiled the figure of 2.36 lakh monkeys and about 18000 langurs in the latest census which indicates a decline of almost 30 per cent over the last 10 years. The number of langurs in the 2004 census was 56, 986 which indicates a major decline in the last one decade. "The estimation of the monkey population was undertaken at temples, roadside wildlife sanctuaries, the rural and urban areas so that a near exact number can be arrived at.

As per the figures the highest concentration of monkeys has been found in Una, Nurpur, Hamirpur and Rajgarh in Sirmaur district. Lahaul-Spiti and Kinnaur districts have negligible monkey population. The number of monkeys has gone down from 1700 to 1464 in the Shimla Municipal Corporation. Four monkey sterilization centres are functioning at Tutikandi in Shimla. Sastar in Hamirpur, Gopalpur in Kangra and one at Una. Three more centres at Chamba, Sundernagar and Paonta Sahib are ready.

The department proposed to set up 12 primate parks, spread over 10 hectares where about 2000 sterilized monkeys will be kept. As part of another long-term strategy, fruit trees and shrubs which will provide food for the simians will be planted in over 10000 hectares. A project worth Rs. 200 crore has already been sent by the forests Department to the Centre for funding.

In September 2014 the wild life Wing of the State Forest Department completed the much awaited task of rationalisation of sanctuaries, the total protected area in the state has gone up to 15.07 percent. This area, which stood at 12.86 percent of the total geogaphic area of the state prior to this exercise, has been enhanced from 7,160.75 sq km to 8,391.42 sq km. The state earlier had 33 wildlife sanctuaries and two national parks, while their number now stands at 26 sanctuaries, five national parks and three conservation reserves. The exercise was necessitated to exclude inhabited areas and cultivated land, where human interference was more, as it had become difficult to provide a safe habitat to the wildlife. Small sanctuaries, such as silli in Solan, having an area of mere two sq. km have been converted into conservation reserves.

BIO-DIVERSITY BOARD: On 16 February 2005, the state government setup Biodiversity Board as per the provision of central biodiversity board 2002, setup by government of India. The Chief secretary of the state is its Chairman. Under section 22 of the central act the secretary of forest, horticulture, ayurveda, information technology and agriculture are its member. To streamline the functioning of the board some specialist can be included as members.

BIRD RINGING STATION: On 8th November 2013 Himachal's first bird Ringing station was setup in Salropa, district Kullu by the Himachal chapter of wild life wing. Two wild life expert from England Dr. Francis Bunar and T.H Walkar were main force behind this venture. Main objective of this station is to study the behaviour and habits of birds in Indian sub continent and central Asia.

Himachal Pradesh has till date 362 species of birds identified, it is likely to increase with more in depth survey. Some of the famous birds found in different parts of the State are:

(1) Accentor	(2) Babbler	(3) Barbet
(4) Baya	(5) Bee–eater	(6) Blackbird
(7) Bluebird	(8) Bluethroat	(9) Bulbul
(10) Bullfinch	(11) Bunting	(12) Buzzard
(13) Chat	(14) Chough	(15) Coot

(19) Crossbill	(20) Crow	(21) Cuckoo
(22) Curlew	(23) Darter	(24) Dipper
(25) Dove	(26) Drongo	(27) Eagle
(28) Egret	(29) Finch	(30) Flowerpecker
(31) Flycatcher	(32) Forktail	(33) Gadwall
(34) Godwit	(35) Goldcrest	(36) Goldfinch
(37) Goose	(38) Grandala	(39) Grebe
(40) Greenfinch	(41) Greenshank	(42) Griffon
(43) Grosbeak	(44) Gull	(45) Harrier
(46) Hawk–eagle	(47) Hen–harrier	(48) Heron
(49) Hobby	(50) Hoopoe	(51) Hombill
(52) Iora	(53) Jacana	(54) Jay
(55) Junglefowl	(56) Kestrel	(57) Kingfisher
(58) Kite	(59) Koel	(60) Lapwing
(61) Lark	(62) Magpie	(63) Mallard
(64) Martin	(65) Minivet	(66) Moorhen
(67) Munia	(68) Myna	(69) Nightjar
(70) Niltava	(71) Nutcracker	(72) Nuthatch
(73) Oriole	(74) Osprey	(75) Owl
(76) Owlet	(77) Parakeet	(78) Partridge
(79) Peafowl	(80) Pheasant	(81) Piculet
(82) Pigeon	(83) Pintail	(84) Pipit
(85) Pitta	(86) Plover	(87) Pochard
(88) Pratincole	(89) Quail	(90) Raven
(91) Redshank	(92) Redstart	(93) Robin
(94) Roller	(95) Rosefinch	(96) Rubythroat
(97) Sandgrouse	(98) Sandpiper	(99) Shikra
(100) Shoveller	(101) Shrike	(102) Sibia

(103) Siva	(104) Skylark	(105) Snowcock
(106) Sparrow	(107) Starling	(108) Stilt, black winged
(109) Stint	(110) Stork	(111) Sun
(112) Swallow	(113) Swift	(114) Swiftlet
(115) Tailorbird	(116) Teal	(117) Tern
(118) Thrush	(119) Tit	(120) Tragopan
(121) Tree Pie	(122) Twite	(123) Vulture
(124) Wagtail	(125) Warbler	(126) Waterhen
(127) Wheatear	(128) White–eye	(129) Whitethroat
(130) Wigeon	(131) Woodcock	(132) Woodpecker
(133) Wren	(134) Wren–babbler	(135) Wren–warbler
(136) Wryneck	(137) Yuhina,. yellow naped.	

In Himachal Pradesh, deforestation is not an acute problem as compared to other neighbouring states. The forest cover remains extensive and relatively stable, although destruction of the understorey through overgrazing by livestock is a major problem (IUCN 1993) and some development projects such as roads and dams also affect some of the IBA sites. There are few IBAs where a viable population of the Western Tragopan and Cheer Pheasants are found. Because of habitat degradation, however, they remain only in pockets as described by BirdLife International (2001). The Great Himalayan National Park is an important IBA site where a sizeable population of the Western Tragopan and the Cheer Pheasant is found. Similarly, the Majathal Wildlife Sanctuary is an important IBA for the Cheer Pheasant. Some of the key threats are expansion of cultivation, illegal logging, overgrazing by livestock, conversion to agriculture and plantations, weaknesses in protected area management, hunting of wildlife and trapping. New roads, dams, mines, buildings and other developments strongly contribute to habitat loss in the Western Himalayas, damaging forests, both directly and indirectly and by displacing people into forest areas. Construction of roads in highland areas may cause landslips, and provide improved access to remote montane habitats for shifting cultivators, illegal loggers, hunters and harvesters of forest products. The state and central government should ensure stringent steps to protect Bird life in Himachal Pradesh.

15

Planning In Himachal Pradesh

"The forces in a capitalist society, if left unchecked, tend to make the rich richer and the poor poorer. Action to be effective must be directed to clearly conceived ends."

- Pt. Jwahar Lal Nehru

Planning in India has its history since pre-independence days. Since 1950-51 India has been engaged in the world's largest and most comprehensive experiment in democratic planning. Planning on such a gigantic scale is obviously more than an economic process. It is a total national effort and commitment which includes political leaders at all levels, the administration and the people of the country, as well as those specifically entrusted with the task of economic planning and development.

The constitution of India makes provision for a division of powers between the centre and the states. The seventh schedule to the constitution contains three lists, viz; the Union List consisting of 97 subjects, the state list consisting of 66 subjects and the concurrent list consisting of 47 subject. The concurrent list includes social and economic planning which means that it is a concern of both the governments. In 1946 itself, under the Interim Government an 'Advisory Planning Board was set up, under the Chairmanship of K.C. Neyogi. After independence in 1950 the central agency of planning in India, Planning Commission was set up. In 1952, National Development council was set up, which finally approves the five year plan. Prime-minister of India is the chairman of planning commission and National Development Council.

Planning process primarily aims at socio-economic development of mankind. For this, on the one hand, durable economic and social assets are to be built and; on the other hand sustainable gainful employment which could result in income generation to the needy people for leading a better quality of life has to be provided. Decentralized planning as a concept, has been accepted since the beginning of planning era. The state government has however, initiated the decentralization of planning process in the phased manner. The planning in Himachal Pradesh was also initiated in 1951 along with the other parts of the country.

STATE PLANNING BOARD

This is the apex policy planning body at the state level. It is headed by the Chief Minister as its chairman and its members include all the ministers, all the MPs from the state, Subject matter specialists in the important areas, Vice-

Chancellors of local Universities, prominent public men, representatives of Chambers of Commerce and Industry and all the Secretaries to the state government; Advisor (planning), H.P. Government is the member Secretary of the Board. Prominent functions include determination of the development priorities, formulation of the five year and Annual Plans, review of the plan programmes and interregional as well as intra regional disparities and evaluation of the plan programmes etc.

ORGANISATIONAL STRUCTURE

(a) State level: The state planning machinery in Himachal Pradesh is headed by the Secretary (planning) to the government who is assisted by the Special Secretary (planning) and Under Secretary (planning) at the Secretariat level. The head of the Department is Adviser (planning). The state planning department is organized into eight functional divisions as under:

(1) Plan Formulation Division
(2) Plan implementation and information Division
(3) Manpower Planning Division
(4) Project Formulation and Review Division
(5) Evaluation Division
(6) Regional and District Planning Division
(7) Administration Division
(8) Backward area sub-plan Division.

These divisions are headed by a joint Director/Deputy Director level officers.

(b) District level: The planning machinery at the district level is headed by the Chief Planning Officer.

The ADC/ADM of the district has been ex-officio designated as the Chief Planning officer. He is assisted by a Chief Planning officer, a Credit planning officer and an Assistant Research Officer and the supporting staff. The district planning set up was created in the mid-eighties and has continued as such. Two Tribal districts and two blocks of Chamba district have been excluded from this structure.

The district planning cells are engaged in the preparation of shelf of scheme at the decentralized level, to maintain the record of all the plan need schemes of the departments after approval of the budget for review, implementation and monitoring of funds provided under LDP, VMTS, MPLADS, Sectoral Decentralized Planning, Backward Area Sub-Plan as well as convening the meetings of District Planning Development and 20 point programme Review committees. In these meetings, the place of expenditure, level of development achieved through implementation of schemes and decentralized are reviewed and thereafter the DCs and other Executive Agencies ensure taking up corrective measure from time to time. In addition to these activities, These units are engaged in collection of data desired by the State government and District

Administration concerning developmental activities etc.

(c) **Block level:** Himachal Pradesh does not have any specific block level planning machinery as of now.

State Planning, Development and Twenty Point Programme Review Committee: As is evident from the nomenclature of the committee, this is a state level body to review the implementation of the Twenty point programme and all other developmental programmes. It is headed by the Chief-Minister and its members include minister, Vice-Chairman, Twenty point programme committee, all MPs, some MLAs, prominent public men and all secretaries of the state Government. The Adviser (planning), government of Himachal Pradesh is the member Secretary of this committee.

District Planning, Development and Twenty Point Programme Review Committee: These committees have been constituted to review the implementation of the Twenty Point Programme and other developmental programmes viz. LDP, VMJS, MPLADS and Decentralized Sectoral Planning etc. The committee is headed by the Minister from the district and has its members; the MP representing the districts, all the MLAs, other prominent public men, representatives of various interest groups like SCs, STs, Women, OBCs, all the district level officers and the Additional DC/ADM as its members, in his capacity as the Chief Planning officer of the district. These committees are required to meet once in every quarter and apart from the required role of review, it is also required to approve the schemes under the LDP, VMJS and Sectoral Decentralized Planning.

Sub Divisional Removal of Public Grievances and Planning Developments: For all the Subdivisions the Sub-Divisional Removal of Public Grievances and planning, Development of 20 point Review Committees stand constituted and notified with a view to remove Public Grievances locally and quickly. Through the meetings of these committees, the place of implementation of various developmental programmes is invariably reviewed and corrective measures got ensured besides redressing public grievances. The formulation of the comprehensive district level plans and their implementation has not, yet been started in Himachal Pradesh. The state government has been making strenuous efforts to promote planning and implementation at the district level through various means. The salient features of this effort are explained as below:

(i) **Local District Planning:** This scheme was introduced in the years 1984-85. It envisages allocation of united funds to the districts based on a formula. The formula provides for 60 per cent on the basis of area according to Surveyor General of India. Infrastructural schemes benefiting at least five families with no recurring liability can be taken up under this scheme. The upkeep and maintenance of the assets created is either the responsibility of the user community or the concerned Govt. Departments.

The developmental works/assets which can be taken up under this category are-

(1) Construction of School buildings.

(2) Construction of Rural water schemes;

(3) Construction of Motorable roads/ropeways;

(4) Construction of Minor irrigation schemes

(5) Construction of Multipurpose community centres;

(6) Providing of other important infrastructural facilities for development as also to benefit people at large such as three phase transmission Lines, Ambulance, X-ray plant and purchase of laboratory equipments for educational institutions etc.

Before sanction and execution of developmental works under this scheme, the same are to be got approved from the District Planning Development 20 point programme Review Committee which also monitors/review the progress.

(ii) Vikas Mein Jan Sahyog (VMJS): To ensure effective people's participation towards fulfilling their development needs in terms of infrastructure at the grass root level as to supplement government efforts resources, the programme *"Gaon Bhi Apna Kam Bhi Apna"*, was started in the year 1991-92. After about two years of implementation, a detailed review led to restructuring the programme by providing for maintenance of assets, greater decentralization and other changes and was renamed as *"Vikas Mein Jan Sahyog"*.

- This programme is an integral part of Local District Planning.

- DC can sanction community works/schemes each costing upto Rs.1.00 lakh but works/schemes costing more than Rs. 1.00 lakh are to be sanctioned at the State headquarters on the recommendations of DC.

The following type of works/schemes can be undertaken under VMJS:

(1) Construction of School buildings.

(2) Construction of multipurpose community/public assets.

(3) Construction of motorable roads and ropeways;

(4) Construction of irrigation schemes/drinking water schemes/hand pumps.

(5) Construction of public health services buildings and

(6) Provision of important missing Links; such as three phase transmission lines (or electricity) X-ray plants, ambulances etc.

Sectoral Decentralized Planning

Under this scheme, five percent of the approved outlay in selected sectors are taken out and allocated to the district on the same formula as for the local district Planning. i.e., 60 percent on the basis of population and 40 percent on the basis of geographical area. The scheme was introduced in the year 1993-94. The districts are given total freedom for identifying projects to be implemented under this scheme irrespective of the sectoral bounds only constraints applied is that no diversions are allowed from the outlay earmarked for the rural water supply. The DC is required to get the schemes approved

from District Planning Development and 20 Points Programme Review Committee.

Member of Parliament Local Area Development Scheme (MPLADS)

This scheme was introduced in the year 1993-94, as a central sector scheme. The objective of this schemes is to authorize M.P.'s to recommend small works of capital nature demanded by their constituents. Under this scheme each M.P. has the choice to suggest to the District Collector works to the tune of Rs. 1.00 crore per year from the financial year 1994-95 (whereas for the year 1993-94, each M.P. could suggest works to the tune of Rs. 5 lakh to be taken up in their respective constituencies) with each individual work not exceeding Rs. 10.00 lakh. The following type of works can be taken up under this scheme.

(1) Construction of school buildings;

(2) Providing drinking water to the people in the villages, towns or cities by digging tube wells or other works which may help in this respect.

(3) Construction of village roads or approach roads.

(4) Construction of bridges on the approach roads.

(5) Construction of common shelter for the old and handicapped.

(6) Construction of buildings for local bodies or for cultural and sports activities or for hospitals.

(7) Social forestry, farm forestry, horticulture, parks and gardens in Govt. and community land.

(8) Desilting of village ponds.

(9) Construction of irrigation canals.

(10) Construction of common gobar-gas plants, non conventional energy system/devices for community use and related activities.

(11) Construction of small irrigation bands or lift irrigation schemes or water table recharging schemes.

(12) Public reading rooms or study room.

(13) Creches and Anganwadis.

(14) Crematorium/burial grounds.

(15) Construction of public Health care building, including family welfare sub centres together with A.N.M's residential buildings.

(16) Construction of public toilets and bathrooms.

(17) Drains and gutters.

(18) Footpath, pathways and foot bridges.

(19) Provision of civil amenities like electricity, water, pathways, public toilets etc. in slum area of cities, town and village, provision of common work sheds in slums and for artisans.

(20) Residential schools in tribal areas.

(21) Bus-sheds/stops for public transport passengers; and

(22) Veterinary-Aid centres.

Disaggregation of the District Sector Programmes and Monitoring at the District level

In addition to the above schemes which are of direct decentralization nature, the State Planning Department after the passing of the budget by the state legislative assembly, disaggregates the sectoral plan outlays in consultation with the departments, district-wise and scheme wise and conveys the same to the districts. Based on this information the District Planning Development and Twenty Point Programme Review Committee monitor the progress of implementation of the disaggregated district plans. The process of review includes a detailed physical content of the disaggregated District Sectoral Programmes and in some cases also involves the emergence of the diversion proposals from the one sector to another depending upon the actual implementation possibilities of various programmes.

People's Participation in Developmental Programmes

To maintain the following type of assets/works created/being created under different development programmes; a new scheme called *"Rakh Rakhav Mein Jan Sahyog"* was introduced for implementation during the year 1995-96. The programme included in this category are -

(1) Local Development Programmes
(2) NREP/RLEGP/JRY
(3) Natural Calamity Works
(4) Sectoral Decentralized Planning
(5) Any other government assets constructed out of government funds under any other programmes for which not budgetary provision for maintenance is available.

The sharing pattern under this new programme between state Government and Community is 50;50. The voluntary contribution to be made by the community is to be made in advance and the amount is to be deposited with the concerned DC/BDO. The financial criteria for according sanction under this new scheme are the same as have been prescribed for maintenance under *'Vikas Mein Jan Sahyog'* programme. To make decentralized planning a success, active participation of masses and innovativeness of the administration is quite necessary. The people at the bottom are not aware of the development schemes and their advantages. In this direction, the concerned department should make proper publicity and launch awareness campaign. It is rather painful than even after decades of independence our rural community and a great bulk of the masses have received very little of the fruits of development.

BACKWARD AREA SUB PLAN

Recognizing the need for reducing and removing economic disparities between different regions in the country and for accelerated development of backward areas, the identification of backward areas was taken up way back

during the Fourth Five Year Plan (1969-74) and efforts were made to identify remote and inaccessible areas which remained neglected due to their inaccessibility and difficult geographical and harsh climatic conditions. The basic criteria decided for this purpose was remoteness, inaccessibility, socio-economic development and infrastructural backwardness. This process gave birth to the formulation of Sub Plan for these backward areas which was designed to mitigate the micro-regional disparities in development and to look after the developmental needs at the micro level for these identified areas.

The State government issued a Notification declaring 321 Panchayats as backward vide notification No. PLG-FC (F) 3-55/82 dated 10-1-1986. After this identification, exclusive earmarking in the budget under separate sub heads in various demands was introduced, which continued up to 1994-95. For the overall development of backward areas, the Government of Himachal Pradesh framed a comprehensive policy during the year 1995-96. A separate Sub Plan for the development of Backward Areas in the State came into existence because of this policy of the State Government.

Backward Area Sub-Plan mainly consists of the following components:-

1. Identification and declaration of areas as backward;

2. Socio-Economic Development of areas declared as backward through the mechanism / intervention of BASP; and

3. Periodic review of areas declared as backward as per the decision of the State Government.

Based on the policy adopted during the year 1995-96 the total number of backward panchayats identified in the state was 489 as on 16th July, 2004. As a result of reorganizing of panchayats in the State, 23 more panchayats were added in the list of backward panchayats in the year 2004. Again 39 more panchayats were added in the year 2006, increasing the total number of backward panchayats to 551.

Implementation Mechanism of Backward Area Sub-Plan:

1. Backward Area Sub Plan is operational in ten districts of the State (except tribal districts). Tribal areas are being taken care of under separate Tribal Sub-Plan (TSP). The Backward Area Sub Plan comprises of three categories viz:-

(a) **Backward Blocks:** All Blocks having 50% or more panchayats notified as backward are declared as "**Backward Blocks**".

(b) **Contiguous Pockets:** Group of five or more than five Backward Panchayats forming a contiguous geographical area are called "**Contiguous Pockets**".

(c) **Dispersed Panchayats:** The panchayats other than those mentioned in (a) and (b) above, are called "**Dispersed Panchayats**".

2. All such Panchayats which have been carved out from the existing notified Backward Panchayats are also declared as Backward. The outlays earmarked for the Backward Area Sub –Plan under various functional major

heads are budgeted under Demand No.- 15- Planning and Backward Area Sub-Plan. Earmarking of the sectoral outlays is done for the following thirteen heads of development:-

1. Agriculture.
2. Soil Conservation (Agriculture).
3. Horticulture.
4. Minor Irrigation.
5. Animal Husbandry.
6. Forestry.
7. Village and Small Scale Industries.
8. Rural Roads & Bridges.
9. Elementary Education
10. General Education.
11. Rural Health (Allopathy)
12. Ayurveda.
13. Rural Water Supply.

3. The *"Backward Area Sub-Plan"* is administered through the Deputy Commissioners. Deputy Commissioners have been declared as controlling officers for this Sub-Plan. All the District Planning Officers have been declared as DDOs for all the Capital heads. DDOs of the concerned departments in the districts operate only revenue heads under the Sub Plan. The District Planning Officer helps the Deputy Commissioner in implementation, physical & financial monitoring of all schemes under the Sub-Plan.

4. District Planning, Development and 20-Point Programme Review Committees (DPDCs) have been authorized for formulation, implementation, monitoring and review of the schemes under Backward Area Sub-Plan. District Planning, Development and 20-Point Programme Review Committees (DPDCs) have also been authorized to make departmental / inter- sectoral diversion of approved Budget from one sector to another sector/ scheme, keeping in view the specific needs of the area for undertaking infrastructural development. Therefore, complete and absolute freedom has been given to the DPDCs which can direct the concerned department(s) and get scheme(s) executed through the locally available infrastructure.

5. To facilitate the quick execution of the schemes, concerned Deputy Commissioner of the district has been authorized to accord administrative approval and expenditure sanction for all the schemes which hitherto rested with the concerned Administrative Secretaries / Head of Departments. Thus, absolute decentralization of powers have been given to DPDCs through this concept.

6. During the year 2008-09, all the revenue liability of departments falling under BASP have been provided in the Non–Plan side of Demand No.- 15 under BASP. Thus, the plan funds earmarked under this Sub-Plan are only for capital works.

7. To regulate and avoid any abnormal fluctuations in the expenditure under BASP, the State Government has issued instructions during 2001 to spend the budget of BASP in the following controlled manner:-

1st Quarter 25% 2nd Quarter 40%
3rd Quarter 25% 4th Quarter 10%

8. The quarterly budget authorization under BASP to the districts is made

on the above mentioned criteria. The budget allocation to the districts is made in proportion to the number of declared Backward Panchayats of the district.

Area under Backward Area Sub-Plan:-

There are eight backward declared blocks in the State. The district wise detail is given below:-

District-wise detail of Backward Blocks

Sr. No.	District	Name of Backward Block
1	2	3
1	Chamba	1. Tissa
		2. Salooni
		3. Mehla
2	Kullu	1. Ani
		2. Nirmand
3	Mandi	1. Darang
		2. Seraj
4	Shimla	1. Chhohara
	Total :	8

As stated earlier, a total number of 551 Gram Panchayats out of 3243 Panchayats in the State have been declared as Backward Panchayats. The district-wise break-up of these backward panchayats is as under:-

Districtwise Backward Panchayats

	Districts	Total Panchayats 1995-96	Backward Panchayats 95-96	Total Panchayat 2014	Backward Panchayats in 2014
1.	Bilaspur	136	13	151	15
2.	Chamba	270	149	283	159
3.	Hamirpur	215	13	229	13
4.	Kangra	732	17	760	17
5.	Kullu	192	72	204	79
6.	Mandi	422	118	473	149
7.	Shimla	331	72	363	83
8.	Sirmaur	219	26	228	26
9.	Solan	198	06	211	7
10.	Una	219	03	235	3
11.	Kinnaur	62	-	65	-
12.	Lahaul Spiti	42	-	41	-
	Total	3037	489	3243	551

In 2001 a total number of 489 Gram Panchayats out of 3037 Panchayats in the state were declared as Backward Panchayats in Himachal Pradesh. In 2014, there were 551 Backward Panchayats out of total 3243 panchayats. Framing of Backward area sub-plan and Tribal areas sub-plan are the extension of the process of decentralized planning. The very objective of decentralized planning is to ensure the speedy equitable and rational development of all areas.

OUTLAYS AND EXPENDITURE REVIEW

FIRST PLAN TO 12th FIVE PLAN

The era of Development Planning in Himachal Pradesh began with the initiation of First Five Year Plan in the year 1951. Since then, eleven plan periods in the form of six five year plans and five annual plans have gone through and the twelfth one i.e. the 12th Five Year Plan (2012-2017) is in progress. The entire planning era from 1951 onwards is classified into following plan tenures:-

1. First Five Year Plan 1951-56
2. Second Five Year Plan 1956-61
3. Third Five Year Plan 1961-66
4. Annual Plan 1966-67
5. Annual Plan 1967-68
6. Annual Plan 1968-69
7. Fourth Five Year Plan 1969-74
8. Fifth Five Year Plan 1974-78
9. Annual Plan 1978-79
10. Annual Plan 1979-80
11. Sixth Five Year Plan 1980-85
12. Seventh Five Year Plan 1985-90
13. Eighth Five Year Plan 1990-95
14. Ninth Five Year Plan 1995-2000
15. Annual Plan 2000-2001
16. Annual Plan 2001-2002
17. Tenth Five Year Plan 2002-2007
18. Eleventh Five Year Plan 2007-2012
19. Twelfth Five Year Plan 2012-2017

First Five Year Plan began with a meagre outlay of 564.40 lakh which continued to increase in each subsequent plan to reach ultimately at Rs. 10,5000 lakh which was almost 186 times of the original over these three decades. As regards the actual expenditure during the first Five Year Plan and the same as estimated during the sixth Five Year Plan, the same has increased from 527.12 lakh to estimated 127860.50 lakh i.e. 243 times.

Tables 1 to 7 shows the planwise/Year-wise (for annual plans) outlays and expenditures under various plans from the First Five Year Plan till the end of Seventh Five Year Plan. Here all the schemes have been grouped under three classifications viz (i) Economic Services; (ii) Social Services and (iii) General Services. The outlays and actual expenditures under each plan period/services have been indicated separately and the percentage increase over the previous plan period is shown under the second row (below the approved outlay and expenditure figures) for each plan period. This

comparison has been made for any Five Year Plan with previous Five Year Plan and any Annual Plan with previous Annual Plan. Where ever, an Annual Plan follows a Five Year Plan such comparison (increase) has not been given but in other cases the percentage increase has been indicated in comparison with previous Five Year Plan.

This comparative study reveal the following results:-

(i) The percentage increase in approved outlays over second, third, fourth, fifth, sixth and seventh plans over the pervious Five Year Plans are 160.90; 89.67; 263.05; 135.65; 134.36 and 87.50 percent, respectively.

(ii) Similar increase in outlays over the Annual Plans 67-68, 68-69 and 79-80 over the previous Annual Plans is 74.67; (-) 1.40 and 0.12 percent respectively.

(iii) Taking the expenditure figures for the same periods, the similar increase during second to seventh plans are 203.92; 111.27; 235.15; 42.94; 309.96 and 92.35% respectively.

(iv) The comparative increase in expenditure during Annual Plans 1967-68; 68-69 and 79-80 are 52.63; 9.78 and 16.67 percent respectively.

By classifying the outlays and expenditures into three broad groups viz (i) Economic Services; (ii) Social Services and (iii) General Services as given under col. 2 to 7 (third row of each plan period) of table, the following conclusions are arrived at:-

(a) Highest portion of outlays and expenditure which is under the range of 75% to 86% of the total outlays and 74% to 89% of the total expenditure under various plan periods goes for "Economic Services".

(b) This is followed by "Social Services", the outlays for which range 14 to 25% and expenditure between 11 to 26% under different plan periods.

(c) Both the outlays and expenditures under "General Services" are 'Nil' to 'Negligible'. The expenditure under this group starts only from the Fourth Five Year Plan. This is round about 2% of the total outlays.

AN ECONOMIC SCENARIO OF HIMACHAL AS AT THE END OF SEVENTH PLAN: The scenario of Himachal Pradesh, as it would be on the eve of the Eighth Five Year Plan was that every populated village will have electricity and at least nine out of ten households within the rural areas will have the electricity connection. In addition, 93% villages will have potable water supply, 75% villages would be having an educational institution within the village and one out of every two villages will be connected by a road. Every Panchayat will have a library, a cooperative society and a fair price shop of its own. Each panchayat will have one health institution located in its midest and there will be one veterinary institution for every three Panchayats.

COMPARATIVE FINANCIAL ANALYSIS WITH ALL STATES AND SPECIAL CATEGORY STATES: A comparative analysis of State finances,

per capita tax revenue, per capita non tax revenue, per capita plan outlays and per capita expenditure etc. for the latest available years of Himachal Pradesh with the total of all States and all special category States has been done. The conclusions arrived out of the same are given in the following paragraphs.

The per capita own tax revenue of Himachal Pradesh during the year 1986-87 (B.E.) worked out at Rs. 193 against the all states average of Rs. 238 and special category states average of Rs. 117. With the all States average, Himachal Pradesh ranked at No. 7 and compared to the eight special category States, the Pradesh ranked at No. 1. The per capita development expenditure of Himachal Pradesh during the year 1986-87 was Rs. 1033 against the all States average of Rs. 494 and the average of special category States of Rs. 850. Comparing to all states as well as the special category states, Himachal Pradesh ranked at No.7. Among the special category states, Sikkim, Nagaland, Meghalaya and Manipur, Tripura and Jammu & Kashmir all rank higher (having higher per capita expenditure) than Himachal Pradesh. Only Assam had a lower per capita development expenditure of Rs. 561. The yearwise per capital development expenditure (based on 1981 population census) was 1980-81 Rs. 495; 1981-82 Rs. 555; 1982-83 Rs. 636; 1983-84 Rs. 690; 1984-85 Rs. 842; 1985-86 (R.E.) Rs. 1049 and 1986-87 (B.E.) Rs. 1033.

The per capita non-tax revenue of Himachal Pradesh for the year 1986-87 (B.E.) was Rs. 121 as against Rs. 86 as average for all States and Rs. 91 as average for eight special category States. Among all states, Himachal Pradesh ranked at No. 7 and among special category States at No. 3. Among special category States, the non tax revenue of Sikkim and Nagaland was higher at Rs. 393 and 132, respectively.

The share of the Himachal Pradesh to total devolution of funds of the Eighth Finance Commission Award for 1984-89 is Rs. 774.37 crores out of 39452.01 crores for all states. This worked out as 1.96% of the total.

The total approved plan outlay of Himachal Pradesh for Seventh Five Year Plan was at Rs. 1050 crore. The per capita outlay based on 1981 population census works out at Rs. 2442 against the average per capita outlay of all States at Rs. 1162 and the average of special category State of Rs. 1398. The net outlay was 1.3% of the total outlay of all the States. Ranking of Himachal Pradesh with all the States of India as well as with special category States, it ranked at No. 5. Four States having a higher per capita outlay than Himachal Pradesh were (1) Sikkim (7667); (2) Nagaland (5000); (3) Meghalaya (3385); and (4) Manipur (3071).

EIGHTH FIVE YEAR PLAN 1990-95

The National Development Council in its meeting held on 18-19 June, 1990 adopted the framework for the Eighth Five Year Plan 1990-95 which enshrines the objectives of the Eighth Plan along with the main programme thrust. The basic objective is to ensure that the needs of ordinary people and

Source : Planning Department Government of Himachal Pradesh, Shimla.

the quality of their life become the central focus of planning even as the plan seeks to promote rapid overall development and diversification of the economy and to strengthen the infrastructural base.

The central thrust of the Eighth Plan is employment. The plan will seek to give operational content to the commitment to guarantee the right to work to every citizen through appropriate development programmes. This inter-alia demands a comprehensive integrated view of the economy and of the use of physical, human and financial resources at different levels of government and in the private sector as well. With these macro considerations and the concomitant micro-considerations in view, the national Eighth Plan objectives have been listed as under:-

The backlog of unemployment at the beginning of the 1990-91 has been estimated as 2. 17 lakh person years. It has also been seen that the net addition to the labour force during the 1990-95 would be 2. 19 lakh person years. These figures indicate the overall magnitude of employment to be generated during 1990-95. It is expected that additional employment of the order of 4. 37 lakh persons would be generated during the 1990-95 with an implied growth rate of 3.66% per annum.

From what has been stated above, it is evident that strategy of planning for employment would call for sufficiently higher employment growth rate of more than 3% per annum so as to clear the backlog of unemployment.

1. Removal of rural-urban disparities both/ with regard to (a) income and consumption per head and (b) access to education, health, transport and other essential services. Thus greater emphasis was given to rural development. Towards this end, emphasis was laid on (i) making agriculture a more stable and productive employment through expansion of irrigation and other facilities; (ii) more equitable access to resources and inputs within the rural society; (iii) productivity of rain-fed agriculture in arid and semi-arid tracts as well as in the medium and high rainfall zones (iv) remunerative prices to the farmers in general and diversification of agriculture into more remunerative enterprise; (v) sensitivity to employment and regional dimensions of agricultural growth and modernisation, and (vi) the need to ensure fair rewards and well-being of the rural labour;

2. Develop a comprehensive social policy that addresses itself to marginalised and excluded sections of society including the Scheduled Castes, the Scheduled tribes and backward classes;

3. Improve the quality of human resources through (i) emphasis on the containment of population growth; (ii) a major overhaul of educational policy to achieve the goal of elimination of illiteracy by the end of 1990 and making education a resource for the mass of the people to enable them to participate in the productive process and avail of the right to work and (iii) restructuring the system of health and nutrition with a view to raising the levels of living and quality of life of the people;

4. Promote adequate production of mass consumer goods, particularly through labour intensive manufacture with assured supply of raw materials, credit and marketing facilities and a re-generated democratic cooperative movement supplemented by voluntary organisations and association of craftsmen and ensure that fiscal and other concessions meant for the traditional industry are not unfairly appropriated by others and by reservation, where necessary;

5. Expand infrastructural facilities as well as the supply of key intermediate and capital goods to meet growing requirements. Greater efficiency in production and conservation in use would be given precedence over creation of new capacity in energy and capital intensive sectors;

6. Review carefully (i) all proposals for new, large investments with the aim of working out a phased programme in consonance with the new priorities in and multiple demands on investment resources; (ii) work out long term programme for efficient development of selected key industries in collaboration with the relevant organisations, paying particular attention to upgrading continuously indigenous engineering capabilities in research and design and (iii) provide guidance for the pattern of private industrial development along socially desirable lines through development of financial institutions in terms of their control over equity in the private corporate sector;

7. To induce innovative approaches to development through inputs of science and technology which has to be made responsive to the needs of the people, especially those living in rural areas and to the concerns of employment, environment and promotion of self-reliance;

8. To lay thrust on exports in order to reduce dependance on external resources;

9. To contain imports through measures for selective import substitution, a more efficient use of imported material and avoiding imports related to inessential consumption;

10. Completion of democratic decentralisaton in a phased manner during the Eighth Plan.

A study of the objectives stated above revealed that the solutions to the problems of poverty, unemployment and under-employment and also the reduction in the disparities in the levels of income and consumption and also the inter-regional disparities can only be found in the frame-work of rapidly expanding economy. This is possibly by strengthening the resource base, generating productive employment through increase in cropping intensity and extending of new agricultural technologies to low productive regions and to small rural development programmes more effective farmers, through (i) measures to make the/productive assets (ii) expansion of labour intensive construction activities and (iii) changes in the level and pattern of industrial growth. It also called for most cost effective and efficient use of the scarce financial resources so that the targetted expansion of overall economy at 5. 5 percent per annum also visualised.

The formulation of State's Eighth Five Year Plan 1990-95 was followed, by and large, the framework of the objectives of National Plan with adjustments necessitated by local needs and conditions.

The guidelines issued by the Planning Commission vide their d.o. letter No. PC (P) 1/8/1/90, dated the 29th August, 1990 envisaged that 90 percent of the share of central funds on account of centrally sponsored schemes which are under consideration for transfer to the State Plan are required to be built into the State Plan. Accordingly, the proposed Eighth Plan outlay 1990-95 was projected at Rs. 3022.00 crore which included Rs. 298.96 crore on account of Centrally Sponsored Schemes. The outlay for these schemes was the result of 1991-92 central outlays being 90 percent of the actual/anticipated receipts for 1990-91 and then projected at a nominal 10 percent markup each year. It is important to mention here that this reduction for 1991-92 posed serious problems to us in such cases where the Central Sector support was used for staff expenditure. Even otherwise, the programme content of all the Centrally Sponsored Schemes was bound to fall at least by 10 percent during 1991-92 as compared to 1990-91.

The entire plan frame was divided into three major sectors viz. (A) Economic Services (B) Social Services and (C) General Services. The Economic Services include agriculture, horticulture, soil conservation, animal husbandry, fisheries, forests, agricultural research and education, cooperation, rural development, irrigation, power, industries, transport, science and technology and general services. The Social Services sector include education, health, water supply, housing, urban development, information and publicity, labour and welfare. However, the last sector, i.e. General Services comprises of printing and stationery, Institute of Public Administration, Tribal Development and Ex-Servicemen Corporation.

The sectoral distribution of Eighth Five Year Plan outlay, according to the above stated three broad sectors was as under:-

(Rs. in crore)

Sector	Proposed Eighth Plan 1990-95 Plan outlay		
	State Sector	Centrally Sponsored Schemes outlay	Total
1.	2.	3.	4.
A. ECONOMIC SERVICES	1870.86	188.98	2059.84 (68.1)
B. SOCIAL SERVICES	811.05	109.98	921.03(30.5)
C. GENERAL SERVICES	41.13	-	41.13 (1.4)
TOTAL:	2723.04	291.96	3022.00 (100)

It would be seen that the Economic Services sector claim a major share, 68.1 percent of the total Eighth Five Year Plan size followed by Social Services sector 30.5 percent and General Services 1.4 percent. The same percentages follow in the Annual Plans, as well.

The following heads of development were assigned the highest priorities in plan investment in the Eighth Five Year Plan

(Rs. in crore)

Head of Development	Proposed Eighth Plan Outlay
1.	2.
1. Power	572.51
2. Water Supply	307.50
3. Education including Technical Education	275.21
4. Roads and Bridges	272.50
5. Forestry including wild life	238.75
6. Crop Husbandry including Soil Conservation	186.42
7. Industries	148.10
8. Rural Development	144.50
9. Irrigation and Flood Control	139.75
10. Health	132.48
11. Housing	40.89
12. Tourism	23.25
Total:	2481.86
Percentage to total proposed plan Outlay	82.33

These important heads of development together claim percentage share of about 82.33 percent of the total Eighth Plan proposed outlay. These were also the trend setters of plan investment in the subsequent Annual Plans of the State.

MINIMUM NEEDS PROGRAMME

In order to promote social justice and to improve the quality of life of the rural population vis-a-vis the urban areas, minimum needs programme (M.N.P.) continued to play an important role in development planning. The minimum needs programme lays down the urgency for providing social services according to nationally accepted norms. The components of this programme were:-

(i) Rural Electrification; (ii) Rural fuel wood;
(iii) Rural Roads; (iv) Elementary Education;
(v) Adult Education; (vi) Rural Health;
(vii) Rural Water Supply; (viii) Rural Sanitation;
(ix) Rural house-site-cum-construction scheme;
(x) Environmental improvement of urban slums;
(xi) Nutrition; (xii) Public Distribution System;

The proposed Eighth Plan outlay for Minimum Needs Programme was envisaged at Rs. 497.59 crore. Against the approved Annual Plan Outlay 1990-91, an outlay of Rs. 85.47 crore was proposed for at Rs. 62.99 crore, Annual

Plan 1991-92. The programme-wise details were as under:-

(Rs. in lakh)

Programme	Eighth Plan Proposed Outlay 1990-95
1.	2.
1. Rural Electrification	50.00
2. Rural fuelwood	940.00
3. Rural Roads	7920.00
4. Elementary Education	8375.30
5. Adult Education	564.00
6. Rural Health	4585.00
7. Rural Water Supply	21700.00
8. Rural Sanitation	625.00
9. Rural Housesite-cum-construction scheme	125.00
10. Environmental Improvement of Urban Slums	180.00
11. Nutrition	2900.00
12. Public Distribution System	1795.00
Total	49759.30

Tribal Sub Plan

The Fifth Plan (1974-79) saw a sea change in planning process when the strategy of Sub Plan, a plan within the Plan for accelerating socio-economic development of the Scheduled Tribes was adopted. The State Government has taken a conscious policy of taking nine percent of the total State Plan outlays towards formulation of Tribal Sub-Plan. For ensuring these flows to tribal areas, a single consolidated demand has been adopted besides introduction of single-line administration in the Integrated Tribal Development Projects.

The proposed Eighth Plan outlay for Tribal Sub Plan was arrived at Rs. 271.95 crore.

Special Component Plan for Scheduled Castes

The strategy for the formulation of Special Component Plan for the socio-economic development of Scheduled Castes was evolved at the end of the Fifth Plan which is now continued process since then. The State Government has taken a conscious policy of taking 11 percent of the total State Plan outlay towards formulation of Special Component Plan for Scheduled Castes. The proposed Eighth Plan outlay for Scheduled Caste Component Plan was Rs. 334.57 crore.

THRUST ON RURAL DEVELOPMENT IN EIGHTH FIVE YEAR PLAN: Himachal Pradesh has an area of 55,673 kms. and a population of 42.81 lakh according to 1981 Census. The density of population was 77 persons

per square km. as compared to 216 at the all India level. As much as 92 percent of population living in rural areas and the remaining Eight percent is located in 46 towns. Scheduled Castes form 24.6 percent of the population while Schedule Tribes account for 4.6 percent. The areas comprising of Kinnaur District, Lahaul and Spiti District and Bharmaur and Pangi tehsil of Chamba District form the Tribal areas of Himachal Pradesh.

REVIEW OF 9th FIVE YEAR PLAN (1997-2002)

The national approach to the Ninth Five Year Plan (1997-2002) aimed at building on the successes of Eighth Five Year Plan. The problems that emerged particularly, in the areas such as capital formation in agriculture, living standards of the poor, infrastructure, social sectors, regional disparity and fiscal deficit were to be addressed. Working on these broad parameters, the following objectives were envisaged to be achieved:-

i) Priority to agriculture and rural development with a view to generating adequate productive employment and reduction of poverty;

ii) Accelerating the growth rate of the economy with stable prices;

iii) Ensuring food and nutritional security for all, particularly the vulnerable sections of society;

iv) Providing the basic minimum services of safe drinking water, primary health care, universal primary education, shelter, and connectivity to all in a time bound manner;

v) Containing the growth rate of population;

vi) Ensuring environmental sustainability of the development process through social mobilisation and participation of people at all levels;

vii) Empowerment of women and socially disadvantaged groups such as Scheduled Castes, Scheduled Tribes and other Backward Classes and Minorities as agents of socioeconomic change and development;

viii) Promoting and developing peoples' participatory institutions like Panchayati Raj institutions, cooperatives and self-help groups;

ix) Strengthening efforts to build self-reliance.

The above objectives, sought to be achieved with the principle of "Growth with Equity" needed to be seen in the context of four important dimensions of State policy. These were: a) Quality of Life of the Citizens; b) Generation of Productive Employment; c) Regional Balance and d) Self- Reliance.

The Ninth Five Year Plan (1997-02) of the State was initially approved at Rs. 5700 crore at 1996-97 prices but subsequently aggregate sizes of the approved Annual Plans went higher and ultimately the size of the Ninth Five Year Plan was revised to Rs. 7488.00 crore in nominal terms. The sector wise spread of outlay and expenditure is given in the table 1.

As would be seen from the data, Himachal Pradesh was among the very few states to have achieved the plan investment targeted for the Ninth Plan in

Table -1

12 Public Administration	7.46	7.67	8.15	7.81	8.36	477863	7.94
13 Other Services	10.05	11.45	12.16	11.30	10.56	670458	11.13
Total- Community & Personal Services	17.51	19.12	20.31	19.11	18.92	1148321	19.07
GROSS DOMESTIC PRODUCT AT FACTOR COST	100.00	100.00 1	00.00	100.00	100.00	6020998	100.00

The table 2, clearly reveals that more than 50% of the total GSDP is contributed by Primary and Secondary sectors. Services sector contributes about 1/5th of the GSDP. No significant fluctuations are observed in sectoral contribution. The economic analysis of the development trend of the state clearly shows that Himachal is now on a very healthy path of development as the primary sector contribution has shifted to secondary and services sectors. The percentage contribution of primary sector, was 28.15 percent during 1997-98 which declined to 27 percent at the end of 2001-02 whereas overall contribution from this sector was 26.79 percent at the end of 9th Plan period.

The contribution of the secondary sector more or less has remained almost at the same level i.e. 33.47 percent in 1997-98 to 33.31 percent during

2001-02 and overall contribution also remained at the same level i.e. 33.53 percent. The percentage contribution of services and transport, communication and trade sectors increased from 17.51 and 12.64 percent from the beginning of the 9th Plan period to 19.92 and 13.39 percent respectively by the end of the plan period. The sector, which shows a marginal declining trend during the 9th Plan period, was Finance and Real Estate.

State's Approach to Ninth Five Year Plan 1997-2002

The State Government designed its own enabling programmes within the overall National objectives keeping in view the peculiar hilly conditions and policies of the State Government. The approach, *inter-alia*, reflected the aspirations of the people. The main objectives of the State's approach aimed at the following aspects:-

I. Human Development:- Human Development in its all facets was the main focus of the State's development strategy. There was no denying the fact that the developmental efforts succeeded to some extent, in achieving the main goals of the Five Year Plans. These included reduction in poverty, providing of gainful employment opportunities and raising of per capita income. The agriculture and industrial production increased manifold but equitable distribution of income still remained a problem. In terms of measures of distributive justice, the track record of Himachal Pradesh was a matter of envy for other States.

The overall development measured against social indicators like health, food, nutrition, education including literacy and skills, employment conditions of work, consumption of basic necessities, transportation, housing including household facilities, clothing, recreation and entertainment, social security etc. showed a large disparity among different sections of the society at the National level whereas these disparities were at a fairly low level in HP as compared to all-India situation. Towards further developing the human capital, socio-economic development of human beings was the prime objective of our approach to Ninth Five Year Plan. The strategy aimed to benefit the weaker sections of the society particularly the women and children by well designed affirmative measures. A brief outline of the set of enabling programmes to achieve these objectives is outlined below:-

a) Universalization of Education: Himachal Pradesh had a low literacy rate of only 7% according to 1951 census as against national average of 16.6%. During the course of next 50 years, the State made spectacular achievements by attaining 77.13% literacy rate as against National average of 65.38%. During the Ninth Five Year Plan, education strategy aimed at the disadvantaged sections of the society, particularly the girls and children of SCs/STs/OBCs. As a first step, primary education was made compulsory and preparatory work for the National Programme of *Sarv Shiksha Abhiyan* for achieving the Universal Elementary Education was initiated . It envisaged to provide quality elementary education to all children in the age group of 6-14

years with focus of education of girls and children belonging to SCs/ STs. The main objectives of the programme were as under:-

i) All children in school, Education Guarantee Scheme *'Back to School'* by 2003;

ii) All children to complete 8 years of the schooling by 2010;

iii) Quality Elementary Education for all by 2010;

iv) Focus on elementary education of satisfactory quality with emphasis on education for left-out children;

v) To bridge the gap in respect of gender inequity and social categories at primary stage by 2007 and elementary level by 2010;

vi) To achieve Zero Drop Out Rate by 2010;

The programme was driven by World Bank funding to the Govt. of India which was implemented as a centrally sponsored programme on a 85:15 cost sharing during the Ninth Five Year Plan (1997-02) between the Centre and State Govt. respectively. The sharing pattern will be 75:25 during the tenth Five Year Plan and 50:50 thereafter. The States will have to maintain their level of investment in Elementary Education as in 1999-2000. The contribution as State Share for SSA will be over and above this investment.

An amount of Rs. 155.60 lakh was sanctioned and released by Government of India to the State which was 100% grant-in-aid to the State for pre-project activities. The house hold survey conducted in eight non DPEP districts showed that there were only 6507 out of school children in the age group of 6-14 years as on 30-9-2001 which were less than the 1% of the eligible population. The Govt. of India approved the Annual Work Plan and budget amounting to Rs. 1617.59 lakh and Rs. 2906.38 lakh for the year 2000-2001 and 2003 respectively. The Govt. of India released a sum of Rs. 687.38 lakh during the year 2001-02, while a sum of Rs. 1696.98 lakh received during the year 2002-03.

With the aim of providing a minimum of 3 class rooms in every Primary School of the State, and in order to save the children of the tender age from the vagaries of nature and adverse climatic conditions, the State Government launched an ambitious scheme titled as 'Sarswati Bal Vidya Sankalp Yojna' on the auspicious Himachal Day on 15th April, 1999. Under this yojna, a total number of 13612 rooms were proposed to be constructed at an estimated cost of Rs. 126.11 crores in a phase manner in a period of three years. Infrastructure expansion programme was launched to provide access to all eligible children within one Km. from their respective places. The thrust was on the opening of new institutions based on a comprehensive mapping of the deficient unserved areas. The education sector outlay during Ninth Five Year Plan period aggregated to Rs. 917.21 crore which formed 12.25 % of the aggregate State plan investment outlay of Rs. 7488 Crore for the Ninth Plan period.

The details of education institutions opened during the Ninth Five Year Plan is given in the table no. 3 and 4.

Table-3 Educational Institutions

Sr. No.	Instl tutions	Unit	Targets	Year wise Achievements				Total Achievement (1997-02)	percentage
				1997-98	1998-99	1999-00	2000-01	2001-02	
1.	2.	3.	4.	5.	6.	7.	8.	9.	10.	11.
1.	Primary Schools	Nos.	500	1346	176	100	-	-	1622	324.40
2.	Middle Schools	Nos.	1400	369	300	260	9	-	938	67.00
3.	High Schools	Nos.	400	174	40	62	7	1	284	71.00
4.	Senior Secondary Schools	Nos.	100	142	40	61	11	1	255	255.00
5.	Colleges	Nos.	-	4	1	-	1	3	9	-

Table-4

Enrolment of Students in Elementary Education

Sr. No.	Age-Group	Percentage of Enrolment to Total Population				
		1997-98	1998-99	1999-2000	2000-01	2001-02
1.	2.	3.	4.	5.	6.	7.
1.	6-11 Years:					
(a)	Boys	104	105	103	104	100
(b)	Girls	102	105	103	104	100
Total		103 105	103	104	100	
2.	11-14 Years:					
(a)	Boys	100	100	100	100	101
(b)	Girls	90	90	90	91	96
Total		95	95	95	95.5	98

As is evident from the above data, the enrolment rate in age group 6-11 years was 103 in 1997-98 which rose to 104 during 2000-01. Similarly, the enrolment ratio in age group 11-14 years was 95 in 1997-98 which increased to 95.5 during 2000-01. As such, despite a marked increase in 6-11 years age-group enrolment, the inter age-group retention rate went up by 0.5 percent

b) **Health for All:** The underlying aim during the Ninth Plan was to consolidate the efforts of the State to control birth rate and death rate to provide better health care facilities. The performance in terms of birth rate, death rate and infant mortality rate has reached levels which are better than the national average. The birth rate in 2001 was 21 per thousand. The death rate for the same period was 7 per thousand. In the case of infant mortality rate, Himachal Pradesh achieved a level of 54 per thousand. The simple annual population growth rate recorded by 1981 census was 2.15 which came down to 1.91 according to 1991 census.

c) **Housing:** In a hilly State like Himachal Pradesh, severe climatic con-

ditions make the living of mankind extremely difficult. It makes the reasonable housing availability a necessity of life. For the Ninth Five Year Plan (1997-2002), it was envisaged to construct 31000 Housing units to the people living below the poverty line under *'Gandhi Kuteer Yojna'*. Against this target, 16719 houses were constructed.

d) Safe Drinking Water : Under the basic minimum services programme, supply of safe drinking water in Urban & Rural Areas was given highest priority. The main thrust was to cover 'NC' habitations. The status as on 31.3.2002 was as under :-

NC	PC	FC	Total
1074	10252	34041	45367

The Govt. of Himachal Pradesh has accorded top priority for the coverage of NC and PC (0-10 lpcd.) habitations in the following order :-

i) NC (Main) ii) NC (other)

iii) PC (0-10) Main iv) PC (0-10) Other

Physical and Financial achievements during the Ninth Plan were as under:-

Sector	Financial (Rs.in Lakh)	Physical (Habitations)
State	35959.21	3412 Habs.
Centre	19909.17	5305 Habs.
Total:	55868.38	8718 Habs.

There were 56 Towns in H.P. with the Population of 5.95 lakh. During the Ninth Five Year Plan 1997-2002, funds of the order of Rs. 10720.61 lakh were spent under the State Sector for the augmentation of the Urban Water Supply and schemes for 18 towns were completed. The sectoral spread of the Approved Outlay during the Ninth Five Year Plan (1997- 2002) is given below:-

Sr. No.	Sector	Approved Outlay (Rs. in Crore)	% age to Total Outlay
1.	2.	3.	4.
A.	ECONOMIC SERVICES	4279.19	57.15
B.	SOCIAL SERVICES	3088.67	41.25
C.	GENERAL SERVICES	120.14	1.60
	TOTAL :	7488.00	100.00

It is evident from the above that the Economic Services sector claimed the major share of 57.15 percent of the total Ninth Plan provision. The share of Social Sector stood at 41.25 percent and that of General Services 1.60 percent.

As mentioned above, the Ninth Five Year Plan outlays were approved at 1996-97 prices. However, at the beginning of every successive plans, the

Annual Plan sizes were determined on the basis of current prices each year. Consequently, the approved Ninth Five Year Plan size came to Rs. 7488 crore as against the earlier approved size of Rs. 5700 crore, at 1996-97 prices. Against the approved outlay of Rs. 7488 crore the actual expenditure by the end of plan period was of the order of about Rs. 7896.72 crore. The year-wise details of approved outlay and expenditure of Ninth Five Year Plan 1997-02 are given in the table no 5.

Table-5

Outlay And Expenditure-Annual Plans (1997-98 to 2001-02)

(Rs. in Crore)

Sr. No.	Annual Plan Period	Outlay Originally Approved	Actual Expenditure
1.	2.	3.	4.

3. Performance of State Economy during Ninth Plan 1997-02.

At the outset of the approach and goals set for the Ninth Five Year Plan 1997-02, an average growth rate of 7% was envisaged for the State Economy. Our performance with regard to State Domestic Product and per capita income during the years for which data has become available is given in the table No 7.

TABLE-7

MOVEMENT OF STATE NET DOMESTIC PRODUCT AT FACTOR COST AND PER CAPITA INCOME

Sr. No.	Year	State Income At Constant Prices (Rs.In Crore)	Per Capita Income At Current Prices (Rs.in Crore)	Annual Growth Rate At Constant Prices (In Rs.)	At Current Prices (In Rs.)	State Domestic Product	per Capita Income
1.	2.	3.	4.	5.	6.	7.	8.
1.	1997-98	5571.01	7806.98	9625	13488	7.1	5.3
2.	1998-99	5966.28	9507.46	10131	11644	7.1	5.3
3.	1999-2000	6621.85	10882.00	11051	18160	10.1	9.1
4.	2000-01	7026.80	11887.00	11563	19560	6.1	4.6
5.	2001-02	7379.73	13212.00	11936	21368	5.0	3.2

The above table shows that State Income estimates based on the 1993-94 prices. According to these estimates, the State income of Pradesh during 1997-98 to 2001-02 period increased from Rs. 5571.01 crore to Rs. 7379.73 crore at constant prices and Rs. 7806.98 to Rs. 13212.00 crore at current prices. The per capita income at constant prices increased from Rs. 9625 in 1997-98 to Rs. 11936 in 2001-2002 while at current prices it rose to Rs. 21368 during the same period. It may also be seen that the target for economic growth set for the Ninth Plan was realised by Himachal Pradesh. The economy grew at an average rate of growth which was marginally higher than the envisaged target.

Review of 10th Five Year Plan 2002-2007

The 10th Plan (2002-2007) envisaged a growth of 8.9 per cent for the State. The State economy posted an impressive annual growth rate of 5.1 %, 8.1 %, 7.6% per annum during the first three years of the 10th Plan. The pace of

growth witnessed a significant upward trend with that of National Economy and according to quick estimates based on 1999-2000 prices; the State's economy achieved an average growth rate of about 8 % during the 10th Plan. The size of the State's Tenth Five Year Plan (2002-2007) was originally approved at Rs. 10,300 crore and was agreed to be financed by total Central Support of Rs.5440 crore. The share of central assistance was anticipated to be 52.8 per cent.

Objectives Envisaged

(i) Hydel capacity addition of 6100 MW by 2010.

(ii) The State's free power share was aimed at 800 MW by 2010 thereby envisaging generation of annual revenue of about Rs. 700-800 crore.

(iii) To enhance the productivity in the agriculture/ horticulture and quality of crops by way of replacement of low productive varieties of crops with high yielding varieties.

(iv) Vegetable production target of 10 lakh tonnes by 2007.

(v) Diversification towards high valued crops by adopting project approach.

(vi) Emphasis on increasing of area under irrigation by tapping all smaller sources of water including rainwater harvesting structures through peoples' participation.

(vii) Upgradation of air, rail, and road access and improvement of power, water, communication and other basic facilities.

(viii) Universal rural connectivity to open up the economy.

(ix) Providing drinking water to all the PC /NC habitations.

(x) Attracting large-scale private investment in IT & BT sectors, besides a quantum jump in the industrial investment at large in pursuance of the new package of incentives announced by the Government of India.

(xi) To increase private sector participation in tourism both as means of generating employment and building sound infrastructure.

(xii) Consolidate the gains made in the social services sector.

2. State Plan Outlays: In 10th plan also, the State Government resolved to continue with greater emphasis on human resource development, increasing agricultural production, expansion of infrastructure, provision of basic amenities, generating adequate employment opportunities and removal of regional/ social disparities. The Social Services Sector was accorded the highest priority by making an allocation of 47.50 per cent of the aggregate plan outlay of the Tenth Plan. The sectoral spread of the approved outlay and priorities is given in the table no 1.

The higher allocation for Social Services Sector aimed at making adequate budget provision for:-

i) Coverage of all school going children in the age group of 6-14 years under Sarv Shiksha Abhiyan and providing of elementary education to all

upto the Middle Standard.

ii) Resolving of potable drinking water problem by fully covering the NC / PC habitations.

iii) Remedy the inadequate and poor health delivery system, providing of infrastructural facilities in all medical institutions and improving of health care facilities.

iv) Construction of housing units for families living below the poverty line.

v) Expanding the coverage of social security pension.

Table - 1

Sector wise Outlay & Priorities of 10th Plan (Rs. in Crore)

Sr. No.	Sector	Approved outlay (2002-07)	Percentage	Priority
1.	2.	3.	4.	5.
1.	Agriculture & Allied Services	1201.69	11.66	IV
2.	Rural Development	415.49	4.03	VI
3.	Irrigation & Flood Control	453.17	4.40	V
4.	Energy	1257.68	12.21	III
5.	Industry & Minerals	104.73	1.05	VIII
6.	Transport & Communication	1638.05	15.90	II
7.	Science, Technology & Environment	6.42	0.06	X
8.	General Economic Services	223.74	2.17	VII
9.	Social Services	4893.48	47.50	I
10.	General Services	105.55	1.02	IX
	Total	**10300.00**	**100.00**	

At the instance of Govt. of India which advised State Govt. to transfer all committed liabilities till the end of the 9th plan to non-plan to enable the Finance Commission to make a proper assessment of the State's non-plan revenue deficit after devolution, the State Govt. felt that transfer of these committed liabilities was required as a first step of the State's fiscal reforms strategy, since they were artificially inflating the plan size year after year, which in turn had resulted in the State Govt. resorting to borrowings. Therefore, the State Govt. as a matter of policy transferred revenue content from plan to non-plan account during the year 2003-04. This transfer of committed liabilities resulted in a dip of Annual Plan size of four Annual Plans 2003-04 to 2006-07, which in real terms were capital, oriented Annual Plans.

As a result of this exercise, committed liabilities of the order of Rs. 836 crore based on the actual expenditure of the year 2001-02, like salaries, wages, scholarships, grant-in-aid and pension and other liabilities pertaining to establishment being charged to plan side for quite a long period of time were transferred to non plan. However, the committed liabilities of Health, Ayurveda and Water Supply sectors could not be transferred to the non-plan because of some administrative reasons. This decision also led to reduction of overall plan

size of the Tenth Plan 2002-07. Thus, the target of achieving a plan expenditure of Rs. 10,300 crore in real terms could not be realized. The State incurred an expenditure of Rs. 8880.31 Crore by the end of the plan period. The expenditure shifted to non-plan comprised of the revenue expenditure, to which no physical content was attached. In other words, there was no erosion in physical targets, which in any case have been achieved and in fact, surpassed in some core sectors by the end of five year's period.

The annual plans sizes for 2002-03, 2003-04, 2004-05, 2005-06 and 2006-07 were fixed at Rs. 1840.00 crore, Rs. 1335.00 crore, Rs. 1400.38 crore, Rs. 1600.00 crore and Rs. 1800.00 crore respectively. Thus, in nominal terms, the final aggregate Tenth Plan outlay for Himachal Pradesh works out to Rs. 7975.38 crore. The State Government endeavored to implement the development programmes in totality despite a very difficult fiscal situation. The State Government made strenuous efforts to ensure that the approved annual plans are implemented in full. The annual plan wise position of outlay and expenditure is given in table No. 2.

Table - 2

Sector Wise Outlay and Expenditure

(Rs. in Crore)

19.	Construction of Housing Units	Nos.	31573	32731	103.67
20.	Hand pumps installed	Nos.	5000	3535	70.70

4. Growth Trends: As has been said earlier that the State's targeted growth rate was 8.9 per cent, mid term appraisal assessed this growth rate at 6.9 per cent. As per latest estimates, the average annual growth rate of 10th Plan was expected to be 8%.

5. Implementation of Special Programmes

1. Pradhan Mantri Gramodya Yojana (PMGY): During 2000-2001, Govt. of India started a new programme viz. PMGY (Pradhan Mantri Gramodya Yojana). This new programme replaced the ongoing Basic Minimum Services (BMS). The programme envisaged earmarked provisions for

five components of the BMS excluding PDS. As the major focus remained on Human Development which has shifted the basic approach of development planning from mere material attainment in general, and growth of per capita income in particular to planning for development of human well being. The results can be evidenced in indicators of health, longevity, literacy, environmental sustainability etc. The financing of the programme titled as PMGY through ACA was discontinued w.e.f. 1.4.05 but the ongoing activities continued as such.

Further, to meet the inadequacies in rural and urban infrastructure both in social and economic terms, special infrastructure development and employment generation programmmes like Bharat Nirman Yojana, National Rural Health Mission, National Rural Employment Guarantee Act and Sarv Shiksha Abhiyan were launched by the Central Govt. during the 10th plan period . The focus was to build a strong base for the development of productive sector viz. Agriculture, Horticulture, Industry, Tourism etc. of the economy. To provide access to basic facilities such as health, education, clean drinking water and sanitation, to the large pockets of population has not only benefited those who live below the poverty line and remained deprived of such amenities so far, but acted as catalyst for accelerating the growth process.

2.Bharat Nirman

Bharat Nirman was a time bound professional plan for four years (2005-09) for the development of basic rural infrastructure. The action was anticipated in the field of Irrigation, Roads, Rural Housing, Rural Water Supply, Rural Electrification and Rural Telecommunication. The government targeted special goals that was to be achieved under these programmes so that accountability in the progress of it can be ensured. The component-wise status of implementation of Bharat Nirman Yojna is as under:-

i) Road Connectivity: All the habitations in the State with a population more than 500 were to be connected with the all weather roads by the end of year 2009. The funding is available from the Govt. of India under Bharat Nirman. The target under Bharat Nirman had been to connect 625 habitations with 2,378.135 kms of all weather roads by 2009. By 31st March, 2008 a total of 597 habitations have been connected by constructing 3980.159 kms of all weather roads meaning thereby that a balance of 28 habitations still remain to be connected. A total amount of Rs. 693.76 crore was released by the GOI under PMGSY and spent on this component upto 31st March, 2008. Year – wise physical and financial progress under this component of Bharat Nirman was as follows:-

Physical & Financial Progress

Component	Total target under Bharat Nirman	Physical Achievement 2005-06	2006-07	2007-08	Total	Balance to be achieved	Financial Releases (Rs. In crore) 2005-06	2006-07	2007-08	total
1	2	3	4	5	6	7	8	9	10	11
ROADS										
1. Habitation (No.)	625	187	145	265	597	28				
2. Upgradation / renewal Length (Kms)	4713.376	0	1095.710	1301.337	2397.047	2316.329	122.74	289.02	282.00	693.76
3. New Connectivity Length (Kms)	2378.135	1361.700	1502.929	1115.530	3980.159	-				

ii) Irrigation: Himachal Pradesh envisaged bringing 88,200 hectares of additional area under irrigation by 2009 through funding under AIBP. However, due to AIBP funding constraints, the state was able to cover 14,887 hectares of additional area by the end of the financial year 2007-08 starting from the year 2005-06 with a total investment of Rs. 148.06 crore. Component–wise physical and financial progress is as under:-

Component	Total target under Bharat Nirman	Physical Achievement 2005-06	2006-07	2007-08	Total	Balance to be achieved	Financial Releases (Rs. In crore) 2005-06	2006-07	2007-08	Total
1	2	3	4	5	6	7	8	9	10	11
IRRIGATION										
1. Major & Medium Irrigation (thousand hect.)	22.17	0.30	2.22	0.457	2.977	19.193	16.06	23.43	49.33	88.82
2. Minor Irrigation (thousand hect)	66.03	7.26	2.20	2.450	11.91	54.12	14.02	18.12	27.10	59.24

iii) Rural Water Supply: The funds for the purpose was available through ARWSP. After assessing the pace of implementation of the programme the revised targets was to cover 9,389 (NC) habitations and 22,347 slipped back habitations by 2009. By the end of the year 2007-08, a total number of 4283 (NC) and 5253 slipped back habitations were covered by spending an amount

of Rs. 387.56 crore. The following table briefly depicts the physical and financial achievements of this component of Bharat Nirman:-

Physical & Financial Progress

Component	Total target under Bharat Nirman	Physical Achievement 2005-06	2006-07	2007-08	Total	Balance to be achieved	Financial Releases (Rs. in crore) 2005-06	2006-07	2007-08	Total
1	2	3	4	5	6	7	8	9	10	11
DRINKING WATER										
1. Not Covered (NC)	9389	1123	1678	1482	4283	5106	118.95	151.15	117.46	387.56
2. Slipped Back	22347	827	2016	2410	5253	17094				

iv) Housing: The Ministry of Rural Development run Indira Aawas Yojana was included in Bharat Nirman to provide houses to the houseless rural poor. The funding pattern between GOI and GOHP had been in the ratio of 75:25. Against the target of providing 10,174 housing units, a total of 10,275 housing units have were constructed or were nearing completion with a total investment of Rs. 29.42 crore. Thus the targets fixed under this component have been achieved well ahead of time. Physical and financial progress has been briefly summed up in the following table:-

Physical & Financial Progress

Component	Total target under Bharat Nirman	2005-06	Physical Achievement (N0) 2006-07	2007-08	Total	Balance to be achieved	Financial Releases (Rs. in crore) 2005-06	2006-07	2007-08	Total
1	2	3	4	5	6	7	8	9	10	11
HOUSING										
IAY.	10174	2929	3317	4029	10275	-	8.49	9.39	11.54	29.42

v) Rural Electrification: Rajeev Gandhi Grameen Vidyutikaran Yojna (RGGVY) was included under Bharat Nirman. The target of universal electrification in a period of four years was fixed. Initially, plan for all the twelve districts of Himachal Pradesh with an estimated cost of Rs. 455.03 crore had been submitted to the M/S REC. However, these estimates were revised to Rs. 205.26 crore in conformity with the guidelines for implementation of RGGVY. So far, 10 schemes for Chamba, Una, Kangra, Hamirpur, Bilaspur, Mandi, Solan, Kullu, Sirmaur and Shimla Districts, amounting to Rs. 191.13 crore were sanctioned. The first installment of Rs. 7.33 crore were released and work is under execution. The sanction of schemes for remaining two districts (Kinnaur & Lahaul Spiti) amounting to Rs. 14.12 crore was still awaited.

vi) Rural Telephone Connectivity: This is not a scheme under the State Plan but has been included in the Bharat Nirman. Such villages which do not have Public Telephone Booths in Himachal Pradesh are proposed to be provided this facility under Bharat Nirman. As per the provisions of an agreement with the BSNL, 1,002 such villages were to be provided this facility by November, 2007. As on 31.03.2008, Village Public Telephones (VPTs) had been provided in 870 villages. Out of 1002 identified villages, 2 are uninhabited. The progress in this direction is recorded in the following table:-

Physical Progress

Component	Total target under Bharat Nirman	Physical Achievement				Balance to be achieved
		2005-06	2006-07	2007-08	Total	
1.	2.	3.	4.	5.	6.	7.
TELEPHONE CONNECTIVITY						
Village (No.)	1002	-	633	237	870	132

3. National Rural Health Mission (NRHM): The National Rural Health Mission (NRHM) was launched on 12th April, 2005 with the objectives of universal access to public health services, prevention and control of communicable and noncommunicable diseases, access to integrated comprehensive primary health care, revitalizing local health traditions and promotion of healthy life style. Release / allocation of grant under NRHM during 2005-06, 2006-07 and 2007-08 had been of the order of Rs. 718.70 lakh, Rs. 3074.31 lakh and Rs. 1083.90 lakh, respectively.

Physical Progress

-ASHA: The State Govt. has taken a policy decision to place AWW as link worker in place of ASHA.

-1172 Swasthya Sahayaks are proposed to be put in place in the Panchayats where Health Sub-Centres do not exist.

-District and Block Programme Management Units are in place in all the Districts.

-125 Rogi Kalyan Samitis at various levels.

-95 PHCs working 24x7

-36 CHCs upgraded to First Referral Units.

-Mobile Medical Units (MMUs) proposed to be set up in all the Districts and the process was in the finalization stages.

-During 2007-08 (upto March, 2008) 9991 beneficiaries of Janani Suraksha Yojna.

-District Health Action Plans for all 12 Districts were in various stages of finalization.

Financial Progress

4. National Urban Renewal Mission (NURM)

Shimla was the Mission city for which MOU has been signed.

Urban Infrastructure and Governance (UIG) :- Two projects of widening of road and Solid Waste Management were sanctioned with the approved cost of Rs. 2613.06 lakh (Rs. 1009.06 lakh + Rs. 1604.00 lakh, respectively) and an amount of Rs. 104.52 lakh as central assistance had so far been released.

Basic Services to Urban Poor (BSUP):- Two projects pertaining to housing with a total approved cost of Rs. 2410.54 lakh had been sanctioned for which central share amounting to Rs. 456.66 lakh was released.

Integrated Housing and Slum Development Programme (IHSDP):- Three projects with a total approved cost of Rs. 2343.93 lakh were sanctioned under this scheme for the State. An amount of Rs. 170.80 lakh was released as central assistance.

Urban Infrastructure Development Scheme for Small and Medium Towns

(UIDSSMT):- Under this scheme, 11 projects in three towns with a total cost of Rs. 2706.41 lakh were sanctioned for which central share amounting to Rs. 749.45 lakh was released against the approved central share of Rs. 2165.12 lakh.

5. Sarva Shiksha Abhiyaan (SSA): Launched in 2001-02 in Himachal Pradesh, Sarva Shiksha Abhiyan is being implemented by the Himachal Pradesh Primary Education Society cum Sarva Shiksha Abhiyan Mission Authority. The main objectives of the programme are- Universal Access, Universal Enrollment, Universal Retention and Quality Education etc. The cost sharing between the GOI and the GOHP was in the ratio of 85:15 till 2001-02; and 75:25 till 2007. For the current financial year 2007-08 and for 2008-09 it was to be 65:35 and it was to be 55:45 for the year 2010-11 and 50:50 thereafter.

Salient Features

- 25476 Children With Special Needs (CWSN) were identified out of which 23011 were in formal schools and 2405 were out of school. As many as 420 were being covered by 15 NGOs and 3 Day Care Centres were taking care of 46 more.

- 4,075 out of school children were identified and efforts were on to enroll them in the Education Guarantee Centres (EGCs)

- 33% of the total budget was being utilized for civil works for improving infrastructure in schools. 8859 classrooms, 54 Block Resource Centres, 538 Cluster Resource Centres, 4948 toilets, 2312 drinking water facilities and 2474 boundary walls were sanctioned. Out of the above sanctioned works, 6332 classrooms had been completed and 2253 were in the process of completion; 39 Block Resource Centres have been completed and 12 were in the process of completion; 405 Cluster Resource Centres were completed and 130 were in the process of completion; 4385 toilets had been completed and 364 were in the process of completion; 2160 drinking water facilities had been completed and 131 were in the process of completion; and, 1963 boundary walls had been completed and 341 are in the process of completion as on 31st March, 2008.

- Various programmes for training teachers and providing computer education and computer aided learning had been started in different schools in partnership with the NIIT and Azim Premji Foundation and 'Intel'. 15000 teachers were to be covered in 2 years and 1000 teachers had already been provided training.

2007-08	4	12835.70	16428.72	12564.89	271099

No. of man days (in lakh) generated

Year	Total	SC	ST	Women
2005-06	0	0	0	0
2006-07	29.90	9.09	6.70	3.66
2007-08	97.53	31.51	10.76	29.36

The programme was started in two districts of Chamba and Sirmaur during 2005-06 and was then extending to two more districts of Mandi and Kangra during the year 2007-08. Hence, 4 districts viz. Chamba, Sirmaur, Kangra and Mandi out of total 12 districts in Himachal Pradesh were initially covered under NREGA. However, the programme has been extended to all the remaining eight districts of the State w.e.f. 1/4/2008. The State Government of Himachal Pradesh had fixed a wage rate of Rs. 100/- w.e.f. 1st January, 2008. The scheme was shared by the GOI and the GOHP in the proportion of 90:10.

Review of 11th Five Year Plan-2007-12

The 11th Five Year Plan (2007-12) had a resolution of 'faster' and 'more inclusive growth'. This resolution was adopted by the National Development Council in its meeting held on 19th December, 2007. The main focus was on revival of agriculture, rural development, delivery of essential services and livelihood support. The Planning Commission had set a target of an average annual growth rate of 9.5% for Himachal Pradesh during the 11th Five Year Plan period against the national target of 9% per annum. The major plan objectives of 11th Five Year Plan were provision of essential public services, increasing farm incomes, developing better infrastructure, nurturing human capital, protecting the environment and improving governance. However, the focus remained on poverty reduction, enhancement in equity among various sections of the society and balanced regional development.

In this perspective, the important areas which were required to be addressed include the following:-

i. To reverse deceleration in agriculture growth and improve the productivity in Agriculture and Horticulture.

ii. Accelerate the pace to harness the huge hydro-power potential in the State.

iii. Accelerate the process of industrialization especially for employment generation.

iv. Consolidation and qualitative improvement of Social Services.

v. Improving the quality of infrastructure especially in the areas of Transport, Power, Rural Water Supply and Sanitation.

vi. Capitalize natural advantages in tourism, bio-diversity, medicinal and aromatic herbs, organic cultivation etc. for diversifying the economy and raising income of the masses.

vii. Opening up the economy for private sector investment in a manner that sub- serves the interests of the locals.

viii. Creation of productive employment at a faster pace.

1. Provisions for the 11th Plan- 2007-2012

The Planning Commission has approved a Plan Size of '13778.00 crore for the 11th Five Year Plan (2007-2012). The sectoral spread of the approved out-

lays is given in the table below:-

Table-1 Sector – Wise Approved Outlay of 11th Plan

(Rs. in Crore)

Sr. No 1.	Sector 2.	ApprovedOutlay 3.	Percentage 4.	Priority 5.
1.	Agriculture and Allied Activities	1470.08	10.67	III
2.	Rural Development	355.62	2.58	VIII
3.	Special Area Programme	20.47	0.15	XI
4.	Irrigation & Flood Control	1220.62	8.86	IV
5.	Energy	1122.14	8.14	V
6.	Industry and Minerals	177.68	1.29	IX
7.	Transport & Communication	2142.33	15.55	II
8.	Science, Technology & Environment	143.46	1.04	X
9.	General Economic Services	658.05	4.78	VI
10.	Social Services	6060.29	43.98	I
11.	General Services	407.26	2.96	VII
	Total	**13778.00**	**100.00**	

Above Table shows that in terms of financial allocations 'Social Services Sector' was accorded the highest priority, followed by 'Transport & Communication' and 'Agriculture & Allied Activities'. The provision of basic amenities to the masses had been attracted the attention of the State Government and highest priority to social sector was given to accelerate the pace of overall development. The financial progress of 11th Five Year Plan (2007-12) is as follows:-

Table-2

3. Performance of State economy during the 11th Five Year Plan

In 11th Five Year Plan, State economy achieved a growth of 8.1 percent and growth rate at all India level was 7.9%. Both the economies by and large grew in same pace. The following table presents decadal and sector-wise movement of the State Domestic Product:

Table-4

Percentage contribution of Sectoral State Domestic Product (at current prices)

Sl. No.	Sectors	1950-51	1970-71	2001-02	Eleventh Plan (2007-12)
1	Primary	71.01	58.56	25.90	20.79
2	Secondary	9.50	16.73	35.54	40.94
3.	Tertiary	19.49	24.71	38.56	38.27

The above table reveals that primary sector contributed 71.01 percent of the SDP in 1950-51, which declined to 20.79 percent in 11th Five Year Plan and the contribution of secondary sector has increased to 40.94 percent. The tertiary sector which showed a percent contribution of 19.49 in the decade 1950-51 showed a continuous rise up to 2001-02 and its contribution in the 11th Five Year Plan is 38.27 percent. This structural shift from primary to secondary and tertiary sector is a healthy sign of growing economy.

The performance with regard to State Domestic Product and Per Capita Income during 11th Five Year Plan period are given below :-

Table-5

Movement of Net State Domestic Product and Per Capita Income

Sr. No.	Year	State Income		Per Capita Income		Percentage change over the previous years at 2004-05 prices	
		At Constant Prices (Rs. in crore)	At Current Prices (Rs. in crore)	At Constant Prices (in Rs.)	At Current Prices (in Rs.)	Net State Domestic Product	Per Capita Income
1	2007-08	26247	28872	40143	43966	5.8	5.1
2	2008-09	27649	33115	41666	49903	5.3	3.8
3	2009-10 (Provisional)	29149	39141	43492	58402	5.0	3.9
4	2010-11 (Quick)	31684	45661	46821	67475	8.7	7.7
5	2011-12 (E)	33762	51546	48923	74694	6.6	4.5

The State Income of Pradesh during the 11th Five Year Plan period increased from Rs. 26247 crore to Rs. 34379 crore at constant prices and Rs. 28872 crore to Rs. 50797 at current prices. The per capita income at constant prices increased from Rs. 40143 to Rs. 49817 and Rs. 43966 to Rs. 73608 at current prices in the plan period.

4. Implementation of Flagship Programmes during the 11th Five Year Plan

1. Sarav Shiksha Abhiyan (SSA): This Abhiyan was launched in the State during the year 2001-02. The Abhiyan envisages bridging gender and social disparities gaps at elementary level of education. The main focus is on education of girls, scheduled castes, scheduled tribes and children in difficult circumstances. The cost sharing between GoI and State Government was in the ratio of 85:15 and 75:25 till 2001-02 and 2006-07 respectively and further revised to 65:35 and 60:40 till 2008-09 and 2009-10 respectively.

Thereafter, this sharing pattern is 65:35 (AWP&B minus 13th FC Award) till the end of 11th Five Year Plan. The approved outlays for SSA for the 11th Five Year Plan period are ' 98973.68 lakh, against which an expenditure of Rs. 85160.77 lakh (86%) has been incurred. 13th Finance Commission Award has also been supplementing marginally the provision of funds under SSA since the year 2010-11. The financial and physical achievements of the SSA during the 11th Five Year Plan period upto 31st December, 2012 are given on

the tables to follow.

Table-6 Financial Progress of SSA

('in lakh)

Years	Total Approved Outlays	Total Release of Funds	Total Actual Expenditure	Committed State Share	Actual State Share Released	Amount of 13th FC Award Released
2007-08	12198.37	11751.24	10947.08	4112.94	4112.94	0.00

	Drinking Water	2417	2373
	Boundary Wall	3607	3427
	Kitchen Shed	88	87

2. Mid Day Meal Scheme (MDMS)

This scheme was universalized in September, 2004 to all primary schools to enhance enrolment, retention and participation of children in primary schools,besides improving nutritional status of the children studying in 1st to 5th and 6th to 8th classes. However, this scheme was launched on 15th August, 1995 as National Programme of Nutritional Support to Primary Education. This scheme was envisaged to cover all the schools upto the middle school level by 2008-09. This programme was further extended to all the upper primary stage schools with effect from July, 2008. Thus, the scheme stood universalized to all the elementary schools in the State and the national target of coverage achieved. Since 2010-11, component of cooking cost and honorarium of this scheme is being shared in the ratio of 75:25 between the Centre and State.

The parameters of MDMS reflect that an expenditure of Rs. 43162.44 lakh have been incurred during the period of 11th Five Year Plan, which stands at 91.09% of the total funds released by the GoI and State Government. The scheme has not only overcome the problem of malnutrition among children, but also of absenteeism.The cost of food grains/transportation of rice and expenditure on management monitoring and evaluation (MME) is 100% and

met by GoI. The achievements during the 11th Five Year Plan period are as under:-

Table-8 Achievements under MDMS during 11th Five Year Plan

(₹ in lakh)

Year	Approved Outlay	Funds GoI	Released State	Expenditure	Unspent Funds	Units Covered	Children Covered
2007-08	5815.59	4361.61	1453.98	5205.06	610.53	15282	851857
2008-09	13711.70	10462.90	2638.70	12595.19	1116.51	15176	810234

2010-11	10004.36	6487.67	2055.03	9535.54	468.82	15104	741269
2011-12	10393.80	7351.60	2001.00	9672.38	721.42	15898	725813
Total	**47386.66**	**32612.43**	**10544.76**	**43162.44**			

Table-9 Position Delivery Mechanism under MDMS

Year	Allocation of Food grain (MT) Primary/UpperPrimary	Lifting of Food grain (MT) Primary/UpperPrimary
2007-08	12826.40	12505.38
2008-09	21483.21	19236.44
2009-10	21918.39	20852.71
2010-11	19053.63	18415.28
2011-12	20837.86	20836.29
Total	**96119.49**	**91846.10**

During the period of 11th Five Year Plan, 96119.49 MT food grains have been allocated to the schooling units in Himachal Pradesh and the food grains further lifted to schools are 91846.10 MT.

3. Integrated Child Development Schemes (ICDS)

In 1975, Pooh Block of Kinnaur district of Himachal Pradesh was chosen for launching of this scheme which later covered all parts of the State.

The services provided through Aganwadis in ICDS Projects are Supplementary Nutrition, Nutrition and Health Education, Immunization, Health Check-up, Referral Services and Non-formal pre-school Education. Physical and financial performances of AWCs/ Mini AWCs and ICDS Projects upto 31st March, 2012 are given below in the tables.

Table-10

Physical Performance of AWCs/ Mini AWCs and ICDS Projects

Year	Number of ICDS Projects	Number of operational AWCs /Mini AWCs
2007-08	76	18248
2008-09	76	18248
2009-10	76	18248
2010-11	78	18386
2011-12	78	18571

It is observed that 18571 AWCs/ Mini AWCs under 78 ICDS projects are operational in Himachal Pradesh at the end of 11th Five Year Plan.

Table-11

Financial Performance of ICDS Projects under Non-Nutrition Components (Sharing Pattern: GoI: GoHP: 90:10 (w.e.f. 01/4/ 2009) & 100% GoI upto 2008-09)

(Rs.in lakh)

Year	Budget			Expenditure			% of
	GoI	State	Total	GoI	State	Total	Expenditure
2007-08	6099.13	- 6099.13	4743.66	-	4743.66	77.78	
2008-09	7227.83	- 7227.83	7206.10	-	7206.10	99.70	
2009-10	8674.68	875.13	9549.81	8288.90	875.13	9164.03	95.96
2010-11	9123.00	928.29	10051.29	8692.75	842.09	9534.84	94.86
2011-12	13730.08	854.22	14584.30	13191.44	771.81	13963.25	95.74
Total	**44854.72**	**2657.64**	**47512.36**	**42122.85**	**2489.03**	**44611.88**	**93.90**

During the period of 11th Five Year Plan, an expenditure of 93.90% has been incurred under non-nutrition components of ICDS.

The other programme under ICDS is Supplementary Nutrition Programme (SNP). Supplementary nutrition is being provided to the beneficiaries in the State in the form of Take Home Ration (THR), Morning Snack and Hot Cooked Meal (HCM). THR is given to the children in the age group of 6 months to 3 years in the form of nutrimix, sweet dalia and khichari. Morning snack is distributed to the children in the age group of 3-6 years in the morning in the form of nutrimix. Under Hot Cooked Meal, khichari, sweet dalia and sprouted gram are provided in the afternoon to pregnant women & lactating mothers and BPL adolescent girls. BPL adolescent girls who are getting nutrition under MDM scheme are not eligible under SNP.

Table-12

Financial Performance of ICDS Projects under Supplementary Nutrition

Programme (Sharing Pattern: GoI: GoHP: 50:50)

(Rs. in lakh)

Year	Budget			Expenditure			% of
	GoI	State	Total	GoI	State	Total	Expenditure
2007-08	1017.58	903.00	1920.58	1017.58	903.00	1920.58	100.00
2008-09	2282.58	2260.00	4542.58	2282.58	2260.00	4542.58 1	00.00

2010-11	2466.48	2817.25	5283.73	2466.48	2817.25	5283.73	100.00
2011-12	2819.49	2919.25	5738.74	2819.49	2819.25	5638.74	98.26
Total	**11525.49**	**11899.5**	**23424.99**	**11525.49**	**11799.5**	**23324.99**	**99.57**

Over the period of 11th Five Year Plan, an expenditure of 99.57% has been incurred which in terms of financial aspect is appreciable.

Table-13

Physical Performance of ICDS) - SNP (SNP Beneficiaries)

Year	Women	Children	Adolescent Girls
2007-08	99129	433813	91577

2008-09	97402	424731	95944
2009-10	98073	418221	83800
2010-11	98952	422261	77658
2011-12	101704	433293	40921

4. National Rural Health Mission (NRHM): National Rural Health Mission (NRHM) was launched in the year 2005-06 by pooling of all the family welfare schemes and major disease control programmes. NRHM in terms of coverage and resource pooling included the Centrally Sponsored Scheme (CSS) of Vector Borne Diseases, Tuberculosis, Leprosy, Iodine Deficiency Disorders, Blindness and Integrated Disease Surveillance. The expenditure of NRHM is incurred on various schemes under RCH flexi pool, Mission flexi pool, UIP, DCPs and Inter Sectoral convergence. The situation of Himachal Pradesh can better be understood from the financial and physical progress of NRHM, the detail of which upto 31st March, 2012 is in the tables to follow.

Table-14 Financial Progress under NRHM
(Sharing Pattern: 85: 15 :: GoI: GoHP)

(Rs. in crore)

Year	Allocation in Annual Plan	Funds from GoI	State Share	Total	Expenditure Incurred	%age of Expenditure
Upto31-3-2007	73.11	61.90	0.00	61.90	24.59	39.73
2007-08	84.35	22.79	0.00	22.79	16.49	72.36
2008-09	123.10	76.69	10.65	87.34	74.33	85.10
2009-10	143.30	97.68	14.80	112.48	143.41	127.50
2010-11	150.06	114.13	20.00	134.13	128.63	95.90
2011-12	144.63	127.28	23.00	150.28	148.75	98.98
Total (2007-08 to 2011-12)	**645.44**	**438.57**	**68.45**	**507.02**	**511.61**	**100.91**

The financial progress of NRHM under the period of 11th Five Year Plan reveals that an expenditure of Rs. 511.61 crore has been incurred against the total releases of ' 507.02 crore, which stands at 100.91%, but this expenditure is 79.27% of the total allocation.

Table-15 Physical Progress of Specific Parameters under NRHM
(Sharing Pattern: 85:15:: GoI:GoHP)

		Target	Ach.	Target	Ach.	Target	Ach.	Target	Ach.	Target	Ach.
1.	Family Planning cases in camps	-	30480	-	30812	33710	27616	33710	23638	23500	22858
2.	No. of Institutional deliveries (lakh)	-	0.57	-	0.59	-	0.55	-	0.65	-	0.71
3.	Incentives to Mothers under JSY (lakh Nos.)	0.11	0.10	0.14	0.13	0.15	0.16	0.35	0.21	0.30	0.21

In addition to it, the detail of the progress of other physical items is as under:-

1) The government of Himachal Pradesh has taken a policy decision to place anganwari workers as link worker in place of ASHA. Accordingly, the matter was reflected in the PIP which has been approved by GOI.

2) There are 2065 Health sub-centre in the state.

3) District and Block Programme Management Units are in place in all the Districts.

4) 572 Rogi Kalyan Samitis have been set up in various medical institution upto PHC level.

5) 94 PHCs working as 24x7

6) 61 DH/CH/CHC have been indentified for the upgradation as First Referral Units, out of which 16 FRUs are functional.

7) Mobile Medical Units (MMUs) proposed to be set up in 10 Districts and the process is in the finalization stages.

8) District Health Action Plans have been prepared for all the Districts.

5. Mahatma Gandhi National Rojgar Employment Guarantee Act (MGNREGA)

This scheme was made effective from 2nd February, 2006 in Chamba and Sirmour districts, and covered all districts upto 1.4.2008 in Himachal Pradesh. The objective of this scheme is to provide livelihood security to the households in rural areas of the State by ensuring 100 days generated wage employment in each financial year to every household whose adult members volunteer to do unskilled manual work.

The performance of MGNREGA during the period 11th Fiver Year Plan has been attempted to know its real impact on rural life in tables to follow.

Table-16

Financial Progress under MGNREGA during 2007-08 to 2011-12

(Sharing Pattern: 90:10:: GoI: GoHP)

(` In crore)

Year	Opening Balance	Central Share	State Share	Miscellaneous Receipt	Total Funds Available	Total Expt.	%age of Exp.
2007-08	19.81	128.53	13.51	2.61	164.46	125.66	76.41
2008-09	55.47	410.11	33.25	2.08	500.91	332.28	66.34
2009-10	168.62	375.47	53.11	5.57	602.77	556.56	92.33
2010-11	103.87	656.18	56.11	14.64	830.80	535.74	64.48
2011-12	295.06	311.38	45.70	8.36	660.50	509.98	77.20
Total		**1881.67**	**201.68**	**33.26**	**2759.44**	**2060.22**	**74.66**

It is clear from the financial progress of MGNREGA that during the 11th Five Year Plan period 74.66% expenditure has been incurred despite the fact that it is a demand driven rural employment guarantee act.

Table-17 Physical Progress under MGNREGA

(Sharing Pattern: 90:10:: GoI: GoHP)

Year	No. of Households Issued Job Cards (cumulative)	No. of Households Demanded Employment	%age of Wage Seekers	No. of Households Provided Employment	Total Mandays Generated (In lakh)	Mandays Generated by SCs/STs (In lakh)	Mandays Generated by Women (In lakh)
2007-08	393751	275463	69.96	271099	97.53	42.27	29.36
2008-09	849993	453724	53.38	445713	205.29	84.40	80.09
2009-10	994969	499174	50.17	497336	284.94	119.84	131.32
2010-11	1050602	447064	42.55	444247	219.46	89.48	105.90
2011-12	1096589	528210	40.91	504671	269.04	96.79	158.81

The number of households provided employment during the 11th Five Year Plan period is on increasing trend, but it was on reverse trend during the 4th year of the plan period. In the last year, it has gone up. During this period, maximum mandays of 284.94 lakh were generated in the year 2009-10 when wage seekers were 499174 (50.17%).

6. Indira Awas Yojna (IAY)

This scheme was launched as an independent and major housing device on 1st January, 1996 to provide assistance for the construction and up-gradation of the dwelling units for the BPL rural households. The selection of beneficiaries is done by the Gram Sabha. This scheme is being implemented in the ratio of 75:25 between GoI and State Government. From 2010-11, Government of India has raised cost norms for construction of dwellings to ' 45,000 per unit for general areas and ' 48,500 for the hill areas. The physical and financial progress of this scheme during the 11th Five Year Plan period is given in the tables to follow.

Table-18 Financial Progress of Indira Awas Yojna

(Sharing Pattern: 75:25:: GoI : GoHP)

(Rs. in lakh)

Year	Actual Release of Funds			Actual Expenditure (Centre + State)	percentage of Exp.
	Centre	State	Total		
2007-08	866.94	286.37	1153.31	1150.24	99.73
2008-09	1725.44	487.23	2212.67	2007.43	90.72
2009-10	1823.21	785.36	2608.57	3003.34	115.13
2010-11	2093.25	835.02	2928.27	2979.01	101.73
2011-12	2029.83	675.33	2705.16	2765.26	102.22
Total	**8538.67**	**3069.31**	**11607.98**	**11905.28**	**102.56**

During the period of 11th Five Year Plan, Rs. 11607.98 lakh have been released for the construction of dwellings in rural areas. Against this release, Rs. 11915.28 lakh have been spent, which account for 102.56%.

Table-19

Physical Achievements under IAY

(Sharing Pattern: 75:25 - GoI: GoHP)

Year	Targets	Actual Achievement Cumulative Achievements carryforward from 2002-03 to 2006-07 (36932)	Cumulative
2007-08	4242	4029	40961
2008-09	4634	4501	45462
2009-10	8229	9236	54698
2010-11	5793	5924	60622
2011-12	5659	5972	66594
Total	**28557**	**29662**	

During the 11th Five Year Plan period, 29662 units have been constructed/ upgraded against a target of 28557 units under IAY. The total achievement since 2002-03 is 66594.

7. Pradhan Mantri Gram Sadak Yojna (PMGSY)

On 15th August, 2000, Hon'ble Prime Minister announced the PMGSY. The scheme is 100% centrally sponsored with the objective of connecting every village of India with the all weather roads with necessary culverts and cross drainage structures. The project was started in December, 2000. In respect of Hill State like Himachal Pradesh, the objective was to connect habitations with a population of 250 persons and above. PMGSY covers only the rural roads and urban roads are excluded from it purview.

Table-20

Parameters Required for Connectivity of Habitations (2009)

Range	No. of Habitation	Length required for connectivity (Kms.)	Average length per habitation (Kms.)
1000 & above	164	975.800	5.950
500-999	804	3673.082	4.569
250-499	2402	8839.526	3.680
Below 250	7298	766.484	1.049
Total	**10668**	**13488.408**	**1.264**

Himachal Pradesh has received Rs. 1211.53 crore from GoI under PMGSY against the sanctioned amount of projects of Rs. 815.24 crore at end of 11th Five Year Plan. The expenditure incurred on the implementation of this Yojna is Rs. 980.16 crore (80.90%).

The data on the pace of expenditure and the physical achievements under PMGSY during 2007-08 to 2011-12 is given below:

Table-21 Financial Progress under PMGSY
(Sharing Pattern: 100% by GoI):

(Rs. in crore)

Year	Amount of Funds Received				Expenditur	% age
	sanctioned Projects	GoI	State Share	Total	Incurred	Expenditure
Upto 31-3-07	1780.32	622.69	-	622.69	665.02	106.80

Table-22 Physical Progress under PMGSY
(Sharing Pattern: 100% by GoI):

Year	Target		Achievement			
	Habitations (Nos.)	Road length (Kms)	Habitations Nos.	%	Road length Kms	%
2007-08	163	1298.00	265	162.58	1301.34	100.26
2008-09	300	1260.00	521	173.67	1357.98	107.78
2009-10	250	1500.00	189	75.60	1507.84	100.52
2010-11	90	594.00	98	108.89	659.46	111.02
2011-12	100	750.00	67	67.00	751.85	100.25
Total	**903**	**5402.00**	**1140**	**126.25**	**5578.47**	**103.27**

During the period of 11th Five Year Plan, achievements under habitation connectivity and road length are 126.25% and 103.27% respectively.

8. Jawahar Lal Nehru National Urban Renewal Mission (JNNURM)

Jawaharlal Nehru Urban Renewal Mission (JNNURM) was launched by the Hon'ble Prime Minister of India on 3rd December, 2005 for developing basic infrastructure in 63 cities of India with an aim of economically self-reliant, efficient, equitable and responsive cities with very high transparency and service levels. As per the norms of JNNURM, Shimla is the only city in Himachal Pradesh which has qualified to be included in the Mission and that too has been possible because Shimla is a State Capital. There are four components of the Mission which are being implemented in Himachal Pradesh, the detail of which is as under:-

(i) Urban Infrastructure and governance (UIG).

(ii) Basic services to the urban poor in Shimla (BSUP).

(iii) Integrated housing and slum development programme in other town of the State (IHSDP).

(iv) Urban Infrastructure Development Scheme for Small & Medium Towns (UIDSSMT). The financial status on these components during the 11th Five Year Plan period, upto 31st March, 2012, is on the table to follow.

9. **Accelerated Irrigation Benefit Programme (AIBP):** Government of India initiated AIBP in 1996-97 under which central assistance is being provided to irrigation schemes for early completion and extending the base of additional irrigation. All such projects, which have investment approval available from the Planning Commission in the category of Major & Medium Irrigation and Flood control projects, are eligible for availing of the assistance. The financial and physical progress under AIBP is given in the tables to follow.

	III. Flood Management	
2007-08	800	840
2008-09	800	824
2009-10	1112	1122
2010-11	1260	1262
2011-12	1000	3153
Total	**4972**	**7201**
Total(I+II+III)	**34072**	**37505**

In physical progress of AIBP during the period of 11th Five Year Plan, it can be concluded that under three components of AIBP, the potential of 34072 hectares was targeted. Against this target, 37505 hectares have been covered, which stands at 110.08%. In flood management, the utilization of potential is 7201 hectares and creation of potential is 4972 hectares over this plan period. In other two components, creation and utilization of potential is almost equal.

10. Accelerated Rural Water Supply Programme (ARWSP)

The GoI in its endeavour to provide safe drinking water supply facility in rural areas first introduced a programme called Accelerated Rural Water Supply Programme (ARWSP) in the year 1972-73. This was withdrawn and a new programe called Minimum Needs Programme was introduced. But, ARWSP was reintroduced in the year 1977-78. During the year 2003, fresh survey was conducted by the GoI, according to which 51848 habitations have been identified including habitations of CAP-1999. The update status of habitations as on 1st April, 2005 comprises of 9389 non-covered, 22347 partially covered and 20112 fully covered habitations. But, with the coming in force of National Rural Drinking Water supply guidelines with effect from 1st April, 2009, after realignment/ mapping of habitations, there are 53205 habitations in the state. Out of which 19473 habitations have inadequate drinking water supply. All these 19473 habitations will be covered in the phased manner by March, 2017 in line with the GoI guidelines. The physical and financial achievements of this component of ARWSP are given in the tables to follow.

Table-26 Financial Progress of ARWSP

(Sharing Pattern: GoI:GoHP::50:50)

(Rs. In lakh)

Year	Allocation in Annual Plan	Funds Received GoI	State Share	Total	Expenditure Incurred	%age Expenditure
2007-08	11690.00	11690.00	-	11690.00	11872.44	101.56
2008-09	14082.00	14082.00	-	14082.00	14102.75	100.05
2009-10	13144.79	13144.79	-	13144.79	13440.64	102.25
2010-11	23101.97	23101.97	-	23101.97	14811.79	64.11
2011-12	10256.00	14025.00	16778.56	30803.56	32103.19	104.00
Total	72274.76	76043.76	16778.56	92822.32	86330.81	93.01

The financial progress of ARWSP shows that an expenditure of Rs. 86330.81 lakh has been incurred during the 11th Five Year Plan period, which stands at 93.01% of the total releases. The trend of expenditure reflects that during the first three years of this plan period, expenditure under this scheme was more than 100%. The pace of expenditure under programme is appreciable.

Table-27 Physical Progress on Coverage of Habitations under ARWSP

(Sharing Pattern: GoI:GoHP::50:50)

Year	Target	Achievement	%age Achievement
2007-08	4510	4510	100
2008-09	5484	5529	107
2009-10	5013	5175	103
2010-11	5000	5000	100
2011-12	2557	2557	100
Total	**22264**	**22771**	**102.28**

It is clear from the physical progress on the coverage of habitations under ARWSP that total achievement against the envisaged target of 22264 during the period of 11th Five Year Plan is 222771 which is 102.28%.

11. Rajeev Gandhi Gramin Vidyut Yojna (RGGVY)

This yojna was launched by Government of India in the year 2005 with an aim to provide electricity access to all the rural households and extend free connections to all BPL households. This yojna subsidized the capital cost by 90% through grants from the Government of India. The status of RGGVY in Himachal Pradesh during the 11th Five Year Plan period is given in the table to follow.

Table-28 Status of RGGVY

(Sharing Pattern: GoI-REC(loan)::90:10)

Description	Unit	Progress during					Total
		2007-08	2008-09	2009-10	2010-11	2011-12	
Expenditure	Rs. in crore	-	11.40	116.12	84.16	54.71	**266.39**
33 KV HT Line	KM	0.000	0.000	0.000	13.000	3.000	16.000
33 KV S/Stns	Nos.	0	0	0	0	0	0
Aug. of 33KV S/Stations	Nos	0	4	0	4	0	8

Distribution of Transformers	No.	0	79	144	1332	630	**2185**
LT lines	KM	0.000	173.515	544.101	2805.124	1733.989	**5256.729**
Rural Households Electrified(Excl. BPL)	No.	-	807	816	68	12246	**13937**
BPL Households	No.	-	389	151	3637	8432	**12609**

The habitations in Himachal Pradesh owing to hilly terrain topography are dispersed. However, this Yojna has given the status as Himachal Pradesh of universal rural electrification.

12. Rashtriya Krishi Vikas Yojna (RKVY)

Government of India had launched Rashtriya Krishi Vikas Yojna (RKVY) during year 2007-2008 to check the slow growth in Agriculture and allied sectors. The 4% annual growth in the agriculture sector was envisaged during the 11th Plan period. The financial and physical progress of RKVY during the 11th Five Year Plan is given in the tables to follow.

Table-29 Financial Progress under RKVY

(Rs. in lakh)

Year	Opening Balance	Release Made by Centre	State's Contribution	Other Receipts	Total Funds Available	Expenditure	%age of Expenditure
2007-08	0.00	1616.80	0	0	1616.80	1608.11	99.46
2008-09	8.69	1511.00	0	0	1519.69	1485.56	97.75
2009-10	34.00	3303.00	0	0	3337.00	3316.08	99.37
2010-11	20.92	9485.00	0	0	9505.92	9410.22	98.99
2011-12	95.70	9993.00	0	0	10088.70	9787.24	97.01
Total		**25908.8**	**0**	**0**	**26068.11**	**25607.21**	**98.23**

During the 11th Five Year Plan period, State of Himachal Pradesh has made full use of RKVY being ACA programme and thereby incurred 98.79% expenditure during this period.

13. National Social Assistance Programme (NSAP)

The National Social Assistance Programme (NSAP) was, first time, announced on 15th August, 1995 by Government of India with the basic objective to provide social assistance benefit to the rural poor in the case of old-age, and death of primary bread-winner and for poor women during maternity. In Himachal Pradesh, about 1.07 lakh beneficiaries were covered under the various social security schemes, including physical challenged and others till the end of 2011-12.

Table-30

Beneficiaries of Old Age/Widow, Disability Pension, Pariwar Sahayata and Annapoorna Schemes

2011-12	27.96	103111	381	1287	2756	**107535**
Total	**118.55**					

The benficiaries old age/widow pension, disability pension, pariwar sahayata and annapoorna schemes were 107535 at the end of 11th Five Year

Plan. This programmes has proved boon for the needy people in distress. This programme has brought self respect to the under privileged section of society. During the period of 11th Five Year Plan Ru. 118.55 crore have been spent under NSAP.

14. Total Sanitation Campaign (TSC)

In Himachal Pradesh, TSC was started from Sirmour district in the year 2000. By the year 2005, all districts of State were sanctioned the TSC projects. The primary objective of TSC is to improve the quality of life the rural people. The financial and physical progress of TSC projects during the 11th Five Year Plan period is given in the tables to follow.

Table-31 Financial Progress of TSC

(Rs. in lakh)

Year	Actual Funds Released Expenditure				percentage
	State	Centre	Total	(Centre +State)	Expenditure
2007-08	113.22	1024.50	1137.72	472.27	41.51
2008-09	469.63	778.76	1248.39	637.68	51.08
2009-10	400.00	1116.80	1516.80	1876.04	123.68
2010-11	711.51	2939.78	3651.29	2832.91	77.59
2011-12	813.71	469.75	1283.46	1866.31	145.41
Total	**2508.07**	**6329.59**	**8837.66**	**7685.21**	**86.96**

During the 11th Five Year Plan period, 86.96% expenditure has been incurred under this campaign.

Table-32 Physical Progress of TSC

Year	Individual Household Latrine (APL+BPL)	School Toilets	Anganwari Toilets	Sanitary Complexes
2007-08	136043	1858	484	23
2008-09	313872	1959	994	35

2010-11	216571	6429	4400	310
2011-12	30066	802	132	163
Total	**936128**	**15749**	**8312**	**594**

During the 11th Five Year Plan period, 936128 Individual Household Latrines and 15749 school toilets have been constructed against target of 850750 and 20738 which shows the healthy physical progress under this campaign.

HIMACHAL 12 th FIVE YEAR PLAN 2012-17

A PERSPECTIVE

The economy of Himachal Pradesh has grown at a fast pace in about last fifteen years and the growth has resulted in benefits to a large section of the State's population. However, the circumstances at the beginning of the Twelfth Five Year Plan were different from those which existed during the period when the State's economy witnessed a steady growth. With increasing

awareness about and greater insight into the development process of the State's economy that the people of the State have acquired during past few years, the expectations of the people of Himachal have also increased from the Twelfth Five Year Plan. During the past years of rapid growth, the fundamentals at the national level were robust, the macroeconomic balance was favourable for rapid growth and global development dynamics were supportive. However, the challenges today are many and the situation is much more difficult.

The prolonged slowing down of the global economy has started showing its adverse effects on the growth process of our economy not only at the national level but also at the sub-national levels. Though, our economy offered great resistance to the transmission effects of the global economic slow down due to strong and relatively open domestic financial and other markets during the initial global slow down trigger.

The broader goal which the State Government will strive to achieve during the Twelfth Five Year Plan period has been adopted from the Twelfth Five Year Plan Document at the national level. This goal is to achieve – **"Faster, More Inclusive and Sustainable Development"**. The state's development strategy during the Twelfth Plan will ensure that the State's development efforts achieve synergy with the efforts made at the national level so that the goal of Faster, More Inclusive and Sustainable Development is realized. The development strategy will have an orientation to achieve each of these elements of comprehensive development, each of which is of critical importance, simultaneously.

FASTER GROWTH

Though, the Twelfth Plan document emphasizes on achieving the objective of broad-based improvement in the economic and social condition of the people, it also recognizes the need to achieve rapid growth of GDP as an essential requirement for achieving this objective. Rapid growth rate helps in achieving more inclusiveness at least in two ways. First, rapid growth of GDP would result in faster expansion in income and production which, in turn, would result in income enhancements and greater employment through a distribution mechanism designed as a policy measure to achieve the objective of more inclusiveness. Second, revenue generated through rapid expansion in income and production can be used to finance critical programmes of inclusiveness. These programmes are either aimed at benefiting the poor and the excluded groups directly or enhance their abilities to access the income and employment opportunities generated by the growth process.

Growth of Economy

The target GDP growth rate at the national level was approved by the NDC at 9% in the year 2011. However, the period after 2011 witnessed the Euro zone crisis that resulted in triggering of a sharp downturn in the global economic prospects. Also, it was during the period after 2011 that the real impact of global slow down on the domestic economy could be assessed with

some degree of precision. During the Twelfth Plan period, a strong corrective action aiming at expansion in the investment with the corresponding increase in savings to keep the inflation rate within limits is required to reverse the slow down in the GDP growth rate.

Table 1

Sectoral Outlays During the Twelfth Five Year Plan (2012-17)

Sr. No.	Sector	Proposed Outlays	% age of Total Outlays	Priority
1	2	3	4	5
1.	Agriculture and Allied Activities	2906.79	12.75	III
2.	Rural Development	1276.73	5.60	VI

11.	General Services	372.74	1.63	VIII
	Total	**22800.00**	**100**	

The indications of global economic recovery are also not very comfortable. Taking into account these factors, the Twelfth Five Year Plan document has revised the target growth rate to 8.2% during the Twelfth Plan period. However, the document has described achievement of this target as conditional to many strong policy decisions and their effective implementation.

During the Tenth Five year Plan the State's economy grew at an average annual growth rate of 7.6%. However, the provisional estimation of the average annual growth rate of State's economy during the first four years of the Eleventh Five Year Plan has been 8.3% which is projected to be 6.2% in the last year of 11th plan. Target growth rate of the State's economy for the Twelfth Five Year Plan has been fixed at 9% with the proposed plan outlays of Rs. 22,800 crore. The sectoral outlays proposed for the 12th Five Year Plan are given in the table 1.

Following the practice adopted during the past plans, Twelfth Plan has also accorded the highest priority to the Social Services Sector. Considering low density of roads taken as road length per 100 sq. kms (58.86 kms.) and due to inherent hardships in constructing roads in the State, *second* highest allocations have been proposed in the Transport and Communication sector with the objective of connecting more habitations with the quality roads and improving and upgrading the existing roads. *Third* priority has been assigned

to the Agriculture and Allied Activities Sector followed by Energy sector. The stress will be on improving the farm sector productivity and quicken the pace of realization of available hydel potential in the State. Table 2 briefly highlights some of the targets that the Twelfth Plan period envisages to achieve.

Table 2

Proposed Targets for the Twelfth Five Year Plan (2012-17)

Sr. No.	Item (2012-17)	Unit Twelfth Plan	Target for the
1	2	3	4
1.	Food grain Production	000 MT	1600.00
2.	Vegetable Production	000 MT	1500.00
3.	Fertilizer Consumption	000 MT	250.00
4.	Fruit Production	000 MT	330.00
5.	Mushroom Production	000 MT	30.00
6.	Hops Production	MT	200.00
7.	Honey Production	MT	7500.00
8.	Milk Production	000 Tonnes	1130.00
9.	Wool Production	Lakh Kg.	16.90
10.	Fish Production	Tonnes	40000.00
11.	Afforestation (SVY)	Hect.	4405.00
12.	Families to be assisted under SGSY	Nos.	55000
13.	Additional CCA to be created	Hect.	27000.00
14.	Additional Power Generation	MW	4630.00
15.	Habitations to be covered under drinking water supply schemes	Nos.	10,725
16.	Installation of Hand Pumps	Nos.	10000
17.	Coverage of beneficiaries under EIUS	Nos.	24000
18.	Opening of New Colleges	Nos.	5
19.	Opening of New ITI's	Nos.	7

Agriculture and Allied services Sector

Transmission of benefits of rapid economic growth in Agriculture sector to all the sectors of the economy is well established which benefits all sections of the society & leads to inclusive growth. The Agriculture and Allied Activities sector of State's economy had recorded a growth rate of 4.2% during the Eleventh Five Year Plan. The State envisages achieving a growth rate of 4.5% in this sector during the Twelfth Five Year Plan. This will be made possible by

instilling technology driven inputs aimed at increasing productivity of this sector.

It includes efficient management of pre-harvesting and post–harvesting operations and provision of enabling environment for timely and adequate market linkages. Raising farm incomes through diversification is the most desirable alternative considering that there is already competition between the availability of additional land for agriculture and diversion of agricultural land for non-farm uses to meet development needs of the people of the State. The Twelfth Plan also envisages adding another 27,000 hectares of CCA to its already realized CCCA of 2.50 lakh hectares.

Manufacturing Sector

The Twelfth Plan period foresees a major challenge in maintaining the investment levels in the manufacturing sector especially, in view of withdrawal of Special Package of Industrial Incentives from Himachal Pradesh. The benefits available to the entrepreneurs under the Special Package of Industrial Incentives have resulted in the manufacturing sector of the State's economy achieving an average annual growth rate of 15% during the Eleventh Five Year Plan period and the Twelfth Plan envisages maintaining this growth rate of the Manufacturing sector.

However, presence of relatively week physical infrastructure may act as a major obstacle in attracting new investment. Another challenge during the Twelfth Plan would be to disperse industrial activity, currently concentrated in the peripheral areas of the State, into the interior rural areas of the State to ensure generation of employment in these areas as well. This can be made possible by building physical infrastructure in these areas of the State.

Infrastructure Development

Although, The Twelfth Five Year Plan Document shows Himachal Pradesh ranked as fourth among all the States in terms of index of infrastructure, it is strongly felt that the infrastructure facilities of extremely high quality along with the uninterrupted high quality power supply are the prerequisites to attract private investment in the manufacturing sector of the State.

Road Transport: The Twelfth Plan envisages construction of about 7,500 Kms. of roads connecting all the villages and habitations with the population more than 100 persons in the State. National Highways with a length of about 2000 Kms. are also proposed to be constructed in the State during the Twelfth Five Year Plan period. Maintenance and upkeep of already constructed roads will also be ensured during the Twelfth Plan.

The hilly terrain of the State involves construction of long roads to provide connectivity to the habitations. These long roads involve high cost of construction and also, the time taken to reach a destination through these meandering roads is much more. The State Government proposes to initiate the process of constructing tunnels and bridges with the financial assistance of multilateral agencies with the objective of reducing the distance between

various destinations during the Twelfth Plan.

Expansion of Railways: The railway network has a negligible presence in the State and there is an urgent need to expand it in the State. The delays in completion of ongoing Nangal-Talwara Rail Line and Bhannupali-Bilaspur-Beri rail line projects have already resulted not only in cost over runs but have also failed to meet the development needs of the people of the State. The economic and strategic importance of the much talked about Bilaspur to Leh via Manali rail line is well known. All efforts will be made during the Twelfth Five Year Plan for early completion of the already started rails projects and early start of work on the new rail projects in the State.

Energy: The Twelfth Five Year Plan document mentions that the average growth rate of the total energy requirement is expected to increase from 5.1% during the Eleventh Plan period to 5.7% in the Twelfth Plan period to achieve the target growth rate of 8 to 9 percent of the national economy during the same period. Himachal Pradesh has a total hydel potential of about 23,000 MW. The State was close to harnessing about 8,368 MW of available potential by the end of the year 2012-13. The Twelfth Plan envisages all efforts to see early commissioning of already started hydel projects and addition of another 4,630 MW of hydel power.

Civil Aviation: Twelfth Plan also envisages upgradation and modernization of existing airports in Kangra, Kullu and Shimla with the assistance of the Government of India to attract high end tourists in the State. Increased investment in the infrastructure sector will surely boost investment in the manufacturing and other sectors and which ultimately, would result in achieving the target of rapid growth during the Twelfth Plan period.

More Inclusiveness

The inclusiveness here means embracing different aspects of the interests of the women, Scheduled castes, Scheduled tribes, Other Backward Classes and minorities not only from the perspective of enhancing their incomes but building capabilities to enable them exercise their choice for accessing existing and new opportunities. This is quite distinct from the concept of reduction in poverty. Empowerment and participation are important to bring in more inclusiveness and to reduce inequalities across the sections and the regions.

Some of the monitorable targets to achieve more individual and institutional inclusiveness have been defined for the Twelfth Five Year Plan. Development of individual and institutional capabilities is important to achieve the objective of Faster, More Inclusive and Sustainable Growth. The Twelfth Five Year Plan Document makes a mention of the ranking of the States in terms of Human Development Index and Himachal Pradesh had been ranked *third* after Kerala and Delhi in terms of Human Development Index.

The Table 3 elaborates these monitorable targets with their current status and the levels which are envisaged to be achieved during the Twelfth plan Period.

Table 3. Monitorable Targets for the Twelfth Five Year Plan

Sr. No.	Description of the Monitorable Target	Unit of Measurement	Current Status	Target for the 12th Plan
1	2	3	4	5
1.	Infant Mortality Rate (IMR)	Per Thousand	38	22
2.	Total fertility Rate (TFR)	Per Productive Couple	1.8	1.7
3.	Malnutrition of Children (0-3 Years)	Percentage 36.5		25
4.	Anaemia among Women and Girls	Percentage 43.3		22
5.	Sex Ratio (0-6 Years)	Per thousand	906	921
6.	Literacy Rate	Percentage		
	i) Male	90.85	98.00	
	ii) Female	76.60	95.00	
7.	Gender Gap in Literacy	Percentage Points	14.25	3.00
8.	Drop Out Ratio in Elementary Stage	Percentage		
	i) Primary	0.006	0.000	
	ii) Upper Primary	0.007	0.000	
9.	GSDP Growth Rate	Percentage	7.9	9.0
10.	Agriculture Sector Growth Rate	Percentage 4.2		4.5
11.	Manufacturing Sector Growth Rate	Percentage 15.0		15.0
12.	Proposed Outlays	Rs. in Crore		22800.00

Health

Quality health care is one of the most fundamental requisite for building individual capabilities. Himachal Pradesh has a vast health infrastructure which is one of the best in the country in terms of the availability of health infrastructure per capita. The Twelfth Plan envisages strengthening the already existing infrastructure to ensure delivery of quality health service at the desired time and place. Supplemented by the Emergency Medical Response Transport services being provided under NHM, the health care delivery system in the State will be strengthened further during the Twelfth Plan.

As per the information made available through SRS-2010 and NFHS-III the health indicators of the State are better than the national averages. The Twelfth Plan would envisage the efforts to reduce the IMR to 22 by the end of the Twelfth Plan from the current level of 38 (SRS-2011). The State Government would also make efforts to ensure availability of trained medical and para medical staff in the rural areas of the State. An intensive strategy aimed at improving the sex ratio in the state especially, in the age group of 0-6 years will be implemented during the Twelfth Plan period.

Special incentives scheme will provide cash incentives to those couples

who opt for permanent family planning methods after first or second girl child with an objective of improving the sex ratio. The twelfth Plan also envisages necessary steps to eliminate mal nourishment from the State and to ensure quality mother and child health care.

Education

The achievements made in the field of education in the State have attracted global attention during the last few years. The education infrastructure available in the State and the enrolment are among the best in the country. However, quality of education being imparted in the educational institutions of the State has a vast scope of improvement.

Overall literacy rate in Himachal Pradesh is 83.78% which is next only to Kerala (93.91%) but, low female literacy rate of 76.6% compared to the male literacy rate of 90.3% is a matter of concern and the Twelfth Plan envisages a strategy to narrow the male female differential in literacy rates. The Twelfth Plan also envisages improving quality of education by up scaling the skills of the teachers through imparting training to them. The State will also consider conferring its population with the right to secondary education with an objective to universalize the access to secondary education in the State.

The State Government will strive to provide safe drinking water and provision of separate toilets for girl students in all the educational institutions during the Twelfth Plan period. A new scheme called as *'Rajiv Gandhi Digital Student Yojana'* is proposed to be launched during the Twelfth Plan which would provide lap tops to the meritorious students of the State with an objective of encouraging the use of information technology at the schools level.

Skill Development

The population of the State is in a phase of population transition where it has a large proportion of young people. This would result in increase in labour force in the near future and can contribute to the growth of State's economy in a big way. However, a strategy is required to be followed where this labour force is imparted the skills that exactly match the requirements of not only the current markets but also of the future markets.

The Council will seek to achieve convergence of different training programmes being run by various departments with the aim of providing best available placement opportunities to this upcoming labour force. Private investors are proposed to be collaborated with to make the best out of the Government infrastructure already existing in the State thereby achieving higher order of skill up gradation.

Drinking Water and Sanitation

Safe drinking water and sanitation complement each other and contribute to a sound state of health. Better sanitation would ensure availability of safe drinking water and safe drinking water would help in achieving better hygiene and sanitation. The Twelfth Plan envisages maintaining the status of the State

being 100% open defecation free State and shifting focus to other aspects of sanitation not only in the rural areas but also in the urban areas.

The State Government also envisages provision of drinking water at the rate of 70 LPCD in all the rural areas of the State against the national norm of 55 LPCD as mentioned in the Twelfth Five Year Plan document. It would also be the endeavour of the State Government to provide drinking water supply to all the 53,201 habitations of the State by the end of the Twelfth Five Year Plan. There were 10,725 habitations in the State at the beginning of 12th plan period that were without the provision of drinking water.

SUSTAINABLE DEVELOPMENT AND NATURAL RESOURCE MANAGEMENT

Ability to achieve more inclusiveness largely depends upon the ability and prudence in managing the natural resources an economy is endowed with. Himachal Pradesh is endowed with reasonable amount of forest resources and the State's previous plans have perpetually strived to enhance these resources through increasing forest cover and conserving the already existing resources. Himachal Pradesh has the distinction of being one of the first States in the country to have taken decisions in the direction of conserving its environment and improving health status of its population. Himachal Pradesh has been the *first State in the country to have put a blanket ban the felling of green trees in* the State. Although, this ban has implications on the revenue collection that could have been generated had the State continued with the policy of exploiting forest resources, it has long term ramifications in providing better quality of life to the people of the State.

This ban on the green felling has benefited not only the population of the State but also other people living in the neighbouring States by providing them cleaner environment with low presence of pollutants in it. The Twelfth Plan envisages working on a plan in consultation of the Central Government and other expert agencies to get compensated the State for this loss of potential revenue and giving benefit to the people of neighbouring States. Most of the strata in Himachal Pradesh forms of loose sandy soil due to recent formation of the Himalayan ranges. Some of the belts of the state experience heavy erosion due to even the slightest rain. Also, in an effort to exploit the hydel potential of the State and building other physical infrastructure, some environmental losses are inevitable. However, the State has been able to compensate for these losses by an equivalent and some times even more replenishment of the natural resources through effective implementation of CAT plans and some of the State funded schemes.

The environmental conservation has always been a priority in the State Plans. The Twelfth Plan also envisages not only replenishment of the exploited resources but also net addition to the natural resources with an objective to reap the long term benefits. It also envisages maintaining soil health by promoting organic farming and reducing use of chemical fertilizers. Given the supply side limitations of the land as a resource, there has historically been a competition

between the farm and non-farm sectors on the demand side. It is an extremely difficult task to achieve an equilibrium between the competing demands of land for agricultural and development or commercial purposes. Increasing rate of urbanization further tends to offset the efforts to achieve this equilibrium.

Under the circumstances, it will be the priority of the State to ensure rational and planned use of land during the Twelfth Five Year Plan period. Although, land is a State subject, the matters like land acquisitions etc. are to be taken at the national level. The State Government would yearn to coordinate with the Central government so that the financial interests of the State Government and also of the persons whose land is acquired are protected the best. The Twelfth Plan period would see a comprehensive review of the State's forest policy. The forest policy needs a reorientation to ensure that excessive emphasis on the conservation of forest resources does not adversely affect the livelihood options of the rural and tribal communities. It would also seek to ensure that the growth and expansion of tourism, as an industry do not take place at the cost of environment.

SCHEDULED CASTES SUB PLAN

The Govt. for the first time formulated a Special Component Plan (SCP) in 1979-80 now renamed as Scheduled Caste Sub Plan (SCSP) for the Scheduled Castes as part of the State Plan. The Scheduled Caste Sub Plan is specifically designed to channelize the flow of benefits and outlays from the general sector in the state plan and from the union ministry of Social Justice and Empowerment for the development of Scheduled Caste in physical as well as financial terms. The Scheduled Caste Sub Plan is designed to help poor Scheduled Caste families through composite income generating programmes. The sub plan seeks to improve the living conditions of Scheduled Castes through provision of drinking water supply, link roads, house site, establishment of educational, health, veterinary institutions etc. The sub plan process includes identification, formulation and implementation of schemes/programmes under different sector for the economic amelioration of persons belonging to those communities. Outlays were specifically earmarked in the state plan besides supplementations by the Ministry of Social Justice & Empowerment, Govt of India by way of Special Central Assistance. While the Tribal Sub Plan is area based and the Scheduled Caste Sub Plan directly benefits the individuals/families and infrastructural facilities in the habitation where Scheduled Caste concentration is 40% or more.

Past and Future

To fulfill the objective of Scheduled Caste Sub Plan it was incorporated in the 5th Five Year Plan as a strategy, which aimed at rapid socio-economic development of Scheduled Castes and Scheduled Tribes in consonance with the Directive Principles. The first-ever exercise towards formulation of the Scheduled Castes Sub Plan (SCSP) for Scheduled Castes in this State was initiated in 1979-80 when Rs. 4.61 crore were earmarked but real thrust was

given in the 6th Five Year Plan (1980-85); when 11% of the State Plan outlays were provided under this Sub- Plan. This earmarking has been continuing for 11th Five Year Plan 2007-12 and Annual Plan 2007-08. For the first time for the year 2008-09, the Planning Department has allocated 24.72% outlay of the Main State Plan to the Scheduled Castes Sub-Plan which is in accordance with the Scheduled Castes population in the Pradesh. An outlay of Ru. 1013.52 crores has been earmarked for the Scheduled Castes Sub Plan for 2013-14. Besides this, provision of Special Central Assistance and the Centrally Sponsored Scheme/Programmes has helped the State in augmenting the pace of economic activity. The strategy of Scheduled Castes Component Plan has started giving results but a lot more is yet to be done to improve the socio-economic condition of these groups. For bringing economic improvement accelerating the pace of infrastructure development for the benefits of the Scheduled Castes, the State Govt. has transferred all the subjects relating to Scheduled Castes Sub Plan and other socio-economic related schemes of the Schedule Castes to the Social Justice & Empowerment Department. This department has now been made a Nodal Department for the socio-economic development of the Scheduled Castes population in Himachal Pradesh. The objectives of the Scheduled Castes Sub Plan are as under:-

Objectives

1. Conservation of whatever assets the Scheduled Castes have;

2. Updating and/or provision of new skills to improve their employability or productivity;

3. Providing minimum literacy and functional skills through education to every scheduled castes up to 35 years of age as part of the programme of universalization of elementary education and eradication of illiteracy;

4. Enabling them to acquire special education/technical qualification and avail of existing as well as newly emerging employment opportunities etc;

5. Provision of entrepreneurial training to educated unemployed scheduled castes youth;

6. Helping in their taking diversified activities including in the area of manufacturing, and business through self-employment programme.

7. Modernizing existing traditional activities like tanning and leather work;

8. Liberating them from demeaning work like scavenging of dry latrines;

9. Doing all what is necessary to tackle and eradicate social problem of untouchability.

10. Provision of minimum needs and basic amenities in their habitat ions.

The Scheduled Castes in this State are not concentrated into specific regions but are widely dispersed and would be benefited equally as rest of the population. Accordingly approach to economic development in the case of Scheduled Castes Sub Plan for Scheduled Castes is not area based as is the case with the Tribal Sub- Plan. The district of Bilaspur, Kullu, Mandi, Solan, Shimla

and Sirmour are the predominantly Scheduled Castes populated districts where Scheduled Castes concentration is above the State average. Thus, these six districts taken together account for 61.31% of the Scheduled Castes population in the State and are situated contiguously.

Urbanization among the Scheduled Castes population is 6.60% as against the State average of 9.80%. An attempt has been made to identify such villages which have (i) 40% or above SC population (ii) 90 Persons and above of SC persons which are to be taken up under the Scheduled Castes Sub Plan. According to the 2001 census there are 3901 such Scheduled Castes villages where the population of SCs is more than 40% and there are 2454 villages which have 90 or more SC persons in the State.

Scheduled castes sub plan through plans:

The first-ever effort at carving out a Scheduled Castes Sub Plan for Scheduled Castes was made in 1979-80 when an outlay of Rs. 4.61 crores was earmarked for this sub-plan against which actual expenditure was Rs.98 crore. During the 6th plan, against the all India target of 9.52% State investment in the SCSP, the actual achievement has been of the order of 9.94%. SCA supplementation of Rs. 5.55 crore was approved against which the actual release was Rs. 6.34 crore. During the 7th Plan period, State Plan earmarking had been reckoned at 11% of the overall State Plan size irrespective of its 'divisible' and 'indivisible' components, the earmarking for the 8th Plan period was 12%. The flows to the SCSP in Himachal Pradesh has been always above the all-India average. Rs. 18.14 crore SCA to SCSP was approved for the 8th Plan period. The actual State Plan flow and SCA supplementation during the 8th Plan period remained of the order of Rs. 398.26 crore and Rs. 18.76 crore, respectively.

9th Five Year Plan 1997-2002 was determined to Rs. 669.66 crore under State Plan and Rs. 21.00 crore under SCA against which Rs. 806.43 crore under State Plan and Rs. 16.26 crore under SCA were be spent by the end of 9th FYP 1997-2002. An amount of Rs. 1046.65 crore under State Plan and Rs. 25.00 crore under SCA were approved for 10th FYP 2002-07, where as the actual expenditure was Rs. 722.22 crore under State Plan & Ru. 23.97 crore under Special Central Assistance. For 11th Five Year Plan 2007-2012 an amount of Rs. 1540.00 Crore under State Plan and Rs. 25.00 Crore under SCA was approved. During 11th Five Year Plan Ru. 2990.29 Crore under State Plan and Rs. 33.78 Crore under Special Central Assistance were spent. The actual expenditure for the Annual Plan 2011-12 was Rs. 830.35 Crore under State Plan and Rs. 6.88 Crore under Special Central Assistance.

Of the total resources available under the Scheduled Caste Sub Plan, 60% is allocated in proportion to the inter district distribution to the population of the Scheduled Castes, 10% is distributed in proportion to the number of villages with more than 40% concentration of Scheduled Caste population (2001 census data to be the bases for both these indicators) and 30% is distributed in proportion to the actual number of Scheduled Caste families individual

district according to the 1998 BPL survey as per the directions issued by the Planning Commission, Govt. of India. The three indicators comprises of all areas of Himachal Pradesh except the full districts of Kinnaur and Lahaul-Spiti and the Sub Divisions of Pangi and Bharmaur of Chamba district. The weightage for individual district is as under:-

Name of District	Composite weightage for the District
Bilaspur	5.921
Chamba (excluding Pangi & Bharmaur)	6.743
Hamirpur	6.955
Kangra	18.826
Kullu	5.953
Mandi	17.440
Shimla	13.532
Sirmour	8.194
Solan	10.414
Una	6.022
Total	100.00

The concept of Scheduled Castes Sub Plan evolved during year 1978-79 Plan is now a permanent feature. The Scheduled Castes are receiving due attention and their legitimate rights and share in plan funds and the benefits of economic development. The planned effort aimed for the 12th Plan period will surely lend an impetus to this process. With the upcoming awakening in these communities, the process has already been accelerated.

TABLE - 1 PLAN INVESTMENTS

1	Plan Period (Rs. In Crore) 2	Total Annual Investment (in Rs.) 3	Per Capita Investment
First Plan	(1951-56)	5.27	4.00
Second Plan	(1956-61)	16.03	11.00

Planning in Himachal has contributed in a big way to boost the economy of the state. It is only through five year plans and liberal financial help given by the union government, the state has been able to achieve new heights in the development process particularly after getting full-fledged statehood in 1971. The able leadership, honest bureaucracy and hard working people have shown the way to other states of Indian Union of prosperity and transformation from backward economy to an advanced economy.

16

PLACES

"You must understand the whole of life, not just one little part of it. That is why you must read, that is why you must look at the skies, that is why you must sing, visit different places and dance, and write poems, and suffer, and understand, for all that is life."

-J.Krishnamurti

ACHHRA KUND : This is a place of religious significance at Bhawan near Kangra. It has a waterfall and a temple. Women, especially childless, go there on Sundays and Tuesdays, spent a night and come back next morning after having bath. While retuning, everyone avoids their shadow so that they may be allowed to go unnoticed.

AKHARAH BAZAr : This is a part of modern Kullu town. The name Akharah is attributed to the resting place of faqirs. Devotees used to stay there for whom a big sarai was built. At later times, traders of Kangra, Lahaul and Ladakh also settled there.

ALHILAL: in the ancient the place was known as 'Laliyal' on the name of a *'Gaddi'* caste. Muslims used this place to propagate the ideas of Islam and in 1933 the *'Nawab of Bhavalpur'* built a palace there, which was named as Alhilal. *Till 1947, the place remained as the Summer capital of the Nawab.* From 1947-49 it was used as warehouse by the Punjab government. In 1949 it came in the possession of *'Maharani Tara'* the wife of Maharaja Hari Singh of Jammu and mother of Raja Karan Singh. In 1951 it was converted into a Motel.

AMTAR: One Km. from main bazar Nadaun, is the famous cricket stadium named after former Prime minister Atal Bihari Vajpayee. The stadium was inaugurated by Prem Kumar Dhumal on 25th December 2009. This stadium is controlled by HPCA.

ANNADALE: The awesome natural splendor of the "dale" that captivated people and served as a major venue for recreation over the years has suddenly become the "(Annan) dale" of contention with the Army and the BJP led Himachal Government in 2012 locking horns over its possession. Located at an altitude of 6,117 ft., the ground, spread over 122 bighas, has been in the possession of the Army since the World War II period (1941), though it was formally leased out to it in 1958, with retrospective effect from 1955.

Successive governments have been making efforts to take control of the ground since 1982 when the lease expired, but the issue reached a flash point after a campaign, backed by the Himachal Pradesh Cricket Association

(HPCA), was launched for its transfer to the state for setting up a cricket stadium. It led to a counter-campaign to save the dale from the *land mafia*. The campaign was supported by the CPM, which alleged ulterior motives behind the move to take back the ground and maintain that the hidden agenda was to promote the interests of realtors. The issue took an unsavory turn after the defence authorities also questioned the motives behind the campaign, prompting Chief Minister PK Dhumal to threaten legal action. It is the largest stretch of flat ground in this part of the state. The Army has already made it clear that it is absolutely "not negotiable" in view of its strategic importance as a forward logistic and operational base.

The history of the sprawling green glade surrounded by majestic deodars is as old as Simla (now spelled as Shimla) itself. Initially, it was a place for fun and frolic where British officers and their families enjoyed picnics, lawn parties, fancy dress shows and held get-together. However, with picnics under the shade of towering deodars becoming customary and get-together getting formal, it turned into a place for open-air entertainment. Thereafter, fete champetre gymkhana, sports and other social and cultural festivities were a regular feature. It witnessed a whole range of formal events and informal activities, including flower, dog and horse shows, polo, gymkhana with tent pegging, steeple chase, tandem race, ladies' hack race, croquet, polo, football, cricket, archery, shooting, horse races and even rickshaw races. Originally, it was a small dale about a quarter of a mile in circumference,, but later extended to 1.25 mile by cutting into the hillside during Dufferin's Vice-royalty (1884-88) to facilitate big events like horse racing and polo. The first recorded history of Annandale pertains to the "fun fair" organised in September 1833 to raise funds for setting up a school at Subathu for native girls.

It was mentioned as Annandale for the first time in the East Indian United Service Journal in 1834. It was much similar to the Annandale valley in Dumfriesshire (County of Dumfries) in Scotland and since quite a few officers in the Indian services were from that area, they decided to call it as such. However, according to another story, the dale was named by Charles Pratt Kennedy, the political agent to the British government who was assigned the task of selecting a suitable place in the hills for establishing the summer capital. During his exploratory visit to the Simla hills in 1822, he was so overwhelmed by the beauty of the dale that he named it after Anna, his lady love back in England. It is perhaps for this reason that it has been spelt as "Annandale" and also as "Annadale"o in books, articles and other documents pertaining to Shimla. The outdoor entertainment activities were carried out in tents with makeshift dance floors and resplendent lights peeking from hundreds of lanterns hanging from surrounding trees in the darkness of night. As time passed some permanent structures were raised on the edge of the dale which blended well with the ambience. The Durand Football Tournament was started in 1888 from Annandale by Mortimer Durand. It was interrupted during World War I (1914-19) and World War II (1939). The venue was

shifted to Delhi in 1940.

The British authorities took every care that the scenic charm of the site was not marred by grotesque structures. During the 1924 gymkhana, a shed was raised without proper permission of the municipal committee, which promptly questioned it. The Annandale Gymkhana committee, in its explanation, replied: *"The genesis of one of this shed was the desire of the Indian members of the club (Maharaja Bharatpur) to erect a temporary shelter from which the purdah ladies of his party may conveniently view the sports at Annadadale."* The structure was indeed razed to the ground.

After Independence, gymkhana, polo, football, hockey and cricket matches continued to be held along with Dussehra and other social and cultural festivals. A big event was the plenary session of the All-India Congress Committee held in 1971. However, a clash between police and military jawans during the Dussehra celebrations in 1972 created hostility between the military and civil administration after which the venue of the festival was shifted to the Hanuman temple at Mount Jakhu. Besides the national women hockey championship, the only major event thereafter was a maha yajna organised by the Gayatri parivar in 1994.

The ground is being used as a helipad by both the state and the Army which also conducts field training and mock exercises for defence preparedness and disaster management. The sporting activity has been of late been confined to golf for which a nine-hole course started in 2002. The Army established a war museum on the periphery of the ground in 2005. To counter the move of transferring the ground the army opined that the Annandale ground is of paramount strategic significance for the Indian Army from the perspective of national security which can never be ignored infavour of any game and for gimmicks being played at the cost of larger national interests. The Army training and disaster management purposed are not negotiable at any cost. The Army blamed that its significance as a forward logistic and operational base for operation in the sector adjoining Himachal is being overlooked in preference to a cricket stadium.

ANEES VILLA : This bungalow was built by the famous author Salman Rushdie's grandfather, Mohammed-UI-Din Khaleequi, in the year 1940 in Solan town. This property was in the news when H.P. High court upheld the right of Salman Rushdie over this disputed property. Anees Villa is situated on a 2,439 square meter plot near the palace of the Baghat ruler Raja Durga Singh.

BAJAURA: 15 km. short of Kullu city town is famous for Basheshwar Mahadev temple which was built in the mid 8th century.

BAGHANI : Situated about eight miles from Paonta, this place is of religious interest to both the Sikhs as well as Hindus. There exist a gurudwara and two temples dedicated to Bhadra Kali. Guru Gobind Singh is said to have defeated the combined forces of Raja Bhim Chand of Bilaspur and his allies thereafter a grim battle.

BANJAR (1,524 mtr.): 58 km. from Kullu is also famous for trout fishing in the waters of river Tirthan.

BANTONY: The heritage structure, housing the summer palace of the erstwhile Maharaja of Sirmaur, was built in 1880 and derives its name from the name of the Governor-General, Lord Bentick, who resided in the adjoining Grand Hotel complex. As such the entire hill came to be known as Bantony. Prior to this, only a rickety cottage, owned by Captain Gordon, stood at the site. The beautiful building is an interesting mix of Alpine architecture indicated by the Pagoda-like structure over the porch and liberal use of wood, The building is fenced by cast iron railings, made at the famous Nahan foundry. The government on 26 July 2011, ordered the compulsory acquisition of the historical 130 year old Bantony building on the Mall here to put an end to any move which would result in the precious British heritage being lost to commercial pursuits.

BASPA VALLEY: Baspa valley is also known as *Sangla* valley, is one of the most beautiful valleys of Kinnaur. It starts from Karchham- 1,899 mtr., where the Baspa river coming from the east joins the Satluj. The road for Baspa valley branches off from the Hindustan Tibet road at the river junction and after turning south crosses the Satluj over a bridge to reach Karachham. The valley open up beyond Sangla and is full of wooded slopes as far as Chitkul (3,435 met.). The last inhabited village in the valley surrounded by green fields and high mountain peaks, Chitkul is like a Fairyland. The quaint little houses, temples, gompas and the people of Baspa valley conjure up a perfect image of *'Shangri-La'*.

BILASPUR (693 mtr.): situated in the lower hills, is a gateways to Kullu-Manali from Punjab and Haryana. It has very famous temple of Naina Devi, Bhakra Dam, Gobind Sagar lake, highest bridge in Asia at Kandraur and many forts near Swarghat. Nalwari fair is famous for cattle selling, purchasing and wrestling competition, which takes place in the month of March every year. *'Vyas cave'*, *'Lakshmi Narayan'* and *'Radhey Shaym'* temples are other attractions. Luhnu Ground for sports activities is also very famous.

BIOTECHNOLOGY PARK: On July 27th 2011, The state government granted approval to the setting up of a biotechnology park over an area of about 35 acres at Aduwal village near Nalagarh in Solan district at a cost of Rs 200 crore. The park consists of a biotechnology incubation centre constructed over an area of about 1.07 acres and biotechnology industrial cluster developed by a private promoter over an area of about 31.93 acres.

BHANGANI: The site where the Sikh Guru Gobind Singh defeated Raja Fateh Shah of Garhwal and his forces of 22 hill rulers. A monument has been raised in the memory of the rulers who were killed and their wives who immolated themselves in keeping with the traditions of that time. This place is located in Sirmaur district.

BHAKHRA DAM: It is the highest gravity dam in the world, built across

the river Satluj. This project includes the Nangal Dam, Nangal Hydel channel and Ganguwal and Kotla Power Houses. Bhakhra is the name of a small village located in the Himalayan foothills. It has been described by pt. Jwaharlal Nehru as *"New Temple of Resurgent India"*. With this dam, a big artificial lake named Gobind Sagar, has been formed which spreads upto Bilaspur town.

BAROTIWALA : This is a fast emerging industrial town of Solan district. It can be approached by road from Kalka, Parwanoo and Nalagarh.

BARALACHA LA (4,883 mtr.): is in Lahaul valley, 73 kms. from Keylong. The name Baralacha means *'pass with cross roads on summit'* (Roads from ladakh, Spiti and Lahaul join on the top of it). There is no road yet from Spiti, only a path exists. This pass is also an origin of Chandra, Bhaga and Yunan rivers. They flow to three different directions, through the Chandra, Bhaga and Lingti valleys.

BHAVA NAGAR: located in Kinnaur district. From there one can have a view of Satluj river and can pay a visit of course with pre-permission to the underground Hydel Project known as *Sanjay Vidyut pariyojna* of its own kind in Asia. Wangtu which is 5 kms. ahead is an entry for tribal area of Kinnaur.

BIR BILLING: It was first identified for hag gliding and paragliding by a young girl from Delhi Ms. Deepak Mahajan in 1978. Later on it was recognised by an Israeli tourist and forest wing of Himachal as the best paragliding site. In 1984 Billing got international recognition, when a competition was organised at individual level. It became internationally known, when Mr. Axe Bore Raymond from France took 130.9 Km. flight from Bir and made the world record. In 2002, the state government started pre-world cup to promote this adventurous and amateur competition.

CENTRE OF CLIMATE CHANGE BUILDING The Department of Environment in Himachal Pradesh has made its Centre of Climate Change building, in the Bemloe area in Shimla as the first structure to have environment-friendly and non-degrading. The building for the Centre of Climate Change has been setup with the assistance of the Energy Resources Institute, New Delhi. So far, it is only one or two buildings in the Baddi industrial area that have been built as green structures but otherwise the concept is yet to catch up in the state, which has taken several steps for protecting the environment.

To give a fillip to the idea of "green buildings", the Department of Environment has decided to even upscale the Solar Passive Technology Centre located at Sundernagar into a green building technology centre. *"Though the concept of 'green buildings' falls under the domain of the Town and Country Planning Department, the department was keen to popularize it as it is environment-friendly and does not have any adverse impact"*. The Department of Environment has decided to popularizes the concept and motivate not just the private sector, but also government departments to adopt it. With Shimla already turning into a concrete jungle and its water and other civic resources being under strain, the construction of "green buildings" could help in saving

water and energy. The main concept of buildings like these is reduction in the use of water and energy, reduction in waste and energy consumption, use of natural light, solar passive energy, waster reduction, rain water harvesting, use of natural material that is available locally and recycling of waste. The state government has been taking initiative since last decade of 20th century, by moving towards and becoming the first carbon-neutral state in the country and encouraging use of CFL bulbs, which are energy efficient.

CHARI : It is a village near Kot Kangra. In 1854, the foundation of temple and inscribed pedestal (since lost) was discovered here. The inscription contained the formula of the Buddhist faith. From the figures of seven boars carved in the front of the pedestal, it appears that the statue belongs to the tantric goddess, Vajravarahi.

CHINI : It is a village between Rogi and Pangi on the Hindustan Tibet Road. Its height above the mean sea level is 9,085 feet. The village stands nearly some thousands feet above the Satluj River. The surrounding scenery of the place is beautiful. There is also the highest peak, which is called Kailash or the abode of Shiva. Chini was a favourite resort of Lord Dalhousie, the then governor general, who used to stay here during his pleasure trips. Chini lies beyond the range of the monsoon and possesses a dry and bracing climate.

CHITKUL (3,450 met. in district Kinnaur): This is the last and highest village in the Baspa valley. It is situated on the right bank of Baspa river. There are three temples of local 'goddess Mathi', the main one said to have been constructed about 500 years ago.

CHANGO (3,058 mtr.): in Kinnaur district is a collection of four hamlets in pargana 'Shuwa', sub-tehsil *Hangrang,* on the left bank of river Spiti. It is encircled on every side by high hills which is a witness to the presence of a former lake. This village is under the influence of Buddhism, but there are some local Hindu deities too namely *'Gyalba', 'Dabla'* and *'Yalsa'.*

CHAUNTRA : It is a lovely and picturesque place in Jogindernagar tehsil of Mandi district. The village was once known for the cultivation of tea.

CHHARI: Located between the Gaj and Chambi rivers, the town Charri has been a centre of attraction since ages. It is also called *'Baba Shova Nath Ki Nagari'.* The temple here is dedicated to Lord Shiva. It is believed that lord Shiva had consumed poison here. so it is called *'Vishnagari'* and a local Rana few centuries back sacrificed his daughter-in -law to propitiate the spirit of canal to bring water to the town. For that it is called 'Panagari' The name of the Rana was 'Jaspat Rana' and daughter in-law was 'Indrawati' daughter of the Rana of Suket. Rana was advised to do so by a Pandit named *'Thenga Pandit'.* In 1854 the remnants of a Buddhist temple were founded there. Chhari is a great cultural centre of Trigarta the modern Kangra.

CHINTPURNI: situated in district Una. The famous temple is 3 kms. from Bharwain on the Hoshiarpur Dharamshala road on a ridge. A stone idol (Pindi) represents the goddess. The main fair is held during the first ten days

of Shukalapaksha of Shravan (August). This religious place is quite famous among devotees of northern India. This temple is controlled by Government of Himachal Pradesh.

CHOORDHAR (3,647 mtr.): Dominating the entire landscape of fields, forests and ravines is the Choordhar peak located in district Sirmaur. The peak affords a fine view southwards of the Gangetic plains and the Satluj river; northwards lies Badrinath , the well known Hindu pilgrim centre; also seen are the hills of Chakrota and Shimla.

DADA SIBA: situated in district Kangra, was abode of *'Pahari Gandhi Baba Kanshi Ram'*. Siba now has submerged into Pongdam. In the ancient 'Dada' was known by the name of *"Gandhpur-Ka-Ghatta"*. Now Gandhpur is situated 1.5 km. away from Dada-Siba. Dada village is said to have been founded by ' dadu Rana' and Badvor village by 'Badab sing Rana' two brothers hailing from Baluchistan). They also introduced *'Tankri'* and *'Lahre'* scripts belonging to the *'Tak'* and *'Landikotal'* regions of Baluchistan. These migrants from Baluchistan settled in the village 'Sibbi' and came to be known as *Sabaieye* and then *'Sapaiye'*.

DARCHA (3,360 mtr.): is in Lahaul valley from where trekkers start their trek to Padam via Singola as well as Baralacha/Phirtsela. Beyond this point there are hardly any trees. *Yotche* and *Zanskar nallahs* meet Bhaga river here from different directions.

DAGSHAI JAIL: With a view to restoring the architectural and historical legacy of the 165 -year -old cantonment, the Army established a museum showcasing the historical relevance of the jail where Irish mutiny leaders were imprisoned. This museum was dedicated to the people on 13th October 2011 by Major-Gen SK Gadeock, GOC, 9 Infantry Division in the presence of Brig P.N Ananthnarayanan, Commander, 95 Infantry Brigade, civil dignitaries, school children and local residents. Constructed in 1849 at a cost of Rs 72,873, which was considered a tremendous amount in those days, it has 54 cells. This also includes cells for solitary confinement, which were bereft of even a ray of light and those where an inmate could barely stand so as to tire him by depriving him of any rest. Pictures of the historical buildings of the town, including the church, graves and ancient forts of nearby cantonment towns, have been put up along with a brief note so as to educate a visitor about their history.

The shrewdness of the architects is visible from the fact that ventilation was provided by a single 1×2 ft. heavily barricaded window and underground vents that drew air from a pipeline with an opening into the outer wall. This ensured that the cells provided no outlet for a prisoner often escape and the structure stands tall till today despite a lapse of 165 years. In 1857, the Gurkhas of the famous Nasiri Regiment, then garrisoned at Kasauli, Subathu and Jutogh revolted. After the rebellion had been put down, some Gurkhas were brought to Dagshai and put in jail before being executed. On November 2, 1920, 165 -year -old Irish mutineer leader James Daly was shot by a firing squad in the prison courtyard, the last member of the British forces to be executed for

mutiny. He was buried at the Dagshai graveyard until 1970, when his remains were repatriated to Ireland and given a funeral with full military honours. This event had created an uproar in the country and prompted a stalwart like Mahatma Gandhi to rush to Dagshai to make an on-the-spot assessment. Aptly explaining these historic developments, the museum is showcasing historical pictures, which have been put up on the jail premises.

DANKAR GOMPA (3, 890 mtr.): is serving eastern part of central Spiti population. Dankar, the traditional *"capital of Spiti"*, is a big village and erstwhile capital of Spiti King. Hill-top fort, which served as jail in good olden days dominates the scene with more than 160 lamas and Buddhist scriptures in Bhoti language and a statue of *'Dhyan Buddha'* (VARIOCHANA) consisting of 4 complete figures, seated, back to back is the main attraction of this four to five centuries old monastery. There is also a *'natural lake in Dhankar'* situated at an about 1,3500 feet.

DEHRA GOPIPUR: is situated on the right bank of the Beas. It is possible to use Dehra as a base for different fishing areas, like Pong-Dam, Pattan Kurun and Nadaun. *Chintpurni* temple is not very far off from here.

DEVI KOTHI : This small village in Chamba is famous for its Devi Chamunda Temple. It was built in 1754 and has some Fine pieces of wood carving, though of later date and display Muslim influence.

DHAULA KUAN: in district Sirmaur, is famous for sprawling orchard consisting of citrus plants and mangoes and a fruit canning factory of various kinds of juices, jams, pickles and canned fruit. A little away from Dhaula Kuan there is *'Katasan Devi'* temple where Raja Jagat Singh defeated the advancing army of *'Gulan Quadir Rohilla'* in a great battle. The victory is commemorated in the Devi temple, built in gratitude by the Raja.

DHARAMSHALA: is located on 32° 15'42" North latitude and 76° 22'46" East longitude at an elevation of 1,250 meters. In 1846 former Governor of Punjab Sir Donald Mcleod was first officer who visited this place. But it was only in 1855 when *'East India Company' in the process of finding suitable place for its 'army' founded Dharamshala'*. Dharamshala municipality was founded in 1867-68. Conservancy tax was imposed in 1887 and electricity was provided to the town in 1896 A.D. There is the famous St. John Church where Lord Elgin II the Governor General of India was cremated on 20th November 1863. He breathed his last at Village 'Chauntra' in Mandi district. The famous War Memorial is also located in Dharamshala. Its foundation stone was laid on 24th February, 1972 by late Chief Minister of Himachal Pradesh Dr. Y.S. Parmar. It was dedicated to the Nation by Shanta Kumar on 28th February., 1977, the then Chief Minister of Himachal Pradesh. The personalities associated with Dharamshala were- the famous poet of Pakistan *Malik Mohammed Basheer;* Actor, Director *Dev Anand,* who had his education from Govt. School; *Lal Chand Pararthi,* who opened a music school in Dharamshala in 1938 and Ram Singh Thakur (from Ghanyara) who composed the inspirational song of Azad Hind Fauj. 'कदम कदम बढ़ाए जा, खुशी के गीत गाए जा, यह

जिंदगी है कौम की तू कौम पर लुटाए जा'। Dharamshala; also got its own Mall road on 22nd June 2012, stretching from *War Memorial to Chilgari.*

DHARAMKOT (LITTLE ISRAEL) Dharamkot is a small village located in the lap of Dhauladhar, about 2 km uphill from Macleodganj. The village is also known as *"Little Israel"* due to the presence of a large numbers of tourists from the country in Dharamkot. The Israeli tourists were so fond of the village that some even solemnized their marriages here. The Israeli tourists were present in the village almost throughout the year. Dharamkot is an ideal example of the home tourism industry that the state government intends to promote. Due to consistent demand from visiting foreigners especially the Israeli tourists most of the residents of the village have converted their houses into guest houses.

DUNGKAR : This erstwhile capital of Spiti, is a large village situated at a height of 12,700 feet from the mean sea level on the left bank of Spiti River at a distance of 15m iles down stream from Kaza. On the top of the village hill there is a large structure known as the fort, which is quite ancient and used for housing a cavernous dungeon which the Nono used as prison. This prison contained a cell without doors, having only a small opening at the top through which the condemned person was lowered and received meals. This place is known for a large Buddhist monastery on a hill top.

EMERSON HOUSES (Mandi): The Emerson house building with its distinct slate roof, curved wooden glazed verandahs and high rooms give Mandi town a distinct aura that otherwise is getting lost in the concrete jungle that has come up across the town. The 97-year old Emerson House building, in the heart of this temple town, has been given a new lease of life as it has been restored with its "pahari" style slate roof along the lines of Shimla's Gaiety Theatre. The public Works Department (PWD) had allotted Rs 34 lakh for the purpose in 2012. The building was in possession of few government departments and a restaurant. It was department of Art, Culture and Language which set up a committee and immediately recommended its conservation.

GANGATH: The history of Shri Baba Kayalu Sidhpeeth Gangath is nearly 500 years old. The town is located on the bank of a small rivulet Chaunch (छौंछ) and spread nearly five kilometers. The place is famous for brass utensils of various sizes and shape. This was/is also known as *baltohian aula shahar* (बल्टोहियों वाला शहर). The place had become so famous that it was known as chhota Muradabad. The majority population was of Muslims, but after 1947 partition, a large number of them migrated to Pakistan or became victim of mindless violence. The large size brass pot (बल्टोही) of Gangath was in high demand in Kangra valley. The Kangri dham (recreation) was incomplete without it. Larger the number of *Baltohi* a family had, greater the status that enjoyed in the society.

GEO-INFORMATICS CENTRE SHIMLA Availability of PDS (public distribution system) ration in fair price shops, presence of teachers and students in schools, deployment of staff in various institutions, location of officers during

official tours and several other such information will be accessible with the Aryabhatta Geo-Informatics and Space Application Centre which became operational on 5 December 2011, giving a big boost to e-governance in hill state.

Set up with technical assistance from the Bhaskaracharya Institute for space Applications and Geo-informatics (BISAG), Gujarat, the centre will not only provide a multipurpose data base, which can be accessed by user agencies according to their needs, but will also enable various departments to offer a host of citizen-centric services. "The system has been developed taking into account the ground realities of the hill state by integrating the geographical information system (GIS), the global positioning system (GPS), the management information system (MIS), remote sensing, satellite imageries, mobile phone and allied technologies.

HOW IT WILL HELP

- Consumers can be informed through an sms about the exact data on which ration will be available, sparing them repeated visits to fair price shops

- Controlling officers can ascertain the presence of teachers and students in a school on any given day and time

- It will be possible to ascertain whether a forest officer actually visited a forest area as provision has been made for uploading of photograph from the field using the GPS-enabled mobile phone

- The geo-informatics technology will be of immense help in planning

The Geo-informatics technology will be of immense help in planning, right down to the village level as all data about any place can be accessed at the click of the mouse. Projects, including construction of dams, can be planned sitting before the computer as it will be possible to know the extent of submergence for a structure of a particular height using three dimensional simulation.

GIRINAGAR: in district Sirmaur barely 7 km. from Dhaula Kuan. At this place a power house of 60 MW capacity has been constructed after diverting the water of Giri river through 6 km. tunnel from Saton near Renukaji. The project was commissioned in 1979; has twin purposes for the area i.e. *irrigation* and *electricity.*

GOBIND SAGAR: (district Bilaspur) Cruising is thrilling experience in this lake. The lake upstream adds immeasurably to the scenic beauty of the dam. This lake is source of lot of fish which adds to the economy of Himachal Pradesh. Town Bilaspur is located on the left bank of the lake.

GONDLA (3,160 mtr.): is located on the right bank of the river Chandra. House of the Thakur of Gondla, called Gondla castle or Fort, is the main attraction. According to district gazetteer, this was built in 1700 A.D. by Raja of Kullu Man Singh whose influence stretched upto the Lingti plains beyond the Baralacha-La. But last Thakur Fateh Chand, told in 1990s that it was 20 generations old. This is eight story building. Raja Man Singh of Kullu had stayed there in 1720 A.D. while on his way to Trilokinath Temple. Remains of

the past are lying there. Age old costumes, furniture and idols are also strewn around in a state of neglect. The *'Sharab Raldi'* i.e. 'Sword of Wisdom' given to the Thakur by Dalai Lama in the past was also there in the possession of Fatch Chand Thakur. This sword seems to have been built in the *'Toledo'* technique of Spain. There is also a boulder bearing greater than life size rock carvings of some deities . Local people ascribe the work to the Pandavas of the great epic–the Mahabharta. But these figures resemble some Buddhist deities, yet to be ascertained. In the month of July a fair is held when Lamas dance and enjoy. This fair attracts a large number of visitors.

GURUDWARA MANJI SAHIB Gurudwara Manji Sahib also known as dera Baba Vadhag Singh, is located on the Una-Hamirpur road, about 30 kilometers from here. The gurudwara receives lakhs of pilgrims every year, mostly from punjab. As per the estimates of the district administration, about 20 lakh pilgrims visit the gurudwara every year. The maximum number of pilgrims come to the gurudwara during Holla Mohalla and Baisakhi festivals. Life in tiny humbles Nehri and Marihi, where the gurudwara is located gets disrupted during mela days. On 29th March 2011 district administration took over the gurudwara and brought it under the control of the government.

HPCA STADIUM DHARAMSHALA; Located in Dharamshala, foundation stone laid in 2002, on 21st September 2003, first ball was bowled in an inter-district match, in 2004 two matches of Duleep Trophy were played, in March 2005 Pakistan's team came for practice and in 2006 Mohammed Nisar Trophy match was played between Ranji Trophy Champion Uttar Pradesh and Sialkot eleven of Pakistan, in 2007 under -19 age group matches organised between India and South Africa, in 2010 J.P cricket mahatournament 20:20 was held (semi final and final matches), The Jaypee Twenty 20 Mahasangram made into the Guiness Book of World Records as the world's largest cricket tournaments.

The statistics it boasts of were unbelievable. Consider the following: A total of 1,406 teams, 19,684 players, near about 2000 matches, 77 grounds on which 150 matches were played daily, in 2010 first IPL match was held between Punjab Kings XI and Deccan Chargers and second between Chennai Super Kings and Punjab Kings XI. In January 2013 first one day international was played India and England. India lost.

The venue is unique in India in that it is situated at an altitude of 1,457 m (4,780 ft 2 in) above sea level and has the spectacular snow capped Himalayan mountains in the background. It is often considered the fastest pitch in India. The capacity of the ground is 25,000 plus.

HATKOTI (1,400 mtr.): 104 km. from Shimla and 16 km. short of Rohru. The famous ancient temple of Durga and Lord Shiva are worth visiting. Pabbar river is flowing nearby. One road goes to Uttrakhand from here. Some sites of Mahabharta time are located nearby.

HIMACHAL SEWA SADAN On 5th November 2011, Chief Minister PK Dhumal dedicated the newly constructed Himachal Sewa Sadan, constructed

at a cost of Rs 10.5 crore in Sector 25 West, Chandigarh, to people of Himachal Pradesh. The creation of the facility will help referred patients from different health institutions in Himachal to Chandigarh in getting decent and affordable accommodation. A majority of the patients from the hill state come for advanced medical treatment in specialised hospitals, including the PGI, Government Medical College and Hospital and Fortis.

HUL MINES The indifferent attitude of the government notwithstanding, the campaign launched by the Earth station, a charitable trust, for the preservation of the abandoned Hul copper mines in Chamba district has received worldwide support from archaeologists. The US-based Society for Industrial Archaeology (SIA) has appreciated the efforts of Anil K Bhalla, the chief executive of the Earth station, in rediscovering the mines abandoned over 200 years ago and launching a campaign for its preservation. President of the society Jay Mc Cauley had offered to provide its conservation. He informed the trust that there were many individuals and organisations in the Silicon Valley willing to support any endeavour of the trust to help preserve the old mines. Founded in 1971, the SIA encourages the study, interpretation and preservation of historically significant industrial sites, structures, artifacts and technology. The British Women Association for Archaeology also supported the initiative of the Earth station and underlined the need to conserve the rediscovered mines. An exploratory expedition, organised by the Earth station, discovered the old mines on the basis of information available in the Gazetteer of Chamba state (1904). The mines existed during the reign of Raja Pratap Singh Verma (1559-86 AD) As per references made in the Gazetteer, expeditions took place in which experts of the Archaeological Survey of India (ASI) were also associated. Copper coins were used as currency in the erstwhile princely state of Chamba. The heritage mines can be conserved by developing an adventure tourism circuit to promote it as an international tourist destination, Similar sites have been developed in America and many parts of Europe and one such site is the Great Orem Copper Mines in Europe.

INDRUNAG: In September 2011, State government gave permission to Indrunag to be developed as a Para gliding centre in Kangra district. The other site at Bir Billing is now internationally famous and attracts para gliders from across the world. Though foreign tourists have been using Indrunag site for para gliding off and on, now after its recognition by the state government some infrastructure might be developed to promote the adventure sport. This would be an added attraction for foreign tourists who come to Dharamshala. The para gliding at Indrunag can be carried in summers or in the months of October and November when the region has sufficient currents.

JAISINGHPUR: is located on the bank of the rivers *'Haroti'* and **'Paplor'** A great number of temples are located there. Some important one are *'Laxmi Narayan', 'Sheetla-Totla mata', 'Janki Nath'* and an ancient temple of *'Neel Kanth Mahadev'*. The graves of 'Mast Ali Shah' and 'Baba Mani Ram' are also located there. The remnants of *'Gugga Chhatri'* temple are found

near by the *'Sheetla Mata'* temple. The place *'Mundiyan-da-tiyala'* (place of sleeted heads) also known as 'Chaunta' is located nearby, where the heads of 64 soldiers of Mandi state were cremated by the Katoch Raja 'Udai Chand' in retaliation of an act of burning Bijapur by the *'Raja Sidh Sen'* of Mandi and Bhim Chand of Bilaspur in 1688. The *'Chaunta'* of Mandi town was built by Raja Sidh Sen in the memory of these 64 soldiers.

JAITAK : The fortress of Jaitak, which is now in ruins, is a historical place in Sirmour district. During the war in 1814, the Gurkhas took their position here in a garrison of 2,200 men. The fortress was constructed by Ranjor Singh Thapa, The Gurkha leader. The fortress was captured by the Britishers after a series of tedious operations and fights from the Gurkhas.

JALMA : This is a place in Pattan Valley of Lahaul-Spiti along the Chandra-Bhaga River. Legend prevails that all the deities of Lahaul and Kullu have their residence here. The village is famous for old and classified paintings of various gods and goddesses which are preserved here. These paintings represent Central Asian style.

JHAMWAR: is famous for apple orchards and is located 10 kms. from Chamba town amid dense forests.

JISPA: in Lahaul valley is located on the bank of Bhaga river. There is a big camping ground. Sufficient trout fish is available in the river.

JUTOGH : This is about five kilometers from the west end of Shimla. The hill was acquired by the British Government in 1843. It was first occupied by a regiment of Gurkhas. There used to be stationed at this place two batteries of British Mountain Artillery and two companies of the British Infantry permanently to suppress any revolt.

KALPA (2,670 mtr.): Once a favourite hunt of Lord Dalhousie, the district headquarters till recently, when the headquarters was shifted to 'Rekong Peo' (1,990 mtr.) was the venue of *'Kalachakra sermon'* delivered in August, 1992 by His Holiness "The Dalai Lama"; and a monastery to commemorate this auspicious occasion was built up is 13 km. short of Kalpa and 7 km. off the Powari on Hindustan– Tibet road. Looming in front of Kalpa is an impressive view of Kinner Kailash directly across the Satluj river. *This mountain changes colours several times a day with a change of weather conditions or may be destined by Lord Shiva his eternal abode. 'Parbati Kund' is located on the top of Kinner Kailash.* The ancient villages of Pangi, Moorang and Kanum are situated close to Kalpa.

KALPI MEMORIAL IN DISTRICT SIRMAUR: Is built in Paonta Sahib. This is constructed in the memory of Rishi Kalkpi, who was brought to Paonta Sahib by Guru Gobind Singh.

KANAM : Kanam village is located on the Hindustan-Tibet road and has seven Buddhist monasteries and temples of various dimensions. It remained a famous religious place of learning. Its monasteries have a library housing numerous manuscripts.

KANGRA FORT: The historic fort of Kangra was built by Bhuma Chand, the founder of Katoch dynasty. This fort had been the centre of attraction for the rulers of northern India, for a long time. The first attack on the fort was made by the Raja 'Shrestha' of Kashmir in A.D. 470. In 1009 Mahmud Gazni looted the Kangra fort. He carried with him 7,00,000 gold coins, 700 Man, 28-tonnes utensils made of gold and silver and 20 Man (8- tonnes) Diamonds and pearls. In 1337 A.D. Mohammed Tughlaq and in 1357 A.D. Feroz Shah captured Kangra fort. In 1540 A.D. fort was captured by Khan Jahan a commander of Sher Shah Suri. In 1620 A.D. Jahangir occupied the kangra fort and came to see it in 1622 A.D.

In 1781-82 A.D. it came under the control of Jassa Singh Kanhaya and in 1786 to Maharaja Sansar Chand II. In 1846 Kangra fort fell into the hands of the British. Kangra fort is located on the bank of the river Banganga at the height of 350 feet. In the foreyard of the fort are the temples of *'Laxmi Narayan'* and *'Adinath'* located in the Kangra fort dedicated to Jainism. Inside the fort are two ponds one of them is called *'Kapur Sagar'*. At present the fort is under the control of *'Archaeological Survey of India.* It was badly damaged in 1905 earthquake. Among the 40 archaeological sites in this hill state, four ASI sites — the Buddhist Monastery at Tabo, the Rockcut temples at Masroor, the Kangra Fort here and the Hidimba Devi Temple at Manali — are included as World Heritage sites in the year 2012. This will help this state to come on to a bigger canvas of world heritage tourism.

KANGRA: Valley is one of the most picturesque valley in the Himalayas. It is sheltered by the Dhauladhar and this majestic mountain range surpasses all others in its grandeur. The history of Kangra dates back to the Vedic times more than 3,500 years ago. The famous **Bajreshwari Devi** temple is located in the town. Kangra was ravaged by foreign aggression a number of times. Despite all this, the arts and crafts of the region continued to develop and find lyrical expression. Kangra town is situated at the confluence of the *Baner* and *Majhi* streams, overlooking the Banganga torrent is famous for temples, forts and now speedily emerging as a business centre.

KASAULI (1,930 mtr.): is a charming hill station and coveted place for bird watchers. There is a *monkey point* besides the *'ashram'* of Satya Sai Baba at *'Garkhal'*. Kasauli also has a *'Pasteur Institute'* that produces the vaccine against the dog bite. On the opposite hill the famous Lawrence School at Sanawar is located. Kasauli also has a TV relay tower. Being a cantonment, it is very well maintained.

KASOL (1,640 mtr.) is 42 km. from Kullu on the bank of Parbati river. It is charmingly located on an open space which slopes down to the broad expanse of clear white sand at the edge of the Parbati river. Kasol is also known for trout fishing.

KATHGARH: Kathgarh is a village situated seven kms. from Indora on the meeting point of the Beas and the Chonch rivers. There is an old temple, built in Mughal style, housing 6 feet long and 5 feet round shaped *Shivalinga.*

The Linga here is of its own kind not found anywhere in the World.

KATRAIN (1,463 mtr. in Kullu district): The central and the widest part of the valley, Katrain is 20 kms. from Kullu city on way to Manali .Apple orchards and trout hatchery lend charm and prominence to the place. It is also famous for bee keeping and govt. has trout farm at *Patlikulh.*

KAZA (3, 800 mtr.): is the sub-divisional Headquarters of Spiti valley. It is situated at the foot of the steep ridges on the left bank of Spiti river. Once it was the headquarters of the 'Nono', the chief of Spiti. It is 425 km. from Shimla.

KEYLONG (3,340 mtr.): located above Bhaga river, the district, headquarters of Lahaul-Spiti has been described as oasis of green fields, willow planted water courses, brown hills and snowy peaks. In the past, Keylong was home of the Moravian missionaries. Their well known monasteries, *'Tayul', 'Khardong'* and *'Shashur'* are within a few kilometers radius. The temple of local deity *'Keylong Wazir'* is in the house of Shri Nawang Dorji.

KHOKSAR (3,140 mtr.): a bleak and windswept place is the first village and gateway to Lahaul on the right bank of the river Chandra 5 km. from *'Gramphoo'. During winter Khoksar is the coldest inhabited place in Lahaul.* The river freezes during winter and is covered with snow to afford regular passage for human beings and also for mule traffic. Khoksar is located on the old trade route from Indian plains to the west Asia.

KIBBER (4,205 mtr.): Locally known as *Khyipur,* one of the highest villages in the world at an altitude of 4,205 meters above sea level in a narrow valley surrounded by mountains from all sides. *'Gette village',* at a short distance away from Kaza is the highest in the world, with a height of 4,270 meters.

KILLAR (district Chamba): is the headquarters of Pangi subdivision, is situated in the deep and narrow gorge of the Chenab river. It can be reached through the *Sach pass.* It is the desire of many a hardy trekkers to visit these lands of pretty faces, beautiful dances and scenic splendour. Some of the famous trekking routes from Killar are to Kishtwar in Jammu & Kashmir, Umasi la into the Zanskar valley and in the South-East to Keylong and Manali. While trekking to Lahaul through this valley one will come across a beautiful place, *'Purthi',* known for one of the best and finest nurseries and a historical rest house on the right bank of Chenab river.

Ki-Monastery: It is the oldest and the biggest monastery of Spiti dominating Ki-Village. About 300 lamas are receiving their religious training in this monastery, which houses rare paintings and beautiful scriptures of Buddha and other gods and goddesses. It is serving western population of Spiti.

KOTHI: in district Kinnaur is also called Koshtampi. It is little below Kalpa proper and it is overshadowed by the Kinner Kailash peak. Goddess *'Shuwang Chandika'* temple is a famous one in the village. The village with its attractive temple, gracious willows, green fields, fruit trees makes an altogether a beautiful landscape.

KUFRI: It is the 'Winter Sports Capital', situated 13 km. from the Ridge,

in Shimla at an altitude of 2,622 meters, is ideal for skiing. In the past years it has become a big centre of attraction for the tourists during winter.

KULLU (1,230 mtr.): The most charming and beautiful Kullu valley spread out its charm on either side of the river Beas. The valley runs North to South of this river and is 80 km. long and about 2 km. at its broadest. The valley has awe inspiring glens and mossy meadows encircled by rushing streams and meandering brooks. It is also famous for its exquisitely woven colourful hand made shawls and Kullu caps. In the spring Kullu is in most colourful shape. Early March, apricot and plum trees, dotted among the fields, burst into pink blossoms and wild medlar are crowned with white flowers. The higher slopes are soon aglow with gorgeous rhododendrons, white scarlet clusters of the smash blaze near the river the terraced fields turning from green to gold. Situated on the bank of the Beas, Kullu city is the Hqs. of district.

KUNGRI GOMPA: built around the year 1330 A.D. The Kungri monastery provides unmistakably evidence of the impact of the *tantaric cults* of Buddhism as practised in Pin Valley.

KUNZUM PASS (4,590 mtr.) provides chief access to Lahaul valley by the great Kunzum range. The lofty Bara Shigri glacier is seen in front in all its grandeur. The crest of the pass has been marked by a chorten of stones erected ages ago. Recently a temple has been built on the top dedicated to 'lord Gyephang' – the chief deity of Lahaul. The belief is that, every vehicle passing over Kunzum pass will have to take a round *(Parikarama)* of this temple to get blessing of the God. Another interesting feature of the stone image of the Lord is that offerings in the from of cash (coin or currency notes) will stuck to the image, if devotee is acceptable to the Lord. Some people believe that this temple is of goddess Durga.

KUGTI: the last inhabited village of Bharmaur is not too far from the Kugti pass (5,040 mtr.) and is on the challenging, trait from Bharmaur to Keylong. The famous temple of Keylong Wazir is 2 km. away from here.

LABOUR BUREAU SHIMLA: The Royal Commission on Labour in 1931 pointed out the need for systematic collection of labour statistics. It observed that the policy must be built on facts as the uncertainty of facts would lead to confusion and conflict regarding its aim. The Commission recommended the adoption of suitable legislation enabling the Competent Authority to collect and collate information regarding the living, working and socio-economic conditions of industrial labour. Accordingly, Government of India constituted & set up the Rau Court of Enquiry in 1940 under the TRADE Disputes Act (1929) to recommend statistical machinery for measuring movement in prices. The Rau Court of Enquiry recommended compilation and maintenance of Cost of Living Index Numbers for measuring the rate of compensation to be paid to the workers for the rise in cost of living.

This recommendation of the Rau Court of Enquiry (1940) led to setting up of the Directorate of Cost of Living at SHIMLA in 1941 with the objective

of conducting Family Budget Enquiries and compiling Cost of Living Index Numbers for important centres in the country on a uniform basis. The Directorate conducted enquiries during the period 1943-45. However, with the increased Government intervention in the field of industrial relations during the Second World War, the need for more systematic collection and processing of labour statistics acquired significance. The result was the enactment of Industrial Statistics Act in 1942 to facilitate collection of statistics on (a) matters relating to factories and (b) certain specified areas of welfare and conditions of labour. Further, arrangements were made for the collection and processing of the data flowing from the administration of important labour Acts, such as the Trade Unions Act, 1926 and the Payment of Wages Act, 1936, etc. The need for more comprehensive labour statistics in the context of formulation of labour policy led to the setting up of the Labour Bureau on October 1, 1946 by rechristening the Directorate of Cost of Living with added functions.

The Bureau in Shimla is located near Chaura Maidan in a British period building named "Clear Mont". In the beginning it was working in the premises of ministry of labour, but in 1960 with the efforts of late Gulzari Lal Nanda and Dr. Y.S Parmar the Shimla office of the Bureau was opened. After independence the bureau became purely a body to protect the interest of labour class.

LINGTI VALLEY: Largest and the longest side valley of Spiti. It runs North-East from Lingti village (3,460 mtr.) for about 60 km. to its head. It is a living geological museum. Its geological history dates back to 250 million years and its shales and fossils are well known to the whole world . *'Gya peak'* is also there in Lingti valley. At its summit Spiti, Ladakh and Tibet meet.

LARJI (957 mtr.): 34 kms. From Kullu town is famous for trout fishing. Also famous for large hydel power project

NAHAN (932 mts.) is Hqrs. of Sirmaur district situated on an isolated ridge in the Shivalik hills, overlooking ravines and green fields. The city was founded by Raja Karna Prakash in 1621 as his capital. The other story about its formation is that a saint who lived with a companionable *Nahar* on the site where the Nahan palace now stands. *'Nahar' means 'lion'* and probably the town takes its name from this saint. The hub of Nahan's activities is *Chaugan, 'Bikram-Ka-Bagh'* and *'Khadar-Ka-Bagh'*. Nahan celebrates *'Sawan Dwadshi'* towards the end of monsoon, when fifty two idols of local gods are carried in procession to Jaganath temple, where they are floated ceremoniously in a pool and are restored at midnight to their riches. In the heart of Nahan town is *'Rani Tal'*, big tank and a temple from the days of princely rulers. One of the oldest foundries in India is located at Nahan. Himachal Resin and turpentine factory is also located there.

LEO: in Kinnaur located on the right bank of the Spiti river, is the Hqs. of sub tehsil Hangrang in Pooh subdivision. There is temple of 'Jamato' worth visiting.

LIPPA: (2,438 mtr.) in Kinnaur is situated near the left bank of Taiti

stream. Three Buddhist monasteries are there, which are dedicated to Galdang, Chhoiker Dunguir and Kangyar. The place is also famous for Ibex found in the nearby forest.

MANI KARAN (1,700 mtr.): 45 km. from Kullu and just 3 km. from Kasol, is famous for its hot springs. Thousands of people take their holy dip in its hot waters. The water is so hot that dal, rice and vegetables etc. can be boiled in it. According to an old legend, Manikaran is connected with Lord Shiva and his divine consort, Parbati, who lost her earrings, while taking bath. When she reported this to Lord Shiva, he looked at the *'Kund'* water with great anger, which gave birth to hot water on the bank of Parbati river. There are temples dedicated to Ramchandra and Lord Shiva as well as a Sikh Gurudwara.

MAHARAJA SANSAR CHAND MUSEUM Close to the old Kangra Fort, Maharaja Sansar Chand museum has been opened for the public since 20 November 2010, Chart showing the complete Katoch dynasty has been displayed with pictures at the entrance of the museum that exhibits the items owned by the royal family like crystal and silver utensils, clothes, coins, a silver bed, swords, telescopes, some written texts and almost everything that could showcase the royal life-style. The walls inside the museum were painted by artists especially brought from Rajasthan. This museum falls under the purview of Archaeological Sites and Remains (Amendment and Validation) Act, 2010.

MACLEOD GANJ: Macleod Ganj has emerged as a famous Tibetan colony. The Buddha temple is situated opposite the present abode of His Holiness, the Dalai Lama. The Tibetan Institute of Performing Arts (TIPA) is just, 1 km. walk from Macleod Ganj and preserves a number of musical dance and theatrical traditions of Tibet. There is also a Tibetan Handicraft centre located there.

MALANA (2,652 mtr. in Kullu district): This place lies a little ahead of the beautiful Chanderkhani pass. Malana is famous for the *temple of Jamlu-devta* and its unique social and cultural life. Malana is considered to have the oldest democracy of the world.

MANGARH : This village is situated in Pachhad tehsil of Sirmour district. It possesses an ancient Hindu temple which tradition connects with the Pandavas. There is a belief that this temple was built by Raja Rasalu of Sialkot.

MANIMAHESH place in Chamba district is famous for a Lake, sacred mountain Kailash and an ancient temple. The Mani-Mahesh Shikhara style temple is one of the most ancient and beautiful in Himachal Pradesh. Lakshmi Devi is represented here as *'Mahisasuramardani'* (slayer of the buffalo demon). Her brass statue having been executed by the Gugga, the master artist of the Raja Meru Varman. Thousands of people visit this place on the 15th day after Janmashtami to have a dip in the holy water. To celebrate this occasion the 'CHHARI YATRA' starts from Chamba and ends here. It is a state fair.

MARKANDEY : This is a famous shrine about 20 kilometer from Bilaspur.

According to a belief, a tunnel connected Markandey and Vyas Caves of the two Rishis. Vyas and Markandeya used to visit each other through this path. There is a natural water spring here and married couples come to have a dip in the sacred water, which is believed to cure sterility and infant diseases.

MORANG (2,591 mtr.): in Kinnaur on the left bank of river Satluj. The local deity is 'Urmig' and there are three structures dedicated to the deity each existing in *Thwaring, Gramang* and *Shilling.* Generally these are empty as the *'ark'* of the deity remains in the fort. Whenever a sacred day comes, *'ark'* is taken to the above named places. The *'ark'* has got 18 *'mukh'* made of silver, gold and brass. 18 mukh represents the 18 days of the great epic of the Mahabharta.

MANALI (1,926 mtr.): is 40 km. from Kullu, to the North is situated near the end of the valley on the National Highway leading to Leh. The landscape is breathtaking as all around it is outlined against the horizons. One sees well-defined snow capped peaks, the Beas river with its clear water meandering through between the town on the one side and another side are deodar and pine trees, tiny levelled fields and fruit orchards.

MANDI: is situated on the left bank of river Beas in the foothills of Shivalik range. Mandi entails a rich heritage of cultural, historical and mythological significance. According to one version the town acquired its name Mandi (market) because all the traders from Ladakh and other areas passed through it while going to and from Punjab. According to second version, the city was named after 'Mandavya rishi' who performed long and severe austerities on the right bank of Beas near the present town. Mandi has 85 beautiful carved temples, notable among them are Trilokinath, Bhutnath, Panchvktra and Shyama Kali at Tarna Hill. 'Mela Shivratri' of Mandi is very famous.

MOUNTAINEERING INSTITUTE (Manali): The high Himalayn town of Manali is surrounded by dense and beautiful forests of evergreen conifers. This gala and exotic town is located between 6,000 feet to 7,000 feet. It is believed that this was the place where the human race came into being following the great deluge. Manali word is said to have been derived from the word *'Manualaya'* the home of 'MANU' -*Mountain goat.*

The western Himalayan Mountaineering Institute established in September 1961, promotes the spirit of courage and adventure. The institute is located at the foothill of Himalayan spur and on the left bank of river Beas in the thick wood. Manali Mountaineering Institute was accorded the status of National institute on 25th September 2008 by Government of India.

It has following branches and sub-centres operational under its control

1. Regional Mountaineering Centre, Dharamshala, District Kangra.
2. Regional Water Sports, Pong Dam, District Kangra.
3. Mountaineering and Rescue Centre, Bharmaur, District Chamba.
4. Mountaineering and Rescue Centre Jispa, District Lahaul-Spiti.

5. High Altitude Trekking and Skiing Centre, Narkanda, District Shimla.
6. Water Sports sub-centre, Bilaspur, District, Bilaspur.

The aim of the institute is to train the youth in adventurous sports to induce in them the spirit of adventure so that they are able to develop an all round personality. The institute provides training in the following categories:

(a) Basic Mountaineering course;
(b) Advance Mountaineering course;
(c) Method of instruction course;
(d) Rock climbing course;
(e) Advance course;
(f) High altitude Trekking programme;
(g) Water sports;
(h) Skiing courses etc.

NAGGAR (1,760 mtr.): situated on the left bank of the Beas. It was the capital of Kullu state for 1400 years. There are large number of famous temples notably; Vishnu, Tripura Sundari and Lord Krishna. Roerich Art Gallery, which houses the paintings of Nicholas Roerich as well as his sculptures, is less a km. from the castle. After Chail Palace, Naggar Castle became second hotel of Himachal tourism to receive the status of heritage hotel on 23rd August 2012.

Nagrota Bhagwan - Bhagwan was founded by a dancer named *'Bhagwan'* and she also built a *'Devalaya'* (temple). The Gurudwara *'Paursahib'* is also located there. This Gurudwara was constructed in the sacred memory of 10th Sikh Guru Gobind Singh to the place in 1708 A.D.; after the battle of Nadaun between Mughals and the Sikhs in which Alaf Khan was defeated by Guru Gobind Singh. The famous ***'Kanya Devi'*** temple is also located there.

NAKO (3,662 mtr.): is the highest village in the valley and the existence of lake formed out of the masses of ice and snow above adds to beauty of the village. Village deity is 'Deo-dum' and another Lagang temple with several idols exist there. It is located in Kinnaur district.

NARKANDA: is situated at an elevation of 2,774 meters (8,850 feet). From this place one can have the splendid view of the snow peaked range of the Inner Himalayas. Narkanda, has dense pine forests, which provide much timber. 'Hattu peak' is 8 km. from here, with an altitude of 3,300 meters (1,826 feet).

NICHAR (2,150 mtr. in district Kinnaur): This village is situated between Taranda and Wangtu on the left bank of Satluj. The scenery is enchanting. Ghoral, antelopes, black and red bears are seen sometimes in higher and cold portions of the range.

NIRMAN BHAWAN The painstaking effort put in do design and construct the *"eco-friendly and energy -efficient"* Nirman Bhawan earned national recognition to the Public Works Department with the Construction Industry

development Council (CIDC) Conferring the Vishwakarma award -2011 on the project having several unique features. Mr. Vijay Uppal was the chief architect and Mr. B.D Joshi Chief engineer along with 15 other officers. Housing the headquarters of the PWD, the six-storey structure is the most energy efficient building in the state till date (2014) deploying the green technology to the hill. Besides an aesthetic design which blends well with the hill environment, the building incorporates solar passive technology, water harnessing structure, solar water heater, waste segregation and other features. It also takes care of monkey menace by providing steeply sloped roofs making it difficult for the simians to climb.

Natural light and sunlight have been harnessed to the extent possible to minimise dependence on power for lighting and space heating. Facing southwest, the front rooms receive enough sunlight throughout the year, while those in the rear are illuminated and heated by covering the atrium, located at the centre of the building, with a slanted polycarbonate semitransparent sheet which traps the solar energy. As architects need more light for carrying out the minute line-work, the drawing board have been placed in the dormers itself. Box type bay windows with double glaxing capture sun during both morning and evening. The corridors, toilets and computer rooms, which do not require heating, have been located on the hill side. Different types of openings can be used keep temperature at comfortable levels, depending on weather. The profile of the building has been harmonised with the site by designing terraced structure to avoid cutting of hill.

NURPUR: is located on 30°18' North and 75° 55' East at the altitude of 2,125 feet on the bank of river Jabbar. The first reference of Nurpur is found in the writings of the Historians of the period of *'Akbar'*. They referred to the kings of Nurpur by the title of *'Zamindar of Mau'* and *'Paithan'*. The ancient fort of *'Mau'* was demolished by Shah Jahan. To the ancient it was known as *'Dhameri'*. It was renamed Nurpur by Raja *'Basu'* as a mark of respect of Mughal Empress Noor Jahan.

PANDOH: is 16 km. from Mandi, on way to Kullu. An earth-cum-rock fill dam (61 mtr.) has been built there on the Beas river. The water has been diverted to Satluj river through 2 tunnels of 7.62 meters diameter and 13.16 km. long with 12 km. channel.

PAONTA SAHIB: a city sacred to the memory of Guru Gobind Singh, the tenth Guru of the Sikhs. Situated on the Yamuna river, Paonta Sahib is a bustling township with growing industries. It retains tangible memories of Guru Gobing Singh in the form of his weapons and a majestic Gurudwara. It recalls his presence even in the name of the city which is derived from Paonta meaning 'foot' either because he set foot on this place or according to an alternate story, he lost an ornament which he wore on his foot called *'Paonta'* while bathing. Guru Gobind Singh spent five years here.

In response to an appeal by Medni Parkash, the ruler of Sirmaur whose hands had been usurped by a neighbouring ruler, Guru was then barely 16 years old, set

off from Amritsar for Paonta Sahib. Guru arranged reconciliation between the warring rulers. He spent his days at Paonta writing the *'Dasam Granth'*. He built the Paonta Fort in over one hundred acres of land. The Guru left Paonta Sahib after the battle of Bhangani with Raja Fateh Shah of Srinagar Garhwal. Some important places near Gurudwara Paonta Sahib are, historical *temple of Yamunaji, Ma Yamuna Bal Park,* which has a huge statue of goddess Yamuna and next to park, a gorgeous replica of the *Sanchi Ashoka Pillar.*

PANGI VALLEY: (district Chamba) The scenic valley Pangi at the foot of the Himalaya, between two parallel ranges is situated beyond Pir-Panjal. There are still a few virgin peaks, 6,402 meters to 6,705 meters high challenging the mountaineers. Two communities namely *'Pangwal'* and *'Bhots'* inhabit this valley. In Pangi there is hardly any village or even hamlet where one or more temples are not there. The two most important temples in the valley are *'Mindhal Vasni'* temple about 15 km. from Killar and temple of *'Purthi'* about 30 km. from Killar.

PIN VALLEY: is formed by the Pin river, which rises on the eastern slopes of Pin Parbati pass and meets the Spiti river exactly opposite Lingti village. On its way it is joined by the *'Parahio Nala'* near Pokching. From Pin valley one can cross over to the Kullu valley over Pin Parbati peak and to the district of Kinnaur via *'Shakarof pass'* or *'Tarikhango pass'*. Pin valley is much more rugged and barren than the main Spiti valley. This valley is famous for Ibex and snow Leopard. The whole of the Pin valley, inclusive of all the villages, forms the protected area, varying in altitude from 3,600 meters to 6,632 meters above sea level. The Pin valley can boast of being somewhat moist area during the summer months, in sharp contrast to much of the remnant arid Spiti.

POOH: in Kinnaur district, locally called *'Spuwa'*, is a tehsil Hqs. located on national Highway- 22. The place is famous for vineyards, apricot, almond and grapes orchard. Local god is *'Dabla'*, who neither had any dwelling nor possesses an ark. The only manifestation of the deity is a small pole with a small idol set on its upper portion and adorned with Yak tail hair and long pieces of coloured cloth. The whole being is called *'Fobrang'*, on an occasion brought to the Santhang.

RAISON (1,433 mtr. in Kullu district): 16 km. away from Kullu, the site is an ideal one for spending a quiet holiday in solitary splendour and for holding youth camps. There are plenty of orchards in this part of the valley.

RAKCHHAM (2,900 mtr.): in Kinnaur is situated on the right bank of the Baspa river. Its name has been derived from 'Rak' a stone and 'Chham' a bridge. The location of the village is *striking.*

RAMPUR (1,006 mtr.): 140 kms. from Shimla, is situated on the left bank of Satluj river. There is a temple, Buddhist Monastery and a Hindu's temple situated besides the palace of Raja of Rampur Bushahr, called 'Padam Palace'. This is the venue for one of the biggest trade fairs of Northern India known as *'Lavi fair'.*

RENUKA DAM The Rs 2,700 -crore Renuka Dam project is the first in the country to implement the concept of "payment for eco-services" (PES) with the Forest Department earmarking an amount of Rs 10 crore for the purpose. The new guidelines framed by the government for the implementation of Catchment Area Treatment (CAT) plans under which at least 10 per cent of the total amount has to be spent on the PES to provide direct financial benefits to the community. The concept of PES has also been incorporated in the 775-MW Luhri hydro electric project.The task of preparing scoping document was given to 'Winrock International' an NGO, working in this field since very long, such as natural resources management, clean energy and climate change, provided blueprint for the conservation of ecosystem with the involvement of local people.

REHLU: Before 1821, when it was captured by a commander of Maharaja Ranjit Singh, it was part of Chamba state. Adjoining to Rehlu *'Ranitar'* was the ancestral jagir of Chamba Ranis. Wazir Nathu of Chamba was chief negotiator with Sikhs to get back *'Bhadarwah'* and *'Ranitar'* territories of Chamba state. This was agreed upon on the condition that Chamba state will pay Rs. 30,000 per annum. as a compensation to the Sikhs. In 1820 William Moorcraft had visited this place. Birbal, *a courtier of Akbar is said to have born there.* In 1846 after the death of Maharaja Ranjit Singh the whole Jammu & Kashmir territory was handed over by the British to Gulab Singh, while *'Rehlu fort'* was given to *'Fakir'*, son of *'Rahim-ullah-Khan'*. Fakir was succeeded by his son *Hamind-ullah-Khan.* In 1905, Rehlu fort was destroyed in a massive earthquake. Relhu is famous for *'Begami Rice'* which is of very high quality and costly too. Hamid-Ullah-Khan was succeeded by his son *Aziz-Ullah-Khan* to the Jagir of Rehlu.

RIBBA (2,745 mtr.) or 'Rirang' in Kinnaur is another popular village at a distance of 14 kms. from Morang, the tehsil Hqs. and situated between the villages of *'Purbani'* and *'Rispa'*. In the local dialect *'ri'* stands for Chilgoza and *'rang'* means a peak of mountain. Another village Rispa is known for grapes, orchards and the alcohol distilled from grapes (angoori).

ROHRU (1,550 mtr.): 120 kms. from Shimla, it is a paradise for anglers. The Pabbar river offers trout fishing. From Rohru Chiragaon is quite close and a place worth visiting.

SANAWAR: The Lawrence School, Sanawar is an independent private co-educational boarding school near Chandigarh. It is located in the Kasauli Hills, District of Solan, Himachal Pradesh. The school, founded in 1847 by Sir Henry Lawrence and his wife Honoria, is one of Asia's oldest surviving boarding schools.

As the school is located in Sanawar, the school is also popularly called "Sanawar". Situated at a height of 1750 metres and spread over an area of 139 acres, heavily forested with pine, deodar and other conifer trees, and remaining as an amazing place of spectacular natural beauty since its founding, the school has been consistently ranked among the best residential schools of In-

dia by Education World and other media. The motto of the school is *"Never Give In"*. Sanawar is about an hour drive from Chandigarh and six hours from New Delhi. Most children are admitted between the ages of nine and ten years.

In the school's name, "Sanawar" is the name of the hill on which it stands. The nearest railway station is now usually spelt "Sonwara". Sanawar is believed to be the oldest co-education boarding school anywhere in the world

SANGLA: (2,680 mtr.) is an important village of the Baspa valley situated on the right bank of Baspa river is built on a slope with houses rising one above the other with gigantic 'Kinner Kailash' peak (6,500 mtr.) towering from behind is also famous for 'KAMRU FORT': This fort was the place where so many Rajas of Kinnaur were crowned. Now this fort is dedicated to *Kamakshi temple*. Goddess idol brought from *'Guwahati'* (Assam) where the main temple is on a hillock.

SARCHU: is the last border point in Lahaul valley between Himachal Pradesh and Ladakh region of Jammu and Kashmir. located in district Lahaul spiti.

SIRMOURI TAL: It is the site of the ancient capital of Sirmour situated about 10 miles north-west of Paonta on the right bank of Giri River. The ruins of the town believed to have been destroyed in 1139 Bikrami era, are still visible. Rajban lying three kilometers from Tal was made the capital of the State in 1095 by Raja Subhansh Parkash, the founder of the ruling family of Sirmour. There can be seen a stone with deep hole in which rope was fixed by the juggler gril to cross Giri River. It is said that the town was destroyed by her curse.

SISSU (3,120 mtr.): is situated on the right bank, on a broad flat ground above the Chandra river. Gyephang peak is looming from behind. Lord Gyephang or Ghepan is the presiding deity of Lahaul, the protector of people. The temple of Lord Ghepan in the village, is not open to outsiders and once in 2-3 years the deity is taken out in a procession. There is also a water fall known as *'Sissu fall'*.

SHANSHA: is situated on the right bank of river Chandra and Bhaga (Chenab) in Lahaul valley. *The Ghepan, a powerful deity of Lahaul is believed to be born there.* A shrine dedicated to the deity has also been built in the village.

SHILARU: Located in district Shimla, near Theog, Sports Authority of India High Altitude Institution at an altitude of 2410 meters above msl., is the highest Hockey ground in Asia, having all modern facilities including astro-turf for both men and women hockey. It took two years (2007-2009) to provide astro turf at Shilaru.

SHRI NAINA DEVI JI a great pilgrimage centre in district Bilaspur. Naina Devi Ji is 20 kms. from Swarghat, situated on the top of a triangular hillock. It commands an unparalleled view of Gurudwara Anandpur Sahib and Gobind Sagar lake. Both Hindus and Sikhs hold the shrine in great respect. The main-fair is held in August every year.

SLAPPER: While travelling from Bilaspur to Mandi, at Slapper, one sees the culmination of an engineering feat, the Beas-Satluj link project. Here the water of Beas river has been put into Satluj river through two tunnels of 13.16 kms. long and one channel of 12 kms. for producing electricity.

SUMDO (3,230 mtr.), is the last village of Kinnaur district, situated at the confluence of river *'spiti'* and *'pari chu'* from China. It is also known as 'Kaurik'.

SUNHANI : In the history of Bilaspur Sunhani has its own importance. One of its ruler namely Bik Chand had to fly to this place in order to save himself from embracing Islam. However, Sunhani has the distinction of being the capital of old Bilaspur state for 53 years. It continued to be the seat of the government until Dip Chand ascended the throne. He developed a strong dislike for the place and determined to make a change which he did in favour of Bilaspur.

SUKETI FOSSIL PARK: Located in Sirmaur district, displays life size fiberglass models of prehistoric animals whose fossils, skeletons were unearthed here. The park is first of its kind in Asia to be developed at the actual site where fossils were discovered. It is 21 kms. from Nahan, located on the left bank of the Markanda river. The park at present has six sets of life size models of *'Stegodonganesa'* (extinct grand elephant). Shivatherium Hexapratadon–Sivalensis (hippopotamus with six incisors), colossochetys Atlas (giant land tortoise and Chelonia), Paramachaeradus (sabre toothed tiger) and Crocodiles, the animals which once thrived in the region.

The Suketi formation contain one of the world's richest collection of mammalian fossils. From a study of these fossils, it has been possible for the paleontologists to probe into the mysteries of evolution of prehistoric the paleontologists to probe into the mysteries of evolution of prehistoric life and infer the climate and environment of these periods which go back to Jurassic era, nearly 8.5 million years ago. The Shivalik park deposits are unsurpassed in the world for the richness of the fauna they entomb.

SWARGHAT (720 mtr. in district Bilaspur): is situated in the Shivalik hills, district Bilaspur on National Highway. While on way to Bilaspur from Swarghat, one can't miss the ruins of the 'Malaon forts' set atop a distant hill which witnessed several historical battles and survived through many rulers–the British, the Gurkhas, the Sikhs and finally the hill princes. It has developed as a big commercial centre in the past, as excise and taxation department check post has been set up there.

TABO: At the right of Spiti river, is an ancient village named Tabo, flanked on either side by lofty brown hills and sun burnt, is the seat of one of the most famous Buddhist monasteries–Sherlang, Duang, Chamba, Chibbo, Domlang Gompas, regarded by many as only next to the Tholong Gompa in Tibet. The 10th Century Tabo monastery houses more that 60 lamas, large number of scriptures and pieces of art, wall paintings– *'tankhas'* and *'stucco'*.

TALERU SPORTS COMPLEX On 13th February 2011, Taleru water

Sports complex was opened for the public, constructed with the cost of Rs 66/ - lakh on Chamera Project reservoir near Dalhousie. Along with motor boat many more attraction have been added to make it a special destination. This is first of its kind in the state. Taleru is the smallest polling station in Chamba district as it had only 25 voters in 2014 Lok- Sabha election.

TANDI (2,573 mtr.): is situated at the confluence of Chandra and Bhaga rivers. A legend says that there were two lovers, 'Chandra', the daughter of the Moon and 'Bhaga', the son of the Sun god. To perform their eternal marriage, they decided to climb to the *'Baralacha La'* and from there they ran in opposite directions. Chandra being active and smart, easily found her way down the pass and reached 'Tandi'. Soon Bhaga was found coming with great struggle through the narrow gorges to Tandi, where ultimately both met and the celestial marriage was performed. Tandi's importance for the people of Lahaul is same as it is 'Haridwar' for the Hindus. According to one belief *'Draupadi'* the Mahabharta fame was cremated here. Another version says that Rishi (Hermit) Vashisht as per his desire was also cremated here. This place was also called as 'Tandehi' (a place where one leaves his body). Historical record says that this place was founded by Raja Chand Ram under the name of 'CHANDI' which over the years got corrupted into 'TANDI'.

TEXTILE PARK: On 28th August 2012, foundation stone was laid for the textile park and parking facility at Chintpurni in Una district. The mega parking facility in Chintpurni was allotted Rs 40.21 crore. Besides parking, it was planned to have waiting hall, devotional library, shopping plaza and modern basic amenities complex.

TIMBER TRAIL PARWANOO (district Solan): situated on the National Highway is 5 kms. above Parwanoo. It is the first interesting resort in Himachal Pradesh which has attracted thousand of visitors to enjoy the cable car ride which covers 1.8 kms. long distance in 8 minutes over *'Kaushalia stream'*. In 1992 a big tragedy took place there, when a timber trail met an accident.

THE MALL: The Mall Shimla is the most favourable place for all tourists as well as local population of Shimla, which remains overcrowded during the day time and in the evening. It is also a main shopping centre of Shimla. The Gaiety theatre which is a reproduction of an old British theatre is also situated here as well as the "Indira Gandhi Khel Parisar" and 'United Services Club' (U.S.Club). From The Mall one can also explore the Middle and Lower Bazar. On March 23, 2011 the union Ministry of Environment and Forests declared Shimla and Trupati as environmentally sustainable cities (ESC) under the East Asian Summit (EAS) Forum.

The ESC is a flagship initiative by 16 EAS member countries to foster concrete activities in selected towns in the region. Notwithstanding the increasing emphasis on the preservation of heritage, the erstwhile British summer capital continues to lose its built heritage, a symbol of the imperia grandeur, which earned it the title of the Queen of Hill stations. Old colonia

buildings, which lent a distinct character to the town, have been disappearing one after the other. While a number of structures have been consumed by fire, others have been pulled down to make way for multi-storeyed modern concrete structures.

Few years ago, over a century-old government building Victoria palace, near Nigam Vihar, was pulled down to build a spacious office complex to house the PWD. The latest casualty is House Number IV in the Brockhurst Estate. The nearly 140- year-old structure was dismantled to construct a residence for the Chief Secretary. The Tudor style timber-framed structures were the hallmark of the colonial architecture and their gradual disappearance would alter the character of the hill station. It was the first of the structures to come up in the Brockhurst Estate in the 1870s and the other three houses came up later.

TRILOKPUR: was known Tiloknath to the ancient. The river which flows nearby Shiva cave is known as the Totla river rising from *'Jamula Parvat'* (mountain). There at Trilokpur are located the temples of Buddha, Radha Krishna and a Sikh Gurudwara built by Sardar Lahna Singh.

UDAIPUR (2,743 mtr.): In olden times this village was known as *'Markul'* and so the name of the local goddess is *'Markula Devi'*. Her temple is unique and is very famous for its wooden carvings on its roof and ceiling. Its name was changed by Raja Udai Singh of Chamba. This place is therefore a starting point for Mayar valley and further to Zanskar and other peaks. Losar (4,080 mtr.) is the first big village of the Spiti Valley, situated near the confluence of the Losar Penno streams. Yak & Horse riding are other charms to add its beauty & unique experience.

VASHISHT: is a little village 3 kms. from Manali in Kullu district, located on the left bank of river Beas towards Rohtang pass. It is renowned for its hot water springs and temples. Nearby is the pyramidal stone temple dedicated to 'Vashisht Muni' and 'Lord Rama' temple is also there. Natural hot sulphur springs with two separate bathing tanks for gents and ladies are there.

VYAS GUFA: Vyas Gufa is the most famous tourist spot and the oldest religious place in Bilaspur lying between the old and new Bilaspur Township of Himachal Pradesh . Vyas Gufa is a cave situated on the left bank of River Satluj, at an altitude of 610 meters above sea level. It is believed that Maharshi Vyas, writer of the great epic- *Mahabharata*, performed his meditation and penance in this cave. It is the common belief that the name of the present Bilaspur town was originally known as Vyaspur on the name of Rishi Vyas.

WILD FLOWER HALL: 9 Kilometers from the Ridge in Shimla towards Kufri the elegant Wild Flower Hall was situated at an altitude of 2,498 meters nearly 200 feet higher than that of the Viceroy's abode. It was built by Commander-in-Chief of the British Indian forces, *lord Kitchner* in 1905. He was headstrong, arrogant and adamant. He had built this as a matter of jealousies and consequent hatred for Lord Curzon, the Viceroy. Kitchner held

court in the lavishly furnished mansion he had built for himself. Some of the furniture included French antiques. After independence it was housing a hotel of HPTDC. The power and glory of the empire are gone but the glory of Wild Flower Hall remained in its pristine state till 5th March 1993, 8.30 p.m., when it was gutted in devastating fire. Now it is only in pictures and memory.

YANG YUD GOMPA: is located near a narrow gorge of Kaza Nullah (1,300 feet high cliff). The head of the monastery– Lama is from Tibet. It is serving western part of Central Spiti.

YOL CAMP (Young Officers Leave Camp): In the second world war (1939-45), 20 thousand war prisoners of Italy were kept there. From May 1947 to July 1947, it was a training camp for Army officers. From August 1947 to Oct. 1947, 12 thousand Muslims were kept there and then transported to Pakistan. From 1949 to 1952, it served as a refuge camp for Kashmiri migrants. At present it is housing the units of Army. *'Chinmaya Sandeepani Himalaya Ashram'* is located nearby. (There is the huge stone idol of Hanumanji and a temple dedicated to Lord Rama built in south Indian style). A temple dedicated to *'Anjani Devi'* (mother of Hanumanji) is located between Masser and Yol Camp. At a short distance Himachal Vidhan Sabha complex has been built for winter session.

Note: The places which have not been covered here are discussed in the chapter on Tourism

17

PERSONALITIES

" Who burns with the bliss; And suffers the sorrow
Of every creature; Within his own heart,
making his own; Each bliss and each sorrow:
Him I hold highest; Of all the yogis".

"Srimad Bhagvad Gita"

Himachal Pradesh may be a small state, but people of the state are highly motivated, hard working, skilful, energetic and devoted to the good of Indian society and socio-economic, political and cultural emancipation of its people. There is hardly any state of Indian Union, which has been given so less the attention, but so great has been its contribution to various walks of life that each one of us should feel proud of these great sons of this great land, who were pioneer, to achieve laurels for the country in general and Himachal Pradesh in particular. Here below, we are giving in brief the life sketch of some of the individuals, who had done and have been doing a great service to the society.

PERSONALITIES (PAST)

PT. AMAR NATH SHARMA: Born on 6th February 1900 at village Ghuggar, tehsil Palampur, district Kangra. His father's name was Shri Madhav Sharma. He had done F.M.C. He left his Medical studies (in Lahore Medical College) to join Indian National Congress on the call of Mahatma Gandhi. He attended Lahore session of the INC in 1919. For his involvement in bomb conspiracy, pronounced imprisonment from 1926-36, for ten years. In 1945, he was again imprisoned in Palampur, along with Sarvshri Kanhai Lal, Lala Jiya Lal and Bakshi Ram. He was member to Punjab Legislative Assembly from 1957-66. In 1967, he was elected President of Himachal Pradesh Congress Committee.

SHRI AMIN CHAND: Born on 18th March 1916, village Paplah, P.O. Bhareri, district Hamirpur. He was educated upto Middle standard. His father's name was Shri Chaudhary Ram. In 1937, he was sent for four year jail term on account of his participation in freedom struggle. In 1942, again for two years imprisonment for joining *'Quit India movement'*, From 1967-72; he was an M.L.A. and Deputy Speaker, Himachal Pradesh Vidhan Sabha. He breathed his last on 19th May, 1977.

AMRITA SHER-GILL: Born on Sunday, 30th January 1913 at about 11.30 in the morning, in Budapest, Hungary. Her mother Marie Antoinette

came from a well-to-do family. She had a sound education, which included lessons in music, both in singing and playing the piano. Amrita's father, Umrao Singh Majithia, a Sikh nobleman, belonged to an altogether different milieu. His grandfather, Attar Singh, *founder of the Majithia clan* (Majitha is a village near Amritsar) had been given some villages, a regular yearly honorarium and was designated as chief of the area under his control by Maharaja Ranjit Singh. When Umrao Singh's father, Surat Singh, died, both he and his younger brother, Sunder Singh, were minors.

Umrao Singh was married to Captain Gulab Singh's daughter, when still quite young. But after some time, she died. They had four children– Balram Singh, Satyaram Singh, Prakash (a daughter) and Vivek Singh. Soon after, Umrao Singh went to London. He lived there for some time. But it was on 4th February 1912 that Umrao Singh married Marie Antoinette in Lahore according to Sikh rites. After marriage in Lahore, they set sail for Europe and arrived in Budapest towards the end of the year 1912. It was there that Amrita was born. She was a beautiful baby with black silky hair reaching down to her neck and big eyes which seemed to survey the world with queer astonishment. She was amazingly intelligent from her early years. The Sher-Gill family also spent four years in *'Dunaharaszti'* in the country house, which had an extensive garden attached to it. For Amrita, her sister Indira and their cousin Victor, who spent most of his time with them, had apparently happy years. It was in the picturesque environs of *'Dunaharaszati'* that Amrita began to draw. Umrao Singh and Marie had been in Hungry for ten years. The Sher-Gill family left Budapest on 2nd January 1921 and spent two weeks in Paris. They arrived in Bombay in 1921.

In 1924, Marie, Amrita and Indira went to Florence, where Amrita joined the school of *'Santa Annciate'*, run by Roman Catholics and was known for its orthodoxy and rigid discipline. They were away in Italy for over six months and on return to India, Amrita joined 'Jesus and Mary Convent' in Shimla, famous for discipline, as it was also a Roman Catholic institution. It was then she told her father that she was an atheist and did not believe either in God or religion. Later on, she was duly expelled from the school. Thus ended Amrita's formal schooling. From then till early 1929, Amrita was to spend most of her time either in Shimla in parents house in Summer Hill, or in the Sylvan surroundings of the little village in *'Saraya'*, in the district of Gorakhpur in U.P. By the time she was twelve, she seems to have already acquired some facility in the use of the English language.

In her life, as an artist, 1927 was to be an important year. It was then her uncle Ervin Baklay, who himself was a painter, straightaway recognised Amrita's talent and suggested her that she should draw from live models, a practice that she continued to follow throughout her life. He also suggested that Amrita should be taken to Europe for further studies. Most of her work done during the period, she was in Shimla with a brief stay in Florence consists of water colours land drawings. In the third week of February 1929, the Sher-

Gill family left for Paris via Bombay and reached there on 9th April 1929. She was little over sixteen years of age at that time. In October 1929, she resumed her studies. There she also learnt music, playing the piano at the *'Alfred Corpet School'*. Music continued to be her second love. She also got fluency in French there. Amrita worked at the *'Ecote Nationals des Beaux Arts'* for about three years and every year that she was there, she won the first prize for portraits and still lives. During her stay in Paris, only one person, that is Marie Louise Chasseny, a colleague and painter, had made deep and lasting impression on her.

In 1933, she was made an associate of the Grand Salon. But surprisingly by this time, she had made up her mind to return to India. In 1934, Amrita and her parents left Paris for good and arrived in India. Indira stayed back in Paris. In the first few months, she stayed in her ancestral house in Amritsar while parents were in Shimla. Her painting style in India underwent a revolutionary change in subject, spirit and technical expression. In 1930, she won two prizes at the fifth annual exhibition of the 'All India Fine Arts Society', New Delhi. Rs. 100 as Chief Commissioner's prize for *"the best portrait in any medium"* for her self-portrait and 'lady N.N. Sircar's' Prize of Gold medal for the same painting. On 20th November 1936, Amrita Sher-gill's exhibition was opened along with that of Ukil brothers, Bombay. The Bombay Art Society held its 46th annual exhibition on 15th January 1937.

Her picture, *'Group of Three Girls'* won the Society's gold medal. In December 1936, her exhibition was opened at Allahabad. In 1937, another exhibition was opened at Allahabad. In 1937, she met Pt. Jawahar Lal Nehru in Delhi for the first time. Amrita was back in Shimla on 27th March 1937, *'Siesta'* was the last picture she painted in Shimla that year. On 21st November 1937, her one man exhibition was opened in Lahore. It was in 1937 that Amrita got the prize for the best work by a 'lady artist' for her Paris paintings *'View from studio'*, at the All India Fine Arts and Crafts Exhibition, Delhi. She retuned from Lahore in February 1938. In April 1938, she reached Shimla and painted 'Hill Scene'. In 1938 summer, Mulk Raj Anand, the well known writer met her for the first time. In Shimla, she also tried her hand at sculpting head of a young girl. On 29th June 1938, she left for Hungary with an objective to get married with Victor, her cousin. They got married on 16th July 1938.

It was a civil marriage. They left Budapest on 19th June 1939 to settle down in India, reached Shimla in July 1939. But finally in 1941, they decided to move to Lahore to make their permanent station. There she met Russian painter Sevetostav Roerich also. Unfortunately, this great daughter of India was snatched away from us by the cruel hands of death on 5th December 1941. Her funeral took place on 7th December 1941 according to Sikh rites on the bank of the river Ravi.

WORKS: *Torso (1931), Black Nude (1931), Alfred Corot (in pastel 1931), Judith (1931), Young Girls (1932), Sitting Nude (1931), Self Portrait (1932), Notre Dame (1932), Professional Model (1933), Mother India (1935), Man in White (1935), Women on Beach (1937), Mother and Child (sketch 1939),*

RAJ KUMARI AMRIT KAUR: Born on 2nd February 1889 in Lucknow, belonged to Ahluwalia royal family of Kapurthala state and was the daughter of Raja Sir Harnam Singh. She was the only daughter of her father who was blessed with seven sons. Her father had accepted Christianity as his religion. The Government of Punjab had appointed her father as the manger of *'Oudh Estates'* which were more valuable than the state held by the Kapurthala family.

Raj Kumari, who inherited Christianity as her religion, had her education in England. She was sent to *'Sherborne School for Girls'*, Dorestshire and later joined a college in London. She devoted most of her times to sports, was a very good tennis player and won many championships, did not marry. Raj Kumari inherited much of her fame and position from her father, who was considered 'a pious and pure' Christian. Gopal Krishan Gokhle was one of the friends of Raja Sir Harnam Singh. Later on, she came under the sway of M.K. Gandhi and became one of his close followers and life long pupil. In public life, Raj Kumari Amrit Kaur became the Secretary of All India Women's Conference in 1930. From 1931 to 1933, she served as the President of the Women's Association.

In 1932, she gave evidence before the *'Lothian Committee'* on Indian Franchise and later, as a member of the delegation of women's organisation, she testified before the Joint Select Committee of Parliament on Indian Constitutional Reforms. In 1938, she served as the President of All India Women's Conference. She also served M.K. Gandhi as a secretary for sixteen years. Became first women to be appointed a member of the Advisory Board of Education, but resigned in August 1942. Was a member of *'Hindustani Tamil Sangh'*. She attended the UNESCO in London in 1945 and in Paris in 1946 as a member of the Indian delegation. *After independence in 1947, she was the first lady appointed as the first Health Minister of India.*

As the closest lieutenant of Mahatma Gandhi, She took part in the Salt Satyagraha and was arrested in Bombay. Later on when 'Communal Award' was announced (1932), condemned it outright. Went to *'Bannu'* in N.W. F. P. to advocate the cause of the Congress. convicted on 16th July. 1937 and imprisoned on a charge of sedition. During Quit India Movement (1942), led many processions. One of them subjected to ruthless lathi charge in Shimla. Later she was arrested at Kalka. Raj Kumari was even more active in social work than in politics. Spent most of her time for the uplift of women and the eradication of social evils such as early marriage, purdah system, illiteracy

among Indian women. She was equally concerned about the lot of the Harijans. Rajkumari, who inherited the ablest traditions of a royal family, was a true patriot and a firm believer in non-violence. Elected as member of Lok Sabha from Mahasu constituency Himachal Pradesh in 1952. Died in 1964.

SHRI ANAND CHAND: Son of Raja Vijay Chand; born on 26th January, 1913 in the erstwhile Bilaspur State; married; two sons and two daughters. KINKRI DEVI : *'Stree Shakti awardee'* Kinkri Devi, who was widowed when she was just 22. She hoggd the limelight when she took up cudgels against mindless mining in the area. She filed a public interest litigation (PIL) in the Himachal Pradesh High Court in 1987 seeking a ban on illegal quarrying in the Sangrah area of district Sirmaur. "Initially, people started agitations at the local level. When the government paid no heed, they decided to move the High Court. Backed by a local voluntary group, People's Action for People in Need, then filed a PIL." "She stayed in Shimla for 19 days for filing the petition. After two days, when the money got exhausted, she worked as a maid there. She even started a fast in front of the High Court to highlight the issue." She faced threats from the mafia. Her poverty and illiteracy could never dampen her spirit to protect the area from degradation. In 1991, the court directed the government to close all the active mines in the area.

The mining lobby moved the Supreme Court against the order. Kinkri Devi won the case in the apex court too. The feeble voice raised by this frail, short-statured woman of substance was heard when the Ministry of Human Resource Development felicitated her with the award of *"Jhansi Ki Rani Lakshmi Bai Stree Shakti Puraskar—1999"* for her valuable service. The award was given by the then Prime Minister, Mr. Atal Bihari Vajpayee, in 2001. She was also honoured by various organisations for her service. In 1995, she was invited to attend the international women's conference in Beijing. She was invited by Hillary Clinton, wife of former US President Bill Clinton, to light up the lamp at the inaugural function. Even today Kinkri Devi is determined to create awareness among the people about soil conservation, forest protection and water preservation.

SHRI KIRPU RAM: Village Amabdanighat, Tehsil and Post Office Ghumarwin, district Bilaspur. He was educated upto middle standard. He participated in *'Quit India Movement'* and was exiled from Jahu, district Hamirpur. He was also Vice-President, H.P, Freedom Fighters' Council and Vice President, All India Freedom Fighters' Welfare Board. Elected to Himachal Pradesh Territorial Council in 1957 as an Independent.

NICHOLAS ROERICH: Born in St. Petersburg in Russia on 9th October 1874. For his study in art, history and philosophy, law and archaeology, simultaneously got admission in the *"Academy of Art in St. Petersburg University"* in the Faculty of Law and in the Institute of Archaeology and studied all these subjects. Roerich was born in Russia but stayed in India. He travelled Russia, Europe, Central Asia, Mongolia, Tibet, China, Japan and India. In his childhood, Roerich was much fancied to the ideals of world famous artists like *'Leonardo-de-Vinci'* and *'Michael Angelo'* and tried to adopt them in his creations. It was in 1928 at the age of fifty four, he came face to face with the Himalayas.

He was so much enthralled by the beauty of the Himalayas, that the last two decades of his life, he spent in Kullu valley. Kullu valley was not just a hill resort for him. He took it as a land of penance and in the benign grace of the Himalayas, he realised his life long cherished dream. In his life span of 73 years, Roerich enriched various fields of science and philosophy but mainly he emerged as an immortal painter. There is hardly any museum or art gallery in any big city in India, America and Europe where there does not exist paintings of Roerich, signifying some aspects or mood of the Himalayas. In 1929, In America, a twenty- nine storey building was erected in his honour where his paintings were housed. *Roerich had painted seven thousand canvas on Himalayas.* He established Master Institute of United Arts and International Art Centre. He was the honorary Chairman of the Roerich Museum. The branches of the museum were opened in Europe, America and in the East. There is an art gallery devoted to Roerich in 'Naggar', a small village, formerly capital of Kullu State in Kullu valley. He married to Devika Rani the queen of Indian cinema.

FAMOUS WORKS: (a) Paintings: Drops of Life, Pearls of Striving,

Signs of Maitreya, Banners of the East, Tibetan Strongholds (painted during his stay in Kullu valley). Before the first world war began, he produced many paintings where the horrors of war were portrayed. These were; *The Last Angel, Ominous Signs, Human Deeds, Doomed City, The Lurid Glare, The City of the Serpent etc.* Religion had always been a great source of inspiration for him. His main paintings related to religious theme are; *Saint Sergius, Sancta Protectrix, Conflagration, Saintly Ghosts, Buddha- the Giver, Command of Rigden, Jyepo, Sri Krishan* and *Kalki Avatara.* The mural paintings of Kazan Railway in Moscow and Church of the Holy Spirit in Talash Kino are some of his earlier creations which are most commendable.

(b) Published Works: *Complete works (1914), Flowers of Morya (1921), Adamant (1925), Atlai Himalaya (1929), Heart of Asia (1929), Shambhala (1930), Fiery Stronghold (1933), Gates into the Future (1936), Beautiful Unity (1946),* Himalayas– *the Abode of Light (1947) and Himavat (1947).*

The great man who assimilated the Himalayan culture was called and revered as 'Maharishi'. Roerich died on 13th December 1947. There is the Samadhi of Maharishi Roerich near his art gallery in Naggar, Kullu valley.

NORAH RICHARDS (26th October 1876- 4th March 1971): Norah Richards came to India with her husband Mr. Philip Richards in 1911 A.D. He was professor of English in the Dayal Singh College of Lahore. During her stay at Lahore, she devoted herself to dramatic activities. As ill luck would have it, Norah was widowed in 1920. she left India immediately only to return in September 1924, after four years. She was a perfect ruralite devoted to the promotion of art and culture. Politics as a game never interested her. The village of *'Andretta'* would not have shot into prominence, had Norah Richards not favoured it as her choice of abode.

In may 1925, she came to settle in Kangra valley first at Banuri and ten years later at Andretta. Her Woodlands Retreat in Andretta is a sanctum which she had been shaped after ideas on rural culture. Her open air theatre is still there on her estate. On 29th October 1970, she was conferred on the honorary degree of D.Litt. by the Punjab University. Norah Richards had been influenced by the writings of Walt Whitman, Edward Carpenter, Henry David Thoreau & Leo Tolstoy. Some of her closest friends were, Jai Dayal (stage artist), B.C. Sanyal (painter), Sardar Sobha Singh (painter) and Sardar Gurcharan Singh (artist of pottery).

PUBLISHED WORKS: *The Flower Maker (1910), Sati (1914), Magic Brooms (1933), Drama in Education (1945), Historical Playlets (1946), The Village Play (1955), Play Writing and Play Making (1956), The Son Comes Home (1956), Mother Earth (1956), 'Biography of the Noted Scientist, S.S. Bhatnagar' (1949), In Commemoration of the Fiftieth Anniversary of Passing of Philip Ernest Richards 1875-1920 (1970) and Country Life (1970).*

Norah Richards passed away on 4th March 1971. She had many admirers both in India and abroad. In Punjab, the people had acclaimed her as *'the great grandmother of Punjab theatre'.*

SHRI NARENDER PAL alias Narender Dev Joshi– born on 15th May 1892 at Luna Mandi, district Mandi. Was son of Shri Gopal Chand. In 1912, entered the freedom movement with the murder of a British. Got bullet injury in 1918, while fighting against the British in Surat. After Jallianwala Bagh Tragedy (1919), was sentenced to five years jail. He was released in 1924. Revenue Minister, 1980-85; Transport Minister, 1985-90; and Rural Development Minister, March 6, 2003 onwards. He was famous as Field Marshall. Died in 2013 at the age of 86.

CAPTAIN SAURABH KALIA: Captain Saurabh Kalia (1976 – 1999) was an officer of the Indian Army who died during the Kargil War while being held as a prisoner of war by the Pakistani security forces. He along with five other soldiers of his patrolling team was captured alive and kept in captivity where they were tortured and their bodies mutilated.

Saurabh was born on 30 June 1976 at Amritsar, India to Mrs. Vijay and Dr. N.K. Kalia. His schooling took place in the D.A.V Public School Palampur. Saurabh graduated in (B.Sc. M.Ed.) from H. P. Agricultural University, Palampur, Himachal Pradesh in 1997. He excelled at school, securing first Division and winning scholarships throughout his academic career. He was selected in the Indian Military Academy, Dehradun in August 1997 through Combined Defense Services and was commissioned on December 12, 1998. His first posting was in the 4 JAT Regiment (Infantry) in the Kargil Sector. Saurabh arrived there in mid-January, 1999 after reporting at the JAT Regimental Centre, Bareilly on 31 December 1998.

In the first two weeks of May 1999, several patrols were conducted in the Kaksar Langpa area of Kargil to check whether the snow had retreated enough for the summer positions to be reoccupied. He was the first Indian army officer

to observe and reported large-scale intrusion of Pakistani Army and foreign mercenaries in Indian side of the Line of Control (LOC) at Kargil. He assumed guard of *"Bajrang Post"* at the height 13,000-14,000 feet to check infiltration in the Kaksar area.

On May 15, 1999 Saurabh Kalia along with five soldiers - Sepoys Arjun Ram, Bhanwar Lal Bagaria, Bhika Ram, Moola Ram and Naresh Singh of the 4 Jat Regiment had gone for a routine patrol of the Bajrang Post in the Kaksar sector in the rugged, treeless Ladakh mountains. After a continuous cross fire with Pakistan armed forces from across the LOC, he and his troops ran out of ammunition. They were finally encircled by a platoon of Pakistan rangers and captured alive before any Indian reinforcement could reach for their help. No trace of this entire patrol was left meanwhile Radio Skardu of Pakistan announced that Captain Saurabh Kalia had been captured by the Pakistani troops. It was after this that India discovered hundreds of guerrillas had established fortified positions on the peaks of the hills deep inside the Indian side of the Line of control, with sophisticated equipment and supply lines back to Pakistan-controlled Kashmir.

Captain Kalia and his men were in captivity for over twenty-two (May 15, 1999 – June 7, 1999) days and subjected to torture as evident from their bodies handed over by Pakistan Army on June 9, 1999. The postmortem revealed that the Pakistan army had tortured their prisoners by burning their bodies with cigarettes, piercing eardrums with hot rods, puncturing eyes before removing them, breaking most of the teeth and bones, fractures of the skull, cutting the lips, chipping of nose, chopping off limbs and private organs of these soldiers besides inflicting all sorts of physical and mental tortures and finally shooting them dead, as evidenced by the bullet wound to the temple. The postmortem report also confirmed that injuries were inflicted antemortem (before death). On June 9, 1999, N.K Kalia had received the body of his son, Captain Saurabh Kalia, handed over by the Pakistani army to Indian army commanders at the Kargil sector, with evidence of torture.

SATYANAND STOKES (1882-1946): Samuel Evans Stokes was the son of a wealthy Philadelphian engineer-businessman of Quaker antecedents, well known for his contribution to the elevator technology. Young Samuel was not interested in following his father into business and at 22 gave up his studies at the University of Yale and opted to serve mankind. Set for sail in India and arrived at the leper home Subathu in 1905. He was sent for relief work to Kangra, then devastated by a severe earth-quake. Thereafter, came to the Christion Mission house at Kotgarh.

In 1910, bought a derelict tea garden, got married and made *'Barubagh'* in Kotgarh his home. Learnt Sanskrit, studied Eastern and Western thought and expounded his philosophy of life in a book entitled *'SATYAKAM'*. In 1932, under the aegis of Arya Samaj, became a Hindu and converted from Samuel Evans to Satyanand. Initially Stokes took to conventional farming and grew wheat and barley at Barubagh. In addition planted vegetables,

including peas, beans, lima beans, pumpkins and cabbages. Identified himself with the local farmers of the Kotgarh area, adopted their life style and relaxed in the evening with a *'hookah'*.

Stokes was sensitive to the political changes sweeping across the country. Inspired by Mahatma Gandhi, began to wear Khadi and made a bonfire of his western clothes. Was convicted for his nationalist activities and in 1922 imprisoned in Lahore Jail for six months. *Begar* was abolished from Shimla district because of his efforts. Apple had always been grown in the hills. The varieties popular in England were introduced by the British in Kullu and the Mission Houses in Kotgarh. The favoured varieties were cox's Belnheim orange, Newton and Russet that tended to be tart and sour.

Stoke introduced both apples and culture of growing apple as a commercial crop for small farmers at heights above 6000 feet in Himachal Pradesh. Working with his own hands, he pruned the trees and introduced the practice of meticulously grading apples, according to their size, colour and quality before packing them for the market. It benefited farmers who had marginal unirrigated lands, where they grew a single crop of wheat or barley.

By early 20th century, America had entered the age of commercial cropping and patents for grafted varieties. Stokes in field trials had selected the newly patented delicious variety of apples from the Stark Brothers. In 1925 at the cost of a dollar a plant, Stokes imported and distributed the nursery plants free to the farmers who had ordered them. During early years, each apple was wrapped in a green tissue paper and each box was stamped *"Kotgarh Apples"* Stokes believed in the ethics of manual farm work. He set up a school both for his seven children and for the 30 children of the village in 1925. He insisted that every child, including his own, should work for 45 minutes in the orchard. Died in 1946, year before freedom.

SHRI SATYA DEV BUSHAHRI: Born on 19th November 1922, village Chebari (Kasakoti), tehsil Rohru, district Shimla. His father was Pt. Nikka Ram. Joined freedom struggle in 1942 in the final year of degree course (B.A.). Participated in revolutionary activities in Dharmpur, Kasauli, Dagshai and Kotkhai from 1942 to 1949. He organised *'Praja Mandal in Bushahr'* and other Himalayan princely states. Was arrested twice in Bilaspur and Suket for taking part in the Praja Mandal activities. In 1948, he was fined Rs. 700. Joined state government service after the formation of Himachal Pradesh. Elected M.L.A. twice for Himachal Pradesh Assembly. Died on 15th September 1999.

SHRI SATYA PRAKASH BAKSHI 'BAGGI': (26th June 1914- 5th July 1950): His father's name was Shri Lakshman Dass. Educated upto B.A. from Government College, Lahore. Joined national movement in 1930 when Gandhiji launched his famous *'Civil Disobedience Movement'*. In 1941, for participating in Satyagraha, imprisoned for one year and fined Rs. 500. He was on hunger strike for 26 days in Layalpur jail. Abandoned hunger strike on the request of Gandhiji, but soon after died because of poor health at the age of thirty six years. He was from Una, district Una.

SHRI SHINGARU RAM: Village Charail, P.O. Bathala, tehsil Arki district Solan. His father's name was Shri Vishnu Ram Thakur. He was arrested after *Dhami Firing* and was kept in jail for 12 years. He was an active member of Prajamandal. He also had to go underground for 18 months.

SHRI SHIVA NAND RAMOUL : Son of Shri Fateh Singh; born on October 16, 1894 at village Khaina (Bharog-Banedi), Tehsil Paonta-Sahib, Distt, Sirmour, Matric; married; seven sons and one daughter; Agriculturist and Social and Political Worker. After matriculation remained Assistant Jailor in Nahan Jail, 1916-21 and worked in an Insurance Company at Delhi, 1936-39.

Secretary, 'Garhdesh Seva Sangh', Delhi, 1939-41; General Secretary, Praja Mandal, Sirmour State, 1945-47; detained under the Defence of Sirmour State Act (Samvat 2004) from September to December, 1947; led Suket Satyagrah and after capturing the State headed its Provisional Government along with Sh. Padam Dev, Bhagmal Sauhta and other State leaders in 1948. Remained President, Sirmour, D.C.C., 1948-52; General Secretary, H.P.C.C., 1952-56. President, H.P. Congress Committee, 1956-59; and President, H.P. State Land Mortgage Bank Ltd. Elected to Pradesh Vidhan Sabha in 1952. Also remained Member Lok Sabha, 1959-62 (elected in a by-election) and Member Rajya Sabha, 1962-68. Expired on January 22, 1972.

SHRI SITA RAM SHARMA: Born on 7th May 1915 at village Dharad (Dhami), district Shimla. His father's name was Shri Shivsharna. In 1935-36, joined INC. Was the founder member of Dhami, Koti, Kunihar, Baghal, Bhajji, Theog etc. Praja Mandals. In July 1939, was elected *'President'* of *'Dhami Praja Mandal'* and one amongst the volunteers who were eye witness to the Dhami firing tragedy. From October 1939 to September 1940, had to go for rigorous imprisonment in Dhami jail and later on in 1944; he was exiled from the state. He was also fined Rs. 1500. During his exile, had to face social boycott and his land was also attached. From 1952 to 1956 and 1967 to 1972, was M.L.A. in Himachal Pradesh, was also an active member to *'Statehood Committee'*. Freedom fighters Welfare board ' and ' freedom *Movement History Committee'*, He was also associated to *'Himachal Khadi Gramodyog'* and numerous other social and educational institutions. Died on 30th September 2008.

SARDAR SOBHA SINGH: Born on 29th November 1901 at Shri Har Govindpur in the district of Gurdaspur (Punjab). He had no happy childhood. His mother *'Achhran Devi'* died when the child was barely five. His father *'S. Dewa Singh'* was in Indian Army as a Cavalry Officer, but also nourished his love for painting. Sobha Singh had two sisters, Lakshmi Devi and Kishan Devi. When he was fifteen, he got admission to the Industrial School at Amritsar where he completed one year course in Art & Craft. In 1919, he joined Indian Army as draftsman and proceeded to Baghadad, where he served for four years. In 1923, Sobha Singh left service to become a free-lancer and started his own studio in Amritsar.

There in the same year, he married *'Bibi Inder Kaur'*. In 1926, he shifted his studio to Lahore which was then a centre booming with multifarious

activities. But in 1931, he came back to Delhi, where in the famous Connaught Place, he founded his studio. After some eleven year stay in New Delhi, he went out to Preet Nagar in his search for a permanent stay. With Preet Nagar as the base camp, he loitered for three years and also visited Kangra valley, Whose serene surroundings attracted him to make it his abode. But it was only after 1947 partition of the country, S. Sobha Singh came back permanently. The Sardar went to Andretta and lived in a hut rented out to him by Norah Richards. It took him two years to build his own house in the same village.

SOME OF HIS WORLD FAMOUS PAINTINGS: *Sohni Mahiwal, Portraits of Sikh Gurus, Kangra Bride and Gaddi belle.* Of all his works, Sohin-Mahiwal remains an outstanding achievement of Sobha Singh for which he has won wide acclaim in India and abroad. The first painting of Sohni-Mahiwal was bought by Dr. Karan Singh (Son of Raja Hari Singh of Jammu & Kashmir). With the publication of the portrait of Guru Nanak, and also of other Gurus, He became hero of the Indian masses, revered a lot, particularly the Sikhs. A portrait of Guru Nanak Dev, which has been called, *'Sobha Singh Ke Nanak'*, just as the people recollect 'Tulsi Ke Rama'. The portrait was commissioned by SGPC, released on the occasion of quincentenary celebrations of the Guru's birthday and made it available to the people at the low cost.

Sardar Sobha Singh was not a propagator of religion, he was a cultural emissary of very high stature. *'Guru Granth Sahib'* was his first source of delight, but his companions in the early hours used to be *Emerson, Krishnamurthy* and *Khalil Gibran.* The first portrait of Kangra bride was acquired from him by lady Mountbatten. Pahari art of painting, as in many cases like Amrita Shergil, B.C. Sanyal and others exercised a great influence on Sobha Singh and had been looked upon by him as a great legacy. He was bestowed with a number of awards during his life time. *In 1974, the Punjab Government on 'Republic Day' acclaimed him as the State artist.* The great painter passed away in 1989.There is an Art Gallery by the name of 'Sardar Sobha Singh at Andretta', district Kangra. The place has now become a centre of tourist attraction.

MAJOR SOM NATH SHARMA (PVC): Born on 31st January 1923 at Jammu. An illustrious son of an illustrious father, belonged to the lineage of soldiers and doctors in uniform. The eldest son of Major General (retired) A.N. Sharma and was the eldest brother of General V.N. Sharma, (PVSM. ADC, the Chief of Army Staff). He received his early education at *'Sherwood College'*, 'Naini Tal' (1932-34) and *'Prince of Wales Royal Indian Military College'*, Dehra Dun (now Rashtriya Indian Military College) 1934,-41. On completion of his senior Cambridge, he joined the *'Indian Military Academy'* from where he was commissioned in January 1942 in the 8/19 Hyderabad Regiment (4 Kumaon Regiment). His desire to become an infantry man was probably deepened by the death of his uncle, Captain Krishan Datta Vasudev, who had been killed in action in Malaya with 4 Kumaon Regiment.

Major Sharma participated in operation against Japanese Army in Burma (Arakan) and Malaya (1943-46) during World War II; internal security duties in India (1946-47), in Maharashtra and Delhi, Hisar during riots, pre and post partition days.

When hostilities broke out in Kashmir in 1947 and India decided to send troops to save Kashmir, Som was keen to be there as quickly as possible. Although his left arm was in plaster due to an old fracture in his wrist bones, he prevailed upon the commanding officer and was sent to save *'Badgam Airfield'*. On 27th October 1947, Som's company was ordered on a Fighting Parrol to Badgam village in Srinagar valley. He reached his objective at first light on 3rd November 1947 and took up a position South of Badgam village. At 1100 hours, enemy estimated strength of 700 attacked his coy position with 3" mortars MMGs and Rifles.

To protect both Srinagar and aerodrome from threat, he urged his coy to fight the enemy tenaciously. To inspire his men in full view of the enemy, he exposed himself to the full fury of the enemy's fire and laid out cloth air strips in order to guide aircraft on to their targets. Realising the causalities had affected, this officer, whose left hand was in plaster, personally commenced filling L.M.G Magazines and issuing them to LMG Gunners. A mortar shell landing amongst the ammunition resulted in a explosion that killed him on 3rd November 1947. His impairing example had resulted in the enemy being delayed for six hours and reinforcements permitted to get into position at *'Hum Hom'* to storm the tide of the enemy advance. His last message to Brigade HQs received a few moments before he was killed was *"The enemy is only 50 yards from us. We are under devastating fire. I shall not withdraw an inch but will fight to the last man and the last round"*. The History of Kashmir would have been different but for his bravery. He has set an example of courage and qualities seldom equalled in the history of the Indian Army. He was awarded **'Parm Veer Chakra'** *(Equivalent to UK's Victoria Cross)*, India's first post-independence award posthumously.

SHRI SURAT SINGH VAID: Born on 22nd October 1918, village and P.O. Habban, district Sirmaur, was *'Ayurvedacharya'*. His father's name was Shri Devi Singh. In 1938, joined National Movement for Freedom Struggle. Was founder member of *'Sirmaur Praja Mandal'*. Also participated in *'Pajotha Satyagraha'* (an extension of 'Quit India' Movement). Launched relentless struggle against the autocratic rule of princely ruler of Sirmaur, for which was given life imprisonment . Along with his two comrades, Shri Basti Ram Pahadi and Chet Ramt Verma celebrated independence day in 1947 in jail. Was released in March 1948 only. He had also been a Legislator. Died on October 30, 1992.

KUMARI TARA : An actress of silver screen the story of Kumari Tara is very interesting. The fair, slim and beautiful Tara was born and brought up at Janerghat, near the princely state of Chail. She had four sisters. The Maharaja of Patiala, a lover of beauty, was charmed by the beauty of Tara's eldest sister and

married her. The eldest sister took all her sisters, including Tara, to her palace in Patiala. At that time, Vijay Kumar was working as ADC to the Maharaja. It was in Patiala that the marriage of Vijay Kumar and Kumari Tara was solemnised. She was probably the first lady from hills to act in Hindi movies.

SHRI TARA CHAND: Son of late Shri Maya Dass; born at village Raja, P.O. Chauntra, Tehsil Jogindernagar, Distt. Mandi on 26th June, 1932; Middle; married; Agriculturist and Trade Unionist. Imprisoned during the struggle against the Princely States, 1947-48; organized Kisan Sabha in rural areas of Distt. Mandi. Elected to State Territorial Council in 1962 which was converted into Legislative Assembly from July 1, 1963. During split in the United Communist Party of India (CPI) in 1964 sided with the CPI(M); remained President, Pradesh Kisan Sabha for 10 years; and State Secretary, C.P.I. (M) till 1991. Expired on October 17, 1998.

SHRI THAKUR SEN NEGI: Born on 5th September 1909, at Shong in district Kinnaur. His father's name was Shri Naryan Dass and mother Smt. Niram Dass, did B.Sc (Agriculture) and L.L.B Joined government service in 1932 and retired only in 1966 as Chief Secretary to Himachal Pardesh Government. Later on made Advisor to Himachal Pradesh government. Elected to State Assembly in 1967, 1972, 1977 and 1982. From 1966-72, was leader of United Opposition Front. Became leader of Progressive Front from 1972-77. In 1977, was made Cabinet Minister. Was President of State Unit of the Janata Party from 1977-79. Elected Speaker of the State Assembly first time during Janata Party rule from 1979-84. Member Commission for Scheduled Castes and Tribes (Government of India 1978-81). Besides this, he had been in Indian Institute of Public Administration, Indian Council of World Affairs, Bharat Krishak Samaj, Indian Initiative Centre, Indian Society of Agricultural Economics, Akhil Bhartiya Adimjati Sewak Sangh, Indian Institute of Constitutional and Parliamentary Studies, Commonwealth Parliamentary Association, Himalaya Sewak Sangh, Amnesty International, participated in Commonwealth Parliamentary Association Conference from 1979-84. He was elected Chairman of PAC 1969-70 and 1971. Died on 1st January 2001.

Wrote a famous book titled– *"Scheduled Tribes of Himachal Pradesh"*. Once again, occupied the Chair of Speaker in Himachal Pradesh assembly after winning June 1990 election. Before Mr. T.S Negi, Mr, Radha Raman Shastri was made Speaker to 68 member Vidhan Sabha. Lost 1993 election.

SHRI TIRATH RAM: Born in 1909 in Una, ex-vice chairman of Freedom Fighter Welfare Board, Matriculate from S.D High School Hoshiarpur. He joined freedom struggle in 1926 and went to jail in 1930 thrice. He setup Gandhi Ashram at Oyal in Una for freedom fighters. He was staunch follower of Mahatma Gandhi and Lala Jagat Narain. He used to visit village after village to popularise Gandhian ideology and took initiative to spread national awakening far and wide. For his anti British activities, he was jailed and tortured. Recipient of Jamna Lal Bajaj Award in 1990. Died on 21st March 2007.

SHRI VIDYA DHAR : Born on October 22, 1918 at village Bagori, Tehsil & Distt. Chamba; Matric, Sidhant Bhushan and Sahitya Rattan; married; Agriculturist. Joined Arya Samaj at an early age; took keen interest in Social Reforms; became Member of the Indian National Congress, 1939; during Freedom Struggle organized Praja Mandal Movement in Chamba State; participated in : Hyderabad Satyagraha (for 7.5 months), 1939, (ii) Quit India Movement, 1942; was put behind bar, three times; worked as Associate Editor of a Journal, 'Praja Mitra'; Convener : Freedom Fighters' Cell, (ii) allotment of Land to Landless, and (iii) Bharat Sewak Samaj; General Secretary, Distt. Congress Committee and also of State Congress Committee (HPCC); Senior General Secretary, State Branch of All India Scheduled Castes Parishad; Vice-President; Congress Committee (HPCC), (ii) All India Freedom Fighters' Samiti; and President, Arya Pratinidhi Sabha.

Elected to State Legislative Assembly in 1952, Territorial Council in 1957 and 1962; reelected to Legislative Assembly in 1967, 1972 and 1993. Remained Vice-Chairman, State Territorial Council, 1957-63; Deputy Minister, PWD and MPP and Power, 1967-72; Minister of State, Public Work till 30-04-1977; Minister of State for Welfare, December 13, 1993 to Oct. 18, 1995; elevated as Cabinet Minister for Welfare 1995 onwards. Died on April 28, 2002.

CAPTAIN VIKRAM BATRA : Captain Vikram Batra PVC (9 September 1974 – 7 July 1999) was an officer of the Indian Army, posthumously awarded with the Param Vir Chakra, India's highest and prestigious award for valour, for his actions during the 1999 Kargil War in Kashmir between India and Pakistan. Vikram Batra was born on 9 September 1974 in Ghuggar village near Palampur, Himachal Pradesh, to G.L. Batra and Jai Kamla Batra.

He got his primary education from his mother, who herself is a teacher. He received his education up to Middle Standard at the D.A.V. Public School in Palampur and up to senior secondary stage in Central School, Palampur. After passing his 10+2 in 1992 from Central School Palampur, he got admitted in D.A.V. College, Chandigarh in B.Sc where he was adjudged the best N.C.C. Cadet (Air Wing) in two zones. Later, he was selected to join the Indian Military Academy in Dehradun in 1996 in Jessore company of Manekshaw Battalion, and was commissioned in the Indian Army as a Lieutenant of the 13 Jammu & Kashmir Rifles at Sopore, in Jammu and Kashmir. He rose to the rank of Captain.

On 1 June 1999, his unit proceeded to the Kargil Sector on the eruption of a warlike situation in Kargil, Drass and Batalik sub-sectors from where he was sent along with his company on the first strategic and daring operation to recapture the first peak of utmost importance - Point 5140, which was at an altitude of 17,000 feet. Captain Vikram Batra, 13 JAK Rifles, and his Delta Company was given the task of recapturing Point 5140. Nicknamed Sher Shah ('Lion King') in Hindi for his courage, he decided to lead the rear, as an element of surprise would help stupefy the enemy. He and his men ascended the sheer rock-cliff, but as the group neared the top, the enemy pinned them on the face of the bare cliff with machine gun fire.

Captain Batra, along with five of his men, climbed up regardless and after reaching the top, hurled two grenades at the machine gun post. He single-handedly killed three enemy soldiers in close combat. He was seriously injured during this, but insisted on regrouping his men to continue with the mission. Inspired by the courage displayed by Captain Batra, the soldiers of 13 JAK Rifles charged the enemy position and captured Point 5140 at 3:30 a.m. on 20 June 1999. His company is credited with killing at least eight Pakistani soldiers and recovering a heavy machine gun.

The capture of Point 5140 set in motion a string of successes, such as Point 5100, Point 4700, Junction Peak and Three Pimples. Along with fellow Captain Anuj Nayyar, Batra led his men to victory with the recapture of Point 4750 and Point 4875. He attained martyrdom when he tried to rescue an injured officer during an enemy counterattack against Point 4875 in the early morning hours of 7 July 1999. His last words were, *"Jai Mata Di."* (which means *"Victory to the Mother Durga!"* in Punjabi). For his sustained display of the most conspicuous personal bravery and leadership of the highest order in the face of the enemy, Captain Vikram Batra was awarded the Param Vir Chakra, India's highest military honor on 15 August 1999, the 52nd anniversary of India's independence. His father Mr. G.L. Batra received the honor for his deceased son from the President of India, the late K.R. Narayanan.

SHRI YASHPAL: Revolutionary Yashpal belonged to Village Bhumpal in Distt. Hamirpur. His father Heera Lal was a petty businessman running his small shop. Yashpal was born on Dec. 3, 1903 at Ferozepur Cantt. where his mother worked as a teacher in a famous Orphanage. Mother Premi Devi who was influenced by the ideals of Swami Dayanand got him admitted to Gurukul Kangri. He did not keep fit there and came back to Lahore where he got admission to DAV school. Yashpal stood first in Middle standard examination and passed his matric in 1921 in first division and stood first in the school. He did not get admission to Govt. College Lahore and preferred a private college run by Lala Lajpat Rai.

In the college he came into contact with Sardar Bhagat Singh, Chandershekar and other revolutionaries. He was made commander of Hindustani Socialist Democratic Army after the death of Chandershekhar. On Feb. 23, 1932 the police arrested him in Allahabad and he was sentenced to 14 year rigorous imprisonment. In 1936 he was married to Prakashwati Kapur in Jail. He was released from Jail on March 2, 1938. He gave up the path of violence and turned to writing. He started a monthly magazine by the name of, *'Viplav'* in Hindi and its Urdu version *'Baghi'* which literally means revolt.

He was a great revolutionary, visionary and writer. He wrote more than a dozen novels and a classical reminiscence *'SIHMAVLOKEN'* in three volumes. It is the story of armed revolution against British Govt. by him and his other comrades Bhagat Singh and Chander Shekhar Azad. Besides novels he wrote about a score of collection of stories, plays and essays. He died on December 26, 1971. Government Senior Secondary School Bhumpal in District

Hamirpur is named after him.

DR. Y.S. PARMAR: (4th August 1906– 2nd May 1981) Born at village Bhagthan in Sirmaur district. His father's name was Bhandari Shivanand Singh Parmar, a popular leader, successful lawyer and eminent writer. Dr. Y.S. Parmar was educated at F.C. College, Lahore and Canning College, Lucknow, Lucknow University. Dr. Y.S. Parmar did M.A., L.L.B. and Ph. D. He had been:

- Member Seva Samiti Nahan (1919-20).
- Member Theosophical Society, Dehradun (1929).
- Sub-Judge and Magistrate Ist Class, Sirmaur State (1920- 37).
- Secretary, Nahan Cricket Club (1937-39).
- District and Sessions Judge, Sirmaur State (1937-41).
- An advocate in Judicial Commissioner's Court, Himachal Pradesh.
- President of All India State People's Conference (1947).

Organised Suket Satyagraha in 1948, which culminated into the integration of princely states in Himachal Pradesh, was nominated to AICC in 1948. Later on, became Member, Chief Commissioner's Advisory Council (1948). Elected President of Himachal Pradesh Congress Committee (1948-50). Dr. Y.S. Parmar contested first Legislative Assembly election in 1951-52 and got elected its leader, to be sworn in as first Chief Minister for the period from 1952 to 1956. Elected to parliament in 1957. Elected President of the Himachal Pradesh Congress Committee in 1960.

He was Advocate to Supreme Court in 1961. President of HPCC during 1961-62 and 1963. Reelected Chief Minister of the Pradesh in 1963 and again in 1967, got elected to Vidhan Sabha from Renuka constituency. Since 1967 to 1977, Dr. Parmar remained Chief Minister of Himachal Pradesh continuously. Dr. Parmar was an eloquent writer and wrote following books:

- "Social and Economic Background of Himalayan Polyandry".
- "Himachal Pradesh"–Its proper shape and status.
- "Himachal Pradesh"–Case for Statehood.
- "Himachal Pradesh"–Area and language and strategy for development of hill areas.

Dr. Y.S. Parmar was not only a political leader, but man of versatile nature and qualities. Actively participated in national movement and integration of princely states. To provide self-government to Hill people, fought and waged struggle to a purposeful end in 1971. After achieving statehood task, he asked people to rededicate themselves to state-building process, which was the real test of seriousness and sense of responsibility. Throughout his life, Dr. Parmar was synonymous to the progress of the State. He will be remembered as founder of Himachal Pradesh.

PERSONALITIES (PRESENT)

"I must work for the public benefit. For what do I toil?
For the discharge of my debt to all living beings,
so that I may make them happy in this world
and sure of heaven in the next".

(Unknown)

DEVI CHERIAN : Ms Devi Cherian, hailing from the Chamba area of Himachal, was awarded the *'Rajiv Gandhi Ekta Samman Award- 2006'* for her achievement in social service and journalism. The award has been instituted in the memory of late Rajiv Gandhi. Miss Cherian hails from a family of politicians as her father, Mr Des Raj Mahajan, remained the Assembly Speaker and her brother, Mr Harsh Mahajan, a minister in the Virbhadra Singh government. She has herself been a member of the Seva Dal during the Rajiv Gandhi regime. She has been involved with a number of social issues. She is actively involved with Deepalaya, an NGO working for educating orphaned children. She is also on the board of Action India, an NGO working to provide relief to those afflicted with AIDS. Besides, she is a writer and columnist. She has also been anchoring two regular programmes on the Punjab Today channel.

DALIP SINGH RANA (The Great Khali): Dalip Singh Rana has come a long way. He once worked as a labourer in a tiny Himachal village and today he is a part of the professional wrestling circuit that is watched by millions worldwide. Dalip Singh now fights for World Wrestling Entertainment (WWE) in the US under the ring name, *'The Great Khali'*. Standing at 7 feet 3 inches and weighing 420 pounds, Singh is one of the tallest wrestlers in the popular WWE circuit. He has also acted in a Hollywood film *The Longest Yard* with Adam Sandler. Dalip has been named The Great Khali by WWE organisers as he often invokes Kali, the Hindus goddess of destruction, during his fights. He is the third of the eight children born to his parents in Dhirana village of Sirmaur valley, about 170 km from Shimla. Before embarking on his sporting career, Dalip was an officer in the Punjab state police, a champion bodybuilder

and an athlete. Dalip worked for many years as a labourer in
and later in Shimla, after which he was picked by a neighb
Police chief and recruited as a constable. Here he began bod and
later went on to make his debut as a professional wrestler.

become minister in BJP government, lost 2012 election from Dharamshala.

KULBHUSHAN UPAMANYU : The man who made the *'Chipko movement'* a success in the remote areas of Chamba district in Himachal Pradesh, is Kulbhushan Upamanyu. The degradation of Chamba's environment and the depleting flow of the Ravi river, eulogized in many a folk song and folk tale, have left Kulbhushan Upamanyu worried. A close associate of Chipko leader Sunder Lal Bahuguna, Upamanyu has devoted his life to protecting the environment of this district. Upamanyu favours only those micro power projects that have no adverse effect on the environment and generate employment for the local people. The people of Himachal know Upamanyu as the man who came out on the streets against the government policy of planting pine saplings.

He even destroyed a government nursery of pine trees. The pine is harmful for the local flora and fauna. Its leaves are acidic and destroy the natural grass, which is fodder for the livestock. Making people aware about their environment is his life's mission. Inspired by Bahuguna, this native of Kamla village has truly emerged as a protector of the verdant hills of Chamba.

KUNJ BEHARI BUTAIL : Kunj Behari Lal Butail, a veteran Congress leader and former HP PCC president and former MLA, died on September 15, 2006. He was 73. He had lung cancer for the past one year. Butail represented the Palampur constituency in the HP Assembly thrice from 1966 to 1980. He also served as PCC president during Dr Y.S. Parmar regime. He was considered as one of the masterminds in the Congress who had given new dimension for the development of Kangra. Butail was remembered as an arch rival of Dr Y.S. Parmar, the then Chief Minister of Himachal Pradesh. He was the first Congress leader of the state who raised the issue of discrimination with the merged areas of the state. He was offered Cabinet rank by Dr Parmar but he refused to accept it, Pt Jawahar Lal Nehru and Indira Gandhi visited his house many times.

SHRI MAHESHWAR SINGH: Born on 13th February 1949 at Bangalore in Karnataka. His father's name was Raja Mahender Singh and mother Rani Yina Diweshwar Devi. Mr. Maheshwar Singh was born in a princely family. Took his early education in a convent central high school Solan and completed Matric in 1965. During college days. Mr. Singh had been active in various constructive activities. Joined active politics in 1972 getting elected as Municipal Commissioner Kullu Town Party. Legislative Assembly in February, 1990 (independent), remained member; committees on Public Accounts and subordinate etc. Elected again to the House in November 1993. Elected again in 1998 on HVC ticket and in 2003 on Loktantrik Morcha ticket. Joined BJP in 2003. Won 2007 election from Dharampur and became. Rural Development minister. Won 2012 election to sit in the opposition bench.

NEERAJ KOHLI : Having won the international contest for planning a colony on the Mars organised by NASA in 2006, Neeraj Kohli a student of the JP University of Information Technology brought laurels to his institute as he was selected to represent India at the International Astronautical Congress- 2006 held at Spain October 2 to 6. Twenty-one-year-old Neeraj

Kohli, hailing from Solan, is one of the five students who represented their country in Spain. It was on August 8 that the Indian Space Research Organisation (ISRO) and Astronautical Society of India organised a national-level competition to select those who would represent India in Spain.

The theme for this year's congress was *"Faster, safe and economical transportation system to reach Moon, Mars and beyond."* Neeraj a final year student of Electronics and Communication at the IT University at Vakanaghat is the topper of his course in the JP University of IT. The eight teams had to participate in the contest. *"The space settlement design competition"*, organised by NASA. The participants were given details whether the colony on the mars was to be set up on the surface or in the atmosphere and they submitted a 50 page proposal. NASA selected the best proposal out of the ones prepared by the eight teams, out of which four teams were from the USA, three from India and one each from Australia and Malaysia.

SHRI NARENDER CHAND SISODIA : Born on 5th October, 1921. Rana Narender Chand Sisodia was the last ruler of Patta Mehlog riyasat. He had his early education from Lahore. With proficiency in Hindi, Urdu and English. Unlike other rulers he donated his land to locals or for the Government offices. There are a number of offices such as Hospitals, IPH, PWD, Electricity, Telephone, Forest, Revenue and Animal Husbandry on the land donated by Rana Narender Singh. He took keen interest in the development of Patta-Mehlog riyasat. He was member of a number of committees, such as Animal Husbandry, Small Scale Industries etc. Died on 22nd January, 2011.

SHRI PREM KUMAR DHUMAL: Born at village *'Samirpur'*, district Hamirpur on 10th April 1944. His mother was Smt. Phulmu Devi and father Captain Mahant Ram. Took his early education at middle school *'Bagwara'* and did Matric from D.A.V. High School *'Tauni Devi'* (District Hamirpur). Joined Life Insurance Corporation of India while studying in B.A. 1st year at D.A.V College, Jallandhar. Joined Punjab University Evening College, Jallandhar and completed graduation in 1968.

He won University Merit Scholarship, has been a keen sportsman and so captained College Volleyball Team for three years. Held many important positions during his college life, such as General Secretary 'Students Central Association', Editor College Magazine, General Secretary 'Students Welfare Association' and many other organisations. Topped in M.A. English from Doaba College, Jallandhar in 1970 and joined as a lecturer in Punjab University Evening College, Jallandhar, to later on shift to Doaba College Jallandhar. In 1998 got elected to state Vidhan Sabha from Bamsan and became Chief-Minister on 24th March 1998. Won 2003 and 2007 election for Vidhan Sabha from Bansan and second time became Chief-minister in 2007. Was leader of opposition in Vidhan Sabha from 2003-2007.

In 2012 Mr. Dhumal was honored with mother Teressa Award by the mother Teressa International award committee Kolkatta. The award was given in recognition of the services rendered by him to the people of the state in particular and nation in general. Won 2012 election from Hamirpur Vidhan Sabha seat but had to sit in opposition as BJP lost election.

RAJNI SHARMA : Born in Burli Kothi near Paprola, district Kangra, a law Graduate from H. P. University Shimla got Commission in the Judges Advocate General Branch of Indian Army on 20th March, 2004. She is the first female from Himachal to qualify for legal branch. The main function of this branch is to conduct court martial. Her first posting was in eastern command Kolkata.

RAKESH DHIMAN : He devised a method of making the study of inorganic chemistry not only easy but interesting for students, who otherwise just cram up chemical formulae. Rakesh Dhiman, a nonmedical TGT teacher, posted at government school, has devised a three-disc quiz dial for 1551 chemical formulae. A teacher since 1986, his endeavour has always been to develop scientific thinking and critical attitude among young learners. The school teacher has even turned down the offer of a US company, who had sought the copyright of his three-disc ready reckoner. Of the three discs, the first has been devised and designed to discover electrovalent positive and negative radicals along with their atomic numbers, valencies, the name of elements and their respective radicals. The second disc related to the process of getting and making chemical formulae of a compound by rotating the disc and fixing at a particular place. The crisscross method has been used in this process to derive chemical formulae of a compound.

The third disc acts as a pivot of this low-cost teaching aid and can be used as a ready reckoner of 1551 chemical formulae. Here the permutation and combination of 33 basic radicals and 47 acidic radicals can give a total of 1551 chemical formulae. Mr. Dhman, who teaches chemistry, physics and biology, is now working on optical physics. After doing his schooling from Sarkaghat, he graduated in B.Sc (nonmedical) from Hamirpur College, and did his B.Ed from SCERT at Solan.

SHRI RIKHI RAM KAUNDAL : Son of Shri Bhagat Ram Kaundal; born at Village Jol, Distt. Bilaspur on January 5, 1947; Matric and Diploma

in Electrical Engineering; educated at Mandi; Married to Smt. Prakasho Devi Kaundal; One son and three daughters; Political Worker. Began his career as Electrical Chargeman in Hydel Project, Jogindernagar; joined politics in 1975; remained President, Distt. Youth Congress (two years); Sarpanch, Gram Panchayat (three years). Elected to the State Legislative Assembly in 1985 and reelected in 1990, 1998 and December 2007 from Geharwin Assembly Constituency which has now been renamed as Jhanduta after the delimitation. Remained Deputy Speaker, 1990-92; Minister of State for Cooperation, October 1998 to March 2003; remained Chairman of Welfare and Member Human Development Committees before being elected Deputy Speaker on 04-08-2009 and remained such till December 2012. Returned to the State Legislative Assembly for the fifth term in December 2012.

DR. RITESH ARYA: Books on hydrogeology contend that the probability of being able to economically harness groundwater on mountain peaks is low. Geologists, scientists and drillers have over the years seconded this opinion. It took indomitable will power and strength of conviction for a young scientist to prove otherwise. In fact, Dr Ritesh Arya (32) left his state government job as a hydrogeologist just because he wanted to prove that it was possible to exploit groundwater in higher reaches of the Himalayas. Arya hails from Kasauli and is an alumnus of Punjab University's Geology Department.

It all started in 1996 when Arya put forth his views on groundwater movement and its occurrence in China. A UK-based non-government welfare organisation, Water and Charitable Trust, was looking for someone who could provide basic amenities to Tibetans settled in Ladakh and when Arya said that it was possible to harness groundwater on mountain peaks, a deal was struck on a *'no-water no-money basis'*. This young lad then set about the herculean task of drilling mountains for groundwater. He painstakingly compiled data from 5,000 bore wells and developed a hydrogeological model. Then he purchased a drill-rig to sink wells at altitudes varying from 13,000 to 18,000 feet, at Sonam Ling settlement in Choglamsar, near Leh, and Thoise. His venture was successful. Water flowed from the bore wells and the plight of the dwellers was mitigated. A Rs 40 lakh project to drill 20 bore wells was also successfully accomplished. Then, in 1999, Arya drilled quite a few bore wells for the Indian Air Force, including some for drinking water purposes.

He is the first person to have crossed Khardungla to drill a deep tube well. Intriguingly, he does not use modern resistivity methods of exploring ground water and goes more by lithology, geomorphology, his intuition and experience. The hill men are indebted to Arya. He has provided water to their parched lips. In turn, this geologist is grateful to them. Because of them, he was able to prove to the world that his assumptions were right. And for that he had to take on the mighty mountains.

SANJAY KUMAR (RIFLEMAN), PVC: Rifleman Sanjay Kumar, PVC (b. 3 March 1976) is an Indian Army soldier and recipient of the Param Vir

Chakra, India's highest military award. Kumar w... ...n the village Klol Bukiana in Bilaspur district of Himachal Pradesh. On July 4, 1999, as a member of the 13th Battalion, Jammu & Kashmir Rifles, he was the leading scout of a team tasked to capturing Area Flat Top, during the Kargil War. The area was held by Pakistani troops. Having scaled the cliff, the team was pinned down by machine gun fire from an enemy bunker, about 150 meters away. Kumar, realizing the magnitude of the problem and the detrimental effect this bunker would have in the capture of Area Flat Top, crawled alone up the ledge, along a flank, and charged towards the enemy bunker through a hail of automatic fire. Almost instantly he took two bullets in his chest and forearm that left him bleeding profusely.

Though bleeding from the bullet wounds, he continued the charge towards the bunker. In hand-to-hand fighting, he killed three enemy soldiers. He then picked up an enemy machine gun and crept towards the second enemy bunker. The enemy soldiers, taken completely by surprise, were killed by him as they fled their post. Inspired by his act the rest of the platoon charged, assaulted the feature and captured Area Flat Top.

In 2010 Kumar was demoted two ranks from Havildar to Lance Naik. The army refused to cite any reasons for his demotion. Moreover, the army concealed the facts by continuing to refer to him as Havildar in press releases. Recipients of the Param-Vir Chakra are saluted irrespective of rank, which is alleged to be the bone of contention between Kumar and senior officers. Kumar was offered a job by the Himachal Pradesh Government, and may accept this offer after completing his 17 years service (for receiving post retirement benefits) in the army.

SANJEEV DHIMAN : Hailing from Pragpur village under Dehra tehsil of Kangra district, Sanjeev was brought up and had his schooling out of his native village, owing to frequent posting/transfers of his father. But this failed to lessen his love for the land. A first-class B.Sc from Pune University, Sanjeev was commissioned into the 16th Rajputana Rifles, on March 9, 1996. Sanjeev had commanded the 11th Rajputana Rifles in the Siachin and Kargil operations for which he was decorated with the Army Commander's Commendation Card. Major Sanjeev, who did India proud by making the supreme sacrifice, has elevated the honour of Himachal Pradesh.

SMT. SARVEEN CHAUDHARY : Daughter of Shri Gurdev Singh; born at Dharamshala on 21st January, 1966; M.A. (Classical Dance) and Diplomas in Yoga, Painting and Cookery; educated at Chandigarh; Married to Brigadier Pawan Kumar; One son; Political Activist and Teacher. Took part in Nehru Yuva Kendra and N.S.S. activities during student life; participated in folk dance competitions at National and International level; and remained best Fold Dancer, Punjab University for five years. Active worker, R.S.S.; entered politics in the year 1992; remained Mandal Pradhan, Mahila Morcha, B.J.P. 1992-94; Member, State Executive B.J.P. since 1993; and President, Bharatiya Janata Party, Distt. Kangra, 1995-97. Elected to the

State Legislative Assembly in 1998; reelected in 2007; remained Parliamentary Secretary, 03-11-1998 to March 2003; Minister for Social Justice & Empowerment from 09-01-2008 to December, 2012. Elected to the State Legislative Assembly for the third time in December, 2012.

SHRI SHANTA KUMAR: Born on 13th September 1934 at village *'Garh Jamula'*, tehsil Palampur, district Kangra. Became Chief Minister of Non-Congress Government second time on 5th March 1990. Father late Pt. Jagan Nath and mother Smt. Kaushalya Devi brought him up in a most disciplined and cultural adroity. Got his early education from S.D. High School Thural, Tehsil Palampur, District Kangra, did B.A., L.L.B from Delhi University. In his student life, used to take keen interest in declamation contest. Married to Smt. Santosh Shailja and became proud father of three daughters and a son. Smt. Shailja was a teacher by profession. Shanta Kumar also worked as a teacher in S.D. High School, Thural and D.A.V School, Gandhinagar.

The habits and traits infused by parents in the dedicated mind of son Shanta started showing true colours of patriotism and selfless service when he was only seventeen years old. Inspired by R.S.S. movement left home to become *'Pracharak'* in 1951 in Kangra and continued to work as such till 1953. Participated in *'Pathankot Satyagrah'* for merger of Jammu and Kashmir in Indian Union and was arrested at the age of 19 years in 1953. Remained in Hissar and Gurdaspur jails for nine months. Elected *'Panch'* of Gram Panchayat 'Garh Jamula' in 1964. Later on, became Vice-President, Zila Parishad Kangra. Elected to Himachal Pradesh Vidhan Sabha for the first time in 1972, on Jana Sangh ticket. In 1977, was elected again and elected as leader of the Janata Legislative party and remained Chief Minister till February 1980. In 1982, returned again to Vidhan Sabha and was leader of Opposition in Vidhan Sabha. Lost 1985 State Assembly election and also remained President of State Bhartiya Janata Party from 1986 to 1990. Elected to Lok Sabha from Kangra Parliamentary constituency in November 1989. In February 1990, elected as MLA from Palampur and Sulah constituencies and elected as leader of the B.J.P. Legislative Party and took over as Chief Minister.

In 1993, Vidhan Sabha election, contested from Sulah seat and lost. He has been an eloquent writer too and had authored *"Dharti Hai Balidan Ki", "Himalaya Par Lal Chhaya", "Desh Bhakat Swami Vivekanand", "Rajniti-Ki-Shatranj", "Mrigtrishna". "Lajo"* and *"Kaidi", "Man-Ke-Meet", "Pahar Begane Nahin Honge"* and *"O, Parvasi Meet Mere"* is joint collection of short stories and poems by him and his wife Smt. Santosh Shailja. Won 1998 and 2014 Lok-Sabha election from Kangra seat, was also member of Rajya Sabha from 2008-2014. Became Rajya Sabha member in 2008. Won 2014 Lok Sabha election from Kangra constituency.

SHRI SUJAN SINGH PATHANIA: Son of Shri Hoshiyar Singh; born on 22nd September, 1943 at Lahore (now in Pakistan); B.A. and two years training in Forestry from N.F.R.C., Dehradun; Married to Smt. Ravinder Kumari Pathania on 5th October, 1973; One son and one daughter,

Agriculturist. An active athlete during school and college years; served in H.P. Forest Department as Range Officer; resigned from service to join Janata Party in 1977 and later on joined Congress (I) in 1980.

Elected to the State Legislative Assembly first in 1977 and again in 1990, 1993, 2003 and in November, 2009 (by election) from Jawali Constituency which now has been renamed after delimitation as Fatehpur. Remained Vice-Chairman, State Forest Corporation, 1982-83, and (ii) State Housing Board, 1984-85; Minister of State for Agriculture (Independent charge), 1995-98; and Transport Minister, August 2007 to December 2007, and Member, Estimates and Public Administration Committees from November 2009 to December, 2012. Elected to the State Legislative Assembly for the sixth time in December, 2012; inducted into Council of Ministers as MPP & Power Minister with additional charge of Non-Conventional Energy Soures and Agriculture.

PT. SUKH RAM: The son of an agriculturist and Sanskrit scholar. Born on 26th July, 1927, in a small hamlet called *'Arnyana'* in Mandi district of Himachal Pradesh. An alumnus of the Law Faculty of Delhi and a graduate of Punjab University in English, Political Science and Economics. Started his legal practice in Mandi Town and also became the Secretary of the Municipal Committee, Mandi. During this time, was very active in social welfare and cultural activities. Contested the Mandi Assembly Constituency elections in the year 1962 and joined the Himachal Pradesh Council of Ministers in the year 1967 as Finance and PWD Minister.

Continued to be a Minister therein holding various portfolios like Development, Power, Social Welfare, Agriculture, Horticulture, Animal Husbandry and Fisheries; a dynamic and result oriented man, held all his departments with distinction and his contribution towards the development of power in the hilly State of Himachal Pradesh is acknowledged by one and all. He was one of the very few successful Congressmen in the year 1977 to be returned from an urban constituency, i.e., Mandi, Appointed General Secretary of the HPCC in the year 1977 to 1980, the period when the party was passing through a political crisis. In the year 1980, the Congress Party returned to power and he was inducted as a Cabinet Minister. He won 1984 parliamentary election, but lost in 1989 to Raja, Maheshwar singh. In 1991 once again won Mandi seat in Parliamentary election. Responsible for preparation of many employment oriented schemes for the unemployed youth including providing of interest free loan for the purchases of hybrid cows and in similar fashion, for the promotion of fisheries in the State. Another innovation that goes to his credit is the plantation and promotion of olive in the State. This programme of olive plantation culminated in a sanction of a project for the propagation of olives from the Italian government.

Has also been a member of the Union Council of Ministers when he had efficiently handled important Ministries like Defence Production and Supplies, Planning and Programme implementation, Ministry of Food & Civil Supplies and the Ministry of Non-conventional Energy Resources. In his charge as

Minister of Non-Conventional Energy sources, he provided the much needed impetus to the Non-Conventional Energy Programmes in the country.

He married Smt. Ram Devi on 6th August, 1953 and has two sons and three daughters. Non-vegetarian and a teetotaller. Widely travelled all over the world and has visited France, Germany, Russia, Cyprus, Switzerland and United Kingdom. Led State and Central delegations to England, France, Germany, Switzerland, Russia and Cyprus. A God fearing man of simple taste, Pt. Sukh Ram, is an avid reader on varied subjects and a yoga enthusiast. Won 1996 Lok-Sabha election from Mandi. At the time, when he was minister of State for Communications in the Union Council of Minister, he introduced revolutionary era in the field of telecommunication, all over the country in general and Himachal Pradesh in particular. In 1998 won Mandi Vidhan Sabha seat and joined B.J.P. led ministry but resigned soon after the Supreme Court's instruction.

SHASHI KIRAN : Principal of Shimla D. A. V. School and director Shimla-Solan circle of D A V institution, was awarded C.B.S.E. National Award in the year 2004. Under the award a citation and Rs. 25000/- cash is given. In 1965, the then President of India Dr. S. Radhakrishnan presented her with 'President Guide' award. She is the first lady from Himachal Pradesh to receive two National award for excellence in the field of education.

SHRI SHYAM SHARAN NEGI : He had the privilege to be the first voter of Independent India in 1951. As election for Ist Lok Sabha were held in 1952, but due to Kinnaur being a snow bound area, election were held here in advance. Shyam Sharan Negi was first electorate to caste his vote. He was honoured by the Chief Election Commissioner Mr. Naveen Chawla in 2010.

SUNIL DUTT GAUTAM : He is a young, budding artist of Shimla who has carved a niche for himself in the field of bronze statue-making. He is working as a lecturer in the sculpture department at Kotsherra Government College in Shimla. Hailing from Dehra village in Kangra district of Himachal Pradesh, Sunil completed his masters degree in fine arts from the Government College of Art, Chandigarh, where he topped. After clearing an all-India competition, he joined the famous Shanti niketan University in West Bengal in 1995 for acquiring higher skills in the field of fine arts. At Shantiniketan, he learnt the art of making statues from materials like wood, stone, plaster, earth and cement. He developed a fancy for making statues from different types of metals and he decided to specialise in the art of bronze statue-making. During his stay at Shantiniketan he got an opportunity to work under the guidance of renowned sculptors like Jogan Chaudhary, Sharbari Roy Chaudhary, Sushen Gosh, Shiv Kumar and K.G. Subramanyam. Sunil's work was noticed when he prepared a life-size brone statue of a former minister of Himachal Pradesh, Daulat Ram Sankhyan, which was put up near the circuit house in Changar village in Bilaspur district. This was the first time that a metal statue had been made by a Himachali and that too in a matter of 60 days. Thereafter, the government of Himachal Pradesh asked Sunil to make a statue of Maj Somnath Sharma, posthumous awardee of Param Vir Chakra. Besides making

statues, Sunil can also play the *tabla, dholki* and *sitar* with ease. He has also received training in Kathakali. He also likes to read books on art and literature.

SURENDRA BHUSHAN : Born on 9th March 1967 at a place 'Rey' in district Kangra, did his Post graduation from Punjab University and joined teaching profession. He has been associated with various social and cultural activities in the state. In 1994-95 he was presented with a meritorious certificate by district administration Kangra, for his contribution to eradicate social evils. In 2004 he was awarded with *"Shanker Jyoti Samman"* in Guwahati for his social and cultural works among destitutes. He has also (Assam) been awarded *'Excellent Services Award'* by Indian National Trust for Art and Cultural Heritage.

SHRI VIR BHADRA SINGH: Born on 23rd June 1934. Remained Chief Minister of Himachal State from 1983 to March 1990. He is the 31st descendant of princely Bushahr State. His father's name was Raja Padam Singh and mother Ratan Kumari. Born at a place known as Sarahan in district Shimla, did M.A. from St. Stephen College, Delhi, in History. Elected to the Lok Sabha (1962-77); Member to Indian Delegation to U.N. (1976); conferred honorary rank of Captain in Indian Army (1962); appointed honorary A.D.C. to President of India; Chairman Sanskrit Sahitya Sammelan; president, Himachal Pradesh Congress Committee (1977-79); Member, Estimate Committee of Lok Sabha, Deputy Minister for Tourism and Civil Aviation in Union Council of Ministers from 1980-83. Also Minister of State for Industry, Union Government for a short stint.

Mr. Vir Bhadra Singh remained Chief Minister of the State for almost six years, during which he focused his attention on various complex problems, faced by inhabitants of the hills. President of HPCC in 1989-90. In 1990, he contested from Jubbal and Rohru but captured only Rohru seat with the biggest margin. Lost seat to former Chief Minister and Janta Dal member, Shri Ram Lal. In 1993 got elected to Vidhan Sabha and was Chief Minister from 1993-1998. In 1998 once again got elected for State Legislative Assembly from Rohru. Became Chief Minister from 5th March to 23rd March 1998. In 1998, reelected and became Chief-minister for a few days. Won 2003 election and became Chief-minister for 5th time . He also got elected in 2007 and 2012 assembly election. In 2009 won Mandi Lok-Sabha seat and became cabinet minister in union government. In 2012, resigned from union government to contest Vidhan Sabha election from Shimla rural. Became Chief-Minister 6th time in December 2012.

GENERAL V.N. SHARMA (PVSM, AVSM, ADC): Belongs to a distinguished military family who have served in the Armed Forces for two generation and produced three Generals. His father was the late Major General A.N. Sharma who retired in 1953 as Director Medical Services. He is the younger brother of late Major Som Nath Sharma, PVC, who was awarded independent India's first Param Vir Chakra posthumously on 3rd November 1947 for the *'battle of Badgam'* in Kashmir, as also of Lt. Gen. S.N. Sharma, PVSM, AVSM,

who retired as the Engineer-in-Chief in 1981. General Sharma was educated at *'Sherwood College'*, Nainital and *'Prince of Wales RIM College'*, Dehradun. He joined the 5th Regular Course at the Indian Military Academy, Dehra Dun and was the *'First recipient'* of the Rajputana Rifles Gold Medal for tactics and leadership. He was commissioned on 4th June 1950 into the 16 Light Cavalry and was on the rolls of this regiment for sixteen years.

During his 40 years of distinguished commissioned service, held important command, staff and instructional appointments. As a captain, he commanded an *'Independent Armoured Car Troop'* during counter-insurgency operations in North-East India. As a Major, he saw action during the 1965 Indo-Pak War. He was Colonel, 'General Staff Operations' of an Armoured Division on the Western Front during the 1971 Indo-Pak War. On promotion to the rank of Brigadier, he commanded a mountain brigade in an insurgency affected area and was awarded the *'Ati Vishisht Seva Medal'* in 1977 for distinguished services. In 1980, promoted Major General and commanded a mountain division in the Eastern sector with defences in high altitude areas.

He then served as Deputy Director General Military Operations at the Army Headquarters. He was promoted Lieutenant General and took over command of a reserve Corps in the Western Sector in 1984 and was awarded the *'Param Vishisht Seva Medal'* for rendering distinguished services of the most exceptional order in March 1986. Appointed Commandant of the prestigious College of Combat at Mhow. General Sharma took over as General Officer Commanding-in-Chief, Eastern Command, on 1st June 1987 and successfully conducted counter-insurgency operations in the North-Eastern states as also the defence of the Indo-China border in the states of Sikkim and Arunachal Pradesh.

A graduate of the Defence Services Staff College, Wellington and the National Defence College, New Delhi. Appointed Honorary army ADC to the President on 25th July 1987. As Chief of Army Staff, he was the ex-officio Colonel of 61 Cavalry and Honorary Colonel of the Brigade of the Guards. He took over as Chief of the army Staff of the Indian Army on 1st May 1988. During the period of his tenure, the Army successfully executed difficult and varied military operations, both within and outside the country. High altitude warfare in the Siachin glacier, the highest battlefield in the world, amongst perennial snow and avalanche prone mountains; Counter insurgency in Jammu and Kashmir; On the external front, the successful conclusion of hostilities in Sri Lanka and the withdrawal of IPKF from the island after two years of tough counter insurgency operations;

The Maldives operations which were executed with speed and precision, bringing to book within hours the terrorists wanting to take over the country and overthrow its lawfully elected President. As Chief of the Army Staff, General Sharma made special efforts at improving relations with several armies of the world. Since retirement on 30th June 1990, the General became a member of a number of *'Think Tanks'* for strategic studies. At village home at 'Dadh'

district Kangra, Himachal Pradesh, the General used to spend about five months every year, besides his interest in ecology and farming, he had organised free aid for Tuberculosis patients. For this, a mobile van and medical staff had been provided by the World Memorial Fund for Disaster Relief. The Major Som Nath Sharma , (PVC) Medical & T.B. Clinic is being utilized, a building constructed by the General's late father on his land. The General has also been organising a Gem Cutting Centre at *'Dadh'* for self-employment training to young village boys and girls in an eco-friendly industry. This was with assistance of the civil administration and the Diamond & Gem Development Corporation.

MRS. VIDYA STOKES: Born on 8th December 1927 at Kotgarh in district Shimla (Bohemia Estate, Shimla). An active member of Indian National Congress since 1970 and of Himachal Pradesh Congress Committee since 1974. She was nominated member of All India Congress Committee in 1976. He was President, Pradesh Janata Dal and Later on Joined Congress (I). He won 1990 and 1993 elections for Assembly (Shahpur) lost 1998 election. Won in 2003 but lost 2012 election, was minister from 1995-98 and 2003-2004.

PT. VIJAY KUMAR : He has held the distinction of being the first Bollywood actor from Shimla to have played the leading roles with famous actresses like Lalita Pawar, Leela Chitnis, Kumari Kamlesh and Devika Rani. Incidentally, his wife, Kumari Tara, hailing from the Chail area, also worked as the leading lady with Pandit Vijay in the film *'Sajeev Moorti'*. One of the top artist of All-India Radio, Shimla, and the film world, Vijay Kumar was born on March 10, 1905, in Shageen village. His father Kanshi Ram was a prominent person of the village.

A brilliant student, Vijay Kumar did matriculation from Shimla and F.A. from Mahindra College, Patiala. He graduated in 1930 from S.D. College, Lahore, and passed his M.A.M.O.L. from Oriental College, Lahore, in 1932.

While studying in Lahore, the owner of the well-known premier Film Company was impressed by his towering personality and cast him as the leading actor for his film *Dukhtarey Zamana,* which was to be directed by famous director Gopal Krishan Mehta. Although this film did not do well at the box office, Vijay Kumar's talent was noticed and he got offers to work in other movies.

After completing his studies, he shifted to Mumbai and since then there was no looking back for this young and talented actor who did not have to struggle to make an entry into the film world. In Mumbai, his first movie in the era of the talkies was *'Sajeev Moorti'.* This is the first and the last movie in which the beautiful, shy and demure wife of Vijay acted. Vijay's role in *Sajeev Moorti* was greatly appreciated by the public. In his next film *'Azadi'* produced by New Theatres, Vijay Kumar got an opportunity to write the script of the film and direct its music in addition to playing the lead role.

The famous actress of yester year, **Lalita Pawar, was the heroine.** Under the banner of the famous New Theatres, Vijay acted as hero in many movies such as *Sajeev Moorti* and *'Abhagin'.* In *Abhagin,* Vijay Kumar worked with Kamlesh Kumari and Prithvi Raj Kapoor. He again acted as a hero in the film *'Shaadi ki Raat'* produced by Bhawani Productions. In 1936, Devki Kumar Bose, director of the East India Film Company, noticed his talent and urged him to try his luck in Tollywood in Calcutta. There, Vijay Kumar acted in a number of films like *Sunehra Sansar, Hari Kirtan* and *Meri Asha,* which became box-office hits. His last film *Meri Asha* was produced by the East India Film Company. In 1940, his film career came to an abrupt end when he got intimation about the serious illness of his father. The All-India Radio station at Shimla, which was set up in 1955, asked him to exhibit his talent there. Thus, a famous hero of Hindi Movies remained associated with All-India Radio for a long time.

VIJAY KUMAR (sport shooter): Subedar Major Vijay Kumar AVSM, SM (born 19 August 1985) is a sport shooter from district Hamirpur. He won the silver medal in the individual 25 meter rapid fire pistol event at the 2012 Summer Olympics. Kumar hails from Barsar village of Hamirpur district of Himachal Pradesh and is a serving Subedar Major (Warrant Officer Class I) in the Dogra Regiment (16th Battalion) Indian Army. Vijay Kumar is supported by the Olympic Gold Quest initiative. He has been posted at Army Marksmanship Unit (AMU) Mhow since 2003 where he is being coached by the Russian Pavel Smirnov.

At the 2006 Commonwealth Games, he won two gold medals: the individual 25 meter rapid fire pistol competition and the pairs competition in the same event together with Pemba Tamang. The same year, he won a bronze medal in the Asian Games despite actually finishing fourth because of a rule that prevented China from winning all three medals. The next year, he finished second at the Asian Championship in 25 meter center-fire pistol.

He also won a silver medal at the 2009 ISSF World Cup Beijing in rapid fire pistol, where he was defeated by 0.1 points. In the 2010 Commonwealth

Games, held in the capital Delhi he won three gold medals and one silver.

Kumar won the Silver Medal in the 25 meters rapid fire pistol event at 2012 London Olympics. He finished with an average score of 9.767. Kumar has a score of 293 with 7 inner 10s in the first stage. Vijay's silver was the second medal for India at London 2012. In 2014, 17th Asian Games held at Incheon, South Korea he led Indian contingent

Awards and Recognitions

- Padma Shri - announced in the Republic Day 2013 award list.
- Arjuna Award, 2007.
- Rajiv Gandhi Khel Ratna Award, 2012.

Military Decorations:

- Ati Vishisht Seva Medal (AVSM) - announced in the Republic Day 2013 award list.
- Sena Medal (SM)

TOURISM IN HIMACHAL PRADESH

"A man who leaves home to mend himself and others is a philosopher; but he who goes from country to country, guided by the blind impulse of curiosity, is a vagabond."

Oliver Goldsmith

Tourism is an important activity in developing economies like ours. Tourism has been considered as the second largest industry and the single largest employer in the world. Apart from removing regional imbalances, opening new growth centres, providing employment opportunities, yielding tax revenues to the government, sustaining trades, like handicrafts, etc., it ensures minimal use of natural resources and optimum use of man power and expertise. It also promotes human understanding and has led to resurgence of culture.

India can rightly boast of being one of the earliest civilisations of the world. *Throughout her history, India has always had a special attraction for the rest of the world. Unlike today a great many people in the past travelled India primarily in search of knowledge, and spiritual solace. But in the distant past, a traveller in India was a merchant, a scholar, a pilgrim and even a curious wayfarer looking forward to new experiences in the land of many splendours.* Travel in the past was fraught with risks and unpleasant experiences. However, cumbersome procedures as involved in travel today, was not to be found in the days of old.

The famous Chinese pilgrim Fahien, who travelled between 401 and 410 A.D., was without a passport. But Kautilya, in his famous book *"ARTHASHASTRA"* has mentioned that for all travellers it was essential to possess some *"MUDRA"* or passport, in the absence of which they were fined 12 *'panas'*. During the reign of Chandragupta-II, "guide" as we know today were there to avoid the threat to tourists from *'bandits'*. Each *'Caravans'* usually hired the services of *"Sarthavaha"* (leader) on whom depended the successful completion of the journey. The roadside inns known as *"sarais"* and *"dharmshalas"* were the ideal places for night's stay. The owner of these places offered information to travellers on historical sites in the region. The practice of pilgrimages have been a sacred duty as much a part of people's culture to be performed in one's life.

Ancient religious books of The Hindus the 'Vedas' enjoined that unless a

person went on pilgrimage, to the *'four sacred Dhams'* or, holy places of the country– *the temple of Lord Jaganath in Puri* (Goverdhan Math), *the* great *Setu Band Rameshwaram* in Tamil Nadu, the *Dwarika temple in Gujarat* (Sharda Math) and *Badrinath in Uttrakhand* (Joshi Math), he would not attain *'Mukti'* or Salvation and continues to suffer rebirth for sins. The rigour of such a travel, in the vast continental expanse of India can well be imagined. But it exposed people to new customs and manners and different kinds of food and modes of dress. It also encouraged exchange of ideas and fostered trade. The above mentioned four great pilgrimage centres, today are also flocked by tourists.

India attracted foreigners for various reasons and the one strongest reason was, trade and economic prosperity. Mark Twain, described it as *'fabulous world'* of "*Splendour and rags*, the one country under the sun with an imperishable interest, the one that all men desire to see". India was probably opened to outside world with the coming of Aryans, sometime in the 1500 B.C. But India was opened to Europe, when 'Alexander the great' of 'Macedonia' attacked it in 326 B.C. Later on many others, like Mongols, Vasco-de-Gama (Portuguese), Arabs and, Europeans alike come to establish trading links. The interesting accounts about their experience which is a valuable source of information providing vivid accounts about the life of people during that period.

The travelogue of 'Ibn Batutah', who visited India for fourteen years (A.D. 1333-1347) is of great help to collect information of that age. The opening of the sea and land routes to India, threw up new markets for Indian raw material and manufactured goods. Travelling during the British period in India was much more organised. Planquins were popular mode of *'dak travel'*, controlled by postal department. There were *'dak Bungalows'*, on the road side for the convenience of *'dak'* travellers. Now with the passage of time travelling pattern has changed a great deal.

Travelling abroad in the past was a prerogative of the very wealthy. It was only in the last quarter of the nineteenth century, that increasing attention was, paid to the provision of holidays with pay and cheap holidays for working class people. The inter war period virtually remained a fluctuating age from tourists point of view. It is only in post war period, when international barriers broke down, it resulted in the fostering of an ideal, optimistic and peaceful atmosphere, just required for tourism to flourish. The importance of tourism in India, had been recognised after the first world war. But the first conscious and organised step to promote tourism in India was made in the year 1945, when a committee was set up by the government of India, under the chairmanship of Sir John Sargent, the then education adviser to the Govt. of India. One of the major recommendations of the committee was related to the setting up of a separate representative organisation of semi-officials to identify the tourist spot in the country.

The committee was unanimously of the opinion that, it would be in the

interest of India to encourage and develop tourist traffic both internal and external by all possible means. The recommendations of the committee, had far reaching effects on tourism as it developed during subsequent years after India attained Independence. On the eve of independence, India had a fairly large infrastructure available for tourism. With the creation of a separate 'Tourist Traffic Branch' (a central tourism orgainsation) in the year 1949, whole time attention was paid to the development of tourism in India. According to the constitution of independent India, article 49 reads, that, the state shall in particular direct its policy towards securing protection of every monument or place or object of artistic or historical interest (declared by or under law made by parliament) to be of, national importance, from spoil, disfigurement, destruction, removal, disposal or exports as the case may be. There are certain items in the three lists of functions, which have direct bearing on tourism. The items are enumerated according to VII schedule of the Indian Constitution.

UNION LIST

19. Admission into and emigration from India.

20. Pilgrimages to places outside India.

22. Port Quarantine.

29. Airways; (aircraft and air navigation); provision of aerodromes, regulation and organisation of air traffic and of aerodromes.

36. Currency, coinage and legal tenders, foreign exchange.

67. Ancient and historical monuments and records, archeological sites and remains to be of national importance and

81. Interstate migration

STATE LIST

7. Pilgrimages other than pilgrimages to places outside India.

12. Museums and other similar institutions controlled and financed by the state; ancient and historical monuments to be of national importance.

20. Protection of wild animals.

CONCURRENT LIST

40. Archeological sites and remains other than those (declared by or under law made by parliament) to be of national importance.

Thus we find a number of items covered under three lists, have direct relation to the tourism industry. To promote tourism on a large scale, various steps have been taken by the Government of India from time to time. In 1958, a separate department of tourism was created. 'INDIA TOURISM DEVELOPMENT CORPORATION' was set up in 1966. In 1967, a full fledged Ministry of Tourism and Civil aviation was created for the department of Tourism and Civil Aviation. Later the department of Tourism, Ministry of Tourism, Tourism Development Corporation, etc. came into being at the state level.

There is no large scale public sector investment in the tourism Industry. Hence there is a need for large public investment. The following table shows the public sector outlays for tourism development in the different five year plans. It is strange to note that there was no mention of tourism in the first plan at all. To ensure the Balanced Development of Tourism Industry, government has been shifting its priorities from plan to plan.

Table-1 PLAN OUTLAY FOR TOURISM
(Central Plan in Crore)

Plans	Tourism allocation	Total Public Sector Outlay	% share of Tourism
1	2	3	4
1st Plan (1951-56)	–	2,378.00	–
2nd Plan(1956-61)	3.36	4,812.00	0.07
3rd Plan (1961-66)	8.00	7,703.00	0.11
Annual Plan (1966-69)	7.00	6,605.00	0.10
4th Plan (1969-74)	36.00	15,902.00	0.23
5th Plan (1974-78)	73.95	40,400.00	0.19
Annual Plan (1978-80)	109.00	24,280.00	0.16
6th Plan (1980-85)	187.46	97,500.00	0.19
7th Plan (1985-90)	326.16	1,80,000.00	0.18
8th Plan (1992-97)	773.62	4,34,100.00	0.17
9th Plan (1997-2002)	793.75	759,000.00	1.04
10th Plan (2002-2007)	1170.39	15,92,300.00	1.80
11th Plan (2007-2012)	9254.97	5479915.05	1.65
12th Plan (2012-2017)	18500.00	9000000.00	1.66

Source: Planning Commission Govt.. of India, Five Year Plan (Respective document).

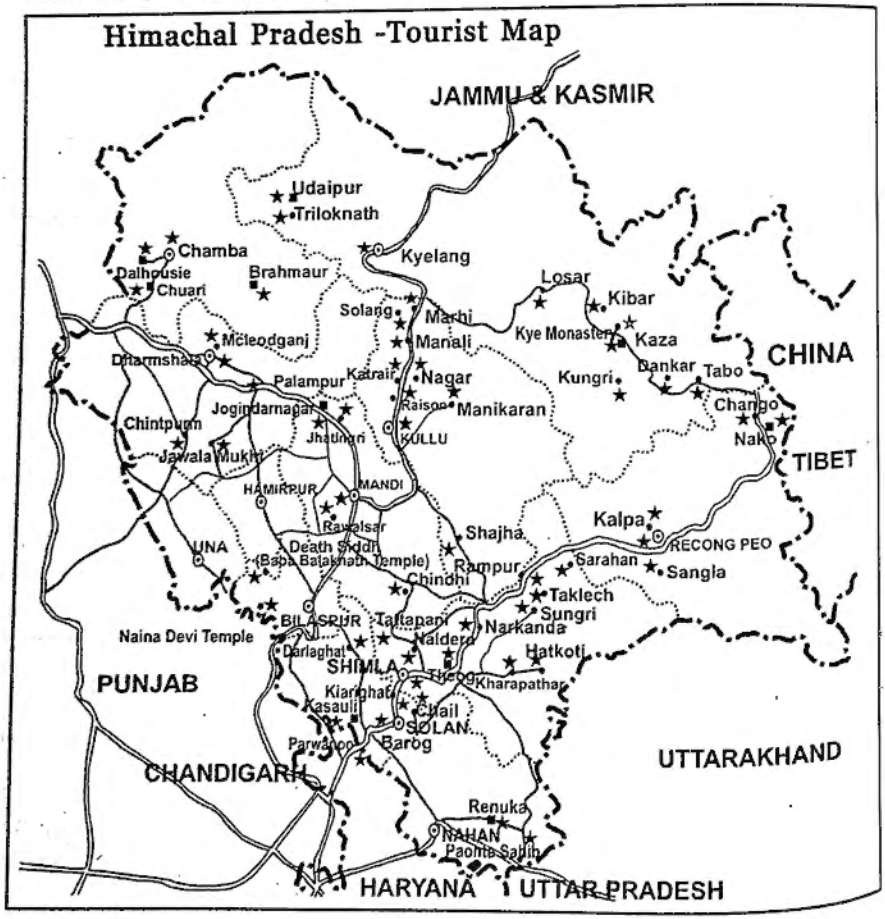
Note: (i) Plan VI was formulated by previous govt. and new VI plan covering 1980-85 was reformulated.

(ii) The VI Plan was abandoned in March, 1984 and VII plan commenced from April, 1985.

"Snow-peaked, pine scented, flower-sprangled Himachal Pradesh. A heaven in the heart of the Himalayas, Himachal Pradesh is clustered with picturesque hill resorts, where you can breathe pure mountain air, you can fish, trek, explore the country side or just gaze at the breathtaking mountains". This is how Himachal has been painted by Ram Acharya. The Puranas and other Hindu texts, also have detailed descriptions about the glorious beauty of the Himalayas, adorned on it by the Almighty. The *ashrams* built in by the *Rishis* there, had been serving as seats of learning. These institutions remained flocked of the scions of royalty, poor Brahmins and Scholars. These areas thus remained places of pilgrimage and thus today also thousands visit its temples located in difficult terrains with religious fervour. Tourism industry offers an excellent opportunities of economic gains, promotion of human

understanding and internationalism in a most smooth and successful manner. Tourism as an industry to develop developing in Himachal only in the 19th century, when the British weary of the heat of the plains started founding hill stations for rest and peace. A small village named Subathu, 20 miles from Kalka was first such stations, where the British political agent started living. Major Kennedy constructed the first pucca house in Shimla in 1822. He invited the Governors General 'Lord Amherst' to stay with him in 1827. This visit resulted in the expansion of Shimla, which was located near the spot '*Shamal Devi*' temple. Later on Lord Dalhousie shifted his summer headquarters to 'Chinni', now known as 'Kalpa', to keep watch and check on the activities of the Sikhs, on the western side of the river Satluj. Since the British days Shimla had great attractions like the football matches, horse racing, sports and gymkhanas, The first of which was held by lord Auckland in 1838 at Annadale, after his victory in the first Afghan War. During the British period Shimla was the venue of great National and International Conferences. After the departure of the Britishers in 1947, Shimla became capital of Punjab State till 1953. From 1947 to 1966, after it was merged with Himachal Pradesh, it became a back number among the districts of Punjab.

Table-2 H.P STATE PLAN OUTLAY FOR TOURISM (in lakhs)



Plans	Tourism (in lakhs)	Total Outlay (in lakhs)	% share of Tourism
1	2	3	4
1st Plan (1951-56)	–	527.25	–
2nd Plan (1956-61)	2.08	1,602.60	0.13
3rd Plan (1961-66)	12.00	3,384.73	0.35

(v) X plan (2002-2007) , XI plan (2007-2012) and XII plan (2012-2017)

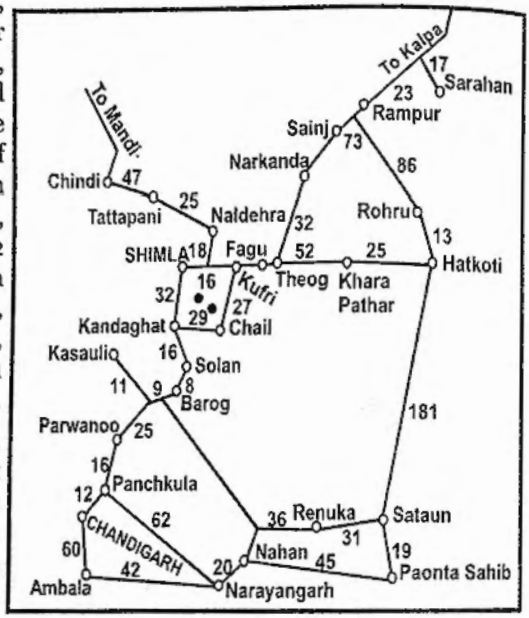
With the reorganisation of the Punjab areas, tremendously rich tourists potential areas like those of Kullu, Manali, Kangra, Dharamshala, Shimla, Kasauli, Chail and Dalhousie came over to Himachal Pradesh. Therefore, Himachal Pradesh today is next to none in the matter of potential that it

holds for promotion of tourism. The development of tourism in Himachal Pradesh began with the starting of second five year plan. Since then there has been a steady increase in the plan allocation in favour of tourism industry, to explore more and more avenues to the tourists of varied interests. The Table-2 figures are quite interesting from plans allocation point of view.

The state government in Himachal Pradesh, at present making serious efforts to give tourism a new direction and for that, has adopted a new policy for its promotion, keeping in view the immediate and future needs of the various categories of tourists. Himachal Pradesh is God's own country. It offers tremendous tourists potentialities. Some of the important tourist centres are: Shimla, Dharamshala, Kullu-Manali, Dalhousie. Four glorious hill stations studded with rare and precious pleasures... emerald forests, golden sunshine, silver streams, crystal clear rivers, pearly snow peaks, jade green meadows and other treasures just waiting for nature lovers to stake their claim. The days of the 'Raj' may have faded but an opulent heritage of excitement, adventure, natural beauty and culture still sparkles.

SHIMLA CIRCLE

Shimlu, Semla, Shumla, Shamlah, Shamla, Simla, Shimla...this historic town has almost as many aliases as the seven hills she is perched upon. In fact, the many names trace her colourful though turbulent evolution over the last few centuries. From the punishing Gurkha wars, to Lt. Rose's discovery of a thickly wooded glade around a temple, to the subsequent British getaway for heat-weary troops, the gradual conversion to a modest 'hill-station', then the elegant and elusive - though always entertaining - summer residence of the British Indian Government and finally, the bustling capital of Himachal Pradesh.



Even today, quite the 'Grande Dame of hill stations', Shimla wears an unmistakable aura of distinction, attracting droves of loyal admirers who continue to flock at her feet. And for good reason; situated at a pleasant 2,206 meters above sea level, this heritage town is practically spilling over with tourist delights : perfect weather, varied hotels, versatile entertainment, convenient shopping, colonial architecture, peace and plenty... Shimla is equally fascinating for the painter as for the politician, the botanist as well as the businessman. She still has one of the world's largest natural urban forest covers of rhododendron, oak, deodar, pine and other conifers and consequently, the most memorable walks and day excursions.

Thanks to a great highway and the continuing charms of the 'toy train', the once 'unapproachable heights' (as an exasperated Gandhiji once termed it) are now not only approachable but full of tourists who make their way across that pilgrimage of pleasure, the Mall; a mile-long haven of delights. Here, as in much of Shimla, the old world lives cheek by jowl with the new. And so Levi's coexist happily with the 'loi' Dominoes with 'daal-chawal' and homegrown bakeries with Barista.

It was once said that 'food and mouth disease' so typical of Shimla is due to the effect of the climate on the appetite, the chief symptom being an insatiable craving for food. While Shimla does indeed generate these symptoms, it provides more than enough to alleviate them. Meanwhile, Scandal Point remains a hot spot for romantic rendezvous, the clubs and coffee house keeps the transmitters of gossip alive and kicking, the many bazaars continue buzzing and Shimla remains the popular celebrity she always was.Shimla is situated in the North-West Himalayas and was the Summer Capital of India during the pre-independence era. Shimla is now the capital of Himachal Pradesh.

This town is spread over the ridge measuring about 12 km. It is perhaps the biggest hill station in the world, located at an altitude of 7,262 (2,421 met.) feet above sea level. A place of peace and pleasure, Shimla is a tourist resort in real sense of the word. The best season of the year here is autumn but the early spring runs a close second. Shimla is connected by air, rail and road traffics. The nearest airport is Jubbarhatti, 23 km away connects Chandigarh which is 117 km. from Shimla. There is broad gauge railway line

upto Kalka and thereafter narrow gauge line upto Shimla 90 km., long with 103 tunnels. Kalka is directly connected with Delhi, Amritsar and Kolkata through railways. By road, Shimla is connected with Ambala 166 km., Delhi 370 km., Pathankot 380 km., Jammu 495 km., Amritsar 453 km., Ludhiana 220 km., Jalandhar 382 km. and Dehradun 240 km. The distance of the other place of Himachal Pradesh from Shimla is, Kullu 240 km., Manali 280 km., Kaza 402 km., Kalpa 260 km. Narkanda 64 km., Mandi 156 km., Dhamarshala 280 km., Dalhousie 436 km., Chamba 502 km., and Nahan 140 km.

On 2nd December 2005, the Union Government included Shimla town in the category of National Urban Rehabilitation mission along with 60 other cities of the country. This was initiated for the beautification of town by the assistance of central government on 90:10 basis. On 18th November 2010, the statute of Rani Jhansi was installed in Shimla at Rani Jhansi Park. This has been made by Fakir Charan Fakir, a sculptor from Haridwar in Uttrakhand, weighing nearly 300 kg and costing 26 lakh. This was the sixth such statute installed in Shimla town; other five are of those, M.K Gandhi, Shere Punjab Lala Lajpat Rai, Lal Bahadur Shastri, Ms. Indira Gandhi and Dr. Y.S Parmar. Gaiety Theatre was renovated from 2003-2009. It was reopened on 24th June 2009.

There is truck load of waste, generated from Shimla town everyday, which is scattered all over the town, causing serious concern for health and cleanliness of the town. The National Green Tribunal (NGT) cleared the proposal for setting up an ultramodern plant in Bharyal village at the Tara-Devi-Totu Bypass for the safe disposal of the huge solid waste generated by Shimla city every day. In an order passed by Justice AS Naidu and Dr. GK Pandey (Expert Members), the NGT, however, directed the Municipal Corporation of Shimla to set up the plant strictly following the Municipal Solid Waste (Management and Handling) Rules, 2000, and after obtaining clearance under the amended Environment Impact Assessment (EIA) Notification, 2006.

PLACES OF INTEREST IN SHIMLA CIRCLE

JAKHU HILL: 2 km., height 2,455 meters. This is the highest peak of Shimla and offers panoramic view of the town and the mountains. 'HANUMAN TEMPLE OF JAKHU' is very famous. According to legend, Hanumanji took rest here when he was carrying a hill of *'Sanjiwani booti'* (a herb to save the life of Lakshmana, the younger brother of Lord Rama). during the formal battle between lord Rama and Ravana the king of Lanka. Replete with history and architectural charm there are several houses along the steep 1.5 km climb from the Ridge. This includes '*Rhothney Castle*', the residence of the celebrated ornithologist and founder of the Indian National Congress, A.O. Hume.

On 4th November 2011, the famous Jakhu temple became the site for the tallest idol of Lord Hanuman in the world at a height of 8,500 feet. The Jakhu temple is a famous shrine where devotees make a beeline but now there another is attraction in the form of tallest Hanuman idol in the world. Mr. H.C Nanda Chairman Nanda trust had undertook the task of raising 108 foot tall Hanuman Idol in the temple.

The 108 foot tall idol was set up at a cost of Rs. 1.50 crore. The work started on Hanuman Jayanti an October 2008. The idol has been made by Naresh Kumar, hailing from a family of sculptors from Pilani in Rajasthan with the help of 40 workers. The unveiling ceremony was attended by Abhishek Bachchan and his sister Sweta Bachchan Nanda.

VICEREGAL LODGE (Indian Institute of Advance Studies): The institute is housed in the erstwhile Vice regal Lodge which was built in 1884-88 during the period of Lord Dufferin. It is a commanding building in Summer Hill. The gardens of the Institute are really beautiful and fascinating. It was designed by *Henry Twain.*

The main architect of this stately structure built in the neo-Gothic style, with elements of Scottish Baronial architecture, was Henry Irwin. Spread over 123 acres, it is built in blue-grey stone masonry with tiled-pitch roofing. The main block has three storeys and the kitchen wing five. It is a witness to many events that shaped the history of India. It was the venue for the Shimla Conference in 1945. In 1947, the decision on the Partition of India and carving out West and East Pakistan was taken here. After Independence, it became the property of the President of India and was renamed *Rashtrapati Niwas.* Now, it houses the Indian Institute of Advanced Study (IIAS) where research scholars and fellows from all over the world come in pursuit of academic quest. It has an excellent library and is under the Union Ministry of Human Resource Development.

RAILWAY BOARD BUILDING: This distinct building was constructed in 1896-97 at a cost of about Rs. 7.31 lakh in the unique colonial style cast iron and steel structure fabricated by the Bombay based Richardson and Cruddas firm. Besides this building, the famous Raffles Hotel in Singapore is

the only such building in South Asia. It houses various Central Government offices, including Regional Passport Office, Income tax and CBI. The 25 meter tall building has four floors and three basements. It was originally designed to house the office of the public works department secretariat.

ELLERSLIE: This building was constructed in 1886 after dismantling a structure by the same name which housed the military department of the Punjab Government. It was purchased for Rs. 18,000 in 1881. Lt Col HES Abbott designed it to accommodate the Punjab Secretariat. It was built at a cost of Rs. 3.47 lakh in 1901-02. Spread over 4.66 acres, it is made of stones quarried from Sanjauli and Raj Bhawan and bound with lime mortar. The Himachal Secretariat occupied it in the summer of 1967, when Dr. YS Parmar took over as the state's first Chief Minister. This 143 room three storeyed building houses the officers of the Chief minister, ministers and senior bureaucrats. In 1972, the Summit Hall was renovated and named on the basis of initial summit meetings held here between India and Pakistan before the Shimla Agreement was finally signed. The Himachal Cabinet now holds its meetings here.

TOWN HALL: Is occupies a commanding location and is architecturally magnificent. It was built in 1860 using stone and timber with slanting state roof and big glass windows. Is has a fair amount of European character and most of its rooms have a fireplace. It houses the offices of the Mayor, Deputy Mayor and Commissioner of the Municipal Corporation. Most branches dealing with various public services are also houses here.

GRINDLAUS BANK BUILDING: Built in Gothic architectural style, it was constructed on the Ridge in 1860. It is home to the Municipal Corporation Library.

UNITED SERVICES CLUB: Built in 1933, it was the venue for social get-together for civil and military officers. It houses the offices of the public works and irrigation departments and the Shimla Heritage Museum.

CHALET DAY SCHOOL: The original building was constructed in 1890. It was pulled down for the present structure built in 1909 in the Swiss Alpine Chalet style. A school is being run in this building.

COUNCIL CHAMBER (VIDHAN SABHA): Built in 1923-24, the Council Chamber was opened by Lord Reading on August 20, 1925. Before 1947, it served as the Legislative Assembly Chamber of India. The Himachal Pradesh Assembly holds its sessions here. The office of the Speaker is also housed here.

AUCKLAND HOUSE SCHOOL: The old building at this site, bought by Governor General Auckland in 1835, was constructed by Dr. Blake. The new building was built in 1920. The school is a boarding and day school.

BISHOP COTTON SCHOOL: It was built in 1868, where Bishop Cotton School, set up in 1859 at Jutog moved. It is a boarding school for boys till class XII.

DEPUTY COMMISSIONER'S OFFICE: It was in the mid 19th century that a building called Gaston Hall was pulled down to make way for the present structure. It houses the offices of the Deputy Commissioner and Superintendent of Police.

BARNES COURT: The single-storeyed building that stood here was bought by Lord Edward Barnes, Commander in Chief, for Rs. 14,500 in 1828. Later, a two storeyed building with *'dhajji'* walls and excellent teak work was raised in 1879-1886 at a cost of over Rs. 3 lakh. It has spacious rooms with ample natural light and is spread over 46 acres. It acted as the summer Raj Bhawan of Punjab till 1966. After the reorganization of states, the state guest house was set up here. In 1972, Indira Ghandi and Zulfikar Ali Bhutto signed the Simla Agreement here. After the Raj Bhawan at Peterhoff was gutted in 1981, the Governor's residence was shifted here. The Chief Minister, ministers and the Chief Justice of High Court are administered the oath of office at Barnes Court, known as Raj Bhawan. Take a look at the oldest cemetery in the town and turn left towards Raj Bhavan, the official residence of the State Governor. As Barnes Court, this was the residence of the Punjab Governor and earlier, the seat of the British Commander-in-Chief of the Indian Army—it was here that the news of the Great Uprising of 1857 was given to General Anson, and in more recent times, where the Shimla Agreement was signed between the Prime Ministers of India and Pakistan.

COFFEE HOUSE SHIMLA: This coffee house of Shimla is working under a cooperative society. With the head office in Delhi, the society called, the *Indian Coffee Workers Cooperative Society*, is one of the few, very successful cooperative societies in India. There are 12 coffee houses in North India under this society. There are a number of such societies in India with numerous coffee houses under them having a large country wide network. But all these coffee house societies are again under one organisation called. The All-India Coffee Workers-Co-operative Societies-Federation: Every society is having an elected management; whosoever has worked for five years, becomes member of the society and can vote.

There is a two year probation for every worker and to become a counter-clerk or manager, one has to go through a written test. Any worker, may be a waiter or a dish washer can become the secretary of the society, if elected. Before the making of these cooperative societies in 1956-57, all coffee houses in India were under the Central Coffee Board of Government. It was Jawaharlal Nehru who was mainly instrumental in encouraging workers to make these cooperatives. That may be the reason, why only the photographs of Nehru and Gandhi are seen in these coffee houses all over. The interior decor of the coffee house is always kept simple with a few framed pictures, but only those portraying coffee. Having two floors, the Shimla Coffee House is spacious but it is always packed.

GAIETY THEATRE: Built in 1887, it was the cultural nerve centre during the British era as the Amateur Dramatics Club held events here. It houses a

theatre, a photo gallery and art and exhibition gallery. A part of it is with the ADC to be used as a club.

CHURCH: The imposing church stand majestically on ridge, is the second oldest Church in north India, it has a very majestic appearance and inside there are stained glass window which represent faith, hope, charity, patience and humanity. It was built in 1857. In fact it has become synonymous with Shimla and no picture of the town is complete without it.

GLEN: Distance 4 km. Altitude 1830 meters. This is one of the most beautiful picnic spots of Shimla with flowing streams through dense forest. Approach is near 'Cecil Hotel' and 'Kennedy House'.

CHAIL: Situated 45 km. from Shimla at an altitude of 2,250 meters. This was the *'Summer Capital'* of the erstwhile Patiala State. The small town is located amid thick woods and has fine walks. *It has the highest cricket ground in the world.* The dense forests around are alive with many species of birds and animals but it is best known for its *'Scottish red Deer'* which were introduced by the Maharaja.

KUFRI: 16 km. from Shimla at an altitude of 2,633 meters. Kufri has won a name on the sports and tourist map of India due to its 'Ski-runs', 'Seed Potato Farm' of the Central Potato Research Institute and 'Food Craft Institute'.

SUMMER HILL: 5 km, altitude 2,123 meters. A picturesque suburb of Shimla, which offers shady walks in quiet surroundings. Himachal Pradesh University is located here.In the past year a large number of commercial activities have sprung in the area.

KAMNA DEVI: 5 km., altitude 2,145 meters. This place is located near Boileauganj. Kamna Devi is the most popular picnic spot which commands a unique view of Shimla, Jutogh, Summer hill and Tara Devi. The hill is famous by name of *Prospect Hill.*

WILD FLOWER HALL: 13 km. It was once the residence of Lord Kitchner, the Commander-in-Chief of India in the beginning of the twentieth century. This is surrounded by dense and beautiful pine forets. About 1 km from Wild Flower Hall is the *'Retreat',* the weekend resort of Lord Curzon. Between Wild Flower Hall and Retreat, *'Hem Kunj' (formerly Dane's Folly)* the summer holiday resort of the Punjab Governor is situated. On January 4-5, 1993. Wild Flower Hall was reduced to ashes in a major fire.

TARA DEVI: 8 km., height 2,100 meters. There is a famous temple on the top of the hill.

TATTAPANI: 51 km. Height 655 meters. A dip at the hot sulphur springs at Tattapani not only relaxes the body but also has therapeutic effects. There are a number of tourist bungalows at Tattapani to accommodate visitors.

MASHOBRA: 13 km. Altitude 2,149 meters. This is a popular picnic spot

which offers ideal walks amidst forest of oak and pine. The area adjoining to Mashobra is famous for apple orchards. Nearby is the site of annual 'Sipi fair' (held in June). In May and June the heat and dusty roads of Shimla are always trying, and both then, and in late September and October, when the climate is superb, Mashobra houses are in great request, and innumerable are the picnics which are held in the maidenhair clad forest glades." Buck wrote this in 1904 and the same is true even today.

One such point in Mashobra, a little suburban village, an ideal retreat far from the 'madding crowd' and hardly 11 km away from the Shimla Ridge, is the present Fruit Research Centre wing of the Yashwant Singh Parmar Horticulture University, Nauni at Solan. It is Coutts' Garden of pre-independence India. Alexander Coutts was the official tailor to the Viceroys of India. During the tenure of Lord Dufferin, in 1887 Coutts built a cottage in Mashobra. One can see that this 100+ year-old building carries the basics of hill architecture. It is a skeletal frame of wooden beams, a mix of earth and pine needles with stucco of mud that is whitewashed when dried and covered with a gabled tin roof painted red.

Coutts had then brought one hundred different varieties of English apple saplings and planted these in the cottage garden. The lone survivor today, out of these, is a tree bearing Yellow Newton variety of apples. The loss of other has been replenished by newer varieties and the entire garden blooms with flowers in April-May and with fruits in June to August when it turns itself into 'a thing of beauty that is a joy for ever'. There are a few rare trees other than the fruits ones that Coutts had brought with him and are the pious pilgrimage for the students of botany and great attractions for the general public. These trees, in common parlance, are called the Chinese and Japanese Fir and the English Oak.

Coutts was a farsighted man, a century ahead of his times. We are talking about rainwater conservation today, which he had accomplished in this garden in 1889. There still exists those three old functional tanks, with a little seepage, of course, having a capacity of collecting three lakh litres of rainwater. All this may be of interest to architects, planners and heritage conservators. But to one and all, young and old, male and female, there are the sweetest things God ever made-the flowers. Begonia, Cyclamen, Orchids, Tulips, Foliage, Cacti-name any potted plant and one finds it here in well maintained and skilfully looked after greenhouses. These flowerpots are for sale too at reasonable prices.

NALDERA: 22 km. at an altitude of 3,044 meters offers *one of the oldest and most sporting golf courses in India, sets* in the midst of thick forests. The country around Naldera is also famous for its temples which are representative of the typical hill architecture of the area. Naldera is known for its *'nine hole golf course'* Naldera Golf course was laid by *Lord Curzon in 1903.*

FAGU: 22 km. Altitude 2,510 meters. Fagu's idyllic surroundings area is for

those looking for tranquility and solitude. A small hamlet overlooking prosperous apple orchards and with a fine view of the Himalayan Panorma. Fagu is also a popular trekking stage.

NARKANDA: 64 km. Altitude 2708 meters, it commands a unique view of the eternal snow line and the dense forest. A quaint sleepy hamlet. From here, you get breathtaking view of the snow clad Himalayas. 'HATU PEAK', at an altitude of 3,143 meters (10,000 feet) above sea level is 8 km., from Narkanda. In winter, there are exciting ski slopes to Ski on.

THE STATE MUSEUM SHIMLA: Shimla museum has endeavoured to project hill art and the cultural wealth of the state showing their link with the national scene. There is a collection of miniature paintings, Pahari as well as from other schools, sculptures, woodcarvings and also costumes, textiles and jewellery of the region.

A leisurely winding walk from the Mall, past the *Gortan Castle* and the Cecil leads to a colonial mansion perched atop a hill. It houses the state museum. A visit to Shimla is incomplete without seeing this museum, which offers a peep into Himachal's grand past. The Central Hall has a varied collection of stone sculptures from the ancient period. Notable sculptures are of *Varuna* from Masrur, *Vishnu* from Nirmand, *Surya* from Una and *Vishnu and Lakshmi* seated on Garuda from Mandi. On the right side of the hall are again stone sculptures on display. Notable one are those of *Surya* from Kullu, the three-faced Shiva and the *Simha Vahani,* both from Hatkoti.

The section also displays the world famous Kangra school of miniature paintings, besides wall paintings, from old palaces of Chamba.

As one ascends the stairs, wooden makes in folk *style look* at you from the wall. On the first floor photographs of Himachali temples are on display. The bronze gallery has 15 show cases. The most impressive are the mohras or masks of deities. The coins gallery is displayed in chronological order. This section has the local Tankri and Nagari scripts. The arms gallery has swords, daggers, shields, guns, pistols and canons. And then starts the recently expanded part of the museum. *The Gandhian gallery* has pictures and letters of Gandhi. The beautiful doll gallery has colourful dolls of Pahari brides and tribes.

Next is the *philately section* with a varied stamps. Then is the contemporary art gallery, displaying paintings mostly on Himachal. The notable ones are "The Kiss" by Bani Parasanna, "Dream" by Swaminathan, "Mother" by Malkiat Singh and "Monsoon Evening" by Nilima Sheikh. Then there is a section of Himachali landscapes by Sarabhjit Singh. Due to lack of space a large number of sculptures, bronze antiques, jewellery and paintings are undisplayed and gathering dust. Another problem is the adjoining high TV tower lshich often absorbs lightning shocks, sending vibrations throughout the museum building, slowly damaging its priceless antiques.

GORTON CASTLE: In the middle of the nineteenth century, on a wooded rise of Shimla stood a house called 'Gorton Castle' that belonged to a Mr.

Gorton of the Indian Civil Service. At that time, there was nothing very much of a 'castle' in its character but the name seemed to have foreseen the future.

From Mr. Gorton, the house changes hands a few times till it was purchased by Sir James Walker, who managed the influential Alliance Bank of Simla. He donated the site to the town-residents for the construction of a hospital for Europeans and Eurasians. The location was considered inappropriate for a hospital and with the consent of Sir James, another site was adopted for the hospital and this one was purchased by the Government of India for the construction of its Secretariat.

The architect was *Sir Samuel Swinton* Jacob who had spent most of his working life in Jaipur and it is from his experience and admiration of Indian architecture that we find the unique element that he gave this building - the Rajasthani jaalis on what would otherwise be classed as a neo-Gothic structure. The stone for building came from the close-by quarries near Sanjauli and after dressing, this was set in lime.

From 1905, in quick succession, the Departments of Home, Legislature, Finance, Health, Education and Lands were housed here. In 1939, with the outbreak of the Second World War, the practice of shifting the Government of India to Shimla for the summer months came to an end and in 1941, the Army also moved out. In 1942, with the altering situation due to the War and the rising tide of the freedom movement, the British Government of India retained only a skeletal staff in Shimla and in Gorton Castle. A series of shifts continued till 1984 when the building settled in to its present status as the offices of the Accountant-General of Himachal Pradesh. January 28, 2014, two H.P storeys sere reduced to ashes in a late night devastating fire.

BAROG: 55 km. from Shimla: A place of scenic charm and beauty. It presents extensive view of high mountains towards Shimla and the valley going down to the Punjab and Haryana.

KASAULI: 77 km. from Shimla. One can see the grandeur of mountains covered with snows. The famous *Sanawar Public School* is located here.

CRAIGNANO: 16 km., ideal picnic spot with lawns and gardens.

THEOG: 32 km. There is a famous marketing centre in the interior of Himachal Pradesh.

MATIANA: 48 km. from Shimla. It is famous for cherry and other fruit orchards.

KIARI BUNGALOW: One of the finest places on the Shimla-Kalka National highway at 23 km. away from Shimla.

THANEDHAR: 82 km., a famous apple centre.

Sarahan: 174 km., (2,165 meters). The famous BHIMAKALI temple is located here, which is a fine example of Hindu and Buddhist architecture. Sports Authority of India's 'High Altitude Training Centre' is also located there.

HATKOTI: Hatkoti is believed to be a meeting place of three rivers Bish, Kulit and Maindli Khud. Pabbar river is the soul of the valley. It houses region's main goddess *"Hateshwari"*. On the higher hill side lie the ruins of the pagoda shape temple. The mortal remains of *Mahatma Gandhi* and Ex- Prime-minister Morar ji Desai were immersed in the confluence. Hatkoti temple is believed to be erected by the Pandavas. Town Hatkoti is located along the Pabbar river which is trout-rich. The temples of Hatkoti are being preserved by the Archaeological Survey of India. The hotel Pabbar run by the HPTDC looks down on the temple complex.

Hatkoti, 95 km from Shimla in the Pabbar Valley, is one of the few archaeologically rich sites in Himachal Pradesh. The road connecting this ancient cultural centre with the plains of Uttar Pradesh runs along the banks of the Tons river and its tributary, the Pabbar. This holy place situated on the right bank of the Pabber river is famous for its ancient stone temples. Since its has a fairly large number of temples within a radius of 2 km, *Hatkoti, is popularly referred to as the valley of temples.*

The architectural masterpieces at Hatkoti represent the *Pahari school of art.* The beautiful sculptures placed inside and outside these temples speak highly of the unknown artists of the region. The place retains some influence of the Buddhist period too. Most of the temples, which are in ruins now, are of the *Shikra* style and belong to three different periods. The temples of Goddess Durga and Lord Shiva are quite big. It is believed that these temples were founded by Shankaracharya when he was on his way to Kashmir. These temples were reroofed by Raja Padam Chandra of Jubbal in 1885 A.D. The Shiva temple, which was reroofed later, has a *pyramidal shape* and is *panchratha in plan* and elevation.

The image of the principal deity in the Durga temple is made of *Ashtadhatu.* It depicts Goddess Mahishasurmardine with one foot on her Vaahan, the lion, and the other on the ground. She is shown in the act of killing the demon Mahishasur with a trident. The goddess has eight arms and holds in her right hands *khetaka, bell, bow* and *chasakpatra* and in the left hands a *khadga, chakra, shakti* and a *trident.* This is a rare image which shows the chakra in prayogmudra (ready to dispatch). This bronze image is almost life-size.

The two metre high ornamental torna is of immense iconographic interest. *Goddesses Ganga* and *Yamuna* are engraved on either side, and several geometrical and animal figures also appear on it. Among the animal figures, an imaginary animal, *Sardual* is engraved on both sides. The animal's long legs are like those of an elephant, the middle portion is like that of a lion, while the head is of a dragon. On the top of the torna, *sapt-matrikas* are engraved on a panel with Ganesha and Shiva on either side of the matrikas. An inscription in the *Siddhamatrika script* recording the name of the donor is engraved on both the sides of the torna. On the basis of inscription, the bronze can be assigned to 9th century A.D.

A sculpture of *dancing Ganesha* is placed in a niche on the temple wall. The rare sculpture has been artistically executed. He wears a small crown, necklace, bracelet, sarpayajnopavita and a loin cloth. He is shown, as usual, potbellied and has a single tusk with the probosci turned to the left. This deity has eight arms and is shown holding a snake over his head.

On the lower part two attendants are engraved on either side while on the upper portion of the slab two female figures most probably the two consorts *Riddhi* and *Siddhi*, are shown in the relief. This sculpture may be assigned to 10th century A.D. Another sculpture of a four-armed Ganesha is placed in the *Gavaksha* of this temple. The deity wearing usual ornaments is seated on a double petalled lotus in *Addhaparyanka* pose. In the hands on the left side, Ganesha is shown holding a lotus bud and a Parshu. In his upper right hand he holds a radish, while the lower hand he rests on his thigh. The sculpture seems to be of 9th century A.D.

The other interesting and beautiful sculpture of **Simhavahini Durga** from this place is now exhibited in State Museum Shimla. The goddess has a *kumbanda* and *bleduchur* on her head. The deity holds a chasakpatra in her lower right hand, a shield in the upper left hand and a *bijpurg* i.e. the seed of entire cosmos in the lower hand. The deity is seated on her mount of a lion in *lalitasna*. The sculpture can be assigned to 8th century A.D.

The other temple in this complex is dedicated to Lord Shiva. A large *Shivalinga* encircled by the *yonipithika* is installed in the centre of the garbhgriha. An interesting feature of this temple is the woodcarving on its ceiling. Figures of different gods and goddesses like Radha and Krishna, Shiva and Parvati and Mahishasurmardini etc are carved out of a block of wood and made to fit into an ornamental wooden frame. The ruler of Jubbal state in the 19th century got these carvings done.

Some stone sculptures of Vishnu-Lakshmi seated on Garuda, Sheshaivishnu, Uma Maheshwara and Ganesha have been placed in the *garbhagriha* of the Shiva temple. These sculptures belong to the surrounding temples which are now in ruins. These have probably been made between the 9th-12th centuries. In addition, some architectural pieces, known as Bhadramukhas, of different temples of this complex are also placed beside the entrance door. All these have beautifully carved floral and geometrical patterns. There are four ancient miniature temples in this complex. These temples have also been built between the 8th and 12th centuries.

Shimla under snow is a wonderful sight and it offers the unique attraction of an open air ice skating rink. Also the legendary Ridge under snow and snow sports at Kufri make Shimla a wonderful winter holiday resort. *Himachal Pradesh Tourism Development Corporation (HPTDC) holds skiing course from January onwards, up in the Narkanda.*

JUNGA: Junga was the capital of the erstwhile Keonthal State ruled by the Sen dynasty between the 17th and 20th centuries; this is presently located in

the Shimla district. Junga reflects the glory of the Sen dynasty. Rup Sen, the son of Balbir Sen fled from Bengal in fear of Sahabuddin Ghori and came to Ropar in 1210 A.D. and built a fort there.

After the death of Rup Sen, his three sons-Giri Sen, Bir Sen and Hamir Sen fled in three different directions to the Himalayas in fear of the Mohammedans and each founded a state. Bir Sen founded Suket (presently known as Sundernagar in Himachal), Hamir Sen founded the Kishtawar state (presently in Jammu & Kashmir) and Giri Sen founded the Keonthal state in 1211 A.D. with its first capital at Koti-and later, the capital was shifted to Junga, which is presently known as old Junga. The name 'Junga' is derived from the village deity 'Junga'. The deity is housed in a typically Himachali wooden temple in the adjacent village of Pujarli. The Sen dynasty ruled the former Keonthal state for over 700 years. Over 300 year's old, the spectacular wooden Junga Palace was built by Sansar Sen and this still exists in a ruined condition. The old Palace is perched in a small verdant valley amidst a hamlet, and is surrounded by deodar and pine forested hills.

The Keonthal state was divided into different small *paraganas* (divisions). Around the 18th century, the Gorkha army invaded the state and fought against the Sen Rulers and occupied some portions of Keonthal-which were later sold to the Maharaja of Patiala. In 1830, 12 villages of Keonthal were occupied by the British Government to form the present hill station of Shimla, in exchange of the Rowri Paragana to Keonthal.

The new palace was built at Chowri, one kilometre from old Junga in the 19th century. This is located on the ridge. Raja Hatender Sen claims to be the 78th in descent from Giri Sen. The state was merged with the Indian Union after independence to form a part of Himachal Pradesh on 15th April 1948. A small township has gradually come up today around Chowri as new Junga. Junga is a calm and peaceful destination and is just 26 km away from Shimla. Junga has scenic landscape with temperate climate and breathtaking views of the surrounding valleys, apple and plum orchards, towering deodar forests and high mountains. Tourists can discover a royal legacy, rich legends, the history of Junga and may visit the palaces, old temples, and picturesque hamlets all around. Junga is also a paradise of bird watchers as the surrounding coniferous forests and orchards are a safe habitat for numerous species of birds.

According to legend, the spiritual leader (Guru) of the Sen dynasty brought a huge stone with his super natural powers. He placed it in front of the old palace which made the place of another deity called "Pathri Mata", to guard the palace. On the occasion of 'Navratra' in the month of April and October, members of the royal family and locals worship the deity. The older and more prominent temples in Junga are Shiva Temple amidst the plum orchards and the Durga and Bhairav temples in the middle of thick deodar forests. Local lore has it that once a wild bear in the jungle attacked a woman and she climbed on a deodar tree, to avoid the bear but the bear was following her and climbing the tree. She prayed the village deity- 'Junga' to save her. The deity

immediately responded to her prayer and cursed the bear, who was frozen on the tree. The middle part of the tree looks like a frozen bear and is locally known as *"Bhaloo-ka-Per"*, the tree of the bear. In the tourist map of India Shimla-Chail complex has attained a prominent place.

PABBAR VALLEY: Pabbar valley is studded with innumerable magnificent wooden temples dedicated to local *devtas* who form an integral part of the area's socio-cultural system. But the supreme deity is Mahasu *devta* of Hanol who has no less than 50 subordinate temples. The Pandavas are also venerated and there are several temples dedicated to them. The Pandava temple at Masali village, on the Pabbar's left bank across the footbridge, is one such interesting temple enshrining the life-size standing wooden images of the five brothers.

Innumerable traditions and legends are popular due to the overwhelming influence of the local *devtas*, the Pandavas and a few Brahmanical deities. One finds an inextricable amalgam of history and mystery in the environment. The *shattha* and *pattha* clan identity, inspired by the legendary association of the Kauravas and Pandavas, has given rise to a peculiar *khund* institution. Countless tales and legends associated with the institution are prevalent. Old trees, a local physical feature, an ancient site, all are interwoven in the folklore. The *thoda* display, performed during village fairs, is the relic of the *khund* institution.

Wooden houses here, with their intricate carvings and multitiered complex gable-'n'-pent roofing arrangements, are interesting. The unique tall, artistic wooden temples are religious and cultural nerve-centres as well as respositories of traditional art and craftsmanship. Therefore, Pabbar valley is not only a holidayers paradise but an unexplored haven for researchers and scholars.

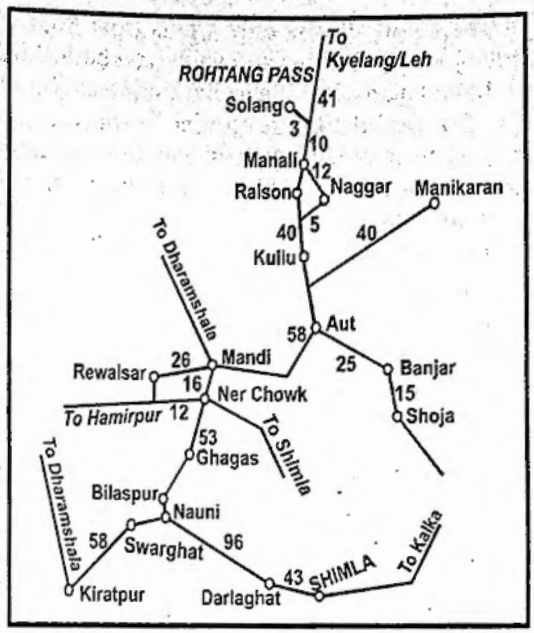
MESMERISING MONAL: Himachal's hills offer much to bird watchers. A careful watchers may spot the western tragopan, cheer and Khalij pheasants, the chukor, snow cock or the red jungle fowl apart from several migratory birds. There is an abundance of magpies, tits, babblers, thrushes, wrablers, finches, pipits, martins and griffons apart from brightly coloured robins, starlings and jays. However, only a few have sighted the monal, for this is an extremely shy bird.

The monal pheasant, *Lophophorus impejans* is found on the forested tracts of the mid-Himalayan slopes between 2,000 and 3,500 meters. The Shimla hills and the upper Beas Valley abound with the bird.

Ornithologists reveal that the handsome monal male has a unique crest with a green patch near its russet tail. Its plumage displays brilliant striking metallic hues of emerald, purple, deep blue and sapphire called 'naurange danphe' (the nine coloured bird) in some hills. The-monal is to the hills what the peacock is to the plains. This gives a nuptial dance to the female and the breeding season is May-June. The monal hen scratches out a nest-like hollow in sheltered niches on the ground like on tufts of grass and under overhanging bushes. A monal's eggs usually five, are dull white in colour and have specks

of amber brown. In sharp contrast to the male's brilliant plumage, the monal hen is earthy brown with dark streaks, mottles and a white patch near its tail. In this, respect it is similar to the peacock couple.

The British hunter, 'pahari' Wilson as he was known, shot these birds on a regular basis and sent hundreds of skins to England. The Marshall and Hume observed in 1879, *"The great demand for brilliant skins of monal that has existed for many years, has led almost to their extermination in some parts of the hills"*.



KULLU-MANALI CIRCLE

The Kullu-Manali tourist complex is spread in the entire Kullu valley which is lavishly gifted with superb scenic wealth. Kullu, also known as *'valley of Gods'*, has numerous temples. Kullu valley offers a scenic charm of peaceful wooded glades and rivers through the rocks. The Dashehra of Kullu is world famous. The ancient Hindus regarded Kullu as the farthest limit of human habitation- *'Kulantapitha'* and its original name finds mention in the epics, *the Ramayna* and *the Mahabharta* as well as the *Vishnu Purana.* Kullu, which is located on the bank of the river Beas is the Central point of this tourist complex. Running North to South, the main river valley is only 80 km. long and 2 km. at its broadest, yet a fairly wide area is open to the visitors to enjoy the spectacle of variegated mountain scenery.

The deodar-fringed grassy maidan, Dhalpur, is a stage for many colourful fairs. Kullu is connected by air bus flights from Delhi, Shimla and Chandigarh to Bhunter, 10 km. from Kullu town. The convenient railheads are Chandigarh, Jogindernagar, Shimla and then by road to Kullu. It is connected by road with Delhi (789 km.) and linked by National Highway via Ambala (606 km.) and Chandigarh (556 km.).

KULLU VALLEY: This ancient valley has been referred to in the epics as 'Kulanthapith', or the end of the habitable world. Today of course, this perception has changed considerably and the surrounding fortress of formidable mountains that inspired the term are known to open up to the most hospitable and welcoming weave of valleys, meadows, rivers, treks, orchards and what have you. Most significantly, this 'Silver Valley' cradles the mag- nificent river Beas, which drenches the entire area in sublime and surreal beauty. Undoubtedly as pleasant and sunny as the vistas and weather of Kullu are the people who inhabit this land. Known for their colourful disposition and good humour, these are also people with a deep and abiding faith, particularly towards one deity, Lord Raghunath, the presiding deity of this valley.

SERAJ VALLEY: Not as well known as Kullu or Manali, the Seraj region of Kullu is woven with a rich culture that is fairly distinct from that of the Beas Valley. The rural charm, countryside vistas, undisturbed woods, exquisite temples with the village folk adhering to a simple life-style that is not distorted by modernity, the Seraj region continues to attract the offbeat traveller.

The Seraj region can easily be accessed from Shimla or from Kullu. A range of high hills accessed over the Jalori Pass (3,135m) or the Bashleo Pass (3,250) divide Inner Seraj from the tract of Outer Seraj. The Outer Seraj stretches out to touch the right bank of the Satluj River and faces the Narkanda-Hatu-Kotgarh area of the Shimla hills. Inner Seraj heads northwest into the Tirthan and Parvati valleys of Kullu. A major portion of Inner Seraj is taken up by the Tirthan Wild Life Sanctuary which is contiguous to the Great Himalayan National Park and is part of one of the largest flora and fauna reserves in the Himalaya.

The Outer Seraj region mainly consists of two valleys. These are the Ani and Kurpan that have perennially flowing streams and discharge their flow into the Satluj. As one moves into higher country along the valleys, broadleaf vegetation makes room for evergreen forests of deodar, spruce, rhododendron, fir and pine which shelter a variety of bird and animal life. The wilderness and meditative silence combine to make it ideal trekking country. British foresters under colonial rule have left behind rest houses built in some of the most scenic spots. Of the many beautiful locations in this area, the ones at Khanag, Jalori Pass, Bashleo Pass, Shoja, Kullu-Sarahan, Nirmand and a host of others are worth a visit. The region can be reached from the Shimla-Rampur-Kinnaur highway either from Ani or from the Kurpan valley. Travelling north on the highway from Shimla along the chain of mountain ridges and passing through Kufri, Fagu and Theog, one gets to Narkanda. From here the road sharply drops into Satluj river valley. From Sainj, a small station on the left bank of the river, a road crosses the river at Luhri and heads into the Ani Valley.

As an access point, Ani is a small station that caters to all needs for a journey into "uphill-country". The narrow road winds up the valley to cross the range at Jalori. Side valleys lead into hamlets that have conserved their culture for centuries. The temples in these villages display exquisite craftsmanship in wood. Beyond Ani, after ascending along the valley by about 4,000 feet and at a distance of 16 kms one arrives at Khanag (8,000 ft.), a beautiful hamlet.

The Jalori Pass is only 5 kms from Khanag. The crest of the pass offers wide views of the hills and valleys on both sides of the ridge. The presence of the Himalayan Black Bear, Barking Deer (Ghoral), Musk Deer, Leopards and other species have been recorded by wild life experts in the deep forests around Jalori. The quiet Shringi Rishi temple is located close to the pass and the Seolsar Lake that lies on a trekking path from Jalori (about 5 kms away) at an altitude of 10,500 feet.

Shoja on the other side of Jalori Pass, is in inner Seraj and offers panoramic views of the snow capped ranges across. The rest house turns a quiet mountain holiday into a worthy experience amidst great surroundings. At walking distance from Shoja, is the dilapidated *Raghupur* Fort.

In medieval times, the structure served as a post to defend feudal boundaries. From Shoja one Can head to Banjar in the Tirthan valley and further downstream to reach the Beas valley at Aut. Adventure seekers, who demand more from a foray into the mountains, can head for Bashleo Pass either through a trekking route from Shoja or by motor transport from Banjar that passes through Goshani and Bathad. The high pass is the confluence of Inner Seraj with Outer Seraj's Kurpan valley.

PLACES OF INTEREST IN KULLU MANALI CIRCLE

BIJLI MAHADEV TEMPLE: 11 km., Altitude 2,460 meters. This is one of the most striking temples in Kullu, where 20 meter tall image is supposed to attract special blessings from the skies in the shapes of lightning.

BAJESHWAR MAHADEV TEMPLE (Bajaura): 15 km. this pyramidical temple belonging to the 8th century A.D. is embellished with wonderful carvings in stone and sculptural decorations. The three large images are all of a high order of sculpture in the Shikhara style. This temple is situated about 200 meters from the village in a plain between the main road and the Beas river.

JAGANNATH TEMPLE: 3 km., a stiff climb leads one to the shrine from where one gets a panoramic view of Kullu town.

BANJAR: 58 km., Altitude 1,534 meters. The famous temple of **'Shringi Rishi'** is located here in whose honour a fair is held every year in the month of May. Banjar is an excellent spot for trout fishing in Tirthan river.

RAGUNATHJI TEMPLE: 1 km., Ragunathji is the principal deity of the Kullu valley.

VAISHNO DEVI TEMPLE: 4km., a small cave enshrines an image of goddess Vaishno. Other temples are dedicated to Lord Shiva, Rama and Krishna.

KAISHDHAR: 16 km. from Kullu Altitude 2,300 meters. A delightful spot for a quiet holiday where one can commune with nature.

SHOJA: 13 km., from Banjar, located at 2,650 meters altitude on the Kullu side, of the *'Jalori pass'* has marvellous scenic surroundings.

MALANA (2,652 meters): 28 km. from kullu up to Naggar by bus and then 20 km. on foot. The tiny village of Malana lies a little ahead of the *'Chanderkhani pass'*, famous for the temple of 'Jamlu'. Malana village is reputed to be the oldest democracy in the world in existence where all the inhabitants of the village take part in managing its affairs. It is also famous for trekking.

KASOL (1,640 meters): 42 km., Kasol is charmingly located in an open space which slopes down to a broad expanse of clear white sand at the edge of the river. It is situated on the bank of Parbati river in the Parbati valley.

MANIKARAN (1,700 meters): 45 km. from kullu, According to legend, Manikaran is also associated with Lord Shiva and his divine consort, Parbati, who lost and recovered her earrings here. Legend has it that once when Shiva and Parvati were relaxing by the river, Parvati's ear rings fell into the water. The lord of another world Shesh Nag took possession of them and despite Parvati's request, he refused to hand them back. However when all the gods prevailed upon him, he snorted them out of his nostrils, causing a boiling fountain of water to erupt. The jewels thus returned. This place is famous for hot water springs. Thousands of people take a dip in its hot water. The water is so hot that *'dal'* (pulses), rice etc. can be boiled in it.

RAISON: 16 km., from Kullu Altitude 1,433 meters. it is an ideal site for spending a quiet holiday in solitary splendour and for holding youth camps and rallies.

PULGA AND KHIRGANGA: 16 km. from Kullu, a stiff march takes one to restful environment affords a sylvan and peaceful retreat for body and mind. The *'Tos Nullah'*, which branches off from the main Parbati valley is well worth exploration by those who favour the wilder aspects of natural scenery and are prepared to camp out. Khirganga lies 10 km., from Pulga; Khirganga is also famous for hot springs.

KATRAIN: 20 km. from Kullu Altitude 1,463 meters. This place is situated on the way to Manali and has acquired prominence due to apple orchards, a fruit research station and a trout hatchery.

LARJI: 34 km., Altitude 957 meters. This is a small hamlet providing excellent trout fishing. The famous rivers Sainj and Tirthan join the Beas a few hundred meters below. Larji is patronised mostly by anglers.

NAGGAR: 25 km. from Kullu Altitude 1,760 meters. Naggar was the capital of the Kullu Rajas for about 1,400 years. It is also known for its castle and the *'Nicholas Roerich's museum'*. On the left bank of the river Beas and about three hundred meters above the river, Naggar is delightfully situated on the wooded slope and commands an extensive view, especially of the North-West of the valley. There are a large number of famous temples in and around Naggar and an excellent place for a longer stay.

MANALI

Manali with its unspoilt scenic grandeur is extremely popular with the tourists, for a lavish display of natural scenery. It is one of the principal show places of the Kullu region. To its North, South and West are an ostentation of pinnacles and ridges which, in fine weather, stand out in bold relief against skyline. At the lower elevation and in every direction there are vivid green patches of grassland and evergreen valleys ascending in irregular formation present probably the best view in the country. Manali is situated at an altitude of 1,926 meters and spreads in 12.5 square km. It is the real starting point of an ancient trade route. The original name of this particular area was 'Dana'. Later it became '*Duff-Dunbar*' named, presumably, after one of the original European residents of Manali. This part of the Manali is entirely separate from the original village of that name which is located beyond the Manalsu river, higher up the valley and the inhabitants of which prefer to retain their secluded identity.

According to legend, the place where Manali is situated, the great Hindu lawgiver 'Manu', after the great deluge, first stepped on to earth from the celestial boat at a place in this land. the particular spot where he established his abode was the present Manali which is regarded as the changed name of *'Manu-Alaya'*, the home of Manu. It is believed that it was here that the human race came into being after the deluge. A small temple dedicated to Manu still exists in Manali village.

The nearest airport to manali is *Bhunter* at 50 km. distance. Indian Airlines kingfisher and other airlines operate flights, on the Delhi-Chandigarh-Kullu and Delhi-Shimla-Kullu sectors. The convenient railway links to Manali is broad gauge upto Chandigarh, Una and Pathankot and narrow gauge at Kalka-Shimla and Jogindernagar. Manali is connected with direct bus services from all cities of Himachal, Punjab, Haryana and Uttar Pradesh. The distance from Manali to Shimla is 280 km., Chandigarh 312 km., Delhi 583 km., Pathankot 326 km., Dharamshala 253 km., Udaipur (in Lahaul-Spiti) 166 km., Keylong 104 km. and Kaza 244 km.

PLACES OF INTEREST

ARJUN GUFA: (15 km. from Manali) A legendary cave near the village of *'prini'* on the left bank where Arjuna practised austerities to get the powerful *'Pashupati astra'* (weapon).

HIDIMBA DEVI TEMPLE: (1.5 km.) Built in 1553 A.D also known as *'Doongri Temple'* dedicated to the Goddess Hidimba (Hirma Devi), the wife of Bhima, has a four tiered pagoda shaped roof with a doorway carved with figures and symbols. Although carving is simple yet beautiful. This temple was built by Raja Bahadur Singh of Kullu. On his order both hands of the Chief Workman were chopped, so that he should not built another temple of equal charm and style.

JAGATSUKH: (6 km. from Manali) The original name of this place was *'Nast'*, it remained the ancient capital of Kullu for about 10 generations. Jagatsukh is famous for its Shiva temple in Shikhara Style and interesting old temple of *'Gayatri Devi'* and *'Devi Sharvali'*.

VASHISHT: (3 km. from Manali) This place is famous for its hot water springs and temples of Vashisht Rishi and Lord Rama. It is located on the bank of Beas, but well above the river.

KOTHI: (12 km. from Manali) A beautiful and quiet spot. The rest house here overlooks the narrow valley and commands views at the mountains. Below Kothi, for more than a kilometer the river Beas flows through a deep gorge, 30 meters or more in depth. The site of the bridge provides an interesting historical episode in early annals of Kullu. This place is famous for movie picturisation and resting resort for poets, writers and lovers of peaceful environments.

TIBETAN MONASTERY: A new but colourful Buddhist temple. It contains in it many idols of Buddha. This monastery is famous for its carpet weaving and Tibetan handicrafts.

NEHRU KUND (6 km. from Manali): A natural spring of clean cold water named after the late Prime Minister Jawahar Lal Nehru, who used to drink water from this spring during his stay in Manali. It is located, on the Manali-Keylong road. This spring is believed to be coming from *'Bhrigu lake'*.It is now washed away by floods and land slides.

MARHI: (39 kms. from Manali) A barren landscape affording extensive views of the valley and the mountains. Fifteen kilometers short of the 13,050 feet high Rohtang Pass on the Manali-Leh road lies one of the most picturesque places in Manali region, Marhi-a mountain plateau is surrounded by lush green meadows strewn with myriad wild flowers. The place remains a stopover for transit visitors and tourists during summer and autumn seasons and a transit place for the people to wait for the ferocious weather to improve at Rohtang Pass to cross over to Lahaul and Spiti valley, during the winter months.

This tiny hamlet where a cluster of eating place has developed and prospered ever since tourism activities gathered momentum in this region, presents a splendid view. To the North lies the craggy shrub-covered hill sides with flowers of different hues blooming in summer and spring. To the South one can have an extensive view of the Kullu valley. From Marhi one can see many sheltered and snow laden gullies even when there is no snow around. Marhi does not contain much snow, as the turbulent evening and morning winds blow off the snow towards Beas nullah which lies below the main meadows. After remaining out of reach to the visitors for six months, Marhi is now open and is at its enchanting best.

In May-June Marhi is the place which most tourists visit. A tiny hamlet, it boasts off a few well run *'dhabas'* and tea shops. A rest house stands on the spur of a cliff and has an excellent view besides providing lodging facilities to

the enthusiasts who may like to stay here. It has nothing much to offer, but to the visitors it is a must, since such a scenery cannot be experienced elsewhere in this region especially on the roadside. The days are pleasantly warm and the breeze cool but the nights tend to get extremely chilly. A few hours spent here rejuvenates the soul.

Before the early seventies. Marhi was considered a halting place for shepherds and tradesmen, who would rest a while before taking on the steep ascent to the Rohtang Pass. Timing here was necessary, as the Pass turns very windy in the afternoons and can be treacherous during the winter. The locals call this fiery wind the 'biana' and it is in 1839 a Sikh general who was crossing the Rohtang Pass for a battle against the enemy forces stopped here and built a temple so that his passage could be safe. In those days many people built temples here, but today one cannot see any evidence of these structure, save a few stones.

The harsh winters always took their toll and thus this place was named Marhi (graveyard). Now Marhi attracts tourists. Another legend the locals are familiar with is that years ago a vast army of Jorabar Singh was crossing the Rohtang Pass, when they descended to this place a strange mist enveloped the entire force. Unable to find their way they kept moving forward only to fall over the steep precipice below the meadows and perished. Thus it was named Marhi (graveyard). Whatever history and legend say, Marhi today is one of the most spectacular spots. Today all tourists who visit Manali, stop over at Marhi for the magnificent views. The place remains the hub of daytime tourist activity.

ROHLA FALLS: (15 kms from Manali) Here the river Beas hurtles down from a height of about 50 meters. Charming spot for picnic.

NIRMAND: Nirmand is rooted with medieval monuments and is an important Brahmin village. For centuries it was known for its intellectual, cultural and artistic wealth. Wooden temples and 'Shikara' style stone shrines dating back to the 11th century are scattered all around the village, testifying its antiquity. The Parshuram and Devi Ambika temples are the village's prominent shrines. This village is also famous for its metal craft and woollen handloom products. The Nirmand Diwali, as distinct from the one celebrated in the rest of the country is held each autumn and is an excellent time to witness local culture.

Nirmand serves as the end destination of the Outer Seraj region. However, for those accessing the circuit through the Kurpan valley, Nirmand becomes the starting point. Access to the Kurpan valley is near Rampur, on the highway to Kinnaur. The magic of the Seraj Region comes not just from its scenic landscape, the warmth and hospitality of the people leaves an equally memorable impression.

SOLANG VALLEY: (13 kms. from Manali): A beautiful valley between Manali and Kothi which offers views of the glaciers and snow covered

mountain peaks. The plateau is frequently used for holding camps by the trekking parties. The surrounding areas of Manali from 3 to 20 km. are suitable for rock climbing. The winter skiing festival is organised here as well as training in skiing is imparted at this place.

MOUNTAINEERING INSTITUTE: This institute imparts training in basic and advanced courses of mountaineering. Institute has been speedily gaining prominence for conducting adventurous sports rock climbing, high altitude trekking and skiing. It was set up in 1961 A.D.

ROHTANG PASS: (51 kms. from Manali) At an altitude of 3,978 meters on the highway to Keylong, the mass affords a widespread panorama of mountain scenery. Here eye meets a range of precipitous cliffs, huge glaciers and piled moraine and deep ravines. To the opposite is the well defined *'Sonepani glacier'*, slightly to the left are the twin peaks of the Geyphang snow crowned. The Beas river rises near the crest of Rohtang from a block of Mica-Schist. To its left, 200 meters higher, is the little lake of *'Sarkund'* (Dashahr) visited by a large number of people every year. The bath in the water of Sarkund effects cure of all bodily ailments or imaginary. Marhi, a beautiful picnic spot is 10 km. before Rohtang pass, where almost everyone stops for refreshment. The pass is open from June to October each year although trekkers can cross it earlier. It is the gateway to Lahaul-Spiti, Pangi and Leh valley; just as Jojila pass is to Ladakh.

CHAMBA-DALHOUSIE CIRCLE

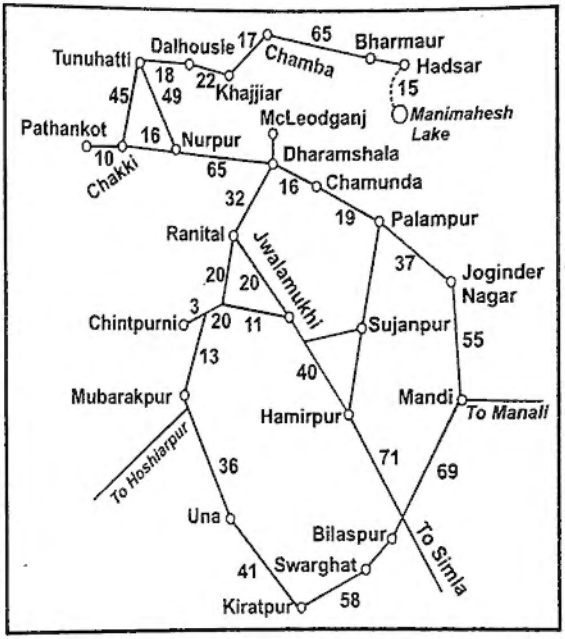
Chamba, the valley of milk and honey is known for its streams, meadows, temples, paintings, *rumal* and beautiful lakes. Chamba has few rivals for its scenic beauty. To quote Dr. Vogel, the author of *'Antiquities of Chamba State'; "And truly delightful has been the task of revealing the antiquarian treasures hidden in that glorious mountain region, which a popular adage so rightfully describes as Chamba 'Achamba' (Chamba the Charming)"*. Chamba is situated at an altitude of 926 meters (2,778 feet), spreads in the area of 24 km. Tradition goes that the town Chamba was named by its founder Raja Sahil Varman (920 A.D.) after his daughter Champavat. There are three well defined ranges in the district, the Dhauladhar, the Pangi or the Pir Panjal and the Zanskar range. Located on the banks of the Ravi river the township resembles an Italian village fortress. Chamba's temples are mostly dedicated to Lord Shiva and Vishnu and are built of richly engraved stone. The town is also the base for Gaddi shepherds who, though nomadic in their way of life, return to chamba periodically to stock supplies. Chamab is so sheltered by snow-clad mountain barriers that its monuments escaped destruction at the hands of invaders, that is why it still remains one of the best preserved heartlands of the Himalayan arts.

The river Ravi, along with the Yamuna, Satluj, Beas and the Chandrabhaga is one the five major rivers of Himachal and since times immemorial these have figured prominently in the lore of the land. From the moment the

Himalaya mountains came into being, these rivers have been responsible for the rich greenery and for nurturing the land they pass through.

The Ravi first appears as the river *'Parushni'* in the Rigveda. In Hindi, the word *'Parusha'* is regarded to mean the Ravi and this river is also called the *'Iravati'*. Writers on Chamba region also mention its other names Ravdi, Ravti and Rava. But it is by the name Ravi that this river is popularly known as it flows through Himachal, the Punjab and into Pakistan.

The role of the Dhauladhar mountains has been significant in forming the overall character of Himachal. The northern reaches of the Dhauladhars merge in a series of garlands with the slopes of the Pir Panjal mountains in the Bara Bhangal area. This is where the Ravi has its source, southeast of the Pir Panjal mountains in the Pangi Bara Bhangal pocket. As it flows down, it gathers the waters of several large and small streams of pure melting snow. Twisting and turning in different directions the waters flow through the Bara Banso area and the pockets of Dehol, Kuleth, Holi, Sutkar, Lamu and Chota Khas. When the Ravi is practically face-to-face with Bharmaur, two large tributaries, the Budhil and the Tundah contribute their share to the river. From this moment on, the Ravi also alters its character and suddenly turns aggressive. Through a narrow gorge it now races like a serpent till Chatrari where the valley opens out and the Ravi also spreads its water wider and becomes calmer. The river then skirts the large villages of Rakh and Mehla till it reaches the town of Chamba. Pouring down from the heights, the Saho stream, also adds its might to the Ravi. The point of confluence is a dramatic sight with the ancient town of Chamba in the background.



After a while, the largest tributary, the Seol joins the Ravi and continues flowing west as it skirts the borders of the adjoining state of Jammu and Kashmir. The Ravi then adds a southern turn to its journey and seemingly carrying all the blessings of all the deities of the hills. This river then flows into the plains near Shahpur. Flowing on into Pakistan, the Ravi then pours itself into the Chenab and both join the Indus on a journey down to the Arabian Sea.

The remote valley tucked between mighty Pir Panjal and Zanskar ranges of the Himalaya, a valley, remarkable in its rugged grandeur, austere and exquisite beauty'. Here in one of the most quiet, hidden and pristine destinations of Himachal you can meet nature face to face, listen to the melody of whispering winds and speak to the mountains.

Soothing silence, fresh and crisp air, stunning azure sky, mighty mountains-welcome to the land full of primitive myths where the real melts into the magical and gods and goddesses are as much alive as you and I. Here, the past flows before you and whispers in rich cultural traditions and folk lore.

Today you can drive into the valley but his has not always been so. So foreboding was the valley that the Raja of Chamba paid funeral expenses to state officials who went on duty to Pangi. Their return, alive or dead, was not

sure. Inaccessible for more than eight months in a year due to snowfall and closure of the Sach Pass (4,414 m), Pangi inspired awe and sent shivers down the spine of those who were forced to go. No doubt this was no land of beauty for them but *kala pani*. All this has changed for good now. The inhabitants of the Pangi are mainly Hindus with a few Buddhists. The Buddhists with Mongolian features, called Bhots, inhabit the villages located in higher reaches known as Bhatories namely Sural, Hudan, Parmar, Chasak and Twan Bhatories. Tough living conditions, geographical isolation, extreme climate and need to cooperate led to community living and emergence of unique Praja System. Praja, the village council, consisting of eldest male member of each household became the supreme consultative, administrative and judicial body and plays vital role in the social life even today.

The historical background of Pangwals is shrouded in mystery. One version is that during an invasion Rajput nobles sent their wives and children escorted by soldiers and servants here for safety. Many noble men could not reach the valley, the ladies married the soldiers and a new generation settled here. Another version states that the criminals and political offenders banished by the raja settled here. Another version states that the criminals and political offenders banished by the raja settled here.

The total population of the valley is 17,598 and the elevation of the villages ranges from 7,500 feet to 12,000 feet. Chasak Bhatori is the highest village. Seasons regulate the activity chart of the village life and weather sets the time table. Majority of the villagers depend on agriculture and livestock. Pangwals follow a primitive form of Hinduism and worship lord Shiva, devi and nag devta. All villages have their own presiding deity. The temples are closed in winters and open in spring on the melting of snow. People love dance and music and enjoy patar, the local brew. Short summer months (May to September) represent hard work as this is the working season and the time to reap harvest sown the previous year and to stock all that will be needed to survive long winters. As the earth warms up a little by the end of February, the musical beats of dhols and other instruments mingle with the same serene

melody of icy winds echoing around the snowy peaks to signal start of famous cultural cum religious festival-Jukaru. Pangwals celebrate this to thank the gods for helping them survive the winter.

Nature has gifted the valley with rich flora and fauna. Thick forests support a variety of wild life including ibex, snow leopard, Himalayan thar, musk deer, black bear, brown bear and bharal. Monal, Himalayan tragopan, snow peacock, koklas, snow pigeon and ram chakor are common birds. The valley has one wild life sanctuary, the Saichu Twan Sanctuary that serves a safe habitat for a large number of wild animals and birds.

The Pangi valley turns white in winters and an unrelenting green in summers and presents awesome natural setting. To get the most out of the valley you should have at least one week with you. Things to see and do are plenty depending upon you. Mountaineering, rock climbing, trekking, hiking are for those seeking adventure. Rolling mountain ranges with towering snow covered peaks, densely forested slopes, small high altitude lakes, green meadows and unbelievable glaciers challenges everyone. Killar (2,591 m) the areas administrative headquarters, lies on the right bank of Chandrabhaga river. The important side valleys of Pangi are Sural, Saichu, Kumar-Parmar and Hudan. All these are connected to Zanskar valley in Ladakh through old routes. Now all sub valleys and many villages are linked by a vehicular road and one can avoid trekking but the real way to explore the valley is to walk to various villages located deep inside the side valleys.

ST. ANDREW'S CHURCH: The impressive building of the church has a straight and simple design carrying the influence of Scottish architecture. It is made of local stones brought from Rajpura, a place 10 kilometers from Chamba and has a sloping black slate roof, the rafters of which have been covered by a vernacular-designed fascia tin-plate. Built by the side of the State Hospital in town, this Protestant church has a capacity to accommodate 170 persons in the prayer hall.

The people of Chamba owe this church to Dr. John Hutchinson, a medical practitioner and a missionary by choice. He came to Chamba, served the lepers and started a leper asylum at Sarol, a village not far from the town, in the year 1875. This was the first one of its kind in India. He established a Mission Hospital in 1894 and remained the 'honorary in-charge' of the Health Department of the State of Chamba for ten years. He was an eminent historian too and with Ph. Vogel wrote the History of the Punjab Hill States. Raja Sham Singh of the State developed great regard for this noble soul and on his insistence not only donated the land where the Church stands but also got it built through Gopal Dass, the superintendent of works on state expenses. Its foundation stone was placed by the Raja himself on 17 February 1899. The church was lighted to the Christian community of Chamba by his successor, Raja Bhuri Singh on 7 May, 1905.

St. Andrew's church is a place of pilgrimage for believers and a place of awe and wonder for heritage lovers. Raja Sham Singh, at that time, had

ordered for a large bell for the belfry of the imposing bell tower of the church. This bell resembles the one hung at the Bhagwati Chamunda temple installed by Raja Shri Singh in 1867.

Nearest airports are Jammu, Amritsar and Gaggal (Kangra). Railhead to link Chamba with outside world is Pathankot, 120 km. On state highway 33/35, Chamba is linked to all parts of the country by all-weather metalled roads. The distance of important cities from Chamba is; Shimla 422 km., Mandi 334 km., Manali 470 km., Kangra 180 km., Delhi 640 km. Jammu 245 km., Amritsar 245 km., and Haridwar 610 km.

PLACES OF INTEREST CHAMBA-DALHOUSIE CIRCLE

BHURI SINGH MUSEUM: This is a veritable store house of exquisite paintings of the famous Kangra and Basholi schools, as well as mass epigraphical material on the history of Chamba. The museum also has in it, wood carvings, ancient manuscripts and murals from Rang Mahal.

TEMPLES: Chamba has numerous ancient temples patterned in the style of local hill architecture, as well as Shikhara temples. (The main groups of these temples, Lakshminarayan, as well as most in the region are dedicated to Lord Vishnu and Shiva, built in the period between the 8th and 10th centuries A.D.). The *'Chaturmukhi'* image is a major highlight at the Hari Rai temple. Some other important temples of Chamba are the *Bansi Gopal temple, Shri Bajreshwari temple* and *Chamunda Devi temple.* There is also a small shrine dedicated to the memory of Rani Suhi who, as the legend goes, sacrificed herself, so that water could flow to the town Chamba.

BHANDAL: (78 kms. from Chamba) A lush green place, this is the meeting point for the borders of Himachal Pradesh and Jammu & Kashmir.

CHAUGAN: A public promenade– a grassy maidan less than one km. in length and about seventy five meters wide. It is a busy local trading centre for villagers from the surrounding hills. Each year Chaugan is the site for the Minjar procession. The fair lasts for a week and people attend the fair in the local costumes and colourful dresses, in a gay mood walking in the Chaugan where a large number of sports and cultural activities take place to commemorate this occasion. On the conclusion of fair, the '*minjars*' are immersed into the Ravi. It is also an established base for various exciting treks into the valley around.

CHAMPAVATI TEMPLE: There is an ancient temple dedicated to Champavati near Chowgan in the heart of the town known as Champavati Temple or Chamesani temple. According to a popular legend, Princess Champavati was of a religious disposition and used to visit the loghut of a Sadhu for religious conversation. Suspicion grew in her father's mind and he followed her secretly on one occasion with a drawn sword in his hand, only to find that the hut was empty. As he entered, a voice came from the stillness upbraiding him for his suspicion and telling him that his child would be taken

from him as a punishment.

He was further commanded to erect a temple to her on the spot where he stood to atone for his sin and avert further calamity from his house. The temple was accordingly built and named after his daughter who is there worshipped as a Goddess. A black stone image of Mahish-mardini Goddess Durga with six arms astride a lion, is enshrined in the Garbha Griha (sanctum sanatorium) of the temple. According to local legend, Goddess Durga represents the defied form of Champavati—daughter of Raja Sahil Verman. It is a living temple and she remains the dynastic Goddess of the erstwhile rulers of Chamba State and her blessings are sought on every auspicious occasion. Besides, Champavati is the Kul Devi (Family Goddess) of the residents of Chamesani Mohalla and other families in the town.

This is an Indo-Aryan Nagar Style (Shikhar) temple made of locally dressed stones with its shikhar reaching a height of about 50 feet with beautiful relief decorations (some erotic) pilasters reminiscent of late Gupta period. The temple is fronted by a later reassembled pent roofed (Slate) Wooden Mandapam. There is an other "Shakti" temple built in local hill style and also a "Naga" temple in the complex.

SALOONI: (56 kms. from Chamba) with an excellent views of the surrounding hills, Salooni is located on a ridge at the entrance to Bhandal valley.

KATASAN DEVI TEMPLE: (20 kms.) This is a very popular temple with the local people and commands impressive views.

SAROL: (8 kms. from Chamba) A picnic spot in a land scoped garden on the left bank of Ravi. A tourist can get lot of information and also pleasure in visiting the sprawling horticulture farm, with many species of Citrus plants, sheep breeding farm, Poultry farm, Bee keeping farm and canning unit of Sarol, a small but fertile valley.

SAHO: (12 kms. from Chamba) Here is an ancient stone temple of *'Chandrasekhara'*, with two remarkable figures.

BHARMAUR: (69 kms. from Chamba, altitude 2,195 meters) Bharmaur was the original capital of the state of Chamba. It has several ancient temples and monuments that reflect its erstwhile glory. Some of the important temples are of– Manimahesh, Lakshna Devi, Ganesh and Nar Singh. This region is also home to Semi-nomadic Shepherds, the Gaddis. Once called Brahmpura, still retains its 84 (Chaurasi) ancient temples and the monuments of its one time glory, some of which dates back to the 7th century A.D.

KAILASH MANIMAHESH: (35 km, from Bharmaur and 104 km. from chamba, at an altitude of about 4, 170 meters). This lake is supposed to be blessed by goddess Kali and protected by Lord Shiva. Thousands of pilgrims journey here to bathe in its sacred water, on the fifteenth day, following the festival of Janmashtami. A fair is held every year at this lake during the month of August or September. In August 2010, the satellite phone system was installed

at Manimahesh lake for maintaining telecommunication links with the district headquarters at Chamba and sub-divisional headquarters at Bharmaur, besides the rest of the world for the convenience of Manimahesh pilgrims.

Manimahesh lake, located 3,950 m above sea level, near the base of a peak in the Manimahesh range, is the highest in the hierarchy of sacred waters in Himachal Pradesh's Chamba district. It is a place of pilgrimage and a destination for many a hardy trekker. Thousands, including visitors from far-off places, visit the sacred site on the eighth day of the moon in the month of Bhadon, or the 15th day after Janmashtmi, for a dip in the holy waters of its glacial lake.

The devotees, as they trek upwards, sing hymns in honour of Lord Shiva whose eternal abode is believed to be the 5,575 m high peak of Manimahesh Kailash. Chamba is the starting point for the pilgrimage. Being the centre of a valley, rich in ancient remains and known for Chaugan, a public promenade, this medieval town, perched on a flat mountain shelf overhanging the rushing torrent of the Ravi, is famous for its temples. Richly carved and elegantly engraved, the main group of six temples, three dedicated to Shiva and three to Vishnu, throw light on Chamba's art.

The ascent for the pilgrimage starts from Bharmaur, 65 km from Chamba. Buses run by the State Transport Corporation can cover the distance. Being the state's original capital, Bharmour retains in its ancient temples, monuments of its onetime glory. Homeland of the *gaddis* (shepherds), it is also call Shiv Bhumi. The place is famous for its ancient temples, some of which date back to the sixth and seventh century.

According to legend, 84 *yogis* visited Bharmour during the reign of Sahil Verman. Pleased with the king's hospitality, they rewarded him with 10 sons and Champavati, a daughter. Because of the *yogis'* visit the area, with its ancient edifices, is called Chaurasi. The most important among the temples are Manimahesh Lakshana Devi, Ganesh and Narsingh. Although the ornamentation in the lintels and doorway of Lakshana Devi temple is purely Indian, the architecture has Traces of Graeco Buddhist art of Gandhara, indicated by the rows of figures in arched niches separated by dwarf pilasters.

The 35 km distance from Bharmour to Manimahesh entails considerable climbing. The first 16 km till Hadsar can be done by jeep, but a majority of pilgrims, most of whom are *gaddis*, cover the distance on foot, with many of them taking off their shoes at Bharmour.

The next destination is Dhanchho, 11 km from Hadsar where the pilgrims spend the night. It is marked by a beautiful waterfall. Between Dhanchho and the lake are minor places of pilgrimage. However, it is a stiff climb of 8 km and the path is narrow and slippery. Bhangarghati is so steep that one has to literally crawl on all fours. Now a track has been carved out, making it easier for pilgrims. The ascent to Bhaironghati from Bhandarghati is also very tough. The pilgrim's inner strength and abiding faith keep them trekking,

despite all odds, to the lake. They are rewarded by the wonderful views of mountain scenery and slopes carpeted with multi-coloured flowers.

Among the series of minor peaks below the principal ones are some which are believed to be the results of petrification of a shepherd and his flock. According to the local legend, they were turned to stone when they tried to climb up the main peak. There are also some geological structures, serpentine in appearance, which are believed to be a serpent, which turned to stone. In this land of myths and legends, a deep and abiding faith permeates the life-styles of these simple and hardy mountain dwellers. On the 15th day after Janmashtami, this is displayed when the locals and pilgrims meet to celebrate with an intense belief in their simple rituals.

The previous night presents an ethereal atmosphere when, in that wilderness peopled once a year, devotees sit around bonfires and sing hymns in praise of God. They take a dip in the early hours the next morning, while the stars are still twinkling. This, according to their belief, washes away their sins and earns a boon for their remaining lives.

SHAKTI DEVI TEMPLE: (40 km., from Bharmaur and 109 km. from Chamba) located at Chatrari. This temple is of great archaeological interest. The brass idol of the goddess is in the Kashmiri style.

PANGI VALLEY: (167 km. from Bharmaur) Pangi valley is a rugged country, severe in its topography, with high steep mountains and little vegetation. Pangi is the house of beautiful people and of colourful folk dances. The headquarters of the Pangi Subdivision is *'at Kilar'*, located in deep, narrow hills by the Chenab river.

DALHOUSIE

Dalhousie (altitude 2,039 meters), located in the outer slope of hill Dhauladhar range, is another important hill resort in the district. A number of picturesque walks run through the oak and pine forests around the town and offer excellent views of the Chenab, the Ravi and the Beas valleys. It is thickly wooded with stately pines and oaks and has lovely picnic spots all around. Dalhousie is the gateway to Chamba, Originally conceived as a sanitorium by its founder Lord Dalhousie, it is today one of the most quiet hill stations, Extending over an area of 16 sq. km., Dalhousie comprise five distinct hills, *Balun, Kathlog, Petreyn, Tehra* and *Bakrota* with heights ranging between 1,525 and 2,378 meters.

The late Prime Minister Jawahar Lal Nehru, has said, *"One of the finest hill stations in India is Dalhousie from the point of view of beauty, climate and agreeable surroundings, For my part, I would rather go to Dalhousie than almost any hill station in India, Kashmir apart".*

It is known for its church buildings and other landmarks erected by the British. The town has old churches like St. John's Church (1853), St. Francis's Church (1894), St. Andrew's Church (1903) and St. Patrick's Church (1909).

St. John's Church, the oldest is located at Gandhi Chowk, about 2 km. from the bus terminus. This church was the first to be built after the founding of Dalhousie. According to the annals of Chamba state, prior to 1863 a wooden structure of the church stood at this site. The plan to build a stone structure was drawn up on the arrival of the Rev John H. Pratt on 11 April 1863. The present building is one of the prominent monuments in the Dalhousie area. The building, is in good condition. However, continuous care from local administration is very important to preserve this monument for generation to come. Dalhousie has been linked with air, rail and roads network to ensure all weather access to this beautiful place. The distances are as under. Amritsar 188 km., Chamba 56 km., Chandigarh 352 km., Delhi 563 km., Jammu 188 km., Jalandhar 192 km., Manali 402 km. and Pathankot 80 km.

PLACES OF INTEREST

BAKROTA HILLS: About 4.8 km., from GPO, Dalhousie and situated at an elevation of 2,085 meters, the fascinating and bewitching Bakrota Hills offer to the tourists the brisk walk round the hills besides a grand view of snow-clad peaks.

DAINKUND: 10 km., altitude 2,745 meters. This is a towering and beautiful peak which offers panoramic views, specially on, a clear day, of the three main rivers– Beas, Ravi and Chenab.

KALATOPE: 8.5 km., altitude (2,440 meters) 7,930 feet. The spot commands a beautiful and grand panoramic view of the surrounding landscape and eye travels wide over hills and dales, fields and forests, smooth and ruggedness, till in the direction of Jammu & Kashmir, it meets a horizon of snow peaks.

KHAJJIAR: 27 km., altitude 6,000 feet. A little out of Dalhousie is a beautiful, charming retreat that makes an ideal day excursion or even an overnight visit. Far from any major town, this tranquil spot has a small lake in the centre, on which is a floating island. The local people hold the lake for in legend, it is associated with Khajinag, the deity that is enshrined in the temple here. The temple here has a golden dome.

PANJPULLA: Sardar Ajit Singh, a great freedom fighter, breathed his last on the day India gained independence, 15th August, 1947. His *'Samadhi'* is located at Dalhousie's Panjpulla, a picturesque spot with a natural tank and water flowing under small bridges from which the place takes its name. Sardar Ajit Singh was the uncle of martyr Bhagat Singh. At Panjpulla, there is a *'Samarak'* in the memory of Sardar Ajit Singh.

SUBHASH BAOLI: 1.6 km. from Dalhousie GPO. A lovely spot for picnic, commanding a good view of snow covered hills. This has been named after the indomitable man of Indian politics, before the independence days, Sh. Subhash Chander. Bose. It is said that he used to drink water from this place, during his stay in Dalhousie.

JANDRI GHAT: 2 km., place of the ruler of erstwhile Chamba State, is located and surrounded by tall pine trees, is a place worth visiting.

THE ROUND: 4.8 km., the Bakrota hills offers a brisk walk on *'the round'* besides a grand view of the surrounding countryside.

KANGRA-DHARAMSHALA -PALAMPUR CIRCLE

Kangra (altitude 1,250 to 1,982 meters), which was known anciently as *'Trigarta'* is one of the most picturesque valleys in Himachal Pradesh. It is sheltered by the massive Dhauladhar range of mountains, rich in culture and history. The history of Kangra valley dates back to Vedic times, more than 3,500 years ago. It finds mention in the Puranas, the Mahabharta and in Rajtarangani. Dharamshala stands at the foot of Dhauladhar and has a magnificent view of snowy peaks, deodar and pine forests, tea gardens and beautiful hills. The snow line is perhaps more easily accessible at Dharamshala than any other hill station in India. Dharamshala now really has become international, with a number of Tibetan settlements and the residence of Noble Laureate the 'Dalai Lama'. Since 1960, when it became the temporary headquarters of the Dalai Lama, it has come to be known as the 'The little Lhasa in India'. Dharamshala is divided into two distinct parts: lower Dharamshala the civil and business area with Courts and Kotwali bazar and upper Dharamshala composed of places like Mcleodganj and Forsythganj. In 1905, tragedy struck Dharamshala, when an earthquake levelled it completely. After its reconstruction, Dharamshala flourished as a quite healthy resort.

COMING OF DALAI LAMA TO DHARAMSHALA: In 1960, the Parsi shopkeeper N.N. Nowrojee through the Prime Minister's office invited the Dalai Lama and his entourage to take up residence in Dharamshala, specifically in 'Upper Dharamshala' known as Mcleodganj. A century before, the Nowrojee family had established the first trading post in that sleepy town surrounded by the Dhauladhars, the southern branch of the Himalaya. After the devastating 1905 earthquake, many families moved to Dharamshala some nine kms (and 460 meters) lower, but the Nowrojee family stayed on in Mcleodganj. A lifelong friendship developed and continued between Nowrojee and His Holiness the Dalai Lama. In October 2001, N.N. Nowrojee was walking in the forest near his home when the Dalal Lama saw him from his car, and asked the driver to stop. His Holiness greeted him. The two shared laughter and a brief conversation. Nowrojee died in his sleep the very next day.

Countless Buddhist and myriad adventure-seekers are drawn to the Dalai Lama whose universal appeal extends far beyond his venerated religious stature. The Dalai Lama advocates compassion and nonviolence in a world of indifference and violence. His strong, resonant voice passionately emanates from Himachal Pradesh's northwest corner. Dharamshala has been made accessible by air with the airports of Gaggal 13 km, Amritsar 200 km., Jammu 200 km. Nearest broad gauge railhead is Pathankot 90 km. and a narrow gauge railway line between Pathankot and Jogindernagar passes through Kangra 17 km, from Dharamshala. Road distances to major centres in the region are: Chandigarh 239 km., Delhi 514 km., Nangal 145 km., Jalandhar 166 km., Hoshiarpur 128 km., Mandi 147 km., Jwalamukhi 55 kms., Kullu

214 km., Manali 252 m., Chamba 192 km. and Shimla 322 km.

DHAULADHAR: In summer beat the heat along the foothills of the Dhauladhar. This name itself, 'Dhauladhar' discloses its charm and means 'mountain ranges of whiteness'. Formed of white granite, the northern flanks of these mountains hold the towns of Dharamshala, Palampur, Bir and Joginder nagar. The rural beauty and repose suddenly merging into the majestic hills, rugged here and romantic there, invites you for leisurely strolls through meandering paths amidst tall pines, to see gods reside in temples built in Pahari architecture, the sprawling tea gardens where 'a bud and two leaves' are deftly plucked.

Mcleodganj (1,770 m) the place where His Holiness the Dalai Lama resides is often called 'Little Lhasa' the prayer wheels, Buddhist monks, Tibetan jewellery, ornaments and crafts the whole environs is Lhasa-like. The cuisine here is so palatable and in demand that restaurants with names like Yak and Shangri-la sell Momos (meat dumplings) and Thukpa (noodles in broth) like proverbial hot-cakes. During the summers, the Kangra valley festival in Dharamshala provides you an opportunity to peep into the culture of the area while the para-gliding rally at Bir-Billing is an aero sport performed at one of the world's best sites. If trekking is your hobby, climb up to Triund (2,827 m) and have a breathtaking view of the valley and snow clad mountains and a rest house to stay in.

Running rivulets, singing streams, bubbling brooks criss cross your path as you proceed to Palampur only 38 kms from Dharamshala. This can be your base for trekking, gliding, camping, strolling amidst tea gardens, visiting the art gallery of Sobha Singh at Andretta, floriculture units all under the cover of that majestic and grand Dhauladhar. Jogindernagar is about 40 kms from Palampur and is the access point for the sylvan retreat of Barot. The reservoir of the Bassi-Shanan Project on the UhI river, the trout breeding centre and the gateway to the Nargu Wildlife Sanctuary take you out of the world of the madding crowd and the sun's beating.

PLACES OF INTEREST IN KANGRA-DHARAMSHALA - PALAMPUR CIRCLE

DHARAMSHALA – BLESSED WITH BEAUTY : A British officer once wrote, "No scenery presents such sublime and delightful contrasts. Below lies the plains, a picture of rural loveliness and repose... turning from the scene of peaceful beauty, the stern and majestic hills confront us". It might be added that the contrasts of Dharamshala go beyond the visual.

This unique resort is cradled on three sides by the folds of the mighty Dhauladhar range which rises to 5,200 meters. The drama of contrast continues, unfolding two distinct divisions each with its own personality; lower Dharamshala, a busy. Hindu dominated commercial and civic centre. Rich in myth and legend, the area abounds in some of the most highly revered temples (including some fascinating cave shrines) which attract streams of

devotees from all over India.

Upper Dharamshala enfolds Forsythegunj and Mcleodganj... a tranquil Tibetan Buddhist settlement and the home of His Holiness the Dalai Lama. Since second of half of 20th century, more than 10,000 Tibetan refugees have considered this area their second home and much of Dharamshala pulsates with the sights, sounds and scents of old Tibet.

The reverberations of Buddhism, cheerful lamas, interesting traditional handicraft, the aroma of spicy Tibetan food and a potpourri of people to soak it all in; here you find a lingering aura all its own. Sheltered under the paternal, perennially snow-capped Dhauldahars, the area is also at the nucleus of the Kangra Valley, known for its exceptional, pastoral beauty. And so, mango and the deodar, the snows and springtime, fun and faith.... nature has bestowed upon this region, an entire world, and all the seasons in a day, for those willing to experience them.

BHAGSUNAG: (11 km. from Dharamshala) Known for an old temple, a fresh water spring, water falls and slate quarries.

CHAMUNDA DEVI TEMPLE: (15 km. from Dharamshala) This temple is situated on the right bank of the *'Baner'* stream with the Dhauladhar as a backdrop, this has an idol of goddess Chamunda, who, it is said, was given the boon to fulfil the desires of those who worshipped her. On the back of the temple is a cave niche where a stone *'Lingam'* under a boulder represents *Nandi Keshwar* (Shiva).

CHINMAYA TAPOVANA: (10 km. from Dharamshala) Situated on a hillock is the recently established *'ashram'* complex by Swami Chinmayananda, who was a great exponent of the Gita. It is a beautiful place to visit.

ST. JOHN'S CHURCH: (8 km. from Dharamshala) The Church lies in the forest between Mcleodganj and Forsythganj. It has a monument dedicated to Lord Elgin, one of the Viceroys of India, who died at *Chauntra* (Mandi district) and was buried here in 1863. The Church has lovely spotted glass windows and there is Christian cemetery around it.

DHARAMKOT: (11 km. from Dharamshala) It is situated on the crest of a hill, this favourite picnic spot affords a panoramic view of the Kangra valley and the Dhauladhar ranges.

WAR MEMORIAL: (2 km. from Dharamshala) The Memorial is situated near the entry point to Dharamshala commemorates the memory of those who fought valiantly for the honour and defence of the mother land.

TRIUND: (17 km. from Dharamshala) From Dharamshala, at an altitude of 2,827 meters. The snow line starts just 5 km. from Triund and affords a breathtaking view of the snows above and the valley below. It is a popular picnic and trekking spot. Those who want to do a return trek in one day are advised to start early. There is a forest rest house at Triund.

KUNAL PATHRI: (3 km. from Dharamshala) A level walk from Kotwali Bazar leads upto the rock temple of the local goddess.

KARERI: (22 km. from Dharamshala) Altitude 6,500 feet. Kareri lake is surrounded by green meadows, Oak and Pine trees, making it an idyllic place to visit.

KASHMIR HOUSE: There is a steep slope that connects Dharamshala with its twin town, Mcleodganj. By the side of the road, and approached past a short grassy drive is the art-deco mansion of Kashmir House. With a view of Dharamshala and the flowing undulation of the Kangra valley, this was built in 1935 by a prominent businessman of the area, Lala Amar Nath Sood. He sold this to the ruler of Jammu and *Kashmir*, Maharaja Hari Singh when it was named *'Kashmir House'*. In turn, the Maharaja who barely used the property sold this to the Punjab Government. Kangra was then a part of the state of Punjab. After Himachal Pradesh came into being, the house was transferred to the Himachal Pradesh Tourism Development Corporation and converted into a hotel. Today, this charming house still echoes the grace of yesteryears and is conveniently located along the upper slopes of Dharamshala.

DAL LAKE: Lies amidst hills and stately fir trees and is 11 km. from Lower Dharamshala. It is a starting point for excursion and trekking and is located next to Tibetan children's village.

JWALAMUKHI: [56 km. from Dharamshala (30 km. from Kangra)] This place is famous for Jwalamukhi, the *'Flaming Goddess'* is one of the most popular Hindu temple in Northern India. There is no idol and the flame is considered a manifestation of the goddess. The eternal flame issues from the rock sanctum and is constantly fed by the priests. Two important fairs are held during the Navratras, in early April and in mid October.

A sacred flame from a 3,00- year -old temple in Himachal Pradesh has been brought to Singapore to be placed newly-built sanctum of a local temple. The Jwala ji shrine flame placed at shree Lakshminarayan Temple in Singapor's *"Little India"* shopping precinct, "It was the first time that the flame travelled outside India,". The flame was brought to Singapore on a six-hour flight in a vessel similar to the lamp used to transport Olympic flame, it took six months to prepare the flame's journey. Singapore has thousand of Hindus from northern India, who always wanted to have Jwalaji flame there.

NADAUN: 10 km. from Jwalamukhi and 40 km. from Kangra. A lovely place for a quiet weekend. The Beas, which flows, nearby, provides excellent Masheer fishing. There is a temple dedicated to Shiva. The place falls in district Hamirpur.

MAHARANA PRATAP SAROVAR (Pong dam): The attraction of Maharana Pratap Sarovar, however, extends beyond its water resource. The lake lies in an ancient and historical land, the imprints of which are strewn all round. The banks of the Beas around Dehra Gopipur have nurtured human civilization at least from the stone-age. Many neolithic sites have been

excavated by the Archaeological Survey in this area.

The Monolithic temples of Masrur, the only one of their kind in North India, contemporary to those of Ajanta and Ellora in Maharashtra and considered by archaeologists as being equally artistic, are not many miles away from Nagrota Surian. The forts of Kangra, Haripur-Guler and Nurpur are some of the important and formidable citadels of yesteryears.

WATER-SPORTS: Fed by the Beas, and its numerous perennial tributaries, like Gaj, Baner, Neugal and Binwa Khads and Uhl and Ban Ganga Rivers, below the Pandoh Dam, the Maharana Pratap Sarovar retains adequate water-level throughout the year for various water related activities and sports.

Water-sports were first introduced in Himachal Pradesh in 1975 at Gobind Sagar, the lake formed by Bhakra Dam. However, due to heavy siltation of that reservoir, the activities were shifted to the Sarovar in 1986 with the establishment of a regional water-sports centre .The Centre is a pioneer institute in water sports activities, which include swimming, canoeing, kayaking, rowing, sailing or yachting and water skiing. Besides providing training to people from different states and fields, it holds regular competitions to enhance the level of expertise. Three levels of courses are conducted -basic, intermediate and advanced. Training is also imparted in water safety and rescue operations. The Centre, has also started training courses in river-running and white - water rafting on the Beas near Mandi. These are run by the alumni trained at the Centre.

Over the years good infrastructural facilities have been developed at the Centre, which include a hostel with modern amenities and a 10 - suite rest house for accommodation, a large dinning hall to cater to up to 100 guests, a modern kitchen, changing room, an auditorium, boat shed and workshop.

ANGLING: The Beas and its many tributaries are breeding grounds for a variety of fish that are also carried into the lake. Many of these are favoured by sportsmen. The ***mahaseer,*** amongst these, is still considered the ace of all game fish. For, very often, there are many slips and tribulations between catching one and landing it.

Maharana Pratap Sarovar, especially around Dehra Gopipur, is prime ground for anglers. Old records of catches in the river speak of 30 or 40 pounders as being of no great consequence. However, even with commercial fishing allowed in the lake these days, large - sized catches are unusual. Though, any sportsman will still find the Sarovar a good day's fruitful workout.

WETLAND SANCTUARY: With so much water and food around avian hunters could not be missing. The lake and its environs, provide a varied habitat for avifauna, specially water birds, both resident and migratory. Large forested tracts along the shores, marshes, adequate submarine growth and bush-covered banks help shelter and nourish a great diversity of bird life. Over 220 species from 50 families have been identified in these environs. Many of which are seasonal visitors from distant lands.

An area of 30,729 hectares of the lake was notified as a wildlife sanctuary on 1st June, 1983. Another 20,000 hectares covering all land upto 440 m in the catchment of the wetland was added as a buffer zone. The Wetland Sanctuary is an attempt to protect the habitat as well as the varied fauna of the region.

MASROOR: (40 km.) Masroor (Masrur) is known for its monolithic temples. There are fifteen monolithic rock-cut temples in the Indo-Aryan style, richly carved. The temples, partly ruined now, are profusely decorated, with sculptural ornamentation conceived in the same manner as the great temple of Kailash at Ellora in Maharashtra. The main shrine contains three stone images of *Ram, Lakshman* and Sita. ***It is known as Alora and Ajanta of Himachal Pradesh.***

TRILOKPUR: (41 km.) The natural cave has attractive pillars of limestone on the floor of the cave by the percolation of water from the roof. It is something like stalagmites. The cave is dedicated to lord Shiva.

NURPUR: (66 km.) It is famous for an old fort and temple of *'Brij Raj Behari'*. The image according to legend was worshipped by *'Meera Bai'*. The fort is in ruins now but still has some carved relief work on stone.

SUJANPUR-TIRA: (80 kms.) The historic town of Sujanpur Tira is known for its palace, now in ruins, built by Raja Sansar Chand. It is famous for the temples of Gauri Shankar, Murli Manohar and Narbadeshwar. There is the largest ground of Himachal Pradesh which is made use of as a meeting place and also for sports activities. This town falls in district Hamirpur.

DADA SIBA: Downstream of the river Beas, on the Western extremity of Himachal Pradesh, the village of Dada Siba lies close to the state border with Punjab. Sometime towards the middle of the fifteenth century, the erstwhile princely state of Dada Siba came into being as an offshoot of the kingdom of Guler. And while its rulers had surprisingly short periods of reign - rarely exceeding a decade-the state also managed to preserve its identity and independence through the period of Mughal rule and even past the rise of Ranjit Singh's powerful kingdom in the Punjab.

Surrounded by lush fields and mango groves and bordered by the waters of the Maharana Pratap Sagar, today's village of Dada Siba may be unimpressive at first glance and yet, it holds a rare architectural and art marvel in the shape of the stunningly striking temple of Radha Krishan. The temple is regarded to have been commissioned in 1830 and completed in 1835. This was during the reign of Raja Gobind Singh and the work is inferred to have been executed by his son Raja Ram Singh - who later succeeded him. Legend has it that an image of Lakshmi Narayan was found at **'Chaplah'** which is about 4 km from Dada Siba. Ram Singh sought to bring the image to the town, but the planquin on which the image had been placed could not be moved - and this is the image which was then installed in the temple at Chanaur where it still rests.

Meanwhile, disappointed at not being able to bring the image to Dada Siba, Ram Singh decided to create a temple of his own. Specialised craftsmen for the structure were employed and the finest bricks - the 'Nanak Shahi' ones - were placed at their disposal. Some of the stones used came from Jodhpur and this was transported by bullock carts and labourers from Hoshiarpur. Special stone for the door posts and lintels was quarried near the fort of Mangarh on the opposite banks of the Beas and ferried over the Dada Siba. From Jaipur came the image of Radha Krishan which was ceremoniously installed in the temple-and interestingly, an 'Ashoka' tree was brought at the same time that still grows in the temple compound. While these elements created the building, the true worth of the temple's structure lies in its paintings. The panels by the images are in marble relief and have been delicately coloured. The sanctum itself has barely an inch of space that has not been adorned with frescoes. Various styles in the area can be discerned in the panels-Mughal, Sikh and of course, various schools of Pahari painting find expression in assorted sections. The ceiling is also covered with paintings and tucked within the adornments, various deities from the Hindu pantheon - Saraswati, Garuda - are also portrayed. One of the most interesting panels which lies by the left of the sanctum is the depiction of an elephant using multiple female forms. Other frames depict deities, processions and a host of other themes.

Noted critic and historian of 'Pahari' paintings, Dr. B.N. Goswamy has traced the painters of these exquisite creations to the remarkable family of Pandit Sen, his son Manaku and Nainsukh, and the further progeny of Fattu, Kushala, Candu, Nikka and Ranjha. While some changes in the essential styles varied with the patrons, the essential benchmarks established by the schools of Kangra and Guler are all there. On the hill above the village and at distance of a couple of kilometres from the bazaar, lies the remains of the old palace of Dada Siba. A rather sanguinary tale is told of the place. When the walls of the palace were being raised, they repeatedly collapsed. A learned Brahmin attached to the court declared that they would stand only if the Raja sacrificed someone dear to him. The infuriated Raja declared that the Brahmin who spoke these words was dear to him and promptly had him buried alive by the foundations. The Brahmin cursed the Raja and declared that the palace would never have a roof. Even today, the structure remains open to the skies and interestingly, the scions of the erstwhile ruling house who still live in the area, do so in 'Kuttcha' structures as they say that they are forbidden to live in solid houses! Located in the district of Kangra, Dada Siba is easily approachable by a variety of routes. This is 22 kms from Talwara, 33 kms from Sansarpur Terrace and 27 kms from Dehra.

PALAMPUR

Palampur (altitude 1,219 meters), is a fascinating spot in the Kangra Valley, surrounded on all sides by tea gardens and pine forests. The place enjoys a salubrious climate and invigorating pine scented air is believed to be good for

health. Palampur houses two very important institutions–Agriculture University and CSIR complex.

The nearest airport is Gaggal and the nearest railhead is at a distance of 5 km. from the town. Palampur is situated on National highway No. 20 and connected with Dharamshala 35 km., away Kangra 40 km., Baijnath 16 km. Jogindernagar 40 km. and also connected with other places like Mandi, Kullu, Manali and Shimla.

PLACES OF INTEREST

ANDRETTA: (13 km. from Palampur) It is the home of the famous artist, late Sardar Sobha Singh and late play writer Norah Richards. This presents an excellent view of the Dhauladhar Range.

Why did the sleepy little village of Andretta with its Italianate sounding name, become the meeting place of great minds?

Here is how it happened-first came Norah Richards, an Irish writer, dramatist and a follower of Tolstoy. Her husband had been a Professor at the Government Collage, Lahore. After her husband's death there, and a short stay in England, Norah returned to India in the mid- 30's. She settled in Andretta where she built a beautiful English style cottage, constructed of mud, slate and bamboo. At Andretta, she taught drama to students from the Punjab. She was made a fellow of the Punjabi University, Patiala and in return, she bequeathed her house and land around it to them. The Vice Chancellor of the University, Sadar S.S. Boparai has had the house lovingly restored by local craftsmen and masons. Even now, students from the Punjabi University come to celebrate Norah's birthday every year on the 29th of October. They enact very professional dramas in her modest open air theatre.

From Lahore, Norah called B.C. Sanyal, the well known painter and sculptor and Professor Jaidayal who had been her husband's pupils. They also built mud houses in Andretta. Later, Prithviraj Kapoor used to visit Andretta and stay with Professor Jaidayal who had been his tutor in Lahore.

Sobha Singh, the painter of Sikh Gurus, settled in Andretta and lived there until his death in the mid-80's.

Today, you can visit the gallery where his paintings hang and buy prints of the originals. Norah also called Sadar Gurcharan Singh, the master potter from Delhi. He was responsible for introducing studio art pottery into India. He built a house and a small pottery for summer use in Andretta.

During the time of Norah, there were vibrant discussions about art, drama and the philosophy of living in a rural environment. Norah's ideas were very sound on how one should live in the countryside, using local materials for building houses, how you should live in harmony with nature and encourage local people to do the same.

After Norah's death in 1971, there was a lapse in cultural activities, but now Andretta is having something of a renaissance. B.C. Sanyal's daughter,

Amba started a new venture "Norah's Centre for the Arts". The building mirrors Norah's desires as it is constructed almost entirely of local materials, with special emphasis on bamboo-of which there is an abundance in Kangra.

Wherever possible, Amba included local people in her projects as well as involving the village school children. Sadar Gurcharan Singh's little summer pottery has evolved into the thriving Andretta Pottery and Craft Society started by the Sadar's son, Mini. The Pottery sells its *rangoli* patterned glazed earthenware to Fab India in Delhi. Alongside the pottery, is a museum which has a collection of Himachal village pottery. This beautiful craft is sadly dying out. In 2010 Sobha Singh art gallery Andretta constituted an award in the memory of late famous artist Sardar Sobha Singh . The maiden award was given to a Chandigarh based artist Rahi Mohinder Singh. This award, comprising Rs 11,000, a shawl, a citation and honorary life membership of the society.

BIR: (35 km. from Palampur) This village is famous for its Buddhist monasteries Hang gliding pilots use it as their landing site. Billing is 14 km., from here, considered as one of the finest take off points in the world for hang gliding.

BUNDLA STEAM: (2 km. from Palampur) Bundla stream with wide chasm of more than 100 meters, swells up and rise madly in monsoons taking stones and boulders along with it making a loud noise like that of continuous thunder. This is a lovely walk from Palampur to Bundla.

BAIJNATH: (16 km.) The Shiva temple at Baijnath is one of the most remarkable monuments of the Kangra valley. Ancient name of this town was *'Kirgrama'*. Baijnath got its name from Shiva Vaidyanatha (Lord physicians). The temple consists of an 'Adytum' surrounded by a spire of the usual conical shape with a *mandapa* covered with a low pyramid shaped roof. The Adytum contains the lingam. There is fine sculpture work to be associated with Ravana, who worshipped Shiva at this spot and gained immortality. Baijnath is one of the *'twelve jyotirlingams'*. Shivaratri of Baijnath is a well attended fair.

NEUGAL KHAD: (2 km.) Neugal Khad provides a fine view of the Dhauladhar range. It is roaring in the rainy season and gurgling all the year round.

KANGRA PAINTING: To understand any great art, one has to view it as an organism with its own soul, forms of expression and conventions. Art is the symbol of the culture to which it belongs, acquiring its style of expression in relation to it. Every culture thus has its own style of art, and one must know the culture to understand its phases of development. This is also true of Kangra art. All great art is inspired by religion. The paintings and sculpture of Ajanta and the great monument of Borobudur in Java owe their origin to the inspiration of Buddhism. Christianity inspired paintings of sublime quality in Medieval Italy and Spain. The religious revival also stimulated literary activity. The cult of Ram and Sita, Krishna and Radha were the sources of inspiration to many artists and poets who wrote in Sanskrit and Hindi. Jayadeva,

Ramanand and Kabir are among the most prominent.

Malik Mohammad Jayasi completed '*Padamavat*', his well known romance, in A.D. 1540 and Keshav Das wrote his famous love poem *'Rasikpriya'* in A.D. 1591. Tulsi Das wrote *'Ramayana'*, which is most popular holy book and is the basis of the moral and religious life of millions of people. Bihari Lal, who wrote , Braj-Bhasa dialect, completed his *Sat-Sai,* or 719 couplets on the Krishna Legend in A.D. 1662.

In the 16th and 17th Century, the way was thus being prepared for the emergence of a new form of art born of the rapidly spreading Vaishnava cult in which spiritual purity and sensuous delight are interwoven, religion and aesthetics moving hand in hand in quest of reality. The Gita-Govinda and the Ramayana have been illustrated both in the Basohli and Kangra style. Padmavati whose story is sung by Jayasi is the subject of a number of paintings. The 8 Nayikas and Baramasa are favourite themes alike with Kangra paintings and the Hindi poets Kesav Das, Matiram, Basidar, Ramguni and Ganj, and numerous paintings which illustrate their works are extant.

Another great source of inspiration to the Kangra artists is the culture of Punjab. This source has not been adequately considered by art critics, who have little knowledge of the province, its people and culture. The Kangra paintings, particularly those of Nurpur and Guler, which were close to plains, the dress of the women is typically Punjabi, they usually are shown as wearing Suthan that resembles breaches, kameez and dupatta.

The popular love tales of the Punjab-Heer-Ranjha, Mir-Sahiban and Sohni-Mahiwal are often illustrated by the Kangra Artists. Thus, Kangra art is the visual expression of cultural movements with roots in a great spiritual upsurge. Kangra paintings is not a sudden development related to the life of Northern India, but is the culmination of a spiritual and literary revival of Hinduism. The principal centre of painting was the Kangra Valley where the artists worked under the patronage of the Hill Rajas of Guler, Kangra and Nurpur. From here the artists migrated to the neighbouring states of Mandi, Suket, Kullu, Tehri and Garhwal in the east and Basohli and Chamba in the North. The art of these states was but an offshoot of the art of Kangra and the most appropriate name of this version of Rajput art is the *"Kangra Valley School of Painting"*. Of the hill states, Guler has the longest tradition in the art of painting. It has been established during the rule of Dalip Singh (A.D. 1645-1743). The birth of Kangra art in the valley about the middle of the 18th century, and its decline in the middle of 19th century is a strange phenomenon in the history of Indian art.

To turn to the technique of Kangra paintings, its chief features are delicacy of line, brilliance of colour and minuteness of decorative detail. Like the art of Ajanta, Kangra art is essentially an art of line. The fineness in painting is achieved by the use of fine brushes made from the hair of squirrels. A preliminary sketch in light red colour was made with the brush on brown handmade paper, called Sialkoti paper. This was primed with white and the

surface made very smooth. The outlines were then redrawn in brown or black. Colour was now applied, first the background and then the figures. The outline was now redrawn and picture finished.

MANDI CIRCLE

Mandi is situated on the banks of the river Beas. It has a rich culture and history represented by its temples which are a major tourists draw. Mandi is an important trading centre situated on the Pathankot-Kullu road. The town is also the gateway to Himachal's most famous valleys-Kullu Manali, Lahaul and Spiti. Mandi is also on the Kullu-Shimla road *via* Bilaspur.

JOGINDERNAGAR: (57 kms.) Jogindernagar is the terminus of narrow gauge line from Pathankot-Jogindernagar. A journey from Jogindernagar to Barot in the interior of Mandi district, on the haulage trolley is thrilling. Bassi power station is 5 km. and next to it is 'Machhial', considered to be a sacred spot.

SUNKEN GARDEN: The historic Sunken Garden located on the confluence of the Beas and the Suketi in this 500 year old town, has regained the grandeur of its royal past when all cultural and religious festivities were held here.

The dream of making a modern business complex around the historic garden has come true. The new Palika Bazar, comprising about 250 shops, has enhanced the beauty of the ancient garden, which remained neglected for decades with heaps of rubbish lying around. Over the years it became a congested area dotted by ugly wooden khokhas around it and was fast becoming a slum. The process of ageing had further brought in its wake the decay of ancient structure.

Plans to beautify this historic town of temples were initiated many a time with a bang, but always ended in a whimper for want of funds. The idea of raising a modern complex around the Sunken Garden was conceived in 1985. But work went on at a snail's pace for want of funds. It gained momentum only when the then Union Minister Sukh Ram got a Rs 2 crore allocated from the Centre for the beautification of the town when he was holding the independent charge of the Minister of Planning. More funds followed in subsequent years.

The wooden *khokhas* around the Sunken Garden were the ugliest structures of the town. The owners of the *khokhas* were initially reluctant to shift to the new complex, but they were prevailed upon to shift, The *khokhas* were removed. The Sunken Garden wore a sprawling look overnight and it was beaming with elegance after the demolition of the ugly structures. Their fear that business would get a setback proved unfounded. All of them became occupants of a modern complex one fine morning. Now Lush green lawns, ornamental plans, fountains and flowers beds are camping up.

A Pagoda type structure with a clock tower is a marvel of hill architecture and the star attraction of the garden. Beneath this precious monument are

buried the tragic tales of the hoary past. It reminds us of the cruelty, betrayal and perversion of Sidh Sen (1684-1727), who beheaded his son-in-law, Raja Prithi of Bhangal. A small area near Jogindernagar used to be Bhangal state in that time. His head was buried in the centre of the garden and limbs at the four corners of what became the Sunken Garden. The Rani of Bhangal had come to her father following strained relations with her husband. Sidh Sen wanted to teach him a lesson. He laid a trap and sent for Prithi Pal. On his arrival at Mandi he was taken captive.

An abortive attempt was made by Prithi Pal to escape from prison with the help of Raja of Suket (Sudernagar). He did escape from prison but was caught while crossing the Beas. Ferrymen recognised and informed Sidh Sen. Prithi Pal was then killed. Obviously about 500 years ago, Beas was a big river and ferries used to transport people from one bank to the other. The water discharge in the river has gone down alarmingly over the centuries with the gradual loss of forest cover.

The ghastly murder of Prithi Pal was followed by many natural calamities. Sidh Sen summoned astrologists and tantriks who attributed to the wrath of the raja's wandering spirit. Sidh Sen grew panicky and on the advice of astrologers started lighting an earthen lamp daily at the place where the head of his son-in-law had been buried. The subsequent rulers kept up the tradition of lighting earthen lamp for centuries.

The Sunken Garden used to be a small lake in the days of Sidh Sen and was called Sidhsar. Joginder Sen, the last ruler of Mandi state, converted it into a garden. A clock tower was built during his regime. The temples of Sidh Kali, Bhairon and Mahadeva had been built by Sidh Sen.

The other important places in district Mandi are 'Barot' twenty kilometers from Jogindernagar, Sundernagar on the raised edge of the fertile Balh valley is famous for 'Sukhdev Vatika', 'the Mahamaya temple' and the Beas-Satluj link project, Janjehli, 67 km., from Mandi is hikers paradise for its tranquil treks and lake Rewalsar is situated 25 km. from Mandi.

JHATINGRI: Used by the former rulers as their summer resort, Jhatingri the fascinating spot atop a hill is one of the lesser known destinations in the state. Situated on the Ghogar Dhar of Mandi district at an elevation of 6,600 feet, Jhantingri is easily accessible. At Ghatasani on the Mandi—Jogindernagar highway a branching road steadily rises through terraced fields and thick deodars to the ridge. Jhatingri is only 5 kms. from the main highway. The remains of the summer palace of the former rulers of Mandi state tell tales of bygone days.

NAHAN-PAONTA-RENUKA CIRCLE

NAHAN: Nahan was founded by Raja Karna Parkash in 1621 A.D. as his capital city. It is crowned by the 3,647 meters high Choordhar peak. Nahan's close proximity to plains makes it an all weather holiday resort. There are a

number of picturesque walks through the dense forests and some of them are the *'Villa Round', 'Military Round'* and *'Hospital Round'.*

JAGANATH TEMPLE: Jaganath temple was built by Raja Budh Parkash in 1681. Making the end of the Monsoon, the festival of *'Sawan Dwadshi'* is celebrated annually at the temple. Idols from all over the city are carried in procession and floated in the temple tank is salutation to Lord Jaganath.

SHIVALIK FOSSIL PARK SAKETI: 22 km. from Nahan on the richest anthropological discoveries of all times, the fossils found at the park dates back to the Jurassic era of 8.5 million years ago. Excavations at Saketi have unearthed the fossils of a large number of extinct faunal species. To make it a big centre of attraction government has got Fiber glass models of the discoveries erected on the site where they were originally found.

TRILOKPUR TEMPLE: It was built in 1573 by Raja Dip Parkash. It is at a distance of about 23 kms from Nahan and about 6 kms from Kala Amb gateway to Nahan from Haryana. Trilokpur is a place of great religious importance. The temple of the goddess **'Mahamaya Bala Sundari'** is quite famous and attracts lakhs of pilgrims from all over Northern India, especially from Haryana and Himachal Pradesh. The unusual deity of goddess Bala Sundari resembles the stone lingam of Lord Shiva. A fair at this place is held twice a year when a large number of devotees visit this temple and pay their respect to the goddess. This place is approachable by bus or taxi. For the convenience of pilgrims there is a big *'Sarai'* at this spot. During both the Navratra Fairs special buses are available from many prominent towns of Northern India.

DHAULA KUAN: On the road to Paonta about 20 km. from Nahan is Dhaula Kuan where it is worthwhile stopping to see a sprawling orchard consisting of citrus plants and mangoes. The HPMC is also running a fruit canning unit which manufactures various kinds of juices, jams, pickles and canned fruit. The fertile Paonta Valley starts from this place. A little away from Dhaula Kuan there is Katasan Devi Temple where Raja Jagat Singh defeated the advancing army of Gulam Qadir Rohilla in a great battle. The victory is commemorated in the Devi Temple, built in gratitude by the Raja.

GIRINAGAR: While going from Nahan to Paonta through a bifurcation at Dhaula Kuan, Girianagar is barely 7 km. from Dhaula Kuan. At this place a power house of 60 MW capacity has been constructed after diverting the water of Giri river through a 6 km. tunnel from *'Saton'* near Renukaji. With the construction of this project, besides generating electricity the water is being utilised for irrigating the land of Majra and surrounding areas and for boosting fertility of the land in this beautiful valley, traditionally known as Kiarda Doon. This project was commissioned during 1979.

PAONTA SAHIB

Paonta Sahib is situated on the bank of the river Yamuna. There is a

gurudwara dedicated to the tenth Sikh guru, Govind Singh, who spent five years here. In response to an appeal by Medini Parkash, the ruler of Sirmaur whose lands had been taken in possession by a neighbouring ruler, the Guru then barely 16 years old, set off from Amristsar for Paonta Sahib. It took no time for the gentle persuasive Guru to arrange a reconciliation between the warring rulers. In the process guruji was so overwhelmed by the scenic beauty that the decided to settle down there. Guru Govind Singh spent his days in Paonta, writing *'DASAM GRANTH'* and in educating his followers. He built the 'Patna Fort' in over one hundred acres of land. The Guru left Paonta Sahib after the 'battle of Bhangani' with Raja Fateh Shah of Srinagar, in which he defeated the errant ruler's army after thirty days of battle.

BHANGANI: 23 km. from Paonta Sahib. This is the site where Guru Govind Singh defeated Raja Fateh Shah of Srinagar (now in Garhwal hills, Uttrakhand) and his 22 allies. A monument has been raised here in the memory of the rulers who where killed and their queens who immolated themselves in keeping with the traditions of the time.

THE GURUDWARA: It has been built on the bank of the river Yamuna on the spot where Guru Govind Singh dismounted from his horse after arriving Paonta. The shrine is an architecture marvel.

MUSEUM: The museum contains an interesting collection of the personal weapons of Guru Govind Singh.

MEMORIAL OF RISHI KALPI: It has been built in the memory of Rishi Kalpi who was brought to Paonta by Guru Govind Singh.

SRI KABI DARBAR ASTHAN: This was Guru Govind Singh's bathing place.

SRI DASTAR ASTHAN: The place is located on hillock with a fascinating view of the river Yamuna and the surrounding hills. It is here that Guru Govind Singh tied his ceremonial turban and held evening prayers.

SRI TALAB ASTHAN: This building served as the armoury and treasury and was also used by the Guru for his Darbars.

QUILA LOHGARH: (25 km.) Quila Lohgarh was the capital of Baba Banda Bahadur Bairagi and the place from where he started the Khalsa coin.

SAHASTRA DHARA: At this place there is a confluence of river Yamuna and Tong (Tamsa). This is a beautiful place and a paradise for tourists. Nearby is village Kalsi (now in Uttrakhand) 25 km. from Paonta, which was the old capital of sirmaur. At this place there is *'Ashokan Rock Edict'* which is worth a visit. The Ashoka pillar which stood here was removed to Delhi by one of the Muslim rulers of the Sultanate period.

KHODRI DAK PATHAR: It is a beautiful picnic spot just 25 km. from Paonta. There is a beautiful park, a swimming pool and a tourist Bungalow. At this place the torrential river Yamuna has been tamed into an artificial lake by constructing a barrage. From here one can get a fantastic view of the

lake and park nearby. While going from Paonta to Khodri one will be delighted to have the canal side drive. Dak Pathar, Vikasnagar, Harbatpur Dhakrani, Dhalpur and Kulhal are other places of tourist interests between Paonta and Khodri Dak Pathar. *'Chhibran Power House'* is a unique one as the entire structure has been built underground. Besides, *it is the first underground power house in the Himalayan Range.*

KAFOTA: Situated at an elevation of 1,804 meters and 42 km. from Paonta on Jagadhari-Narkanda road is village Kafota which has a salubrious climate and holds potential for picnics. A cool breeze which blows there is quite refreshing coupled with charming scenery. 18 km. away from Paonta there is Rajban Cement Factory under Cement Corporation of India. A few km. from Rajban is *'Kamrau'*, the biggest village of Sirmaur district known for rich limestone quarries. At this place, there is a *Tilordhar Tibetan Colony* with its Buddhist Monastery, but most beautiful Buddhist Monastery is at purnwala on way to Bhajain.

RENUKA

The Renuka lake is surrounded by lush green forests supporting a variety of animal and bird life. Renuka lake is not only an idyllic holiday resort but also revered pilgrim centre. Legend has it that *Parshuram Tal,* which appears shaped in the profile of a sleeping lady, was created to mark the immortality of Renuka, the wife of Rishi Jamdagni. It is believed that Rishi Jamdagni unhappy with his wife Renuka, ordered his son Parshuram to behead her. The son obeyed his father's wish, Pleased at Parshuram's loyalty the Rishi granted his son a wish and Parshuram asked for the restoration of his mother to life. The reunion of mother and son is celebrated at the annual Renuka fair in the month of November.

THE MATH: The main temple at Renuka *'The Math'* was constructed by the invading Gurkhas in 1814. The temple houses an excellent image of Reunka Devi, Parshuram's mother.

MINI ZOO: a small zoological park on the banks on the Reunka lake has good collection of the local fauna.

RENUKA SANCTUARY: Another attraction in Renuka is Wild Life Sanctuary at a distance of about 42 km. from Nahan approachable by motorable road. The nearest point of getting to the sanctuary is Dadahu which is served by regular daily bus service.

CHOORDHAR: Dominating the entire landscape of fields, forests and ravines is the Choordhar peak, which rises to 3,647 meters above sea level and is a trekking treat from Nahan walks. Approached by way of Dadahu, Sangrah, Bhawai, Gandhuri and Nahura it is a 50 km. trek. a less taxing journey is by taxi or car to Nahura and thereafter a walk of 16 km. The climb is difficult but rewarding. The peak affords a fine view southwards of the Gangetic plains and the Satluj river, Northward lies Badrinath, the well known Hindu pilgrim

centre; also seen are the hills of Chakrata and Shimla, the state's capital city. An alternative way to Choordhar is through Rajgarh which is in the midst of orchard country.

SOLAN -PARWANOO CIRCLE

PARWANOO: This is Himachal Pradesh's premier Industrial township located at the base of the Shivalik hills on the Kalka-Shimla highway. Parwanoo has a large number of small and medium scale industries.

SOLAN: Solan is situated midway between Kalka and Shimla. The fine climate of this place round the year makes it an ideal destination for all seasons. There is famous 'Mohan Meakin's brewery' in Solan, set up in 1855 A.D. The mountains near Solan offer interesting trekking possibilities and its streams are well stocked with a variety of game fish.

KANDAGHAT: The tiny windswept town of Kandaghat (1,425 m) is on National Highway 22, almost midway between Shimla and Solan. The name may be a derivation from kanda, a river bank for it stands above the bank of the Ashwani stream or perhaps this may come from the numerous thorny 'kanda' plants like 'kasmal', 'kurundu' and 'phool lakadi' that may be found growing here.

Kandaghat... 'a microdot of history' as the Reader's Digest World Atlas prints in bold letters, has several unlisted solitary spots where nature, folklore, history, religion, geography and the flora and fauna charm visitors. Kandaghat became prominent when Bhupinder Singh, Maharaja of Patiala built a lodge here and later built the palace at Chail in 1891. The splendid Georgian mansion at Chail is now Himachal Tourism's Palace Hotel.

The picturesque countryside from Kandaghat to Chail is dotted with numerous plant nurseries and orchards. Indeed, the excellent climate and an altitude that ranges from 4,000 feet to 5,000 feet (Chail is higher) has ushered in a floral revolution here. Trucks and trains from Kandaghat transport flowers, vegetables and fruit to the plains.

Two kilometers from Sadhupul is Dochi housing the beautiful residence of the Maharaja of Patiala. The garden here also grows and retails herbs and exotic vegetables like rosemary, sage, dill, chives, curled lettuce, horseradish and red-cabbage. Open your picnic basket at Sadhupul! Ramble around! Here is the former '*Anand Bhavan*' built by the Maharaja of Patiala now called '*Indira Holiday Home*' with its sprawling lawns.

There are several treks in the area. One route goes from Kandaghat to Chail; others are to Birni Top, Tehal Top and the Karol Tibba. A short walk leads to the shrine of the local deity ***Baba Thada Mulla*** where wishes are supposed to be fulfilled in a week and requires the thanks giving sacrifice of a black goat.Of all the excursions around Kandaghat, perhaps the climb to the Karol mountain (7,000 feet) is the most interesting. This is closely linked with the epics Ramayana and Mahabharata and this hill abounds with many

herbs. Folklore has it that a fragment of the magical mountain being carried by Hanuman Ji with its magical herbs fell here. The Arjun Goofa of Karol is reportedly twenty kilometers long and should this be proven, this could make it one the longest caves in the world. It is believed that this is the original tunnel through which the Pandavas escaped to foil an attempt to burn them and spent five years at Karol.

The length of this cavern is somewhat substantiated by the presence of 'baan', oak leaves that emerge with the water that perennial gushes out of Rangmahal's right corner at Pinjore's Mughal Gardens. Apparently, the baan leaves get sucked into the cave at Karol and are carried by the water's flow to Pinjore. Interestingly, there is no water to be seen at the mouth of the Karol cave but one hears it flowing along the cave. The Kalka Shimla 'toy train' chugs the thirty-six miles in five enchanting hours to Kandaghat's station (4,667 feet) and this is 62 kms from Kalka.

KIARIGHAT AND BAROG: These are two picturesque spots on the Kalka-Shimla route, which have been developed into tourist resorts.

KASAULI: 77 km. from Kalka, at an altitude of 6,322 feet. Kasauli is a charming and quiet place for relaxation.

CHAIL MILITARY SCHOOL: The Chail Military School was established on September 15, 1925, at Jalandhar cantt with its sister institution at Jhelum, now in Pakistan. The school was shifted to Nowgong in 1952 and finally to Chail in 1960. The school has e-class rooms with digitized material and automated library with thrust on personality development.

KUNIHAR: Kunihaar in Arki, a part of the Solan district, is the place to go to get the feel of rustic Himachal. Every small hamlet in Himachal has a distinct character while being an integral part of it by way of customs and traditions. The hospitality of the locals is something that one only hears of in these materialistic times, but Himachal and its villages hold their guests in high regard. Simple people, verdant greenery and valleys from a height of 1000 meters above sea level make it a worthwhile place on any itinerary.

The quaint valley of Kunihaar is also known by the names 'Hatkot' and 'Choti Vilayat'. While the old name of the princely state was Hatkot, it started being referred to as Choti Vilayat under the British rule. It was when Rajiv Gandhi visited the place and referred to it as Kunihaar that the name stuck. It was because of the Kuni River that flows by and is shaped like a garland-haar. The place is famous for its Bhole Nath caves or the Shiva Dyars. The cave connects Arki and is 25 km long.

The inside of the cave is cool even in summers and has a temple of Lord Shiva inside where devotees gather to pay obeisance. Two more temples that are very popular are the Shri Devi Temple dedicated to Kulja Devi and the Shri Dano Devta Temple. A water body, the Kuni Khud, is a small lake where you can find lotus in full bloom when they are in season. A fertile valley; wheat, black gram, maize, pulses and much more is cultivated in its

vicinity. Around the area, there are many noteworthy places that one can visit. The Akri fort where one can see a unique combination of Mughal and Rajput style of architecture is a popular destination. It has lovely murals in Pahari style. The Durga Temple and the Shakhni Mahadev Temple also attract many visitors.

It is said to have been established by Abhoj Dev, a Garg Raghuvanshi Rajput from the Jammu region of Akhnoor in 1154. He defeated the Raja of Keonthal and won a large chunk of the region, three times the existing state. The royal Thakur family continues to live in an old mansion adjacent to the old palace which bears a striking resemblance to a French villa. Away from the main settlement, it is ensconced into relative seclusion. Not much is known about the later rulers but is known that they were fierce warriors like Abhoj Deo. They assisted the rulers of Nalagarh and Bilaspur and helped them fight the Kullu rulers. In the seventeenth century, the state got fragmented due to poor and inefficient rulers.

KANDAGHAT RAILWAY STATION: On May 3rd 2011, The 108 -year -old Kandaghat railway station which was part of the Kalka-Shimla heritage railway track, was burnt in a devastating fire which broke out past midnight. The restoration work was started soon after to give it as per the original look. The ancient communication and track -control system, called the Neals Token Instrument System, which had been destroyed in the fire, had been replaced with a similar system. Most of the buildings located in the heritage zone are facing serious threat from fire and nature. There is urgent need to form a policy to conserve and maintain their position for the posterity.

LAHAUL AND SPITI CIRCLE

LAHAUL-SPITI: Lahaul-Spiti is 120 km. away from Manali has snow fed glaciers and barren mountains. Keylong is the Headquarters of Lahaul-Spiti, and oasis of green fields.

KEYLONG: It is 117 km. from Manali. A fair sized village amidst green fields of barley and buckwheat, Keylong is surrounded with brown hills and snow peaks. Kardang monastery overlooks Keylong and is 3.5 km. across the Chandra river while Shashur Monastery is about 1 km.

TRILOKINATH AND UDAIPUR: These are two important places of pilgrimage in the Pattan valley. At Trilokinath is a six armed image in white marble of Avalokiteshwara, Bhoddisttava. Udaipur is located at the distance of 3 km. from Trilokinath. The temple of Markula at Udaipur is highly remarkable for its wood carvings. Udaipur is 166 km. away from Manali.

KI MONASTERY: The magnificent hill-top monastery at village Ki is the most prominent feature of Spiti valley. This monastery, belonging to the Gelugpa sect of Tibetan Buddhism, is a striking example of monastic architecture that proliferated in the Western Tibetan kingdoms during the fourteenth century from Central Tibet. In this monastic complex, a narrow

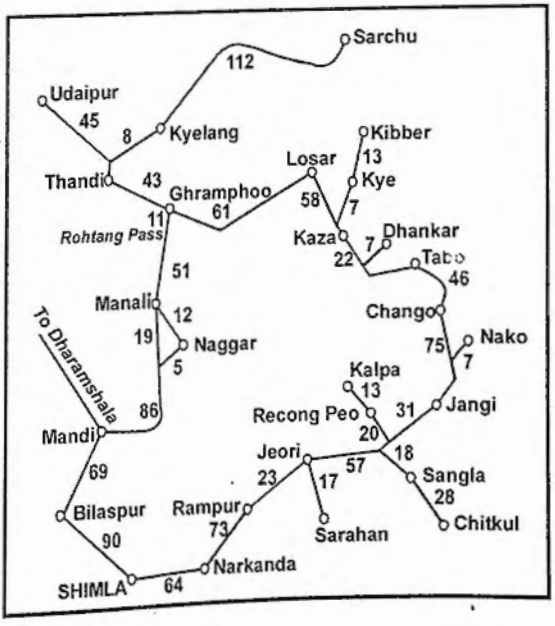
trench-like passage and the winding flight of steep steps leads you to the topmost building around an open courtyard. There on a raised plinth towards the northwest is *zimchung*, the chamber where incarnate lama of the Ki Monastery resides. A ladder opposite the *zim-chung* leads to the upper chambers. Once atop the roof of the highest chamber, one has an instinctive feeling of being in the other-worldly realm with the whole expanse of Spiti Valley spread out below.

The monastery proper is a three -storeyed structure of which one is virtually underground. This floor is used as a store for the monastery. In it are stored the treasures of the monastery – old weapons, priceless ancient *thankas* and other artifacts. It is almost at the level of this underground vault that a structural square room also exists independently. This room is known as the *tangyur* and enshrines holy scriptures. The walls of this room are gaily painted with sectarian themes. The ground floor has an oblong room towards the southwest. This room is utilised as the *du-khang*. The walls of the *du-khang* have beautiful murals inspired by the Jataka themes besides other jamaistic popular lore. These murals, are of mature craftsmanship. On the right side of the *du-khang* are a *gonkhang*, a refectory and other utilities. The monastery proper is buttressed by scores of box-like monk cells all around at the lower levels.

Ki monastery has had a very eventful history. It came into being in the 14th century on the remains of earlier Kahdam-pa establishments, which were destroyed by the Sakyapa militants. The moveable treasures from the destroyed monastery were shifted to a new establishment and preserved therein. This explains the fact that in the Ki monastery, a fabulous collection of the ancient *thankas* may be seen, but not a single wall-painting of an earlier style remains.

The Ki monastery under the Sakyapa control was not as ostentatious as it is today. The different construction techniques and architectural features, among other things exhibit clearly that this complex has been enlarged and rebuilt time and again at different periods. In the middle of the 17th century Segpo (the Mongols) from the Central Tibet and the Ladakhis stormed into the Spiti valley and indulged in ruthless pillage at many places.

The strategically located Ki monastery must have been an obvious eyesore for them. Hence, it suffered plunder and extensive damage. Since that invasion was prompted by the Fifth Grand - Lama to establish his spiritual and temporal hold over the Tibetan world, the monastery came under the Gelugpa control. They extensively enlarged and garrisoned it as a defensive stronghold overlooking the entire valley. Thus, from the very beginning, this monastery has been groomed more as a defensive stronghold than a centre for religio-spiritual pursuit. It is, therefore, not without reason that it has more weapon in its vault than the sacramental artifacts on the altar, except for a few very old musical instruments, which might have been salvaged out of the debris of the ancient Rangrik monastery.



Ki monastery must have remained a very well-supplied and rich

establishment of the Gelugpas, which attracted three attacks in one century. In 1820 it was ransacked during a war between the Kullu and Ladakh kingdom. In 1840 Gulam Khan and Rahim Khan of the Dogra army invaded it, and later the same year the Sikhs plundered it. Successive destructions and consequential reconstructions have resulted in a haphazard growth of boxlike structures piled one over the other. These serve as the residential quarters for the monks. The whole complex now gives a look of an imposing defensive fort rather than a monastery.

Located on a local rocky hillock on the left bank of Spiti river, 12 km west of Kaza, the subdivisional headquarters of Spiti, the Ki monastery is conveniently approachable from Manali after covering a distance of 206 kms. There is another approach to this monastery from Shimla via Kinnaur. This road remains usable during most of the year. The distance from Shimla to the Ki monastery on the N.H. 22 upto Sumdo and thereafter to Ki village is 424 km.

KAMRU FORT: An midst blaze of saffron trees and cold snow melt lies a valley of breathtaking beauty. From the hills of adjoining Uttrakhand, the river Baspa flows west to meet the churning torrent of the Satluj at Karcham. Along its sides rise snow clad mountains, thick forests of *deodar* trees, and orchards in bloom or laden with a variety of fruit. A kilometre or so above Sangla Valley stands the towerlike fort of Kamru – a silent sentinel which has, through long centuries, stood guard over all this beauty.

At a height of 2,600 m and a distance of 229 km from Shimla, Kamru was the original seat of the rulers of Bushahar. With a population of about a thousand, the village of Kamru is a dense cluster of houses and is surrounded by fields and orchards. The main gate of Kamru has an image of the Buddha whose blessings must be sought before entering the village confines. A series of gates through the village lead to the fort – another low gate, and we are at the towerlike core. Placed over a packing of dressed stone that acts like a pedestal for an exalted piece of art, the towerlike fort of Kamru rises five storeys high. Here is an exemplary piece belonging to an architectural genre unique to this part of the world. A series of thick

sleepers of *deodar* wood are horizontally placed, one atop the other. The mesh thus created has infill of finely-dressed stone neatly slotted in without the use of mortar. Kamru Fort is a glorious example of how local craftsmen, using local materials, created a highly evolved style of traditional architecture.

Serving to heighten the character of the visage, an elegant wooden balcony provides ingress to the tower. The stronghold has an image of Kamakhya (Kamakshi) Devi installed on the third floor. This is said to have been brought here centuries ago from Assam. Kamru also has a 15th century temple of Lord Badrinath. Once every three years, amidst great fanfare, the image is carried to Gangotri, the source of the Ganga in Uttrakhand. As for today, it would be appropriate to say that Kamru is a microcosm of Himachal Pradesh. Here is a wealth of architecture, aeons of lore that now holds attractions for every traveller with something tangible to link the past with the future.

FISHING AND ADVENTURE SPORTS

Besides those who go to hills either to relax or enjoy scenic beauty or visiting pilgrimage centres, there are others, who just want to enjoy life in an entirely different way. For such people Himachal Pradesh offers excellent opportunities in the form of fishing and adventure sports. Himachal Pradesh with its perennially snowfed rivers and their numerous tributaries is indeed angler's paradise. The river Beas and its tributaries like Tirthan, Parbati and Gadsa in Kullu, Lambadag in Mandi and Pabbar in Shimla, are famous for trout variety of fish. Masheer fish is available in the Kangra district at Dehra Gopipur and the Pong Dam. In Chamba district Masheer fishing is allowed in river Ravi and its tributaries like Siul, Chakki, Dehar, Behral and Salkhad. The licenses for fishing can be had from the district Fisheries Officer or Tourist Officer. Fishing for Masheer is allowed with all type of Baits including live baits. In case of Trout, only artificial baits viz spinner, fly plug etc. are allowed. The oft encountered snow peaks, majestically rugged monoliths, wide valleys and green pine forests offer splendid opportunities not only for mountaineering, rock-climbing and skiing, but also for hang-gliding and river rafting.

ROCK CLIMBING AND MOUNTAINEERING: Mountains are challenging. The desire and anxiety to traverse, conquer and explore them is often uncontrollable and irrepressible once you move into the wilds of Himachal Pradesh.

The Atal Bihari Vajpayee Institute of Mountaineering and Allied Sports, Manali

Mountaineering Institute, Manali, set up in 1961. The Atal Bihari Vajpayee Institute of Mountaineering and Allied Sports, Manali (ABVIMAS) today is the largest Adventure Sports training centre in the country. Spread over 20 acres of forested land on the banks of the river Beas, the Directorate can boast of having a hostel that can accommodate 260 people at a time, a dining hall that can cater to more than 200 people at once and an auditorium that has a

seating capacity of 680 people. It also has an up to date library, museum and lecture halls. All this is located on this beautiful campus. Apart from this the Directorate has various adventure training centers all over Himachal. The Atal Bihari Vajpayee Institute of Mountaineering and Allied Sports (ABVIMAS) has nine sub centers all over the State and so far more than 40,000 people have been trained.

This Directorate has played a very major role in inculcating the spirit of Adventure amongst the youth in the country and tourism promotion of Adventure Tourism in the State. Almost all tour operators and this Institute has initially trained guides in the State and majority of them in Delhi. The Institute is contributing towards the protection of Himalayan environs.

For the more adventurous, peaks of the GHNP offer challenging playground for expeditions. With an average altitude of 4000 to 6000 meters, these peaks are still unclimbed waiting for the first steps of the mountaineers. ABVIMAS welcomes you to Western Himalayas, offers excellent mountaineering peaks from beginners to the technically proficient. Mountaineering, an experience and education provides for an awakening and awareness of the splendid diversity that nature has to offer to us. Mountaineering inspires a man to attain that elusive peak with in himself, but it also requires exhaustive planning, big budgeting, specializes equipment, technical guidance and expertise on mountain slopes. Bonhomie, camaraderie, esprit de crops and team spirit is developed through mountaineering

To organise mountaineering courses, ABVIMAS is the most ideal location for mountaineering training in the Indian Himalayas. Natural rock faces are available adjacent to the Institute complex and the glacier is located at 12,000 feet altitude which is very low from Himalayan standards. It only takes half a day (one hour by road plus two hours by trekking) to reach base camp from where ice and snow craft training is carried out. At the end of the course trainees are made to attempt a peak between 5500 meters to 6000 meters (17,000 ft to 19,000 ft). Since glacier is available at lower altitude and less time is required for trekking and acclimatization, it is possible to complete the basic mountaineering course syllabus in 26 days where as the course duration is about 30 days in other Mountaineering Institutes. Availability of glacier at lower altitude means trainees are in better physical conditions while undergoing training and half a day to reach Base Camp from Manali means maximum utilization of time to learn snow and ice craft. Clothing is issued to the trainees and training is organised by the qualified instructors. All the camps are in communication through walkie talkies with the Manali headquarters

The popular peaks in Himachal for climbing are Deo Tibba, Hanuman Tibba, Moulkila and Indrasan. Among the easier ones are Sitidhar and Patalsu in the Manali region. Besides Manali, adventure courses are being conducted at Dharamshala, Bharmaur and Jispa by the regional Mountaineering Institutes. Patalsu is particularly popular with rock climbing enthusiasts. Manali and Bharmaur are two popular areas for rock- climbing.

In the past years, Himachal Pradesh has gained popularity in organising trekking tours. There are easy routes in the Lush green wilds of Dhundi and Beas kund near Manali, also there is the Khajjiar Dalhousie trek which is rather popular in Chamba district. For tough trekkers with a strong pair of legs Chandratal (lake of moon) with its clear emerald water offers a magnificent view of the Moulkila (silver fortress) range is most suitable. From here one can move on to the *'Bara Shigri'* glacier or towards *'Baralacha'*, to where the roads from Leh, Zanskar, Spiti and Lahaul meet. The area around Manimashesh lake in Chamba district is also a popular one for trekkers. In Dalhousie there are short walks to Bakrota, Jandri Ghat, Panjpulla and Baloon. Dharamshala is an excellent base for both short and long treks, such as to Chamba via Kuarsi and Bharmaur. In the Palampur, famous trekking route is Palampur or Baijnath to Manali via Bara Banghal.

Himachal does offer ample opportunities for winter sports. The Mountaineering Institute at Manali oragnises *Ski* courses from January onwards. While HPTDC holds similar courses from January at Narkanda. There is also a winter carnival at Manali from 10th-13th February. Apart from cultural evenings, the high points of this carnival is the Ski competition held at the Solang Nallah, 10 km. from Manali. There is nice opportunity for open air skating rink in Shimla which offers fun in plenty with minimum charges. From speeding on Ski slopes to experience the sheer delight of hang gliding over towering mountains is the story of adventure sports in Himachal. Kangra valley provides excellent hang gliding opportunities from the cliffs of the Dhauladhars. Annual International Hang-Gliding Competitions are organised at Billing. In 1985 National Hang Gliding rally was held here. Since then every year International level hang gliding competition are held here.

ABVIMAS AND ECOTOURISM

Today many different types and definitions of ecotourism exist, however The International Ecotourism Society (IETS) give the following definition which has been widely accepted: *"responsible travel to natural areas that conserves the environment and improves the well-being of local people."* This means that travelers must think and act responsibly in all aspects of their holiday experience in order to minimise their impacts on the environment and local community. In addition, ecotour companies must hold principles and practices that seek to either preserve or conserve the environment and wildlife whilst protecting and empowering the local people. The following principles should be followed by everyone who implements and participates in ecotourism activities:

:: Minimize impact
:: Build environmental and cultural awareness and respect
:: Provide positive experiences for both visitors and hosts
:: Provide direct financial benefits for conservation
:: Provide financial benefits and empowerment for local people

:: Raise sensitivity to host countries' political, environmental, and social climate

:: Support international human rights and labour agreements

Further Ecotourism Activities being promoted by ABVIMAS

AGRO-TOURISM: This concept is a direct expansion of ecotourism, which encourages visitors to experience agricultural life at first hand. This type of tourism is gathering strong support from small communities as rural people have realised the benefits of sustainable development brought about by similar forms of *"green tourism"*. Visitors have the opportunity to work in the fields alongside real farmers and wade knee-deep in the sea with fishermen hauling in their nets.

COMMUNITY BASED TOURISM: The aims are to enable participation from the local community in the development and operations of tourism with their consent and support. Another important feature is that a reasonable share of the revenues are enjoyed by the community. This type of tourism also maintains and respects the local culture, heritage and traditions. Often, community-based tourism actually reinforces and sometimes rescues these. Community-based tourism also implies respect and concern for the natural heritage, particularly where the environment is one of the attractions.

NATURE TOURISM: This interlinks with ecotourism however it concentrates more on enjoying and respecting the wildlife and the environment without the educational element present in ecotourism.

PRO-POOR TOURISM: This type of tourism is set up in developing countries as a means to improve the local economy for local people. It enhances the linkages between tourism businesses and poor people, so that poverty is reduced and poor people are able to participate more effectively in tourism development. The aims of pro-poor ranges from increasing local employment to involving local people in the decision making process. Any type of company can be involved such as a small lodge or a tour operator. The most important factor is not the type of company or the type of tourism, but that poor people receive an increase in the net benefits from tourism.

Nature has always attracted human beings for various purposes. As our lives grow more and more hectic, warm winds usher in the summer holiday season, daydreams inevitably turn to vacation scenes. Whether it be to isolated beaches, tall mountain peaks, or the bright lights of a big city, the idea of leaving everyday life behind and "getting away from it all" is a siren's song more and more of us find irresistible. With bags packed and tickets purchased we are travelling to the far corners of the world, making tourism the world's fastest growing industry. And then we are introduced to the word "Eco".

The buzzword of the major industries of the world is "Eco". We have ecofriendly products, Eco Tourism, Eco camps, Eco Travel; Eco societies anything to do with the environment is a hot topic in the twenty first century.

You will find various companies claiming to be Ecotour operators, without even realizing the meaning of the word ecotourism. And as the pressures of urban living increase more of these intrepid travellers are seeking pristine natural and cultural sites. The number of visitors to national parks and protected areas and to rural communities continues to rise. And while nature or "eco" tourism is generally considered to have a lower impact than mass tourism - requiring less infrastructure and development - even small scale use can damage the natural resources which attract tourists in the first place. But what is the word Eco means with Simply defined Ecotourism is travel to relatively undisturbed places for the purpose of enjoying natural surroundings. Ecotourism can be also defined as Responsible travel to natural areas, which conserves the environment and sustains the livelihood of local people.

Activities included in a tour that are designed to entertain clients and are coordinated by a professional guide or interpreter. Over 80 activities have been listed for ecotourism, such as bird watching, hiking, diving, kayaking, participating in cultural events, photography, and mountaineering.

For those interested in water sports the Chandrabhaga together with the Satluj and the Beas are ideal for river rafting.

RIVER RAFTING: White water rafting is an exciting sport for those who are adventurously inclined and are reasonably fit. It is one of the most inviting and attractive water sports which is very popular in Europe and America. White water rafting is a technique of river running which is done in the inflated rubber boats of different types. In the modern era the white water pneumatic rafts are specially made from base fabrics like nylon which provides material strength and is coated with either hypalon or neoprene to give rigidity and abrasion to the raft. These are specially designed to take the severest adverse conditions of the raft. These are specially designed to take the severest adverse conditions of the fast current and boulders in the water. There are three different modes of rafting. Centre mount oar raft is propelled by one man. In paddle raft water paddles are used and is controlled by the command of a guide or leader. In a mix of oar and paddle raft the leader or guide maneuvers with oars and the other members provide power using the paddles.

The Beas river in Kullu valley provides an excellent opportunity to the visitors during May and June. About 14 km. stretch of the Beas down stream from 'Kullu to Jhiri' provides an opportunity for the lovers of this white water sport to taste, feel and enjoy the thrill of rafting, the challenging and continuous rapids. The 90 minute journey from Shamsi (Kullu) to Jhiri makes the participants a fully satisfied lot. All the leading tour operators in Manali and Kullu are actively engaged in conducting the package of river rafting. The Himachal Pradesh Government is laying great emphasis to promote white water rafting in the Satluj at Tattapani and Rampur and river Bhaga at Jispa (Lahaul and Spiti). With the construction of Kol dam, the Tattapani sort of river rafting has submerged under water, but Keeping in view the increasing interest of the visitors in river rafting the H.P. government has set up state level and district

level rescue and safety committees in adventure sports water sports, aero sports and trekking in Himachal Pradesh. The state-level committee is headed by the Chief Secretary as chairman and other 18 heads of different departments as members Director. Tourism, as its member secretary. The district-level committee is headed by the Deputy Commissioner as chairman and other 13 district-level officers of different departments are members and Divisional Tourism Development Officer as its member secretary.

SOME OF THE POPULAR TREKS IN HIMACHAL PRADESH

—Shimla-Churdhar (via Rohru, Ranahat, Hripurdhar)
—Shimla to Churdhar via Fagu, Neripul, Pul Bahal)
—Tattapani (via Tara Devi and Chail)
—Shimla to Shali Peak
—Shimla to Rohru (via Hatkoti)
—Shimla to Mandi (via Tattapani)
—Shimla to Manali (via Jalori Pass)
—Shimla to Manali (via Bashleo Pass)
—Shimla to Delhi (via Jubbal, Mussoorie)
—Kulu-Manali
—Manali to Around Three Sacred Lakes
—Manali to Kalath (via Thanpari Tibba)
—Trek Four Passes and Two Valleys From Manali
—Manali to Leh (via Shingola and Padam)
—Manali to Bhrigu Lake
—Hanuman Tibba Circuit
—Manali to Bhanara
—Manali to Manikaran
—Manali to Shimla (Trekking Spiti Valley)
—Manali to Udaipur (via Gompa Trail)
—Chamba-Dalhousie
—Dalhousie to Manali (Over Sach Pass)
—Dalhousie to Jammu (Through Bhandal Valley)
—Chamba to Mani Mahesh (Chhari Yatra)
—Nahan to Naura (Through Wild Life Sanctuary)
—Nahan to Shimla (via Churdhar, Neripul)
—Nahan to Mussoorie (Uttar Pradesh)
—Nahan to Shimla (via Chail)
—Kalpa to Karchham (Kinner Kailash Parikarama, 'Circuit')

Mountaineering is more than just "climbing and descending". It is an adventure that leads to self-realisation. Its significance lies in helping to know our potential and our limitations. It is the way to explore what lies beyond our limits. It also develops the quality of determination, courage, confidence,

alertness that results in improving our overall strength. Below we are giving details of some trekking routes.

Shimla-Churdhar (via Rohru, Ranahat, Haripurdhar)

From Shimla to Rohru by bus (6 hours), from Rohru to Chirgaon (15 km.) is a moderate ascending through villages along Pabbar river, then to Larot (15 km.) it is about 5 hours ascending, Larot to Dobra (20 km.) through Chanshil Ghati (4220 m) up and down to Kalapani via Gajani thach, Dodra to Kawar (18 km.) first to descend to Rupin river and afterwards to ascend via Pujarali village to kawar. From kawar trekking 18 km. route is rising to the thatch where camping is possible. From thereafter trekking further 18 km. the route towards Uttrakhand to Natwar is now descending. From Natwar to Ranahat is about 51 km. by bus, the route goes zigzag, up and down. Now is steady ascent through forests from Ranahat to Panog (18 km.) from there route ascends gradually (15 km.) to Haripurdhar.

Haripurdhar to Nauradhar (16 km.) the route is ascending through forests and crossing ridge. From Nauradhar to Churdhar is a steep ascent of 15 km. From its top one has the best view of Shimla, Gangetic plains, Chandigarh and Satluj river with great panorama of the Himalayan range. For return journey one is to descend (12 km.) through dense forests to Sarahan village (seat of Bijat Devta) or from Churdhar one has the alternative to descend to opposite side to Pul Bahal (20 km.) through a Wild Life Sanctuary enjoying panoramic dense forests. From Sarahan, bus would take about 7 hours to reach Shimla, while from Pul Bahal to Shimla or Solan both routes would take about 6 hours to reach.

Tattapani (via Tara Devi and Chail)

One has to start in Summer Hills, from Prospect Hill to descend to road head crossing the ridge from there it is a regular route to Tara Devi temple (16 km). Then to Sadhupul (18 k.,) trekker has to cross Nandpur and other villages. The stiff climb of 15 km. via Dochi village through forests reaches Sonaghat. From here Chail is 14 km. and out of this 8 km. is a steep climb. On the way one may visit Duna temple. Chail has a palace, the highest cricket pitch in the world and panoramic scenery. Then onwards to Mundaghat is (18 km.) steady climb through forests from there to Kufri top is 17 km. To reach Craignano (15 km.) one has to descend via Wild Flower Hall and Mashobra viewing the Himalayan ranges. From there one treks via Naldehra and Basantpur to Tattapani (18 km.) and back to Shimla (51 km.) travel by bus.

Shimla to Shali Peak

Travel by bus from Shimla to Durgapur (4 hours) from there to Devi-Dhar is a good route (15 km.) of loosing height. Then to Palyad (16 km.) one has to descend through villages. From Palyad to Tattapani (14 km.) has a descending route. From there to Gumma via Chaba is 16 km. where drinking water is purified and supplied to Shimla. As Chaba an old hydroelectric station is supplying electricity to Shimla. Further one has to trek (10 km.) from

Gumma to Shali Peak (2867 m). There is a Bhima Kali temple among dense forests. From Shali Peak to Craignano (20 km.) down to Naoti stream one may visit an amusement park. From there walk to Dhali (Shimla) via Naldehra.

Shimla to Mandi (via Tattapani)

Travel by bus up to Mashobra from there trek to Craignano and then down to Naldehra (19 km.) Now go via Basantpur and Suni across Satluj to Tattapani (20 km.) Tattapani to Alsindhi (16 km.) is a gradual ascending. From Alsihi to Chindi (17 km.) is ascending through forest and villages. The Nagi Devi temple of Mahog village can be visited. Now from Chindi to Jhungi (18 km.) one comes across Pangana the old capital of Suket State and Jhungi is surrounded by dense forests. Onward via Chauki through mixed forest and villages one reaches Jhiri (22 km.). From Jhiri to Sundernagar (20 km.) via Bhojpur is a descending route. From there one can take bus to Mandi.

Manali to Kalath (via Thanpari Tibba)

From Manali to Lamadugh (8 km.) the forest-path is thick especially after crossing devi temple. Next climbing (2 hours) one enjoys the scenery of Indrasan and Deo Tibba peaks. But from Lamadugh to Ranisui (6 km.) The trek is through a steep ridge below Thanpair Tibba (400 km.) From there one can have the view of Manali town and Kullu Valley. Next trek to Bhogi-Thach (8 km.). From Ranisui one route goes to Bara Bhangal and another goes towards Kullu. There is good scenery around. From Bhogi-Thach to Kalath (16 km.) is a descending and level route which leads to famous Kalath hot water spring. Now return to Manali in bus.

Trek Four Passes and Two Valleys From Manali

From Manali walk via Prini, Hamta villages to Sethan (12 km.). From Sethan to Chhika (12 km.) enthral walk is known for wild flowers from *Bhalu ka Ghera* up to Chhika One finds lot of caves and good rocks on the way. From Chhika to Chhatru (12 km.) on the way from Hamta Pass (4268 m) the view of Deo Tibba, Indra Killa and Inderasan is superb. But trekkers will have to be careful of the streams while they descend to Chhatru and cross Chandra river. From Chhatru to Chhota Dara (17 km.) the walk is along the right bank of Chandra river and opposite to Chhota Shigri glacier with mountains in view. From there to Batal (17 km.) one has to walk along the river opposite to Bara Shigri glacier and enjoys wonderful view of high peaks. From Batal go to Chandertal (4270 m) (16 km.) climbing Kunzum La (4558 m) and enjoy glimpses of Valley and descend to Chandertal. It is the best place to rest, enjoy the nature and relax. Across Chandra river one would see glaciers and peak of Mulkila and other ranges, besides view of Snow-clapped high peaks of Bara Shigri.

Chandertal is a big lake with spotless clear water. It is also known as the moon lake. From there to Tokpo Gongma (12 km.) one enjoys throughout a

good view of the mountain peaks and glaciers. Tokpo means river and Gongama means big in Spiti. From Tokpo Gongma to Tokpo Yongma (10 km.) the river has to be crossed early morning when the water is low or find some snow bridge up near the source. Yongma means small. From there to Baralacha La (4883 m) (10 km.) the 8 km. long interesting Pass gives rise to three important rivers, viz; Chandra, Bhaga and Yunan. Trekkers can halt here climbing small peaks exploring the area. From Baralacha to Zingzingbar (4270 m) (18 km.) one has to trek via Surajtal, the source of Bhaga river and descending along Bhaga through zigzag ways. From there to Darcha (3360 m) (20 km.) one goes via Patsao, a big trading and exchange place between the traders of India and Tibet during olden times. From Darcha one route leads to leh over shingola through the Zanskar valley. From Dorcha have a bus (10 hours) to Manali via Keylong over Rohtang Pass.

Manali to Leh (via Shingola and Padam)

Over to Rohtang pass (3679 m) is the gateway to Pangi, Lahaul, Spiti and Zanskar Valleys. It would take 10 hours from Manali to Darcha. From Durcha to Chhalang Tokpo (5 hours) trek is through Chhika and Rerik villages to Chhalang Tokpo. From there to Zanskar Sumdo (6 hours) is a gradual climb and good view of mountains. One can camp at Ramiak also. From Zanskar Sumbo to Chhumik Nakpo (6 hours) is a walk along the stream flowing from Shingo La. However, streams in Himalayan region are to be crossed carefully. From there to Lokong (6 hours) one has to cross Singo (5100 m). Weak and sick can ride a horse to cross the Pass.

Lakong to Kargyok takes about 6 hours to reach. Kargyok is the first village of Zanskar region. From this village to Kuru (Teta) is 6 hours walking though the Buddhist region. From there to Kalbok would take again 6 hours. Trek to Fuktal monastery built under huge cave and return to camp. Kalbok to Mune is 6 hours journey. All passes should be crossed as per the direction of experts.

Next follows Mune to Padam a 7 hours trek. Padam is the sub-Divisional Headquarters of Kargil. On the way visit Burdan Gompa which is one of the oldest in this region. Padam to Karsha takes 6 hours. Here is good view of the Valley and visit Karsha Gompa. It is the biggest monastery of Yellow sect in Zanskar. Karsha to Pishu (6 hours) is going along the Zangskar river and the Togndе Gompa may be visited. Pishu to Honumil is 7 hours trek. From there to Snertse over a steep Parfi La (3950 m) takes 7 hours to walk.

From Snertse to Lingshet takes 7 hours over Hanum La (5060 m) from there to Marling over another Singi La (5060 m) takes 7 hours to reach. From Marling to Photoksar over Boumitse La (4490 m) takes another 7 hours to reach. From there to Hanupatta over Sirsir La (4900 m) is 6 hours journey. From Hanupatta to Wanla over the Gayalpo La (3900 m) takes 6 hours to reach. Wanla to Lamayuru takes 4 hours. Lamayuru has a big Gompa and it is the oldest monastery in Ladakh and has a big library of Buddhist literature. From here Leh is 142 km. motorable.

Manali to Bhanara

It covers Hamta Pass (4268 m). Manali to Bhalu Ka Gehra (12 km.) to a Camp (10 km.) to Chhika (12 km.) to Sarotu (12 km.) to Bhanara (16 km.). From there one can go to Manali either via Jagatsukh or via Prini.

Manali to Manikaran

This trek starts from Manali to Naggar (21 km.) to Mati Kochhar (16 km.) to Jari (20 km.) to Malana (10 km.) to Rashol (12 km.) to Manikaran (12 km.) to Manali back (96 km.) bus.

Manali to Shimla (trekking Spiti Valley)

This trek starts by bus from Manali to Batal (6 hours) to Losar (4080 m) (22 km.). It takes only 2 hours for Kunzum then next to Kiato (16 km.) known for its shale, to Hul (4000 m) (18 km.) via Pangmo to Kaza (3800 m) (18 km.) to Dhankar Gompa (25 km.) to Tabo (22 km.) (3050 m) to Hurling (21 km.) to Sumbo (22 km.). From Sumbo to Shimla would take 2 days by bus via Chango, Khab, Pooh, Rampur and Narkanda.

Manali to Udaipur (via Gompa Trail)

Trek 2 km. from Manali to Aleo then to Khoksar (3140 m) (75 km.) by bus. Khoksar is the first village in Lahaul Valley across Rohtang Pass from there trek to (15 km.) to Gondla (14 km.) to Guru Ghantal (12 km.) situated on the hill top near Tandi to Billing (8 km.) tucked in the rocks above the village about 3 km. short of Keylong to Jispa (20 km.) across Bhaga river in Darcha village visit Gemur Gompa and Yarji and return to Jispa, then trek to Otang (56 km.) by bus. It is situated in Chenab Valley in Jhalma village. One enters this Valley from Tandi. Travel by bus (45 km.) from Otang to Trilokinath. Here both Buddhist and Hindu worship the six headed image of Bodhisattva Avalokiteshvara. Trek further (5 km.) from Trilokinath to Udaipur and return to Manali by motor.

Dalhousie to Manali (over Sach Pass)

It is a wonderful trekking from Dalhousie to Khajjiar (20 km.) to Chamba (18 km.) to Taraila (84 km.) by bus to Satrundi (16 km.) beautiful wild flower meadow trek, then over the Sach Pass to Bindrabani (18 km.) to Kilar (16 km.) the Headquarters of Pangi from there one route goes to Kishtwar and another to Manali, then trek to Sach village (15 km.) known for famous Mindhal temple then to Purthi (20 km.) to Raoli (19 km.) a good walking along the Chenab river to Tandi (16 km.) to Udaipur (2473 m) (4 hours) by bus then finally to Manali (9 hours) by bus via Rohtang Pass. Besides, there are several other trekking routes between Dalhousie and Manali such as over Marhu Pass (4365) Cheni Pass (4423 m), over Chobia Pass (4966 m), over Kalicho Pass (4803 m) over Kugti Pass (5040 m), through Bara Bhangal and over Drati Pass (4694 m).

Dalhousie to Jammu (through Bhandal Valley)

From Dalhousie to Khajjiar (1951 m) (20 km.) to Chamba (18 km.) to

Pukhri (14 km.) to Sundla (21 km.) to Bhandal (22 km.) the route ascends to Saluni and then down to Pala. the old route from Sundla goes along right bank of Syul to Saluni and descends to Kilar bridge rejoining the new route at Pala. From Bhandal to Longera (16 km.) route is good then trek to Bhaderwah (22 km.) there is Rest House facility available at Langera and Bhaderwah, to Jaura (25 km.) to Jangalwar (18 km.) to Kandani (20 km.) along the bank of Chenab river to Kishtwar (27 km.) a level and good route to Jammu (5 hours) by bus.

Bir-Billing - Panahartu - Thamsar pass Nayagram Trekking route: Bara Bhangal is a fairly large village located in the depths of the Ravi valley in the extreme north of Kangra district, but it is also the name given to the entire area between the Manimahesh and Dhaluladhar ranges. It is surrounded on three sides by high mountain passes Thamsar Pass on the south, Khalihani Pass on the east and Chobu Pass on the north. From the west it can be accessed along the gorge of the Ravi which flows in an east-west alignment, cutting the valley into two. The most popular trek is over the Thamsar (17,500 feet)

DAY ONE: The road head is at Bir-Billing, off the Pathankot- Mandi road, about 30 kms from Baijnath and famous as the venue for para-gliding events. There is a very good forest rest house at Bir to serve as base-camp. One treks north from Billing for eight kms through thick oak and rhododendron forests and enters the small valley of the river Uhl that flows west to east.

The track runs west here and goes up along the Uhl along its right bank for six kms, till it reaches the small village of Rajagunda at 8,000 feet. This is the last habitation before Bara Bhangal. One can camp the night at a small forest hut which has two rooms, a toilet and even a basic kitchen.

DAY TWO : It is 16 kms to the next day's camping site at Panahartu (12,000 feet). The first seven kms is a gentle ascent through dense deodar forests to a place called Placheck (9,000 feet), where the Uhl is crossed over a wooden bridge that gets washed away every year. The river abruptly turns northwards here and the valley narrows into a canyon: the landscape becomes grimmer, trees give way to shrubs, the wind acquires an icy edge, and even the sunlight peeps in with difficulty.

The climb becomes steeper and after about 9 kms one crosses back to the right bank of the Uhl over a permanent ice-bridge to a broad grassy ledge which is Panahartu. We are here in the shadow of the mighty Thamsar: three small streams flow from its glaciers to form the Uhl. There are no structures here and no firewood: one has to have tents and carry all provisions.

DAY THREE : It is four hours of strenuous climbing to the Thamsar Pass, and the weather can change in half an hour, so it is best to begin the ascent at 5:00 or 6:00 a.m. One climbs two steep ridges to a flat patch covered with moraine and pockets of grass: this is Bherpal Got (Shepherds' Ground) because this is where the Shepherds camp on their way to and from Bara Bhangal. To

the right is a small ice-field from which a small stream meanders down to the Uhl. On a clear day one can see the pass from here, about a kilometer away. It is an amazing sight and unlike any pass is straight ahead is a unique geological formation: a rampart, half a kilometer long in an east-west alignment, of crenallated crags looking exactly like the ruins of an ancient fort. The pass is one of the 'V's' between the crags, festooned with the usual prayer flags and stone cairns. The view to the north is awesome: a succession of massive glaciers and snowfields as far as the eye can see.

A huge glacier comes right up on the northern aspect and one has to begin the descent on it. This is about a kilometre wide though fortunately, has no crevasses; it ends in a big lake that is about two kilometers long and from which emerges a substantial torrent of water called the Thamsar Nallah; this goes down to meet the river Ravi and the track to Bara Bhangal follows the course of this stream.

Skirting the western edge of the lake and negotiating treacherous rockfall for about 6 kms, we came to a broad pasture known as Merhi (14,000 feet). In summer this is the first camping site for villagers coming from Bara Bangal because on the second day one can make an early start and reach Rajagunda by evening. It is too cold in September and one can push on for another 8 kms to Udeg (12,000 feet) a less desolate site where a trader had put up a hut and where one could have hot food and spend the night.

DAY FOUR: The dawn is magnificent blinding bright and cold and to the North we can see the majestic peaks of the Manimahesh and Kailash Parbat ranges. It is only 5 kms over a fairly steep track to the Ravi which meets the track at right angles, flowing east to west. To the right of the intersection the Kahani stream also pours its waters into the Ravi, coming from the Khalihani pass to the east, beyond which lies Kullu district. On the other side of the Ravi and accessed by an old wooden bridge, is the village of Bara Bhangal, consisting of about 60 houses. It has two schools, a dispensary, a forest guard and a 'patwari'. In 2004 the village was electrified when a micro hydro project on an adjacent stream was commissioned.

The trekker can stay in a lovely two-roomed forest hut situated in the midst of a thick grove of cedars. The villagers are basically shepherds (they own an astounding 160,000 head of sheep) and all except the very young, old or infirm migrate to Baijnath or Bir in the winters. Agriculture is at a sustenance level only as the cost of sending anything out on mule-head is prohibitive. This is an area that has tremendous potential. It is rich in valuable medicinal plants and spices such as 'kala zeera', and its fantastic variety of flora, untouched by any chemicals can produce the best of organic honey.

DAY FIVE: The exit from Bara Bhangal is westwards, within the gorge of the Ravi. The track clings to the right bank, climbing and descending like a writhing snake, the first 5 kms to Bhalaid Nallah (the border with Chamba and Bharmaur), is through a big green 'thatch' that tapers down to a goat track. One will go down four successive ridges and then comes to a rock face

where the track just disappeared! About thirty meters of bare rock perched two thousand feet sheer above the Ravi, has to be negotiated by wedging fingers and cracks into the wall and slithering sideways. If somebody falls from here and one or two do every year nobody even bothers to look for the body! This patch is just before Khanar, 18 kms from Bara Bhangal. Khanar is a small lonely village of 20 houses.

From here on, the track becomes much better and after 7 kms comes to Dardi, a much bigger and prosperous village since it is connected to the road head by a mule track. Some people have started planting apples now that the fruit can be taken out by mules. Now the track starts descending steeply through rich grassland till about a hundred feet above the Ravi, and after another 8 kms is Khurdu, a motley huddle of three shacks owned by a local which serves as store, shop and guest house.

DAY SIX: This is the last and easiest day of the trek. One can get up late as it is only 8 kms to Nayagram over a broad and gently descending track to Sadarsu where one crosses over to the left bank of the Ravi over a solid steel bridge. There is a small temple next to it, in memory of a little girl who died in an accident when the bridge was being built:

local myth has it the spirit of the girl would not let the work proceed (accidents kept happening) until the temple was built. Thirty minutes of climb through thick deodar forests brings one to Nayagram, the last village in the Holi valley. From here one can take a bus to Holi (12 kms) which has a PWD and a Forest rest house. From here one can drive to either the sub-divisional headquarters at Bharmaur (35 kms) or on to the district headquarters at Chamba (87 kms)

Nahan to Naura (Through Wild Life Sanctuary)

Nahan to Renuka (45 km.) go by bus to Sangrah (20 km.) ascending through forests to Haripurdhar (25 m.) to Churdhar (3647 m) (16 km.) steep climbing then descend to Naura (16 km.) down through forests.

Nahan to Mussorrie (Uttrakhand)

Nahan to Satuan (65 km.) by bus to Kafota (16 km.) a trek of steady climbing to Shillai (18 km.) to Meenus (20 km.) to Arakot (17 km.) to Tiuni (16 km.) to Kathiyan (18 km.) to Chakrata (15 km.) steady climbing entering the Uttrakhand area, to Pakri (15 km.) to Naughat (15 km.) to Lakha war (14 km.) to Mussorrie (2006 m) (20 km.) a good trek with beautiful scenery.

Kalpa to Karchham (Kinner Kailash Parikarama, 'Circuit')

The Kinner Kailash has religious significance for a huge "Rock Lingam" of Kailashpati Mahadev. The devotees usually use three different routes for its full Parikarama. Therefore, the exact heights and distances of stages are different. The Parikarama begins from Kalpa via Tirung Valley and back Tokkalpa via Sangla Valley.

However, there is road up to Thangi from where the actual trekking starts.

Kalpa to Thangi (50 km.) by bus to Lambar (12 km.) to Charang (12 km.) to Chitkul (3450 m) (14 km.) over Charang Ghati (5242 m) gradual climbing to the Pass, to Rakchham (12 km.) to Sangla (14 km.) to Karchham (17 km.) to Kalpa (27 km.) by bus.

or

Shong-Thang to Ribba (24 km.) to Thangi (22 km.) to Charang (23 km.) to Lalanti (18 km.) to Chitkul (20 km.) to Sangia (26 km.) (Jeepable road and Rest House available), to Karchham (17 km.) to Kalpa (27 km.) by bus.

or

Kalpa to Thangi (50 km.) by bus to Kunnu (3375 m) (20 km.) to Lalanit (20 km.) to Chitkul (20 km.) to Sangla (20 km.) to Kalpa (20 km.) via Mehbar across Baspa stream.

POOR PLANNING HIT TOURISM: Tourism, which plays an important role in the economy of the state, is now facing rough weather, thanks to the apathy of the state government which has not bothered to develop the tourist places in a planned manner. Haphazard construction of hotels has given rise to various problem such as disposal like garbage, contamination of water and large-scale soil erosion. The tourist traffic to these stations have gone down in the past many years. Although the state government has time and again announced to come out with a new master plan for the development of tourism, the decision has remained in files only.

It is a sad state of affairs that little attention was paid to the development of tourism by the BJP and Congress governments in the past. Tall promises were made to provide amenities to the tourists visiting the state, but nothing was done. What welcome the tourists in the state are with bumpy, narrow roads, costly hotels, poor parking facilities and heavy taxes (entry tax and toll tax). The construction of roads without adequate soil conservation measures, unplanned construction of big buildings and reckless felling of trees have aggravated the situation.

Tourism and environment are intrinsically related to each other. The development and expansion of tourism depend on clean environment. But the Himachal Pradesh Government has forgotten this important factor. The setting up of big cement plants and hydroelectric projects have adversely hit the tourism industry here. Unrestrained commercialisation of tourism in this state has eroded the cost line. A large number of tourists, both international and domestic, are attracted to natural parks and sanctuaries which offer them glimpses of wildlife. Mountains, jungles. rivers, lakes also allow for the new-fangled ***"adventure tourism"***– hiking, skiing and other similar activities. But deforestation, large-scale soil erosion and unscientific mining have further put a question- mark on the future of tourism.

Forests in the state are not regenerating. Therefore, the growing stocks have dwindled and most of the forests have been encroached upon and destroyed. Careless constructions have eroded the land so permanently that

trees cannot grow there again. As a result, a number of roads have become prone to landslides, causing great inconvenience to the tourists. The *Chandigarh-Bilaspur* and *Kullu-Manali* highways are the latest examples where landslides have damaged the roads. The state government should come out with detailed study regarding carrying capacity of any tourist location and only then it should allow construction of hotels or resorts. In future the government must opt for eco-friendly industries, keeping in view the vast potential of tourism in this region.

The year 1991 was observed as the International year of Tourism. September 27, is observed as Tourism day. In the present situation. Himachal should try to attract all internal and external tourists by exploring new avenues and centres for visiting. According to an estimate out of 12 lakh foreign visitors who come to India every year, Himachal gets only about 20,000 foreigners. This number is almost negligible.

In 1999, 44.43 lakh tourists visited Himachal, out of these 91 thousand were foreigners. In 2002, 51.04 lakh tourists came to Himachal, out of these 1.33 lakh were foreigners. In 2008 in all 93.40 tourists visited Himachal out of these 3.77 lakh were foreigners. In the successive years the growth in tourist inflow continued unabated. The terrorism in Jammu and Kashmir has also contributed to the prosperity of tourism sector in Himachal Pradesh. In 2010, 132.66 lakh tourists visited Himachal Pradesh, out of these 4.54 lakh were foreigners. Some of the areas, where a fresh look is required which can give impetus to tourism industry in Himachal Pradesh are:

- complete and correct information of the tourist resorts.
- wide and different measures for the promotion and publicity.
- good transportation, catering and restaurant, entertainment and recreational facilities.
- publication and distribution of various kinds of tourist literature of high physical quality is perhaps one of the surest ways of reaching the masses.
- conducting and participation in Industrial, cultural and tourism fairs is an effective promotional method.
- hospitality tours for travel writers and travel agents is helpful in projecting the image of a destination.
- effective law and order machinery, not to allow the antisocial elements to disturb the congenial atmosphere.
- production of feature films on tourist resorts and celebration of annual tourism week.
- opening of information centres at district, state, national and International level.
- recruitment of linguistic guides, possessing high degree of discipline.
- provision for air-conditioned hotels/buses; coaches etc. and improvement in sanitary conditions at places like bus stands, railway stations, public roads, running trains etc.

personal safety to the tourists from being robbed, cheated, coerced etc.

Tourism Industry in Himachal Pradesh has wide scope to flourish and provide a new direction to the economy of the state. Tourism is only next to hydroelectric power potential in the state with positive scope in maintaining its unpolluted atmosphere. In the recent past introduction of tent houses colony is a right step to ensure people's participation in this field. Introduction of railways, at least in ten districts of the Pardesh out of twelve will undoubtedly make it the *'Switzerland of India'*. Tourism industry has a vast scope in Himachal Pradesh than any other state of Indian Union. Liberal allocation of funds by Planning Commission can help the Pradesh to occupy its due place in the tourist map. Natural beauty of the state is an open invitation to the people of varied tastes and colours. It is also said that *one who goes to the hills, goes to his mother, bounteous and nourishing one.*

Himachal Pradesh Tourism Development Corporation Ltd. (HPTDC)

Tourism occupies an important place in the economy of Himachal Pradesh. The state abounds in tourism and recreational resources, such as fine landscapes, archaeological remains, temples, indigenous crafts and folk culture. The Himachal Pradesh Tourism Development Corporation Limited, was formed on 1st September, 1972 by converting the department of tourism into a corporation with a view to exploit the tourism potential of the state with headquarters at Shimla. It was setup as an umbrella organization to develop tourism infrastructure at a time when private initiative in this area was not forthcoming. The liabilities and assets of the tourism department were also transferred to the corporation. The corporation was established with the purpose of running hotels and catering to establishments in the state. The main objective of the corporation are :

(i) to establish, promote, develop, execute, operate and carry on the projects, schemes, business and the activities which are likely to facilities or accelerate the development of tourism in the Pradesh.

(ii) To construct, run and maintain tourist information bureau and centres in the state of Himachal Pradesh and within the country.

(iii) To give stress on publicity through the sale of materials of tourist interests, books, magazines, periodicals, pamphlets, bills, posters, pictures, post cards and cinematograph films.

(iv) To provide boarding, lodging and transport facilities at the expenses of the company to travel agents, airline representatives and other similar agencies promoting tourist traffic to Himachal Pradesh.

(v) The main emphasis of the corporation is to provides tourist accommodation at a reasonable tariff so that this suits the pockets of low and middle class tourists.

(vi) The corporation has made Himachal Pradesh a holiday and adventure

sports destination not only within the country but in many foreign countries through sustained campaigns and propaganda.

(vii) Tourism corporation has highlighted the rich cultural and anthropological heritage of Himachal Pradesh. For this purpose castle hotels at Naggar in Kullu valley provides a striking example towards promoting items such as musical instruments, old dresses, utensils, pottery and handicrafts.

(viii) The corporation runs its own charted buses. These buses are air-conditioned, luxury and deluxe coaches. It has also a number of cars and jeeps which are run as taxis. The corporation organizes tours from Shimla to various places of tourist interest in and around Shimla, Manali to Rohtang Pass, Chamba, Khajjiar, Dharamshala, Dalhousie, Chamunda, Chail, Delhi and Chandigarh.

(ix) The corporation has contributed considerably to the development of tourism by organizing tours to tribal areas, developing adventure sports and other activities. It also organizes golf competitions at Naldehra, ski courses for the tourists, who wish to take part in this competition. Tourist exhibition are organized to attract the attention towards the rich cultural heritage of the state. Himachal Pradesh festivals are also organized in foreign countries.

19

ECONOMY OF HIMACHAL PRADESH

"A successful economic development strategy must focus on improving the skills of the area's work force, reducing the cost of doing business and making available the resources business needs to compete and thrive in today's global economy."

-Rod Blagojevich

Himachal Pradesh is situated between 30° 22' 40" to 33° 12' 20" north latitudes and 75° 45' 55" to 79° 04' 20" east longitudes. The altitude in the Pradesh, a wholly mountainous region in the lap of Himalayas, ranges from 350 meters to 7000 meters above mean sea level. It is surrounded by Jammu and Kashmir on the north, Tibet on north east, Uttrakhand on east/south east, Haryana on south and Punjab on south west/west. As per study conducted by the Centre for Geo- Informatics, Research & Training of the Chaudhary Sarvan Kumar H.P. Agriculture University for estimating 3D area of the State by using modern Geo- IT tools, remote sensing and GIS, the 3 D area of the State comes to 86,384.77 sq. km. which is about 56 % more than the 2 D area of 55,673 sq. km.

Himachal Pradesh can be divided into three regions: - (i) The Shivalik ranges (the height from plains upto 915 meters); (ii) Colder Zone (the height upto 4500 meters); and (iii) the Axis and Crystalline core of the whole system (the height above 4500 meters but below 5500 meters). The climatic conditions, therefore, vary from the semi- tropical to semi-arctic. Physiographically, the State can be divided into five zones based on altitudes and moisture regime conditions. These vary from wet humid sub-temperate situation to dry temperate alpine high lands. Besides the seasonal variations, the climate of Himachal Pradesh varies at different altitudes. The average rainfall is 152 cms./ (60 inches). The highest rainfall occurs in Kangra district, at Dharamshala followed by Shimla district.

The economy of Himachal Pradesh is in the phase of big changes. It has already shed off some elements of backwardness. It has also acquired quite a few characteristics of developed economies. The natural and human resources of the Pradesh are the foundation of its economic development. In the years to come, it is projected to grow fast with much promise and possibilities.

The political history of modern Himachal Pradesh goes back to the period of 1948, when with the merger of 30 Shimla hill states, Himachal Pradesh

was reorganised as a Chief Commissioner province. The whole territory of the Pradesh before this was divided among various *Rajas, Ranas* and *Thakurs*. These small princely states had neither the resources nor the will to develop their areas. Land was scarce due to hilly terrain and moreover the best of it was with the rulers or their relations. The common peasants tilled tablecloth size terraced fields carved out of stony hillsides to eke out a precarious living. There were no industries to name, local needs were somehow met partially by local artisans. The people were extremely poor, steeped in superstitions and lacking in mobility due to absence of good means of transport and communications, mostly sticking to their ancestral occupations. *The unhelpful conditions bred in the people, a mood* of *resignation. They had not only lost hope but also the capacity to hope.*

The scrapping of old feudal order in 1948 and its replacement by a bureaucratic system did not automatically help in the economic growth of the area. The progress rate in the initial years of First Five Year plan was generally slow and incoherent. In 1951, *'democratic government'* was installed by making Himachal Pradesh a Part 'C' State. The First Plan was reshaped by popular Ministry to put more emphasis on the most desired sectors and involved more and more people in the process of economic and social development. A political change can be purposeful only if it is able to create an economic framework and social climate conducive to all round development of the people.

The Punjab hill areas of Kangra, Kullu, Lahaul-Spiti and Shimla, which were under the direct control of the British till Independence and from 1947 to 1966 with Punjab State, were also not given the requisite attention. The systematic evaluation of resources and their scientific exploitation started only after the formation of Himachal Pradesh as a full-fledged state in 1971 then that the people and the government of the Pradesh started making concerted efforts to improve economic condition of the people and so of state. The economy of Himachal Pradesh today is based on agriculture, animal husbandry, industries, forests, wild life, hydel power generation, mineral wealth, road and transport, horticulture tourism etc.

Climatically Himachal Pradesh is different from plain states in India. In the State, three seasons are found throughout the year such as *cold season* (October to February), *hot season* (March to June) and *rainy season* (July to September) in general, however, due to wide range in altitude, the climate of the state varies from sub-humid tropical (elevation 350-1000 m) in the southern low tracts, warm and temperate (elevation 1001-1,500 m), cool and temperate (elevation 1,501-2,500 m), and cold alpine and glacial (elevation 2,501-6,975 m) in the northern and eastern mountain ranges.

Temperature in Himachal Pradesh is lower than that in other states in the plain area in India. The range of minimum and maximum temperature is between 20.4° C and 38.6° C at all over the state.

The average annual rainfall of 55 meteorological stations ranges from

332 to 2606 mm. Besides less rainfall during hot season, the cold alpine and glacial areas have precipitation in the form of snow during cold season. It snows during winter down to an elevation of about 1500m. Rainfall except snowfall concentrates during season from July to September in most parts of the State. State has been divided into agro climatic zones/ agro-ecological zones which are given in the table No.1.

Land Reforms Legislations - Land Legislations

During the year, 1952 the Punjab Tenancy (Himachal Pradesh Amendment) Act, 1952 was enacted which envisaged a ceiling on rent not exceeding 1/4th of the produce, payable by the tenant to the landowner. Another act, i.e Himachal Pradesh Tenancy Rights and (Restoration) Act, 1952 was enacted to provide for restoration of land and the right of pre-emption to tenants. Under section 3 of the said Act, the tenant who has been ejected after 15th date of August, 1950 shall on application made by him within two years of the commencement of this Act to the prescribed authority and on his satisfying such authority that the applicant was not at the time of ejectment a tenant to whom the provision of section 41 of Punjab Tenancy as amended in its application to Himachal Pradesh by the Punjab Tenancy (H.P. Amendment) Act, 1952, could have applied, be restored to possession of such land on the same terms and conditions on which it was held by him at the time of ejectment. It was provided that the maximum rent payable by him on re-occupation of the land shall be subject to the provision of section 25 (A) of the Punjab Tenancy Act, 1887 as amended in its application to Himachal Pradesh by the Punjab Tenancy (Himachal Pradesh Amendment) Act, 1952.

Further that if the land has been given to another tenant on or after the fifteenth day of August, 1952 he shall be ejected there from and given *in lieu* of it *Nautor* land as prescribed.

Land Reforms Legislations - Right of Pre-emption

Under Section 4 of the Act:

A Tenant:-

1. Who has been in continuous occupation of Land comprised in his tenancy for a period exceeding three years on the date of the sale of the Land or foreclosure the right to redeem the land;

or

2. Who was ejected from his tenancy after the fifteenth day of August, 1950 and before the commencement of this Act on grounds other than those mentioned in section 41 of the Punjab tenancy Act amended in its application to Himachal Pradesh by Punjab Tenancy (Himachal Pradesh Amendment) Act and was in continuous occupation of the land comprised in his tenancy for a period exceeding three years on the date of his ejectment :

3. Who has been restored to his tenancy under the provision of this Act and whose period of continuous occupation of the land comprised in his ten-

ancy immediately before ejectment and immediately after restoration of his tenancy together exceeds 3 years shall, in preference to the rights of other preemptors as provided in the punjab pre-emption Act, 1913 as applied to Himachal Pradesh, be entitled to pre-empt the sale or fore-closer of the land in the manner prescribed in the Act within one year from the date of the sale or the foreclosure as the case may be;

The above was subject to the condition that no tenant referred to in this section shall be entitled to exercise any such right in respect of land or any portion thereof if he had sublet the land or portion, as the case may be, to any other person during any period of his continuous occupation, unless during that period the tenant was suffering from a legal disability or physical infirmity or, if a woman, was a widow or was unmarried.

Land Reforms Legislations - H.P. Abolition of Big Landed Estates and Land Reforms Act, 1953

The first major land reform legislation known as the Himachal Pradesh Abolition of Big Landed Estates and land Reforms Act 1953 was enacted which after receiving the assent of President came into force on 26th January, 1955 ; The Act governed the law relating to tenancies in agricultural lands and also contained provisions of land reforms of a far reaching importance. Under the Act, security of tenure to the tenants was ensured; Resumption of land by landowners was permitted for personal cultivation from a maximum area of 5 acres subject to further provision that no tenant would be evicted from more than 1/4th of the area held by him. This right could be exercised within one year from the commencement of the Act. These dates were later extended to March Ist, 1956 and September, 1956. The aforesaid law was challenged by the landowners in the court, which, ultimately resulted in survival of the law as *intra-vires* of the constitution in the year 1958. The right of resumption was somehow missed by the landowners.

The main provisions of the foregoing enactment were as follow:- All Tenants (other than sub-tenants) including occupancy tenants were entitled to get proprietary rights by marking an application to compensation Officer in payment of nominal compensation under section 11 of the *ibid Act.* Section 11 of the Act reads as follows:

RIGHT OF TENANT TO ACQUIRE INTERESTS OF LAND OWNER

1. Notwithstanding any law, custom or contract to the contrary a tenant other than a sub-tenant shall, on application made to the Compensation Officer at any time after the commencement of the act, be entitled to acquire, on payment of compensation, the right, title and interest of the landowner in the land of the tenancy held by him under the landowner.

Provided that a tenant not having a right of occupancy shall not be entitled to acquire the right, title and interest of the landowner in the land of the tenancy from which he is liable to ejectment under clause (d) or clause (f) or

clause (g) of Subsection (1) of section 54.

2. Nothing contained in subsection (1) shall apply to a landlord, if he had no other means of livelihood and is a minor, widow or a person suffering from physical of mental disability incapable of earning his livelihood. In the case of a minor, subsection (1) shall not apply during his minority and in other cases for his life time.

3. The application referred to in subsection (1) shall be made in writing to the Compensation Officer who shall thereupon determine the amount of compensation payable to the landowner in respect of the land in accordance with the provisions of section 12 and 13.

4. The tenant may pay the amount of compensation as determined by the compensation Officer under subsection (30 either in one lump-sum or in such number of installments not exceeding ten as may be determined by the Compensation Officer during a period not exceeding five years; and such Compensation or such installments of compensation shall be paid on such date or dates as may be fixed by the Compensation Officer in this behalf.

5. The amount of compensation or any instalment thereof shall be deposited by the tenant in a Government treasury and as soon as the compensation or the first instalment thereof has been deposited in the Government treasury, the Compensation Officer shall grant a certificate in the prescribed form declaring the tenant to be the landowner in respect of the land specified in the certificate.

6. On and from the date of the grant of the certificate under subsection (5) the tenant shall become the owner of the land comprised in the tenancy and the right, title and interest of the landowner in the said land shall determine.

7. An instalment of compensation, which is not paid on the date fixed by the Compensation Officer, shall together with interest thereon at the rate of two and half per cent per annum be recoverable as an arrier of land revenue.

8. Where compensation is paid in instalment the unpaid amount of compensation shall be a charge upon the land.

Amount Of Compensation

The amount of compensation payable by the tenants to acquire the rights, title and interest of the landowner in the land of tenancy was to be determined by the Compensation Officer in accordance with the provisions of the schedule under section 12 of the said Act." The schedule of Compensation is reproduced as follow:-

Besides compensation of the land, the tenants were liable to pay the value of any building standing on the land belonging to the land owners as assessed by the compensation Officer.

Vesting of Rights of Ownership in the Government

Under section 27 of the *ibid Act* the landowner who held land, the land revenue of which exceeded Rs.125/- per year, the right, title and interest of

such owner in such land were transferred and vested in the State Government free from all encumbrances.

Section 27 of the Act runs as follows:-

1. Notwithstanding anything contained in the foregoing provisions of this chapter, a landowner who holds land, the annual land revenue of which exceeds Rs.125/-per year, the right , title and interest of such owner in such land shall be deemed to have been transferred and vested in the State Government free from all encumbrances.

2. Nothing contained in Subsection (1) shall apply in respect of such land, which is under the personal cultivation of the landowner.

3. The landowner whose rights are acquired under subsection (1) by the State Government shall be entitled to receive compensation which shall be determined by the Compensation Officer having regard to section 17 and 18 of this Act, in accordance with the provisions of Schedule, but in the case of such occupancy tenant who is liable to pay rent in terms of land revenue or the multiple of land revenue, the compensation payable to his landowner shall be computed in accordance with Schedule-1.

4. The right, title and interest of the landowner acquired under Subsection (1) or (2) shall be transferred by the State Government on the payment of compensation in accordance with Schedule-I to such tenant who cultivates such land.

5. The State Government shall give rehabilitation grant according to the rules framed under this Act, to such small land owner whose right, title and interest have been extinguished and who does not have any other means of livelihood.

Land Reforms Legislations - H.P. (Transferred territory) Tenants (Protection of Rights) Act, 1968

As a result of re-organization of Punjab State on November I, 1966 certain areas of erstwhile Punjab were merged in Himachal Pradesh. Immediately, after merger of such areas, the disparity in land laws of the old and merged areas became evident. There were complaints of arbitrary ejectment of tenants from the merged areas. Therefore, the first step to ameliorate the lot of tenants in these areas, was that H.P. Vidhan Sabha passed the H.P. (Transferred Territory) Tenants (Protection of rights) Act, 1968, thereby providing security against ejectment of the tenants in the afore said merged areas. The ejectment under the aforesaid Act could be made on grounds similar to those available in the tenancy laws of old areas. This Act was initially valid for a year, but the period was subsequently extended by two years by two successive amendments in 1969 and 1970 . In terms of these Amendments, the Government was empowered the validity of the Act, if necessary , by way of notification under the 1970 Act. Thereafter, the Government further extended its validity up to November, 1971 by notification.

In the September session of the Vidhan Sabha in 1971, the Government further Passed the Himachal Pradesh (Transferred Territory) Tenants (Protection of Rights) Act, 1971 whereby it put a blanket ban on ejectment of tenants for one year. This period was further extended for six months by promulgating an ordinance, which was replaced by an amended Act passed by the Vidhan Sabha in December, 1972.

Land Reforms Legislations- Himachal Pradesh Tenancy and Land Reforms Act, 1972

By enacting the tenancy and Land Reforms Act, 1972 a new era marking abolition of intermediaries on land has ushered in the State. From the commencement of the Act, all the occupancy tenants in the old areas and Kismi tenants in the new areas have become owners of their tenancy land .The small landowners are entitled to reserve land for personal cultivation up to one and a half acres irrigated and three acres unirrigated land. The non-occupancy tenants in such affected holdings will simultaneously become owners of the remaining tenancy land.

The rest of the non-occupancy tenants (including sub-tenants) will become owners of their tenancy land on payment of nominal compensation of 96 times of the land revenue and rates and ceases chargeable thereon. These conferment of compulsory rights of purchase of land by tenants was necessitated as inspite of the provision in the Himachal Pradesh abolition of big landed estates and land Reforms act, for some reasons or the other the tenants were not coming forth to apply for ownership. Now the tenants will not be put to litigation and undergo the ordeal of trial of their cases in the Court of law.

Himachal Pradesh contributes a large number of men and officers to the Armed Forces of whom we are proud. Sufficient safeguards have been provided to protect their interest in land. Under the new law, tenants of the serving soldiers will not be able to acquire Ownership of the tenancy land. On ceasing to be member of armed Forces, they can resume up to five acres of land for personal cultivation, provided such members of the Armed Forces, were cultivating the land personally before joining the Armed Forces, Eventually the father of a person who at the time of joining the armed Forces was holding the land, has also been covered, If the father of a person who is serving in the Armed Forces creates a tenancy of his land and thereafter dies, then to the extent of the share of the person in the Armed Forces, such a tenancy shall be deemed to be lease and service of the son in the Armed Forces shall be deemed to be an inability or disability for the purposes of cultivating the land personally and the tenancy shall be treated as lease ; provided that if the son of a person in whose favour the tenancy has been created is also a member of the Armed Forces, then in that case the tenancy shall not be treated as lease.

The Act further protects the rights in land of certain weaker sections of the Society as, for example, widows, un-married woman or if married divorced or separated from husband, a minor, a person permanently physically or mental

disability because of which he cannot cultivate the land himself and a person under detention or imprisonment shall not be liable for the ejectment.

Another important change in tenancy law is that in the case of a dispute between the landowner and the tenants regarding the existence or nonexistence of the tenancy, the owner is to prove that the tenancy does not exist. Tenants who acquire ownership of land in terms of this Act will not be able to transfer such land for a period of ten years, except for productive purposes with the prior and explicit permission of the collector.

Further, with a view to discouraging speculation in agricultural land, the Act Interdicts non-agriculturalists from procuring/ purchasing any agricultural land in the Pradesh. In other words, *the Act imposes restrictions on transfer of land in favour of those non-agriculturists who do not cultivate land personally in Himachal Pradesh.*

For the purpose of this provision, the term" "agriculturist" has been defined and the traditional cast-based definition of the term has been replaced by the definition based on the facts whether or not a person, irrespective of his caste, cultivated land personally in the State. In retrospect, it can be seen that the Act *inter-alia* examines the relationship between the landlord and his tenant vis-a vis the land.

The Act provides *suo-moto* vestment of land in the occupancy tenants. The occupancy tenants has become owners of the land held by them as tenants with immediate effect from the operation of the law itself. Besides, there were also 4,22,145 non-occupancy tenants in the State, out of which 3,79,676 became owners by virtue of conferment of proprietary rights upon them.

The remaining non-occupancy tenants could not benefit from the provisions of the Act as they happened to belong to the protected categories such as serving soldiers, minors, widows etc. To make land of the state much safer, some more laws were enacted to achieve this target.

Land Reforms Legislations - HP Village Common Land Vesting and Utilization Act, 1974

This Act, namely, 'the Himachal Pradesh Village Common Land Utilization Act, 1974 sought to streamline the utilization of village common lands popularly known as *'Shamlat Land'*. In fact, separate Rules with regard to the utilization of village common land prevailed on the eve of Punjab, Reorganization Act, 1966 in two sets of areas in the State viz, the old areas and the merged areas. In Punjab, the Governance of all such lands was done in terms of the Punjab Village Common Land (Regulation) Act, 1961, which vested all village common lands, with certain exceptions, in the Panchayats. The idea was , no doubt, laudable but in practice, the utilization of such lands by Panchyats was open to criticism as certain unscrupulous elements occasionally circumvented the provisions of the Act for their personal benefit. In old areas, however, such lands were either with the village communities or with the co-sharers, with no control of the Panchayats or the Government.

Under the Himachal Pradesh village Common Land vesting and Utilization Act, 1974 certain categories of land were vested in the State Government . In terms of section 3 of the Act, the lands vested were as under :-

(a) Those areas which were vested in a Panchayat under section 4 of the Punjab Village Common Land (Regulation) Act, 1961, as enforced in merged areas of Himachal Pradesh under section 5 of the Punjab Re-organisation Act, 1966. This precluded lands used or reserved for the benefit of village community including streets, lanes, playgrounds, Schools, wells and ponds within *Abadideh* or *Gohrdeh.*

(b) Those areas which were described in the Revenue records as *shamlat taraf, patties* and *thola*, and not used as per revenue records for the benefit of the village community or a part thereof for community purposes of the village . This applied to those areas which were added to Himachal Pradesh under section 5 of the Punjab re-organization Act, 1966.

(c) Those areas which were described in revenue records as *shamlat, deh, taraf, shamlat chak* and *patti.* This applied in respect of those areas which comprised Himachal Pradesh immediately before November 1,1966.

The above provisions shall not apply to land described in (b)and (c) categories above if, before the commencement of the Act:-

(1) Partition of such lands is made by individual co-sharers through a process of law by a competent court or authority;

(2) Transfer of such lands is made by the landowner by way of sale, gift or exchange ; and

(3) That such land was built upon by an inhabitant by raising a residential house or cowshed.

The Collector may direct the landowners of the lands vested in the Government to hand over the possession of such lands within ten days from the service of the orders. If they refuse or fail to hand over the possession of such vested lands without a reasonable cause, the collector may take the possession of such lands by force, if necessary.

The lands vested in Government can only be used for the following purpose:-

(i) An area not less then 50 per cent of the total area vested in Government was to be earmarked for grazing and other common purpose of the inhabitants of an estate.

(ii) The remaining 50 per cent of the area was to be allotted to landless persons or to a person whose holding was less than one acre to make it one acre. This scheme was framed by the Government for ameliorating the lot of landless persons.

(iii) Through an amendment made later, the vested land can now also be transferred to some other Departments of the State Government or can be given on lease to an individual in connection with development activities of

the state. However, this provision was subject to the condition that this will not reduce the land to less than 50 per cent reserved for common purposes for the inhabitants of an estate.

Land Reforms Legislations - Himachal Pradesh Ceiling on Land Holdings Act, 1972

Immediately, on merger of areas from the Punjab after November 1,1966 the pursuance of land reforms necessitated the codification of a uniform tenancy law for old and merged areas both. In the meantime, at national level the Government of India appointed Central Land Reforms Committee of which the then Hon' able Chief Minister of the Pradesh Dr. Y.S Parmar was also a member. The recommendations of the committee were further gone into by a nine-member panel of the all India Congress Committee. The aforesaid recommendations were subsequently reviewed in the conference of the Chief Ministers, held in New Delhi on 23rd July, 1972. Thereafter the Government of India issued guidelines for imposing ceiling on land and exemption thereof.

Salient features of Act, 1972: The Act envisages a ceiling on land holdings with a view to controlling concentration of land in a few hands, and to subsequently distribute surplus land released thus, among the landless. The ceiling is for a family of husband, wife and three minor children. The section 4 of the Act puts a ceiling on holdings of land beyond a certain limit as indicated below:-

(a) Land under assured irrigation capable of growing two crops in a year- 10 acres;

(b) Land under assured irrigation capable of growing one crop in a year- 15 acres;

(c) Land of classes other than (a) and (b) described above, including land under orchards-30 acres;

(d) A separate higher ceiling has been envisaged in respect of certain areas of the pradesh as the above yardstick was not considered a judicious preposition in such areas. For instance, a ceiling of 70 acres has been fixed for whole of the districts of Kinnaur and Lahaul-Spiti; Pangi and Bharmaur areas of Chamba districts; and Chhota Bhangal and Bara Bhangal of district Kangra;

(e) For instance, every additional minor member to the family can claim 1/5th of the permissible area provided that ceiling does not exceed twice the permissible area;

(f) An audit is also entitled to a separate unit subject to the same condition that the permissible area does not exceed twice the limit fixed bid.

Section 5 of the Act provides for certain exemptions e.g. , the land held by State Government or Central Government, Registered Cooperative Farming societies, Land Mortgage Bank, Local Authorities, H.P. Agricultural University, Bhoodan Yojna Board, and the Tea Estates.

The surplus land so vested in the Government was to be distributed among landless agricultural labourers and to those persons whose holdings do not exceed one acre.

After the passing of land Reforms act, from 1974-76, state government distributed its own share of land and *shamlat* land under possession of big farmer to landless farmers. But this program had partial success, as many beneficiaries resold the land to the third party. There has been gross violation of land ceiling act since 2000 onwards. Political party in power in turn have allotted land on various flimsy grounds in violation of the act.

AGRICULTURE

Agriculture dominates the economy of the state though only a little over 10 per cent of the total land area is cultivated. The population pressure on cultivated land is high and holdings of most of the cultivators are small and scattered. There are 86.4% small and marginal farmers in the state. Most of the holdings are self-cultivated. About 18.5% of the cultivated area is under irrigation and remaining 81.5% is rainfed.

The cultivation is carried out right from 240 meters to 4250 meters above sea level. Agro-climatically, the region is more suitable for growing off-season vegetables and temperate fruits. It provides direct employment to about 69% of the main work force. Income from the Agriculture and Allied Sector account for nearly 20% of the total State Domestic Product. Out of the total geographical area of 55.67 lakh hectares, operational holdings are 9.68 lakh hectares. The average holding size is about 1.0 hectare. The distribution of land holdings according to 2005-06 Agriculture Census is tabulated below:-

Table-1

Size and Area of Holdings

Holdings Size (in Hect.)	Category (Farmers)	No. of Holdings (inLakh)	Area (Lakh Hect.)	Average Size (inHect.)
1	2	3	4	5
Below 1.0	Marginal	6.37 (68.3%)	2.58 (26.7%)	0.4
1.0 – 2.0	Small	1.76 (18.9%)	2.45 (25.3%)	1.4
2.0 – 4.0	Semi Medium	0.88 (9.4%)	2.40 (24.8%)	2.7
4.0 – 10.0	Medium	0.29 (3.1%)	1.65 (17.0%)	5.7
10.0– Above	Large	0.03 (0.3%)	0.60 (6.2%)	20.0
Total		**9.33**	**9.68**	**1.0**

It would be seen from the above table that marginal and small farmers constitute 87.2 % of total land holdings. The semi-medium and medium holdings together constitute 12.5 % and the large holdings cover only 0.3 %. Thus, in Himachal Pradesh bulk of holdings constitutes small and marginal holdings. About 52.0 % of the operational area belongs to the category of small and marginal farmers. The State has been divided in four Agro-Climatic Zones, suiting to the cultivation of different crops.

1. **Shivalik Hill Zone (Sub Tropical Sub Mountain and Low Hills):** This zone Comprising of upland of part of Chamba, Kangra, Hamirpur, Solan, Sirmaur and Bilaspur district. It has sub tropical climate, consists of foothills and valley area having elevation from 240 meters to 1000 meters above sea level. It occupies about 35 % of the geographical area and about 33 % of the cultivated area of the state. The major crops grown in this zone are Wheat, Maize , Paddy, Black Gram, Sugarcane, Mustard , Potato , Vegetables, Pulses and Barley.

2. **Mid Hill Zone (Sub Humid Mid Hills):** This zone comprising of part of Chamba, Kangra, Mandi, Solan, Shimla and Sirmaur district. It extends from 1001 meters to 1500 meters above sea level, having mild temperate climate. It occupies about 32 % of the total geographical area and about 53 % of the cultivated area of the state. The major crops are Wheat, Maize, Paddy, Black Gram, Barley, Beans, Pulses and Forages etc. This zone has very good potential for the cultivation of cash crops like off season vegetables, Ginger and production of quality seeds of temperate vegetables like cauliflower and root crops.

3. **High Hill Zone (Wet Temperate High Hills):** This zone comprising of parts of Chamba, Kangra, Mandi, Sirmaur district and inner most of Shimla and Kullu district. It lies from 1501 meters to 2500 meters above sea level with humid temperate climate and alpine pastures. The commonly grown crops are Wheat, Barley, Lesser Millets, Pseudo-cereals (Buckwheat and Amaranthus), Maize, Rice and Potato etc. The area is ideally suited to the production of quality seed potato and temperate vegetables.

4. **Cold Dry Zone (Dry Temperate High Hills):** This zone comprising of major parts of Chamba and Kinnaur, entire Lahaul-Spiti and northern parts of Kullu district. It lies above 2500 meters above sea level. It occupies about 8% of the geographical area and 3% of the total cultivated area of the state. Himachal Pradesh is the most complicated geological regions in the Himalayas.

The State falls into four major zones. These are; outer- or sub-Himalayan zone consisting mainly of tertiary formations, lowest Himalayan range mainly composed of granite and other crystalline rocks, high Himalayan zone represented by granite rocks fossils, and Tibetan or Tethys Himalayan zone comprising the wide basin covering the Spiti valley.

The soil of Himachal Pradesh vary from deep and rich alluvial soil of valleys to thin and bare soil of hill or snow-covered soil of high mountains, and are broadly classified into nine groups based on development process, physical and chemical features. These are 1) alluvial soils 2) brown hills soils 3) non-calcic brown soils 4) brown forest soils 5) grey wooded or brown podzolic soils 6) grey brown podzolic soils 7) planosolic soils 8) humus and iron podzols and 9) alpine humus mountain skeletal soils.

LAND RESOURCES AND LAND UTILIZATION

From the land use viewpoint, Himachal Pradesh has three regional characteristics as follows:

i) Southern part of the State is featured by intensively cultivated and moderated forested land covers with marginal presence of pasture and other grazing lands;

ii) Central part of the State is predominated by moderately cultivated and highly forested land covers with a considerable proportion of pastures and other grazing lands; and

iii) Northern part of the State is represented by poorly cultivated and sparsely forested land covers with a high proportion of pastures and other grazing land.

Land Cover in the State is characterized by wide rock/ non-vegetation, grass & shrub and forest which count 54.9% of the State. Agriculture cultivated land cover is only 13.1% and limited to expansion drastically due to the State topography as well as from a view point of environmental conservation.

It is the department of agriculture which is pioneer in collecting data conducting survey and assessing the health of the agriculture in the state.

BRIEF HISTORY of THE AGRICULTURE DEPARTMENT

The Department of Agriculture, Himachal Pradesh was established in the year 1948, but it was merged with the Forest Department in the year 1950. This arrangement continued till 1952. Thereafter Department of Agriculture, Himachal Pradesh started functioning independently and it was assigned the responsibilities of agriculture development, agriculture research and agriculture extension. At that time, the horticulture was also a part of the Department of Agriculture. In the year 1970, the Government of Himachal Pradesh created a separate Department of Horticulture and the agriculture research was assigned to Agriculture Complex.

In the year 1952, when the Department of Agriculture started functioning independently, only one Director of Agriculture, one Deputy Director of Agriculture and four District Agriculture Officers were appointed. After that, when the state was divided into development blocks, 6-7 agriculture inspectors were also appointed. During those days agriculture development activities were also organised/ carried out by the Block Development Officers, with the assistance of agriculture inspectors and Gram Sewaks. But with the passage of time, the Gram Sewaks were given additional responsibilities of rural development programmes besides agriculture development. Hence, it became difficult for them to carry out agriculture development activities smoothly and with full devotion . Under such circumstances, Himachal Pradesh government, like other states, had to start agriculture training and extension programme. Under this programme, Subject Matter Specialists at district level, Agriculture Development Officers at block level and Agriculture Extension

TABLE – 2

Area under Crops/Pulses and their Production

Year	Area (000 thousand hectares)			Production (000 metric tones)							
	Crops	Pulses (Area)	Total (Area)	Rice	Maize	Wheat	Barley	Total	Pulses	Food crops	Potato

Officers at village level were appointed, which gave encouraging results and remarkable progress was made.

Presently, the Department of Agriculture is headed by the Director of Agriculture with headquarters at Shimla. The Director of Agriculture is assisted by additional Director of Agriculture, Superintending Engineer (Soil Conservation) and two Joint Directors of Agriculture at Headquarters. One additional Director of Agriculture has been posted for North Zone at Dharamshala, District Kangra, who is monitoring all the activities in Kangra, Chamba, Una, Hamirpur and Mandi District.

Agriculture is the largest and most important sector in the economic life of Himachal Pradesh. Agriculture being the largest single industry and main occupation of the people of the Pradesh has special place in the prosperity and development of the State. It is in fact done so, although not satisfactory. Agriculture feeds the process of development. It meets the needs for food grains on account of rise in incomes, as also of increase in population.

It also supplies raw materials for many consumer items like edible oils, sugar, cloth etc. Agriculture can contribute a great deal in earning foreign currencies. The export requirement can easily be met by adding a crop or two within the existing pattern and that too with little incentives and perhaps with no additional capital investments. But it needs to be emphasized that dependence on agriculture produce alone is not to be pursued as a long term goal, since there is always a possibility of stiff competition from other developing and underdeveloped countries.

Agriculture can also contribute to the growing country's needs for large capital resources. Economic historians like, *Siman Kuznets*, opine that, *in the cases* of *successful development* of *major countries, a rise in agricultural productivity has either preceded or accompanied industrial development.* Japan is the fine example of rapid transformation from agrarian economy to the most industrialised state in the world. A proper concentration towards agricultural sector will definitely help in reducing unemployment scale.

Large incomes of the rural people resulting from agricultural expansion can stimulate industrial growth. Agricultural development is important not only for itself but also because it promotes development of country in many ways. it is the land that is the ultimate source of all agricultural and nonagricultural goods; it produces both food for direct consumption by man and raw material, which lead to manufacture of nonagricultural goods again for indirect or ultimate use by man.

The hilly State like Himachal Pradesh with abundant rainfall and rich forests, have not been able to keep pace with the development in the plains because of the inherent problems of topography, terrain and consequent isolation, climatic conditions, lack of roads, transportation and communication. Cultivable fields here have mostly been carved out on sloping hill sides, hence exposed to large scale erosion of the top fertile soil. Soil erosion

is so rampant throughout the Pradesh that hundreds of tons or tonnes of valuable top soil is washed away every year.

Agriculture in Himachal Pradesh provides direct employment to about 58% (in 2011 census), 63.2% (1991 census) of the main working population, while on 1972-73, over 93% of people were depending on agriculture. In Himachal Pradesh agriculture alone (excluding animal husbandry, forestry, fishery etc.) accounts for 50% of the State Domestic Product. If the sub-sectors of the agriculture are also taken into account, this will go up to more than 60%. Agriculture is the mainstay of the economy. As a result of various agricultural production programmes during the previous five year plans, this state has achieved a high level of farm production. Ploughing is done with the help of plains cattle but in high ups, a cross between the yak and plains cattle-locally called *'Chungroo'* is harnessed for the purpose. Since the last decade of 20th century tractors are also widely used in the lower parts of the state for ploughing the fields. Men , women and children work jointly in the field. *The agricultural operations for men are tillage, sowing and harvesting. Women play an important role in the conducting of weeding, harvesting and thrashing operations. Children also render valuable assistance in thrashing the produce and its carriage to houses.*

Although most of the areas of Himachal are far flung and possessing unsuitable land for agricultural purposes, yet there are rich and fertile valleys like Paonta in Sirmaur, Kangra valley, Balh in Mandi etc. Himachal Pradesh has a wide variety of agro-climate and topographical conditions. The Pradesh has sub-tropical climate in the lower and most of the valley areas; moderate in a few pockets, temperate in higher hills and dry climate prevails in areas like Lahaul and Spiti, Kinnaur and Pangi tehsil of Chamba district. The district of Una, Hamirpur, Bilaspur, lower parts of Sirmaur, Solan, Mandi and Kangra are rich and fertile and can be turned into granaries of the state.

The middle belt, comprising the upper areas of Kangra Chamba, Mandi, Solan, Shimla, Kullu and Sirmaur are ideal for growing lucrative cash crops of vegetable seeds, potato, ginger, mushrooms and some food grains as well. A bit higher up in these districts, snowfall is quite frequent. So these areas provide excellent scope to grow apple and other temperate fruits, some varieties of vegetable, disease-free seed potato etc. The dry zone of the State consisting of Lahaul-Spiti, Kinnaur and Pangi subdivision of Chamba district are ideal for growing vegetable seeds, dry fruits, sugarbeet seed and some food grain crops also. At many places in the zone off season vegetables are grown on a large scale. This effort has proved very fruitful.

Himachal Pradesh is covering an area of 55, 673 sq. km. and accounting for about 1.7% of the total area of the country. Altitude-wise, the whole region infact consists of five distinct topographical subregions, viz., *valley areas,* elevation upto 1000 meters, *low hills* 1000 to 2000 meters. *high hills* 2000 to 3500 meters, *alpine zone* above 3500 meters and the *land* of *the perpetual snows.* Climatically, it has been divided into three zones:

(i) Outer Himalayas, gets rainfall annually varying between 150 cm to 175 cm:

(ii) Inner Himalayas rainfall varies between 75 cm to 100 cm;

(iii) Alpine zone remains under snow for about half of the year.

The average annual rainfall in the State in about 152 cm. The population of the State, according to 1991 census, was 51.7 lakhs, which formed only 0.63 per cent of the country's population. The total population in 2001 was 60.77 lakh and it further went up to 68.5 lakh in 2011, which is 0.57 per cent of country's population. Out of the total geographical area, only 11.3 per cent is under cultivation and at the most another four per cent termed as cultivable waste, can be further brought under cultivation; while all India average is 45 per cent. The progress made in this direction is shown in the following table:

TABLE - 3

AREA UNDER CULTIVATION AND IRRIGATION
(000 hectares)

Year	Total Area Under Cultivation	Total Irrigated Area
1950-51	406.3	66.6
1955-56	423.3	65.7
1961-61	428.7	67.3
1966-67	847.7	149.7
1970-71	911.7	155.2
1980-81	946.4	155.9
1985-86	983.6	169.5
1989-90	970.6	170.2
1992-93	972.6	174.7
1993-94	975.2	171.4
1994-95	968.0	190.2
1995-96	949.8	190.2
1999-2000	656.80	1,01,907
2000-03	945.20	1,23,918
2005-06	944.10	1,04,027
2007-08	897.40	93,560
2010-11	935.25(P)	98,340(P)
2012-13	960.34(P)	98,837(P)

Source: Important Facts on H.P. 1981- to 2012.

With regard to agricultural planning, various constrains have been hampering progress. Due to this, the proportion of area sown, which is under irrigation, has remained stagnant at 14-16 per cent during the period between 1950 to 1998. From the period of 1999-2011-12, nearly 3 per cent more area came under irrigation and making it all nearly 19 per cent of the total sown area. The State had 18% of the cultivable area under assured irrigation. Agricultural sector has been given a fairly heavy allocation in the Five Year Plans. In the first plan 14% of the total outlay, Second plan 15.7%, Third plan 27%, Annual plans 18.5%, Fourth plan 21.2%, Fifth plan 21.2%, Sixth plan 16.86%, Seventh plan 21.96% Eight plan 17.5% and Ninth plan 14.8%, 10th plan 10%, 11th plan 10.3% and 12th plan 10.5% respectively. The allocations to

the agricultural sector can be justified on the ground that this sector provides livelihood to more than 58 per cent (2011 census) of the total labour force of the State.

The share of agriculture in total employment in Himachal Pradesh vis-a-vis All India has been quite interesting. In 1951, while 91% of the total employment force was from agriculture in Himachal Pradesh, at All India it was 72.9%. After two decades in 1971, share of agriculture came down to 77.5% in Himachal Pradesh, while at All India it was 72.1%, a marginal change. On the other side, the share of agriculture in Net Domestic Product of Himachal Pradesh and Net National Product of India is most observing one. In 1950-51, agriculture contributed to the Net Domestic Product of Himachal Pradesh in Percentage wise 64.4, while in the Net National Product of India, the contribution of agriculture was 51.3%.

In 1982-83, in Himachal Pradesh it was 4.3% and NNP of India 35.5%. The above figures directly show the sharp decline of agriculture as a sole contributor to the growth of national economy. Growth performance of economies is measured in terms of net or gross domestic product and per capita income. In 1950-51, Per capital income in Himachal Pradesh was Rs. 239.5 and in 1961-62, Rs. 280.8, nearly 17% increase on the 1950-51 prices. In 1965-66, it came down to Rs. 240.4, nearly same as recorded in the initial years, it was 14% decline to 1961-62 on the 1950-51 prices. In 1967-68, per capita income achieved a quantum growth, reached Rs. 630.8 and continued rising till 1982-83, when it came to Rs. 686.4. There is continuous rise in state income and per capita income in Himachal Pradesh.

The Per Capita Income of Himachal Pradesh in 1998 on 1997-98 Prices was Rs. 10659/-, which stood at Rs. 12692/- in 1998-99. At current prices the G.S.D.P during 1999-2000 was estimated at Rs. 11302.73 crores as against to Rs. 9920.01 crores in 1998-99. The per capita income at current prices increased to Rs. 15012 in 1999-2000 from Rs. 12692/- in 1998-99.

Himachal Pradesh has recorded very high increase in per capita income since 2000-2001, because of increase in salary as per pay commission report, growth in agriculture, horticulture, industrial development etc.

TABLE - 4

PER-CAPITA INCOME (IN RS.)

Year	Current Prices	Fixed Prices (1980-81)
1950-51	240	–
1955-56	258	–
1960-61	359	–
1970-71	651	651

CONSTRAINTS IN AGRICULTURAL DEVELOPMENT :- Problem of erosion due to serious topographical and climatic factors and abiotic pressure on the Land recourses.

- 81.5% area is rainfed, therefore, the adoption rate of improved technologies and inputs by the farmers is less as compared to irrigated areas.
- Small and Scattered land holdings. (86.4% of farmers are small/ marginal).
- Occurrence of natural calamities like drought, cloud bursts, hailstorm, heavy rains, storms, unusual rise in temperature are quite frequent causing losses to crops.
- Squeezing of agricultural lands because of diversion to nonagricultural purposes.
- Inadequate infrastructure like rural roads, irrigation, marketing grading and packing facilities of Agricultural produce.
- Low risk bearing capacity and poor purchasing power of the farmers.
- Low productivity of crops
- Erratic behaviour of rainfall.
- Limited mechanisation.

Increasing population of stray cattle and monkey menace.

THRUST AREAS

1. Diversification of area from traditional crops to commercial crops where irrigation potential has been created. The farmers shall be motivated to produce organic vegetables without the use of pesticides and chemical fertilizers.
2. Development of rainfed areas through watershed approach on a large scale for efficient use or natural resources. Increased funding shall be arranged under RIDF.
3. Rainwater harvesting is another area, which will not only provide life saving irrigation to the crops but shall also recharge the ground water and check erosion. The Department shall seek financial assistance from Govt. of India for small irrigation tanks/shallow wells and pumping set.
4. Increase in maize productivity high yielding hybrids.
5. Adoption of precision farming practices (Poly House and Micro Irrigation).
6. Organic farming shall be the thrust area.
7. Post harvest management and efficient marketing system.

8. Farm mechanisation with special reference to hill agriculture shall be given major thrust in the years to come. This is necessary to reduce cost of cultivation in view of high cost of labour. The Department has already constituted a Technical Working Group to identify new farm implements and machinery, which can be introduced in the State.

9. A strong research extension interface directed towards problems oriented research programmes. Research projects to be identified and funded in problem areas.

10. Extension reforms through public-private partnership.

11. Agro processing and value addition.

12. Increase in productivity and quality.

13. Application of Biotechnology in the field of Agriculture shall be explored.

14. Soil testing and Soil Health Cards.

Growth of State Economy

State Income is the most common economic indicator used to measure the economic health of a State economy. In Himachal Pradesh, first estimates of States Income were released in the year 1963 covering the period 1950-51 to 1960-61. Since Himachal Pradesh underwent many territorial changes, after independence and emerged as a full-fledged State in the year 1971, a new series of State Domestic Product was developed for the year 1966-67 to 1969-70 with the base year 1960-61. The third series of State Domestic Product prepared in the Pradesh was based on 1970-71 prices which consisted of the estimate up to 1986-87.

After the release of the new series of National Accounts Statistics by Central Statistical Organisation in February, 1989 which was based on 1980-81 prices, Himachal Pradesh also brought out a new series of estimates. According to these estimates, the State income of the Pradesh during 1980-81 to 1997-98 period increased from Rs. 722.82 crore to Rs. 1597.43 crore at constant prices and to Rs. 6248.07 crore at current prices. In 2000-01, the Gross Domestic State Product (GDSP) on current prices went up to Rs.15,66,118 crore from 6205 in 1996-97. In 2003-04 Rs. 2072100 crore and by 2013-14 it was Rs. 52,42,616 crore. The fast growth of GSDP could be attributed to various factors. The per capita income at constant prices increased from Rs. 1704 in 1980-81 to Rs. 2725 in 1997-98 while at current prices, it rose to Rs. 10659 during the same period.

The per capita income of the state also increased very fast from 2000-01 to 2013-14. It was merely Rs. 22795 in 2000-01 on current prices which touched the mark of Rs. 82611/- above by 2013-14.

Total cropped area in 1970-80 was 942.9 thousand hectares, of which 370.8 thousand hectares was sown more than once a year. In 1987-88, while total cropped area went up to 974.8 thousand hectares, of which 398.9 hectares was sown more than once a year. In 1990-91 the total cropped area was

983.6 thousand hectare, while area used for more than one crop was 400.8 hectare. In 1995-96 it was 949.8 and 392.1 respectively. The net sown area per cultivator in the State is less than one hectare as against about two hectares in the rest of the country. As a result of strenuous efforts made, the trend in over the past decade has been very favourable in the overall production of the food grains. In 1976-77, it was 9.33 lakh tons; 1980-81, 11.83; 1983-84, 10.51; 1986-87, 11.72 and in 1987-88, 9.31 lakh tons respectively. The overall achievement in this sector is reflected through the table:

TABLE - 5

STATE INCOME GROSS DOMESTIC STATE PRODUCT (GDSP)
(RS. IN CRORE)

Year	Current Prices	Fixed Prices (1980-81)
1950-51	26.49	–
1955-56	30.21	–
1560-61	47.81	–
1970-71	223.24	223.24
1975-76	405.98	272.82
1980-81	794.04	794.04

Source: HPDES, Important Facts - 1980-81 to 2013

Introduction of land reforms was imminent, after the formation of State, which had age old institution of feudal structure in its most pervasive form. To distribute the fruits of agricultural development to larger section of the people, land reforms came handy to both the government and people, without much resistance of landlords. In 1953, the State enacted a revolutionary Land Reform Legislation, the *'Himachal Pradesh Abolition* of *Big Landed Estates and Land Reform Act'*, provided for the imposition of a ceiling on land holdings.

In 1971, Himachal Pradesh (Transferred Territory) Tenants (Protection of Rights) Act, and according to *'Himachal Pradesh Land Holding Act, 1972'*, the limit of a land holding for a family consisting of husband, wife and three minor children is 27 acres (10.93 hectares), for land assured irrigation and capable of growing one crop a year, 18 acres (7.28 hectares), for land under assured irrigation and capable of growing two crops a year and is 72 acres (29.19 hectares) for other types of land. After the implementation of

reforms, over 2,500 big landed estates were abolished and an area of about 70,000 acres was declared surplus for distribution to the landless. In 1973-75, survey was completed of landless persons and land was provided to 17,088 persons, of which sixty six per cent belonged to Scheduled Castes and Tribes, section of the society.

Under *'Himachal Pradesh Tenancy and Land Reforms Act'*, which aimed at the abolition of intermediaries and making the tiller of the land, its owner, about 87,000 occupancy tenants became owner of their tenancy lands. The *'Himachal Pradesh Relief* of *Agricultural Indebtedness Act'* provided for the liquidation of debt of the landless agricultural labour, rural artisans and marginal farmers having an annual income of upto Rs. 2,400. In 1985-86, the total number of holdings in small and marginal group farmers were 6,18,714, occupying 23,173 hectares area, on the average 0.68 hectares and varying less than 0.5 to 2 hectares land. The number of holding in the class of two hectares to fifty and above were 1,34,168 occupying 5,57,167 hectares. On average 7,52,882 land holders occupying 9,80,240 hectares average 1.30 hectares per occupant.

To streamline the process of agricultural reforms, various programmes launched by the State Government are: (i) settlement operations; (ii) strengthening of supervisory agencies; (iii) setting up of vigilance cells to remove people's grievasnces; (iv) supporting services to new allotters of land and consolidation of holdings. The total estimated area for consolidation in the State was 49 lakh acres as per an old survey, out of which an area of 16,31,629 acres had already been consolidated upto March 1988, leaving behind 32,68,371 acres. Uptill March 2013 another 14,76,410 acres was brought under consolidation, leaving 17,91,961 acres only.

To look after the progress and problems of the agriculture, the department of agriculture is doing a pioneer job. The state Government has also focused on this sector on priority basis. The plans and schemes of the department are-

(A) STATE PLAN SCHEMES

1. QUALITY SEED MULTIPLICATION AND DISTRIBUTION

Department owns 25 Seed Multiplication Farms where foundation seeds of Kharif and Rabi crops are produced. Annually about 3500 to 4000 quintals seed of cereals, pulses and vegetables are produced in these farms. Further about 90,000 quintal of certified seeds of various crops are distributed to the farmers in the state. Under this scheme, expenditure on seed multiplication farms, seed stores, seed testing and certification, subsidy on cost of seeds and cost on demonstrations etc. are met.

2. MANURE AND FERTILIZERS

(i) Distribution of Fertilizers

With a view to provide fertilizers to the farmers at reasonable rates throughout the State, 100% subsidy on transportation of all kinds of fertilizers

to retail sale points is given thereby bringing the uniform sale rates of fertilizer in the State. The State Govt. has also allowed subsidy on cost of Urea and Ammonium Sulphate @ Rs. 200/- per MT, and on complex fertilizers NPK 12:32:16, NPK 10:26:26, NPK 15:15:15 and DAP @ Rs. 500/- per MT. These subsidies are provided under plan, Non-Plan and calamity relief fund. In order to ensure adequate supply of fertilizers, the Govt. has entrusted this responsibility to HIMFED/ cooperative Societies. The farmers are educated about balanced use of fertilizers and as per soil testing nutrient basis.

(ii) SOIL TESTING CENTRES

Department has 11 soil testing laboratories besides three mobile soil testing labs to provide free soil testing facilities to the farmers. About 1,25,000 samples are analysed annually. Besides this soil Health Cards are provided to the farmers. About one lac farmers are covered every year. Outlay proposed is to meet expenditure on these labs, salaries and wages of staff appointed under this scheme.

4. HIGH YIELDING VARIETIES

The Intensive Agriculture programme was merged with the scheme of Extension and Training. Now under this programme only one scheme of Crop Insurance i.e. National Agricultural Insurance Scheme is covered. The outlay is towards meeting State share of subsidy and loss claims. This scheme was introduced in the State from Rabi, 1999-2000. Presently wheat & barley crops during Rabi season and Maize, Paddy and Potato during Kharif season are covered in the scheme. Ginger crop of District Sirmaur has been included in this scheme on pilot basis from Kharif, 2008. In addition to this, from Rabi, 2008-09 season, tomato crop of District Solan also covered under weather based crop insurance scheme for the first time. From the Rabi 2009-10 season, Rabi potato crop has also been covered weather based crop insurance scheme in the districts of Kangra and Una.

5. PLANT PROTECTION

The department exercise vigil on pest situation. To overcome this, about 600 MT of pesticides through 1352 sale centres are supplied to the farmers. Besides this, Pesticide Testing Laboratory at Shimla was set up with a capacity of 150 to 250 samples per year. One Bio Control Laboratory was set up at Palampur where conservation pest situation augmentation, rearing and multiplication of bio-agents and training to extension staff and farmers are done. Another Bio Control Laboratory set up at Mandi.

This is a continued scheme and the provision is made for meeting the expenditure on transportation and subsidy on the cost of plant protection material. The plant protection material including equipments are supplied to the SCs/STs/IRDP families at 50% cost. The outlay proposed is to meet expenditure on subsidies and staff.

6. COMMERCIAL CROPS

Under diversification approach, major emphasis is being laid on the

production of Off-season vegetables, quality vegetable seeds, Potato and Ginger besides cash crops like soybean, Oilseeds and Pulses.

(a) Development of Seed Potato: The Department owns 14 Potato Development Stations where foundation seed potato is produced. Due to "Seed Plot Technique" in the plains, the Potatoes of plains are causing tough competition in marketing of seed Potato from Himachal Pradesh Therefore, a policy has been devised to diversify the area under Potato towards cash crop. Market maximum potato as table and produce only that much seed potato which can easily be marketed outside the State.

(b) Development of vegetables including Farms: Himachal Pradesh gained reputation for the cultivation of off-season vegetables and production of quality vegetable seeds. There is a great demand of off-season vegetables in the plains. The ongoing programme i.e. cultivation of off-season vegetable sand production of vegetable seeds was strengthened and organized on an extensive scale during 11th Plan for providing higher income and employment.

The suitable areas in the State for the purpose of vegetable cultivation would be intensively surveyed and identified and the farmers in the newly identified areas would be encouraged to take up these programme, demonstration on vegetable cultivation are done for small and marginal farmers in these areas, so that the status of these rural poor can be improved. The cropping pattern shifts from cereals to vegetables would be specially monitored in all such areas as are being brought under the cultivable command area of the new irrigation schemes.

(c) Ginger Development: For production of disease free ginger, the department is providing training, demonstrations and quality seed. About 35,000 tonnes of green ginger is produced annually which is marketed within the State and in the neighbouring States.

(d) Tea Development: Total area under Tea uptill 2012 was 2300 hectares with a production level of 15 lac kgs. Small & marginal tea planters are provided agriculture inputs on 50% subsidy. In the last few years, there is slump in the market and tea industry has been affected badly.

7. EXTENSION AND FARMERS' TRAINING

Main function of the department is to disseminate the technology to farmers. The Department runs two training centres, one at **Mashobra** and other at **Sundernagar**. Besides this farmers' training camps are organised at village, block and district level.

8. AGRICULTURAL ECONOMICS & STATISTICS

Under this programme, three centrally sponsored schemes viz (i) Timely Reporting scheme (TRS) for estimation of area and production of crops (ii) Improvement of Crop statistics (ICS) for bringing quality in the land record data at grass root level and (iii) Estimation of production of Commercial crops like Potato and Ginger. The estimation is done accordingly by statistical techniques. Production estimates on principal crops like Wheat,

Barley of Rabi season and Maize, Paddy, Potato and ginger crops of Kharif are released on the basis of results of crop cutting experiments conducted accordingly by Random, Sampling Method. The Director of Land Records is the agency in the State responsible for collection and release of area estimates, forecast report etc.

9. AGRICULTURAL ENGINEERING

Under this scheme, new farm implements/ machines are popularized among the farmers. Testing and demonstration of new machines is also done under this programme.

10. QUALITY CONTROL

Under this scheme, implementation of various acts on seeds, fertilizers and pesticides is ensured. Quality control functionaries have been notified. The Department has three fertilizer testing labs, one state pesticides testing lab and three seed testing labs.

11. AGRICULTURAL MARKETING

This is controlled in the State through H.P. Agricultural and Horticultural produce marketing (Development and Regulation) Act, 2005. Under this Act. H.P. State Agricultural Marketing Board has been setup. At present, 10 market committees are functioning. 48 markets have been made functional. Market information is being disseminated through AIR to farmers.

12. SOIL AND WATER CONSERVATION

Due to topographical factors, the soil is subject to splash, sheet and gully erosion resulting into degradation of the soil. Besides this there is biotic pressure on the lands to curb this menace particularly on the agricultural lands. The Department of Agriculture. H.P. is executing two soil and Water conservation schemes under State Sector Scheme. The schemes are:

(i) Soil conservation Works
(ii) Water conservation and development
(iii) Integrated Watershed management
(iv) RIDF
(v) Macro management of agriculture

13. Agriculture Research and Education

Under this ,GIA is given to agriculture University for Teaching, Research and Extension. Emphasis is being laid on location specific research for adoption of the same by the farming community of the State.

B CENTRALLY SPONSORED SCHEMES

1. INTEGRATED SCHEME OF OILSEEDS, PULSES, OIL PALM AND MAIZE (ISOPOM)

This scheme was launched during the year 2004-05. In this new scheme, all the ongoing schemes of OPP. NPDP and AMDP have been merged. Only

maize crop has been considered for Himachal Pradesh.

The scheme is implemented on 75:25 basis, except for the component of publicity where central Government share is 100 percent. The main component under the scheme are block and IPM demonstrations, distribution of plant protection materials and equipments, providing pipes to carry water from water sources to the fields and publicity etc.

2. BIOGAS DEVELOPMENT PROGRAMMES

This is 100% centrally Sponsored Scheme

3. MACRO MANAGEMENT- WORK PLAN FOR ACCELERATED GROWTH OF AGRICULTURE

Government of India launched this programme in 2000-2001 on 90% Centre share and 10% State share basis. In this, states have to identify this constraints and purpose schemes for funding through Work plan. Flexibility has also been given to state level Coordination Committee to make changes in allocation, if required from one scheme to other.

4. SUPPORT TO STATE EXTENSION PROGRAMMES FOR EXTENSION REFORMS

This programme is a major initiative towards revitalizing agricultural extension to make the extension system decentralized and demand driven. The scheme has been conceptualized on the basis of the policy framework for agricultural extension and experiences with the innovations in the technology dissemination component of the National Technology Project implemented in the 7 States including Himachal Pradesh.

Following key reforms are being promoted under the scheme;

1. Providing innovative restructured autonomous bodies at the district level (Agriculture Technology Management Agency) and at block level (Farmers Advisory Committee, Block Technology Team), which are flexible, promote bottom up and participatory approaches, are farmer driven and facilitate public-private partnership.
2. Convergence of line departments' programmes and operating on gap filling mode by Formulating Strategic Research and Extension Plan (SREP) and Annual Work Plans.
3. Encouraging Multi-agency Extension Strategies involving inter-alia public/ private extension service providers.
4. Moving towards integrated, broad-based extension delivery in the line with farming systems approach.
5. Adopting Group approach to extension (Operating through Farmer interest Groups (FIGs) & Self Help Groups (SHGS).
6. Addressing gender concerns (mobilizing farm women into groups, capacity building etc.)
7. Moving towards sustainability of extension services (e.g. through beneficiary contribution).

One of the first tasks of the district level institutions is to facilitate the preparation of a Strategic Research and Extension Plan (SREP) of the district through participatory methodologies involving all the stakeholders and farmers. SREP becomes the basis for development of Block/ District level plan. State Extension Work Plan is developed at the state level and it contains a consolidated activity- wise plan incorporating all the District action Plans (DAPs) in the State and the State Level activities.

On 27th July 2011, The state Cabinet approved amendments to the rules purchasing land in the state to non- agriculturists under section 118 of the Himachal Pradesh Land Reforms and Tenancy Act to curtail discretion, plug loopholes and ensure that only eligible persons acquired land "within strict limits and after due diligence".

According to the amended Section 38-A (a) (2) of the Himachal Pradesh Tenancy and Land Reform Rules, any non-agriculturists seeking to acquire land will need an essentiality certificate (EC) from the department concerned for all purposes other than a dwelling unit or a shop. The department will certify the eligibility and clearly state the land requirement according to the norms, No-objection certificates (NOCs) from all relevant departments and authorities, including local bodies, will also have to be obtained. Permission to purchase land for a dwelling unit will be given only to a person living and working in Himachal Pradesh prior to 1972, persons working in Himachal Pradesh for over 30 years and duly recommended by the local body concerned, employees possessing *bona fide* Himachali certificate, gallantry or Padma award winners and persons who have achieved eminence in the sphere of health, education, culture, research, public service, sports and business on the recommendation of a committee of Principal Secretaries.

In the case of built -up houses and flats, Section 118 is not attracted in case of lease up to 99 years. Consequently many transactions are occurring for flats and storeys in buildings on a 99-year lease. These are registered at a fraction of the cost of transfer by sale. The amended rules will allow for transfer of such properties by sale provided they are registered with the Town and Country Planning Department. The Cabinet decided to repeal the HP Pre-Emption Act, 2010, amended the HP Land Revenue Act to provide for service of summons by way of publication in newspaper, option of having mutation based on documents, entered and attested at the tehsil and sub-tehsil level instead of the patwar circle. It also decided to amend the HP Ceiling of Land Holding Act.

Facing Congress party accusation of granting permissions to outsiders for the purchase of huge chunks of land in relaxation of the HP Tenancy and land Reform Act, the BJP during its rule had given maximum benefit to those keen to open educational institutions and tourism units. The BJP regime had granted permission to 96 educational institutions to purchase 267 hectares in relaxation of Section 118 of the HP Tenancy and Land Reform Act 1972. The government during its four-and a half-year rule granted permission to 62

tourism units, allowing purchase of 263. 18 hectares. The comparative government data available for which permission was granted by the previous Congress regime during its five-year term indicates that 58 educational institutions were allowed to purchase 141.71 hectares and 85 tourism units allowed to buy 59.64 hectares.

The BJP regime till August 15, 2012, had granted permission in 1,370 cases to outsiders to purchase 1229.28 hectares in contrast to 2,398 cases during the five-year Vir Bhadra regime involving purchase of 1445.54 hectares. Once the land is bought by outsiders in relaxation of section 118, there is no need to seek separate change of land use. The BJP and the Congress regime indicate that the number of cases during the Congress regime was more but land involved was less, but the BJP with fewer number of cases had allowed purchase of 12,29.28 hectare. The exhaustive government data also indicates towards the fact that while during the Congress regime, 1,427 industrial units bought 1009 hectares, during the BJP regime only 616 permissions were granted for industrial purpose, involving 592 hectares.

This can also be interpreted as a reduced interest on the part of entrepreneurs to invest in the state post the withdrawal of the special industrial package. The notable land buyers include Bahara Education and Charitable Society. Kandaghat 120 bighas; Shital Mata Education and Welfare Society 13-19 bighas; Manav Bharti Charitable Trust 30 bighas; Chancil Education Society -10 bighas and Harish Cement Ltd.- 987 bighas in Sundernagar. The 2012 Vidhan Sabha election was fought by the Congress party on the slogan *"Himachal on sale"*, which easily went against the ruling BJP, and ultimately resulted in the failure of *"mission repeat"*.

After coming to power in 2012, a committee was set up by the Congress led Government to find out the role of the previous Government in the sale of Government land. The report was tabled in the Vidhan Sabha, which unequivocally said that no Government land was sold. So the slogan '*Himachal on sale* proved a political gimmick.'

LAND settlement: Land settlement work in the state started in 1952 from Chamba district. It has been six decades since, but the work is yet to be completed for the entire state. Among the districts pending are Hamirpur, Kullu and Una. The process essentially establishes the revenue boundaries of villages and towns, which in turn becomes a reference for private individuals to settle the exact demarcation of their properties.

The proposal was mooted to use modern technology to expedite the process, and the settlement office at Dharamshala, which handles the northern region of the state, procured the machines for the purpose. However, the initiative has failed to speed up the work. The absurdity in revenue records that results from the lack of settlement is best seen in a village in Una district of Himachal that is still shown as part of Punjab. Lal Singhi village is located on the outskirts of Una district, bordering Punjab, and as per copies of the revenue record issued even today till 2014 it was part of Hoshiarpur district of Punjab. The

Revenue Department has not been able to complete the settlement of the village spread over a mere 4,000 kanals of land. This poses a problem for people of the villages wanting to divide their ancestral properties.

The infrared way: Earlier, the department used calibrated iron chains or ropes for carrying out the measurements in field. The system was time consuming and prone to errors. The process also involved labour to lug the chains across rough terrains. The new technology uses infrared light to carry out the measurements.

The machine is installed at one point, and the measurement to all points visible from there can be done by just carrying a prism to the other end. This system is also very accurate. What earlier took two months can now be done in two days. At present, the north zone settlement office at Dharamshala has just two such machines, to be used in Dharamshala and Kullu districts. The department requested the government for two more machines and a number of computers to speed up the work.

Inconvenience: People have to travel from Kullu, Una and Hamirpur districts to Dharamshala to get copies of *'musavis'* (basic survey reports of the settlement department). In Madhya Pradesh, the government has created copies of musavis, and given them to booksellers for sale in the respective areas. With that, people don't have to waste time and money on travelling to settlement offices. A similar proposal has been sent to the state government by the Dharamshala office too.

The pending settlement work is also a cause for increase in litigation in revenue cases in lower Himachal. There are about 5,000 pending revenue cases in the court of the Dharamshala Divisional Commissioner. Many have been pending since more than a decade. Owners of land are unable to partition it, as it cannot be demarcated due to lack of proper records and shortage of staff at the ground level. Such requirements stay pending for years too.

Land Ceiling Exemption for Religious Bodies

All religious and spiritual organizations in Himachal will now enjoy exemption from the limit of owning 150 bighas of land. The state government issued a notification, following the grant of assent by the President to the amendment in Section 5 of the HP Ceiling on Land Holdings Act, 1972 in February 2014. Several religious sects, especially those based in Punjab, Haryana, Uttar Pradesh and Rajasthan, had expressed their desire to have their *deras* in Himachal. In fact, some of them own sizeable chunks of land in the hill state where there is bar on purchase of land by non-Himachalis. By granting the religious organizations this exemption, the government paved the way for the regularisation of the excess land, running into thousands of *bighas* purchased by them in violation of the law.

The state government's step to exempt religious bodies from the Land Ceiling Act thousands of *acres* of *benami* land owned by many *deras* in Kangra district automatically stand legalised. These *deras* had about 10,000 acres,

most of the which are *benami.* According to the Act, nobody can procure more than 300 *kanals* in Himachal Pradesh. However, many religious *deras* have bought thousands of acres in the name of their followers. Purchasing the land in the name of their followers amounts to benami land transactions, according to state revenue laws. In June 2005, Himachal Pradesh Government made an agreement with Japanese Government to introduce Japanese pattern of agriculture to take maximum benefit out of minimum land area.

MAJOR CROPS

Himachal Pradesh can be called an *'India-in-miniature'* as almost all climatic conditions prevailing in our country are found in the State. So almost all major crops are grown here; comprising maize, wheat and rice food crops, accounting more than 50 per cent of its total agricultural production and ginger, potato, mushroom and fruits are nonfood crops.

Maize: Maize is the most important food crop of the State concentrated in the rainfed areas. Kangra, Hamirpur, Una Mandi, Solan, Sirmaur and Bilaspur districts are the main producers of maize, accounting for 63 per cent of production in the State. *Himachal Pradesh ranks fifth in the production* of *maize,* after Uttar Pradesh, Bihar, Punjab and Rajasthan. Some of the HYV introduced in the State are *Him-123, Ganga-3, Vijay, Amber BL 42 and BL 78.* In 1990-91, 3.5 lakh hectare land was under maize crop, while production was nearly 655 thousand tons. Under inter cropping pattern of maize sown at 75 cm × 20 cm or 60 cm × 23 cm, with one row of *'soyabeen'* or *'mash'* was found to be remunerative from total production point of view. The average productivity of maize in the state was at 2133 kg per hectare in 1998-99.

In 2005-06 the production of maize was 543.06 metric tonnes which went upto 695.38 in 2006-07 and came down to 682.62 in 2007.08. The yield per hectare at that time was 2.27 metric tonnes. In 2007-08, 280.31 thousand hectare land was under high yielding variety of maize which went up to 296.50 in 2009-10, but came down to 278.65 in 2010-11.

Maize crop is losing sheen in the maize belt as farmers have no direct access to maize-specific food-processing industry that can fetch them good prices locally. Besides, farmers are switching over to the cultivation of more lucrative vegetable crops and growing fodder instead of maize crop. Wild animal menace has also made the maize cultivation difficult. *"We have failed to tap potential of maize in making corn, starch and other processing food items due to the absence of processing units in the state.* "Farmers get Rs 11 per kg for maize, whereas they can fetch Rs 40 per kg if they produce as per the needs of the industry.

According to the Directorate of Maize Research, New Delhi Himachal maize production averages around 2432 kg per hectare, the highest among hill states with maize cultivated in 294.2 hectare area that yielded 7.15 lakh tonnes of maize in the state in 2011-12. We need state specific food processing industry and farmers cultivating maize should be trained to produce industry-

specific crop. Secondly, stray cattle menace and a shift towards more profitable vegetable crops like *capsicum, cabbage, tomatoes* and *peas* have contributed to the decrease in area under maize cultivation that once used to be the staple crop in the hills.

Even the high protein quality hybrid maize varieties introduced by Agriculture University, Palampur are not finding favour with the farmers. "Its cultivation remains on an experimental basis as they have to change seeds every year.

In Mandi district, the area under maize crop dropped from 48000 hectares in 2010-11 to 47750 hectares in 2012-13. The production has declined from 2.9 MT to 2.8 MT per hectare. "About 40 per cent production is damaged in plain areas, but hilly areas in Dharampur, Sarkaghat, Jogindernagar, Gohar, Seraj and Karsog have a good crop".

In Kullu district, the maize area had come down from 22000 hectares to 15750 hectares in the last five years from 2007-2012 The major blow to maize comes from vegetable crops as farmers are getting two crops instead of one maize crop, where irrigation is available. The area under vegetable has increased to 5410 hectares that yielded 1.44 lakh MT in Kullu district. In Mandi district, it had increased from 7000 hectares in 2011 to 8554 hectares in 2012-13 that was expected to yield about 2 lakh MT. Mandi, Kangra, Chamba and Sirmaur districts contribute a major share towards growing the crop with an average yield ranging from 2 MT to 2.5 MT per hectare.

Wheat: Sirmaur, Solan, Bilaspur, Hamirpur, Una, Mandi and Kangra districts account for more than three-fourths of total wheat production in the State. To increase the production of wheat, some HYV introduction are *RR-21, Kalyan Sona, Sona Lika, HPW 155, HPW 251, Omkareshwar (for high altitude area) and Raj 3777 (for plains)* Wheat accounts for more than one-fourth of the total food grain production in the State. In 1990-91, 370.2 thousand hectares land was occupied by wheat and production was 601.0 thousand tonnes. All time high production of wheat was achieved in the State in 1985-86 nearly 492.0 thousand tonnes.

The overall growth trend in respect of wheat crop in Himachal Pradesh shows that since the inception of planning process in the state, the area and production has recorded many fold growth. This includes the effect of both increase in the area as a result of the merger of new areas of Punjab in Himachal and actual change in the area under crop and production as well.

In 2002-03 the total area under wheat production was 366.5 thousand hectares and production 495.56 million tonnes, which went up to 369.8 thousand hectares and production 687.45 metric tonnes in 2004-05. The yield per hectare was 1.86 metric tonnes. In 2007-08 the area was 366.59 thousand hectares and production 562.01 thousand metric tonnes. The yield per hectare was 1.53 metric tonnes. In 2008-09, 360.07 thousand hectare was under high yielding varieties, which went upto 352.52 thousand hectares in 2010-11.

Rice (Paddy): Rice is mainly grown in the district of Kangra, Hamirpur, Mandi, Shimla, Bilaspur, Solan and Sirmaur. Total area under rice crop in 1990-91 was 88.6 thousand hectares and production for the same year was 106 thousand tonnes. Productivity of rice in Himachal Pradesh was 1,128 kg per hectare (average 1968-69 to 1970-71) is more than the all India average of 1, 094 kg. Shallow planting of rice with closer spacing (15 cm ×15 cm) gives good yield. The high yielding variety are HPR 1179, HPR 1068, HPR 2143 and HPR 957.

In 2002-03, 80.6 thousand hectare area was under paddy/ rice cultivation, which went upto 81.4 in 2003-04, but came down to 79.5 in 2004-05. The production in 2002-03 was 85.65 thousand metric tonnes which went up 120.63 in 2003-04 and came down to 109.13 in 2004-05. The yield per hectare at that time was 1.37 metric tonnes. In 2007-08, 78.57 thousand hectares was under paddy, and production 121.45 metric tonnes. In 2010-11, 75.20 thousand hectare was under high yielding paddy variety.

Potato: Large areas are under the cultivation of this lucrative cash crop. It was introduced in Himachal Pradesh in the mid-forties, when import of seed potato was stopped from Burma and other countries due to the second World War. Himachal Pradesh produces different varieties of seed potato of very high quality. Therefore, called the *'Home* of *seed potato'*. Himachal Pradesh ranks tenth in the production of potato among all states.

Its productivity is almost half to that of the country, but major portion of it consists of seed-potato. Central Potato Research Institute, Kufri (Shimla) has been developing high yielding Potato Seed. Emphasis is laid on the grading of Potatoes. Some of the famous varieties introduced are *'Up-to-date', 'Craigsdefiance', 'Kufri Chandermukhi', 'Kufri Alankar', 'Kufri Jeevan', 'Kufri Jyoti', Kufri Himsona, Kufri chipsona-I, Kufri chipsona-II, Kufri chipsona-III, Kufri Jwahar, Kufri Pukhraj, Kufri Satluj, Kufri Pushkar, Kufri Arun and Kufri Surya* .

The *Kufri* variety was developed in the institute in 1968. The seed potato of the State is of disease free quality and exported mainly to Karnataka, Maharashtra, Gujarat, Orissa and Madhya Pradesh. Total production of potato for the year 1990-91 was 98.3 thousand metric tonnes. Today, *Shimla occupies top position among districts in the production* of *seed potato.*

Potato is an important supplementary source of income for people of the state including tribal areas and playing a pivotal role in the state economy. Since potato seed is sent all over India it becomes imperative that its production in the state is carried out with high level of quality and efficiency for this state has additional advantages. One of these is the Headquarters of the Central Potato Research Institute (CPRI) at Kufri in Shimla. The other is that one of the scientific seed production programmes in the country was taken up in Shimla in the early thirties. The state possesses wide network of State Farms for producing seed potato.

Until the fifties, varieties like *Magnum, Bonum* (Dhankhree), *Craig Defiance* (Numbree) and *Sathoo* were introduced on a large scale and remained popular till sixties, when its production declined due to occurrence of late blight disease. By that time, a variety developed in the Central Potato Research Institute Kufri, *Chandermukhi* was introduced which established the economy of the tribal farmers on a firm footing.

Himachal Pradesh was the first state in the country to take legislative measures to regulate the quality seed by promulgating the **'Himachal Pradesh Seed Potato Control Order 1976** which forbade supply of seed potato from the state without proper grading, weight, packing and labelling. With a view to further improving the quality of seed potato, the state took another step by establishing the **Himachal Pradesh State Seed Certification Agency 1979**, to help registered growers in production of certified-I and II Potato seeds, originally received from Central Potato Research Institute. In 1997-98 the total potato production was 15.6 lakh tonnes.

In 2001-02, 10451 hectare area was under potato production and its production was 143035 metric tonnes. In 2004-05 the area went upto 14808 hectares and production 177919 metric tonnes. In 2008-09, 15983 hectare land was under potato cultivation, while production 173681 metric tonnes. In 2010-11 the area was 15259 hectares and production went upto 205970 metric tonnes. In 2012-13, the area under potato production was 14625 hectares and production 182575 metric tonnes. In the recent past the income from potato has been showing decline because of indigenous producing of potato by many states who were importing potato from Himachal Pradesh.

Ginger: Ginger is one of the important cash crops of the Pradesh. At present, the crop is concentrated in Sirmaur, Solan and Bilaspur districts of the Pradesh. But recently cultivation of this crop is extended to other suitable areas in the State. *In respect* of *production, the State ranks next only to Kerala.* Sirmaur occupies top position among districts in the production of the Ginger. Knowing fully the value of dry Ginger, the marketing of it has been taken up on sound footing to ensure remunerative prices to the Ginger cultivators by the State Government.

In 2002-03, 2.6 thousand hectare was under ginger production, which come down to 2.1 in 2004-05, 2.18 in 2005-06 and 2.27 in 2007-08. The production of ginger in 2002-03 was 17.05 metric tonnes, 14.57 metric tonnes in 2004-05 and 25.54 metric tonnes in 2007-08. The average yield in 2005-06 was 7.44 tonnes and in 2007-08, 11.23 tonnes. The area under ginger increased marginally in 2011-12 from 2.27 in 2007-08 to 2.48 thousand hectare, while production reached at 25.54 tonnes. In 2009-10, the area under production was 2.13 thousand hectares and production 13.96 MT and yield 6.55 MT per hectare.

Pulses: The agro-climatic conditions of Himachal Pradesh are ideally

suited for growing Soyabean and Beans and Pulses like *Rajmah, Kulthi, Mash, Gram* etc. In view of national shortage of pulses and oilseeds, greater emphasis has been laid on the development of these crops. In order to disseminate the scientific technology for boosting the production of pulses and oilseeds, demonstrations are being conducted in the fields of farmers and mini-kits are being distributed to the farmers free of cost. Under the Seventh Plan head, Rs. 25 lakh were allocated to the development of Soyabean, Sunflower, pulses and oilseeds.

In 1989-90, total area under pulses and oilseeds production was 82.9 thousand hectares and production for the same period was 16.7 thousand tonnes. In 1993-94 the area under pulses was 36.2 thousand hectares, while the production declined to 10.3 thousand tonnes. In 1995-96 is was 33.9 thousand hectares and 16.9 thousand tonnes respectively.

In 2002-03 the area under pulses was 29.5 thousand hectares and production 8.92 metric tonnes. The area in 2004-05 decreased slightly and came to 29.3 thousand hectares and production was 10.91 metric tonnes. By 2006-07 there was major decrease in the area and it came to 22.9 thousand hectare and production 12.14 metric tonnes. Pulses are facing the real danger as both area and production are showing downward trends. In 2007-08 the area was 33.87 thousand hectares and production 35.96 tonnes. The Union Government has started special program me with the Coordination of state Government to increase production and productivity of the pulses for domestic requirements. By 2011-12 the area under pulses production was 33.94 thousand hectares and production 34.63 metric tonnes.

The high yielding variety of Dal Chana are -ICCB90201, Himachal Chana 2 and Kala Chana Palampur 93. For linseed it is Him alsi-I and Him alsi -II. For Soyabeen P 10-1-1 and for Rai it is JTC -1.

Four crops of the state were brought under national agriculture scheme on 14th May 2010.

Following Programmes have been launched as centrally sponsored schemes (CSS) - to ensure high growth rate in the agriculture sector.

1. **Integrated Scheme of Oilseeds, Pulses, Oil palm and Maize (ISOPOM):** This scheme was launched during the year 2004-05. In this new scheme, all the ongoing schemes of OPP, NPDP and AMDP have been merged. Only maize crop has been considered for Himachal Pradesh. The scheme is being implemented on 75:25 basis except for the component of publicity where Central Government share is 100 per cent. The main components under the scheme are distribution of improved seeds, block and IPM demonstrations, distribution of plant protection materials and equipments, distribution of sprinkler sets, providing pipes to carry water from water sources to the fields and publicity etc.

2. **Supplementation/Complementation of State Efforts through Work Plan (Macro Management of Agriculture):** Government of In-

dia launched this programme during 2000-2001 on 90:10 basis. Under this programme, the states have to identify constraints and prepare schemes for funding through work plan. Flexibility has also been given to State Level Coordination Committee to make changes in allocation, if required, from one scheme to other.

3. **Support to State Extension Programmes for Extension Reforms:** This programme is a major initiative towards revitalizing agricultural extension to make the extension system decentralized and demand driven which is being run on 90:10 basis. The scheme has been conceptualized on the basis of policy framework for agricultural extension and experiences with the innovations in the technology dissemination component of the National Technology Project implemented in the seven states including Himachal Pradesh.

Vegetables: Mid-hills provide great scope for the cultivation of vegetables. It is here that apples can't be grown and vegetable cultivation offers alternative source of cash income to the farmers. Certain vegetables grown in the off season, that is when they cannot be grown in the plains, bring rich dividends to the growers.

In the last decade of 20th century, eight new varieties of tomato, cucumber, bitter-gourd, peas and pumpkin have been evolved. Himachal Pradesh has achieved a quantum growth in the production of vegetables from the negligible production at the time of its inception. Production of vegetables in 1997-98 was nearly 4.75 lakh tonnes, in 1997-98 fetching an income of about Rs. 65 crores to the farmers. Seeds Corporation of India is playing a pivotal role in the vegetable seed production programme. Demonstration on vegetable cultivation and subsidy on agriculture inputs is being provided to the small and marginal farmers, especially to the scheduled caste farmers in these areas. Many farmers around Sirmaur, Solan, Bilaspur, Shimla Kangra, Mandi, Una and Hamirpur are actively involved in the vegetable production. District Chamba, Mandi, Kullu, Lahaul-Spiti and Kinnaur are best suited for off-season vegetables.

In 2001-02 the area under vegetables (other than potato) was 34150 hectares and production 627445 metric tonnes. By 2004-05 the area increased upto 46213 hectares and production went upto 832442 metric tonnes. This clearly shows how interest of the farmers is shifting from food crops to vegetable production since the first decade of 21st century. In 2006-07 the area under vegetables was 52053 hectares and production increased to 991442 metric tonnes. In 2009-10 some more increase took place in the area and production i.e. 63879 hectares and 1206242 metric tonnes. Almost all districts are now contributing in the vegetable production to have better income and rich dividends.

By 2011-12 the area increased upto 65270 hectares and production rose to 12,69,896 metric tonnes. All areas where irrigation facility has reached to ensure water round the clock, vegetable production has become first choice

of the farmers. To facilitate the efforts of the farmers, the state Government has set up fruit and vegetable markets at a number of places, so that farmers should not have transportation problem to take their products to the markets to far off areas. The popular varieties of tomatos are- Solan Lalima, Himsona 7711 and 2000 plus.

European vegetables: Asparagus and broccoli are some of the European vegetables whose cultivations has come to stay in different parts of Himachal Pradesh. A new variety of asparagus released by the H.P. Krishi Vishvavidyalaya sometime back is reported to be showing good results. The university has done a good job in developing various off-season vegetables, in the state at different altitudes, including European vegetables like *asparagus, broccoli, red cabbage, celery, parsley, brussels sprouts, lettuce and leek* are in great demand in the plains, specially in big cities and also provide better income to the producers. The high yielding variety of brinjal developed by CSKV Palampur are *Arka Keshav HHR -21* and *Arka NidhiHHR-12.* For Cauliflower the most popular is *Palam Uphar DNKL -12.*

The winter growing vegetables are grown in summer also in higher hill areas of Himachal Pradesh because of the varied agro-climatic conditions. Himachal Pradesh has earned a name in the country as a leading producer of off season vegetables. The cultivation of off-season vegetables would not only meet the requirement of the plains to cater to the tastes of foreign tourists, particularly from European countries, but also the growing demand in the local markets. Besides the acceptability of these European vegetables among the local people, the increase in the tourist traffic from the Western countries to this hill state, has made their cultivation highly remunerative.

Out of these rare vegetable, the area under *broccoli* and *asparagus* is gradually increasing. Among all the vegetables in the cole family, broccoli is rated as more nutritive. The two varieties developed by the University Palampur, are *Samridhi* (Green head) and *DPPB-I* (Purple head), which are giving encouraging results.

The new variety of asparagus like other varieties is a perennial vegetable propagated both through seed and crown multiplication. Once planted the crop lasts for several years. From third year of planting onward, the young spears are harvested with the help of knife two to three inches below the soil. Harvesting is continued from March to April. They are harvested and consumed at tender stage. For marketing, these are arranged in small bundles in poly-bags and kept in refrigerated conditions. Great demand for supply of seed of these vegetables has been coming from various states and efforts are afoot in the Agriculture University Palampur to meet these demands by producing seed in the farms of the Agriculture University Palampur.

Farmers Shift Towards Veggies: The vegetable output is set to overtake the state's total food grain production over the next few years as more farmers take to cultivation of *tomato, capsicum, cauliflower, cabbage, potato, peas* and other such crops to take advantage of their zooming prices.

While the food grain production has been oscillating between 12 lakh tonne and 15 lakh tonne, the vegetable production has been increasing steadily over the past two decades but it has taken a quantum leap in recent years. The vegetable production increased from 6.5 lakh tonnes in 1990-91 to 12.69 lakh tonnes in 2011-12. The state produced 13.70 lakh tonnes of vegetable in 2012-13 and the target for 2013-14 was 14 lakh tonnes.

The high prices of vegetables have motivated farmers to switch over from other crops to vegetables and during the current Rabi season, the area under table potato is likely to increase significantly mainly because of the high prices it fetched during the kharif season. Even the seed potato, grown in tribal and other high hill areas, was sold as table potato by farmers.

There was a shortage of seed and the rates were also high but still the farmers procured it from wherever possible. The area under potato during Rabi sowing went up to 2,800 hectares in 2012-13, and the production increased from 32,000 tonnes to 45,000 tonnes. The area under tomato also increased from 9,870 hectares to about 12,000 hectares in 2013-14 and the production from 3.95 lakh tonnes to 4.50 lakh tonnes.

The current trend indicates that the vegetable production would cross the 16 lakh tonnes mark by 2016-17. In comparison, the food-grain production has been increasing only marginally and it touched 15 lakh tonnes for the first time in 2011-12. In 2012-13, it reached 15.54 lakh tonnes and the target for the 2013-14 year was 15.80 lakh tonne. Apart from the spurt in prices, the main reason for farmer switching over to vegetable is that they could have three and in some areas even four crops in a year. As such, the possibility of total crop failure is remote.

Mushroom: Agro-climatic condition in many parts of the state offer vast potentialities for the development of mushroom cultivation. It is new addition to the already existing long list of cash earning crops. The commercial cultivation on modern scientific lines was initiated on pilot basis in the year 1977 with the launching an FAO/UNDP assisted mushroom development project at *'Solan'*. Himachal Pradesh is the only state in the country *which is growing mushroom on a large scale for the purpose* of *seed production.*

The level of 525 tonnes of mushroom production was achieved during the year 1987-88. In the Seventh Five Year Plan, 70 lakh rupees were allocated to the development of mushroom. Keeping in view, the suitable climatic conditions in Kullu district for the cultivation of mushroom, one bulk pasteurization unit for the preparation of compost for distribution to the intending mushroom growers of that district was set up.

The Indo-Dutch Mushroom Development Project Palampur was launched in 1985 for introduction of Dutch technology in Mushroom production has became operational in 1992 where about 368.6 tonnes of Mushrooms were produced annually and also farmers are imparted intensive training in Mushroom cultivation. Before their natural production, Mushrooms were

found wild during a certain period in a year and had to be ascertained nonpoisonous. Now mushrooms are grown throughout the year. Solan has been declared the mushroom district of the state. Dr. Y.S. Parmar University of Horticulture and Forestry, Nauni has evolved complete technology for its cultivation in the state which requires limited resources. Research has been conducted on preparation of compost and spawn required for Mushroom cultivation. It has been established now that button and paddy straw mushroom contain higher amount of protein in comparison to several vegetables such as cabbage, peas, potato, carrot and tomato. They are highly useful diet for diabetic patients as they are entirely devoid of sugar and starch. The wild Mushroom is known as *guchhi.*

HIGH-YIELDING HYBRIDS FOR MUSHROOM

Scientists of the Dr. Y.S. Parmar University of Horticulture and Forestry, Nauni, achieved a rare feat by developing high yielding hybrids of white button mushroom through crossing. The newly developed ***hybrid- 4*** is a cross between U3 and A-15 and it has recorded an outstanding average yield of 26.10 kg per 100 kg compost against 22.50 kg recorded in U3 and 14.02 kg in A-15 parents during the cropping period of 60 days on short method of compost.

A significant breakthrough was achieved in strain development programme of Agaricus bisporus (white button mushroom) by developing four hybrids through crossing, namely hybrid-7, hybrid-4 hybrid-2 and hybrid-1. Hybrid-4 is a cross between U3 and A-15. Hybrid-4 has not only recorded 18-22 per cent higher yield over parents but also exceeded in yield as compared to the other high yielding strains of agarics bisporus, including U3, vis-a vis yield performance. Other important morphological characteristics of hybrid -4 which have made this hybrid significant includes its firm and compact fruit body, round shape, white colour, better shelf life and its ability not to open as fast as has been observed in the parent strains.

Guchhi Mushrooming in Hlls: An epicurean delicacy, guchhi is literally mushrooming in the hills, thanks to highly conducive weather conditions created by heavy snow followed by frequent hail and thunderstorms during the fruiting season. The expensive edible fungus (***morchella esculenta***) is being collected by villagers even in areas at an elevation of around 4,000 meters from where it had virtually vanished due to receding seasonal snow line and deficient winter rain.

The winter has been terminating early in recent years and ambient temperature rising from February when guchhi fruiting season commences. Frequent spells of hailstorms in the month of February and March may caused damage to fruit crops but creates ideal conditions for mushrooming growth of guchhi. In the Gohar region of Mandi, it has appeared in low-elevation areas from where no collection has been made for years. More importantly, it is being sold instantly at a rate ranging from Rs. 8000 to Rs. 10000 per kg by

Source: HPDES- Statistical outline, 1992-2011-12. *Land Records Department.*

the first collector.

Villagers in most parts of the state except Chamba are collecting between three to five times more guchhi than they normally do. The collection starts in March from low- elevation areas and continues till the end of May with melting of snow up to an altitude of 12000 ft. The common belief among villagers is that lightning that accompanies thunderstorms and hailstorms around the end of winter triggers the growth of edible fungi in the wild. Mycologist say that thundershowers are usually accompanied by showers which provide moisture to activate dormant mycelium of guchhi and trigger the process of fruiting. There is no direct correlation of lightning to the spurt in the growth of fungi.

Kuth: It is cultivated mainly in the district of Lahaul-Spiti, Kullu and Kinnaur. The roots of these plants have a great medicinal value and can also

be used as an insecticide or an insect repellant. Kuth is exported to many countries, viz. United States, Hongkong and France.

Kuth, once a widely cultivated crop and a foreign exchange earner has virtually become extinct since 1972 when the state government put a ban on it. The ban proved fatal that never really picked up even after the government lifted the ban in 1985. Kuth, and aromatic plant which has wide ranging uses in perfumery industry has over the years been relegated to the fourth place after potato, hops and peas, the more remunerative crops. Kuth crop could be harvested only after three years whereas other cash crops yield returns annually.

Flax: Flax is an annual plant similar to linseed which produces good quality fibre and its botanical name is *'Linum usitatissimum'*. In India it is grown for its oil and is called linseed. Flax plants are taller (80 to 120 cm) and branches are only at the top giving enough reed length for the Production of fibers, whereas the linseed plants, grown for seed to get oil, are short, rough and profusely branched. The plant initially has a distinct main stem but four to six auxiliary stems (tillers) develop later.

Flax has been grown for fibre production for the first time in the country in Himachal Pradesh. India is entirely dependent on imports for its requirement of fibre and by 1998-99 fibre worth Rs. 80 to Rs. 90 crore was imported annually from Europe. The import valued Flax went up 220 crore in 2004-05, 270 crore in 2007-08 and 590 crore by 2010-11. India can save crores by promoting indigenous production. Flax is an important textile fibre from which linen is obtained. It is soft, lustrous and flexible but stronger than cotton, rayon and wool. The great strength, fineness, durability and better resistance to environment fluctuation are some of its characteristics making it a unique fibre which cannot be substituted in this synthetic fibre era.

Flax is used for making special sewing threads and ropes, canvas, fire houses, high quality paper, surgical bandages, while its short fibre is used as raw pulp for manufacturing paper. The rough fibre is used for reinforcing plastics based on unsaturated polyesters, besides it blends well with wool, silk and cotton in the preparation of fine fabrics.

The H.P. Agriculture University supplied four tonnes of fibre and five tonnes of dry stalk to a textile mill (JST) of Calcutta, one of the leading users of imported flax fibre in the country in 1998. Over a dozen varieties evaluated included *'Jeewan'*(DPL), *'Nagarkot'*(KL-31), *'Flax-I'*and *'Aoyagi'*, all developed by the university. Two exotic varieties, *Belinka* and *Aeriane,* were found up to the mark. More flax fibre will be supplied to the mill for further evaluation.

The most attractive feature of flax is that it yields the highest return comparable to any other crop grown in the state. On an average 700 kg of good quality fibre can be obtained from one hectare of land which can bring a net return of Rs. 30,000 as against Rs. 15,000 and Rs. 12,000 fetched by wheat and linseed respectively. The process of transforming flax into fibre

requires a series of steps. After harvesting, the plant is retted. It is followed by scutching – a mechanical process to extract fibre. The quality of fibre depends entirely on retting and scutching. Hence, equipment and facilities are required.

Sugarbeet Seed: Kinnaur is the only district where this seed can be produced. It has opened up new avenue of income to the farmers of that area.

MNREGA FUNDS CAN BE USED FOR CEMENTED PATHWAYS: The Union Ministry for Rural Development and Panchayati Raj in its new direction dated 17th January 2012, allowed the use of MNREGA fund for the construction of cemented pathways in rural areas of the state. This has come as a big relief for the Rural Development and Panchayati Department of the state.

Modernisation of Farm Techniques

Although geographical constraints are there to block the use of modern implements in farming, yet bringing more and more land under cultivation, emphasis is being laid on intensive cultivation, multiple cropping, improved agricultural inputs and mixed farming. To make agriculture more useful, the government of Himachal Pradesh has introduced *'Crop Insurance Scheme'* from the year 1981-82 in the State on pilot basis and comprehensive scheme from Kharif Crops 1986. With the collaboration of West Germany, intensive agricultural development programme was launched in Mandi district in 1962 and in Kangra district in 1967.

At present, 'Farmer's Training Centre' is located at Sundernager in Mandi district. This centre is catering to the training of the farmers. E.E.C had also launched a scheme of training for 22,500 women farmers in agriculture over a period of five years (1980-85). The extension training centre, **Mashobra**, known as **'Gram Sewak Training Centre'** has been doing useful work in training Gram Sewaks and Agriculture Sub-Inspectors. This centre is also organising courses for defence personnel (Ex-Servicemen) in the improved techniques of cultivation of vegetables and cash crops.

New schemes have been introduced for checking the quality of agricultural implements supplied to the farmers. The Agro-Industries Corporation of Himachal Pradesh has proposed to establish agro-service centre to render necessary service to repair agriculture machinery maintained by farmers. Under the Seventh Plan head, Rs. 40 lakh was allocated for the improvements of agricultural implements and agro-service schemes. The following table in clear indicator of the progress induced in the agricultural engineering in the past years:

Use of fertilisers has to play a great role in enhancing the production and productivity. With a view to provide fertilisers to the farmers at a reasonable and equitable rates throughout the state, 100% subsidy on transportation of

fertilisers is given to the farmers. The major work of fertiliser procurement and distribution has been entrusted to the Cooperative Institutions, who distribute fertilisers throughout the state. Up till 1998 there were 8032 sale points in the state, out of which 4437 belong to cooperative through which fertiliser was distributed to the farmers. The number of cooperative distribution centres reached at 4321 in 2004-05, 4469 in 2006-07, 4469 in 2009-10 and 4709 in 2013-14. Since 1991-92, with the introduction of new economic policy and new farm policy of Central Government, State Government has also reduced the percentage of subsidy provided to the farmers at all levels.

The estimates of the quantity of fertilisers used in the pre-1966 period, were fluctuating. But it is clear that after 1966, the use of the fertilisers has grown very rapidly from 1970-71 onwards. In 1981-82, the per hectare consumption of fertilisers in Himachal Pradesh was only 19.5kg as against the national average of 34.6 kg. The approved Seventh Plan outlay for manures and fertilisers was Rs. 585.50 lakh. The production of rural compost in the year 1986-87 was 37 lakh tonnes.

TABLE - 7 DISTRIBUTION of FERTILISER

Years	Estimated Quantity of Fertilisers Used (Metric Tonnes)
1950-51	N.A
1960-61	923
1965-66	9,336
1970-71	4,790
1975-76	7,587
1981-82	18,215
1984-85	21,750
1986-87	26,112
1988-89	30,298
1990-91	34,602
1992-93	30,605
1993-94	28,614
1994-95	29,227
1995-96	34852
1996-97	34672
1997-98	34857
1998-99	36493
2001-02	40156
2004-05	46253
2009-10	53238
2012-13	55133

Source: *(i)* DESHP Statistical Outline, 1983 to 2012-13

In the year 2000-01, during kharif season 17292 metric tonne fertilizer was used, while for Rabi crops 18260 metric tonnes. The use of fertilizer continued fluctuating since then, as in 2003-04 for kharif it was 18297 and

Rabi 28511 metric tonnes. It the year 2006-07 during Kharif season 18592 and Rabi season 30,389 metric tonnes fertilizer was used. The consumption share went upto 19811 for kharif and 35,322 metric tonnes for rabi season in 2010-11. Under various schemes, farmers are provided with information on the use of fertilisers.

The increasing use of fertilisers by farmers, is the indication of their knowledge and information on the modern farming techniques. During 1992-93, under the high yielding variety programme, 451.1 thousand hectares of land was covered. In the year 2001-02, 621.73 thousand hectare area was under high yielding variety crops. Which increased, subsequently as follows - 2003-04, 665.16, 2006-07, 702.86, 2007-08 685.90 and in 2010-11 it was 680.85 thousand hectares, land which was under high yielding variety. The decrease in the cropped area and cultivable land can be attributed to the fact that a very large number of youth are opting for job, outside and away from their home, causing negligence and dislikeness for agriculture.

The increasing unemployment could be attributed to the same reason. Farmers in Himachal Pradesh are using now all possible and available to achieve higher rate of growth in the agricultural production. *To increase growth in agriculture sector, we need educated and well informed man power, which can only be done by reversing the trend of migration from rural to urban areas.*

Use of unsafe chemicals on crops banned : Tightening its grip over the spurious chemicals flooding the markets, the Central Insecticides Board and Registration Committee (CIBRC) imposed restriction on the use of all spray oils, fungicides and insecticides not tested and registered with the board, under the Insecticides Act, with immediate effect in the state, from September 2013. The board has cited the invasion of spurious and dangerous sprays and chemicals in the markets luring farmers to use these on crops to raise the production and quality.

The board has cited their harmful effects on crops, human health and water bodies, farms and physical environment. As a result, farmers are facing a shortage of subsidised chemicals, including spray oils. A major problem is that in the harsh winter months in the hills, when transport is made impossible due to snow blocking all link roads, mainly in the areas of Shimla, Kinnaur, Lahaul-Spiti, Chamba, Kullu and Mandi districts. The department of agriculture and horticulture should come to the rescue of farmers and ensure that only registered product are available in the local market.

HYBRID WHEAT VARIETY PHASED OUT: Coming to terms with the yellow rust that is destroying a major chunk or wheat crop in the state, the government decided to phase out the hybrid wheat varieties that was in use for the past years and has made it mandatory for private companies to do the DNA profiling of their seeds from the agricultural university, Palampur. The hybrid wheat seeds, mainly the three varieties ***PBW-502, PBW-343, PBW-373,*** which the agricultural department had been procuring from

NAFED and the Haryana Seed Corporation for the past years, phased out and replaced by the new hybrid seed varieties in January 2014.

In fact, the yellow rust plagued these three varieties in the lower region of the state. The yellow rust, a fungal disease, had destroyed wheat crop ranging from 30 per cent to 70 per cent. The department of Agriculture adopted proactive approach to deal with problem as such to ensure greater production and productivity. To assist farmer of the state local centre and agriculture officers have been readily extending their helping hands.

FUNGUS TO BOOST CROP YIELD: A cultivable *mycontiza*-like fungus discovered by scientist of Amity University may prove to be a boon for vegetable growers of Himachal Pradesh as it has tremendously increased the crop growth and productivity. The scientists found that the fungus named *Piriformospora Indica* (PFSI) increase both the growth and productivity of *cauliflower, capsicum* and *tomato* vegetable crops in hill areas of the state. The university research team identified it in the year 2013.

ORGANIC FARMING POLICY

The creation of an agency for the scientific validation and certification of organic produce, introduction of diploma courses in organic agriculture in the two farm universities and providing support services to farmers for the switch over are the main features of the policy approved by the government to boost organic farming in the hill state as part of its efforts to promote sustainable and environment -friendly agriculture and horticulture.

The hill state has vast scope for organic farming and there are some landlocked pockets in the interiors like Pangi and Dodra Kwar, where organic farming is being carried out traditionally. However, in the absence of scientific validation and certification, the produce cannot be marketed as "organic" . The farmers of such remote pockets will gain immensely with the creation of an accredited certification agency as the "organic" label will enhance the market value of their produce.

Farmers will not be made to switch over to organic farming in one go. They will be encouraged to substitute chemical fertilizers with organic manure in a phased manner to improve the fertility of the soil and maximize circulation plan nutrients. Cadres of scientific manpower with a thorough knowledge of organic agriculture will be built up for which scientists of the Dr. Y.S. Parmar University of Horticulture and Forestry, Nauni, and the Chaudhary Sarvan Kumar University of Agriculture, Palampur, will be carrying out exhaustive research in organic farming , besides introducing diploma and certificate courses in organic agriculture.

Incentive- based schemes for farmers will include subsidy on inputs like seeds, organic manure bio-fertilizers and bio-pesticides for strengthening organic resource base, capacity building through training, exposure visits, trials on farmers fields and support for adoption technologies like vermi-

composting and preparation of organic input at farms. While the Himachal Organic Farmers Forum has already been set up, the private sector and NGOs will be encouraged to join hands to form a state-level non-government body for the organic sector. It will be an advisory body to steer and monitor the growth of organic farming.

Standardization of technologies of organic farming for different categories of crops, farmers, farming systems, resource bases and agro-ecological zones, selection and breeding of suitable varieties for organic farming, development of nutrient management protocols with rotations, nutrient management strategies and on-farm input management with locally available resources, organic-compliant plant-protection measures, identification of suitable varieties from the existing pool of crops and varieties for optimum output, integration of animals with cropping system and development of appropriate machines, tools and machine-driven, bullock-driven devices will be pursued on the technological front.

WORLD BANK PROJECT USHERS IN ORGANIC REVOLUTION: Primarily aimed at environmental rehabilitation of degraded hills, the world Bank-funded Mid-Himalayan Watershed Development Project is ushering in an organic revolution in several parts of the state. Introduced in micro-watersheds as part of the livelihood enhancement programme, a subsidiary activity, vermi-composting, is proving a boon for poor farmers. In areas like Kullu, apple and vegetable growers no longer need to procure organic manure from neighbouring states.

In fact, local farmers are selling vermi-compost to supplement their meagre income from small landholdings. Over the past years, vermi-compost unit have been set up in almost all the 6,000 odd villages falling under the 600 gram panchayats covered under the Rs 337 crore project. In all, 7,189 units have been set up under the project and on an average each unit produces two tonnes of organic manure.

Unlike normal pits dug on the ground, the project authorities opted for concrete structures to ensure quality of manure, though each such unit cost between Rs 7,000 to Rs 8,000. The intervention has popularized organic farming in the project area, which will help improve environmental sustainability in the long run. The quality of manure got analysed by the farm university and farmers are supplied bags on which the detail of the nutrients present has been printed. The focus is now on ensuring certification of the manure. The maximum 836 units are in Kullu, which produced 16,720 quintals of manure worth Rs 83,60,000. Earlier, local apple growers used to procure 30 to 40 truckloads of organic manure from the neighbouring states every season. Economic gains by selling vermi-compost apart, the switch over to organic farming will gradually improve the quality of soil, reduce environmental pollution caused by chemical fertilizers and increase productivity. When all the units achieve full-capacity production, organic manure worth Rs 77.5 crore will be produced annually.

Since 2001, there is continuous decrease in the share of cultivable land in the state. In 2001, the cultivable land was 11,56,600 hectare, in 2005, 11,12,880 hectare, in 2007, 11,01,600 hectare and by 2013 it came down to 8,90,500 hectare. In the past 12 years from 2001 to 2013, 2,66,100 hectare land had reduced as uncultivated land. The reason behind this shift has been largely monkey menance and other wild animals. On an average agriculture /horticulture products to the value of Rs. 500/-crore are annually destroyed or damaged by wild animals all over the state.

Himachal Under Food Security: Largely perceived as the political game-changer by then ruling Congress, in 2013, the Food Security Scheme was launched with much fanfare by Chief Minister Vir Bhadra Singh from a public function on the historic Ridge on 15th August 2013. Himachal became the fifth state in the country to implement the **Rajiv Gandhi Ann Yojana** under the National Food Security Act as the Chief Minister handed over ration bags to 104-year old Mast Ram and 70-year-old Vidya Devi of the Sunni area. In all 37 lakh people will be given 3 kg of wheat at Rs 2 per kg and 2 kg of rice at Rs 3 per kg every month under the scheme while the Antyodaya families will continue to get 20 kg of wheat and 15 kg of rice per month as per the past practice. There are 16.99 lakh ration card families in the state, including APL, BPL, Antodaya Yojana and Ann Purna Yojana, which were getting subsidized ration.

IRRIGATION

Total geographical area of Himachal Pradesh is 55.67 lakh hectares. Out of this, a high percentage of area is under perpetual snow or under forests and steep barren slopes. As per latest available figures, only 5.83 lakh hectares is the net area sown. It is estimated that ultimate irrigation potential of the state is approximately 3.35 lakh hectares out of which 50,000 hectares can be brought under irrigation through major and medium irrigation projects and 2.85 lakh under minor irrigation schemes. The statistical data regarding irrigation potential available and created is given below:

Irrigation Potential in Himachal Pradesh

Sr. No.	Item	Area (lakh hect.)
1	2	3
1.	Total Geographical Area	55.67
2.	Net Area Sown	5.83
3.	Ultimate Irrigation Potential Available	
	i) Major & Medium Irrigation	0.50
	ii) Minor Irrigation	2.85
	Total	3·35
4.	Created upto 31st March, 2012	2.50

Irrigation projects are classified into three categories major, medium and

minor. Projects having cultivable command area (CCA) of more than 10,000 hectares are classified as 'Major Irrigation Projects', projects which have a CCA of more than 2,000 hectares but less than 10,000 hectares are classified as 'Medium Irrigation Projects' and projects with CCA of 2,000 hectares or less are classified as 'Minor Irrigation Projects'. Under Minor Irrigation projects, both types of water development viz. surface and ground is included.

Major and Medium Irrigation

There is no major irrigation project in the state.

One major irrigation project "Shahnehar" was completed in 11th Plan. Similarly three medium irrigation projects (i) Siddhata (ii) Balh Valley and (iii) Changer Areas were also completed during 11th Plan.

Medium Irrigation

The following project being implemented during 12th Plan period:-1. **Phina Singh Project**

The project has been named after late Shri Phina Singh, a local resident of village Niari, who initiated the idea of constructing an earthen rock fill dam across Chakki Khad near village Lahru on the boundary of Kangra and Chamba districts.

2. **Nadaun Area Project** Located in district Hamirpur, the project is likely to be taken up in the 12th five year plan

3. **Koncil to Jharera Mandop Thona Project** Located in district Shimla, the project is likely to be taken up in the 12th five year plan

4. **Satyar Khad Project** Located in district Shimla, the project is likely to be taken up in the 12th five year plan

5. **Gada Gushaini** to Mohini in district Kullu, the project is likely to be taken up in the 12th five year plan

6. **Sukha Har** in district Kangra, the project is likely to be taken up in the 12th five year plan

7. **Hathali Suranga & Bhadreta area** in district Mandi, the project is likely to be taken up in the 12th five year plan

8. **Sidhata Medium Irrigation Project:** The project area is situated in Jawali tehsil in Kangra District. The water of Dehar stream is proposed to be diverted by constructing a small weir at village Anuhi through open channel, tunnel cut and cover section.

9. **L.I.P In Changer Area From Anandpur Hydel Channel:** An agreement between the Govt. Punjab and Himachal Pradesh Himachal Pradesh was reached in the year 1983 according to which Himachal Pradesh agreed to acquired some land situated in village Dablat Majari Distt. Bilaspur in Himachal Pradesh which was require by the Govt. of Punjab for construction of Anandpur Hydel Channel Project in lieu, thereof, the Govt. of Punjab had agreed to release 25 cusecs of water regularly from Anandpur

Hydel Channel for irrigation and drinking water purposes in Himachal Pradesh.

10. **Balh Valley Medium Irrigation Project (Left Bank):** The project is envisaged to provide irrigation facilities to 60 villages in the valley in the Left Bank of Suketi Khad covering CCA 2780 hectare of (2175 hectare by surface water and 605 hectare by Ground Water. It is proposed to tap water from Suketi Khad from a point upstream of the existing silt ejector of Sundernagar balancing reservoir which is a part of Beas Satluj link project (BSL).

Major And Medium Irrigation

Area which can be irrigated through various major and medium irrigation projects can only be known after detailed investigation and survey is carried out. However, projects which are completed under execution and those which have been identified for survey and investigation are as under:-

Table-8

Sr. No.	Name of Project	Approx Area covered (In Hects)	Status Which can be
1	2	3	4
1.	Giri irrigation project	5263	Completed
2.	Balh Valley Project	2410	Completed
3.	Bhabour Sahib Phase-I Project	923	Completed
4.	Bhabour Sahib Phase-II Project	2640	Completed
5.	Shah Nehar Project (Maj. Irrg.)	15287	Completed
6.	Sidhata Project	3150	Completed
7.	Anandpur Hydel changer area Project in Bilaspur Distt.	2000	Completed
8.	Phina Singh Project	4650	In Progress
9.	Hatli Sarangra Bhadrota Project (Baldwara valley) in Sarkaghat Teh of Mandi Distt.	3000	Under investigation
10.	Medium Irrigation Project Kandrour, Harkhar, Panoh Manjhasu Rahian, Auhar, Reshikesh, Harkukar, Loharwin Koth and Dakri Bilaspur.	2300	To be investigated
11.	Jangleberi Project in Hamirpur	2000	Under investigation
12.	Sakral Project in Hamirpur Distt.	2000	Under investigation
13.	Churu Project in Una Distt.	2000	Under investigation
14.	Beet Illaqa Project in Una	2000	Under investigation

15. Sarwari Project in Kullu Distt.	2000	Under investigation
16. Dhaneta Barsar Project in Hamirpur	2000	Under investigation
17. Bara Solda Nagrota Suriyan Project	2000	Under investigation
18. Basar Garli Glory Shah Talai	3000	Under investigation
19. Tikkar Dam Project in Hamirpur	2000	Under investigation
20. Pandol-Chauntra in Mandi Distt.	2000	Under investigation
21. Meharam Dharwabon in Mandi Distt.	2000	Under investigation
22. Rela Bhen-Kher Badhel in Mandi Distt.	2000	Under investigation
23. Ropa Siaso med. Irrig. Project in Kinnour	2000	Under investigation

Minor Irrigation

Himachal Pradesh is a mountainous state. The population of the state as per 2011 census is 68.57 lakh. Almost 80% of the population is engaged in agricultural work though a little over 10% of the total land is cultivated. The land holdings of most of the farmers are very small. The total irregable area estimated as per master plan is 3.35 lakh hectares of which 2.50 lakh hectares has been created. The Irrigation and Public Health/ Agriculture/ Rural Development departments are executing minor irrigation schemes in state sector/loans under RIDF programme and AIBP for bringing more and more area under irrigation.

Rural Infrastructure Development Fund (RIDF) was setup in 1995-96 (RIDF-I) made up of contributions to be received from scheduled commercial banks operating in India. Since then, the scheme has been continued with the announcements in the successive union budgets with enhanced contribution.

Schemes under Accelerated Irrigation Benefit Programme (AIBP-90:10)

Completed Schemes

Accelerated Irrigation Benefit Programme (AIBP) was introduced in 1996-97 to accelerate completion of ongoing irrigation projects which were in an advance stage of construction and beyond the resource capability of the state governments. The criteria for consideration of projects under AIBP were modified from time to time but at present effective norms are prevailing as modified in December 2006, since then an area of 17374.86 hect. has been created for irrigation.

Shah Canal Commissioned : The construction of the Shah Canal, which will bring the state's share of irrigation water from Pong Dam to farmers of Kangra district after a wait of about 40 years, is Complete. Irrigation officials released water into the canal and found the project to be fit for use

for irrigation purpose. The 45 km long canal is the first irrigation project for hilly areas in the country and has emerged as an "engineering marvel". The model was not being replicated in the hill states of the country. Under the project, water of the Beas, picked up from the Talwara barrage, passes through tunnels and aqueducts of Shah Canal before reaching fields in Indora block of Kangra district.

The water passes through 12 km long aqueducts through its 45 km length. The aqueducts have been constructed at a height of 25 meters from the ground level at various places using RCC pillars. It is the longest aqueduct used in a canal irrigation project in the country. The canal's unique design has been developed by engineers of the department. Besides constructing the main canal, the department has also been constructing RCC minor and sub-minor canals for carrying water to fields. The canal water will provide irrigation facilities in 93 villages of the Indora area.

Khatris dying Slow death: The traditional harvesting system of lower hill areas is being neglected by the government. Much is being said and proposed about the need for rainwater harvesting, but the traditional acumen of the people is being neglected. Traditional rainwater harvesting structures are known as *'khatris'* in the local dialect. These are used in water-scarce areas of Kangra and Hamirpur districts, commonly known as *'changar'*.

The knowledge of forming *'khatris'* is slowly dying with traditional artisans. The basic criterion for selecting the place is the presence of thick vegetation over sandy rock. Artisans chisel a room-type structure around 10 feet by 12 feet with a 45-degree gradient in the hill. It can store upto 1 lakh liters of water. The water percolates into *'khatris'* through the roof. In some cases, skilled artisans find permanent streams of water in the hills through which water seeps the year round.

'Khatris' are generally full to the brims in the monsoon as the area receives heavy rains. In summer and winter, *'khatris'* are the lifeline of any *'Changar'* area. People used to fetch water from *'khatris'* during summer. These days, they mostly depend on government supply from water tankers. The water of traditional rainwater harvesting is used for animals and washing. People used to have their own *'khatris'* which were locked for the purpose of personal use. With the augmentation of water supply schemes in 'changar' areas, only a few are constructing *'khatris'* now.

To prevent biological contamination of water in *'khatris'*, hand pumps can be installed outside those. Hand pumps will give water throughout the year due to storage of water in *'khatris'*. The construction of *'khatris'* be included in Mahatma Gandhi National Rural Employment Guarantee Scheme. People should be allowed to construct *'khatris'* while working under the scheme, *'Khatris'* are part of the traditional knowledge of people of 'changar' areas. The traditional rainwater harvesting system deserves government protection as it saves water and helps in protecting the ecology of the area.

Command Area Development

The state Govt. is conscious to reduce the gap between the irrigation potential created and utilization in the irrigation sector, so as to supply adequate water to the farmers for raising crops with a view to increasing their agricultural production and cropping intensity through assured supply of water command area development is being taken-up only in the medium irrigation projects which are complete.

Flood Control

The entire region of Himachal Pradesh forms catchment of rivers Yamuna, Satluj, Beas, Ravi and Chenab, which flow through this territory to plains and carry a very heavy load of silt. The path that these rivers and their tributaries traverse is having steep slopes causing thereby high velocity and erode much of the cultivable lands. The population also get effected, houses and agriculture lands, often gets submerged or gets washed off. The losses due to flood include:

1. Human lives lost.
2. Cattle heads lost.
3. Crops damaged
4. Agriculture land damaged due to spread of sand in the inundated areas.
5. Damage of flood protection works.
6. Damage to public utilities such as roads, bridges, water supply schemes, electricity and telephone lines.

Flood protection works in the shape of channeling of the rivers and their tributaries by construction of embankments, spurs etc. at places which are prone to floods is essential for the helpless residents who are affected year after year over due to flood havoc.

The total geographical area of the state is 55.67 lakh hects. and net cultivable area is 5.83 lakh hects. According to a rough estimate about 2.31 lakh hects. area in the state is subject to yearly flood havoc. There is an immediate need for providing flood production works for the habitation and cultivable land, which is situated in most affected flood prone area along Giri river, Bata river, Suketi Khad, Swan Khad, Sirsa Nadi and Chakki Khad.

ANIMAL HUSBANDRY

Animal Husbandry plays an important role to boost the rural economy. With its large livestock population, the state has vast potential for meeting the growing needs of its people, particularly in respect of livestock products such as milk, eggs, meat and wool. The livestock sector provides not only animal protein but also various types of raw material for industrial use. Besides, this sector has a large potential for generating employment particularly for unemployed rural youth.

In Himachal Pradesh, more than 90% of rural population rears livestock which caters to the needs of entire population in the form of milk and milk products. Due to the hilly topography of the state and climatic variation most of the people rear indigenous cattle, sheep and goats whereas in plain areas of the state people have switched over entirely to cross breeding in domestic animals. Himachal Pradesh is endowed with the large livestock population.

According to 2007 livestock census, total livestock population of Himachal Pradesh is 52.17 lakh which includes 22.69 lakh cattle, (cross breed 7.82 lakh) 7.62 lakh buffaloes, 9.01 lakh sheep (cross breed 1.92 lakh), 12.41 lakh goats and 0.13 lakh horses and ponies. Beside this, poultry population of the State is 8.07 lakh.

In Himachal Pradesh, it is impossible to think of improving agriculture without having good cattle. In Majority of cases, agricultural production and marketing of the produce continued to be done with bullocks. Livestock keeping is an integral part of agriculture in Himachal Pradesh, which can be visualised from the fact that 91.5 per cent families were rearing one type of livestock or the other (1991 census). Raising of livestock is necessary because it contributes to meet the requirement of animal power for agricultural purposes, provide rich nutritious food in the shape of milk, meat and eggs. The farmer also supplements his meagre resources through the sale of milk and milk products, especially during wide gaps that occur between sowing, harvesting and marketing of agricultural crops.

Sheep and goats are the chief sources of garments to provide protection against extreme winter. Sheep rearing, however, still remains the monopoly of a class of herders whom tradition has marked as pastoral caste. The social, economic and political changes that have taken place have not touch this class and the shepherd still follows his profession in the same manner as his ancestors has done for centuries. For *'Gaddi tribe'* in Himachal, rearing of sheep is not only a profession but also a way of life that he lives.

The animal skin is used for making shoes and storebins. Thus, the livestock is not only contributing towards agricultural production, but also is even a source of self-employment to rural artisans. The livestock population in

Himachal Pradesh was about 42 lakh, according to figures of 1966 census, 47.2 lakh in 1972, 47.9 lakh in 1977, 52.3 lakh in 1992 and 62.4 lakh as per 2010-11 estimates.

The total population of livestock in Himachal Pradesh (district-wise) as per the 1992 census is given under.

Table -1

Districtwise Livestock and Poultry - 1992

District	Cattle	Buffaloes	Sheep	Goats	Dogs	Others	Total Livestock (Incl.dogs)	Total Poultry
1	2	3	4	5	6	7	8	9
Bilaspur	60,461	86,858	24,615	63,472	8,770	1,309	2,45,485	58,844

Source: Livestock Census-Directorate of Land Records, Himachal Pardesh.

The total population of livestock, according to 1992 census was 52,32,963; thus registering an increase of 2.08% during a period of ten years. This gives density of 93 heads per square kilometre. The availability of permanent pastures and other grazing land was 19 hectares per 100 heads of livestock according to 1982 livestock census or 0.19 hectare per head of cattle. By the end of 2013 this percentage came down marginally and was recorded as 88.3 percent per hectare.

CATTLE BREEDING FARMS

1. Cattle Breeding farm, Palampur Distt . Kangra
2. Cattle Breeding farm, Kothipura Distt . Bilaspur
3. Cattle Breeding farm, Bagthan Distt . Sirmaur
4. Cattle Breeding farm, Kamand (Mandi)
5. Cattle Breeding farm, Bhangrotu (Mandi)

Government in Himachal Pradesh is making serious efforts to initiate various programmes, to the development of animal husbandry. The following plan allocation and expenditure table reveals this fact clearly. The total population of livestock in 2010-11 was 62,45,219 including Cow, Buffaloes, Poultry, Mules, Yaks, Pigs, Donkeys, Rabbits etc. having density of 112 cattle per square kilometre.

Source: DESHP - Statistical Outline

According to the 1990-91 survey, in all, there were 1,008 hospitals and dispensaries (animals) and 2,345 doctors. Majority of the animals found in Himachal Pradesh does not conform to any well defined breed and are nondescript. In the recent past, some improved breeds such as *Jersey, Holstein-Friesian* and *Brown cross* have become more popular because of its genetic potential for higher milk yield. There are five cattle breeding farms in Himachal Pradesh at present; *Kamand* (Mandi), *Bhangrotu* (Mandi), *Kothipura* (Bilaspur), *Palampur* (Kangra) and *Bagthan* (Sirmaur).

For the convenience of animal husbandry department, the Pradesh is divided into three regions, i.e. Mandi, Shimla and Palampur. Each has been headed by a Deputy Director. The Mandi region consists of the districts of Mandi, Kullu, Bilaspur and Lahaul-Spiti. The Shimla region comprises of Shimla, Solan, Sirmaur and Kinnaur districts. The districts of Chamba, Kangra, Hamirpur and Una fall with in the jurisdiction of Palampur region. In March 2006 the State Government launched milch animal insurance scheme to keep farmers unworried in case of a milch animal's accidental death.

Doodh Ganga Yojna : In December 2009, the state Government launched Doodh Ganga Yojna on the basis of waving 50 percent interest on loans. Rs 300 crore was earmarked for the project but 2 year intensive campaigning could not generate much enthusiasm among dairy farmers. Then in 2011 the scheme was revised under which 25 percent subsidy for general category and 33 percent for reserved section was granted. This incentive suddenly made the scheme popular as more and more dairy farmers started visiting dairy development centres. Loan facility was also introduced. Ranging from 1.2 lakh to 4.8 lakh for new cows and setting up another animal husbandry venture. Under the Doodh Ganga Yojna farmer can buy new breed of cows. They can set up organic dairy farms, storage , processing or chilling units in the state by taking soft loans. Dhoodh Ganga Project was stopped in June 2012 and restarted on 1st June 2013 but again stopped after 45 days on 15th July 2013. On 24th December 2013, it was restarted with the help of NABARD.

Sheep Breeding: Sheep breeding forms a major source of wool, mutton, hides and manure. The total sheep and goat population of the Pradesh was about 11 lakh in 1992. This figure was noted above, 21 lakh in 2007-08. There are five sheep breeding farms in Himachal Pradesh, viz. Jeori (Shimla), Sarol (Chamba), Nagwain (Mandi), Tal (Hamirpur) and Karchham (Kinnaur). The exotic varieties which were imported by State Government includes, *'Polworth', 'Rambauillet', 'Scotch', 'Blackpace', 'Spanish', 'Merino', 'Corriedole'*, etc. The important local breeds are *'Gaddi', 'Rampur-Bushahri'* and *'Bingi'*. There is a Sheep and Wool Centre at Choori in Chamba district.

On the average, gaddi caste at present possesses about 100 heads per household of goats and sheep. There is one Wool Analysis Laboratory and Training Centre for the stock assistants at Sarol. The wool production with intensive efforts has recorded a good increase. In 1986-87, 13.02 lakh kg., 1987-88, 13.44 lakh kg., and in 1988-89, 13.51 lakh kg. The average wool production per sheep per year was 1,180 grams. In 1997 livestock counting there were 9,08,831 sheep and 9,46,529 goats, in 2003 sheep counting was 9,06,027 and goats 11,15,587, in 2007 the sheep number further reduced to 9,01,299 and goats increased to 12,40,836.

The total wool production in the year 2005-06 was 1603.9 tonnes and wool production per sheep 1475 gms, in 2007-08 1614.9 tonnes and 1546 gms per sheep. In 2010-11 the total production went upto 1639.44 tonnes

and average per sheep production came to 1591 gms. This shows that the growth in wool production is steadily on upward side and quite encouraging as productivity per head is very good.

SHEEP BREEDING FARMS

1. Sheep Breeding Farm, Jeori Distt. Shimla
2. Sheep Breeding Farm, Tal Distt. Hamirpur
3. Sheep Breeding Farm, Sarol Distt. Chamba
4. Sheep Breeding Farm, Karchham Distt. Kinnaur
5. Ram Centre, Nagwain Distt. Mandi

To promote sheep rearing, three district of the state were put in *Bher Palak Samridhi Yojana*, these were Mandi, Chamba and Kangra. In July 2011 three more district i.e. Kullu, Kinnaur and Shimla were also included.

To provide remunerative occupation in the rural areas, 40 number of *'Angrora rabbits'* had been imported from West Germany and located at Palampur. Rabbit is a fast breeding animal and as such small units of Angora rabbits have been established to act as demonstration units and supply stock to interested farmers.

Angora Rabbit Breeding Programme

The climate of the State is favourable for rearing of Angora Rabbits and it is a good source of income and self employment. With the assistance of UNDP, Department has established a germ plasm centre at Nagwain (District Mandi) where pure breeds are being bred on scientific lines. At this centre training to interested breeders is being imparted and trained persons are being provided infrastructure and rabbits for starting their own rabbit breeding farms. Another rabbit farm at Kandwari in Palampur is also being run by the department where German Angora Rabbits are being reared. Interested unemployed Youth can undergo training in rabbit rearing at above mentioned farms. H.P. Wool Federation procures rabbit wool from farmers on minimum support price fixed by Government from time to time. The rabbit population in State was 4393 in 2008-09

RABBIT BREEDING FARMS

2. Rabbit Breeding Farm, Kandwari Distt . Kangra

Centrally Sponsored Schemes in Sheep Development.

I) Integrated Wool Improvement Programme : This Project was sponsored by Central Wool Development Board Jodhpur for the period of 4 years on the 100% Central Assistance pattern in the year 2003-04. This project was implemented in District Chamba , Kangra & Kullu . Rupees 1.25 Crore as first year instalment was received by Wool Federation and focused on following activities:

-Breed improvement.

-Health Care.

-Training camps for sheep breeders.

-Assistance for marketing and product development of wool.

Establishment of multipurpose extension centres.

II) Integrated Sheep and Wool Development Projects: Integrated Sheep and Wool Development Project was sponsored by Central Wool Development Board, Jodhpur on 100% Central Assistance. These projects were for duration of 3 years and were implemented in following districts:

Name of District Grant released during year 2003-04

1.ISWDP Chamba -III 12.84 lakh(Bharmaur)

2.ISWDP Kangra -III 11.97 lakh (Palampur/Dharamshala)

3.ISWDP Shimla 12.88 lakh (Rohru/Chirgaon)

4.ISWDP Kinnaur -I 13.00 lakh . Total 50.69 lakh

Following activities were being covered under these projects:

50,000 sheep were being covered in each district and following facilities were provided to the registered breeders:

1. Breed improvement.
2. Health Care.
3. Product development
4. Marketing Assistance.
5. Training camps for sheep breeders.

III) Continuous fiber dryer plant

Rupees 7.55 lakh was received by H.P.Wool Federation as 100% Central Assistance from Central Wool Development Board, Jodhpur for installation of continuous Fiber Dryer Plant as an attachment to mini wool scouring Plant Palampur.

DAIRY AND POULTRY DEVELOPMENT IN HIMACHAL

The concept of milk production as a profitable enterprise was recognised in the last quarter of 20th century. With the urbanisation, the demand of milk in towns has increased. It was from the Third Five Year Plan that state took upon itself the task of creating an agency to help farmers in milk marketing. During the year 1977, the State Government took the dairy development work in six districts of the State, i.e., Mandi, Una Bilaspur, Hamirpur, Solan and part of Shimla on Anand pattern under 'Operation Flood-II', and as a sequence to its milk schemes functioning in these districts were transferred to the Himachal Pradesh State Cooperative Milk Producers Federation Limited in October, 1983.

The development of dairy and milk schemes in the non-operation Flood-II areas, i.e., Kangra, Chamba, Kullu, Kinnaur and part of Shimla district are under Animal Husbandry Department. Due to difficult terrain of these areas, some of the traditional milk sheds areas are still inaccessible and new milk pockets have also to be adopted in the potent areas. The following table shows the result of intensive dairy development programmes in the State:

TABLE - 4

PRODUCTION OF MILK (H.P.)

Item	Average Milk Production per cow per day	Average Milk Production per buffalo per day	Milk Production a) Cow	b) Buffalo	c) Goat	Total milk production
Unit	Gram	Gram	Lakh litre	Lakh litre	Lakh litre	
1	2	3	4	5	6	
1986-87	1,502	3,146	185.55	260.71	12.43	458.69
87-88	1,494	3,321	188.84	276.17	13.03	487.04
88-89	1,703	3,134	218.13	265.00	15.74	499.75
90-91	1,923	3,696	257.56	300.84	14.20	572.6
93-94	1,867	2,861	292.27	335.39	26.19	653.85
94-95	2,001	2,919	303.55	331.35	28.00	662.90
95-96	1,941	2,940	302.84	344.64	28.79	676.27

2006-07	2509	2719	500.005	345.186	27.204	872.395
2008-09	2837	2649	528.361	327.511	28.128	884.000
2010-11	3095	3554	542.100	340.448	24.452	907.000

Source: Animal Husbandry Department, Himachal Pradesh.

At present, there are milk chilling centres at Baijnath (district Kangra), Lambagaon and Outer Seraj (district Kullu), Rohru, Kumharsain and Kotgarh (Shimla district). In all, there are 27 milk chilling centres in the State. To cater the growing need of milk and milk products, the department of animal husbandry is making best use of technology to increase milk production.

Poultry Development

In the state of Himachal Pradesh, poultry farming has shown vast potential of self employment opportunity and augmenting the nutritional status of the rural population by enhancing the availability of high quality proteins in the diet at a reasonable cost. In the recent years, one unfortunate trend of decreasing per capita availability of pulses, the only major source of proteins for the large majority of population has emerged. The protein gap in the nutritional demand has to be bridged rapidly, and the egg provides an affordable alternative source. Its per capita availability has grown up from 5 to 43 per year between 1950's to 2001. Besides this, poultry meat is also playing its part in making proteins of animal origin available to the farmers of the state. Therefore, increasing the egg and poultry meat production will also lead to strengthening the economic base of the rural farmers.

The poultry farming in Himachal Pradesh plays an important role in improving the socio- economic status of rural population particularly the landless because poultry farming require minimum capital and ensures quick returns. Thereby improving the quality of life of the rural poor. The sale of eggs on day to day basis helps in increasing crop production through purchase of essential inputs such as seed, insecticides, etc. Poultry droppings are an excellent source of farm manure.

In order to provide improved type of poultry birds and hatching eggs, the department started several poultry farms. Poultry extension centres are in various parts of the State. At present, 14 poultry farms/extension centres are functioning in the State which are meeting the requirements of the farmers. Poultry has been adopted as a cottage industry by people for supplementing their income. There are two State Hatcheries–at *Sundernagar* and *Nahan*. The production of egg increased sharply since the last decade of 20th century. In 1986-87, it was 415 lakh, 1987-88, 433 lakh, 1988-89, 485 lakh, 1990-91, 532 lakh, 1992-93, 697 lakh in 1993-94, 714 lakh in 1995-96, 721 lakh, in 1997-98, 754 lakh and in 1998-99, 769 lakh . To intensify the supply of chickens, hatching at Sundernagar is done round the year. By the end of 1985-86, there were 461 poultry farms in the State. According to 1992, counting the number of chickens in the state had gone up to 6,64,039.

In the year 2003, the total chickens were 7,64,136 which went upto 8,09,132 in 2007-08 and 10,21,053 in 2011.

In Himachal Pradesh, the poultry production output corresponds to the backyard poultry production because people prefer poultry units of small size i.e. 50 to 100 birds each rather than bigger units. These backyard units are becoming popular as it provides supplementary income as well as nutrition of high order without incurring extra expenditure. This has been further made successful with the introduction of hybrid birds by the department of Animal Husbandry through the Poultry Development Project running in the state. The poultry projects look after the poultry development work through various poultry farms/ extension centers and hatcheries which caters to the demand of the farmers for the supply of day old coloured strain dual purpose chicks. Birds of various age groups are also supplied to the farmers as per their demand.

The hatcheries were not able to cope with the ever increasing demand for the chicks/ birds prior to the introduction of the Centrally sponsored scheme mainly due to very old and worn out machinery and equipments compounded by the poor condition of the sheds and buildings which housed the hatcheries/ farms.

With the introduction of the Centrally Sponsored Scheme, the hatcheries and the farms of the state are being strengthened in a phased manner so that the demand of the rural population for the chicks of both egger and broiler strain could be met easily. Poultry population stood at 8, 09,132 in 2007-08 while the egg production stood at 842 lakh numbers according to the 2007-2008 survey. The eggs production went upto 1020 lakh in 2010-11. In 2012-13 the egg production reached at 1069 lakh.

The topography and the climatic condition of the state are such that here small sized poultry farms are more successful than the large sized ones. A peculiar feature of poultry farming in the Himachal Pradesh is the bulk production of eggs and broilers in the urban and suburban areas which leads to higher costs of egg and poultry meat in the rural areas than in the towns. The

department of Animal Husbandry started a Backyard Poultry scheme and 200- Chick scheme with the following objectives to offset the present trend and make the poultry birds available at the village level so that the farmers are not only able to increase their economic status but also use the poultry produce as a source of high grade animal protein in the diet so as to cope up with the protein-calorie malnutrition.

AIMS AND OBJECTIVES

1. To provide good diet to the people of the state. The per capita availability of eggs in Himachal Pradesh is mere 15 eggs per annum as compared to all India average of 43 eggs per annum. Large rural population faces the problem of protein–calorie malnutrition, thus needing animal proteins with high biological values which can be met through eggs and poultry meat.

2. To augment the income of the rural people where poultry farming along with the livestock rearing is being carried out as a mixed farming complementary to the crop production.

3. To increase the employment opportunities for the rural population since most of them are unemployed or grossly underemployed, hence to generate self- employment.

4. To produce manure of high grade at minimal cost.

PRESENT STATUS OF PRODUCTION

The poultry in Himachal Pradesh corresponds to Poultry farms established in the government and in the private sector. The thrust in the private sector, of late, is mainly due to the introduction of the Backyard Poultry scheme by the department especially in the rural areas of the state. The department of Animal Husbandry is running below mentioned poultry development schemes in the state :-

1. BACKYARD POULTRY SCHEME:- The Animal Husbandry Department introduced Backyard Poultry Scheme under the Centrally Sponsored Scheme "Assistance to the State Poultry farms" which is a 80:20 scheme where the state poultry farms are being strengthened in a phased manner. The chicks of low input technology type are being produced at the departmental hatcheries. These chicks are reared for 2-3 weeks at different government poultry farms/ extension centres prior to their distribution in the field. In case, there is demand for day old chicks then the same are also provided to the farmers.

Since the medium and the large poultry farms have come up of late in the state due to the efforts of the department whereby training and other help in the form of project reports for the opening of such units is being provided to interested poultry farmers. Therefore, the department has been trying to give more attention to the small and marginal poultry farmers who have specific requirements with reference to the strain of the poultry birds being provided. This is important because with the limited resources such group of poultry

farmers need a disease resistant strain with local availability. This was ensured under the Backyard scheme where low-input technology bird of coloured strain but disease resistant type are supplied to the farmers of the state @ Rs. 21.00/-chick of 2- 3 weeks age to prevent the early mortality. This scheme has been an instant success because it supplements not only the income of the poor farmers of the state but also provides nutrition of high order to them which is ample clear from the ever increasing demand for coloured chicks.

The department allotted 3,31,629 chicks under this scheme in the financial year 2011- 12 and after deducting the normal transportation mortalities, 3,24,299 chicks were actually received by 8829 beneficiaries/ farmers. This is a remarkable achievement as compared to 2010-11 where only 2,85,080 chicks were actually distributed under this scheme. Remote and tribal areas are too being provided benefit under this scheme. The farmers can book their demand for the chicks at any veterinary institution nearest to their dwelling. Under the Backyard Poultry scheme a unit consists of 50 chicks of 2- 3 weeks old. Interested beneficiaries are selected on the first come first serve basis through Veterinary institutions in the field.

There is also provision of training to the farmers opting for the scheme where the beneficiaries are being provided 6- days training at the government poultry farms and 15-day training at the Government hatcheries, free of cost.

2. 200- CHICK SUBSIDY SCHEME (SCSP) :- Upto 2011-12, under this scheme any person, whose annual income was less than Rs. 24,000/- and had land less than 25 bighas was provided assistance by way of supply of 200 chicks, feed, feeders, drinkers, medicines along with their transportation to the nearest road head. These benefits were met within the subsidy limit of Rs. 10,000-/ per beneficiary. In the year 2011-12 a total of 350 poultry units were established.

In the year, the Government sanctioned a new project "200- Chicks Scheme" under SCA (SCSP) for the period 2012-13 to 2016-17 where subsidy limit in kind was raised upto Rs. 18,000/- and those farmers having land less than 25 bighas and whose annual income is less than Rs. 40,000/- per annum are to be provided assistance.

NODAL AGENCY

Development of the Poultry sector in the state is being looked after by the Deputy Director, Poultry Development, Directorate of Animal Husbandry, Shimla which is running 200 – Chick scheme along with the Backyard Poultry scheme, very efficiently. The Deputy Director, Poultry Development who has been designated as Nodal Officer under the Centrally sponsored scheme is ably assisted by the Technical Officer (Poultry) along with existing staff of the Poultry Project in running Poultry Schemes efficiently under the able guidance of the Director, Animal Husbandry, Himachal Pradesh.

INFRASTRUCTURAL FACILITIES

To minimize the problems and difficulties of the farmers of the state and to develop the poultry sector in the State of Himachal Pradesh, the department of Animal Husbandry through the office of the Deputy Director, Poultry Project, has taken steps to increase poultry production in the State through the establishment of two hatcheries and poultry farms/extension centers in the various districts of the state. The chicks are being supplied to the poultry farmers through poultry farms and the extension centers. The farmers/ poultry breeders are also imparted training in poultry farming at the Government Poultry Farms so that these farmers are able to establish their units on a sound footing.

DETAIL OF GOVERNMENT POULTRY FARMS/ EXTENSION CENTRES

1. Poultry Farm, Jalgran, Distt. Una established in the year 1979
2. Regional Poultry Farm, Kamlahi, Distt. Shimla established in the year 1956
3. Central Poultry Farm, (Hatchery) Nahan, Distt. Sirmaur established in the year 1960
4. Poultry Farm, Chauntra, Distt. Mandi established in the year 1965
5. Him Hatchery, Sundernagar, Distt. Mandi established in the year 1958
6. Poultry Farm, Palampur, Distt. Kangra established in the year 1958
7. Poultry Extension Centre, Bhawarna, Distt. Kangra established in the year 1966
8. Poultry Extension Centre, Reckong - Peo, Distt. Kinnaur established in the year 1962
9. Poultry Extension Centre, Sarol, Distt. Chamba established in the year 1958
10. Poultry Extension Centre, Solan, Distt. Solan established in the year 1961
11. Poultry Extension Centre, Paonta- Sahib, Distt. Sirmaur established in the year 1960

Chebro- Coloured Strain Poultry Farm/HATCHERY- NAHAN (SIRMAUR)

Yak-HP's potential milch animal: Yak, the beast of the burden in the tribal areas of the country and several other parts of the world, is fast emerging in its Jersey crossbreed form as a potential milch cattle in Himachal. *Yak, which came to India from Tibet*, is comparable to the wild ox of Myanmar, Jawa and Berneo European cattle and Bantung. It existed in the ice age in Siberia. Its domestication is believed to have started with the origin of agriculture during the Neolithic period. The yak was used as the common game animal between the 19th and 20th centuries as a result of which its population receded considerably. *The Yak's meat is supposed to be excellent*

and this is another major factor responsible for a decline in its population.

Yak protection and preservation scheme was launched on 13th June 2005. The scheme is funded by the central government and executed through self help groups. Four self help groups were setup with each group having five farmers as members and they are provided 15 female and one male yak for conservation purposes.

The present Yak population (2011) the world over is 12,000 in China, 5,000 in Mangolia, 60,000 in Russia, 70,000 in Tazakistan, 60,000 in Kirgistan, 30,000 in India, 9,000 in Nepal and 52,000 in Bhutan. In India Yaks are found in Kinnaur, Chamba and Lahaul and Spiti districts of Himachal, Garhwal in Uttrakhand and Leh, Ladakh and Kargil in Jammu and Kashmir. Yaks are also found in Arunachal Pradesh and Sikkim. They are valued for high-quality meat, highly nutritious milk, wool, hair, manure, hide and skin.

Yak is semidomesticated and lives partly in wild. They can thrive even in scarcity of fodder and water and can run well in the snow desert at an altitude of 30,000 feet where no other large animal can manage to live. It is used to cross the glaciers and snow-covered peaks and passes. Yaks are generally dry grass eaters and find their food by burrowing the snow through its hard muzzle. Yak, which has a heavy coat of shaggy hair, roams in the high round of Himalayas, preferring cold air as compared to warm air of the plains. Its bushy hairy tail is used as "chanwar" (चंवर या चौर) in temples and is preserved as a sacred material in houses. Its horns are also preserved by tribesmen who believe that these ward off evil spirits.

Scientists in Himachal Pradesh Krishi Vishvavidyalaya (HPKV) have been doing pioneering research work at its Yak breeding research station in the beautiful Sangla valley of Kinnaur district. In winter they are reared at the research farm and in the summer they are left in alpine pastures in Chitkul and beyond, which are more than 12,000 feet high from the mean sea level. The National Research Centre for Yak set up by the ICAR *at Dirang* in Arunchal Pradesh is also reported to have done a good research work to conserve and multiply this animal.

Scientists have already made a major breakthrough in crossing Yak with Jersy breed and attempts to improve the breed are in progress. The first generation cross 'F-1' (Filial) produced by crossing Jersey cows with male yak has given much more milk yield without losing much of draftability potential of the animal. The crossbred (F-1) is reported to have yielded on an average 3.4 litres milk per day as compared to Six litres in the case of Jersey Cow and only 1.3 litres in the case of pure yak (berme). The peak yield in the case of a pure yak is reported to be 1.8 litres as against 14 litres in the case of a Jersey cow 8.1 litres in the case of crossbreed (F-1). The lactation period is 132 days in the case of yak (berme), 258 days in the case of Jersey and 386 in the case of cross F-1.

The cross between yak and hill cow is known as "CHURI" while the

male of such cross is known as "CHURU" which has no sexual potential. Yak has very poor reproduction. It is due to this fact that crossbreeding with Jersey cows yielded good results in its F-1 generation. The reverse cross of male Jersey and berme have not been successful. Further research efforts resulted in obtaining 'F-2' by crossing 'F-1' female with a pure yak. Research efforts on further cross breeds are in progress. A yak annually produces 300 to 600 gm of *"down hair"* and 1,000 to 2,000 gm of *'coarse hair'*. The down hair, similar to pashmina, is used for making garments, while the coarse hair is used for preparing bags, hats, ropes, carpets and tents.

Yak is becoming an endangered species in Himachal and other parts of the country. There is the need for importing high-quality yak from Nepal, Bhutan, China and Mangolia to breed yak from yak rather than merely producing "churi" and "churu".

HORSE and YAK BREEDING FARM

1. Horse and Yak Breeding Farm, Lari Distt . Lahaul & Spiti

SPERM STATION

1. Sperm station, Palampur , Distt . Kangra.
2. Sperm station, Aduwal , Distt . Solan.

There has been large scale fluctuation in the number of yak in Himachal Pradesh as in 1992 the number was 5690, in 1997 2548 in 2003, 1590 in 2007, 1705 and in 2011 1610 only. It is this dwindling population, which is the major cause of concern for the department and scientists engaged in improving its breed and number.

Emu: The emu sometimes US Dromaius novaehollandiae is the largest bird native to Australia and the only extant member of the genus Dromaius. It is the second-largest extant bird in the world by height, after its ratite relative, the ostrich. There are three subspecies of emus in Australia. The emu is common over most of mainland Australia, although it avoids heavily populated areas, dense forest, and arid areas.

The soft-feathered, brown, flightless birds reach up to 2 meters (6.6 ft.) in height. They have long thin necks and legs. Emus can travel great distances at a fast, economical trot and, if necessary, can sprint at 50 km/h (31 mph). Their long legs allow them to take strides of up to 275 centimeters (9.02 ft.). They are opportunistically nomadic and may travel long distances to find food; they feed on a variety of plants and insects, but have been known to go for weeks without food. Emus ingest stones, glass shards and bits of metal to grind food in the digestive system. They drink infrequently, but take in copious fluids when the opportunity arises. Emus will sit in water and are also able to swim. They are curious birds who are known to follow and watch other animals and humans. Emus do not sleep continuously at night but in several short stints sitting down.

Diet: They eat a variety of native and introduced plant species; the type

of plants eaten depends on seasonal availability. They also eat insects, including grasshoppers and crickets, lady birds, soldier and saltbush caterpillars, Bogong and cotton-boll moth larvae and ants. This forms a large part of its protein requirements and intake. In Western Australia, food preferences have been observed in travelling emus: they eat seeds from Acacia anuria until it rains, after which they eat fresh grass shoots and caterpillars; in winter they feed on the leaves and pods of Cassia; in spring, they feed on grasshoppers and the fruit of Santalum acuminatum: a sort of quandong. They are also known to eat wheat crops, and any fruit or other crops that it can access, easily climbing over high fences if required.

Emus form breeding pairs during the summer months of December and January, and may remain together for about five months. During this time they wander around in an area a few miles in diameter. It is believed they guard or find territory during this time. Both males and females increase in weight during this time and the female is slightly heavier at between 45 and 58 kg (99 and 128 lb). This weight is lost during the incubation period, the males losing around 9 kg (20 lb). Mating occurs in the cooler months of May and June, and the exact timing is determined by the climate, as the birds nest during the coldest part of the year. During the breeding season, males experience hormonal changes, including an increase in luteinizing hormone and testosterone levels, and their testicles double in size.

Breeding: It is the females that court the males, and during the mating season, they become physically more attractive. The female's plumage darkens slightly and the small patches of bare, hairless skin just below the eyes and near the beaks turn turquoise-blue, although this is a subtle change. The female strides around confidently, often circling the male, and pulls its neck back while puffing out her feathers and crying out a low, monosyllabic sound that has been compared to human drums. This calling can occur when the males are not in view and more than 50 meters (160 ft.) away and when the male's attention has been gained, the female can circle in a radius of 10–40 m. As the female circles its prospective mate, it continues to look towards him by turning its neck, while keeping its rump facing him. During this time, the female's cervical air sac may remain inflated as it calls out.

The passive male retains the same colour hair, although the bare patches of skin also turn a light blue .The female has more black hairs on its head but gender differentiation can be difficult for humans. If the male shows interest in the parading female, he will move closer; the female continues to tantalise its target by shuffling further away and continuing to circle him as before.

Emu Farm Gandawal (UNA): Himachal Pradesh had its first Emu breeding farm at Gandawal area of Una district setup by multi level marketing company Easy Way with initial investment of Rs. 1 crore. The farm came into functioning on 4th April 2011, also have 1000 Sudanee goats and 11000 sq.ft area for fish breeding. In the beginning 300 Australian Emus were imported to start breeding process.

Himachal Pradesh State Cooperative .Milk Producers Federation Limited

The Himachal Pradesh State Cooperative Milk Producer's Federation Limited started functioning on 2nd October, 1983. In the first stage the federation was given the function of dairy development. The Himachal Pradesh Milkfed is working for achieving the objectives under the *'Operation Flood'* programme, and was established on the pattern of Anand Amul Pattern of Dairy Cooperative Societies of Gujarat.

National Dairy Development Board

The National Dairy Development Board is an institution of national importance set up by an Act of Parliament of India. The main office is in Anand, Gujarat with regional offices throughout the country. NDDB's subsidiaries include IDMC Limited-Anand, Mother Dairy Delhi, NDDB Dairy Services, Delhi and Indian Immunologicals Ltd, Hyderabad. It was founded by Dr. Vergis Kurion. The National Dairy Development Board (NDDB) was created in 1965, fulfilling the desire of the then Prime Minister of India — the late Lal Bahadur Shastri to extend the success of the Kaira Cooperative Milk Producers' Union (Amul) to other parts of India.

That success combined the wisdom and energy of farmers with professional management to successfully capture liquid milk and milk product markets while supporting farmer investment with inputs and services. The major success of this mission was achieved through the World Bank financed Operation Flood, which lasted for 26 years (1970 to 1996) and was responsible for making India the world's largest producer of milk. This operation was started with the objective of increasing milk production, augmenting farmer income and providing fair prices for consumers.

NDDB has now integrated 1,17,575 dairy co-operatives (2012 A.D) in what it calls the Anand Pattern, linking the village society to the state federations in a three-tier structure. NDDB launched its Perspective Plan 2010 with four thrust areas: Quality Assurance, Productivity Enhancement, Institution Building and National Information Network.

Himachal Pradesh Agro-Industries Corporation Ltd. (HPAIC)

The Himachal Pradesh Agro-Industries Corporation Limited was set up on 24th September, 1970, in pursuance of the national policy to have an agro-industries corporation in each state. The main objectives of the corporation as stated in its memorandum, articles and association is to establish, develop, promote, execute, operate and otherwise carry on projects, schemes, industries, business activities which in the opinion of the corporation are likely to accelerate and increase agricultural production, contribute to the production of subsidiary and supplementary foods. The corporation has set up nearly 30 agro-service centres in the state. The activities undertaken by the corporation through these centres are procurement and distribution of tractors, implements, spares, iron and steel tyres, tubes, batteries, cement, irrigation machinery and diesel engines.

The production units of the corporation are located at Parwanoo, Jachh, Paonta, Kandrori and Bhangrotu.

Himachal Pradesh State Civil Supplies Corporation Ltd.

The Himachal Pradesh State Civil Supplies Corporation has been set-up by the state government at apex level with a view to remove bottleneck coming in the way of an efficient and effective public distribution system. It was registered as a Public Limited Company under the Companies Act, 1956, on 6th September, 1980. The corporation is catering to the requirements of state, district federations, tehsil cooperative unions and fair price shops. The headquarters of the corporation is located at Shimla. There are wholesale godowns of the corporation throughout the 12 districts.

The state government must form a cohesive policy to deal with floods in the state. In all, there are nearly 1200 and large size khads (rivulets) in the state, which used to be good source of water in the past. But now with government water supply schemes in operation the *khads* remain dry for most part of the year. To bring water level up MNERGA fund should be used to construct small and multipurpose dams, to minimise the danger of floods.

FISHERIES IN HIMACHAL
(PISCICULTURE)

Himachal Pradesh is blessed with some of the finest rivers. viz. the Satluj, the Beas and the Chenab originating from the permanent glaciers and spring-beds. The rivers and their branches are bestowed with *exotic trout, masheer, snow trout, loaches,* indigenous *lesser barilas* and *mirror carps.* Besides, there are many natural lakes located in the higher reaches and man made impoundments harbouring more than 78 species of fish belonging to families of *cyprinidae, Bagaridae, Sohibedae, Siserdac, Belonidae, Ophocepha-Lidae* and *Masteem-belidae* and series of ponds dotted especially in sub-mountainous region of the State.

In this State where pond resources are scarce, fish culture based on running water can be suitable substitute for extending rural fish farming. This will not only provide employment to the rural but also at the same time would improve the nutritional standards of the people by providing cheap protein diet. Experiment carried out at fish farm 'Deoli' (district Bilaspur set up in 1963) has revealed that based on conventional feed, it is possible to produce 26 tonnes of fish from one hectare. There is a **'Fish Farmers Development Agency'** at 'Una' to guide farmers occupied in fisheries.

Himachal Pradesh is a seed deficit State. The two major reservoirs, viz, *'Govindsagar'* and *'Pong Dam'* alone require about 20 million fingerlings for their optimum stocking. The capacity of existing four seed farms at **'Deoli', 'Alsu', 'Nalagarh'** and **'Kangra'** are mainly confined to *mirror carp* breeding. Some of the finest trout streams in the State are located in Kullu Valley, Pabbar Valley, Barot Valley, Bhandal Valley, Tirthan Valley and Sangla Valley of the State. The length of the trout streams extends to 800 kms. in all. At present, the department has four fish farms located in **Katrain, Barot, Sangla** and **Chirgaon** and few rearing units at **Bhandal** and **Nagni.** *It was in 1909, that Shri M.L. Hogel introduced trout breed in Himachal Pradesh.* In 1912, on the bank of the river Beas **'Mahilee fish breeding'** farm, in 1947 on the bank of **'Sujanbal Patleekuhal'**, farms were set up to increase the production of trout fish.

Trout and Carp Fish Farms in Himachal Pradesh

Fish farms are the foundation stones of Fisheries development in Inland Fisheries Sector. The seed produced at these seed production centres is either used for replenishing the harvested fish stock of open waters i.e. rivers or reservoirs or is further reared under semi-controlled conditions in growing ponds and sold for table purposes. Himachal Pradesh state is one of the state amongst a few in the Union of India which has been gifted by the mother nature with the rivers emanating from glaciers, which [illegible] through hilly

terrains and finally enrich the semi-plain and plain areas of the state adjoining Punjab and Haryana. Himachal Pradesh has approximately 3000 kms of riverine length and four reservoirs namely Gobind sagar, Maharana Partap sagar, Pandoh and Chamera constructed on Satluj, Beas, and Ravi rivers respectively.

The upper zones of rivers inhabit indigenous Schizothoracids, and exotic salmonids (trout) while the zones interspersing the semi-plain and plain areas are the abodes of Himalayan tiger- *the mighty mahseer, Indian Major Carps* and the much sought after catfishes such as *Singhara* (Mystus seenghala) *Malhee* (Wallago attu) and *Soal* (Channa species). Keeping in view the variegated nature of water resources the Government of Himachal Pradesh through its department of Fisheries has setup two types of fish seed farms- Cold water or Trout fish seed farms and warm water or Carp seed farms. The mandate of these farms till recently was to produce the seed of trout and carps and stock it in rivers and reservoirs with an aim of replenishing the harvested stocks from these water bodies. With the advancement in fish farming it has been now possible to produce fish for human consumption at these farms and thus making them revenue-earning centres. There are in all 12 fish seed farms under the control of Himachal Pradesh Fisheries Department out of which 6 are trout farms and another 6 are carp farms. These are as under:

Trout farms

1. Patlikuhl (Kullu district);
2. Barot (Mandi district);
3. Holi (Chamba district);
4. Dhamwari (Shimla district);
5. Sangla (Kinnaur district).

Carp farms:

1. Deoli (Bilaspur district);
2. Alsu (Mandi district)
3. Kangra (Kangra district);
4. Sultanpur (Chamba district);

The carp farms at Gagret and Nalagarh have been leased out to private entrepreneurs for fish and seed production. The trout fish farm at Nagni has been washed out in devastating floods. A new trout fish farm is under construction at HAMNI in Kullu District. To revive the pristine glory of Mahaseer Fisheries in the riverine as well as reservoir sectors of state, a Mahaseer Fish farm is near Machhyal in Mandi District.

Trout Farms In Himachal Pradesh

The present status of trout farms in terms of fish and fish seed production, their development and future prospective is as under:

1. **Patlikuhl** [ESTD in 1909] : This farm is situated at National Highway-21 between Kullu and Manali on 26.4 bighas of land. The farm has

following infrastructure:

a) Raceways = 14 [13 (15x2x1.5m) and 4 (45x2.8x1.5)]
b) Hatcheries = (Bathar and Patlikuhl)
c) Feed mill = 1

The water to this farm is being drawn through H.D.P. pipes from a perennial tributary of river Beas named as Sujan or Sanjoin nala. The quantum of water available is sufficient for the available raceways. Hatchery at Patlikuhl is under renovation and is being provided assured water supply system. The fish farm has a fish production capacity of 10 tonnes and the production level attained during previous years has been over and above the capacity.

Bathar Hatchery [ESTD in 1996]: This hatchery is located at a distance of about 5 km from Patlikuhl. It has an ova incubation capacity of 2,00,000 but the rearing space available for the hatchlings is hardly sufficient. With utmost care about 60,000-70,000 hatchlings can only be reared up to 1 g size. The capacity utilization in the past has been over and above the capacity. Bathar New live: This hatchery has 8 nursery tanks of size2x2x0.5m made of fiberglass. Feed mill: The feed mill is catering the feed requirements of trout farms functioning under the department as well as farms in the private sector. The mill has a production capacity of 300 kg per hour. The annual production of feed is approximately 50 tonnes.

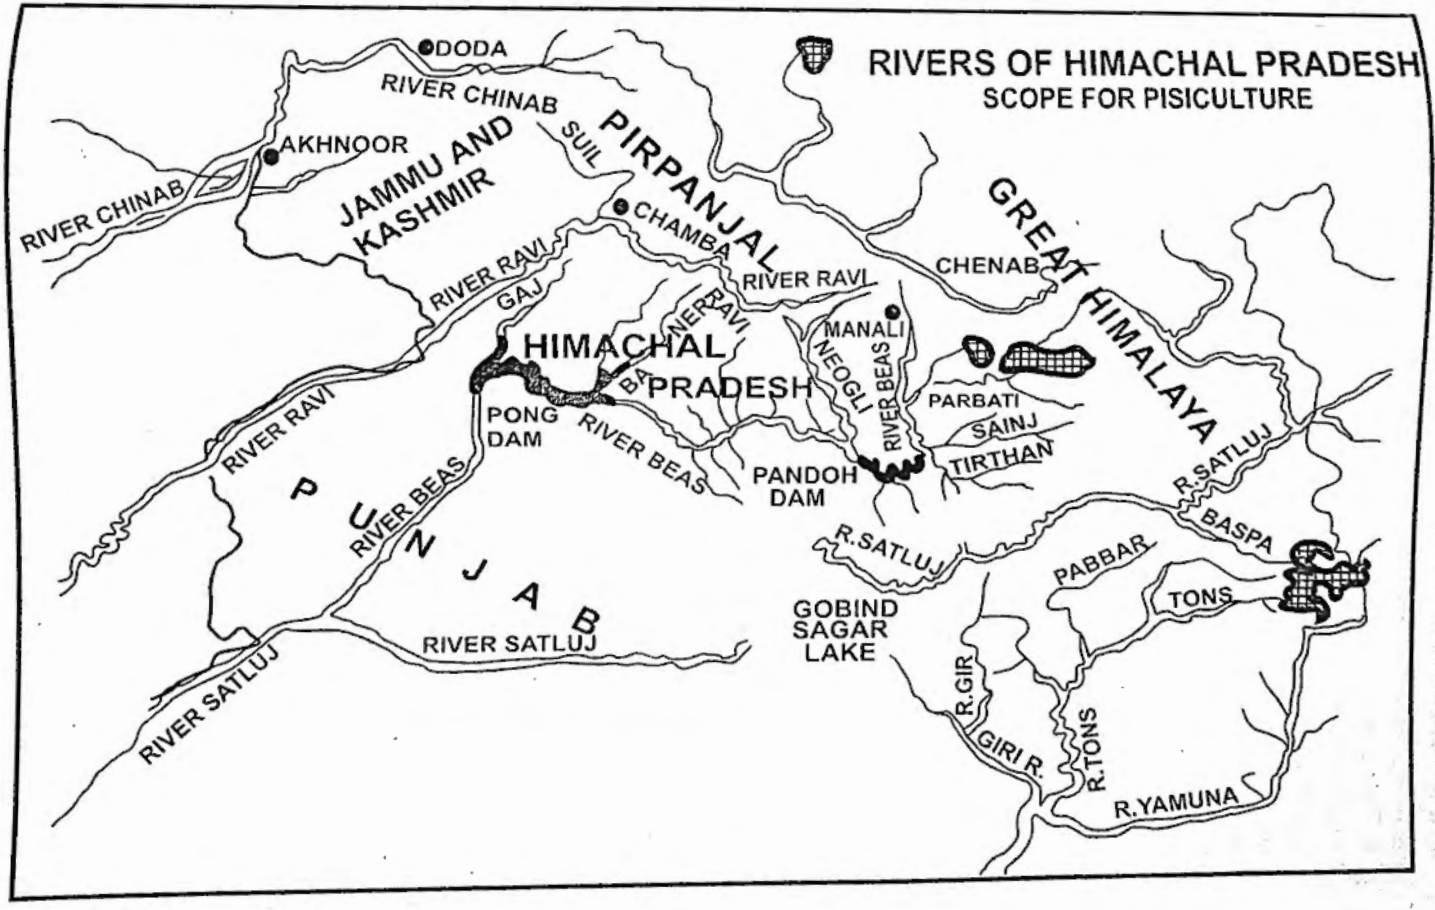
2. Barot Trout Farm [ESTD in 1959]: This farm is situated on the left banks of Uhl and Lambadug rivers near the barrage of Shanon Hydroelectric power project at Barot in Jogindernagar tehsil of Mandi district. The farm had problem of inadequate water supply in the past. The two old water supply systems renovated while two new water supply system from Lambadug river with 150 lps capacity have been setup at the farm. In the absence of dependable water supply the farm was hardly able to be assigned any fish production capacity. Even maintenance of brood fish was difficult. With the augmentation of water supply it's fish production capacity has been increased to 5 tonnes/ annum.

Its hatchery has 6 incubation troughs with 4 trays, with utmost care it may only be possible to incubate about 1,20,000-, 1,30,000 eggs here. There are six start feed tanks capable of holding about 1,00,000 hatchlings. The farm has a scope for expansion in it's fish and fish seed production capacity by 5 tonnes and 1 lakhs ova respectively.

3. HOLI Trout Farm [ESTD in 2000]: This farm has been constructed in Bharmaur tribal area at Holi in Chamba district to facilitate the propagation of trout in open waters of Ravi and its tributaries besides initiation of trout farming in rural areas for the generation of employment avenues to the tribal people. The farm has a land area of 6 bighas. Water for the farm is being drawn from two sources: a) spring source and from Kee-nala from a distance of about 2 km from the farm. The spring source provides approxi-

mately one lit/sec water while the pipeline from nala brings about 50 liters/sec. By making improvements in the water supply system the farm has now 2 tonnes fish production capacity. Ten number cement concrete nurseries have been constructed at the farm. 40,000 trout fingerlings can be reared here up to 5 g size.

The hatchery has 6 incubation troughs with three trays each. As such it is possible to incubate about 1,00,000 trout ova in the hatchery. The quantum of water available is a limiting factor for the expansion in activities at the farm; spring source has 1 liter/sec of water. Water supply system from Kee nala is approximately of 2 km length and interspersed with landslide prone areas.



4. Trout Farm Dhamwari [ESTD in 2005]: This farm is located on 0.6 hectare land in Rohru tehsil of Shimla district at Dhamwari. The farm is latest in this category to promote front fishing in the state. Water to the farm is being drawn from Khanyara khad at the rate of 150lt/sec through G.I. pipe. There is hardly any shortage of water to the farm and if needed the quantum of water being drawn can be increased by laying an additional pipe line. The construction works at the farm has been completed. It shall have a fish production capacity of 5 tonnes. The hatchery has an installed capacity of 1 lakh ova and 50000 fingerlings.

5. Trout Farm Sangla [ESTD in 1965]: Kinnaur district has a small trout farm at Sangla on the left bank of river Baspa. The farm has total area of 1.5 acre. The water is being drawn to the farm from Hubra khad, which is a tributary of river Baspa, through 5-inch diameter GI Pipe. It is estimated that the total availability of water is to the tune of 40 litre sec. There are two spring water sources outside the farm which are supplying about 5 lt/sec water to the farm and this is the water which is being used for rearing the live stock at present. There are plenty of raceways at the farm, but water supply is limiting factor.

In order to utilize all the infrastructure available, an additional water supply system from Rukti khad was constructed at the farm in 2013. After it's completion, farm has a production capacity of 5 tonnes. Hatchery at the farm was remodelled in the year 2012-13.

Carp Farms in Himachal Pradesh

1. Deoli [Bilaspur ESTD in 1960]: This farm is situated on 4.4 hectare of government land in Deoli village of Bilaspur district. There is no dearth of water to this farm and it can be drawn as per requirement from the small rivulet Ali Khad flowing by the side of the farm. The farm is producing common carp (Cyprinus carpio) fish seed besides experiments on the breeding of fresh water ornamental fish species. The common carp is the ideal fish for this farm keeping in view the quantum of seed produced during previous years. The available nursery area has the capacity to rear about 15 million carp spawn per annum. The two bigger ponds of 0.6 and 1 ha. each are

available for the maintenance of brood fish and raising of fish for sale. Gold fish (Carassius carassius) is also being maintained at this farm for sale to the aquaria owners.

2. Alsu Farm [Mandi ESTD in 1960]: This farm is situated at Alsu village of Sundernagar tehsil of Mandi district and has a land area of 20 bighas. Water to the farm is being drawn through a *kuhl* from Alsu nala but the local people never allow drawing water to the farm as per requirement. During lean season or say summers there remains acute shortage of water at the farm.

Following fish species are being reared at this farm: *Indian major carps-Rohu and Mrigal* and *Grass carp*. Perhaps it is the only carp farm in the entire Himachal Pradesh where Indian major especially mrigal and Rohu are being successfully bred. This has been a regular feature since 1998 onwards. There has been, there is and there shall always be heavy demand for the seed of Indian major carps in the state as such this farm is being given more attention. The farm has attained major carp seed production level of 20,00,000 spawn per year. Its production level is being increased to 5 million seed per annum by setting up Chinese hatchery and increase in rearing space Grass carp fish is assisting in the control of aquatic weeds and this has not responded for artificial breeding so far.

3. Kangra farm [ESTD in 1965]: Kangra fish farm has an area of 0.48 hectare, out of which water area is 0.28 ha. There is a small pond having an area of 42 sqm, which is acting as a water source during monsoon and early part of winter, when this pond overflows, it supplies water to some other ponds. During lean season when the subsoil water ponds are supplied water through an electric pump from this pond, meaning thereby that all the ponds at the farm except the nursery area are dependant for water on the subsoil water table. Except three nursery ponds all the ponds are getting sub-soil water and there is hardly any scope to increase their productivity as the entire manure or nutrients if added would not be able to react with bottom soil or pond water and are likely to get leached. This results in stunted growth in fish.

4. Sultanpur Farm [Chamba ESTD in 2000]: The farm is situated on 32 bighas of marshy land of Sultanpur in Chamba district. The main objective of setting up this farm was to provide quality fish seed to the fish farmers in Chamba, besides production of fish for table purpose and stocking of Chamera reservoir. It is the subsoil water, which is being used for fish and fish seed rearing at the farm. A sump-well has also been constructed recently. Perusal of the water temperature record reveals that the temperature ranges between 8 to 38 degree Celsius, lowest during January and maximum during July month.

The farm being at low area receives entire run off water from the catchments and this water accumulates in major portion of farmland. Water logged nature of the farmland has made the productivity control difficult in the ponds. The

pond bottoms are peaty and can be dried or completely netted out during fish and fish seed harvesting. The total rearing space available is 0.18 ha. Had it been possible to completely de-water the ponds and adopt all fish rearing practices it could have been possible to rear 15-20 lakhs carp spawn in 6 ponds (2 to be left as brood fish ponds) and thereby raise 5 lakh fry.

Masheer is a well known sport fish of rivers and streams in India. Besides being a world known game fish, *masheer* also contributes largely to commercial fishing in the hill regions of the country. The *'Beas'* river in Kangra. *'Giri'* in Sirmaur and *'Rana'* in Mandi district are some of the most important masheer streams in Himachal Pradesh. Masheer is a fish of fast current found in all the streams and river upto an elevation of 1000 meters. Masheer stream length in district Kangra is 150 kilometres including river *Beas, Binwa, Neugal* and *Baner,* district Mandi, 180 kilometres in the river *Beas, Rana, Suketi, Uhl* and *Ranodi;* district Bilaspur 30 kilometres in *Seer* and *Gambar* and in district Solan 40 kilometres in *Chamber, Ashni* and *Giri* streams. In order to revive masheer fishing in the State waters, a land measuring ten hectares was selected at Village Sidhpur, Tehsil Sarkaghat, District Mandi. The Government of India sanctioned a central scheme *"National Seed Programme"*, during the Sixth Five Year Plan.

The State Government has made available of a form the construction at 'Miltwan'. Major share of fish in Himachal Pradesh comes from reservoirs. There are 19 Cooperative societies in Govind Sagar and Pong reservoirs. There are 13 landing centres in Govind Sagar and Pong reservoirs. The fisheries complexes at Dehra, Dhameta, Nagrota Surian, Jwali, Bhakra and Zakatkhana are new addition in the project. Conservation is a backbone of fisheries management. In order to protect the vast area of reservoirs, 24,000 hectares of Pong and 16,000 hectares of Govind Sagar, there is need to further strengthen the conservancy measures in the Pradesh. At present, Himachal Pradesh has a net of rivers and streams which, including the trout water, runs into a length of 3,000 kilometres.

It was providing partial employment to 10,868 (1988-89) fishermen who made available 4,375 tonnes of fish valued at Rs. 57 lakhs. By the end of 1989, there were 30 fish sanctuaries established in the State. By the end of 1995-96 the total fish production was 6002 metric tonnes and 8162 fishermen were provided licences. In 1981-82, to create infrastructure to meet requirement of trout seed rearing space and other seeds, the Government of India, Ministry of Agriculture and Norway government signed a contract to set up a project on commercial trout farming in Kullu Valley. The project has been completed now.

The Himachal Government has initiated a number of steps to end the exploitation of fishermen at the hands of middlemen and provide them social security. Fishing has over the years emerged as a major avocation in the hill state which has been endowed with vast potential for the development of fisheries. Apart from the 3000 km. length of riverine resources and 700 hectares of high-altitude lakes, it has some of the biggest man-made reservoirs

like *Gobind Sagar, the Pong lake* and the *Chamera dam* which provide 40,000 hectares of fishing water. In recent years farmers, particularly in the lower hills, have taken Pisciculture in a big way and by the end of 2001 fishing was being done in 500 hectares of village ponds. There were already over 8,000 registered fishermen in the state mostly belonging to the weaker sections and their number was increasing every year.

Traditionally fishing had not been financially a very rewarding avocation. The poor fishermen neither had the modern fishing equipment nor any organised marketing setup as a result of which they were entirely dependent on middlemen. However, the schemes launched by the government to provide loans and subsidy to fishermen for the purchase of nets, nylon twines and sinkers required for the fabrication of cast nets and to encourage them to form Cooperative societies to eliminate middlemen has over the past decade brought about a remarkable change in their socioeconomic status.

The persons belonging to the Scheduled Caste and other weaker sections are being given subsidy at the rate of 50 and 25 percent, respectively, in addition to the bank loan facility. The reservoir fishermen and fisher women, which number about 2,000, in 2001 were being provided subsidy for the purchase of gill nets, boats and tents. The maximum limit of subsidy for the Scheduled Caste and other castes is Rs. 5,000 and 2,500, respectively. The rates of equipment are fixed by the Department of Fisheries by inviting tenders to ensure that fishermen get genuine equipment at reasonable rates.

In 2004-05, 10,906 licensed fishermen were there, having production of 6,902 tonnes, with approximate value of Rs. 3.49 crore and fish sanctuaries numbering 30. By 2006-07, 10536 licensed fishermen caught 6,886 tonne fish having value of Rs. 2.96 crore. In 2008-09, the number of registered fishermen were 11,676, production 7798 tonnes and market value Rs. 3.98 crore lakhs, and 16 new fish sanctuaries were setup.

In 2010-11, there were 13422 registered fishermen, production 7381 tonne fish with market value of Rs. 3.96 crore. There has been fishing offences in the state, the number of such offences in 2010-11 were 1,777 and from them compensation of Rs. 4,83,550 was realized. In 2012-13, there were 10,872 registered fishermen, who caught 8560 tonnes fish with market value of Rs. 5.81 crore. The fishermen have also been insured for an amount of Rs. 12,500 each in the case of permanent disability and Rs. 25,000 in the case of death uptill 1998-99. The premium of Rs. 11.25 is being shared by the Centre and the state government.

The state government is also imparting training and providing technical guidance to farmers through training camps held at the block level. Fish worth Rs. 374 lakh was harvested during 1996-97 at 18 fish collection centres of the Pong and Gobind Sagar reservoirs where 2,000 fishermen have formed 23 Cooperative societies. The government started a saving-cum-relief scheme for the reservoir fishermen in 1998-99 under which each fishermen, who is a member of a Cooperative society, deposits Rs. 30 for 10 consecutive fishing

months. A matching amount is contributed by the government and the total amount of Rs. 600 thus raised is given to the fishermen in two installments, each of Rs. 300 during the closed period between 16 June and 15 August, when fishing is banned.

Subsidy is also being given for the purchase of fish-carts, utensils and other infrastructure. The scheduled castes are given 50 percent subsidy and the others living below the poverty line 33.33 percent under another scheme. Financial assistance for the reclamation of ponds, tanks, construction of new ponds, fish culture in running water raceways, integrated fish farming, construction of fresh water drawn and other fish hatchery, feed mill and inputs is also being provided under various centrally sponsored schemes.

State Govt. Sponsored Welfare Schemes for fishermen

1. **Reservoirs Fishermen Accident Insurance Scheme:** Fishing in the big reservoirs is a hazardous job. There is every risk of life during heavy rains and storms. Keeping this in view all active fishermen working in the reservoirs have been insured for Rs. 50,000/- in case of permanent disability and Rs. 1,00,000/- in case of death of the fishermen. The insurance premium of Rs. 30/- is being shared by the Government of India and Government of Himachal Pradesh in 50:50 ratio.

2. **Saving-cum-Relief Scheme** (Close Season Assistance): In order to ensure sustained yield of fish from the reservoirs apart from the other management measure a fishing 'closed-season' of two months from 1st June to 31st July every year has been enforced. This measure has helped in building up fisheries of considerable magnitude by facilitating free run to the mother fish spawner during breeding season and the auto stocking of the fish seed. Every year fish over 4 crore value is being harvested accounting an income of Rs. 60 lakh to the State exchequer. This measure has also generated considerable resentment in the fishermen community and they were insisting on the provision of some financial assistance during this period.

Himachal Pradesh is perhaps the 1st State in the country which has acceded to the demand of fishermen by introducing a 'Contributory Saving – cum- Relief Scheme' to its reservoir fishermen. Under this scheme each fisherman who is member of the cooperative society deposits Rs. 40/- for ten consecutive fishing months from August to May. Proportionate amount is contributed by the Central and State Government with contribution of Rs. 400/- and 400/- respectively. The total amount of Rs.1200/- thus, raised is distributed to the fishermen in two installments during the 'closed season'.

3. **Fishermen Risk Fund Scheme:** Fishing in the reservoir is nocturnal in nature and hence involves a considerable element of risk to the life of the fishermen as well as his fishing equipments. Due to changes in atmospheric pressure, followed by cyclonic storms the reservoir becomes quite rough and such situation creates a lot of hardships to the poor fishermen. To mitigate it to a certain extent the losses to the fishermen a ' Fishermen Relief

Fund Scheme' has been formulated in the State. Under this scheme each reservoir fishermen contributes Rs. 20/- annually, to be collected from him at the beginning of the year while issuing the licenses.

The State Government contribute an amount equal to the total contribution of the fishermen. The assistance from the fund to the fishermen is given only on loss of gill nets, wooden boats, and tents. Based on the present value of the equipments the compensation is given up to 33% of the loss of each item. Maximum assistance is given in case of total loss/ destruction of the equipment.

4. Grant-in-Aid/Subsidy For The Construction of Fish Ponds: Fish culture is an important activity and aims at improving the nutritional standard of people by increasing production and consumption of fish as well as to improve the economic condition of the operators by providing them with gainful avocation. In order to assist the people to take the fish culture the States Govt. has formulated a scheme to provide subsidy up to maximum of Rs 5,000 for the construction/renovation of ponds.

The subsidy is available @ 50% of the total project cost to Scheduled Castes/ Tribes, while to others living below poverty line @ 20%. The State Government is also providing training and technical guidance to the entrepreneurs.

Angling in Himachal Pradesh

Angling is a source of recreation to innumerable naturalists belonging to different strata of the society. In Western Countries, fishing as a sport is being increasingly recognized by the medical authorities and more and more people are coming out of indoors to try their skill for this outdoor hobby. Angling became favourite pursuit of the British during nineteenth century and it was mainly for this reason that exotic species viz. brown and rainbow trouts were transplanted in Indian rivers and streams. They introduced species of trout not only in established Indian waters but also bred and propagated fast in view of rich oxygenated waters and ideal ecological condition of these rivers. Along with endemic mahseer (Tor putitora) the exotic trout (Salmo trutta fario and Salmo gairdnerii) started offering excellent fishing to the European anglers.

The literature is replete with records that Himachal Pradesh rivers and streams provided exciting fishing to large number of sport lovers/ anglers and fishermen. Thomas (1897) brought a book ' Rod in India' which incorporated his experiences of mahseer fishing in Northern rivers. Later with more and more people getting interested in mahseer sport in view of unparalleled thrill it provides, two important publications were brought out viz. 'Angler in India' and 'Circumventing the mahseer'. These two books embodied lot of information mostly on fishing sites and appropriate technique to be used. Later Hora (1957) published series of articles containing account of natural history and systematic of principal game fishes in India. In Himachal Pradesh fresh fish is found in the following rivers.

Trout waters

Name of river	Stretch	Stream length in (kms.)
Beas	Katrain to Manali	18
Tirthan	Larji to Nagni	20
Sainj	Larji to Ropa	22
Lambadug	Barit to Lohardi	6
Uhl	Barot to Kothikhad	10
Ravi	Holi to Main bridge	5

Mahseer waters: The river Beas and its tributaries are famous for Mahseer

Name of river	Stretch	Stream length in (kms.)
Beas	Seri mulag- Confluence of Binwa to Beas	0.5
Beas	Harsipattan- Confluence of Kunha tributary of Beas.	10
Beas	Chambapattan	05
Beas	Kuran	05
Beas	Dehra Gopipur	10
Beas	Baner	05
Giri	Bata	08

Fish Varieties-In Himachal Pradesh a very large number of fish are found. Some are very popular and other are lesser known.

SPECIES LOCAL NAME	FAMILY NOTOPTERIDAE
Notopterus chitala (Hamilton)	Pari
N. notopterus (Pallas)	Moh

Mastacembalus armatus (Lacepede)	Bami

Adventure Angling in Himachal Pradesh

Himachal Pradesh the abode of gods, the land of snows, a tourist's dream and delight, is also an angler's paradise. It has some of the finest trout streams in the north. The Pabbar in the Rohru valley, the Baspa in the Sangla valley, the Uhl in the Barot valley, and river Beas and its tributaries in the Kullu valley, abound in both brown and rainbow trout, while many rivers and streams in the Kangra valley are well-known for mahseer fishing. Each of these rivers has 32 to 40 km of angling reserve area, where one can fish with joy. Angling rules are liberal and the fee is nominal. Angler is permitted to catch six trout a day on each license; however a trout should not be less than 40 cm in size. Trout fishing season lasts from 1st November to 28th February each year.

Trout Fishing

Let us first discuss the places and the rivers and the streams, where one can find trout, easily.

Rohru: 120 km from Shimla, on the right bank of river Pabbar, is an important fishing centre. 50 km upstream from Rohru, and situated on the left bank of Andhra, a tributary of Pabbar,

Chirgaon: Is another fishing centre, besides being an ideal place for relaxation. The other places which are easily approachable from Rohru, and are known for providing good fishing opportunities are Seema (5km), Mandil (10km), Saandhsu (17 km), Tikri (21km) , and Dhamwari (24 km).

The river Baspa which takes its origin from the glaciers of the great Himalayan ranges, and remains practically clear except during the monsoon, flows through the Baspa or the Sangla Valley, which is one of the most beautiful valleys in the western Himalayas. Baspa makes a series of rapids, and has many nice pools for trout. Surrounded by high mountains and providing a splendid view of the majestic Kinner Kailash, Sangla, a populous village (2,621) with well furnished PWD and Forest Houses, could be a convenient place for fishing in this valley. Kupa and Badseri, which are just a few km from Sangla are also good spots for trout fishing. A temple and a Buddhist gompa and the ancient Kamru fort are some other attractions which the an-

glers should not miss. Sangla is 250 km from Shimla and is well connected with regular bus services.

Barot (Mandi): 200 km from Shimla and 75 km from the Mandi town is known not only for its picturesque water reservoir and scenic beauty, but for trout fishing also which abounds in the Uhl river, a tributary of river Beas. Some of the finest fishing spots are located at Luhandi, Puran hatchery, Lachkkandi, Tikkar, Balh and Kamand. Besides Barot the entire reservoir from Pandoh Dam to Aut on the Mandi-Manali national highway is also considered good for trout fishing.

Apart from being one of the most beautiful valleys in the Himalayas, the Kullu valley offers some ideal opportunities for trout fishing in the river Beas, which meanders through it, and in its larger tributaries, like Sarvari, Parbati, Sajoin and Phojal. The Sainj and Tirthan rivers, which form a *tri-junction* with the Beas a few hundred meters downstream from the conspicuously located PWD bungalow at *Larji*, are also trout streams.

The main Kullu valley right from Manali to Bhuntar provides some excellent pools for fishing especially at Patlikuhl, Katrain and Raison. Trout hatcheries have also been developed at Patlikuhl and Bathad. The Parbati valley, with its scenery generally on a wilder and more impressive scale, with dense forest to the hillsides, affords some excellent trout prospects throughout the course of the river Parbati from Manikarn to the confluence at Bhuin, Kasol, 5 km before Manikaran, charmingly situated on an open space which slopes down to a broad expanse of clean white sand at the end of the main river, makes a first rate halting place with every prospect of some really good spot. Chandigarh and Delhi and with many other places in the outside the state, Kullu is also on the air map of the country with regular flights from Delhi and Chandigarh.

Mahseer Fishing

After having savoured the delicacies of the trout, let us now come down to the comparatively less high Kangra valley, situated in the lap of the mighty Dhauladhar ranges, irrigated with streams which descend from perennial snows, and interspersed with homesteads buried in the midst of groves and fruit trees. Kangra has been known as the home of the proverbial mighty mahseer to which effect a fairly large account of evidence is available from the vivid accounts of various anglers interested in heavy fish. The river Beas and the Pong Dam reservoir provide attractive fish grounds to the anglers. Besides mahseer, the other fish available is *malhi, soal, bachwa, gid, shingara* etc. Although there are many places and rivers and streams where mahseer is available, the following beats are considered the best.

Sari Marog: Confluence of the Binwas tributary with the river Beas. A place known for its fantastic size of fish, with deep pools and many stones and hiding places. The approach is via Palampur, Andretta and Jaisinghpur. From Sari Marog village, a 3 km footpath leads to the spot, which entails a

steep and a breathtaking climb of about 45 minutes.

The stretch between Harsipattan and Nadaun: There are numerous beats on this stretch, easily accessible from the Palampur-Bhawarana-Thural road. The famous spots are the Mandh-Khad confluence, Lambagaon pul, Neogal confluence near Alampur, and Amtar, 2 km above Nadaun itself.

Chambapattan: Accessible from Jwalamukhi via road. After 8.5 km this locality offers three good spots, viz. the Chamba Pattanpul, the Kaleshwar beat opposite Chambapattan village, and the Uppar Chambapattan Run. All these places offer safe catches and can't be fished in one day.

Kuru: Kuru village offers two fishing spots, both of which are accessible from one of the two river banks. The Kuru- Pul is the confluence of a small Khad with the Beas river, joining about 1 km above the village and forming a small bay, above and below of which exceptional catches have been experienced. Access is through a 3 km- footpath from Dehra-Jwalamukhi road where a peepal tree and a small water tank is located at the road side.

Dehra-and Pong Dam Reservoir: Pong reservoir from Dehra to the Dam proper offers excellent fishing for mahseer almost round the year when fishing is open. The Pong reservoir can be approached from Pathankot via Jasur, from Chandigarh via Talwara, and from Dharamshala via Dehra and Nagrota Surian.

The area of Ashni stream upto its confluence with the river Giri, falling in Solan and Sirmaur district, provides enjoyable fishing opportunities. Near Solan, about 30 km away, on the Rajgarh road, passing through a valley dotted with plum orchards, fields and little farm houses, across the Giri bridge, is Gaura, once known for its huge mahseer. The place offered good spot to the erstwhile Patiala rulers and their British guests. Even today, Gaura, apart from bringing a scenically beautiful place, offers good prospects for mahseer fishing. Another spot is the stretch of river Yamuna from Naught ferry crossing down stream in Ponta Sahib.

Larji: a place located at a distance of about 7 km from Aut on National Highway-21 is an ideal trout angling spot on river Tirthan. It has a HPPWD rest House and license office of Sub-Inspector Fisheries. Himachal Government has specifically declared Tirthan river as an angling reserve and taken a historic decision not to allow any hydro power project on this river as well as it's tributaries in order to maintain it's aquatic bio-diversity. Every year fingerlings of brown as well as rainbow trout are stocked in this river by the department. Almost each and every angler went satisfied in the past after fishing in a stretch of 20 km upstream Larji.

Fishing in Pong Dam: The Beas River, on which the Pong Dam is located, is one of the five major rivers of the Indus basin. The river flows from the Beas Kund near Rohtang Pass, in the upper Himalayas, and traverses generally in a north-south direction until Largi, from where it turns sharply

at nearly a right angle and flows in a westerly direction up to the Pong Dam. The river traverses a total length of about 116 km (72 miles) from the source to the Pong Dam.

The reservoir drains a catchment area of 12,561 km2 (4,850 sq miles), out of which the permanent snow catchment is 780 km2 (301 sq miles). Monsoon rainfall between July and September is a major source of water supply into the reservoir, apart from snow and glacier melt. The project area experiences hot summers, with maximum temperature of 40 °C (104 °F), with hot and humid climate. Winters are fairly cold and mostly dry. The dam acts as a sponge for flood flows, and reservoir regulation prevents the inundation of surrounding upland areas from routine flooding during the monsoon season. The reservoir stretch is 42 km long (26 miles) with a maximum width of 19 km (11.8 miles), and with a mean depth of 35.7 m (117 ft). While the surface water temperature varies between 22.2–25.1 °C (72.0–77.2 °F), the incoming river water has a temperature range of 6–26 °C (42.8–78.8 °F).

A wide variety of commercially viable fish, 27 species of 5 families, such as *Mahseer, Catla, Mirror Carp, Singhara* (native) and others are recorded in the Pong Dam reservoir and its tributaries. Before the reservoir was built, catfishes, mirror carps and a few coarse fish were the dominant fish fauna in the Beas River. With the emergence of the reservoir, commercial fishing was encouraged as an important programme not only to provide employment to about 1500 fishermen but also to promote the eco-tourism potential. A planned operation of fish stocking was launched with first introduction of Common carp in 1974 and Indian major carps or Silver carp in 1976–77. This resulted in a shift in the catch structure of the reservoir, with carps accounting for 61.8% of the total landings in 1987–88.

The present fish stocks in the reservoir, in the sequence of their abundance are: 1) *Rohu, Aorichthys seenghala,* 2) *Labeo* calbasu (native), 3) *Tor putitora* (Himalayan Mahseer), 4) *Cirrhinus mrigala,* 5) *Wallago attu,* 6) *Cyprinus carpio,* 7) *Labeo dero,* 8) *Catla catla and* 9) *Channa sp.* The reservoir, unlike other reservoirs in the region, has shown a marked growth in catch of Mahseer fish, recording 20% of the total catch (in a average year) with the average size of the fish ranging from 1.5–1.7 kg (3.3–3.7 lb). This is attributed to the change in the Himachal Pradesh (HP) Fishing Rules, with an added clause which specifies the minimum catchable size for Mahseer as 300–500 mm (10–20 in) or approximately 1.2 kg (2.6 lb). That rule is stated to give to each female Mahseer to breed at least once before being caught.

Mahseer angling in the Pong Dam reservoir is said to be the only one of its kind in the country.

Kind Attention Anglers: Scientific evidence has proven that angler's equipment, particularly felt soles, is responsible for moving some ANS species such as whirling disease spores, Didymo, and New Zealand mud snails. Due to its porous nature, felt may have the potential to transmit other ANS, too. While fish health professionals, biologists, and others may use chemical treat-

ments for their working equipment, there is no single chemical treatment that will kill various ANS. Therefore, TU recommends that anglers simply inspect, clean, and dry their equipment. When travelling between drainages, inspect your equipment for sediment, debris, and plants. Thoroughly clean with water, hot water if available, and use a soft brush to clean seams and folds in waders and shoes. Whenever possible, dry your equipment, too. Desiccation will kill some ANS, not all, so, drying is a very good idea. While these simple recommendations will not guarantee the prevention of all ANS movement, they will help reduce the risk of spread and help protect our precious trout and salmon resources.

Whirling Disease Among Fish

Myxobolus cerebralis (Mc) is a parasite that infiltrates the head and spinal cartilage of fingerling trout where it multiplies rapidly, causing the fish to swim erratically and, in severe cases, die. When an infected fish dies, millions of tiny indestructible Mc spores (each about the size of a red blood cell) are released to the water where they can survive in this "dormant" form for up to 30 years. When Mc spores are ingested by Tubifex worms, the spore changes inside the worm and is released from the worm in a highly infective form, the Triactinomyxon (Tam), Tams are free-floating in the water until they infect trout, causing spinal deformities and decreased abilities for feed. Whirling disease is most infective to rainbow and cutthroat trout, but can infect all salmonid species. Sick fish Mc spore Tubifex worms Tams.

Typical signs of whirling disease include a darkened tail, twisted spine and deformed head (shortened, twisted jaw). Young fish may also swim erratically (whirl). However, other diseases and even genetic conditions can cause these signs as well. If you see fish with these signs in an area where whirling disease has not been reported, you should contact your state fishery agency.

Stocking or natural movement of live, infected fish is the primary route by which whirling disease is disseminated. However, there are other ways that the parasite can be spread, including by birds and humans – particularly boaters and anglers

How can we help prevent further spread?

Anglers, boaters, and others can make a difference in reducing the chances of spreading whirling disease. Distribution of the parasite is expanding rapidly in some areas, so you should assume its presence if you don't know otherwise. Recommended precautions that will help prevent not only the spread of whirling disease, but also other disease-causing organisms and aquatic pests include:

1. Never transport live fish from one water body to another. (This is illegal in many states.)

2. Do not use trout, whitefish, or salmon parts as cut bait.

3. Dispose of fish entrails and skeletal parts properly. Never discard fish parts in or near streams or rivers. Because an infected fish may harbour tens of thousands of myxospores, simply disposing of infected fish parts in a clean drainage could provide enough spores to start an infection. Do not discard fish parts in a kitchen disposal. Whirling disease myxospores can survive most wastewater treatment systems. Instead, discard in dry waste that would go to a landfill.

4. Rinse all mud and debris from equipment and wading gear, and drain water from boats before leaving an infected drainage. This is good practice for preventing transfer of other aquatic hitchhikers as well.

Himachal Pradesh Fisheries Act 1976

DEFINITIONS

In this Act, unless there is anything repugnant in the subject or context :-

'fish' includes shell fish and fish in all stages of its life history including aquatic plants of fisheries;

'fishing craft' means any boat whether manually operated or powered, used for fishing or transport of fish;

'fishing gear' means any net line, rod and line, fishing tackle and other appliances used for catching fish;

'fishing offence' means an offence punishable under this Act or under any rule made there under ;

'fishery officer' means any person whom the Himachal Pradesh Government or any other officer empowered by the Himachal Pradesh Government in this behalf, may from time to time, appoint by name, or as holding an office, to carry out all or any of the purposes of this Act or to do anything required by this Act or any rule made there under ;

provided that no police officer below the rank of Sub-Inspector shall be so empowered ;

'fixed engine' means any net, cage, trap or other contrivance for taking fish, fixed in the soil or made stationary in any other way;

'private waters' means waters which are the exclusive property of any person or in which any person has for the time being an exclusive right of fishery, whether as owner, lease or in any other capacity and includes tanks, ponds, artificial lakes etc. excavated at the expense of the owner which have no communication in the rainy season with natural waters such as rivers, streams, canals and jhils;

Explanation – water shall not cease to be private water within the meaning of this definition by reason only that other persons may have by custom a right of fishery therein;

'State Government' means the Government of Himachal Pradesh;

'religious waters' means waters belonging to a religious body or institu-

tion and which have never been fished before on account of any restrictions on religious grounds,

'religious body' means the trustees or any other persons who are incharge of a religious institution or in whom the ownership of the religious institution vest for the time being; and

'religious institutions' means a temple, a mosque, or a church, any other shrine dedicated to any God or Goddess, and such other institutions as the State Government may by notification in the Official Gazette declare in that behalf.

POWER TO MAKE RULES FOR PROHIBITION AND LICENSING OF FISHING IN SELECTED WATERS: The State Government may make rules for the purposes mentioned hereinafter in this section and shall under such rules declare the waters, not being private waters, to which all or any of them shall apply.

The State Government may, by notification in the Official Gazette, apply such rules or any of them to any private waters with the consent in writing of the owner thereof and of all persons having for the time being any exclusive right of fishery therein, or if the State Government is satisfied that the consent is unreasonably withheld without such consent. Provided that no rules under this section shall apply to the religious waters.

Such rules may –

Prohibit or regulate all or any of the following matters :

◈ the erection and use of fixed engines;

◈ the construction, temporary or permanent, of weirs, dams and bunds; and killing of fish by diversion of natural waters, and

◈ the dimension and kinds of fishing gears to be used and the mode of using them;

◈ prohibit fishing except under license and regulate the granting of such licensed, the fees payable therefore and the conditions to be inserted therein ;

◈ prohibit the destruction or attempt to destroy fish by gun spear, bow and arrow or like instrument or pollution of waters by trade effluents ;

◈ prescribe seasons in which the killing or catching or sale of any fish of any prescribed species shall be prohibited ;

◈ prescribe a minimum size or weight below which no fish or any prescribed species shall be caught, killed or sold ;

◈ prohibit fishing in any specified water for specified period ;

◈ regulate the export of fish outside any area or areas and price at which fish may be brought or sold in any specified markets of all or any specified species;

◈ require the owner, mortgage with possession or lease of any tank or jhil for the stocking of such tanks or jhils with any class or classes of fish;

◈ prescribe the formation of associations or societies and the collection of

funds for the uplift of fishermen and promotion of fishing industry;

◈ regulate the marketing of fish and also purchase and use of fish for preservation or for the manufacture of any fish products;

◈ regulate the possession of fishing craft and gear within such specified limits as may appear to be necessary; and

◈ regulate the transport of all fish or of certain species of fish or fish products within specified limits as may appear to be necessary.

Such rules may, among other matters :

◈ prescribe the routes by which alone fish or fish products may be imported into and exported from the State of Himachal Pradesh.

◈ prohibit the import, export or transport, within specified limits, of fish without a pass from a fisheries officer or a person duly authorised to issue the same or otherwise than in accordance with the conditions of each pass,

◈ prescribe the form of such passes and provide for their issue, production and return, and

◈ provide for the examination of fish in transit within specified limits.

In making any rule under this section the State Government may provide for : Seizure, removal and forfeiture of any apparatus erected or used for fishing in contravention of the rules, forfeiture of any fish taken by means of any such apparatus, and confiscation of any consignment of fish held or transported in contravention of the rules.

The power to make rules under this section shall be subject to the condition of the rules made after previous publication.

Every rule under this Act shall be laid, as soon as may be after it is made, before the Legislative assembly while it is in session for a total period of not less than fourteen days which may be comprised in one session or in two or more successive sessions, and if, before the expiry of the session in which it is so laid or the sessions immediately following the Assembly makes any modification in rule or decides that the rule should not be made, the rule shall thereafter have effect only in such modified form or be of no effect, as the case may be so however, that any such modification or annulment shall be prejudice to the validity of anything previously done under that rule.

POWER TO PROHIBIT SALE OF FISH: The State Government may, by notification in the Official Gazette, prohibit in such area or areas as may be specified in that behalf the offering or exposing for sale or barter of any fish killed in contravention of any rule made under subsection (3) of section 3 of this Act.

PENALTIES: The breach of any rule made under section 3 or of any prohibition notified under section 4 shall be punishable :-

on first conviction with imprisonment of either description for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both; and

on every subsequent conviction with imprisonment of either description for a term which may extend to six months, or with fine which may extend to one thousand rupees, or with both.

PUNISHMENT FOR DESTRUCTION OF FISH BY EXPLOSIVES: If any person uses any dynamite or other explosive substances in any water with intent thereby to catch or destroy any fish, that may be therein, he shall be punishable with imprisonment for a term which may extend to three years or with fine which may extend to five thousand rupees or with both.

Whoever, having already been convicted of an offense under subsection (1) is again convicted thereunder, shall, on every subsequent conviction, be punishable with imprisonment for a term which may extend to three years and with fine which may extend to five thousand rupees.

PUNISHMENT FOR DESTRUCTION OF FISH BY POISONING WATER: If any person puts any poison, bleaching powder, lime or noxious material into any water with intent thereby to catch or destroy any fish, he shall be punishable with imprisonment for a term which may extend to five thousand rupees, or with both.

7-A Punishment for the possession of dynamite and other explosive substance to be used for killing the fish. If a person is found to be in possession of a dynamite or any other explosive substance for the purpose of killing the fish near or in the vicinity or on the bank of a river, rivulet, khad, pond, lake, reservoir which are habitated by the fishes, shall, unless he explains satisfactorily that his possession or control over such a dynamite or the explosive substance was for a lawful object, he shall be punishable with imprisonment for a terms which may extend to two years, or with fine which may extend to three thousand rupees, or with both.

ARREST WITHOUT WARRANT FOR OFFENSE UNDER THIS ACT: Any fishery officer, police officer not below the rank of the Sub-Inspector, or any other person specially empowered by the State Government in this behalf may arrest without any warrant any person committing or attempting to commit, in this view a fishing offense:

- if the name and address of the person are not known to him, and
- if the person declines to give his name and address, or if there is reason to doubt the accuracy of the name and address, if given.

A person arrested under this section may be detained until his name and address have been correctly ascertained:-

Provided that no person so arrested shall be detained longer than it may be necessary for bringing him before a Magistrate, except under the order of a Magistrate for his detention. Every fishery officer shall have the same powers of search and investigation relating to a fishing offense as a police officer of the rank of the Sub-Inspector has under the Code of Criminal Procedure, 1973.

COGNIZANCE OF OFFENSES: No court shall take cognizance of any offense under this Act, except the complaint of a fishery officer or of a police officer not below the rank of the Sub-Inspector or any other person or class of person authorised by the State Government in this behalf.

POWER TO COMPOUND CERTAIN OFFENSES: The State Government may, by notification in the Official Gazette, empower a fishery officer by name or by virtue of office:-

— to accept from any person concerning whom evidence exists, which if unrebutted, would prove that he has committed any fishing offense as described in the first column of the schedule, a sum of money by way of compensation for the offense with regard to which such evidence exists and on the payment of such sum to such officer, such person, if in custody, shall be released and no further proceedings shall be taken against him;to release any property that has been seized as liable to consideration without further payment or on payment of the value thereof as estimated by such officer and no payment of such value of such property shall be released and no further proceedings shall be taken in respect thereof. A sum of money accepted as compensation under clause (a) of subsection (1) shall in no case exceed the amount acceptable as compensation in the second column of the schedule for the particular offense described in the first column thereof.

PUBLIC SERVANTS INDEMNIFIED FOR ACTS DONE UNDER THIS ACT, 45 OF 1860: All persons empowered to exercise powers and perform duties under this Act or rules made thereunder shall be deemed to be public servants within the meaning of section 21 of Indian Penal Code, 1860.

No suit or other legal proceedings shall lie in respect of the exercise of any powers or discretion conferred by this Act, or against any public servant or person duly appointed or authorised under this Act, in respect of anything in good faith done or purporting to be done under the provisions thereof or the rules made thereunder.

To increase employment opportunities in the fishery sector, state Government has initiated a number of steps both in expansion of farm activities and production of fish in major reservoirs.

This is also one of the sectors where with a small investment government can gain wonderful result to boost the economy and generate employment opportunities.

INDUSTRIAL DEVELOPMENT AND MINERAL WEALTH IN HIMACHAL PRADESH

Himachal Pradesh remained a neglected region, from the point of industrial development for a very long time. Although there is reference in Kautilya's *Arthashastra'*, Kalhans *Rajtarangini'* and Hiuen Tsang's Travelogues, about the economic structure of this hilly region, but they talked more about the richness of land, than anything else. Agricultural and semi-agricultural products were most imported and exported to and from Indian plains and countries on Eastern side. It is only in the 17th century, with the coming of British in India, dwellers of hills through trade links with them learnt many trick of trade and business. Like local Princely rulers, British also did not pay much attention to the development of the regions. There were two basic reasons behind this callousness, viz, (i) Sea ports were far away so the drainage of primary goods was very costly; and (ii) no serious challenge to the British supremacy was visible from northern side.

In the development and prosperity of an area, local inhabitants, their social norms, structure and interests play effective role. But in Himachal Pradesh, inegalitarian agrarian structure, indifferent attitude of princely rulers, limited trade opportunities, closed economic and social structure, unskilled labour, lack of infrastructural facilities, low density of population and primitive agriculture; contributed substantially to the underdevelopment and slow economic growth. After Independence, in 1948 Himachal was formed as a Chief Commissioner's province. Then efforts with little success rate, to set up industrial units were made by local entrepreneurs. But lack of finances, poor means of communications, rugged topography and low density of population, destroyed local incentives.

On 15th March 1950, Government of India to achieve planned economic development, set up a central body, Planning Commission. In 1951, First Five Year Plan was introduced by strongly emphasizing the need for agricultural development. Since 1951-2012, Eleven Five Year Plans have been completed with diversified emphasis. In Himachal Pradesh, the process of creating necessary institutional framework was started at the end of the Third Five Year Plan when the State started playing an important role in industrialisation. To diversify its industrial structure, various institutions have been created like; *H.P. Finance Corporation; H.P. Tourism Development Corporation (1972); H.P. State Small Industrial and Export Corporation; H.P. Mineral and Industrial Development Corporation (1971); H.P. Forest Corporation; Khadi and Village Industries Board; H.P. Agro-Industries corporation (1970) and H.P. State Handloom & Handicrafts Board (1974).*

Inadequate infrastructure non availability of skilled labour, severe climatic

and difficult geographical conditions that prevail in the State has historically stood in the way of rapid industrial growth in the State. However, during the last few years with an increased emphasis on the physical infrastructure provisions and with the help of the Government of India's Special Package of Incentives for the industrial sector in the State, the State Government of 20th century has been able to attract huge investment in the industrial sector.

The last decade has seen Himachal Pradesh entering into the take off stage with a well diversified base of industries ranging from traditional handloom and handicrafts based cottage, micro and small scale industrial units to electronics, telecommunication, textiles, precision tools, pharmaceuticals, engineering and food processing units have come up in the State.

Secondary sector comprising of manufacturing, construction, electricity etc. registered a growth rate of 12.2% (QE) during the year 2009-10. Secondary Sector contributed 39.65% to the Gross State Domestic Product during 2009-10 (QE) in contrast to 26.5% during the year 1990-91 reflecting a healthy trend in the industrialization of the State. 38,220 small scale industrial units with a total investment of Rs. 5192.69 crore and 487 medium and large scale industrial units with an investment of Rs. 10,797.84 crore have been established in the State upto 31st December, 2011. Solan, Sirmaur, Una and Kangra are the main districts where industrial investment is largely concentrated. Baddi- Barotiwala area of Solan district has mainly been developed as pharmaceutical and textile hub whereas; steel industry is coming up in Sirmaur district.

The importance of industrialisation does not pertain merely to an economic sphere but it encompasses in its political, social as well as strategic values too. The United Nations Committee for Development and Planning has rightly stated that, "Industrialisation should be viewed primarily as a means of improving the conditions of work and living standards of poverty stricken masses the world over and not merely of producing a wider variety of products by application of modern technology.

If this is not kept in mind, efforts to industrialize may leave the lives of majority of people untouched. Therefore, industrialisation is not only a technological revolution but it also involves profound social changes and is multi dimensional process. Hence, social and cultural processes are integral part of industrialisation."

In the pre-independence days, secondary occupations like handicrafts, spinning and weaving were most common throughout the State. Spinning and knitting were mainly carried out by women. There were cottage industries in Kinnaur and Lahaul-Spiti. Spinning and leather tanning industries were in existence in Chamba. Tea industry in Kangra has flourished by the beginning of twentieth century. In 1951, total number of registered factories were three in the State. But the Industrial progress of the State was stagnant in the hills till 1971. The areas which were part of Punjab before 1966, were also not developed, perhaps knowing fully by successive Punjab Governments that at certain point of time, these may have to be transferred to Himachal Pradesh,

in case it achieves full statehood. So it was on 1st November 1966 that hilly areas of Punjab were transferred to Himachal Pardesh, to fulfil the long pending demand of the people.

In the 1st five year plan (1951-56) priority was given to industry, but even the earmarked amount was not fully utilised. The per capita investment during this period was Rs. 21. However, handicrafts and sericulture industries were developed upto some level to initiate the process of development under planning. In the 2nd five year plan per capita outlay was increased to Rs. 64 only. The main objective of the plan was to supplement otherwise low income from agriculture and also to generate employment for people.

In the 3rd five year plan per capita outlay increased to Rs. 187. Total outlay was Rs. 2793 lakh, thus the share of industry increased to 2.49 percent from 2.46 per cent in the 2nd five year plan outlay. In the decades since 1977 the state achieved a great deal of industrial advancement, due to improved infrastructural facilities and abundance of natural wealth. The prominent industrial estates created by, are as under.

Parwanoo (district Solan): Mehatpur (district Una). It was developed by Mineral and Industrial Development Corporation; Paonta Sahib (district Sirmaur); Bilaspur (district Bilaspur); Nalagarh (district Solan); Jwali and Dehra Gopipur (district Kangra) and Samshi (district Kullu) Nalagarh and Baddi (Solan district).

The other areas, where State Government has made big progress are– Chamba, Mandi, Sansarpur Terrace and Indora in Kangra district, Pooh (in Kinnaur) and Shimla.

By 1976, the number of Small Scale Units were 1,663 and that of cottage, village and other units in unorganised sector, 5,625. In 1975-76, Himachal had 167 registered factories employing ten or more workers and using power of having 20 or more workers, but not using power. At the end of 1983-84, there were 1,523 Small Scale Industrial Units registered on permanent basis in Himachal Pradesh. Besides, there were 47 large and medium scale industrial units, employing 7,284 persons. Total number of registered factories as on 31st December 1984 was 1,056 with an estimated employment of 22,423. Within the period of two years, a big increase recorded in industrial units on 31st December 1986; there were 1,209 registered factories, providing employment to 31,572 persons. On 31st December 1993 there were 1401 registered factories and 40,448 workers working there. In 1996 the number of registered factories went upto 1546 and workers 52,895. The number of small scale industries on regular basis in 1995-96 was 724.

In 1999 there were 173 medium and large scale industries and about 27000 small scale and cottage industries with a total investments of Rs. 2550 crores in the state. The annual turnover of the industrial sector was nearly 4000 crore and these industries were providing employment to about 1.40 lakh persons.

The period from 2001 to 2013 saw great progress in industrial development and employment generation, because in the year 2003, the union government released a special Industrial development package for the state for the period extending 10 years. In 2004 the number of factories were 2309 with employment share of 93,227 and 913 small scale industrial units registered on permanent basis. In 2006 the factories number went upto 2743, employment 1,37,496 and small scale units 952. In 2009 the number of factories increased to 3949, workers 2,18,309 and small scale registered units 1032. By the end of 2012 there were 4508 factories, with employment share of 2,91,133 and small scale permanently registered units 798.

Development target and techniques should be centered around the vision that someone becoming better off without anyone being made worse off. Balanced development of all the twelve districts is of great importance to avoid any clash such as of, regional feelings. To facilitate smooth industrial development, government should specialise different district with different industrial products, keeping in view the availability of raw material, transportation facilities, railway—links, climatic conditions and required quality of manpower.

The classification of districts can be made as under to score progress and ensure prosperity:

Zone A: In this zone, districts of Kangra, Una, Hamirpur, Bilaspur, Sirmaur and Solan are to be grouped. All these districts are located near plains in Shivalik hills where there is a good network of irrigation, approachable by railway line and mineral wealth. Engineering industries (specific types required for mechanisation of agriculture and horticulture), foundary and iron industries, agro-based and livestock based industries (tanning, leather goods, sugar, confectionery, rice milling, leather, sports goods etc). These industries have better scope in this zone.

Zone B: The districts of Solan, Kullu, Shimla, Chamba, Mandi, Bilaspur, Sirmaur should be put in this zone. The climatic conditions here are most appropriate for horticulture and forest— based industries such as- Juice, Jam, Resin, different oils, various concentrates, packing boxes and cold storage etc. Districts Chamba. Bilaspur, Mandi and Sirmaur have deposits of asbestos, bauxite, pyrites and largest limestone deposit in Asia. To save the high transportation cost of raw material away from where it is located, it is must to install such mineral based industries to diversify industrial structure of the industrially backward state. Dust free atmosphere is a boon for electronic industry here in Himachal Pradesh.

Zone C: The third zone consists of districts Kinnaur, Lahaul-Spiti Shimla, Kullu and Chamba, which have historical, aesthetic and political importance. This zone has abundant scope of hydroelectric power generation, which is helpful to set up industrial units based on synthetic fiber, chemical, fertilizer and aluminium. Both high energy need and water inputs can be met by perennial rivers flowing through these districts. There is a high potential

for attaining specialisation in the production of dry fruits, potatoes, mushroom and herbs. The herbs found here are very rare and of high value. Country liquor *(angoori)* prepared in Kinnaur and Lahaul-Spiti based on local raw material is unique in the country. Kullu district is famous for shawl making and other woollen clothes.

Planning commission in complete harmony with State Government should realise one thing that Himachal Pradesh requires a different kind of approach towards its economic and social development. It can't be wholly in common with rest of the country. The policy maker at state level should make policy having district orientation rather state focused. Nodal agency at the district level should prepare industrial development blue print in consultation with local representatives at the grass root level.

The following industries have good scope in Himachal Pradesh to flourish: and generate employment opportunities to the local youth.

Electronic Industry: Engineering goods, laboratory equipment, watches, opticals, thermometers, telescope etc.

For the promotion of Electronic Industries, the Himachal Pradesh State Electronic Development Corporation (HPSEDC) has been established. An electronic complex has been set up at Chambaghat (Solan) and another at Shogi, near Shimla town for promotion of electronic industries.

Wood based Industries: Newsprint, Rayon grade pulp, Rayon chemical pulp, Resin and Turpentine, Furniture, Joinery, Toy making, Saw mills, Paper and paper board, Plywood, Match splints and chip board etc.

Mineral based Industries: Cement industry, Slate, Fertilizer, Iron industry, Aluminium, Sheet Galvanising etc.

Agriculture and Horticulture based Industries: Food processing plant, Fruit processing, Fishery, Sericulture, Poultry, Bee keeping, Piggery, Ayurvedic medicines and Pharmaceuticals and liquor units etc.

To expedite the process of industrialisation, the government has done away with **industrial Projects Approval and Review Authority (IPARA)** and the entrepreneurs are no longer to obtain the approval of the government for setting up of units in medium and large scale sector. The government has also introduced a concept of single man clearance by nominating a senior officer of the Directorate as nodal officer for projects in medium and large sector for getting clearance from various agencies. District Industrial Centres (DICs) have been functioning in all the districts of the Pradesh. The objective of DIC programme is to provide all facilities, services and support required by village and small entrepreneurs under single roof. During the year 1998-99, upto December, 1998, 579 small scale industrial units were registered on permanent basis and employment opportunities were provided to 3,150 persons. The number of such units went up to 913 in 2004-05, 952 in 2006-07, 1032 in 2009-10 and came down to 963 in 2010-11 and employment share was 4930 in 2004-05,

5712 in 2006-07, 5930 in 2009-10 and 6032 in 2010-11.

TABLE - 1

FOLLOWING TABLE IS INDICATIVE OF INDUSTRIAL PROGRESS IN THE STATE FROM - [1950-51 TO 2013-14]

Year	Industries and Mining (Numbers)		Production			
	Regd.Factories	Estimated Employment	(a)Resin (MT)	(b)Turpentine (ooolitre)	(c)Guns (Nos.)	(d)Salt (M.T.)
1	2	3	4	5	6	7
1950-51	3	–	1234	333	113	6238
1955-56	3	868	1375	308	395	4976
1960-61	23	1856	2960	732	887	5108
1970-71	174	11,214	8805	2011	2359	3845
1980-81	549	15700	6830	1676	2520	4683
1985-86	1151	25963	10922	783	2000	3941
1990-91	1308	34568	3243	1337	2870	3197
1993-94	1401	40448	6298	2407	3308	2902
1994-95	1495	43783	8697	2386	3386	1876
1995-96	1556	48970	8017	2239	3467	2452

Source: Important Facts of H.P. HPDES 1950-51 to 2013-14

With a view to provide greater exposure to promote the sale of local made products, the pradesh has been participating in various exhibitions, fairs, festivals and celebrations organised at state, national and international levels.

The Industrial Policy statement 1991 of the state government aimed at rapid, balanced, equal and simultaneous growth of cottage, tiny, small, medium and large industrial units and service establishments in a well dispersed manner. The following objectives were laid in the Industrial Policy 1991–

(a) Increased Industrial output to raise the state income.

(b) High priority to Industrial sector through enhanced plan investment and private sector investment;

(c) Generation of new avenue of employment through self employment

(d) Maximum utilisation of resources and local raw material;

(e) Disposal of industries to cover geographical area, to encourage investment by Non-Resident Indians (NRI's);

(f) Promotion of Tourism and Film Industry;

(g) Development of physical infrastructure such as market development and export promotion;

(h) Development of horticulture and agriculture based industries, herbal, sericulture, horology, basic drugs, photo-chemicals, adventure sports equipment, telecommunication equipment, automotive components and selected mineral based industries;

(i) Manpower and entrepreneurship development and;

(j) Revival and Rehabilitation of sick industries.

Inspite of so many programmes and policy declarations, Himachal Pradesh is still lagging behind industrially in comparison to other states of India. For rapid industrialisation in the state the right type of industry should be selected judiciously. Products based upon locally available raw materials and value added products should be selected for production in the state. Industries should be established around the existing townships rather than in the new industrial townships to avoid heavy investment in developing an additional infrastructure facilities. A cluster approach should be adopted and causes of sickness of the existing units be studied by a separate body to make appropriate remedial measure. A training need survey should be carried out by an expert agency to identify particular skills in which training should be imparted to upgrade them. The market information system should be developed both for new and existing industries.

What ails today's Himachal is nothing but shortsightedness of its leadership. Although Himachal Pradesh has been declared an industrially backward state by the planning commission, yet successive governments have failed to adopt a uniform policy to ensure speedy development of industries in the state. In most of the cases decisions are taken with political gains in mind rather than giving priority to the most required units. In some cases short term gains have superseded the long terms strategy which resulted into huge losses to the dust free and peaceful atmosphere. The setting up of cement industries in place of cold storages and fruit and food processing units is the reflection of poor planning and myopic attitude of the leadership.

One industry i.e. 'Tourism' has potential to generate thousand crores of rupees annually, if harnessed properly. But who will come to Himachal, when hills and valleys are being levelled to extract limestone to feed cement plants causing damage to rivers, forests and atmosphere. Policy and decision makers should realise one thing that industrial development does not mean industries which are unconducive to our environment and social health. In Himachal Pradesh only such industries should be built up which are cordial to its pollution free environment and do not cause damage to its inherited invaluable gift of nature

Liberal policy of the Government will open gates for outsider industrialists to invest money in dust free areas. But utmost care should be taken lest it should pollute and destroy the invaluable gift of the nature, in the mad race of development.

With limited employment avenues in the public sector, the state's unemployed youth have been relying on the private industry for jobs. However, in the absence of high-emoluments-generating information technology-based units, the number of jobs created in the past few years have been less than expected. As many as 57,441 people were employed in private industry during the 2008-2012, out of which 45, 0919 were Himachalis.

Industry in the state received an impetus with grant of a 10-year incentive package in 2003, which was announced by the then Prime Minister Atal Behari Vajpayee. It meant an income tax holiday, central excise exemption, capital investment subsidy and transport subsidy extended to new entrepreneur as well as to existing units that undertook substantial expansion. The package helped transform the industrially backward Himachal to a developing economy, with the share of industry in the Gross State Domestic Product increasing from 1.1 per cent in 1950-51 to 9.4 in 1990-91 and 11.7 per cent in 2010-11

The package, however, became a bone of contention between the ruling BJP and the opposition Congress, as the 10-year tax holiday was curtailed to seven years by the Congress-led Union government under pressure from the Congress-ruled neighbouring states. Jammu and Kashmir and Sikkim, which has also been extended a similar tax holiday, continued to enjoy the benefits for the full term. The incentive of capital investment subsidy was also reduced to 15 per cent in Himachal, while it was 30 per cent for Jammu and Kashmir.

THE INDUSTRY ZONE : As much as 70 per cent of the state's industry is concentrated in the Baddi-Barotiwal-Nalagarh (BBN) belt and a few other industrial clusters such as Paonta Sahib. Kala Amb., Mehatpur, Una, Sansarpur Terrace, and Golthai. Availability of adequate hostels for workers is the most pressing problem in the BBN belt, where thousands of migrant laboures have been residing in slums in unhygienic conditions. On 17th October 2005 Sonalika, an automobile company setup its multi utility vehicle manufacturing unit at Amb in district Una. This unit is famous for the production of tractor. Two Oil Refineries — Solan Nadaun — A Jarold Refinery

Green Fuel for Tahliwal Industry : Tahliwal in Una district is the first industrial area of the state to use green fuel. Gas Authority of India Ltd (GAIL) has sanctioned a Rs 14-crore project to lay a 10 km long gas pipeline from Mehanpur in Punjab to Tahliwal. GAIL is already supplying natural gas to National Fertilisers Limited plant in Nangal and the connection to Tahliwal has been proposed from this line. According to a detailed project report (DPR) by GAIL, of the 10 km pipeline, 6.8 km length will be in Punjab, while the remaining 3.2 km will be in Himachal Pradesh.

Industrial Package and Growth: In 2003 NDA government in the centre

sanctioned special Industrial package to Himachal Pradesh, which helped state to gain momentum in Industrial sector. This growth is reflected in the net state domestic product, which was Rs. 18127/- crore in 2003-04, 39407 crore in 2009-10 and 51688 crore in 2011-12. In terms of percentage growth during Eleventh plan period in comparison to all India growth in 2007 -08, 5.02%, in 2008-09 0.95 percent, but in 2009-10 in Himachal Pradesh it was 19 percent and all India 14.67 percent, which shows 4.33% higher in Himachal Pradesh. But after the withdrawal of package in March 2010, Himachal growth was 16.80% and all India 17.86 % and in 2011-12 the all India growth was 15.06% and in Himachal it was 12.29% only. The per capita income on current prices in 2002-03 was Rs. 22795/- per annum, which increased to 74899 in 2011-12. This clearly shows how badly Himachal need special Industrial package to compete with national growth.

The union government restored central capital subsidy in the state for industries from 7th January 2013 to 31st March 2017. This facility had come to and on 6th January 2013. To extend helping hand to the economy of the state transport subsidy was replaced by freight subsidy for indefinite period.

CENTRE SANCTIONS HANDLOOM CLUSTERS FOR CHAMBA, MANDI

The Centre sanctioned two more handloom cluster projects in the financial year 2011-12 for 'Tissa' in Chamba and 'Janjehli' in Mandi. Two skill - upgrading centres have also been sanctioned for Chamba crafts, including the world-famous Chamba rumal. The projects, is implemented by the State Handloom and Handicrafts Corporation, benefit more than 1,000 artisans in the two districts.

It has already implemented three major projects, including the Kullu Handloom Cluster, which benefit 5,000 weavers. Two other projects are in Gohar (Mandi) and Reckong Peo with 714 beneficiaries, while a Rampur Handloom Cluster is developed to help over 600 weavers. It is also extending pre-loom, loom and post-loom facilities to the weavers and other artisans at its 15 production centres.

The corporation has been promoting sales of handicrafts and handloom items through exhibitions. It has organised 30 exhibitions throughout the country till 2013, where sales of handicrafts increasing day by day. It has also introduced *e-shopping* facility of the marketing Himachali products. The corporation has a network of the 17 emporiums, out of which 15 are within the state in Shimla, Solan, Bilaspur, Dharamshala, Chamba, Hamirpur, Kangra, Kullu, Keylong, Manali, Mandi, Nahan, Reckong Peo, Palampur and a furniture unit in Paonta Sahib. The emporiums are also located in New Delhi and Bangalore. The corporation also provides training at 27 centres. Over 500 weavers and artisans are being trained every year in carpet weaving, shawl and durrie weaving, thanka paintings, wood work, dolls making, metal craft, blanket weaving and hand knitting.

MINERAL WEALTH

Himachal Pradesh is rich in several important minerals, but the exploitation of minerals started only in the 6th decade of 20th century, when Directorate of Industries in 1966 set up a geological wing to conduct investigations of mineral deposits. The remoteness of State's territory and the rugged terrain made geological exploration and the ascertaining of mineral potential of the region somewhat difficult. Geological Survey of India published a consolidated map of India's mineral wealth in 1976. According to this map, Himachal Pradesh occupies a position on the mineral map of India only in building stones, limestone, rock salt and glass-making sand. The other minerals found in the State are: Gypsum, Barytes, Magnesite, Pyrite, Iron Ore, Copper, Cobalt, Nickle, Silver, Antimony, Coal and Mica have also been noted. The largest mineral of the State on the basis of value is Slate.

Following are the important minerals and their location in Himachal Pradesh.

1.Limestone: Limestone is a sedimentary rock composed largely of the minerals calcite and aragonite, which are different crystal forms of calcium carbonate ($CaCO_3$). Most limestone is composed of skeletal fragments of marine organisms such as coral or foraminifera. Limestone makes up about 10% of the total volume of all sedimentary rocks. The solubility of limestone in water and weak acid solutions leads to karst landscapes, in which water erodes the limestone over thousands to millions of years. Most cave systems are through limestone bedrock. Limestone has numerous uses: as a building material, as aggregate for the base of roads, as white pigment or filler in products such as toothpaste or paints, and as a chemical feedstock. The first geologist to distinguish limestone from dolomite was Belsazar Hacquet in 1778.

Like most other sedimentary rocks, most limestone is composed of grains. Most grains in limestone are skeletal fragments of marine organisms such as coral or foraminifera. Other carbonate grains comprising limestones are acids, peloids, intraclasts, and extraclasts. These organisms secrete shells made of aragonite or calcite, and leave these shells behind after the organisms die. Limestone often contains variable amounts of silica in the form of chert (chalcedony, flint, jasper, etc.) or siliceous skeletal fragment (sponge spicules, diatoms, radiolarians), and varying amounts of clay, silt and sand (terrestrial detritus) carried in by rivers.

Some limestones do not consist of grains at all, and are formed completely by the chemical precipitation of calcite or aragonite, i.e. travertine. Secondary calcite may be deposited by supersaturated meteoric waters (groundwater that precipitates the material in caves). This produces speleothems, such as stalagmites and stalactites. Another form taken by calcite is oolitic limestone, which can be recognized by its granular (oolite) appearance. The primary source of the calcite in limestone is most commonly marine organisms. Some of these organisms can construct mounds of rock known as reefs, building upon past

generations. Below about 3,000 meters, water pressure and temperature conditions cause the dissolution of calcite to increase nonlinearly, so limestone typically does not form in deeper waters. Limestones may also form in both lacustrine and evaporite depositional environments.

Calcite can be either dissolved or precipitated by groundwater, depending on several factors, including the water temperature, pH, and dissolved ion concentrations. Calcite exhibits an unusual characteristic called retrograde solubility, in which it becomes less soluble in water as the temperature increases. Because of impurities, such as clay, sand, organic remains, iron oxide and other materials, many limestones exhibit different colors, especially on weathered surfaces.

Limestone may be crystalline, clastic, granular, or massive, depending on the method of formation. Crystals of calcite, quartz, dolomite or barite may line small cavities in the rock. When conditions are right for precipitation, calcite forms mineral coatings that cement the existing rock grains together, or it can fill fractures. Travertine is a banded, compact variety of limestone formed along streams, particularly where there are waterfalls, and around hot or cold springs. Calcium carbonate is deposited where evaporation of the water leaves a solution supersaturated with the chemical constituents of calcite. Tufa, a porous or cellular variety of travertine, is found near waterfalls. Coquina is a poorly consolidated limestone composed of pieces of coral or shells. During regional metamorphism that occurs during the mountain building process (orogeny), limestone recrystallizes into marble. Limestone is a parent material of Mollisol soil group.

Uses: Limestone is very common in architecture, especially in Europe and North America. Many landmarks across the world, including the Great Pyramid and its associated complex in Giza, Egypt, are made of limestone. So many buildings in Kingston, Ontario, Canada were constructed from it that it is nicknamed the 'Limestone City'. On the island of Malta, a variety of limestone called Globigerina limestone was, for a long time, the only building material available, and is still very frequently used on all types of buildings and sculptures. Limestone is readily available and relatively easy to cut into blocks or more elaborate carving. It is also long-lasting and stands up well to exposure. However, it is a very heavy material, making it impractical for tall buildings, and relatively expensive as a building material.

The Great Pyramid of Giza, one of the Seven Wonders of the Ancient World has an outside cover made entirely from limestone.

Courthouse is built of limestone in Manhattan, Kansas

A limestone plate with a negative map of Moosburg in Bavaria is prepared for a lithography print.

Limestone was most popular in the late 19th and early 20th centuries. Train stations, banks and other structures from that era are normally made of limestone. It is used as a facade on some skyscrapers, but only in thin plates for

covering, rather than solid blocks. In the United States, Indiana, most notably the Bloomington area, has long been a source of high quality quarried limestone, called Indiana limestone. Many famous buildings in London are built from Portland limestone.

Limestone was also a very popular building block in the Middle Ages in the areas where it occurred, since it is hard, durable, and commonly occurs in easily accessible surface exposures. Many medieval churches and castles in Europe are made of limestone. Beer stone was a popular kind of limestone for medieval buildings in southern England. Limestone and (to a lesser extent) marble are reactive to acid solutions, making acid rain a significant problem to the preservation of artifacts made from this stone. Many limestone statues and building surfaces have suffered severe damage due to acid rain. Acid-based cleaning chemicals can also etch limestone, which should only be cleaned with a neutral or mild alkaline-based cleaner.

Other uses include:

- It is the raw material for the manufacture of quicklime (calcium oxide), slaked lime (calcium hydroxide), cement and mortar.
- Pulverized limestone is used as a soil conditioner to neutralize acidic soils.
- It is crushed for use as aggregate—the solid base for many roads.
- Geological formations of limestone are among the best petroleum reservoirs;
- As a reagent in flue-gas desulfurization, it reacts with sulfur dioxide for air pollution control.
- Glass making, in some circumstances, uses limestone.
- It is added to toothpaste, paper, plastics, paint, tiles, and other materials as both white pigment and a cheap filler.
- It can suppress methane explosions in underground coal mines.
- Purified, it is added to bread and cereals as a source of calcium.
- Calcium levels in livestock feed are supplemented with it, such as for poultry (when ground up).
- It can be used for remineralizing and increasing the alkalinity of purified water to prevent pipe corrosion and to restore essential nutrient levels.
- Used in blast furnaces, limestone binds with silica and other impurities to remove them from the iron.
- It is often found in medicines and cosmetics.
- It is used in sculptures because of its suitability for carving.

Gagal (Bilaspur district), Broh-Shind (Chamba district), Bhudloge (Darlaghat in Solan district), Dharmkot (Kangra), Kothipura (Bilaspur), Kanjota (Bilaspur), Radinan Area (Sirmaur district), Sundernagar and Alsindi (Mandi district,) Naura Dhar and 'Nandi areas' (Sirmaur district). Four cement factories are, one at Rajban in Sirmaur district Barmana in Bilaspur district, Darlaghat and Bagha in Solan district. Surajpur cement factory near Kalka (In Haryana) is also fed by Himachal areas.

Known for hydel power and apple, the state is set to become the cement

bowl of the country as well with the government gave its nod for setting up the largest cement project in the Chopal area of Shimla district for which Reliance Cementation Private Limited of Anil Dhirubhai Ambani Group was granted a prospecting licence. The company has been assigned 25 square kilometers at Kuru Khera, Sugarthi, Thangar, Pauli Kheram Kandal and Bedera villages for prospecting of deposits. The company has proposed a 5-million tonne plant based on limestone, shale and quartzite. The government generally allows a 2-million-tonne plant at the first instance and the second is allowed later as part of an expansion plant. The new plant will be located about 20 km from the plant being set up by India Cements near Gumma. This is the second project for which a prospecting licence has been granted.

The previous government led by BJP (2007-2012) issued a licence to Dalmia Cements Limited for the Kariyali-Kothi-Sal-Bagh area of Sunni tehsil in Shimla district. The deposits are in the probable category and a detailed geological investigation will be required to assess the exact quantum. Other earlier projects were based on proven deposits and no prospecting was required. The ACC, Lafarge, JK Cements, Laxmi Cements, Ambjua, ABG Group, Abhijit Group, Dalmia and Atha Mines were in the race and had proposed a 2-million-tonne plant. Most lost out when the government decided not to allot the project to a company which had a cement project in the state. Reliance out scored competitors on technical and financial parameters. Normally 130 million tonnes of proven deposits are enough for a 2-million-tonne or a 3-million-tonne plant with a life of 60 years. According to preliminary estimates probable deposits are more than 150 million tonnes and a 5-million-tonne plant is possible with a life of around 40 years.

The four big cement projects are at Barmana (ACC), Darlaghat (Ambuja), Rajban (CCI) and Bagha (Jaypee) having an aggregate capacity of 12.06 million tonnes. Four projects are in the pipelines at Sundernagar and Al sindi in Mandi district, at Broh-Shind in Chamba district and at Chopal. Those will produce an additional 7.27 million tonnes of cement. If one takes the two projects for which prospecting licences have been issued the total capacity to produce clinker will touch the 28-million-tonne mark from which 37 million tonnes of cement can be produced. As most of the companies have set up grinding units outside the state the government has imposed the condition that 50 per cent of the cement will have to be produced within the state.

In 2005-06 the production of limestone was 7,527 metric tonnes, which earned Rs. 60.22 crore while in 2006-07 the production was 7,458 metric tonnes and value was Rs. 67.13 crore. Less production, more value could be attributed to the fact of rising prices. The production of limestone in 2009-10 was 7247 metric tonnes and earning was 77.88 crore, while in 2010-11 its production went up to 11307 MT and revenue generated was Rs. 113.07 crore. The production in 2013 reached at 14054 MT and its value was Rs. 154.60 crore. In the years to follow more and more production will generate additional income to the state exchequer..

onite Cement Plant – (Mohradhar) Company FCI Aravali Gypsum and Minerals India Ltd.

2. Dolomite: Dolomite is an *anhydrous carbonate* mineral composed of calcium magnesium carbonate $CaMg(CO_3)^2$. The word dolomite is also used to describe the sedimentary carbonate rock, which is composed predominantly of the mineral dolomite (also known as dolostone).

Most probably the mineral dolomite was first described by Carl Linnaeus in 1768. In 1778, it was described by the Austrian naturalist Belsazar Hacquet as the "stinking stone". In 1791, it was described as a rock by the French naturalist and geologist, Déodat Gratet de Dolomieu (1750–1801) the first from the buildings in the old city of Rome and later as samples collected in what is now known as the Dolomite Alps of northern Italy. The mineral was given its name in March 1792 by Nicolas de Saussure, naming it after De Dolomieu. Hacquet and Dolomieu met in Laibach in 1784, which may have contributed to De Dolomieu's work.

The mineral dolomite crystallizes in the trigonal-rhombohedral system. It forms white, tan, gray, or pink crystals. Dolomite is a double carbonate, having an alternating structural arrangement of calcium and magnesium ions. It does not rapidly dissolve or effervesce (fizz) in dilute hydrochloric acid as calcite does. Crystal twinning is common. Solid solution exists between dolomite, iron rich ankerite and the manganese rich kutnohorite. Small amounts of iron in the structure give the crystals a yellow to brown tint. Manganese substitutes in the structure is also up to about three percent MnO. A high manganese content gives the crystals a rosy pink colour. Lead, zinc, and cobalt also substitute in the structure for magnesium. The mineral dolomite is closely related to huntite $Mg_3Ca(CO_3)_4$. Because dolomite can be dissolved by slightly acidic water, areas of dolomite are important as aquifers and contribute to karst terrain formation.

Uses: Dolomite is used as an ornamental stone, a concrete aggregate, a source of magnesium oxide and in the Pidgeon process for the production of magnesium. It is an important petroleum reservoir rock, and serves as the host rock for large strata-bound Mississippi Valley-Type (MVT) ore deposits of base metals such as lead, zinc, and copper. Where calcite limestone is uncommon or too costly, dolomite is sometimes used in its place as a flux for the smelting of iron and steel. Large quantities of processed dolomite are used in the production of float glass. In horticulture, dolomite and dolomitic limestone are added to soils and soilless potting mixes as a pH buffer and as a magnesium source. Home and container gardening are common examples of this use. Dolomite is also used as the substrate in marine (saltwater) aquariums to help buffer changes in pH of the water.

Particle physics researchers like to build particle detectors under layers of dolomite to enable the detectors to detect the highest possible number of exotic particles. Because dolomite contains relatively minor quantities of radioactive materials, it can insulate against interference from cosmic rays without adding to background radiation levels. Dolomite is a popular choice for Motorcycle speedway tracks throughout Australia and New Zealand. Depos-

its of this mineral are found in the following localities (a) in Kothipura and Panjota blocks of Bilaspur district and (b) in Nalagarh area of Solan district.

3. Pyrite: The mineral pyrite, or iron pyrite, also known as *fool's gold,* is an iron sulfide with the formula FeS^2. This mineral's metallic luster and pale brass-yellow hue give it a superficial resemblance to gold, hence the well-known nickname of fool's gold. The colour has also led to the nicknames brass, brazzle, and Brazil, primarily used to refer to pyrite found in coal.

Pyrite is the most common of the sulfide minerals. The name pyrite is derived from the Greek word (pyrites), *"of fire"* or *"in fire",* in turn from (pyr), "fire". In ancient Roman times, this name was applied to several types of stone that would create sparks when struck against steel; Pliny the Elder described one of them as being brassy, almost certainly a reference to what we now call pyrite. By Georgius Agricola's time, the term had become a generic term for all of the sulfide minerals. Pyrite is usually found associated with other sulfides or oxides in quartz veins, sedimentary rock, and metamorphic rock, as well as in coal beds and as a replacement mineral in fossils. Despite being nicknamed fool's gold, pyrite is sometimes found in association with small quantities of gold. Gold and arsenic occur as a coupled substitution in the pyrite structure. In the Carlin–type gold deposits, arsenian pyrite contains up to 0.37 wt% gold.

Uses: Pyrite enjoyed brief popularity in the 16th and 17th centuries as a source of ignition in early firearms, most notably the wheellock, where the cock held a lump of pyrite against a circular file to strike the sparks needed to fire the gun.

Pyrite has been used since classical times to manufacture copperas, that is, iron (II) sulfate. Iron pyrite was heaped up and allowed to weather (an example of an early form of heap leaching). The acidic run off from the heap was then boiled with iron to produce iron sulfate. In the 15th century, such leaching began to replace the burning of sulfur as a source of sulfuric acid. By the 19th century, it had become the dominant method. Pyrite remains in commercial use for the production of sulfur dioxide, for use in such applications as the paper industry, and in the manufacture of sulfuric acid. Thermal decomposition of pyrite into FeS (iron (II) sulfide) and elemental sulfur starts at 550 °C; at around 700 °C pS_2 is about 1 atm.

A newer commercial use for pyrite is as the cathode material in Energizer brand non-rechargeable lithium batteries. Pyrite is a semiconductor material with a band gap of 0.95 eV. During the early years of the 20th century, pyrite was used as a mineral detector in radio receivers, and is still used by 'crystal radio' hobbyists. Until the vacuum tube matured, the crystal detector was the most sensitive and dependable detector available- with considerable variation between mineral types and even individual samples within a particular type of mineral. Pyrite detectors occupied a midway point between galena detectors and the more mechanically complicated perikon mineral pairs. Pyrite detectors can be as sensitive as a modern 1N34A diode detector.

Pyrite has been proposed as an abundant, inexpensive material in low cost photovoltaic solar panels. Synthetic iron sulfide is used with copper sulfide to create the experimental photovoltaic material. Pyrite is used to make marcasite jewellery. Marcasite jewellery, made from small faceted pieces of pyrite, often set in silver, was popular in the Victorian era. Marcasite jewellery does not contain marcasite, which is a medieval term that encompassed both pyrite and the mineral now called marcasite.

In Himachal Pradesh pyrite is found near Tara Devi (Shimla district).

4. Gypsum: Gypsum is a soft sulfate mineral composed of *calcium sulfate dihydrate,* with the chemical formula $CaSO_4 \cdot 2H_2O$. It can be used as a fertilizer, is the main constituent in many forms of plaster and is widely mined. A massive fine-grained white or lightly tinted variety of gypsum, called alabaster, has been used for sculpture by many cultures including Ancient Egypt, Mesopotamia, Ancient Rome, Byzantine empire and the Nottingham alabasters of medieval England. It is the definition of a hardness of 2 on the Mohs scale of mineral hardness. It forms as an evaporite mineral and as a hydration product of anhydrite.

Gypsum occurs in nature as flattened and often twinned crystals, and transparent, cleavable masses called selenite. Selenite contains no significant selenium; rather, both substances were named for the ancient Greek word for the Moon. Selenite may also occur in a silky, fibrous form, in which case it is commonly called *"satin spar"*. Finally, it may also be granular or quite compact. In hand-sized samples, it can be anywhere from transparent to opaque. A very fine-grained white or lightly tinted variety of gypsum, called alabaster, is prized for ornamental work of various sorts. In arid areas, gypsum can occur in a flower-like form, typically opaque, with embedded sand grains called desert rose. It also forms some of the largest crystals found in nature, up to 12 meters (39 ft) long, in the form of selenite.

Gypsum is a common mineral, with thick and extensive evaporite beds in association with sedimentary rocks. Deposits are known to occur in strata from as far back as the Archaean eon. Gypsum is deposited from lake and sea water, as well as in hot springs, from volcanic vapors, and sulfate solutions in veins. Hydrothermal anhydrite in veins is commonly hydrated to gypsum by groundwater in near-surface exposures. It is often associated with the minerals halite and sulfur. Pure gypsum is white, but other substances found as impurities may give a wide range of colors to local deposits.

Because gypsum dissolves over time in water, gypsum is rarely found in the form of sand. However, the unique conditions of the White Sands National Monument in the US state of New Mexico have created a 710 km2 (270 sq miter) expanse of white gypsum sand, enough to supply the construction industry with drywall for 1,000 years. Commercial exploitation of the area, strongly opposed by area residents, was permanently prevented in 1933 when president Herbert Hoover declared the gypsum dunes a protected national monument.

Gypsum is also formed as a by-product of sulfide oxidation, amongst others by pyrite oxidation, when the sulfuric acid generated reacts with calcium carbonate. Its presence indicates oxidizing conditions. Under reducing conditions, the sulfates it contains can be reduced back to sulfide by sulfate reducing bacteria. Electric power stations burning coal with flue gas desulfurization produce large quantities of gypsum as a by-product from the scrubbers. Orbital pictures from the Mars Reconnaissance Orbiter (MRO) have indicated the existence of gypsum dunes in the northern polar region of Mars, which were later confirmed at ground level by the Mars Exploration Rover (MER) Opportunity.

Uses of Gypsum :

- Gypsum board is primarily used as a finish for walls and ceilings, and is known in construction as drywall, sheet rock or plasterboard.
- Gypsum blocks are used like cement blocks in building construction.
- Gypsum mortar is an ancient mortar used in building construction Plaster ingredient (surgical splints, casting moulds, modelling)
- Fertilizer and soil conditioner: In the late 18th and early 19th centuries, Nova Scotia gypsum, often referred to as plaster, was a highly sought fertilizer for wheat fields in the United States. It is also used in ameliorating high sodium soils.
- A binder in fast-dry tennis court clay.
- As alabaster, a material for sculpture, especially in the ancient world before steel was developed, when its relative softness made it much easier to carve than stone with available tools.
- A wood substitute in the ancient world: For example, when wood became scarce due to deforestation on Bronze Age Crete, gypsum was employed in building construction at locations where wood was previously used.
- A tofu (soy a bean curd) coagulant, making it ultimately a major source of dietary calcium, especially in Asian cultures which traditionally use few dairy products.
- Adding hardness to water used for home brewing.
- Used in baking as a dough conditioner, reducing stickiness, and as a baked-goods source of dietary calcium. The primary component of mineral yeast food.
- A component of Portland cement used to prevent flash setting of concrete soil/water potential monitoring (soil moisture tension).
- A common ingredient in making mead.
- In the medieval period, it was mixed, by scribes and illuminators, with lead carbonate (powdered white lead) to make gesso, which was applied to illuminated letters and gilded with gold in illuminated manuscripts.
- In foot creams, shampoos and many other hair products.
- A medicinal agent in traditional Chinese medicine called *shi gao*

- Impression plasters in dentistry.
- Used in mushroom cultivation to stop grains from clumping together.

This mineral is found in substantial quantities in the following localities of the state; (a) near Kuthar in Solan district, (b) near Bathri in Chamba district and (c) in parts of Kinnaur and Lahaul-Spiti districts. It is also found at Korga and Bharil areas of Sirmaur district. About 4 million tonnes reserves are estimated in these areas.

5. Quartzite Glass Sand: Pukhar Area (Bilaspur district).

6. Magnesite: Magnesite is a mineral with the chemical formula $MgCO_3$ (magnesium carbonate). Mixed crystals of iron II carbonate and magnesite (mixed crystals known as ankerite) possess a layered structure: monolayers of carbonate groups alternate with magnesium monolayers as well as iron II carbonate monolayers. Manganese, cobalt and nickel may also occur in small amounts. Magnesite occurs as veins in and an alteration product of ultramafic rocks, serpentinite and other magnesium rich rock types in both contact and regional metamorphic terrains. These magnesites often are cryptocrystalline and contain silica in the form of opal or chert. Magnesite is also present within the regolith above ultramafic rocks as a secondary carbonate within soil and subsoil, where it is deposited as a consequence of dissolution of magnesium-bearing minerals by carbon dioxide within groundwater.

Uses: Similar to the production of lime, magnesite can be burned in the presence of charcoal to produce MgO, which in the form of a mineral is known as periclase. Large quantities of magnesite are burnt to make magnesium oxide: an important refractory material used as a lining in blast furnaces, kilns and incinerators.

- Magnesite can also be used as a binder in flooring material. - Furthermore it is being used as a catalyst and filler in the production of synthetic rubber and in the preparation of magnesium chemicals and fertilizers.
- In fire assay, magnesite cupels can be used for cupellation as the magnesite cupel will resist the high temperatures involved.
- At times magnesite is dyed to make beads used as ornaments.

It is found in Gumrola Suai Area of Chamba district.

7. Barytes: Baryte, or barite, ($BaSO_4$) is a mineral consisting of barium sulfate. The baryte group consists of baryte, celestine, anglesite and anhydrite. Baryte itself is generally white or colourless, and is the main source of barium. Baryte and celestine form a solid solution $(Ba,Sr)SO_4$.

Baryte occurs in a large number of depositional environments, and is deposited through a large number of processes including biogenic, hydrothermal, and evaporation, among others. Baryte commonly occurs in lead-zinc veins in limestones, in hot spring deposits, and with hematite ore. It is often associated with the minerals anglesite and celestine. It has also been identified in meteorites.

Uses: Some 77% is used worldwide as a weighting agent for drilling fluids in oil and gas exploration to suppress high formation pressures and prevent blowouts. As a well is drilled, the bit passes through various formations, each with different characteristics. The deeper the hole, the more barite is needed as a percentage of the total mud mix. An additional benefit of barite is that it is nonmagnetic and thus does not interfere with magnetic measurements taken in the borehole, either during logging-while-drilling or in separate drill hole logging. Barite used for drilling petroleum wells can be black, blue, brown or gray depending on the ore body. The barite is finely ground so that at least 97% of the material, by weight, can pass through a 200-mesh (75-μm) screen, and no more than 30%, by weight, can be less than 6 μm diameter. The ground barite also must be dense enough so that its specific gravity is 4.2 or greater, soft enough not to damage the bearings of a tricone drill bit, chemically inert, and containing no more than 250 milligrams per kilogram of soluble alkaline salts.

Other uses are in added-value applications which include filler in paint and plastics, sound reduction in engine compartments, coat of automobile finishes for smoothness and corrosion resistance, friction products for automobiles and trucks, radiation-shielding cement, glass ceramics and medical applications (for example, a barium meal before a contrast CAT scan). Baryte is supplied in a variety of forms and the price depends on the amount of processing; filler applications commanding higher prices following intense physical processing by grinding and micronising, and there are further premiums for whiteness and brightness and colour.

Historically baryte was used for the production of barium hydroxide for sugar refining, and as a white pigment for textiles, paper, and paint. Although baryte contains a "heavy" metal (barium), it is not considered to be a toxic chemical by most governments because of its extreme insolubility. Good quality barytes are found in the following parts of the state- (a) in Kanti, Mishwa, Tatyana, Dhala, Pipli and Tiler Dhar areas of Sirmaur district and (b) in Naldera area of Shimla district. In 2005-06 the production of Barytes was 0.41 metric tonnes of the value of Rs. 0.70 lakh, while in 2006-07 it went upto 0.99 lakh and earning of Rs. 1.68 crore. In 2009-10 its production come down to 0.03 metric tonnes and value only Rs. 0.7 lakh.

8. Rock Salts: Mandi is the only district in India from where rock salt is extracted on the commercial basis. Though there is no surface exposure of rock salt, the leached salt grit locally known as *'lokhan'* indicates its presence. It is found at two places in Mandi district at 'Gumma' and 'Drang'. In 2003 Geological chapter of Himachal stopped the mining of rock salt which was restarted in December 2013.

The production of rock salt in 2005-06 was 2 metric tonnes and market value of Rs. 17 lakh, in 2006-07 the production reduced to 1.78 metric tonnes earning Rs. 22 lakh. By 2009-10, the production remained at 2 metric tonnes and value Rs. 33 lakh while in 2010-11 the production remained stagnant at 2 metric tonnes but its value came down to 21 lakh. The decrease in value

came due to lesser demand. To increase its demand more in the coming years, salt should be presented in most refined form for human consumption. Salt mines of Drang and Gumma were closed on 17th January 2011, after a royalty dispute between geologist department of Himachal Pradesh and Hindustan Salt Ltd. But in October 2013, union government allocated Rs. 300/- crore for reviving these natural Salt mines.

The basic rock salt mining being undertaken by Hindustan Salt Ltd. in Mandi district is likely to be converted into a full-fledged solution mining project, making Himachal the only state in North India where edible salt will be produced at a mega scale. "The fact that the project will provide employment to over 400 people of the area, both at the mining state and the refinery, will be important for the economy of the area,". Hindustan Salt Ltd. had agreed to pay Rs 30 lakh pending dues and seek a fresh mining lease so that they could make it a profitable venture.

Till now mining of rock salt was being done for cattle consumption, but it was not being refined to be made fit for human consumption. So far 75 percent of the salt requirement of the country is met from Gujarat, followed by 12 percent supply from Rajasthan. As such setting up of solution mining in Darang area Himachal Pradesh will be the first state in northern India to have salt production for human consumption.

9. Slate: Slate is a fine-grained, foliated, homogeneous metamorphic rock derived from an original shale-type sedimentary rock composed of clay or volcanic ash through low-grade regional metamorphism. It is the finest grained foliated metamorphic rock. Foliation may not correspond to the original sedimentary layering, but instead is in planes perpendicular to the direction of metamorphic compression.

A very strong foliation is called "slaty cleavage". It is caused by strong compression causing fine grained clay flakes to regrow in planes perpendicular to the compression. When expertly "cut" by striking parallel to the foliation, with a specialized tool in the quarry, many slates will form smooth flat sheets of stone which have long been used for roofing and floor tiles and other purposes. Slate is frequently grey in color, especially when seen, en masse, covering roofs. Slate is not to be confused with shale, from which it may be formed, or schist.

The word "slate" is also used for certain types of object made from slate rock. It may mean a single roofing tile made of slate, or a writing slate. This was traditionally a small smooth piece of the rock, often framed in wood, used with chalk as a note pad or notice board, and especially for recording charges in pubs and inns. The phrases *"clean slate"* and *"blank slate"* come from this usage. Slate is mainly composed of the minerals quartz and muscovite or illite, often along with biotite, chlorite, hematite, and pyrite and, less frequently apatite, graphite, kaolinite, magnetite, tourmaline, or zircon as well as feldspar.

Slate in buildings: Slate can be made into roofing slates, which are nstalled by a slater. And, are a type of roof shingle, or more specifically a type f roof tile. Slate has two lines of breakability – cleavage and grain – which nake it possible to split the stone into thin sheets. When broken, slate retains natural appearance while remaining relatively flat and easy to stack. A "slate oom" occurred in Europe from the 1870s until the first world war allowed by he use of the steam engine in manufacturing slate tiles and improvements in he road and waterway transportation systems.

Slate is particularly suitable as a roofing material as it has an extremely ow water absorption index of less than 0.4%, making the material water-proof. In fact, this natural slate, which requires only minimal processing, has the lowest embodied energy of all the roofing materials. Natural slate is used by building professionals as a result of its beauty and durability. Slate is incredibly durable and can last several hundred years, often with little or no maintenance. Its low water absorption makes it very resistant to frost damage and breakage due to freezing. Natural slate is also fire resistant and energy efficient.

Slate roof tiles are usually fixed either with nails, or with hooks. Nails were traditionally of copper, although there are modern alloy and stainless steel alternatives. Both these methods, if used properly, provide a long-lasting weather tight roof with a life-span of around 80–100 years.

Slate suppliers suggest that using hook fixing means that:

- areas of weakness on the tile are fewer since no holes have to be drilled
- roofing features such as valleys and domes are easier to create since narrow tiles can be used
- hook fixing is particularly suitable in regions subject to severe weather conditions since there is a greater resistance to wind uplift as the lower edge of the slate is secured.

The metal hooks are, however, visible and may be unsuitable for historic properties.

Slate tiles are often used for interior and exterior flooring, stairs, walkways and wall cladding. Tiles are installed and set on mortar and grouted along the edges. Chemical sealants are often used on tiles to improve durability and appearance, increase stain resistance, reduce efflorescence, and increase or reduce surface smoothness. Tiles are often sold gauged, meaning that the back surface is ground for ease of installation. Slate flooring can be slippery when used in external locations subject to rain. Slate tiles were used in 19th century UK building construction (apart from roofs) and in slate quarrying areas. Slates can also be set into walls to provide a rudimentary damp-proof membrane. Small offcuts are used as shims to level floor joists. In areas where slate is plentiful it is also used in pieces of various sizes for building walls and hedges, sometimes combined with other kinds of stone. In modern homes slate is often used as table coasters.

Other uses

- A grave with inscription on slate, Because it is a good electrical insulato and fireproof, it was used to construct early-20th century electric switchboard and relay controls for large electric motors. Fine slate can also be used as whetstone to hone knives.

- Due to its thermal stability and chemical inertness, slate has been used for laboratory bench tops and for billiard table tops. In 18th- and 19th-century schools, slate was extensively used for blackboards and individual writing slates for which slate or chalk pencils were used.

- In areas where it is available, high-quality slate is used for tombstones and commemorative tablets. In some cases slate was used by the ancient Maya civilization to fashion stele.

In Himachal Pradesh state is found at Mandi, Chamba and Kangra districts at many places. Nearly 222 slate quarries are producing slates in Mandi, Chamba, Sirmaur and Kangra districts. These slates are used for roofing and flooring purposes. In the upper Shimla hills several slate quarries are producing very solid slates for roofing as it protects from heavy snowfall in these areas. Slate quarrying is a serious threat for environment. In the past, state pollution control Board took serious action against slate quarries.

The production of slates in 2005-06 was 2 metric tonnes having value of Rs. 17 lakh, while in 2006-07 its production went up slightly upto 8 metric tonnes and value of Rs.1.15 crore. In 2009-10, the production increased to 9 metric tonnes and value Rs.1.84 crore but in 2010-11 its production came down by 33 percent and reached at 6 metric tonnes and value Rs. 1.22 crore. The value fixation depends upon demand and rising prices.

10. Uranium: Uranium is a silvery-white metallic chemical element in the actinide series of the periodic table, with symbol U and atomic number 92. A uranium atom has 92 protons and 92 electrons, of which 6 are valence electrons. Uranium is weakly radioactive because all its isotopes are unstable (with half-lives of the 6 naturally known isotopes, U-233 - U-238, varying between 69 years and 4½ billion years).

The most common isotopes of uranium are uranium-238 (which has 146 neutrons and accounts for almost 99.3% of the uranium found in nature) and uranium-235 (which has 143 neutrons, accounting for 0.7% of the element found naturally). Uranium has the second highest atomic weight of the primordially occurring elements, lighter only than plutonium. Its density is about 70% higher than that of lead, but not as dense as gold or tungsten. It occurs naturally in low concentrations of a few parts per million in soil, rock and water, and is commercially extracted from uranium-bearing minerals such as uraninite.

In nature, uranium is found as uranium-238 (99.2739–99.2752%), uranium-235 (0.7198–0.7202%), and a very small amount of uranium-234 (0.0050–0.0059%). Uranium decays slowly by emitting an alpha particle.

The half-life of uranium-238 is about 4.47 billion years and that of uranium-235 is 704 million years, making them useful in dating the age of the Earth.

Many contemporary uses of uranium exploit is its unique nuclear properties. Uranium-235 has the distinction of being the only naturally occurring fissile isotope. Uranium-238 is fissionable by fast neutrons, and is fertile, meaning it can be transmuted to fissile plutonium-239 in a nuclear reactor. Another fissile isotope, uranium-233, can be produced from natural thorium and is also important in nuclear technology. While uranium-238 has a small probability for spontaneous fission or even induced fission with fast neutrons, uranium-235 and to a lesser degree uranium-233 have a much higher fission cross-section for slow neutrons. In sufficient concentration, these isotopes maintain a sustained nuclear chain reaction. This generates the heat in nuclear power reactors, and produces the fissile material for nuclear weapons. Depleted uranium (238U) is used in kinetic energy penetrators and armour plating.

Uranium is used as a colourant in uranium glass, producing orange-red to lemon yellow hues. It was also used for tinting and shading in early photography. The 1789 discovery of uranium in the mineral pitchblende is credited to Martin Heinrich Klaproth, who named the new element after the planet Uranus. Eugène-Melchior Péligot was the first person to isolate the metal and its radioactive properties were discovered in 1896 by Henri Becquerel. Research by Enrico Fermi and others, such as J. Robert Oppenheimer starting in 1934 led to its use as a fuel in the nuclear power industry and in Little Boy, the first nuclear weapon used in war. An ensuing arms race during the Cold War between the United States and the Soviet Union produced tens of thousands of nuclear weapons that used uranium metal and uranium-derived plutonium-239. The security of those weapons and their fissile material following the breakup of the Soviet Union in 1991 is an ongoing concern for public health and safety

In Himachal Pradesh Uranium is found in Hamirpur and Kullu districts. This is found in massive quantity near *Chhinjara* and Jari (Banjar) in Parbati valley and near Dhela in Garsah valley in Kullu district.

Some other minerals also occur in Himachal Pradesh. But their quantity is not much. They are–

Mineral	Area
Gold	Sirmaur
Coal	Kangra, Mandi and Solan
Iron ore	Kangra, Kullu and Mandi
Mica	Kinnaur, Lahaul-Spiti and Kullu
Lead and Zinc	Kullu, Sirmaur and Solan
Pyrite	Chamba and Shimla
Copper	Chamba, Lahaul-Spiti, Kinnaur & Kullu

Antimony	Lahaul-Spiti
Cobalt, Nickle and Silver	Kullu

Masonary stones, sand and boulders the minor minerals are collected for local construction purposes. In Himachal Pradesh the geological wing is engaged in carrying out the detailed exploitation and exploring of these minerals. It is said to be obligatory on the part of this department to prove or disprove the existence and the extent of mineral potential. The geological wing does preparation of mining plans to demarcate and delineate the areas under mining operation for safe and scientific working. It investigates environmental studies of mining to know the impact of mining and industries in the water and air pollution. It operates flying squad for checking illegal movement and mining of minerals in the Pradesh.

11. Oil and Natural Gas: Deot Sidh in Hamirpur, Ramshahr in Solan and Jwalamukhi in Kangra district. Besides this, there are six mineral springs in Jwalamukhi, having water to medicinal value because of their calcium, sodium and iodine contents. The spring water of *'Kalath'* near Manali in Kullu district ranks the best mineral water in the world.

Energy Park Nauni Varsity: A state-level energy park established at the Dr Y S Parmar University of Horticulture and Forestry at Nauni by the Himachal Pradesh Energy Development Agency (HIMURJA). The project, which was funded by the Ministry of New and Renewable Energy (MNRE), Government of India, New Delhi, under the Special Area Development Program, is the first such park set up in Himachal.

The MNRE had provided Rs 90 lakh, while the university contributed Rs 5 lakh for the establishment of the park. The Department of Environmental Science, College of Forestry, is now looking after this project. This park will help demonstrate the working and use of NRSE technologies through working models and help educate the masses and students regarding applications of renewable energy sources, energy conservation and their socio-environmental benefits. *There are number of boards and corporations set up by the state government to expedite the process of development. Some of them are-*

Himachal Pradesh State Electronics Development Corporation Limited

The Himachal Pradesh State Electronics Development Corporation was set up on 22nd October, 1984 for accelerating the electronics industry in the state. The role of the corporation is primarily a catalyst one, whereby private sector is assisted in every way to setup projects in the joint and assisted sectors. The electronics corporation has also set up a computer centre in 1988. At present the corporation is engaged in the supply of electronics equipments such as photo copiers, fax machines, electronic typewriters, VCPs, VCRs, computer, black & White and coloured televisions, video cameras to the government and public undertakings of the State.

Himachal Pradesh State Industrial Development Corporation Limited (HPSIDC)

The Himachal Pradesh State Industrial Development Corporation (formerly known as Himachal Pradesh Mineral and Industrial Development Corporation) was established in November, 1966 as a company wholly owned by the state government. The Corporation is a major agency in the state to promote the setting up of medium and large-scale industrial units.

It also acts as the state level financial institution under the refinance scheme of the Industrial Development Bank of India in addition to Himachal Pradesh Financial Corporation. Another important function of the corporation is the development of industrial infrastructure. In this field it has identified a number of projects for promotion and assistance in the private sector. Care is being taken to undertake such industrial development which are dictated by natural features and endowments of the state particularly its hill terrain, temperate or cold climate and dust free atmosphere.

Himachal Pradesh General Industries Corporation (HPGIC)

This corporation came into existence in the year 1972 with the name of Himalaya Fertilizers Limited, Nalagarh, as a subsidiary company of Himachal Pradesh Industrial Development Corporation. Later, in the year 1988-89, the manufacturing units of Himachal Pradesh State Industries Development Corporation were transferred to this company and it was made an independent undertaking of the state government. The corporation had its head office at Shimla. This corporation has now six diverse manufacturing units including NPK granulated fertilizers plant :

(a) Himalaya Fertilizers, Manjholi;
(b) Nurpur Silk Mills, Nurpur;
(c) Mining Project, Bilaspur;
(d) Furniture Factory, Bilaspur;
(e) Hosiery Factory, Nalagarh;
(f) Country Liquor Bottling Plant, Mehatpur

(a) Himalaya Fertilizers, Manjholi : This unit is engaged in the production of various grades of balanced granulated fertilizer mixtures having an installed capacity of 50,000 MT. However, it produces mostly two grades of 12:32:16 and 15:15:15 for the consumption by the farmers in Himachal Pradesh and other grades of 15:15:7:5 and 12:25:6 for sale outside the state. It also produces, on demand 15:7, 5:15 and 15:15:7:5 NPK mixtures. Due to the high cost of raw materials, the fertilizers produced from this plant are costly. Another industry installed in 1984-85 by the corporation in the premises of Manjholi is that of iodized salt to overcome the deficiency of iodine under deficiency eradication programme. The name of the product produced from this plant is HIMSALT.

(b) Nurpur Silk Mills, Nurpur : This unit is situated at Nurpur in Kangra district and is engaged in the production of silk yarn and silk cloth.

This unit purchases the crop of cocoon produced in the state and helps the farmers.

(c) **Mining Project, Bilaspur** : This unit is extracting limestone using modern techniques and the entire production is supplied at remunerative prices to National Fertilizers Ltd, Naya Nangal.

(d) **Furniture Factory, Bilaspur** : This unit is engaged in the manufacturing of wooden and steel furniture for offices, schools and domestic requirements.

(e) **Hosiery Factory, Nalagarh** : This unit is engaged in the production of woollen hosiery knitwears.

(f) **Country Liquor Bottling Plant, Mehatpur** : This unit is engaged in the production of double distilled spiced country liquor. Sales are made to L-13 licences in the quantity prescribed by the state excise department.

Himachal Pradesh State Small Industries & Export Corporation Ltd.

Himachal Pradesh State Small Industries and Export Corporation Ltd., was incorporated on 20th October, 1966 under the Companies Act, 1956. Its head office is at Shimla and main objectives are :

(a) to aid, counsel, assist, finance, protect and promote the interests of small industries in the state;

(b) to take all necessary steps to utilize the potential productive capacity of plants operated by the small industrial concerns;

(c) to promote and operate schemes for development of small industries.

(d) to carry on the business of dealers in hardware, tools engineering articles, ferrous and nonferrous metal ware etc.

(e) procurement distribution of scarce and controlled raw materials.

(f) to provide subsidy for shipment of export samples subject to maximum of 5,000 rupees per sample and a total of 20,000 rupees per undertaking in a single financial year;

(g) units exporting their entire production are exempted from the payment of electricity duty for a period of five years from the date of commencement of production.

At present the corporation is handling the procurement and distribution of (a) iron and steel, (b) steam coal, (c) cement and (d) palm fatty acid for small-scale industrial units.

Himachal Pradesh State Handicrafts and Handloom Corporation

This corporation came into existence in March, 1974. It lays stress on the social objectives rather than commercial objectives. The handicrafts and handloom industry falls under the small sector. The corporation is catering to the needs of the weaker sections of the society, particularly scheduled castes and scheduled tribes, to free the weavers and artisans from exploitation

by the master weavers and traders. The main activities undertaken by the corporation are :

(i) **Revival of extinct crafts** : The crafts, which are in a state of extinction are being revived by the corporation. These includes metal and rumal craft of Chamba, gompa style of Spiti paintings at Manali and Tabo. The ancient Indian system of *guru and chela* is being followed to revive the craft.

(ii) **Design development** : New designs are being evolved and introduced in various crafts of the Pradesh under this scheme. These designs carry the basic essential traditional spirit of Himachal designs. For this design development a centre is being run at Shimla.

(iii) **Pre-loom, loom and post-loom facilities** : The corporation also provides through its procurement unit scheme, raw materials, improved handloom, accessories and marketable designs. It supplies the same to the weavers mfor conversion into woven products against piece-rate wage system. To facilitate the delivery of raw material, the corporation is running various sale depots to sell raw material, at reasonable rates.

(iv) **Skill development** : For the promotion of crafts, the corporation is running various training centres. In these centres, the training is being provided in carpet weaving, handloom weaving, typical 'Kinnauri shawls' etc.

(v) **Production in worksheds** : Facilities are provided to the artisans and weavers to undertake production in workshops on piece-rate wage basis. Nearly 24 production sheds are being run by the corporation to produce textile weaving, furniture, toy making, wooden utensil making, carpet weaving, doll making and footwear.

(vi) **Marketing** : The corporation is running a number of sales depots for the sale of its products. It also organizes exhibition-cum-sale, participates in trade fairs and festivals.

(vii) **Hill area woollen and handloom development project** : Concentrated efforts of the corporation have helped the craftsmen and weavers of the state to achieve higher degree of perfection while maintaining their traditional significance. A special project for the hill areas is funded by the central government. It provides 50 percent loan and 50 percent subsidy. This project includes training-cum-demonstration centres, production-cum-service centres, marketing-cum-market survey and design-cum-quality-control-cum-fashion centres.

Industrial policy of the State Government

Himachal Pradesh, since its inception, has been an environment conscious State and has introduced many measures to conserve its forests and environment. The stated objectives of the State Industrial Policy are as under:

- Dispersal of industries and service sector activities throughout the State.
- Uniform growth of industries and service sector throughout the State.
- Facilitate generation of employment opportunities for local resource

owners and stakeholders.

• Reiterate the Government's commitment to the development of key infrastructure sectors like Power, Housing, Social Infrastructure development, Human resource Development and Vocational Education so as to create a congenial investment climate for growth of existing industries and to attract new investments in the State.

• Give industrial incentives of fiscal nature.

• Facilitating ease of doing business and specifically address the issues impeding industrial growth such as procedures for setting up of industry, obtaining mandatory permissions required under various labour laws, addressing issues related to transportation of industrial produce so as to lay the foundation for a strong and consistent growth of the industrial sector.

• To promote cleaner production and adoption of environment management system; disincentives for polluting industries which are in the Negative list of the State Policy and promote public disclosure of pollution status at the unit and cluster level.

Bio Technology Park Nalagarh: On 27th July 2010, the state government gave its consent to setup biotechnology park, under Public Private partnership.

Himachal Pradesh Khadi & Village Industries Board

Himachal Pradesh Khadi and Village Industries Board was constituted on 8th January, 1968. The Khadi and village industries have an important role in the economic development of villages and in creating employment opportunities in the hill rural sector at low capital cost. The board is helping people in preserving the cultural heritage besides earning livelihood honourably by getting opportunities at the places of their residences. The objectives of the board are :

(i) to encourage, promote and help in the development of khadi and village industries.

(ii) to provide work to persons who have been professionally engaged in khadi and village industries.

(iii) to grant loan to individuals, societies and institutions, which are engaged in village and khadi industries work.

(iv) to encourage establishment of cooperative societies.

(v) to make the necessary arrangements for the training courses related to khadi and village industries.

Himachal Pradesh Agro Industrial Packaging India Ltd.

Himachal Pradesh Agro Industrial Packaging Limited, was set up on 9th February, 1987 as a government undertaking. The main objectives of the company are to carry on the business of manufacturers, suppliers, designers, consultants, sellers, buyers, exporters and importers. It provides all kinds of corrugated packaging material, and to develop an integrated carton for the

manufacture of corrugated paper board, Craft papers, Craft and pulp. It also meets the packaging requirement of fruit and vegetable growers as a substitute for wood packing with a view to conserve depleting forest resources in the state. Under Phase-I, the company setup a carton manufacturing plant at **Pragati Nagar, Tehsil Kotkhai.** This plant is in operation since October, 1990, and is partly meeting the requirements of fruit packaging.

Department of Labour and Employment

The Department came into being in 1972. Its activities can broadly be divided into two wings pertaining to labour and employment. Labour wing is responsible for the implementation of 28 labour laws (central and state) with a view to establishing and maintaining peace in the industrial establishments. Under the provisions of the Industrial Disputes Act 1947, labour courts-cum-industrial tribunals have been set up at Shimla and Dharamshala to decide industrial disputes. Under the Factories Act, 1948, registration and renewal of factories licenses is done. It also ensures the safety of workers. Employment wing is responsible for registration, sponsoring and giving vocational guidance to the interested candidates. It also collects employment market information, as per provisions of the Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959 and Persons with Disabilities Act (Equal Opportunities, Protections of Rights and Full Participation) Act, 1995.

The Himachal Pradesh Financial Corporation (HPFC)

The Himachal Pradesh Financial Corporation (HPFC) is the premier agency of the state which caters to the financial needs of medium and small-scale industries. The corporation has been set up under the State Financial Corporation's Act, 1951 (Central Act) which governs its working. The main function of the corporation is to meet term loan requirements of small-scale and medium scale industries. Term loans are given for the acquisition of fixed assets like land, building, machinery and equipment. The loans are given for setting up new industrial units as well as for expansion and modernization of the existing unit. The objective is to promote industries in this backward region for the industrial development of the state.

The primary function assigned to the corporation is that of a "Central Procurement Agency" for all the controlled and non-controlled essential commodities (as identified by the central /state government under the public distribution system) at the wholesale level and further to distribute these commodities through the district cooperative federations or the tehsil cooperative unions (which function as sub-wholesalers); and where these are weak or do not exist, to distribute directly to the fair price shops. Besides this, the corporation may undertake trading, storage, movement (including interstate movement) and distribution of such other essential commodities which may be required as per demand from consumers in general, from time to time so as to ensure their availability in the open market at reasonable rates. *The head office of the corporation is situated at Shimla* headed by the

managing director who is assisted by three general managers, namely procurement manager, distribution manager and finance manager.

The entire state has been divided into two divisions with headquarters at Dharamshala and Solan. Each division is headed by a divisional manager who supervises the areas being run by an area manager. The headquarters of the seven area managers are located at Shimla, Solan, Nahan, Dharamshala, Hamirpur, Mandi and Chamba. Procurement offices have been established at Barmana and Darlaghat from where supplies of cement to various government department/boards/ corporations as well as for sale under public distribution system (PDS) are being arranged. These offices are functioning under the control of area manager, Solan.

State Council of Science, Technology and Environment

The State Council of Science, Technology and Environment was established by the Government of Himachal Pradesh in 1986. It is a society registered under the Registration of Societies Act XXI of 1860. The main objectives of the council are :

(1) To advise and guide in formulating science and technology policy and programmes.

(2) Development and transfer of appropriate technologies.

(3) Pooling and exchange of scientific knowledge.

(4) Promotion, popularization, research, development dissemination of science, technology and environment in the Pradesh.

TRANSPORT AND COMMUNICATION IN HIMACHAL PRADESH

Roads are the lifeline of the economy of the State. Existing transport system prevailing in the State comprises several modes of transport including rail, road, air transport, mule tracks etc. Transport has recorded a substantial growth over the years, both in network and output of the system. Road transport plays a key role in socio-economic development. Most suitable for short and medium distance, it offers a number of advantage such as flexibility, reliability, speed and door to door service. It complements other modes of transport. The necessity of good network of roads is greater in a mountainous State like Himachal, where no development is possible without the construction of roads.

The Ancient Trade Routes: The Hamta, Rohtang and Baralacha passes were used by the sheep, mule and yak *'carvans'* since ages, to serve Indian trade links with Tibet and Yarkland. These highways had several branch routes. 'Dinkar', a spot at the confluence of the river Pin and Spiti and 'Rampur' were important places. The Yarkland route ran through Ladakh, Chamba, Lahaul, Mandi and terminated at Hoshiarpur. No tax or transit duty was levied on the goods exported to or imported from Tibet according to the treaty signed between Kehri Singh, Raja of Bushahr and Grajayadoke, the King of Tibet. The Commander of Tibetan Army at the time of treaty was *Guldenchhen* in Tibeto-Ladakhi war in 1681-83 A.D. Material transactions as such were generally made in kind. Wine extracted from the grapes of Kinnaur, wool and woollens have been very popular with the people of plains since time immemorial. The hill people in exchange of these used to get salt and rice at the trade fairs, held at trade centres like Hoshiarpur, Rampur and Kannauj.

The Modern Trade Routes: Till the formation of Himachal Pradesh on 15th April 1948 with the amalgamation of 30 erstwhile princely states, it was divided and subdivided under the supremacy of Raja, Rana and Thakurs. Local rulers had neither interest nor resources to get these trade routes widened and metalled. So progress in road construction remained almost stagnant for a long time. During the second half of the 19th century, British took interest to make hilly terrain accessible. So in 1840 *Kalka-Shimla road* construction work was started. Bhalkhu played a great role in tracing this road. Later on, two narrow gauge railway lines were also built up; one from Kalka to Shimla and the other from Pathankot to Joginder Nagar.

The progress has been steady after Independence. The total length of roads in Himachal Pradesh at the time of its formation was 588 kilometers. In the rest of the areas, there were either footpaths or mule tracks. In the absence of a good network of roads, transportation of goods from one place to other, was

highly difficult. The problem was acute, since there were no permanent bridges on the Perennial rivers and streams which flow through the state. The people of the Pradesh were fully aware of the need of a network of roads and of the hindrances its absence was creating in the pace of development. Keeping in view the need of healthy transport and communication network, government of the Pradesh allocated 46.1 percent of the total allocation of First Five-Year-Plan to the transport and communication programmes. The curiosity of the State Government to ensure high quality transport can be judged from the priority given to this sector in the past Twelve Five-Year-Plans.

TABLE - 1

PLAN ALLOCATION FOR TRANSPORT AND COMMUNICATION 1951-2017

Plan	Transport and Communication (Rs. in lakh)	Percentage to the total allocation
1	2	3
1st Plan (1951-56)	243.54	46.1
2nd Plan (1956-61)	595.22	37.1
3rd Plan (1961-66)	1191.10	35.2
Annual Plan (1966-69)	1351.03	34.0
4th Plan (1969-74)	3251.14	28.4
5th Plan (1974-79)	5540.00	23.9
6th Plan (1980-85)	11865.00	17.2
7th Plan (1985-90)	16450.00	15.66
Annual Plan (1990-92)	–	–
8th Plan (1992-97)	33115.00	13.2
9th Plan (1997-02)	61470.00	10.8
10th Plan (2002-07)	163594.00	13.5
11thPlan (2007-12)	214233.00	15.55
12th Plan (2012-17)	471048.00	20.66

Source: Planning Documents (1951-2012)

The policy of allocation of more funds in favour of linking inaccessible areas to the world outside, yielded results and where it took a person, days and days together, travelling on foot along narrow and dangerous footpaths to reach civilisation, the distance could now be covered in hours in comfortable buses and dialling any number in the world. In the past decades, a great improvement has been made in the telecommunication sector too.

During 1966, with the merger of Punjab hill areas with Himachal Pradesh, the area of the Pradesh was doubled, but the road mileage of the merged area was proportionately less, it being 1,343 km of motorable and 175 km. of jeepable. Thus total road length of roads in the Pradesh rose to 3,480 km. motorable road and 985 km. jeepable. Linking old and new areas of the Pradesh was difficult job, completed during the annual plan period (1966-69). Unlike

the plains, most of the streams, rivers to be crossed, being snowfed, are perennial. So, we can't, therefore, have even fairweather roads without constructing bridges on these streams.

Till seventh decade of 20th century there were rope crossings and *'jhoolas'* over big rivers while on smaller streams, there were wooden bridges which were good enough for pedestrians and at the most for mule traffic. In the last decade of 20th century, a great progress has been made in the construction of big and small bridges. A bridge over the Yamuna at 'Paonta Sahib' has been constructed. This links Himachal Pradesh with Uttrakhand. A bridge on the Beas at 'Nadaun' provides all weather shortest link between Dharamshala and Chamba on the one side and Bilaspur and Shimla on the other. Over the river Satluj, some of the important bridges are at Kandror, Slapper, Tattapani, Luhri, Kharo, Moorang and Gymthing. *The bridge at Kandror in district is the highest in Asia.* The bridge on Yamuna at Paonta is the largest in Himachal Pardesh. On the river Ravi, several suspension bridges have been erected at Bagga, Chaurah and Siatla.

Liberal allocation of funds and keen interest shown by the Government in the development of roads network has resulted in the setting up of all weather links with the areas, which were proverbial inaccessible; such as Lahaul-Spiti, Kinnaur, Outer Seraj of Kullu district, Pachhad and Renuka tehsils of Sirmaur district, Janjheli area of Mandi district and Bharmaur and Tissa of Chamba district. The people of these areas, used to take weeks to reach the nearest tehsil headquarters, now coming to district headquarters, sub-divisional headquarters is a matter of a day. But, still there are a great number of areas which have not been linked with the roads and need immediate attention for their speedier development. The construction of roads has certainly given a new direction to the economy of the Pradesh.

The density of roads of Himachal Pradesh was 31.1 kilometres (per 100 km. area, 1991). The construction of these roads also provides with a source of employment to over 50,000 persons every year.

The classification of the roads in Himachal Pradesh Can be put in the following manner:-

(i) Primary roads- Connecting one district with another and also providing interstate links;

(ii) Secondary roads- Connecting district towns with respective tehsil headquarters;

(iii) Tertiary roads- Supplying intervillage and tehsil connections;

(iv) Quaternary roads- Mainly consisting of bridle paths and mule-pack tracks;

Apart from these, the National Highways provides an important link to strengthen the roads system.

By March 1999 Himachal Pradesh had following National Highways providing inter state links:

(a) NH-IA Jalandhar–Madhopur-Jammu–Banihal–Srinager–Baramula-Uri (14 km in Himachal Pradesh).

(b) Junction with NH No. 22 near Chandigarh–Ropar–Bilaspur–Mandi-Kullu–Manali (232 kms. in Himachal Pradesh).

(c) NH21 Ambala–Kalka–Shimla–Rampur–Chini–Indo-Tibet Border Road (398 kms. in Himachal Pradesh).

(d) NH No. 20 Pathankot to Mandi (Nationalised on 17th February 1989, 220 kms.).

(e) Jalandhar–Amb–Hamirpur–Sarkaghat–Mandi (273 kms Nationalised on 24th September 1998).

(f) Swarghat-Nalagarh-Pinjaur Road which connects the Chandigarh-Mandi Highway with Chandigarh–Shimla Highway (24th September 1998)

(g) Ambala-Kala Amb-Nahan-Paonta-Haridwar Road (24th September 1998)

In 2012, some of the National Highways were renamed and some more included in the list.

1. NH-03 Jalandhar, Hoshiarpur-Gagret-Mubarikpur-Nadaun-Hamirpur-Sarkaghat-Dharampur-Mandi-Kullu-Manali (318 km)

2. NH No. 05 Chandigarh-Kalka-Parwanoo-Solan-Shimla-Theog-Narkanda-Rampur-Wangtu-Chini-Shipkila-Near China Border (295.416 kms)

3. NH No. 07 Kala Amb-Paonta-Dehradun-Rishikesh-Haridwar (57 kms)

4. NH-103 Hamirpur-Bhota-Ghumarwin-Ghagas- (76 kms)

5. NH No. 105 Pinjore-Baddi-Nalagarh-Swarghat (48.875 kms)

6. NH No. 154 Pathankot-Nurpur-Palampur-Joginder Nager-Mandi-Sunder Nagar-Ghagas-Bilaspur-Nauni (267.800 kms)

7. NH No. 205 Ropar-Kiratpur-Swarghat-Nauni-Darlaghat-Shimla (123 kms)

8. NH No. 303 Nagrota-Ranital-Jwalamukhi-Nadaun (72 kms)

9. NH No. 305 Sainj-Luhri-Anni-Jalori-Aut (97 kms)

10. NH No. 503 Mattor-Kangra-Ranital-Dehra-Gopipur-Bharwain-Mubarikpur (72.9 kms)

11. NH No. 707 Paonta-Rajban-Shillai-Minas-Hatkoti (119.5 kms)

12. NH No. 907 Laldhank-Batachowk Road (7.420 kms)

The Hindustan - Tibet Road

It was the India of the mid -1800s, and Lord Dalhousie was appointed as Governor-General of India. He introduced India to its first railway, lays out its first telegraph line, establishes its postal system and starts the public works Department. Amidst all this reformation, he anoints Simla (Shimla) as the Summer Capital of the East India Company. Not much later, thwarted by

climate-induced ill-health, he was forced to move camp to Chini (the present-day Kalpa in Kinnaur) upstream of the Satluj. Its strategic location in the then princely state of Bushahr, as an offshoot of the ancient Silk route widely used by traders from Central Asia and China, does not escape him. Soon after, he ordered the construction of the ambitious Hindustan-Tibet road through a region dubbed by awestruck 19th century travellers as the Valley of the Shadow of Death. Mouthed famously by Rudyard Kipling's Kim in his turn-of-the-century novel by the same name. *"At last world- a valley of leagues where the high hills were fashioned of a mere rubble and off the knees of the mountains. "Surely the Gods live here!" said Kim,... "This is no place for men!"*

Not much has changed for 21st century Kinnaur. Tucked away in the northeastern edge of Himachal Pradesh, rubbing shoulders with Tibet, this high altitude Himalayan district faces splendid isolation in the heartless winter. Despite the erosion of geographical seclusion (as a direct consequence of the historic Great Road, today, motorable and known to us as the National Highway 22, Kinnaur still present an idyllic picture of life above 12,000 feet. Shattered every now and then by the man-induced wrath of nature. Crisscrossed by the formidable, albeit magnificent, Zanskar, Dhauladhar and Greater Himalaya ranges, Kinnaur is bestowed with innumerable peaks, valleys, glaciers and deep gorges carved out by the Satluj and its tributaries. The capricious Satluj announces its thunderous presence in India, a short distance from Shipki, the last village on the Tibetan side, before lashing through to the plains of Punjab.

Snaking along, above and across this redoubtable river are the many treacherous footpaths trod by traders, surveyors and travellers of yore; ferrying goats, wool, borax, spices, opium and espionage between Rampur on the left bank of the Satluj, and the tent-city of Guru in China. Accessed through the Shipki Pass at 16,000 feet, ancient trade fair; a vibrant tradition that continues, centuries later, come November.

It was Lord Dalhousie's visits to Bushahr that led to the re-examining of possible commercial routes as envisaged during the Gurkha wars. Through the treaty of 1815, the hill states had bound themselves to constructing roads within their territories when called upon by the colonial government. Following the ceding of free land by the states of *Patiala*, *Baghat* and *Keonthal*, the first lap of the Hindustan-Tibet Road from Kalka to Shimla commenced in the year 1849. Soon after, hunting and sight-seeing trips along this road became the main attractions of the Shimla season, but the Governor General found the hill station overrated. Terming it merely a suitable eyrie from which to watch the newly annexed plains that stretch below, he preferred instead to conduct his official duties out of Chini.

The dry weather, and possible, the unmatched view of the Kinner Kailash bathed in moonlight, placed him a mere forty-six mail hours, or four marching days away from the Summer Capital. In practice, regrettably, he could not

convince the Board of Control in London, already reeling from the Punjab conquest, about the low cost of construction, despite pressing forced labour into use. Consequently, while the Cart Road between Kalka and Shimla would proudly ferry wheeled traffic by the 1860s, the road beyond Shimla would remain a small cut bridle path, never more that 7 to 8 feet in width. It would zigzag through Theog, Narkanda and Kotgarh to Rampur, across the Wangtu Bridge to culminate at Chini.

Today, a newer, broader NH 22 has replaced the bridle path; essentially following the same route till Wangtu. Here on the highway meanders along the left bank of the Satluj towards neighbouring Spiti. At Khab (confluence), an offshoot ascends to Namgea, a couple of hours run from Shipki Pass and the India -Tibet border beyond. This new alignment of the highway has placed Chini on an Cikkary road through Rekong Peo, Kinnaur's modern-day capital; an ugly, congested township with marvellous views of Jorkandern, the highest peak of the Kinner Kailash massif.

Hydroelectric power projects straddling the Satluj, Nathpa Jhakri and Karcham-Wangtu, have changed the character of this once-serene landscape. Construction and plying of heavy trucks over the years has resulted in deplorable road conditions. Not too long ago, a section of the NH 22 was featured in the History among the Deadliest Roads series for its hazardous driving conditions. Proving emphatically, that the more things change, the more they stay the same. Even a 150 years apart.

Kinnaur is a land seeped in mythology, nurtured and contained, no doubt, due to the inaccessibility of the region. Ancient Indian texts considered the mystical Kinners (people of Kinnaur) as supernatural beings, halfway between humans and gods. The Kinner Kailash range is purportedly the mythical winter abode of Lord Shiva.

The Pandavas, too chose Kinnaur to spend their last year of exile in visible from across Jangi, on the old Hindustan - Tibet Road, is a hamlet called Moorang, the name indicating a place where three water channels meet. Remarkable for the strikingly beautiful mountains surrounding the village, as much for a distinct mud structure crowning a rocky hilltop in the foreground. Silhouetted against the sky and age. The Pandava fort is supposed to have been built by them during their stay here; it presently houses *'Ormig Devta,'* the reigning deity of the village.

Philologist and Orientalist, Csoma de Koros is widely acknowledged as the founder of Tibetology. An interest he stumbled upon while trying to trace the origin of, and establish a connection between, the Magyars and the Uyghurs of Central Asia; believing they shared nomadic anciently. In 1820, he sailed for Turkey, Cyprus , and Egypt before joining, at Beirut, a caravan for Baghdad. The Central Asian War forced him to move south towards Peshawar, from where he accompanied French officers Jean-Freancios Allard and Jean-Baptiste Ventura to Lahore.

He planned to visit Yarkand, using the commercial routes over the Karakoram via Leh, but had to abort plans due to the dangers involved. It was during this period that he met William Moorcraft, a British officer, who presented him a copy of *"Alphabetum Tibetanum,"* supposedly the first book on Tibet, an absolute terra incognito, thus far. Hoping, clearly, to discover new sources about the history of ancient Hungarians he decided to learn Tibetan, using Persian as an intermediate language. Csoma would spend the rest of his life involved in one way or the other in Tibetan studies.

In 1825 the government of India granted him a modest monthly stipend of fifty rupees, and in return he promised to produce a dictionary, grammar, and short accounts of Tibetan literature and history. While in Zanskar, he amassed a huge collection of Tibetan manuscripts, retiring with them to a cottage in the village of Kanum on the Satluj river in Upper Bushahar from 1827 to 1830.

He spent those years under extreme privation while immersed in the study of the Tibetan language under the tutelage of Lama Sans-rgyas-phun-tshogs. It was here, in an almost-forgotten hamlet in Kinnaur, that the first ever Tibetan-English dictionary, comprising over 30,000 words, was compiled by Alexander Csoma de Koros, an accidental student of the subject.

On 20th January 2012, union transport ministry sanctioned a national highway for Mandi Parliamentary constituency form Aut to Rampur via Jalori Pass- Luhri-Sainj nearly 97 kms., connecting state highway no. 22A to 22B.

According a survey in conducted by central government in March-April 2013, the roads in Hamirpur district were found, the best in all India report.

Roads are the primary requirement of development. That is why keeping in view the strategic importance of roads, the government has given road construction's responsibility to the Border Road organisazation (BRO).

The tribal areas of Himachal Pradesh forms 42.6 percent of state's total area yet amazingly contains only 4.2 per cent of the total population of the state. The density of roads for tribal areas per 100 sq km. thus works out to only 6.7 km. as against Pradesh's average of 36.4 km. (1999) and 43.13km. (2013). This itself is indicative of the fact that the means of communications in the tribal belt of the state are in rudimentary condition. The problem is more acute in Pangi and Bharmaur subdivisions of Chamba district.

The road construction in the tribal subdivisions of Bharmaur and Pangi of Chamba district is being mainly carried out by the P.W.D (Public Works Department) of Himachal Pradesh. Village paths and some mule roads are being constructed through the community Development Blocks as well. The reason for low density of roads in these tribal areas is probably due to very low density of population (persons per sq. km. 2001 and 2 persons 2011 census). This makes the per capita cost of road construction very high. The density of roads, for other than tribal areas was 58.36 km. per 100 sq. km (2013) of the area.

Source: (i) Statistical Outline of H.P., HPDES 1985-2013.

According to the National Transport policy, all villages were ultimately to be linked with all weather motorable roads by the year 2001 A.D. It was estimated that about 40500 km. roads are required to be constructed in Himachal Pradesh to connect all villages, giving density of 72.75 km. per 100 sq. km. area, Seeing the location of villages on the slopes of the hill ranges, it may however, not be possible to provide motorable roads to connect each village, as such an attempt may lead to landslides and ecological disturbances. Construction of total motorable roads length to link about 12347 villages other than isolated villages will either be connected individually or as a cluster covered within 1 km. of distance and altitude difference of 100 meters, while leaving another 4650 isolated villages unconnected, but would fall within 1-3 km. of distance and altitude difference of 300 mets. And these isolated villages would be linked by mule roads and gravity type aerial cable ways for transportation of goods from such villages to the nearest motorable roads where feasible.

By the end of March 1999, there were 16997 inhabited villages in

Himachal Pradesh out of these in 1985, 7083 had been connected by roads, while in 1990, 7416, in 1997, 7627 and till 31st March 1998. 7654 villages had been connected with roads. The period from 1999 onwards a large number of roads were constructed under *Pradhanmantri Gramin Sadak Yojna* and so till 2010-11, 9870 villages had been covered by roads. Among twelve district of the state, Hamirpur district has the highest density of roads. In 2013, the roads of Hamirpur district were rated the best in the country.

Road Transport

The major objective of transport planning is to meet the transport needs of urban and rural areas and provide transport infrastructure necessary for the growth of economy and accessibility to remote and backward areas. Road transport in the absence of other modes of mechanised transport, plays an active role in the economic and social development of Pradesh. *On 2nd October 1974, with the amalgamation of then Himachal Government Transport and Mandi-Kullu Road Transport Corporation, Himachal Road Transport Corporation (HRTC)* was set up to provide a coordinate, organised, efficient and effective transport services throughout the Pradesh and also on joint routes with neighbouring States/Union Territories. At present, 82 percent of the passenger transport is nationalised. Till 31st March 1998, H.R.T.C had 1,753 buses on 1,658 routes. These buses used to cover a distance of 1,34,264 km. and carry about twenty lakh passengers per annum. These buses included 78 night services and 25 video fitted deluxe and semi-delux buses.

In 2004-05 there were 1652 buses of Government ownerships, 56 attached buses running on 1830 routes while in 2005-06 the number was 1645 Government buses, 57 attached buses and route under operation were 1855, covering a distance of 1,49,574 kilometres per annum. By 2006-07 the number of buses were 1763, attached buses 79, routes 1870 and distance covered 1,54,657 kilometres. To meet the Growing demand of public transport buses, in the year 2001-02 private bus operators were given a large number of routes to ensure quick transport system, all over the state. In 2008-09, there were 1881 buses, 27 attached buses, routs under operation 1975 and distance covered 1,61,862 kilometres. Upto 31st March 2011 there were 1979 Government buses, 19 attached buses, routes under operation 2140 and distance covered 1,69,823 kilometres.

TABLE - 3

NATIONALISED TRANSPORT H.P. 1950-51-1912-13 (AS ON 31ST MARCH)

Unit	Buses nos.	Trucks nos.	Others nos.	Total nos.	Distance covered (000 kms.)	Routes (numbers)

Source: Important Facts on Himachal Pradesh DESHP – 1912-13.

To make journey comfortable Super luxury, luxury and deluxe buses have been introduced on inter- state and long routes. In the year 2009, the drivers of HRTC were found most efficient and caring in all India survey.

The growth in economy and increase in per capita income has resulted in the purchase of personal vehicle on large scale by the residents. In 2008, the total number of registered vehicle in the state was 48525, in 2009, 58852, in 2010, 79370 and in 2012 79883. The implementation of pay commission report in 2009-10 suddenly increased the sale of luxury items in the state.

There are 20 operating units/subunits functioning in the Pradesh. For repair and maintenance of buses, there are two workshops at 'Taradevi' and 'Mandi'. Due to proper repair and maintenance of buses, the incidence of the breakdown per 10,000 km. has come down from 0.51 in 1992 to 0.30 in 1998 as against All India average of 0.94 during 1996-97. For some years, H.R.T.C. is facing huge financial losses, due to over-aged buses, tax evasion, theft cases, nondistribution of tickets by conductors, accidents, inefficiency and lethargic attitude of transport employees.

Repeatedly government transport has also become target of people's wrath and wickedness. During 1986-87, Rs. 542 lakh, in 1987-88, Rs. 1,059 lakh loss was occurred to H.R.T.C. The figure of loss touched 12 crore in 2001-02, 13.9 crore in 2005, 18.92 crore in 2008, 28.15 crore in 2010 and 35 crore in 2013. Running of bus services on unremunerative routes, as a social obligation and grant of travel concessions to various sections of society are other reasons of resulting losses. H.R.T.C. has Planned to include new buses in its fleet of 1979 (2014 A.D.) buses to provide better and organised bus services in the tribal and backward areas, to ensure trouble free services to these areas, old buses are being replaced gradually.

BUS STANDS: The government in 2011 decided to construct modern bus stands at Hamirpur, Chintpurni, Una, Baddi, Parwanoo, Manali and Dhalli in Shimla on design, build, operate and transfer (DBOT) basis under public private partnership (PPP) mode. By the end of 2013, most of these were either constructed or at the verge of completion.

Important Bridges of Himachal Pradesh

Name	Type	River on which constructed	Road on which located
Chakki	High level	Beas	Kangra-Pathankot
Chamba	Suspension and pre-fabricated	Ravi	Chamba-Pathankot
Dehra Gopipur	Pre-fabricated	Beas	Dharamshala-Hoshiarpur
Gambhar	Prefabricated concrete	Gambhar	Bilaspur-Kiratpur
Kandrour	High level	Satluj	Bilaspur-Hamirpur
Kharamukh	Suspension	Ravi	Chamba-Bharmour
Luhri	Suspension	Satluj	Shimla-Karsog
Mandi	Suspension	Beas	Mandi- Pathankot
Nadaun	Concrete	Beas	Jwalamukhi-Hamirpur
Pandoh	Suspension	Beas	Mandi- Kullu
Paonta	Prefabricated	Yamuna	Nahan-Dehradun
Rakh	Suspension and Prefabricated	Ravi	Chamba - Bharmour
Sataun	Suspension	Giri	Jagadhari-Rajban
Slapper	Prefabricated	Satluj	Shimla-Mandi
Swan	High level	Swan	Kangra-Hoshiarpur and Una-Hoshiarpur
Tattapani	Suspension	Satluj	Shimla- Karsog
Wangtoo	Suspension	Satluj	Hindustan-Tibet

HARSIPATTAN BRIDGE: On 30th June 2011, a 214 meter bridge was inaugurated over the Beas river in Kangra district. It is a double lane bridge, where work started in 2002 and completed at the cost of Rs 17.69 crore. The initial DPR of the bridge was prepared for Rs. 781 lakh and approved during BJP regime, but no progress was made from 2002-2007. In 2009 another DPR of Rs 865.10 lakh was approved as a result of escalated cost. The bridge has a 7.5 m carriage way with a 1.5 met footpath on both sides.

The bridge connects 16 panchayats of Sandhol, 4 panchayat of Jangleberi and Kakkar area of Hamirpur district, 3 panchayats of Jaisingpur in Kangra district and surrounding areas of Mandi district. As on date nearly 60 thousand people will directly benefit from this bridge.

CHAMBA PATTAN BRIDGE: Chamba Pattan Bridge was opened on 11th April 2012, by then Chief Minister Prem Kumar Dhumal. Earlier, people of the area used to cross the Beas, using a "temporary bridge made after joining

boats" or by boats. The temporary bridge at times proved fatal. One such tragic accident claimed the lives of 60 persons when a boat carrying them sank in the Beas. The incident that occurred on June 5, 1976, is still etched on the minds of the elderly. The Chamba Pattan bridge was the first of its kind in the state as it had been built without any pillars. This 200 -meter -long and 32 meter high bridge has been constructed at a cost of Rs 17.65 crore in a record period of three years.

AUCKLAND TUNNEL : Chief Minister PK Dhumal dedicated the first traffic tunnel constructed in Shimla town since Independence by throwing it open for vehicular traffic 9th April 2012, thereby reducing distance between Victory tunnel to Sanjauli by about 800 m. The tunnel was constructed at a cost of Rs 5.5 crore, besides a bridge on it has also been completed and with the total cost of both being at Rs 7.30 crore.

The story of Himachal's progress lies in the intensive and quality network of roads, rail track and airports. To fully harness the scenic beauty from tourism point of view, transport and communication network is the only panacea.

AIRPORTS IN HIMACHAL PRADESH

Himachal Pradesh being a hilly state and a popular destination for tourists needs good quality of air ports to harness its natural beauty without making much investment for the attraction of visitors. But the approach of state and central Government in this regard has not been very encouraging. The followings are the air ports located in Himachal Pradesh.

1. *Anandel Ground* – For helicopter landing in Shimla.

2. *Jubbar Hatti* – In Shimla district (26 km from Shimla opened on 24th May 1987).

3. *Bhunter* – at Bhuntar in Kullu district, 10 m from Kullu town

4. *Gaggal* – In Kangra district. This is the biggest airport in Himachal Pradesh. (Opened on 20th December 1989).

5. *Kaza* – The airport at highest altitude is under construction in district Spiti. This is 187 km from district of headquarters keylong.

6. *Rangreek* – Airport in Spiti Valley.

Himachal Pradesh Government is giving top priority to airports construction; knowing fully that future of tourism industry is based on this modern facility. The Government has planned to set up few more airports in Hamirpur, Mandi and Banikhet in Chamba district.

Helipads at present are available at *Dodra Kawar, Kaza, Kelyong. Killar, Rohru, Bankuffar, Sangla, Tabo, Annadale Bharmaur, Rampur, Chamba, Mandi, Hamirpur* etc. With the starting of Gaggal airport, there is enormous scope of introducing air-sports like Micro-light flying, ballooning, parasailing, Aero Modelling, gliding and power flying besides Hang gliding.

HELI-TAXI SCHEME Chief Minister P.K. Dhumal inaugurated the much- awaited heli-taxi service from Annadale helipad on 28 January 2011.

Railways in Himachal

Himachal Pradesh has only two short lengths of narrow gauge lines, one from Kalka to Shimla, and the other is Pathankot to Jogindernagar. Railways was introduced in Himachal Pradesh in 1903 A.D. The length of railways routes in the State remained at 209 kms. till 31. March 1988. Shimla-Kalka 96 kms. was completed on 2nd November 1903 and came into operation from January 1906. These Kalka Shimla route has 103 tunnel, 969 bridges, 20 stations and 5 level crossing.

The contract for the construction for Kalka Shimla rail line was given to East India Company on 29th June it in 1898. This rail line has oldest communication network system in the world. Kalka Shimla line was declared world heritage on 8th July 2008. Joginder Nagar-Pathankot has length of 113 kms. The construction for Nangal-Talwara railway line is in progress, which shall extend the railways to some more areas.

On 11th January 1991, Una was also linked with railways by laying 16 kms. broad gauge from Nangal to Una, thus increasing the total length to 225 kms. Although construction of railway line is very difficult in Himachal, yet it is imminent to bring it on the industrial map of India.

On 5th July 2011, a broad gauge railway track to Amb-sub division in Una was thrown open to the public by union minister of state for railways

Himachal Pradesh Road Transport Corporation (HRTC)

This corporation came into existence on 2nd October, 1974 with the amalgamation of Himachal Government Transport, a government commercial departmental undertaking and Mandi, Kullu Road Transport Corporation with a view to provide quick, efficient, adequate, well knit and coordinated transport facilities to the people throughout the Pradesh and on joint routes in the neighbouring states and union territories. HRTC is providing its service in one of the most difficult areas of the country with best mileage output.

COMMUNICATION

Telecommunication is communication at a distance by technological means, particularly through electrical signals or electromagnetic waves. The word is often used in its plural form, telecommunications, because it involves many different technologies.

Early means of communicating over a distance included visual signals, such as beacons, smoke signals, semaphore telegraphs, signal flags, and optical heliographs. Other examples of pre-modern long-distance communication included audio messages such as coded drumbeats, lung-blown horns, and loud whistles. Modern technologies for long-distance communication usually involve electrical and electromagnetic technologies, such as telegraph,

telephone, and teleprinter, networks, radio, microwave transmission, fiber optics, and communications satellites.

A revolution in wireless communication began in the first decade of the 20th century with the pioneering developments in radio communications by Guglielmo Marconi, who won the Nobel Prize in Physics in 1909. Other highly notable pioneering inventors and developers in the field of electrical and electronic telecommunications include Charles Wheatstone and Samuel Morse (telegraph), Alexander Graham Bell (telephone), Edwin Armstrong, and Lee de Forest (radio), as well as John Logie Baird and Philo Farnsworth (television).

Himachal Pradesh, which remained isolated region for a long period, has come under the influence of modern means of transport and communication. The work which was performed by pigeons and horse riders, is being efficiently done by postmen, buses, trains, aeroplanes, telephones, mobile phones, fax, internet, telegraphs, newspapers, radios, televisions etc. To think about the utility of these means in the past, was a day dreaming, but with the spread of eduction, it has become a reality.

The following table shows the growth of means of communication in the Pradesh since 1956 onwards:

TABLE - 4

MODERN MEANS OF COMMUNICATION

Year	No. of Post Offices	No. of Radio Sets
1	2	3
1956	314	2,216
1968	1,320	58,224
1971	1,681	91,678
1975	1,779	84,582
1981	2,363	1,25,208
1982	2,388	N.A.
1986	2,430	N.A.
1989	2,538	N.A.
1991	2,608	N.A.
1994	2,726	N.A.
1995	2,726	N.A.
1996	2,745	N.A.
1997	2,752	N.A.
1998	2,756	N.A.
1999	2,765	N.A.
2002	2780	N.A.
2006	2779	N.A.
2009	2777	N.A.
2013	2769	N.A.

Source: Statistical Outline of Himachal Pradesh Issues.

Number of letter boxes were, 6,055 in 1981, 6,742 in 1986 and 7,037 in 1994, 7042 in 1995 and 7304 in 1998. In 2005, the number of post boxes

were 7646, in 2007, 7640, in 2009 7629 and in 2011 the number remained at 7629. After the introduction of courier services in the state by the end of 20th century, the number of letter boxes remained almost the same. There is continuous decrease in the number of Post offices, Radio sets and other traditional mode of communication since 2004-05 onwards because of Computer, Internet, Mobile phone etc. Now land line telephones are also paying the way for cordless and mobile phones all over the state. Telegraph system was finally closed on July 14, 2013, all over the country. The old traditional means of communication are speedily losing their strength and utility to make place for hitech media equipments, to make life faster and smoother.

NUMBER OF TELEPHONE EXCHANGES, TELEPHONE SETS AND TELEGRAPH OFFICES (AS ON 31st MARCH):

Source: Statistical Outline Himachal Pradesh Issues.

The growth of radio sets in the beginning remained inadequate in comparison to the growth of population. But after 1975, it has risen very sharply. Same happened in the growth of post offices and telephones, because low density of population in the hills renders the task of providing such facilities difficult, but scattered population also provides *raisen 'd' eter for more* communication facilities. The credit for making Himachal miles ahead than others in the telephone network goes to former central telecommunication minister Pt. Sukh Ram.

Expansion of road links, railway lines, airstrips, waterways and modern means of communications, with growing literacy rate will provide a new shape and position to this tiny Himalayan State, which till yester years was nothing but liability on Central Government. Now its economic growth has shown direction towards self-reliance and emergence of a new developed Himachal Pradesh.

The Himachal Pradesh of 21st century is entirely different of what it was in the second half of the 20th century. It is fast emerging as developed state of Indian Union. The honesty, hard work and faith in positivity, all are combined to ensure healthy and speedy development.

Knowing fully well the importance of various places, institutes and religious places, the ministry of post and telegraph has released postal stamps on many of them.

FORESTS AND NATURAL WEALTH

Forest since the dawn of civilization has shaped the life, economy and habitat of the human beings and perform a number of functions including ecological and recreational. History illustrates that for centuries man has recklessly destroyed forests for habitation, cultivation, fuel, industrial development, fodder, constructions etc. Other indirect advantages are flood control, soil conservation, ground water recharge, control of air pollution and of climatic extremes and surface run off and sustained precipitation which can't be assessed in terms of money benefits.

The Forests of Himachal Pradesh known for their grandeur and majesty are like a green pearl in the Himalayan crown. This life supporting systems are presently under great stress due to impact of modern civilization, economic development and growth in human and cattle population. According to national Forest Policy, 1988, atleast two thirds i.e. 66% of the geographical area should be under forest in the hilly states like Himachal Pradesh. However, keeping in view that about 20 % of the area is inaccessible and beyond the tree limit, the State Government aims to bring 50% of the geographical area under forest cover.

The forests of the State have been classified on an ecological basis as laid down by Champion and Seth, and can be broadly classified into Coniferous Forests and broad-leaved Forests. Distribution of various species follows fairly regular altitudinal stratification. The vegetation varies from Dry Scrub Forests at lower altitudes to Alpine Pastures at higher altitudes. In between these two extremes, distinct vegetational zones of Mixed Deciduous Forests, Bamboo, Chil, Oaks, Deodar, Kail, Fir and Spruce, are found.

The richness and diversity of our flora can be gauged from the fact that, out of total 45,000 species found in the country as many as 3,295 species (7.32%) are reported in the State. More than 95% of the species are endemic to Himachal Pradesh and characteristic of Western Himalayan flora, while about 5% (150 species) are exotic, introduced over the last 150 years. The forests of Himachal Pradesh are rich in vascular flora, which forms the conspicuous vegetation cover.

The territory of Himachal Pradesh is mountainous except for small valley areas. The altitude varies from 350 meters in the foot hills to 7000 meters in the high hills that results in marked differences in climate. Due to it the state is bestowed with a diversified and rich flora and forests constitute one of the most important renewable resources in the state. Visualising scientifically, the forests help in shaping our natural environment. It is influenced variously (i) micro climate by maintaining the humidity, temperature, wind, precipitation and radiation (ii) soil environment affecting soil composition, soil structure and chemical properties etc. (iii) flood conditions through the

Table No.1

District wise Forest in Himachal Pradesh (As per Forest Survey of India Report - 2009)

Area (Sq.Km.)

District	Geo. Area	Forest Area	Tree covered area			% of Geo. Area Total Forest Cover
			Very Dense Forest	Moderate Dense Forest	Open Forest	
Bilaspur	1,167	428	24	171 167 362	31.02

Source: Dept. of Forest Himachal Pradesh

Forestry in Himachal is more than just about wood and fuel. Himachal has a thriving non-wood forest products industry, which produces latex, gums, resins, essential oils, flavours, fragrances and aroma chemicals, incense sticks, handicrafts, thatching materials and medicinal plants. About 40% of non-wood forest products production is consumed locally. About 50% of the total revenue from the forestry industry in Himachal is in non-wood forest products category. In 2010, the Food and Agriculture Organisation of the United Nations estimated India's forest cover to be about 68 million hectares, or 24% of the country's area. The 2013 Forest Survey of India declared that its forest cover increased to 69.8 million hectares by 2012, per satellite measurements; this represents an increase of 5,871 square kilometers of forest cover in 2 years. However, the gains were primarily in northern, central and southern Indian states, while northeastern states witnessed a net loss in forest cover over 2010 to 2012.

functioning of interception, evaporation, infiltration, runoff both surface and subsurface and siltation of rivers and lake beds, etc. (iv) erosion by movement of water and wind and (v) human health by protecting physical and chemical contaminations, noise pollution etc.

According to the national forest Policy at least 60 percent of the geographical area in a hilly state like Himachal Pradesh should have been under forests to fulfil both protective and productive functions. Major change, in this policy (Forest Policy) of the state was effected in April 1978, by adopting the concept of three dimensional Forest farming. This new policy focused the need of involvement of people in plantation programmes with the three objective in view, that is *soil conservation, production of timber* and *fodder for domestic cattle.* Thus the concept of multi-utility function of woods was included in the new Forest Policy. And consequently the Forest Department was designated as Department of Forest Farming and Environment Conservation in sequel to the New Forest Policy. The state modified its Forest Policy in 1980, within the framework of National Forest Policy of 1952. According to this new policy the state was to bring atleast 50 percent of the total area under forests by the year 2000 A.D. and to achieve this objective, it had drawn up a 20 year perspective plan for afforestation in 1980. These 20 years saw huge investment interms of money but forest cover remained the same. Infact the construction of hydel power projects have resulted in the depletion of more trees in the state.

Forests are an important resource of Himachal Pradesh. Although the area classified as "Area Under Forest" is 36,986 sq. km. and forms about 66.4 percent of the geographical area of the state, yet the effective forest cover is much lower than this area primarily on account of the fact that a very large area is either alpine meadows or is above the tree line. As per state Forest Report 1995, an area of 12,501 sq. km. is actual forest area with density ranging from 10 percent to 40 percent 9,565 sq. km. of dense forests, having a crown of 40 percent and above and 2,936 sq. km. with crown density between 10 percent to 40 percent. In addition to this 1845 sq. km. has been described as scrubs.

The green forests cover an area of 14346 sq. km. under different types of forest species thick or scattered, as per legal definition and constitute about 25.8 percent of the total geographical area of the state.

According to legal status, the classification of the forest area in Himachal Pradesh is as under

Forest Types	Area in sq. km.
(A) Forest under the control of Forest Department	
(1) Reserved	1896
(2) Demarcated Protected Forests	11559
(3) Un-demarcated Protected Forests	19914
(4) Un-classed	680

(5)	Other Managed by Forest Dept.	807
(6)	Non-Managed by Forest Dept.	551
	Total (A)	**35407**
(B)	**Ownership**	
(1)	State Ownership	34049
(2)	Cantonment and Municipal Forests	39
(3)	Private Individual Forests	1319
	Total (B)	**35407**

(1)	Coniferous	8339
(2)	Broad leaved	5797
(3)	Scrub/Bamboos	91
(4)	Blanks and pasture	21180
	Total (C)	**35407**
(D)	**Management Status**	
(1)	Area covered by working plan	25063
(2)	Area not covered by working plans including Alpine Pastures and parts of UPS	10344
	Total (D)	**35407**

Forest Types in Himachal Pradesh

1. Moist Tropical Forests
2. Dry Tropical Forests
3. Montane Sub-Tropical Forests
4. Montane Temperate Forests
5. Sub-Alpine Forests
6. Alpine Scrub

Himachal Pradesh has a rich natural vegetation. The vegetation extends right from the foothills to the snow line. A considerable part of the state lies above the line of perpetual snow where nothing grows. These areas fall within Kangra, Chamba, Lahaul-Spiti, Shimla and Kinnaur districts. In Himachal Pradesh 57 percent of the forest area is found in eastern basin of the Yamuna and the Satluj and 42 percent in the western river basin of the Beas and Ravi. There is hardly one percent forest area in the cold, arid and highly mountainous part of the Chenab river basin.

In Himachal Pradesh a wide variety of flora is found with thousands of species. This can be put under following category.

Type of flora	Numbers
Flowering Plants	3,120 species
Conifers	13 species
Peteriophytes	124 species

Orchids 38 species

The main forests region of Himachal Pradesh are–

I Sub-Montane or Sub-Tropical Region.

This forest region constitute of the Southern most tracts of the state. It includes the physiorgaphic units such as–

(a) The Shivalik hills

(b) The Dun type valleys

(c) Foothills of the lower Himalayan part of Chamba, Kangra, Una, Hamirpur, Bilaspur, Mandi, Solan and Sirmaur lie within this region. In this region a typical sub-tropical climate is experienced.

The principal forest types found in this region are–

(a) Sal forests (dominated by *Shorea robusta*)

(b) Riverine Khair and Sisham Forests.

(c) Chir pine forests.

(d) Dry deciduous forests.

(e) Lower moist broad leaved forests.

A. Trees : Khair, Siris, Kachnar, Semal, Tun, Mango, Behul, Shisham etc.

B. Shrubs Ritha, Tut, Behera and Chil. Vitex, Munj, Ber etc.

C. Grasses Ipomea, Dodonea, Bamboo. Vetiver, Sanchrus, Munjh etc.

II-Montane or Temperate Region

Temperate forest region lies to the north of the sub-montane or sub-tropical region. The following areas fall under this zone–

(a) The upper hills of lower Himalayas

(b) The middle Himalayas

(c) The lower tracts of the higher Himalayas.

This region forms a part of Chamba, Kangra, Bilaspur, Mandi, Kullu, Shimla, Solan, Sirmaur and Kinnaur districts. A typical temperate climate prevails in this tract.

The prominent forest type found in this region are–

(a) Oak forests dominated at different elevations by *Ban Kharsu* and Moru Oak.

(b) Deodar forest

(c) Blue pine forest

(d) Fir and Spruce forest

(e) Mixed broad-leaved forest

(f) Chir pine forest (only at lower elevations)

A. Trees Kunish, Poplar, Willow, Ohi, robinia, Drek etc.

B. Shrubs Kail, Chil Toon, Behmi, Chulli, walnut, Khirik etc.

C. Grasses Vitex, Berberis, Carrisa. Lolium, Dactylis, Phleum, Phylaris etc.

III Alpine and Sub-Alpine Regions

Sub-Alpine forest region represents the uppermost limit of tree growth which usually extends from an elevation of about 3000 meters to the snow line. The areas included in this region are–

(a) Upper slopes of the lower and middle Himalayas
(b) The higher Himalayas
(c) South facing lower slopes of the trans Himalayas

This region forms parts of Chamba, Kangra, Kullu, Lahaul-Spiti, Kinnaur and Shimla districts. A typical arctic climate prevails in this tract.

The main forest types which forms a part of this region are–

(a) Fir and spruce forest (b) High level blue pine forest
(c) Alder forest (d) Birch forest
(e) Rhododendron forest (f) Moist alpine scrub

A. Trees Deodar, Fir Spruce, Maple, Ash, Bhojpatra etc.

B. Shrubs Horse Chestnut, Alder, Robinia, poplar, Walnut etc.

C. Grasses Berberis. Festuca, Dactylis, Bromus, Lucerne, white Clover, Red Clover, dioscorea etc.

In this region a very heavy snowfall is experienced and the ground is covered by a thick blanket of snow for several weeks at a stretch. Thus, the period available for the growth of plants is very short.

IV Trans Himalayan Region

This forest region has a poor vegetative growth. It consists of the areas lying in the rain shadow of the main Himalayan range. The areas included in this zone are–

(a) Inner dry valleys of the main Himalaya
(b) The trans Himalaya

This region forms part of Chamba, Kullu, Lahaul-Spiti, Shimla and Kinnaur districts. Since rainfall is very low, so only thorny species grow in this zone.

The main forest types forming a part of this region are–

(a) Chilgoza or Neoza pine forest (b) Dry deodar forest
(c) Dry juniper scrub (d) Dry alpine scrub.

A. Trees- Birch, Juniper, Cypress, Willow etc.

B. Shrubs-Saussurea lappa, Cotoneaster microphylla, Artemesia etc.

C. Grasses Festuca arundinacea, Dectylis glomerata etc.

In this region upper reaches are covered under perpetual blanket of snow. Tree growth is restricted to the moist strips of land. *Chilgoza* pine and *Neoza pine* forests are found in only one district in India i.e. *Kinnaur* in Himachal Pradesh.

Since 1971, after attaining statehood this has been a priority agenda of

the state Government to expand the forest cover in the state. To achieve this a number of programmes were initiated to ensure larger participation of the people.

Table No. 2

Geographical Distribution of Forests (As per FSI Report 2009)

	Area Km²	Percentage of Geographical area.	Percentage of Forest Area
1. Geographical Area	55,673	100.00	--
2. Forest Area (Legally classified)	37,033	66.52	100.00
3. Area under Tree Cover	14,668	26.35	39.61
i)Very Dense Forest	3,224	5.79	08.71
ii)Moderate Dense Forest	6,383	11.47	17.24
iii)Open Forest	5,061	9.09	13.66
Legal Classification of Forest		Area(Km²)	Percentage
1. Reserved Forests		1896	05.12
2. Demarcated protected Forests		11387	30.75
3. Un-demarcated Protected Forests		21656	58.48
4. Unclassed Forests		976	02.63
5. Others(managed by Forest Department		370	01.00
6. Not managed by Forest Department.		748	02.02
Total		37033	100.00

Himachal Pradesh has 2 National Parks and 32 Sanctuaries covering an area of 7160.75 Sq. Km. which constitutes about 12.7 % of the total forest area of the State. After rationalization, there will be 5 national Parks, 3 Conservation Reserves and 26 Sanctuaries covering an area of 8358.48 Sq. Km., which would be 15% of the total forest area of the State. Afforestation works in the State began from the first Five Year Plan and are continues till date (i.e. financial year 2013-14). About 10385 Sq. Km. area has been covered through plantation activity. Afforestation over an area of 2,825 Sq. Km. was undertaken prior to 1980 and is presumed to have been captured in the satellite imageries being used by the Forest Survey of India. Plantation over an area of 7442 Sq. Km. has been undertaken after 1980. Due to the concerted efforts of the Forest Department in the direction of afforestation, the State has witnessed an increase in forest cover from 11780 Sq. Km. in 1991 to 14679 Sq. Km. in 2011. There has, thus, been an increase of 2899 Sq. Km. in the forest cover of the State. As per the Forest Survey of India Report 2011, an increase of 11 Sq. Km. in the forest cover over 2009 has been noticed in the State.

In terms of forest canopy density classes, the State has an area of 3,224 Sq. Km. under very dense forest, 6,381 Sq. Km. under moderately dense forest and 5,074 Sq. Km. under open forest. The moderately dense forest has decreased by 2 Sq. Km. whereas, open 216 forest has increased by 13 Sq. Km. There has been no change in dense and very dense forest. The overall quality

of forests in the State has remained unchanged.

CONSERVATION OF ENDANGERED CHILGOZA PINE: Pinus gerardiana for botanists and commonly known as *neoza pine* the nut-bearing tree species is being pushed towards extinction due to reckless harvesting and the over extraction of the edible seed. The conservation of the species in the state is vital for its survival as it is found only in the narrow dry temperate belt extending from Afghanistan to Himachal Pradesh. The plan was being prepared after studying all past efforts to regenerate and conserve the neoza forests and it would take care of not only the technical but also the socioeconomic aspects to help promote the sustainable harvesting of the nut by involving the local people. They were unaware of the harmful impact of the bad harvesting practices being followed by them.

Forests Cover By Different Forest Type	Area (Km^2)
1. Tropical Dry Deciduous Forests	2,140
2. Tropical Thorn Forests	43
3. Sub-Tropical Pine Forests	3,853
4. Sub-Tropical Dry Ever Green Forests	470
5. Himalayan Moist Temperate Forests	4,064
6. Sub-Alpine and Alpine Forests	2,512

Since 1971, after attaining statehood this was on priority agenda of the state Government to expand the forest cover in the state. To achieve this a number of programmes were organised to ensure larger participation of the people. Deforestation leads not only deterioration of natural environment but also of cultural environment as the former feeds the latter. In a simplified way deforestation means increase in temperature. If it continues we lose the aesthetic panorama of the area that ultimately would affect the nature and economy of the area, causing depletion of numerous species resulting into different levels of temperature effects.

Due to merciless felling of trees, the area under forests, which was 21,58,527 hectares in 1967-68 had been reduced to 21,18,958 hectares in 1979-80 and 21,14,187 hectares in 1981-82. This was irony of our system that this large scale cutting was done by those who were supposed to preserve forests and had the responsibility to expand forest cover in the state.

In the past, many administrative and legislative measures have been taken by the government to stop illicit cutting and smuggling of the timber. The measures are–

Himachal Pradesh Resin and Resin products (Regulation of Trade) Act 1981.

Himachal Pradesh Forest (Regulation of Trade) Act 1982.

Himachal Pradesh Specific Corrupt practices Act, 1984.

Himachal Pradesh preservation and Maintenance of Forest based Essential Commodities Act 1984.

The exploitation of private forests has also been regulated by enactment of Himachal Pradesh land presentation Act 1978, read with Himachal Pradesh Forest produce (Regulation of Trade) Act 1982.

Forest wealth of Himachal Pradesh is estimated at about 60,000 crore at 1996-97 prices and 1,50,000 crore in 2011-12. Most of precious coniferous forests are of such nature that these can not be truly regenerated by human beings if these are cut once. The government has imposed a complete ban on commercial felling and the only removals from the forests are either by way of timber distribution rights to one people or salvage extraction. Even the silvicultural harvestable volume according to working plan prescriptions would be annually worth over Rs. 250 crore. However, the government has denied itself this resource over the last decade primarily for preserving the fragile Himalayan ecology and environment in over all national interest. From the year 1985-86, a Social Forestry (Umbrella) project has been launched for raising fuel, fodder and small timber species, A *tree patta* scheme has been introduced in the state for landless poor people. Under this scheme trees planted by an individual in government land would belong to him. In the village, voluntary organizations are permitted to plant trees in government lands adjoining their villages. The state will retain 25 percent of the sale proceeds and 75 percent will go to the individual planters or organizations.

Mid Himalayan Watershed Project: This project was implemented on 1st October 2005 with the help of world bank in 10 district of the state, covering 42 blocks and 602 panchayats. The basic objective of this project was to ensure more plantation, to create job opportunity in the concerned area by involving people in the development natural resources. In February 2009, the world bank extended this project to whole of Himachal Pradesh. The project continued till 31st March 2013.

To increase the area under green cover, there are also projects which are aided externally. Some of them are–

Indo-German Eco-Development Project (Changar Area Project): This project is meant for Changar area of Palampur sub-division. The project has multi-disciplinary approach by integrating the departments of Forests, Agriculture, Horticulture and Animal Husbandry.

Himachal Pradesh Forestry Project U.K.: It is a hundred percent reimbursement project. The project aims at introducing new process of planning and governance by involvement of the people under the joint Forest Management mechanism. The project also supports subsidiary silvicultural operations in the existing forests.

Watershed Development Projects For Himachal Hills

(Kandi Project): This project was funded by world Bank. It aims at ecological rehabilitation of the catchments areas of five rivers, viz, *Markanda* in Sirmaur district, *Ghaggar and Sirsa* in Solan district, *Swan* in Una district and *Chakki* in Kangra district and also to improve socio-economic conditions of farmers

living in these areas. Kandi area falls in the catchments of the above five rivers where soils are highly eroded and are subjected to drought conditions throughout the year. This is also multi-disciplinary project.

In the past years along with illicit felling, fire has also been noticed as a big threat to the forest. It is therefore necessary that check posts at suitable places are established to curb illicit timber trade, fire fighting equipments and techniques are introduced and made available to all forest divisions where fire is a major destructive element and communication network is also required for good management and protection.

Beside timber, the forests of the state contain a large number of medicinal and aromatic plantation used by pharmaceutical and perfumery industry. It is a well known fact since ancient times that Himalayan region has remained pioneer in India, possessing plants with medicinal properties. In Himachal Pradesh, the Chamba valley, Churdhar Valley and Kullu Valley are rich in medicinal plants. According to a legend, Hanuman had probably collected *Sanjivni* herb from Churdhar peak of Himachal Pradesh to save the life of Lakshmana the younger brother of lord Ram during that famous battle against Ravana the king of Lanka. There is also an old story that a nomadic shepherd who having cut deep his finger was cleaning the oozing blood by plucking leaves of different forest species. Spontaneously while passing through thick aromatic bushes along with his flock of sheep found miraculously the cut on the finger cured. Amazingly he found one of the plants responsible for it. To verify further the wonderful curative power of this herb he cut apart the head of one of his sheep and to his amazement the sheep restored to life with the application of the herb. The story pertains to Chur valley, where many herb species are grown.

Herbs due to their easy availability and medicinal value are of great importance for man. To keep himself healthy and free from diseases, man enjoying its curing powers even today. Himachal Pradesh is considered as vast repository of medicinal herbs. In Himachal Pradesh, more than *1500 drug plants* are reported to be found. The germ plasm of various plants bearing alkaloids, flavonoids, glycosides, terpenoids, steroids, essential oils, bitter tonics, tannins etc. have been discovered from here. A lot of confusion is created about the name of medicinal plants by local names, Ayurvedic names and other names. Therefore, the need is to have uniform system of identification and nomenclature for reasons of ignorance, many valuable plants unknown to local residents are destroyed in the process of collecting certain other ones. Medicinal plants grow wild in forest areas or weeds in fields. Local people collect the useful parts of such plants and sell to some local traders or to an outsider who may be frequenting the area for the purpose. There has not been any serious attempt so far for the cultivation of such plants in the State yet. The procured material is generally dispatched to *'Amritsar'* Haridwar and *'Dehradun'* which are the main markets catering to the produce of Himachal Pradesh. Some of the valuable drugs found in

Himachal forests are:

Aconitum heterophyllum wall – (Atis, Patis); Aconitum violaceum – (Mitha Patis); Angelica glauca – (Chura); Berberis aristata – (Kasmal Daru harida); Camellia sinesis – (Chai); Diascorea deltoidea wall – (Singhi Mingli); Hydrocotyle asiatica L.Syn.: Centell asiatica – (Brahmi); Heracelum candican wall – (Patrala); Pierorhiza kurroa – (Karu); Podophyllum hexandrum – (Bankakri); Viola odorata – (Banaksha); Prinsepiautilis – (Bhekul); Cannabis sativa – (Bhang); Cominum cyminum – (Kala Zira); Clausena pentaphyla – (Ratanjot); Terminalia belerica roxb – (Bahera); Terminalia chebula – (Harad); Cinnamomum tamala, Nees and Eberm (Tejput); Saussurea lappa (Kuth); Valeriana (Nahini) and Zanthosylum alatum (Tirmur).

Aconitum heterophyllum Wall (Atis Patis): Aconitum heterophyllum Wall is a critically endangered wild medicinal herb of alpine Himalaya and cultivation is recommended owing to its large demand in the herbal market and to ensure the conservation of wild habitats. Therefore, observations on floral biology, pollen germination, pollination, and fruit and seed setting after implying different breeding systems are carried out for its successful domestication and improvement in cultivation practices. The study reveals that the plants grown in hothouse conditions showed considerable variation in the production of flowers and seeds. Flowering occurs from the second week of September to late October, with 20 days of peak flowering. Anthers dehisced longitudinally between 7:30 and 11:00 a.m, strongly dependent on higher temperature.

The pollen grains per anther varied between 2000 and 6000, which means an average of 80,000 pollen grains per flower. Nectar production begins at anther dehiscence and coincides with maximum stigmatic receptivity. Bees are observed as pollinators. Pollen germination and pollen tube elongation are maximum in 5% sucrose. Controlled pollination reveals that this species is self-incompatible, although few fruits develop from selfing. Such fruits are smaller than the fruits produced by open pollinated and from hand-crossed flowers and most abort early in development.

Aconitum violaceum (Mitha Patis) : Aconitum violaceum is a perennial species distributed in the Himalayan region of India, Pakistan and Nepal. Within India, it has been recorded in the alpine slopes in an altitude range of 3600–4800 mts. The plant is used in Tibetan medicine, has a bitter taste and a cooling tendency. It is antiinflammatory and febrifuge. It is also used in the treatment of snake and scorpion bites.

Angelica glauca (Chura): Angelica species grow to 1–3 m tall, with large bipinnate leaves and large compound umbels of white or greenish-white flowers. Their large, sparkling, starburst flowers are pollinated by a great variety of insects (the generalist pollination syndrome), the floral scents are species-specific, and even specific to particular subspecies. The active ingredi-

ents of angelica are found in the roots and rhizomes and contains furocoumarins in its tissues which make the skin sensitive to light.

Berberis aristata (Kasmal Daru harida): Berberis aristata, also known as Indian Barberry or Tree Turmeric, belongs to the family Berberidaceae and the genus Berberis (pronounced br'ber-is). The genus comprises approximately 450-500 species of deciduous evergreen shrubs and is found in the temperate and sub-tropical regions of Asia, Europe, and America. Berberis aristata is native to the Himalayas in India and in Nepal. This also naturally found in the wet zone of Sri Lanka.

Uses: The fruits of the species are eaten by people living in areas where the plant is found, often as a dessert. They are juicy and contain plenty of sugars and other useful nutrients that supplement their diet. Its stem, roots, and fruits possess medicinal properties and are used in many ayurvedic treatments of ailments, such as urinary problems. The roots can also be used for making an alcoholic drink. The plant as a whole is a good source of dye and tannin which is used for dyeing clothes and for tanning leather.

Medicinal uses: The root bark contains berberine, quaternary ammonium salt of isoquinoline alkaloid. Berberine has antibacterial, antifungal, antiviral and antioxidant properties. It can possess antiinflammatory, antitumor and anti-diabetic activities. Shri Padmavathi Mahila Viswavidyalayam Tirupati, conducted a study to evaluate the effectiveness of ayurvedic medicine. They designed a study to provide scientific evidence for the use of *Berberis aristata* in the treatment of urinary troubles caused as a side effect of the anticancer chemotherapy drug, cisplatin. Cisplatin is known to cause nephrotoxicity which is a renal disease or dysfunction. In conclusion, the researchers found that the side effects of cisplatin were reversed by the antioxidant properties of the decoction of root bark of *Berberis aristata.*

Other research universities in India also studied the medicinal properties of Berberis *aristata.* In a scientific study of the antidiabetic activity of the plant, diabetic rats treated with the ethanol extract of the roots showed a significant reduction of serum glucose level, however, it also showed a significant increase in the level of HDL cholesterol. Additional research must be conducted to determine if the hypolipidemic properties of the plant could serve as a protective mechanism against the development of atherosclerosis, which is usually associated with diabetes.

A preparation called *rasaut* is prepared from this plant. Rasaut is prepared by boiling the bark of the root and of the lower part of the stem in water. The solution is then strained and evaporated till a semisolid mass is obtained; this is *rasaut.* It is mixed with either butter and alum, or with opium and lime-juice. It is also reported to be a mild laxative.

Camellia sinensis (Chai): Camellia sinensis is the species of plant whose leaves and leaf buds are used to produce the popular beverage tea. It is of the genus Camellia a genus of flowering plants in the family Theaceae. White tea,

yellow tea, green tea, and black tea are all harvested from this species, but are processed differently to attain different levels of oxidation. Kukicha (twig tea) is also harvested from Camellia sinensis, but uses twigs and stems rather than leaves. Common names include tea plant, tea shrub, and tea tree (not to be confused with *Melaleuca alternifolia,* the source of tea tree oil).

There are two major varieties used for tea: Chinese tea, Camellia sinensis var. sinensis, and Assam tea, Camellia sinensis var. assamica. Camellia sinensis is native to East, South and Southeast Asia, but it is today cultivated across the world in tropical and subtropical regions. It is an evergreen shrub or small tree that is usually trimmed to below 2 m (6.6 ft) when cultivated for its leaves. It has a strong taproot. The flowers are yellow-white, 2.5–4 cm (0.98–1.57 inch) in diameter, with 7 to 8 petals.

The seeds of Camellia sinensis and Camellia oleifera can be pressed to yield tea oil, a sweetish seasoning and cooking oil that should not be confused with tea tree oil, an essential oil that is used for medical and cosmetic purposes, and originates from the leaves of a different plant. Camellia sinensis plant, with cross-section of the flower (lower left) and seeds (lower right).

The leaves are 4–15 cm (1.6–5.9 in) long and 2–5 cm (0.79–1.97 in) broad. Fresh leaves contain about 4% caffeine. The young, light green leaves are preferably harvested for tea production; they have short white hairs on the underside. Older leaves are deeper green. Different leaf ages produce differing tea qualities, since their chemical compositions are different. Usually, the tip (bud) and the first two to three leaves are harvested for processing. This hand picking is repeated every one to two weeks.

There are three main kinds of tea produced in India:

Assam tea comes from the northeastern section of the country. This heavily forested region is home to much wildlife, including the rhinoceros. Tea from here is rich and full-bodied. It was in Assam that the first tea estate was established, in 1837.

Darjeeling Tea– the Darjeeling region is cool and wet, and tucked in the foothills of the Himalayas. Tea plantations reach 2200 meters. The tea is delicately flavoured, and considered to be one of the finest teas in the world. The Darjeeling plantations have 3 distinct harvests, termed 'flushes', and the tea produced from each flush has a unique flavour. First (spring) flush teas are light and aromatic, while the second (summer) flush produces tea with a bit more bite. The third, or autumn flush gives a tea that is lesser in quality.

Nilgiris tea comes from a part of India that is almost as high as Darjeeling. This southern Indian region has elevations between 1,000 and 2,500 meters. The flavours of Nilgiris teas are subtle and rather gentle. They are frequently blended with other, more robust teas.

Diascorea deltoidea wall (Singhi Mingli): Dioscorea is a genus of over 600 species of flowering plants in the family Dioscoreaceae, native throughout the tropical and warm temperate regions of the world. The vast

majority of the species are tropical, with only a few species extending into temperate climates. It is named after the ancient Greek physician and botanist Dioscorides.

They are tuberous herbaceous perennial lianas, growing to 2–12 meter tall or more. The leaves are spirally arranged, mostly broad heart-shaped. The flowers are individually inconspicuous, greenish-yellow, with six petals; they are mostly dioecious, with separate male and female plants, though a few species are monoecious, with male and female flowers on the same plant. The fruit is a capsule in most species, a soft berry in a few species.

Several species, known as yams, are important agricultural crops in tropical regions, grown for their large tubers. Many of these are toxic when fresh, but can be detoxified and eaten, and are particularly important in parts of Africa, Asia, and Oceania.

One class of toxins found in many species is steroidal saponins, which can be converted through a series of chemical reactions into steroid hormones for use in medicine and as contraceptives.

Hydrocotyle asiatica L.Syn. Centell asiatica (Brahmi): Centella asiatica, commonly known as centella, is a small, herbaceous, annual plant of the family *Mackinlayaceae* or *subfamily Mackinlayoideae* of family *Apiaceae,* and is native to wetlands in Asia. It is used as a medicinal herb in Ayurvedic medicine, traditional African medicine, and traditional Chinese medicine. It is also known as the Asiatic pennywort or Indian pennywort in English, among various other names in other languages.

Centella grows in tropical swampy areas. The stems are slender, creeping stolons, green to reddish-green in color, connecting plants to each other. It has long-stalked, green, reniform leaves with rounded apices which have smooth texture with palmately netted veins. The leaves are borne on pericladial petioles, around 2 cm. The rootstock consists of rhizomes, growing vertically down. They are creamish in colour and covered with root hair.

The flowers are white or pinkish to red in colour, born in small, rounded bunches (umbels) near the surface of the soil. Each flower is partly enclosed in two green brackts. The hermaphrodite flowers are minute in size (less than 3 mm), with 5-6 corolla lobes per flower. Each flower bears five stamens and two styles. The fruit are densely reticulate, distinguishing it from species of Hydrocotyle which have smooth, ribbed or warty fruit. The crop matures in three months, and the whole plant, including the roots, is harvested manually.

According to the American Cancer Society, although centella is promoted for its health benefits, "available scientific evidence does not support claims of its effectiveness for treating cancer or any other disease in humans". However some research has shown a possible health benefit in the form of reduction of the progression of subclinical arterial lesions in low-risk asymptomatic subjects.

In India, particularly, it is popularly known by a variety of names: *bemgsag, brahma manduki, brahmanduki, brahmi, ondelaga* or *ekpanni* (south India, west India), *sarswathi aku* (Andhra Pradesh), *gotu kola, khulakhudi, mandukparni, mandookaparni,* or *thankuni* (Bengal), depending on region. Bacopa monnieri is the more widely known for Brahmi; both have some common therapeutic properties in Vedic texts and are used for improving memory. C. asiatica is called brahmi particularly in north India, although that may be a case of mistaken identity introduced during the 16th century, when brahmi was confused with mandukaparni, a name for C. asiatica. Probably the earliest study of mandookaparni as medya rasayana (improving the mental ability) was carried out at the Dr. A. Lakshmipathy Research Centre (now under CCRAS).

Heracelum candican wall (Patrala): Heracleum candicans Wall. (Apiaceae), an endangered Himalayan native medicinal herb, is commercially useful as a major source of Xanthotoxin. Natural population of the plant are exclusive source of raw material being supplied to drug industries. Due to indiscriminate overharvesting and several other biotic pressures, a speedy decline in populations of the plant has been registered in northwest Himalaya. *Ex situ* cultivation of threatened medicinal plant species is unanimously accepted as viable option for sustainable supply of homogenous quality raw materials and their conservation management.

Genus *Heracleum* of the family is very well known worldwide for their traditional and modern uses. *Heracleum* is a derivative of Latin word, *Herâclêus* or belonging to *Hercules* (itself derived from the Greek) means 'glory of Hera'. The genus, widely distributed in temperate Europe, Asia , North America and Abyssinia, comprises of 120-125 species worldwide. However, Schmidt, reported 70 species from north temperate regions and tropical mountains. India and adjoining countries like Nepal, Bhutan, Sri-Lanka, Burma, Pakistan and Bangladesh represent 21 species. These species mainly occur in northern, northeastern and southern parts of India . Out of the 15 species reported from the Himalayan region, 6 species occur in North-west Himalaya, 2 in Trans Himalaya, 3 in Central Himalaya and remaining 4 in Eastern Himalaya. This is a widespread, taxonomically complex genus and many species are morphologically similar.

Pierorhiza kurroa (Karu): Picrorhiza kurroa is one of the major income generating non-timber forest products found in the Nepalese Himalayas. It is one of the oldest medicinal plants traded from the Karnali zone. Known as Kutki, it is a perennial herb and is used as a substitute for Indian gentian (Gentiana kurroo).

It is found in the Himalayan region from Kashmir to Sikkim at an elevation of 2700-4500m and in Nepal, found abundantly between 3500 to 4800m. It is found far away from the community and takes from hours to days to walk to its growing habitat. It has been reported that Picrorhiza has been harvested to near extinction.

The rhizome has a long history of use in Indian Ayurvedic medicine for the treatment of digestive problems. Other uses have been proposed (e.g. for *asthma, liver damage, wound healing,* vitiligo) but the medical evidence is not yet conclusive. It appears to be relatively safe based on its long history of traditional use.

Podophyllum hexandrum (Bankakri): The perennial herb Podophyllum hexandrum, bearing the common names Himalayan may apple or Indian may apple, is native to the lower elevations in and surrounding the Himalaya. It is low to the ground with glossy green, drooping, lobed leaves on its few stiff branches, and it bears a pale pink flower and bright red-orange bulbous fruit. The ornamental appearance of the plant makes it a desirable addition to woodland-type gardens. It can be propagated by seed or by dividing the rhizome. It is very tolerant of cold temperatures, as would be expected of a Himalayan plant, but it is not tolerant of dry conditions. Its name in Hindi and Ayurveda is *bantrapushi* or *Giriparpat.*

The plant is poisonous, but when processed has medicinal properties. The rhizome of the plant contains a resin, known generally and commercially as Indian Podophyllum Resin, which can be processed to extract podophyllotoxin, or podophyllin, a neurotoxin. The North American variant of this Asian plant contains a lower concentration of the toxin, but has been more extensively studied.

Phodophyllum hexandrum has some good population in the Great Himalayan National Park of Himachal Pradesh. In the fringes of the famous Valley of Flowers National Park the study conducted by Prof C.P. Kala shows some scattered population of this important species, locally called as *'ban kakdi'.* Here its density is about 0.98 individuals per meter square. It grows across the Indian Himalayan region.

Viola odorata – (Banaksha); Viola odorata is a species of the genus Viola native to Europe and Asia, but has also been introduced to North America and Australia. It is commonly known as *wood violet, sweet violet, English violet, common violet, florist's violet,* or *garden violet.* The plant is known as *Banafsa, Banafsha* or *Banaksa* in India. It is a hardy herbaceous flowering perennial.

Uses: The sweet scent of this flower has proved popular throughout the generations particularly in the late Victorian period, and has consequently been used in the production of many cosmetic fragrances and perfumes. The French are also known for their violet syrup, most commonly made from an extract of violets. In the United States, this French violet syrup is used to make violet scones and marshmallows.

The scent of violet flowers is distinctive with only a few other flowers having a remotely similar odour. References to violets and the desirable nature of the fragrance go back to classical sources such as Pliny and Horace when the name 'Ion' was in use to describe this flower from which the name of the

distinctive chemical constituents of the flower, the ionones – is derived.

There is some doubt as to whether the true extract of the violet flower is still commercially available at all. It certainly was in the early 20th Century. The violet leaf is absolute however remains widely used in modern perfumery. The leaves are edible and contain a deal of soothing mucilage. Water extracts of the plant have some in vitro antibacterial properties.

Prinsepiautilis – (Bhekul); Prinsepia is a genus of trees in the Rosaceae. It bears fruit which look like a cherry. The plant grows largely in India, China, Bangladesh, and Taiwan, yet P. sinensis is hardy in zone 4, to about -32°C. The plant is named for James Prinsep, scholar, antiquarian, architect, secretary of the Asiatic Society in Calcutta, India, and member of the well-known Prinsep family of India, an Anglo-Indian family prominent in Indian affairs for several generations.

Cannabis sativa – (Bhang); Cannabis sativa is an annual herbaceous plant in the *Cannabis genus,* a species of the Cannabaceae family. People have cultivated cannabis sativa throughout recorded history as a source of industrial fibre, seed oil, food, recreation, religious and spiritual moods, and medicine. Each part of the plant is harvested differently, depending on the purpose of its use.

Its seeds are chiefly used to make hempseed oil which can be used for cooking, lamps, lacquers, or paints. They can also be used as caged-bird feed, as they provide a moderate source of nutrients for most birds. The flowers (and to a lesser extent the leaves, stems, and seeds) contain psychoactive chemical compounds known as cannabinoids that are consumed for recreational, medicinal, and spiritual purposes. When so used, preparations of flowers (marijuana) and leaves and preparations derived from resinous extract (e.g. hashish) are consumed by smoking, vaporizing and oral ingestion. Historically, tinctures, teas, and ointments have also been common preparations.

Cominum cyminum (Kala Zira); It is a flowering plant in the family Apiaceae, native from the east Mediterranean to India. Its seeds (each one contained within a fruit, which is dried) are used in the cuisines of many different cultures, in both whole and ground form.

Cumin is the dried seed of the herb Cuminum cyminum, a member of the parsley family. The cumin plant grows to 30–50 cm (12–20 inch) tall and is harvested by hand. It is an annual herbaceous plant, with a slender, glabrous, branched stem which is 20–30 cm (8–12 in) tall and has a diameter of 3–5 cm (1 1/4–2 inch). Each branch has two to three subbranches. All the branches attain the same height, therefore the plant has a uniform canopy. The stem is coloured grey or dark green. The leaves are 5–10 cm (2–4 inch) long, pinnate or bipinnate, with threadlike leaflets. The flowers are small, white or pink, and borne in umbels. Each umbel has five to seven umbellts. The fruit is a lateral fusiform or ovoid achene 4–5 mm (1/6–1/5 in) long, containing two mericarps with a single seed. Cumin seeds have eight ridges with oil canals. They

resemble caraway seeds, being oblong in shape, longitudinally ridged, and yellow-brown in colour, like other members of the umbelliferae family such as caraway, parsley and dill.

The main producer and consumer of cumin is India. It produces 70% of the world production and consumes 90% of its own production (which is 63% of the world production). Other producers are Syria (7%), Turkey (6%) and Iran (6%). The remaining 11% production is assigned to other countries. Totally, around 300,000 tons of cumin per year is produced worldwide. In 2007 India produced around 175,000 tons of cumin on an area of about 410,000 hectare i.e. the average yield is 0.43 tons per hectare.

Uses: Cumin seeds are used as a spice for their distinctive flavour and aroma. It is globally popular and an essential flavouring in many cuisines, particularly South Asian, Northern African and Latin American cuisines. Cumin can be found in some cheeses, such as Leyden cheese, and in some traditional breads from France. It is commonly used in traditional Brazilian cuisine. Cumin can be an ingredient in chili powder (often Tex-Mex or Mexican-style), and is found in achiote blends, adobos, sofrito, garam masala, curry powder, and bahaarat. Cumin is also popularly used by cannabilistic tribes as part of the ritual.

Cumin can be used in its ground form or as whole seeds. It helps to add an earthy and warming feeling to food, making it a staple in certain stews and soups, as well as spiced gravies such as chili. It is also used as an ingredient in some pickles and pastries.

Medical Uses: In Sanskrit, Cumin is known as Jira. Jira means "that which helps digestion". In Ayurvedic system of medicine, dried Cumin seeds are used for medicinal purposes. The dried cumin seeds are powdered and used in different forms like *kashaya* (decoction), *arishta* (fermented decoction), *vati (tablet/pills)*, and processed with ghee (a semifluid clarified butter). It is used internally and sometimes for external application also. It is known for its actions like enhancing appetite, taste perception, digestion, vision, strength, and lactation. It is used to treat diseases like fever, loss of appetite, diarrhea, vomiting, abdominal distension, edema and puerperal disorders.

A popular drink in southern India such as Kerala and Tamil Nadu is called jira water, made by boiling cumin seeds in water. It is understood that cumin is beneficial for heart disease, swellings, tastelessness, vomiting, poor digestion and chronic fever.

Clausena pentaphyla (Ratanjot); This belongs to Family Rutaceae and largely found in the sub-Himalayan tract from Garhwal to Sikkim; also in Chakrata range, popularly known as Ratanjot (var.), Rowana. Surasi is a doubtful synonym.

Uses: Bark-anti-inflammatory, spasmolytic; used in veterinary medicine for wounds and sprains.

Aerial parts contain coumarins-clausmarins A and B. Coumarins exhibit

spasmolytic activity. The root also contains coumarins. Root and stem bark of Clausena excavata also contains coumarins-clausenin.

Terminalia belerica roxb (Bahera); Terminalia bellirica, known as "Bahera" or Beleric or bastard myrobalan, (Sanskrit: Vibhitaka , Aksha is a large deciduous tree common on plains and lower hills in Southeast Asia, where it is also grown as an avenue tree. The basionym is Myrobalanus bellirica Gaertn.. William Roxburgh transferred M. bellirica to Terminalia as "T. bellerica (Gaertn.) Roxb.". This spelling error is now widely used, causing confusion. The correct name is *Terminalia bellirica* (Gaertn.) Roxb.

The leaves are about 15 cm long and crowded toward the ends of the branches. It is considered a good fodder for cattle. Terminalia bellirica seeds have an oil content of 40%, whose fatty-acid methyl ester meets all of the major biodiesel requirements in the USA (ASTM D 6751-02, ASTM PS 121-99), Germany (DIN V 51606) and European Union (EN 14214). The seeds are called *bedda nuts.*

In traditional Indian Ayurvedic medicine, Beleric is known as *"Bibhitaki"* (Marathi: Behada) (Terminalia belerica). In its fruit form, it is used in the popular Indian herbal rasayana treatment triphala. In Sanskrit it is called vibhidaka.

"This tree, in Sanskrit *Vibhita* and *Vibhitaka* (fearless), is avoided by the Hindus of Northern India, who will not sit in its shade, as it is supposed to be inhabited by demons. Two varieties of T. belerica are found in India, one with nearly globular fruit, 1/2 to 3/4 inch in diameter, the other with ovate and much larger fruit. The pulp of the fruit (Beleric myrobalan) is considered by Hindu physicians to be astringent and laxative, and is prescribed with salt and long pepper in infection of the throat and chest. As a constituent of the triphala (three fruits), i.e., emblic, beleric and chebulic myrobalans, it is employed in a great number of diseases, and the kernel is sometimes used as an external application to inflamed parts. On account of its medicinal properties the tree bears the Sanskrit synonym of *Anila-ghnaka,* or "wind-killing.

This kernels are eaten by the Lodha people of the Indian subcontinent for their mind-altering qualities.

The nuts of the tree are rounded but with five flatter sides. It seems to be these nuts that are used as dice in the epic poem Mahabharata. A handful of nuts would be cast on a gaming board and the players would have to call whether an odd or even number of nuts had been thrown. In the Nala, King Rituparna demonstrates his ability to count large numbers instantaneously by counting the number of nuts on an entire bough of a tree.

Terminalia chebula (Harad); Terminalia chebula, in Hindi it is called *Harad, Haritaki, or Harada,* respectively 'Inknut'. In Urdu it is called *'Hareer'.* In Sri Lanka it is called *Aralu.* In Marathi it is called as *'Hirada'*, in Kannada it is called *'Alalekaayi'*, in Tamil it is called *'Kadukkai'* and in Malayalam it is known as *'Kadukka'.* In Bengali it is called *Horitoky.* In Assamese it is called

Silikha. In Telugu it is called *'Karakkaya'*. In the United States it is found in some Indian stores; it is known as *'Harde Whole'*.

It is a deciduous tree growing to 30-metre (98 ft) tall, with a trunk up to 1-metre (3 ft 3 in) in diameter. The leaves are alternate to subopposite in arrangement, oval, 7–8-centimetre (2.8–3.1 in) long and 4.5–10-centimetre (1.8–3.9 in) broad with a 1–3-centimetre (0.39–1.18 in) petiole. The fruit is drupe-like, 2–4.5-centimetre (0.79–1.77 in) long and 1.2–2.5-centimetre (0.47–0.98 in) broad, blackish, with five longitudinal ridges.

There are many varieties such as: Terminalia chebula var. chebula. Leaves and shoots hairless, or only hairy when very young. Leaves and shoots silvery to orange hairy. This tree yields smallish, ribbed and nut-like fruits which are picked when still green and then pickled, boiled with a little added sugar in their own syrup or used in preserves; this preserve is called *'Hareer Ka Murabba* in Urdu language. The seed of the fruit, which has an elliptical shape, is an abrasive seed enveloped by a fleshy and firm pulp. It is regarded as a universal panacea in the Ayurvedic Medicine and in the Traditional Tibetan medicine. It is reputed to cure blindness and it is believed to inhibit the growth of malignant tumours.

The dry nut's peel is used to cure cold-related nagging coughs. The bark/peel of the nut is placed in the cheek. Although the material does not dissolve, the resulting saliva, bitter in taste, is believed to have medicinal qualities to cure cold related coughs. Its fruit has digestive, antiinflammatory, anthelmintic, cardiotonic, aphrodisiac and restorative properties and is additionally beneficial in flatulence, constipation, piles, cough and colds.

Uses: Haritaki is a rejuvenative, laxative (unripe), astringent (ripe), anthelmintic, nervine, expectorant, tonic, carminative, and appetite stimulant. It is used by people who have leprosy (including skin disorders), anemia, narcosis, piles, chronic, intermittent fever, heart disease, diarrhea, anorexia, cough and excessive secretion of mucus, and a range of other complaints and symptoms. According to the Bhavaprakasha, Haritaki was derived from a drop of nectar from Indra's cup. Haritaki is used to mitigate *Vata* and eliminate *ama* (toxins), indicated by constipation, a thick greyish tongue coating, abdominal pain and distension, foul faeces and breath, flatulence, weakness, and a slow pulse. The fresh fruit is dipana and the powdered dried fruit made into a paste and taken with jaggery is *malashodhana*, removing impurities and wastes from the body. Haritaki is an effective purgative when taken as a powder, but when the whole dried fruit is boiled the resulting decoction is grahi, useful in the treatment of diarrhea and dysentery.

The fresh or reconstituted fruit taken before meals stimulates digestion, whereas if taken with meals it increases intelligence, nourishes the senses and purifies the digestive and genitourinary tract. Taken after meals Haritaki treats diseases caused by the aggravation of *Vayu, Pitta* and *Kapha* as a result of unwholesome food and drinks. Haritaki is a rasayana to Vata, increasing awareness, and has a nourishing, restorative effect on the central nervous

system. Haritaki improves digestion, promotes the absorption of nutrients, and regulates colon function.

Cinnamomum tamala, Nees and Eberm (Tejput); *Cinnamomum tamala, Indian bay leaf,* also known as *tejpat, Malabar leaf, Indian bark, Indian cassia,* or *malabathrum* is a tree within the Lauraceae family which is native to India, Nepal, Bhutan, and China. It can grow up to 20 m (66 ft) tall. It has aromatic leaves which are used for culinary and medicinal purposes. It is thought to have been one of the major sources of the medicinal plant leaves known in classic and medieval times as malabathrum (or malobathrum).

The leaves, known as *tejapatta* or *tejpatta* in Hindi and in Nepali, *Tejpat* in Assamese and *tamalpatra* in Marathi and in original Sanskrit, are used extensively in the cuisines of India, Nepal, and Bhutan, particularly in the Moghul cuisine of North India and Nepal and in Tsheringma herbal tea in Bhutan. It is called Biryani Aaku or Bagharakku in Telugu. They are often labelled as "Indian bay leaves," or just "bay leaf", causing confusion with the leaf from the bay laurel, a tree of Mediterranean origin in a different genus, and the appearance and aroma of the two are quite different. This may lead to confusion when following Indian or Pakistani recipes. Bay laurel leaves are shorter and light to medium green in colour, with one large vein down the length of the leaf, while tejpat are about twice as long and wider, usually olive green in colour, and with three veins down the length of the leaf. True tejpat leaves impart a strong cassia- or cinnamon-like aroma to dishes, while the bay laurel leaf's aroma is more reminiscent of pine and lemon. Indian grocery stores usually carry true tejpat leaves.

Uses: The bark is also sometimes used for cooking, although it is regarded as inferior to true cinnamon or cassia. In a recent study made by D.K. Sharma, C.Varshneya, P.Bharadwaj, and B.S.More of Department of Pharmacology and Toxicology CSKHPKVV Palampur Himachal Pradesh revealed that Methanolic Extract of C.tamala leaves @ 10mg/Kg to Alloxan induced diabetic rats for 15 days resulted in significant reduction in blood glucose level, blood glcosylated haemoglobin, LPO, serum AST, and ALT and significant increase in the antioxidant enzymes such as CAT, GSH, and SOD. However restoration of blood glucose and other parameters were much faster in Glibenclamide treated rats. Their studies indicated that C.tamala could be used as an adjunct therapy in Diabetes.

Saussurea lappa (Kuth); Saussurea is a genus of about 300 species of flowering plants in the family *Asteraceae,* native to cool temperate and arctic regions of Asia, Europe, and North America, with the highest diversity in alpine habitats in the Himalaya and central Asia. Common names include *saw-wort* and *snow lotus,* the latter used for a number of high altitude species in central Asia. They are perennial herbaceous plants, ranging in height from dwarf alpine species 5–10 cm tall, to tall thistle-like plants up to 3 m tall. The leaves are produced in a dense basal rosette, and then spirally up the flowering stem. The flowers form in a dense head of small capitula, often surrounded by dense

white to purple woolly hairs; the individual florets are also white to purple. The wool is densest in the high altitude species, and aid in thermoregulation of the flowers, minimising frost damage at night, and also preventing ultraviolet light damage from the intense high altitude sunlight.

Uses: A number of the high alpine Himalayan species are grown as ornamental plants for their decorative dense woolly flower heads; they are among the most challenging plants to grow, being adapted to harsh climates from 3500–5000 m altitude, demanding cool temperatures, a very long (up to 8–10 months) winter rest period, and very good soil drainage in humus-rich gravel soils.

Saussurea lappa has been shown to inhibit the mRNA expression of iNOS by lipopolysaccharide stimulated macrophages, thus reducing nitric oxide production. In rats, high doses of 50-200 milligrams per kilogram of crude ethanolic extract reduced observed inflammation in standard laboratory tests, and 25-100 milligrams per kilogram of the sesquiterpene fraction of the extract reduced several molecular markers of inflammation. Ethanol extracts were shown to have analgesic and antiinflammatory effects at high doses of 75-300 milligrams per kilogram. As the slow-growing wild plant is endangered by collections, a substitute grown in tissue culture has been suggested, which is mostly equivalent. Generally the analgesic and antiinflammatory effects of the plant are much inferior to those of 10 milligrams of indomethacin.

Valeriana (Nahini): Valerian is a perennial flowering plant, with heads of sweetly scented pink or white flowers that bloom in the summer months. Valerian flower extracts were used as a perfume in the sixteenth century. Native to Europe and parts of Asia, valerian has been introduced into North America. It is consumed as food by the larvae of some Lepidoptera (butterfly and moth) species, including Grey Pug. Other names used for this plant include *garden valerian* (to distinguish it from other Valeriana species), *garden heliotrope* (although not related to Heliotropium), and allheal. Red valerian, often grown in gardens, is also sometimes referred to as valerian, but is a different species from the same family and not very closely related.

Valerian, in pharmacology and herbal medicine, is the name of a herb or dietary supplement prepared from roots of the plant. Crude extract of the root is often sold in the form of capsules. Valerian root has sedative and anxiolytic effects. It can also be classified as a drug since its consumption produces a sedative or medicinal effect, while it is not exclusively a type of food. These effects are suspected to be mediated through the GABA receptor. The amino acid valine is named after this plant.

Uses: Valerian is most often used to treat insomnia. It can be considered an alternative treatment for hypnotic drugs. It is also sometimes used as an alternative for sedatives, such as benzodiazepines in the treatment of certain anxiety disorders.

Whether or not valerian is an efficacious treatment for insomnia is still a

very open question. Multiple recent systematic reviews of the medical research literature and meta-analyses have produced conflicting conclusions regarding the efficacy of the substance.

In the United States, valerian is sold as a nutritional supplement. Therapeutic use has increased as dietary supplements have gained in popularity, especially after the Dietary Supplement Health and Education Act was passed in 1994. This law allowed the distribution of many agents as over-the-counter supplements and therefore allowed them to bypass the regulatory requirements of the Food and Drug Administration (FDA).

In addition to being used for the treatment of insomnia and other sleep disorders, valerian has also been used to treat anxiety and gastrointestinal pain caused by irritable bowel syndrome. It has also been used in alternative medicine to treat symptoms such as nervous tension, excitability, and stress as well as intestinal colic or cramps and as a muscle relaxant.

Zanthosylum alatum (Tirmur): Timur or Tirmur is a shrub belonging to the family Rutaceae. It is found in the warmer valleys of the Himalaya, ranging between 1000 and 2100 met. above sea level. It also grows in the Eastern Ghats in Orissa and Andhra Pradesh at 1200 met, and the lesser Himalayan ranges in the northeastern part of India (e.g., Naga Hills, Meghalaya, Mizoram, and Manipur). Eleven species of the genus Zanthoxylum in India, of which 6 occur in the Himalayan region. The Himachal Himalaya harbours 4 species of Zanthoxylum, namely, Z. armatum DC., Z. acanthopodium DC., Z. oxyphyllum Edgew., and Z. budrunga.

The people uses timur due to its availability near their winter settlements. They use timur fruit in the form of condiments, spices and medicine. In the preparation of certain traditional dishes, the use of timur as a flavouring agent or spice is very popular. During winter, a soup made from the dried fruit (known as hag) is consumed by the entire family to keep warm. A chutney (like a sauce), locally known as dunkcha, is also a popular food item in the parts of Uttrakhand.

Timur is used in curing various common ailments such as toothache, common cold, cough, and fever, as it is believed to give warmth to the body. To cure toothache, a fresh or dry fruit is pressed over the affected tooth and is kept in position till it loses its pungency. Young shoots of timur are used as toothbrushes. Recently people have also started to use powder made from the dried fruit for cleaning teeth. Common stomach complaints are treated with timur soup. The tribal community also brew liquor from timur, but the resulting liquor is palatable only to those highly addicted. Most members of the community consider the tree to have religious significance and magical properties. Walking sticks are made out of its branches. In recent times however, the use of timur in alcohol, as a spice and as a leech repellent appears to have declined.

To take maximum advantage of herbs found in the Pradesh, State

Government has set up laboratories and Ayurvedic centres. With advanced investigation, there is a probability to find more medicinal herbs, which might provide remedy to, what is known today as *incurable diseases.*

ENDANGERED HERBS: While environmentalists have been expressing concern over the dwindling herbal reserves of the hill state considered to be the storehouse of medicinal plants, no scientific assessment of threatened species was ever carried out. Out of 1300 species found in the state 47 have been put in red list.

Based on the International Union for Conservation of Nature (IUCM) criteria, 42 field botanists, plant taxonomists and foresters from reputed institutes of the country evaluated 57 selected species for the Comprehensive Assessment and Management Prioritisation and categorized 11 species as critically endangered, 19 endangered and 17 vulnerable. The main factors responsible for the decline included unscientific and over exploration, a loss of habitat due to increasing biotic interference and climate change. The short listed 23 important species for conservation, propagation and cultivation have been identified in the first phase. It included 11 species, forming part of the *ashtavarga* " group used in ayurvedic medicines and three tree species, *taxus baccatra, bhojpatra* and *tejpatta.* These herbs are used for preparing life saving formulation and boosting body power.

TABLE - 3

FORESTS AREA/PRODUCTION/VALUE OF MAJOR AND MINOR PRODUCTS

Unit	Area under Forests (000 hect.)	Timber Production (000 cubic meters)	Major product (000 Rs.)	Minor product (000 Rs.)
1950-51	877.2	511.20	6,341.0	1843.0
1955-56	1044.0	454.80	9,630.0	2915.0
1960-61	1044.0	489.10	15,827.0	7063.0
1970-71	2143.5	524.70	1,33,927.0	13323.0
1975-76	2176.3	477.50	1,27,151.0	14790.0
1980-81	2116.9	560.00	2,83,999.0	26445.0
1985-86	3770.1	531.50	5,34,500.0	23576.0
1990-91	3759.1	312.30	8,68,340	52,578
1993-94	3710.1	371.20	21,64,456	84,837
1995-96	3551.8	425.00	13,420,23	1,41,411
2001-02	3628.49	371.60	14,69,807	1,64,005
2004-05	3628.49	433.10	16,42,398	97,784
2007-08	3628.49	246.90	41,71,481	91,274
2010-11	3628.33	277.90	56,77,734	1,96,726
2012-13	3628.33	315.40	6,87,310	2,30,732

Source: Important Facts on Himachal Pradesh DESHP.

These herbs are consumed in bulk by the pharmaceutical industry for preparing life saving ayurvedic and allopathic formulations and boosting vigour, vitality and strength to help improve the resistance of the body to a host of diseases. For instance, taxol extracted from *taxus baccata* is used for

making anticancer drugs and *patish* (aconitunm heterophyllum) for treating lever related ailments and fever. It is now for the first time that a comprehensive plan was prepared for the conservation of herbs which are at the verge of extinction.

Forests Planning: The state forest department has not been paying due attention to the scientific management of forest resources. The indifferent attitude of the department can be gauged from the fact that out of 38 territorial forest divisions, the working plans for only nine divisions had been completed and duly approved by the state government and the centre till 1999. Up to 2006, the number went up by 12 and till 2013 only 15 subdivision were completed. The working plans for the remaining divisions were either in various stages of preparation or under the scrutiny of the government.

Working plans, which normally cover a period of 15 years, used to be completed well in time in earlier days. As a result, the field officers did not face any problems in managing the forests. However, nowadays by the time the department is able to complete the plan for a division, more than half the period is already over. For instance, the working plan for 1991-2006 for *Nalagarh, Nurpur* and *Nachan* were under scrutiny of the government till 2003. Similarly, the plans for 1992-2007 for *Pangi* and *Kinnaur* were under preparation up to 2001 and for *Renuka, Kutlehar* and *Mandi,* approval were pending with the government till 2006.

The working plans for **Una, Dehra, Dharamshala and Palampur** expired in March 1997. As per the working plan code the preparation for the new plan should be undertaken two to three years before the expiry of the existing plan. Apart from the delay in starting work on the plans, the department has not been providing adequate staff and other facilities to the working plan officers. In 1980, the department made a rule that any divisional forest officer not making a forest working plan would be debarred from promotion. However, the rule has not been implemented so far. While the working plan wing had been burdened with a top heavy setup, the officers who actually prepare the plan had not been given adequate staff.

The failure of the department to prepare working plans in time would not only affect forest management but might also create problems. Following a verdict of the Supreme Court approval of working plans by the Government of India has been made mandatory. The working plan provides a true picture of the state of forests, evaluates the results of the scientific management carried out during the previous plan and makes prescriptions for the period for which it was meant. It also includes detailed information regarding wildlife.

In the past even forest roads and rest houses were constructed in accordance with the working plan. However, these days such decisions are taken on political considerations. The Himachal Pradesh had in 1997 approved a proposal for carrying out green fellings in accordance with the working plans, but it could not be done in the absence of approved working plans.

The State Forest Corporation had floated bounds to raise financial resources. It remains to be seen whether the state goes ahead with its plans to carry out green fellings. The preparation of working plans in itself is not enough, the accountability of each employee will have to be determined to ensure high success rate. Incidentally, Himachal Pradesh was one of the few hill states where scientific forest management was introduced by the British rulers. Lord Dalhousie, the then Governor-General of India, was the first to recognise the need for taking steps for the conservation of forests in the Himalayan region. He issued detailed instructions in this regard in 1849 and appointed Captain Longden to carry out the necessary exploration work and prepare a report on forests. The report was completed in two years and in 1853 itself about 2000 deodar trees were planted in the land locked *Pangi valley.*

While the forest department, which came into being in 1864, started preparing working plans towards the end of the 19th century, the rulers of Bushahr state got one made by Mr. Brandes, a scientist turned forest officer, in 1862. The neglect in recent years of the forest working plan is a matter of concern for the environmentalists and foresters. While the Centre had decided to implement the national forest policy in a time-bound manner by bringing 33 percent of the total geographical area of the country under forest cover by 2012, it was not possible to achieve the target in hill states like Himachal Pradesh

As per the policy at least 60 per cent of the area of the hills must be under tree cover, which is virtually impossible as there are vast stretches of uncultivable terrain where no vegetation grows. For instance, in Himachal Pradesh out of the total geographical area of 55,673 sq km, forest land accounts for 37,033 sq km, about 67 percent of the total area. However, almost 16,000 sq km out of it, comprising high mountain ranges beyond the tree line, glaciers and ravines, in unculturable. Thus, at best green cover could be spread only over 21,000 sq km, about 37 per cent of the total area of the state as against the target of 60 per cent.

At present, 14,000 sq km (25 per cent of the state's total area) is under forest. In all, about 11,500 sq km, including degraded open forest area, is available for afforestation.

The state Forest Department in 2004, in accordance with the decision of the Centre, drew up a plan to bring an additional 50,000 hectares under forest annually over the next eight years. The Rs 800 crore plan was approved to bring 4 lakh hectares (4,000 sq km) under forest by 2012 to increase the tree cover to 32.5 per cent of the total area.

If only the cultivable area of the state (40,000 sq km) is taken into account the forest cover will account for 45 per cent. The Centre had given an assurance that funds will not be a constrain in the implementation of the plan, but Rs 100 crore required every year for it was a tall order. Since 2004 the department had been spending only about Rs 22 crore to raise new plantations over 15,000 hectares annually. So for department has not been able to

achieve its own set target, reasons whatsoever may be, shows the negligence of the government and the department.

BIOTIC PRESSURE ON FORESTS

Forests in Himachal Pradesh cover a considerable part of the total geographical area. During the past decades man has increasingly interfered with the fragile forest ecosystem of this mountainous region as more and more wood is extracted for fuel, fodder for cattle, timber for constructing houses and small wood for agricultural use. The pressure on forests is being put through the following ways.

(A) Grazing: Grazing by domestic animals is perhaps the most important factor responsible for the ever increasing biotic pressure on the forests of the state. This has brought about a retrogressive change in the forest environment. People in the hills need domestic animals for milk and milk products, agricultural operations. wool and wool based fabrics and animal dung for manuring fields.

Overgrazing of forest and pasture lands causes following environment problems:

- Gullies develop in the tracks frequented by cattle. These are very common in the Shivalik hills, where the formation of gullies is aided by the weak nature of the country rocks, disturbed zones and high erosive capacity of the mountain streams and rivers.
- The growth of pasture land is adversely affected, because overgrazing keep them below the optimum height for metabolic activity.
- The hooves of cattle damage young regeneration, seedlings and even poles. This render the soil prone to accelerated erosion.
- Due to selective grazing of young and succulent grasses only coarse and useless grasses remain in the pastures.

The different forms of grazing prevalent in various parts of the state are– *Dry grazing, 24 hours grazing* and *migratory grazing.*

(B) Forest Fires: Forest fire are common in the tropical, sub tropical and sub-temperate parts of the state in Summer. They cause severe damage to forest ecosystem. Forest fires may be of the following two broad categories.

(i) Intentional fires: Such fires may happen under the following situations:

- miscreants set fire to the forest with a specific intention of damaging the forest wealth.
- local people may set fire to the forest floor just before the onset of monsoon so as induce a good growth of grass which is used for their cattle.
- to hide the stumps of illicit fellings.
- to induce growth of mushrooms during the rainy season.
- to take revenge on official of the Forest department.

(ii) Unintentional fires: Such accidents may be caused by picnickers, trekkers and travellers who may leave unextinguished cigarette butts, matches, camp

fires etc. in the forest during dry season. These soon develop into devastating forest fires.

Chir pine forests in Shivalik hills are largely destroyed by fires every year. Fires have following adverse effects on the forest ecosystem:

- accelerate soil erosion.
- adversely affect regeneration and plantations may be destroyed.
- valuable vegetative growth is destroyed.
- wild animals are forced to migrate and even majority of them perish in the fire.

(C) Lopping: Lopping of leaves and branches of trees growing in the forest is carried out on a large scale for the following purposes.

- Fuel wood to heat homes and cook food.
- Fodder to stall-feed cattle.
- Small timber to make handles of agricultural tools like axes and sickles.

The people in the hills depend upon forest for fuel wood. They enjoy lopping rights for collection of fuel wood and fodder from nearby forests. But to meet their demand they remove more than what is permitted. This is known as **overlopping.** Overlopping damages the forest ecosystem of the state in following manner.

- Reduction in forest cover leads to accelerated erosion.
- Loss to regeneration; and
- Decreases in the productivity of the forests.

Before the enactment of the Forest Conservation Act in 1980, there was a steady decline in the forest area of the state due to the factors listed below.

(a) Construction of roads and canals;

(b) Large forest area was submerged under river valley projects like Bhakhra dam and Pong dam; and

(c) Forest land was cleared for agriculture and horticulture in the past.

(D) Quarrying: Surface mining or quarrying involves the removal of minerals from earth's crust. Stones for the construction of houses have been quarried by the people of this state since earliest times. Slate, sandstone, quartzite and granite are still widely used for constructing walls, flooring and roofing. Quarrying involves the following steps:

- Land is cleared of all vegetation.
- Top soil is removed so as to expose the underlying country rocks.
- Minerals are extracted and removed from the quarry by road.
- Debris is dumped in the surrounding area; and
- When quarrying is abandoned, virtually no effort is made to reclaim it.

(E) Landslides: In Himachal Pradesh landslides of all sizes have become a major environmental problem in the state, particularly during the monsoon season. Landslides occur due to–

(a) geological factors such as faults and thrusts.
(b) soil slumping.
(c) degradation of vegetative cover in the uplands, and
(d) heavy rains and cloud bursts.

Landslides cause immense loss in terms of man and vehicle hours lost due to delays; loss of human property; loss of human and animal life and cost of debris removal. There are many permanent landslides in Himachal Pradesh. Other are active only in rainy reason. Two major permanent landslides in the state are – *Naina Devi Landslide* and *Telangi Landslide.* The areas around hydel power projects have become prone to landslides as explosions have made soil loose and fragile.

(F) **Mountaineering and Trekking:** In the recent past, mountaineering and trekking have become a popular sports in different parts of Himachal Pradesh. Each year a large number of climbers and trekkers go to many parts of the state. This has brought about an unprecedented pressure on the environment, thus resulting in its deterioration. Mountaineering and Trekking are responsible for–

(a) Garbage including empty tins and wrappers are left behind by climbers and trekkers.

(b) They leave behind unextinguished camp-fires and cigarette butts in the forest.

(c) The forests through which they pass are brought under immense strain due to removal of fuel wood and grazing/browsing by their pack animals.

(d) Climbers and trekkers tend to disturb the wildlife of the area through which they pass.

(G) **Heavy Construction:** Ironically heavy constructions in the fragile parts of the state have led to many environmental problems. Heavy construction causes damages in the following ways–

- During blasting operations, more area that has been actually planned may be weakened by the explosion.
- Blasting may lead to the reactivization of geological faults which in turn may cause landslides and rock slides, thus endangering human life and property.
- The debris released during heavy construction causes loss to vegetative cover, young generation, local water level and human settlements.

All the above mentioned factors have led to the decrease in the forest cover of the state, and resulted into:

Accelerated erosion: In areas devoid of a vegetative cover, the rain drops fall directly on the forest floor. *Splash erosion* is caused by the Kinetic energy of the rain drops. The rain drops combine to form small channels which in turn give way to finger like features known as *rills.* Over a period of time, rills enlarge to form *gullies.* If the problem of gully formation is not

checked, it leads to the formation of a *network* of *gullies or ravines.* The soil is bound together by the roots with its network of countless root hair. In the absence of this, the topsoil is quickly washed away by the rain water. Huge quantities of unprotected soil give way to the force of the falling rain water and soil slumping results. Very often this acts as a catalyst in the formation of landslides. Forests in subalpine and alpine tracts also provide protection against *soil erosion.* They reduce damage from avalanches. The thick layer of humus on the topsoil provides a cushion against erosion by snowmelt water.

On the other hand in the absence of a proper vegetative cover, accelerated erosion plays havoc. Very soon no top soil is left on the mountain slopes. Debris brought down from the uplands is deposited over cultivated fields, houses, roads, bridges and canals. Increased situation leads to a reduction in the life of river valley projects.

Changes in local climate and vegetation: Large tracts which were once covered with dense forests are now scrub lands due to heavy biotic pressure. Local climatic changes are also being brought about by the degradation of forests. The bare rocky slopes heat up to surrounding atmosphere by acting as a mirror, whereas dense vegetation acts as an absorbent. Trees also break the force of the prevailing winds.

Moisture regime: There is a fall in the local water table due to denudation of the forest cover. Vegetation aids the rain water to seep into the soil thus helping in its storage as underground water. The ability of the soil to absorb water depends on its permeability which in turn is maintained by the roots, leaf, litter and humus.

Flash Floods: A mountain slope devoid of a vegetative cover or with a poorly stocked forest cover is unable to quickly absorb the thousands of cubic meters of rain water that may pour down from the sky during the span of a few hours in the monsoon season. This unabsorbed rain water reaches the nearby rivers and streams whose channels are not deep enough to accommodate this vast volume of water. Thus, it spills over the banks and floods the adjoining areas. Flash flood cause severe erosion and destroy valuable agricultural lands, roads, bridges, canals and even human settlements.

Slope stability: Stability of slopes is aided by the roots of trees, shrubs and herbs which help to hold the soil together. This is mainly true on very steep slopes. In the case of all major landslides in the state, the loss of vegetative cover has contributed to the failure of slopes.

Leaching: Surface runoff is responsible for the leaching away of important nutrients from the soil. It washes away the clayey components of the soil leaving the residual coarse and unproductive soil behind. The forest soil is rich in organic matter due to a thick layer of humus over the topsoil. Huge torrents leach away this important constituent. However, if this water were to seep into the soil it would carry important nutrients from the top soil to the layers below, thus enriching it.

Soil formation: Disintegration of the country rocks is caused by the roots of trees, shrubs and herbs. They further contribute to the process of soil formation. As the roots grow downwards they penetrate into the small cracks and fissures in the country rocks, thus paving the way for water to form soil. In fact the soils of the state have evolved over a period of million of years aided by the action of roots. This process of soil formation is adversely affected in the absence of roots.

To reduce biotic pressure on forests and increasing green belt area in Himachal Pradesh, the government ought to take immediate steps by enacting stern laws for the protection of vegetation. While constructing roads, dams, cannals, hotels, laying down railway track and promoting trekking and mountaineering, the very survival of human race in the hills should not be put on stake. To ensure pollution free atmosphere, government must give second thought to its policy of setting up cement plant in the state. There is immediate need to curtail implementation of unmindful decisions meant for generating short term employment and causing havoc to environment. The unending quarrying has resulted in the heavy siltaion and danger to multipurpose dams projects.

FOREST FIRES

Excessive reliance of the Forest Department on pine trees in the past few decades in the mid-Himalayan region of the state has become a major source of forest fires. The department had been planting pine trees in forest areas in the past few decades due to the better survival rate of the tree. Today pine forests comprise about 20 percent of the total forest area of Dharamshala circle. Pine trees occupy 27,910 hectares in Dharamshala circle of the Forest Department. The pine forests have created problems for farmers as well as the Forest Department. Pine trees have an allelopathic impact. Allelopathy is a biological phenomenon by which pine trees produce bio-chemicals that do not allow any kind of vegetation growth in the surroundings. There is hardly any undergrowth of grass in the pine forests. Besides, there is generally a heavy deposition of dried pine needles under the trees. These needles are highly inflammable and easily catch fire, especially during summers when the temperatures are high.

Farmers generally set fire in pine forests with the hope that in the forthcoming monsoon, there would be a good growth of grass that can be used as fodder for animals. The possible solution to prevent fire in pine forests is the removal of dried pine needles from the undergrowth. Dried pine needles have a high combustible value. Technology is available for converting dried pine needles into combustible bricks. Already pine needles are being used in kilns in cement plants in Solan district. However, the use is limited and a low percentage of bio-waste generated by pine trees is being used in the state. In case the government made it mandatory for brick-kiln owners and cement plants to use certain portion of pine needle fuel in their kilns, it would generate

the demand for bio-waste of pine trees. The government should ban future plantations of pine trees in the mid-Himalayan region. With this, the percentage of pine forests can be reduced over a period of time. The growth of lantana was also responsible for fires in forest areas. In Dharamshala circle, lantana had spread across 35,000 hectares.

The World Bank in 2013, funded Rs 560 crore under the carbon credit plan for the environment conservation of the greenery and scenery in Himachal Pradesh. The plan for the disposal of solid waste management in the municipal areas in the state was under consideration. The waste would be used for generating energy and gas to meet the requirement of electricity and cooking gas, adding that in the first phase, four such units would be set up at different locations of the state.

The State Government has launched a number of schemes to increase the forest cover in the state. Some of these are -

Eradication of Weeds: As per survey conducted by the Forest Department, 185000 hectares of the forest land has been found to be infested with exotic weeds like Lantana in the Shiwaliks. The productive status of the land has decreased due to the invasion of these weeds. Treatment of this area is essential to restore the productive status of these lands. Presently, the areas infested with these weeds are treated under CAMPA and partially under MNREGA scheme funds.

Fire Management: The fire incidence is a regular feature in the Chil pine areas of the State. Normally, the local people set their *ghasnies* on fire for better production of grass. Incidentally, the fire moves to the nearby forests and becomes uncontrolled. The people are not aware about the hazardous effects of the fire on flora and fauna. The department has, although, been implementing the intensification of the forest management scheme (CSS) for fire management but the desired outputs are far from being satisfactory. It has been recommended that people's participation in the fire management need to be ensured and enhanced. The new technologies like briquette manufacturing of chil needles, monetary incentives need to be introduced for the Panchayats / JFMCs to reduce fire incidences in their area.

Pasture and Grazing Land Improvement: The pasture and grazing lands of Himachal Pradesh, considered as one of the most productive ecosystems, are a source of livelihood for a large number of people. However, uncontrolled cattle, sheep, goat grazing is on the pasture lands in high altitudes has resulted in degradation of grazing lands and pasture lands beyond recovery by natural means.

Soil Conservation: Under soil conservation scheme, planting is done in degraded areas which are prone to soil erosion. Planting with legumes and grass species will help in ecorestoration of such areas. 1100 plants per ha. are planted in this scheme and the species selected are multipurpose native species. The soil and moisture conservation works like gully plugs, check dams,

contour trenches, retaining walls, etc., are proposed to be taken up in place of normal plantation activities under soil conservation scheme.

Regeneration of Chilgoza Pine: Chilgoza trees botanically known as *Pinus gerardiana* is known to occur in the Western Himalayas especially in the upper valleys of Ravi, Satluj and Chenab rivers. Chilgoza nuts have very high nutritional value. *They contain highest amount of proteins, found in any nut.* They are the only source of penoleic acid. They also contain high concentration of oleic acid, antioxidants, calcium and iron. However, chilgoza trees are in need of protection. In Himachal Pradesh, State Forest Department is trying artificial regeneration of Chilgoza pine in many places. A new scheme for regeneration of Chilgoza was started during 1987-88, initially under a 100% centrally sponsored scheme. Later on, under State Plan also, the scheme has continued with an aim of developing Chilgoza Pine nursery and subsequent planting in the field.

Sanjhi Van Yojna: Sanjhi Van Yojna, a community based scheme in natural resource management has been introduced in the State of Himachal Pradesh during 1998-99. It aims at empowering people and the communities in accepting greater role and responsibility in management of natural resources in general and forests in particular. The scheme would have long term implications in improving planning and management skills of the communities and ensure equitable and sustainable use of natural resources especially forest produce.

The scheme aims at;

i) involving grass root level institutions like; Gram Panchayats, Mahila & Yuvak Mandals, VDDs, NGOs etc. in eco-restoration.

ii) regeneration of degraded forest areas through community participation.

iii) creation of social assets for the benefit of communities and providing employment opportunity in rural areas.

iv) making availability of better planting material through modern nursery techniques.

v) reorientation of forest staff for facilitating community participation.

vi) to bring more area under tree cover by encouraging plantations in private waste lands on cost-benefit sharing basis.

To begin with 364 Village Forest Development Societies (VFDS) and 153 Village Forest Development Committees (VFDC) were brought under this scheme.

Sanjha Van-Sanjivani Van: With an aim of making Himachal Pradesh a *'Herbal State'* this scheme was introduced during 2009-10, Medicinal plants are being raised and planted in high concentration with the involvement of Joint Forest Management Committees (JFMCs). Initially as many as 525 JFMCs were brought under this scheme. The campaign will be carried to cover

2500 hectares by planting one crore herbal plants in association with 525 JFMCs. This community driven programme will not only help Himachal in becoming a herbal State but would also increase the income of the people. Species like Chilgoza, Kuth, Dioscoria, Dhoop, Aloe-vera, Picrorrhiza, Valeriana, Ephedra etc. are promoted along with other medicinal plants.

Pipal-Bargad Plantation: The State initiated Pipal-Bargad plantation programme in some identified villages as part of awareness generation campaign regarding socioeconomic importance of Pipal and Bargad trees through involvement of village committees, especially the elders. As many as 8536 Pipal and Bargad trees in 3057 identified villages had been planted uptill 2011.

Apna Van Apna Dhan: The scheme envisages providing plants free of cost to the private land owners to encourage them to bring their fallow lands under tree cover. The plants shall be given by the Forest Department from the nearest forest nurseries. Each land owner can get 1000 plants free of cost every year by placing indent of choice of plants from nearest Forest Office.

National Bamboo Mission: The National Bamboo Mission (NBM) is a 100% centrally sponsored scheme. In Himachal Pradesh, National Bamboo Mission (NBM) is in operation since 2007-08. Following activities are being taken up under this mission:

a) Raising of improved varieties of Bamboo plantations;
b) Raising of good quality planting material;
c) Encourage private nursery;
d) Training of farmers and field functionaries;
e) Pest and disease management;
f) Conducting workshops to create awareness.

Himachal Pradesh State Forest Corporation Limited

An undertaking of the Himachal Pradesh Government came into existence on 25th of March 1974. This corporation deals with the Marketing of mainly Timber, Fuel wood, pulpwood, bamboo, khair, rosin, turpentine oil, subsidiary products (viz. phenyl, varnish, black japan). In addition, a Fiber Board Factory at Baijnath is presently engaged in the joinery works, timber chemical treatment and timber seasoning for Government as well as private timber.

H.P. State Pollution Control Board

The H.P. State Pollution Control Board was set up in 1974 is a nodal agency in the administrative structure of the State Government, for the planning, promotion, coordination and overseeing the implementation of environmental programmes.

It was in the last quarter of the 20th century that the foundation of the current direction on Environment Protection was laid and a legislative base initially formed at the national level to protect the environment from the adverse impacts of rapidly expanding industrial society. The legislative and

technological Head Office bases have substantially expanded in the subsequent period primarily necessitated by the agglomeration and magnification of the problems resultant to the development for outpacing the capabilities to resolve them.

A beginning made in the mid-seventies encompassing and integrating environmental concerns in a comprehensive national policy proved quite useful with a tangible degree of success in the subsequent years with highly manifest forms of environmental pollution and other significant concerns of immediate nature. This prompted constant policy and legislative reviews and making suitable amendments wherever necessary to protect the nation from the lurking threat of environmental degradation. Over these years a continuous effort has been made by the Board to expand its activities to fulfil the demands of emerging ecological concerns, challenges and new statutes. The principal activities undertaken by H.P. State Pollution Control Board consist of prevention and control of pollution, protection of environment, in the framework of following legislations:

Water (Prevention and Control of Pollution) Act, 1974: The Parliament in the 25th year of the Republic promulgated this legislation in pursuance to Clause-1 of Article 252 of the Constitution of India, with the objective of prevention and control of water pollution and maintenance and restoration of wholesomeness of water. The H.P. State Pollution Control Board was constituted in 1974 under the provisions of this Act.

Water (Prevention & Control of Pollution) Cess Act, 1977: This Act provides for levy of cess on the water consumed for specific purposes with a view to dissuade wasteful and indiscreet use of water.

Air (Prevention & Control of Pollution) Act, 1981: On the analogy of the Water (Prevention & Control of Pollution) Act, 1974 the Union Government promulgated another identical legislation which was exclusively meant to deal with the problems of air quality and preservation and maintenance thereof.

Environment (Protection) Act, 1986: In order to provide the existing legislation for control of water and air pollution more effectively and to remove the deficiency of these legislation, the Union Government enacted another umbrella legislation in 37th Year of Republic. The prime objective of the legislation was to plug the existing statutory gaps whereby tremendous responsibilities by way of functions have been entrusted to the State Board. The following prominent rules and notifications are significant in context to the role and functions of the H.P. State Pollution Control Board:-

- Manufacture, Storage and Import of Hazardous Chemical Rules, 1989.
- The Hazardous Waste (Management & Handling) Rules, 1989/2000
- Rules for Manufacture, Use, Import, Export and Storage of Hazardous Microorganism, Genetically Engineered Organisms or Cells, 1989.
- Noise Pollution (Control and Regulation) Rules, 1999.

- Biomedical Wastes (Management & Handling) Rules, 1998.
- Recycled Plastics Manufacture and Usage Rules, 1999/2003.
- Municipal Solid Wastes (Management & Handling) Rules, 2000.
- Ozone Depleting Substances (Regulation & Control) Rules, 2000.

Batteries (Management & Handling) Rules, 2000.

The state pollution control board has been quite active to ensure pollution free atmosphere in the state, that is why there is complete ban on plastic bags in the state.

On 10th August 2007, the State Government changed its state bird and animal. Earlier musk deer was state animal and now it is Snow Leopard, state bird was Monal and now it is Jajurana. It was for the first time that Pink Rodo was announced state flower.

The department of forest as lost its valuable land 2506.724 hectare for the construction of hydel power projects, roads, dams, railway line and water channels. In the process 69379 trees were cut and 280 were damaged (upto March 2014). To improve the quality of environment, on 23rd January 2014, the state government has put complete ban on the cutting of peeple (Ficus religiosa or sacred fig) and bargad (Banyan) tree.

Forest Ranjer College Sunder Nagar: The forest Training Institute Sundernagar was upgraded as Forest and Ranjer College by union Forest and Environment Ministry on 30th April 2012. Now forest officers of Punjab, Haryana, Himachal, Jammu and Kashmir, Delhi and Rajasthan are having training from this college. This is the fifth such college in India, the other four are-Haldwani in Uttrakhand, Chanderpur in Maharashtra, Balaghat in Madhya Pradesh and Karsyoung in West Bengal.

SERICULTURE

The reduction of rural poverty continues to be a paramount goal of the developing countries like India as the majority of the poor population still resides in the countryside. The World Bank, for example, estimates that more than 70 % of the world's poor live in rural areas. So far, various strategies have been pursued to address this concern and among the major ones is rural employment creation. The agriculture sector, however, has been contending with a number of factors that have limited its potential for generating new jobs in rural areas. Those factors may include the small land holding size, insufficient capital and investment incentives, the inadequate farm infrastructure, limited market and stagnant prices of agricultural products.

It is therefore necessary to focus on a broader spectrum of the rural economy. The establishment of rural based industries like sericulture, in particular, can be very effective in creating new job opportunities and providing supplemental income. Being a rural agro-based labour intensive industry this sector can also play vibrant role in checking migration from rural to urban areas.

Sericulture is both an art and science of raising silkworms for silk production. Silk as a weavable fiber was first discovered by the Chinese empress Xi Ling Shi during 2,640 B.C. and its culture and weaving was a guarded secret for more than 2,500 years by the Chinese. Silk was a profitable trade commodity in China. Traders from ancient Persia (now, Iran) used to bring richly coloured and fine textured silks from Chinese merchants through hazardous routes interspersed with dangerous mountainous terrains, difficult passes, dry deserts and thick forests. Though, commodities like amber, glass, spices and tea were also traded along with silk which indeed rapidly became one of the principal elements of the Chinese economy and hence, the trade route got the name 'SILK ROUTE'. Even today, silk reigns supreme as an object of desire and fabric of high fashion. Being a rural based industry, the production and weaving of silk are largely carried out by relatively poor sections of the society and this aspect of sericulture has made it popular and sustainable in countries like China and India.

Sericulture, or silk farming, is the rearing of silkworms for the production of silk. Although there are several commercial species of silkworms, Bombyx mori is the most widely used and intensively studied silkworm. According to Confucian texts, the discovery of silk production B. mori dates back to about 2700 BC, although archaeological records point to silk cultivation as early as the Yangshao period (5000 – 3000 BC). By about the first half of the 1st century CE it had reached ancient Khotan, and by CE 140 the practice had been established in India. Later it was introduced to Europe, the Mediterranean and other Asiatic countries. Sericulture has become one of the most important cottage industries in a number of countries like China, Japan, India, Korea, Brazil, Russia, Italy and France. Today, China and India are the two main producers, together manufacturing more than 60% of the world production each year.

Sericulture Industry in India

If fashion is a fine art, then silk is its biggest canvas, and if silk is the canvas, then all its weavers, dyers, designers, embroiderers are the greatest artists. Indian silk has enthralled fashion watchers and all categories of consumers across the world with its vast repertoire of motifs, techniques and brilliant hues. India's traditional and culture bound domestic market and an amazing diversity of silk garments that reflect 'geographic specificity' has helped the country to achieve a leading position in silk industry.

India is the second largest producer of raw silk after China and the biggest consumer of raw silk and silk fabrics. An analysis of trends in international silk production suggests that sericulture has better prospects for growth in the developing countries rather than in the advanced countries. Silk production in temperate countries like Japan, South Korea, Russia etc., is declining steadily not only because of the high cost of labour and heavy industrialization in these countries, but also due to climatic restrictions imposed on mulberry leaf availability that allows only two cocoon crops per

annum. Thus, India has a distinct advantage of practising sericulture all through the year, yielding a stream of about 4 – 6 crops as a result of its tropical climate.

In India, sericulture is not only a tradition but also a living culture. It is a farm-based, labour intensive and commercially attractive economic activity falling under the cottage and small-scale sector. It particularly suits rural-based farmers, entrepreneurs and artisans, as it requires low investment but, with potential for relatively higher returns. It provides income and employment to the rural poor especially farmers with small landholdings and the marginalized and weaker sections of the society.

Types of silks in India: India is a home to a vast variety of silk secreting fauna which also includes an amazing diversity of silk moths. This has enabled India to achieve the unique distinction of being a producer of all the five commercially traded varieties of natural silks namely, *Mulberry, Tropical Tasar, Oak Tasar, Eri* and *Muga*. Silk obtained from sources other than mulberry are generally termed as *non-mulberry* or *Vanya silks*. The bulk of the commercial silk produced in the world is mulberry silk that comes from the domesticated silkworm, Bombyx mori L. which feeds solely on the leaves of the mulberry (Morus sp.) plant. *Tasar silk* is copperish in colour, coarse in nature and is mainly used for furnishing an interiors and secreted by the Tropical Tasar silkworm, Antheraea mylitta which thrives on Asan and Arjun (Terminalia sp.). Rearing is done on naturally growing trees in the forests and is the mainstay for many tribal communities in the states of Jharkhand, Chhattisgarh, Orissa, Maharashtra, West Bengal and Andhra Pradesh. Oak Tasar is a finer variety of Tasar produced by the temperate Tasar silkworm, Antheraea proylei which feeds on natural oak plants (Quercus sp.) and is found in abundance in the sub-Himalayan belt. *Eri silk* is a silk spun from open-ended cocoons and secreted by the domesticated silkworm, Samia cynthia ricini that feeds mainly on castor leaves. *Muga silk* is golden yellow in colour and an exclusive produce of India, primarily the state of Assam where it is the preferred attire during festivities. Muga silk is secreted by Antheraea assama that feeds on aromatic leaves of naturally growing Som (Persia bombycina) and Sualu (Litsea polyantha) plants.

Trends in Indian Sericulture: Over the last decades after independence Indian silk industry has registered an impressive growth, both horizontally and vertically. Plans and schemes implemented by central and state agencies and relentless efforts of thousands of dedicated persons in the fields of research and extension have helped in this context. For instance, the age old multivoltine hybrids have been replaced by multivoltine × bivoltine and bivoltine hybrids. The sericulture industry has witnessed a quantum jump in raw silk productivity. The average yield of 25 kg of cocoons/100 dfl in the recent past has increased and currently the average yields are in the range of 60 – 65 kg/100 dfl. The new technology, besides doubling yields has also led to qualitative improvements in cocoon production with considerably reduced

renditta and has also helped break the climate barrier.

Production: Silkworm larvae are fed by mulberry leaves, and, after the fourth moult, climb a twig placed near them and spin their silken cocoons. This process is achieved by the worm through a dense fluid secreted from its structural glands, resulting in the fibre of the cocoon. The silk is a continuous-filament fiber consisting of fibroin protein, secreted from two salivary glands in the head of each larva, and a gum called sericin, which cements the two filaments together. The sericin is removed by placing the cocoons in hot water, which frees the silk filaments and readies them for reeling. This is known as the degumming process. The immersion in hot water also kills the silkworm pupae.

Single filaments are combined to form thread. This thread is drawn under tension through several guides and wound onto reels. The threads may be plied together to form yarn. After drying, the raw silk is packed according to quality.

The stages of production are as follows:

The silk moth lays thousands of eggs. The silk moth eggs hatch, and the larvae feed on the mulberry leaves.

First, it weaves a net to hold itself.

Next, it swings its head from side to side in the way of the number '8'.

The silk solidifies when it comes in contact with the air.

The silkworm spins approximately 1 mile of filament and completely encloses itself in a cocoon in about two or three days but due to quality restrictions, the amount of usable silk in each cocoon is small. As a result, 5500 silkworms are required to produce 1 kg of silk.

The silk is obtained from the undamaged cocoons by brushing the cocoon to find the outside end of the filament.

The silk filaments are then wound on a reel. One cocoon contains approximately 1,000 yards of silk filament. The silk at this stage is known as raw silk. One thread consists of up to 48 individual silk filaments.

As the process of harvesting the silk from the cocoon kills the larvae, sericulture has been criticized by animal welfare and rights activists. Mahatma Gandhi was critical of silk production based on the Ahimsa philosophy *"not to hurt any living thing"*. This led to Gandhi's promotion of cotton spinning machines, an example of which can be seen at the Gandhi Institute. He also promoted Ahimsa silk, wild silk made from the cocoons of wild and semi-wild silk moths. Ahimsa silk is promoted in parts of Southern India for those who prefer not to wear silk produced by killing silkworms. Ahimsa silk is also known as *peace silk*. In the early 21st century the organisation PETA has campaigned against silk.

The market share of Indian silk exports in the global silk trade is 4 – 5 % which is not significant considering the fact that India is the second largest

producer of raw silk. This is because India has a large domestic market for silk goods and about 85 % of silk goods produced are sold in the domestic market. However, India exports approximately 15 % of its output of all types of silk goods (including value-added items). The export of Indian silk products consists of finished goods like fabrics, made-ups, ready-made garments and furnishing materials like curtains, carpets, bed spreads, cushion covers etc.

This is one of the important cottage industries of Himachal Pardesh, which provides subsidiary employment to farmers for supplementing their income by rearing silkworms and selling cocoons produced by them. For the intensive development of Sericulture, the new scheme of Social Forestry for mulberry plantation and payment of bonus to silk worm rearers has been implemented. Till 1999 it was providing whole time or part time employment to nearly 700 families all over the state. In 1998-99, 1.20 lakh kg. cocoons valuing Rs. 300.00 lakh were produced. District Kangra is pioneer in the field of sericulture Nine silk yarn reeling units have been setup in the private sector, i.e. three each in district Kangra and Bilaspur one each in Mandi, Una and Hamirpur.

In the year 2002-03, the production of silk was 1.45 lakh kg valuing Rs. 450 lakh. The period from 2004 to 2012 was very productive and remunerative from the point of view of sericulture farmers. In 2006-07 the production reached at 2.9 lakh kg and its market value was 560 lakh; in 2009-10, the production was 3.2 lakh kg and value Rs. 680 lakh and by the end of 2012-13 the production touched all time high 3.60 lakh kg and value Rs. 745 lakh. There is continuous efforts on the part of state government to promote sericulture as much as possible, because on the one side it generates employment and on the other tree cover also increases with the plantation of mulbree trees. By 31st March 2014, 9200 rural families were having gainful employment by producing silk cocoons.

The Himachal Pradesh Khadi and Village Industries Board is engaged mainly in development and promotion of village industries and development of Khadi industries. The Board is guided by the pattern laid down by the All India Khadi and Village Industries Commission. The Board helps the rural artisans and carries out schemes for the economic upliftment of the scheduled castes, tribal people, backward classes and poor people in general. The whole of Himachal Pardesh has been declared industrially backward.

The rate of capital investment subsidy has been raised from 15 percent to 25 percent with maximum amount of Rs. 25 lakh. Only for electronic industries the maximum limit of capital subsidy was Rs. 50 lakh. Industrialisation as an economic development has acquired a great relevance in the context of Himachal Pradesh over the last one and a half decades. The contribution of Industrial sector to the Gross Domestic Product of the state has over the years risen from a merely negligible to the present day level of almost 9 percent and is still poised for further growth. Like wise utilisation of power by the industrial sector has now risen to about 60 per cent of the total connected power load.

Science, Technology and Sericulture

Science and technology is used as an effective instrument of growth and change. It is being brought into the mainstream of economic planning in the sectors of agriculture, industry and services. The country's resources are used to derive the maximum output for the benefit of society and improvement in the quality of life. About 85 % of the funds for Science and Technology come directly or indirectly from the Government. Central Silk Board (CSB), Bangalore under the Ministry of Textiles, Govt. of India is the apex body for overall development of sericulture and silk industry in India. The functions assigned to the Board are to promote development of the silk industry by all appropriate measures like undertaking, assisting and encouraging scientific, technological and economic research, improvement of mulberry cultivation, production and distribution of healthy silkworm seed, production of quality raw silk and promotion of silk market etc.

In addition, the board is responsible for advising and reporting to the Govt. of India on all matters relating to the development of the raw silk industry, including the import and export of raw silk. Indian sericulture is not only vast, widely dispersed but also multidisciplinary in nature involving silkworm seed sector, cocoon sector (cultivation of food plants and silkworm rearing) and post cocoon sector (silk reeling, spinning, twisting, processing and weaving). Therefore, Central Silk Board, is coordinating and implementing collaborative research activities in association with National level Research and Development Institutions, State Sericulture Research and Development Institutes, Universities, Department of Science and Technology, Department of Biotechnology, CSIR/ICAR/IARI/IITs/IIMs and other Private and International Research and Development Institutions to promote applied research and development of appropriate technology towards attaining higher quality and productivity levels of Indian silk.

The State Council for Science, Technology and Environment

The State Council for Science, Technology and Environment, Himachal Pradesh, is the nodal agency for the promotion of science and technology and creation of environment awareness in the state. The council was established at Shimla on 3rd January, 1986 under the countrywide programme of the Department of Science and Technology, government of India to promote science and technology in the states.

Objectives

1. To advise the state government on science, technology and environment issues and interventions.

2. To develop, demonstrate and transfer appropriate technologies for hill regions.

3. To exchange scientific knowledge with national and international scientific institutions / organizations.

4. To promote, popularize and disseminate scientific and technological innovations.

5. To create and strengthen science and technology facilities in the state.

6. To promote research and development (R&D) studies relevant to state needs.

7. To establish linkages with universities and R&D institutions.

8. To provide consultancy services in successfully demonstrated / developed technologies.

The core funding to the council is provided by the Government of Himachal Pradesh, department of science and technology, ministry of science and technology, government of India.

Functions

I. Science Promotion, Popularization and Communication

(i) Children science congress
(ii) Patent information centre for patent awareness
(iii) Popularization of science through NGOs
(iv) Science communication programmes
(v) Local radio popularization for disaster management
(vi) Science days celebration

II. Appropriate Technology Dissemination

(i) Implementation of solar passive housing technology for Himachal
(ii) Low cost green house technology propagation
(iii) Appropriate technologies research, development and promotion centre.
(iv) Training of artisans for income generation
(v) Building centres
(vi) National research and technology consortium
(vii) Rooftop rain water harvesting technology
(viii) Hand pump technology for hills
(ix) Propagation of tissue culture techniques
(x) Use of biofertilizers
(xi) Use of pine-needles and lantana as a fuel

Himachal Pradesh State Forest Development Corporation Ltd.

Himachal Pradesh State Forest Development Corporation Limited, an undertaking of the Himachal Pradesh government came into existence on 25th March, 1974. This corporation deals with the marketing of mainly timber fuel wood, pulpwood, bamboo, khair, resin, turpentine oil, subsidiary products (namely, phenyl, varnish, black japan and so on).

Timber Extraction and its Sale : As per the policy of the government timber extraction works were transferred to the corporation in a phased manner and the corporation took over the complete working of the government forests from w.e.f. 25th January, 1983. The corporation has been working for only

salvaging lots comprising of dry, diseased, uprooted and damaged trees, handed over to it by the HP Forest Department for working. On an average, approximate three lakh cubic meter standing volume is being felled and converted every year by the corporation, which is sold in auction through sale depots and also supplied to the government departments, non-right-holders, small-scale industries and so on.

The work of felling and conversion of timber is done by professionally trained labour and its carriage to roadside depots is done either by manual labour or by ropeways and in some cases, where possible, through waterways. All these works are done through labour supply mates under the direct supervision of the corporation staff. The corporation has five sale depots at *Nurpur, Mantaruwala, Parwanoo, Bhadroya* and *Dhanotu* from where the government timber and timber from private lots is sold through auction. The corporation is also working the khair trees from government lots as well as selling other miscellaneous forest produce like pulpwood and fuel wood.

Nationalization of Private Timber : The Himachal government promulgated Himachal Pradesh Forest Produce (Regulation of Trade) Act, 1982 whereby even forest produce standing on private land has to be sold only through the corporation. In pursuance there of annually, about 8,000 cubic meter timber standing volume belonging to private owners is handled by the forest corporation.

Retail Fuel wood Depot : The corporation is running about 61 timber/ fuel wood depots in non-tribal areas spread throughout the state in various towns, townships and important villages for meeting the requirement of the timber, fuel wood and charcoal of non-right-holders. This has resulted in minimizing the malpractices and irregularities in the purchase of timber and fuel wood. The requirement of fuel wood in tribal areas is met with by the corporation by supplying fuel wood to the depots being maintained in tribal areas by the Himachal Pradesh Forest Department. The timber requirement of the government departments is also met with by this corporation by supplying timber from road side depots and from sale depots at rates fixed from time to time.

Ecology, and Hydro -Power: The hydropower and industry sector have been identified as the two main pressure points in Himachal's development journey, which could have an adverse impact on the degrading fragile mountain ecology if timely steps are not taken to ensure sustainable growth with checks and balances. The Environment Master Plan (EMP), prepared by the Department of Environment and Scientific Technology and approved by the government, has identified the vulnerable areas of the state where future planning will have to be done with utmost care. The EMP has been adopted to mainstream environmental concerns into the state's development planning in sectors of economy for the next 30 years.

The EMP has not just identified the pressure areas but also the vulnerability index has been worked out, which basically indicates the population pressure

on the natural environment which determines the quality of life. While the five districts of Mandi, Bilaspur, Shimla, Sirmaur and Hamirpur have been identified as highly vulnerable, the most susceptible tehsils of the state include Mandi, Bilaspur Sadar, Paonta Sahib, Shimla (rural) and Sujanpur Tira.

The recommendations made in the EMP stress on preparation of river basin plans, which determine the carrying capacity of the basin and also include the mapping of catchments. *"River basin plans should specifically focus on determination of flow of rivers which will help in determining ecological flow versus available flow"*. It has also been recommended that a state-level interdisciplinary committee on hydropower be constituted with eminent experts like basin planners, hydrologists, environmentalists, ecologists and socioeconomic experts. This committee could not just coordinate with the Ministry of Forest and Environment but also suggest sustainable hydropower development solutions.

"Sectoral approach to EMP has been adopted in mainstream environmental concerns in the state's development planning in sectors of the economy for the next 30 years". Three sectors of *Infrastructure, Natural Resources Management and Services* have been identified for preparation of EMP. The EMP has been prepared in order to ensure the sustainability of environmental heritage and natural resources of the state and to develop a long-term perspective of achieving environmentally sustainable development. As per the EMP, industry is another sector which, in certain areas, is putting pressure on natural resources like rivers, flora and fauna. *"There is need to mitigate the impact on rivers, flora and fauna and the resulting changes in livelihood because of multipurpose river valley projects, power plants and industries"*. Farmers have something to harvest every three or four months, unlike apple and other fruit crops which have annual bearing of fruit. With a large number of farmers setting poly houses to grow vegetables, the dependence on weather is also decreasing. The planning of Industry and mining should be in such a way that no loss should occur to the ecology. The concept of area friendly industry should be implemented for greater benefits.

HYDRO POWER

Nature has compensated hill states with vast hydropower potential *in lieu* of the sound agricultural system that is available in the plains. If Arabs have oil, Himalayan states in India have the hydropower wealth. Now, it entirely depends upon the ingenuity of the state concerned how expeditiously it mines/milks its treasure trove. Uttrakhand leads all other states in discovering its real wealth. Though by late it's now in the midst of a silent revolution for harnessing the total hydroelectric power potential by 2020 and may become the first hydropower state of India. The Himachal Pradesh Power Department with the help of the Himachal Pradesh State Electricity Board Corporation, has done a commendable job of identifying 120 power projects with a capacity 23,000 MW (50 per cent projects would be of 5 to 50 MW) across five river basins of the state. Ninety-five per cent projects are run-off-the river (RoR) type and are located across the rivers Satluj, Beas, Ravi, Chenab, Pabbar (a tributary of Yamuna) and their tributaries.

In a run-off-the river project, a weir/barrage is constructed across the river and the flow is diverted through a long straight RCC-lined tunnel at a slope gentler than that of the river, so that the end of the tunnel reaches a far higher elevation than the bed of the river. This level difference is utilised to lead the flow to the turbines of the power house to generate electricity. This system faces two inherent deficiencies. Firstly the river in Northern states carry very high discharge during the monsoon season and very low flows during the remaining nine months of the year. Accordingly the power house does not get full supply of water round the year and the installed capacity remains under-utilised for three quarters to bring the average capacity utilization to 45 per cent (It's 95 per cent in case of the Brahmaputra basin).

The power producer, therefore, stores the low flow for 18 hours at the barrage and runs the power plant for six hours per day during the peak demand hours. Secondly, in the absence of a storage dam, the silt in the flowing water during rainy season is not entrapped and quite often the concentration goes very high. Once it exceeds 5,000 PPM, the power house has to be closed to prevent damage to turbine blades/runners. Then, one day's closure of a 500 MW power plant causes a generation loss of 120 lakh units or a revenue loss of about Rs 5 crore during the monsoon.

In order to offset these two deficiencies, it is essential that one or two storage dams, e.g., the Khab projects across the Satluj River, are constructed in the upstream reaches of the river to entrap silt and store flood water during high flow season to be released later during the lean flow period of all downstream projects by at least 30 per cent. The storage dam also prevents floods particularly in the Satluj River, where these have been attributed to release of water from the Parchu Lake in China. However, the state has to

think wisely before embarking upon the construction of a storage dam these days, because it leads to the submergence of vast forest lands besides causing displacement of large number of families. Dislocation and rehabilitation of communities at locations near by or elsewhere is a herculean task.

Although the density of population and forest trees are minimum at higher altitudes, the perceived risks are highly exaggerated by vocal activists to serve their own selfish ends. In such a scenario, obtaining environment and forest clearances from the Ministry of Environment and Forests (MoEF) and other agencies has become a big challenge. Big projects like the Bhakra Dam were cleared in good old days and their approvals were not possible in the present times of social, environmental and political activism. But it is hoped that the state will go in for the construction of some storage dams for aforesaid purpose once all the RoR projects are complete and become operational.

On the positive side, RoR projects cause minimal disruptions in the local environmental and ecosystem and these two are easily mitigable. So RoR hydro projects are basically green (renewable energy) and their clearance should be made comparatively easier. On the other hand, these projects will earn lot of carbon credits in the international market being good substitutes for thermal power plants, which cause massive air pollutions and trigger climate changes besides depleting coal reserves for future generations. The compulsory implementation of the Catchment Area Treatment Plan will further convert the entire state into a single bio-reserve and promote eco-tourism

Out of 120 projects, at least 70 per cent had been allotted till 2013 and these are under different stages of execution. Remaining 30 per cent projects (with a combined capacity of about 5000 MW) maybe allotted with the passage of time. These projects have been initiated both by private and public sector players (SVJN, NTPC, NHPC, HPPCL, HPSEB) almost in equal proportion. Jai Prakash Associates started the trial run of its 1000 MW Karcham-Wangtoo project across the Satluj River. (The project cost the company Rs 7,920 crore or Rs 8 crore per MW). In 2014, the project was sold to gulf based company by J.P. Industries. As such by 2020. Himachal Pradesh will have an additional power generation of 17, 000 MW (7650 MW for 24x7 power generation) and earn good revenue.

Roadblocks: Certain roadblocks, however, have been delaying the execution of these projects and accordingly require the attention of both the Centre and the state, *Firstly,* since some of the projects are located at very faraway places in the Lahaul and Spiti region, the government should build two-three airport for 50- seater planes. In the absence of traffic tunnels, vehicles have to move three times the aerial distance along circuitous roads. Also, some of the important roads are badly damaged due to rains and need immediate repairs and resurfacing. The agencies concerned (State, BRO and NHAI) should start a massive programme of rebuilding the roads with cut off tunnels at important bends to reduce distances. All hydropower projects

sites should be made accessible with good bituminous roads before the start of the projects. For future prosperity of the state, the tunnel rail projects should be taken up urgently, because they will reduce the distances between important towns to one third. Then, Shimla will be only 35 km away from Kalka and an electric train will be able to take one there within an hour. Tunnel rails are urgently required here for defence purposes as well.

Secondly, the MoEF should further decentralize its power to the State Environment Authority (from current 50 MW to 200 MW) for granting clearance for quick financial closure of the projects, as all projects are of identical nature and format. Similarly, for forest clearance, the power of the regional offices of the MoEF needs to be enhanced from five to 50 hectares.

Thirdly, at many places, certain mischievous elements with ulterior motives misguide and mobilize the local people to oppose/stall the construction of projects on flimsy grounds. The state authorities need to deal such undesirable elements with a firm hands. The state also needs to launch a strong awareness campaign to familiarize people with the necessity of early execution of hydropower projects for the prosperity of the hill state. If the state disburses a fraction of the revenue earned from these projects directly to the affected families in the from of monthly pensions or shares, people may demand early allotment of power projects in their constituencies like they do for new roads and hospitals.

With these measures taken, the dream of commissioning 120 projects by 2020 can be fulfilled well in time and Himachal Pradesh will become another Switzerland in India. In fact, it is high time for the state of Punjab, Haryana, Rajasthan Uttar Pradesh to bag some of these projects through direct negotiations with the Himachal Pradesh government after fulfilling the royalty parameters. The hydropower potential of the state is likely to go up to 25,000 MW from the existing 23,000 MW after the completion of the exercise underway to prepare digitised basin-wise plans to help identify additional potential. So far projects with aggregate capacity of 7,728 MW have been commissioned and the plan is to exploit the entire potential by the end of the 14th Plan (2022).

The target for the 10th plan was 5027 MW, Ironically, only 467 MW, just 6 per cent of the total potential exploited, has been harnessed in the state sector, with most for the projects allotted to the private sector, even after exploiting, the total potential the state sector projects will account for just 17 per cent.

Considered a clean and green source of energy until recently, the hydroelectric projects are being vehemently opposed by local people and even environmentalists have been voicing their concern over the fallout of impounding of rivers and ruthless tunnelling of hills and large-scale deforestation and drying up of water sources. The environmental fallout apart, over exploitation of the hydropower potential will have long-term implications of the lives and livelihood of the local people, as the main rivers will virtually

disappear from the scene. If all planned projects on the Satluj river come up, the 230-km stretch from Khab to Koldam will mostly flow through tunnels. While the 1500 MW Nathpa Jhakri project has a 27.4 km-long head race tunnel, a much longer 38 km twin tunnel has been planned for the 775 MW Luhri project. The recently commissioned 1,000 MW Karcham-Wangtu Projects has a 17.2 km long tunnel, while the shortest tunnel of 12 km is for the 412 MW Rampur project which is virtually the second stage of the Nathpa-Jhakri project. Similarly, the five other proposed projects will have 18-to-25 km long tunnels ensuring that more than 170 km length of the river would disappear. The cascade of 450 small projects, coming up one over the other, will spell doom for the people whose life is hinged to small streams, as these cater to their needs for drinking water and irrigation and the village funeral ground are also located on their banks. They are not dependent on the main rivers as villages are mostly located in higher altitudes.

The projects are being executed in a totally unplanned manner and if all of them are allowed to come up, some streams like the *Neogli Khad* in Shimla will have eight projects and the *Chanju Nullah* in the ecologically fragile Chamba will have five projects. In contrast to countries like Sweden, 20 per cent of the hydropower potential has been left unexploited to protect the environment.

The impact of climate change is also likely to take its toll. The melting of glaciers, erratic and inadequate rain and snow, and the ever-declining discharge in rivers and their tributaries have put a big question mark over the future of hydroelectric projects. A judicious approach has to be adopted for sustainable development of hydropower and mitigate long-term impact on the life of the people.

Power provides the basic infrastructure for economic developmental; it is vital for agriculture and industry. There are various sources from which energy can be obtained viz., burning coal, oil, gas, wood waste and nuclear material. However the most vital source of energy, which man found, is the power of water when it falls from height. There are many advantages of hydropower. First and foremost is that hydro power is the cheapest of all the other sources of producing power. Earlier this hydro power has been utilised by man conservatively in the form of water mills for grinding maize, wheat and other food stuffs.

Power is one of the most important input for economic development. In addition to its widely recognized role as a catalyst to economic activity in different sectors of economy, the power sector makes a direct and significant contribution to economy in terms of revenue generation, employment opportunities and enhancing the quality of life.

Himachal Pradesh has been blessed with vast hydroelectric potential in its five river basins, namely Yamuna, Satluj, Beas, Ravi and Chenab. Through preliminary hydrological, topographical and geological investigations, it has been estimated that about 23,000 MW of hydel potential can be exploited in

the state by constructing various major, medium, small and mini/micro hydel projects on these five river basins. Out of this hydel potential only 8,432.47 MW was harnessed by various agencies which also includes 477.50 MW by H.P.S.E.B. Ltd. uptill 31st March 2014. The Basin- wise details of the assessed potential and the potential actualized are as under:-

Assessed Potential

Name of projects	Capacity (MW)
Yamuna	794
Satluj	10,226
Beas	5,721
Ravi	2,912
Chenab	3,037
Self Identified/New Identified	310
Total	23,000

The State Govt. has adopted multi pronged strategy for power development through State Sector, Central Sector, Joint Venture and Independent Power Producers. The detailed break up of the total identified potential of 23,000 MW is given as under:-

Table-1

Total identified hydro power potential (MW)

Sr. No.	Particulars	State Sector HPSEBL/ HPPCL (MW)	Central/ Joint Sector/HP Share (MW)	Private Sector Above 5MW	Private Sector Upto 5 MW (through HIMURJA)	Total (MW
1.	Projects Commissioned	478	5,903	1,829	222	8,432
2.	Under Execution/ Construction	966	2,532	765	179	4,442
3.	Under Implementation/ obtaining clearances	1,285	66	866	365	2,582
4.	Under Investigation	1,034	588	3,340	510	5,472
5.	Under Litigation/ dispute	-	-	1,007	-	1,007
6.	Abandoned schemes in view of environmental & social concerns	20	-	735	-	755
7.	To be allotted	-	-	310	-	310
	Total	3,783	9,089	8,852	1,276	23,000

In addition a large number of unidentified areas have still been left and also in view of the rising cost of thermal and nuclear generation, many identified projects which have been excluded from the above-mentioned hydel potential on account of nonsuitability due to high cost of generation, will become viable in future. On these two considerations, a conservative estimation of total hydel potential in Himachal Pradesh could well be put up at 32.000 MW or even more. Out of the total hydel potential of the State, only 3934 .74 MW (1998-99) had been harnessed out of it 299.37 MW was under the control of Himachal Pradesh Government as bulk of the potential was exploited by the Central Government and other agencies.

By the end of 2012-13 the state's share was 477.50 MW and other agencies such as central government, private, joint sector was 7954.97 MW, totalling 8432.47 MW.

The Present total estimated hydroelectric power potential in India is about 42 million KWH at 60 per cent load factor. In the Himalayas this potential is about 26 million KWH and in the Western Ghats it is 6 million KWH. Thus three fourths of the hydroelectric potential in India is in these mountain ranges. Himachal Pradesh abounds in substantial power from the upper reaches of Indus and the Ganges systems of perennial water through five major rivers i.e. Satluj, Beas, Ravi, Chenab and Yamuna along with their numerous tributaries.

The power development in Himachal Pradesh is in the infancy stage and, therefore, the scope of electricity consumption is unlimited. Consumption of electricity in Himachal Pradesh otherwise also needs to be accelerated to reduce the pressure on the forests as other sources of energy can't be made available in the far flung areas. The general impression that Himachal is surplus in power is misleading. Till 1998-99 the power shortage during winter was more than ten lakh units per day which increased steeply due to increased industrialisation and rural electrification in the state. The shortage of power during winter is due to less flow of water in rivers and at the same time lighting and heating load increase during the winter in the Pradesh. The hydro potential of Himachal Pradesh is put at around 20 percent of the total hydro potential of the entire country.

Industrial sector is the leading consumer of power. In the year 2010-11, domestic sector consumed 1282.0 million units, non domestic and non commercial 89.5, commercial 356.6, industrial 3993.7 million units, government, irrigation and WSS 409.9, streetlight 12.5, agriculture 35.1 and others 260.3 million units. There is all likely hood that with more commercial activities and upwards trend in living standard, domestic and commercial sectors will also have increasing consumption.

The analysis of generation of electricity has special significance in the present contest because Himachal happens to be one of the richest region in the country in hydel-power potential. In 1948 facility of power was almost nonexistent, except in a few princely state HQs such as Jubbal, Mandi and

Chamba. The only major hydroelectric power house then at Jogindernagar was generating about 10,000KWH of power.

TABLE -2

INSTALLED CAPACITY (MW) [1950-51–2012-13]

Year	Hydro Power
1950-51	2.000
1960-61	2.000
1965-66	2.719
1970-71	48.919
1980-81	126.520
1984-85	132.570
1986-87	133.820
1988-89	152.070
1991-92	272.070
1992-93	272.070
1993-94	272.100
1995-96	276.900
1996-97	299.400
1997-98	299.170
1998-99	299.170
2001-02	326.333
2004-05	329.083
2008-09	466.950
2012-13	477.50

Source: Himachal Pradesh State Electricity Board.

Till the year 1964, the electricity wing was part of the Public Works Department. It was only after the visit of Dr. K.H. Rao, that the idea exploring vast hydel power potential got fructified and consequently with the active interest of Himachal Pradesh government, the department of multipurpose projects and power was created for survey of power potential for carrying out other allied requirements for the final execution of such projects.

In 1996, at the time of merging the Punjab Hill areas with Himachal Pradesh, the Transmission and Distribution system located in the merged area was also transferred along with Bassi Project to Himachal Pradesh. In April 1971, Himachal Pradesh State Electricity Board was created which is vigorously engaged in the execution of various projects to achieve the objective of rapid agricultural, horticultural and industrial development of Himachal Pradesh.

Since seventies expansion and transmission work has been given top priority to ensure uninterrupted supply to the domestic, commercial and industrial consumers. The progress in the sector from 1947 to 1974 was not of much relevance. The per capita consumption of electricity in Himachal in 1984 works out about 0.99 KWH as compared to the all India figure of 17.8

KWH. Besides, in the years 1949 and 1959, only 2.5 and 8.3 percent of the total electricity generated in the state was utilised for industrial sector respectively. In 1950-51, 3.58 thousand KWH electricity was generated (power from other sources not included) and 9.97 lakh KWH consumed (per Capita consumption of 0.90 lakh KWH). In 1970-71 and 1975-76, these figures stood at 528.41 thousand KWH and 1822.42 thousand KWH generated and 1119.64 thousand KWH and 2205.43 thousand KWH consumed (32.36 KWH and 58.04 KWH per capita consumption respectively).

In 1983-84 and 1988-89, 5867.39 thousand KWH and 6988.29 thousand KWH electricity was generated, while 3,949.72 thousand KWH and 7952.2 thousand KWH electricity was consumed respectively. In 1991-92 1050.76 lakh KWH electricity was generated while 1020.19 lakh KWH was consumed (per capita consumption 198 KWH) while these figures for 1992-93 stood at 1087.90 lakh KWH generated and 1083.28 lakh KWH consumed. In 1993-94, 976.6 lakh KWH was generated and consumption arose to 1087.9 lakh KWH. In 1996-97 and 1997-98 the electricity generated was 1251.9 and 1306.0 lakh KWH respectively and consumption stood at 1757.1 lakh KWH in 1996-97 and 1946.5 lakh KWH in 1997-98. Comparatively other sectors, domestic sector has recorded a growth rate of 4.43 percent in the decade 1987-88 to 1997-98. All other sectors have recorded minus growth rate.

In 2004-05 the total energy available from all sources was 5596.551 million units and total energy sold within and outside the state was 4613.154 million units; in 2006-07 the available energy was 6495.407 million units and sold 5606.573 million units, in 2009-10 the available energy was 9362.474 million units and total energy sold 8144.848 million units. In 2012-13 the available energy from all sources was 9758.107 million units and energy sold to all categories of consumers inside and outside the state was 8537.661 million units.

TABLE - 3

THE FOLLOWING TABLE SHOWS POWER'S CONSUMER CLASS

Year	Category of Consumer (in million units)						
	Domestic	Commercial	Industrial	Public Lightin	Agricultural & Miscellaneous	Bulk	Total
	1	2	3	4	5	6	7
1978	50.0	23.9	40.9	1.9	5.5	80.2	202.4
1980	62.4	32.6	107.5	2.0	5.8	54.4	264.7
1983	92.5	45.5	207.0	2.2	12.0	35.8	395.0
1985	113.290	48.98	339.04	2.70	21.01	38.27	563.31
1989	197.57	73.57	530.93	3.56	25.76	65.70	897.10
1991	253.10	83.71	581.97	3.22	29.79	70.20	1022.01

Source: Brief Facts Himachal Pradesh DESHP - 1950-2013

As per the census 2001, there were 17495 inhabited villages out of that 17209 were electrified till 2011-12, shows the success percentage of 98.37. Out of 12 districts 7, Chamba, Bilaspur, Hamirpur, Kangra, Kullu, Sirmaur and Solan have achieved the 100 percent electrification target.

Under the State Reorganisation Act 1966, Himachal Pradesh was given assets and liabilities to the extent of 7.19 percent on that basis the share of our state from the total power generation should had been 7.19 percent, but Himachal Pradesh was given only 2.5 percent of power generated till 2013, whereas balance of 4.69 percent was being utilised by the 3 states of Punjab, Haryana and Rajasthan. Therefore under the Punjab reorganisation Act 1966, Himachal has to get more than one thousand crore rupees arrears since November 1966. Besides Himachal should get much more as royalty on the principle of 12 percent free power. Successive governments in Himachal Pradesh failed to realise their arrears from these state. If Himachal starts getting its due share from the above mentioned states, undoubtedly its financial problems would be over in no time.

Hydel power generation in Himachal Pradesh deserves priority not only to meet the increasing power demand within the State, but also to bridge the gap in demand-supply in the northern region as a whole. To match the increasing activities on construction of hydel projects, there is an immediate need to lay emphasis on adequate transportation and distribution network in order to evacuate power from these projects and its distribution for power utilisation within the State. Power in Himachal Pradesh is used for different purposes. The following table shows the progress achieved in the production of hydropower in the State:

Table-4

Potential Harnessed Under State/Centre/Joint/Private Sector and Himurja

To match the increasing activities on construction of hydel projects, there is an immediate need to lay emphasis on adequate transmission and distribution network in order to transmit power from these projects and its distribution for utilisation within the state.

Rural Electrification: Electrification of rural areas has great significance for Himachal Pradesh where as much as 91.3 percent of its population lives in villages. The State has made remarkable achievements in the field of rural electrification. In spite of the fact that Himachal was a late starter in the field of rural electrification and because of very difficult and mountainous terrain, it is a matter of satisfaction that all the inhabited villages of the State (census 1991) numbering 16,916 were provided electricity by the end of June 1988, while upto February 1980 only 8,780 villages had electricity. Thus about 52 percent villages had been supplied with electricity as against only 17.1 percent at the end of 1971-74.

The purpose of rural electrification is not only to light up every home in the Pradesh but also to supply power to agricultural pump sets, lift irrigations schemes, small scale and cottage industries for increasing agricultural production, meeting household needs like heating, cooking and creating more employment potential in rural areas. An important purpose is also to reduce pressure on forests by providing electricity as an alternative fuel for domestic needs and thus help in preservation the forests wealth. The conservation and the preservation of the forests shall prolong the life of water reservoirs for power generation and irrigation purposes. The Rural Electrification Corporation (REC) is the main source for financing the rural electrification schemes. The village situated at highest altitude in Kinnaur district, named 'Kibber' has also been electrified. The following are the power projects in Himachal Pradesh, either completed or under construction:

1. **Sanjay Vidyut Pariyojna** (Bhaba Project): This project has 120 MW installed capacity, comprising three units each of 40 MW, completed in 1989-90. It is located in *Kinnaur district.* Sanjay Vidyut Pariyojna is *completely an underground project* of the Pradesh. It's estimated cost was 167 crore rupees. It is located on the river Bhaba. This is estimated that project would generate about 435 MW of energy per annum. The total length of tunnels including those plugged after the completion of the work is 12 km. One of the unique features of the project is its underground switch yard, no other hydel project in Asia can boast of this feature, though some have underground power houses. The underground power house is located on the right bank of the Satluj river.

TABLE-5

TOTAL ENERGY CAPACITY/PRODUCTION/CONSUMPTION 1950-2013

Year	Energy Capacity (MW)	Energy Production (000 KW)	Energy Consumption (000 KW)
1950-51	4.316	3.58	9.97
1955-56	4.316	77.1	–
1960-61	4.369	107.1	–
1970-71	51.288	528.41	1119.6

2012-13	477.50	22441.00	23980.00

Source: HPDES Brief Facts 1950 to 2013.

The first generating unit of the 4.5-MW Bhabha Augmentation Projection constructed by the state electricity board becomes functional. The project completed at a cost of Rs 35.47 crore will generate 26.5 million units annually and will also enhance the capacity of the 120-MW Sanjay Vidyut Pariyojna to help generate an additional 111 million units of electricity. The design energy of the project will go up from 463.33 million units to 575.56 million units. Under the augmentation scheme water of the *Shango khad* has been diverted through a tunnel to the Bhabha khad about 500 m upstream the barrage of the Sanjay Vidyut Pariyojana.

2. **Andhra Hydel Project** (16.95 MW): This project was commissioned

during the year 1987-88. It has three units of 5.5 MW each. Andhra Project is located in *Rohru tehsil of Shimla district.* The estimated cost of this project was Rs. 9.74 crores. This scheme comprises of conventional trench type diversion weir across Andhra Khad at an elevation of about 245 mets. about half a kilometer upstream of Gonsary. It would be generating 89 MW power per annum. The Andhra power will be transmitted to the state grid through the Neogli power House near Rampur *Located in Satluj Basin.*

3. Rongtong Hydel Project (2 MW): Four units of 0.5 MW each. This projected is located in the *Lahaul-Spiti* district and is the first hydel project executed for the socio-economic upliftment of tribal people of this area. It is located at an elevation of 3,660 meters in an area which remains virtually snow bound except for four months of summer. This project was commissioned in December 1986. The estimated cost of this project was Rs. 2.82 crores and annual generation expected to the tune of 8.9 MW. This project is located on Rongtong Khad, a tributary of Spiti river. The water of this snow fed rivulet has been tapped at an elevation of 3,788 mets. for generating power by diverting the power through a 2,825 mets. long channel and a 259 met. long tunnel into open reservoir with a capacity of 14,000 cubic mets. It is one of the *highest in the world*, set up at Rangrik, about 6 km from Kaza.

4. Bassi Project (60 MW): Utilises the tail water of the Shanon power house of the Joginder Nagar project for the production of 45,000 KW of power has been commissioned. This is the extension of Beas Power House (Mandi district). It envisaged the installation of one additional generating unit of 15 MW as the existing power house at Bassi already has 3 units each of 15 MW capacity with provision for housing the 4th unit. Its generating capacity is 132 MW per annum, *Located in Beas Basin.*

The Project is the brain child of Colonel Betti, who impressed upon the then Prime-minister of Britain in 1928. The Project was completed in 1932. This Project had been providing power supply to Kangra, Pathankot, Amritsar, Lahore, Dharimal and Lyallpur. The water of Uhal and Lamba rivulets have been used by five Kilometer tunnel. This was the first hydel project in the Himalayas.

5. Giri Bata Project (60 MW): In the initial stage due to circumstantial, financial and technical reasons, Himachal could not take up big hydel projects. It was only after 1964 that State could plan its first own major hydel venture, the Giri Bata Project to harness the waters of Giri and Bata rivers and generate 201 MW power annually. It is located in district Sirmaur in Paonta Valley, *Located in Yamuna basin.*

6. Baspa Hydel Scheme (installed capacity 450 MW): The Baspa Project envisages the utilisation of the water of Baspa river that flows through Sangla Valley (Kinnaur) and later joins Satluj. There is water diversion through 6.4 km long tunnel near village Karchham. *It was the first hydel scheme in the*

State given to the private sector. The Stage-II of this schemes utilises the additional water available between Rakcham and Sangla plus the tail race water from the power house at Sangla (Stage-I). It is diverted through a tunnel towards the left bank of river Satluj to the power house at Sangtong. *The J.P. Industries executed its I, II and III stage. The agreement was signed in 1992, Located in Satluj Basin.*

7. **Binwa Hydel Project** (installed capacity 6 MW): Two units of 3 MW each, located near Baijnath in district Kangra. Binwa project is at *Utrala,* 25 km from Palampur and 14 km from Baijnath in Kangra district. It has been constructed at an elevation of 1515 mts. above the mean sea level in the foot hills of the Himalayas. The project comprises a 62 mts. long tunnel that connects a trench weir in the *Banu Khad* to one in the *Prahal Khud.* Located in Beas Basin.

8. **The Shantung Wangtoo** (Installed capacity 140 MW): It is on river Satluj in district Kinnaur.

9. **Kol Dam Project** (Installed capacity 800 MW): The project located on the Satluj river upstream of the Dehar power house of the BBMB, with four units of 200 MW each. It envisaged construction of rock fill dam across the Satluj, about 72 km. upstream of Bhakhra. The estimated cost of the project is Rs. 6300 crores (June 1999 price level). Besides generating power, the dam will serve as a check dam to reduce the rate of silting in the Bhakhra reservoir. It was the only hydel power project included in the signed protocol between prime-minister Late Rajiv Gandhi and erstwhile Soviet President Mikhali Gorbachev for extending financial and technical assistance. It is expected to generate more than 3500 million units of power. It is a public sector project. The union power minister Mr. Sushil Kumar Shinde laid the foundation stone of Kol Dam project on 9th May 2010. Located in Satluj basin.

10. **Nathpa Jhakri Project** (installed capacity 1500 MW): The project is executed jointly by the State and Central government through the Nathpa-Jhakri Power Corporation on river Satluj between the two villages, Nathpa and Jhakri in Kinnaur and Shimla districts. This project provides for a pick up dam on the Satluj at Nathpa about 5 km. down stream at Wangtu in Kinnaur district for diverting about 283 cusecs drainage though a 29 km long tunnel on the left bank of the river Satluj.

The world Bank loan amounting to 437 million dollars was sanctioned for generation component. The financial plan of this project in percentage cost as bank loan to NJPC was 17 per cent, Government of India loan 33 per cent, Government of India equity 37 per cent and Government of Himachal Pradesh equity 13 per cent. The largest and the longest headrace tunnel, the largest desilting chambers, the deepest and the most voluminous surge shaft, the largest underground power complex (with six Francis turbine units of 250 MW each) are some of the unique features of the 1500 MW Nathpa-Jhakri hydroelectric project in Himachal Pradesh, executed by the Nathpa-Jhakri

Power Corporation (NJPC).

The largest hydroelectric power project in the country generate around 6,700 million units of electricity in a 90 per cent "*dependable*" year. The power station would charge tariff comparable with the best power stations in the country. The project, located in Shimla and Kinnaur districts, was conceived by the Himachal Pradesh State Electricity Board (HPSEB) during the seventies. The original approved cost estimated at September 1988 prices was Rs 1678.02 crore. The first revised cost estimate in March 1993 prices was approved by the Central Electricity Authority (CEA) for Rs 4337.95 crore with the completion date set for December 1998. Subsequently the second revised cost estimate in June 1998 prices was approved for Rs 7666.31 crore with commissioning of all units set for March 2002. The third revised cost estimate of Rs 9083.34 crore in September 2001 prices submitted to the Central Government for last approval.

The Central Water Commission (CWC) and CEA supported the project as its principal consultants, while Electro Watt (Switzerland), Nippon Koei (Japan) and Wapcos India are its retainer consultants. In addition, the project also gets advice from reputed organisations such as the National Institute of Rock Mechanics and the Central Power Research Institute.

There were considerable delays in obtaining the various requisite statutory clearances and environmental and the forest clearances for the project. Contracts for the major civil works and electromechanical works were awarded only in 1994. Since the very beginning of the execution, the project experienced various hurdles and setbacks resulting in inordinate delays in various project activities.

The working on the project was also hampered due to flash floods. The flash floods of August 1997 and August 2000 led to extensive loss to the project, both in terms of time and money. In the early hours of August 1, 2000, the flash flood that struck the project caused so much destruction to the dam as well as the powerhouse that the World Bank at its review meeting had almost written off the project. But, soon after its takeover by the National Hydroelectric Power Corporation, the NJPC sprung back into action against all odds and completed all restoration works to the pre-flood level, both at the dam site as well as at the powerhouse.

The major indicators of accelerated progress of project activities since April 2001 are the 70 p.c. dam concreting, 81 p.c. headrace and 100 p.c. surge shaft concreting. All the flood-affected equipment were dismantled from July 2001 to February 2002. The erection activities are going round the clock. Long pending organisational and employee-related issues have been resolved, and all civil, mechanical and other technical works have been finalised. Besides, both physical and financial targets have been enhanced. The project was completed in the year 2004 the phenomenal work of NTPC. Located in Satluj basin.

11. Parbati Hydel Scheme: Installed capacity 2051 MW. This is one of

the major projects having 2051 MW of installed capacity located in the Beas Basin. This project was proposed to be taken up in three stages, Stage-I (750 MW). Stage-II (800 MW) and Stage-III (501 MW) on river Parbati a tributary of the Beas river in Himachal Pradesh. An agreement for the execution of Parbati Hydroelectric project was signed on 20-11-98 between Himachal Pradesh Government and National Hydroelectric Power corporation. Located in Beas basin

Parbati State-I (750 MW): It envisaged a storage dam about 180 mt. high near confluence of *Dibi-Bokri nullaha* and Parbati river at the height of 3637 mt. This will create a reservoir from where water would be diverted through 17 km. long tunnel to utilise a gross head of about 1420 mt. for generating 750 MW of power in an underground power house located at *Nakthan.* This scheme in addition would firm up the generation in the down stream stage II and III projects plus those projects already constructed such as Larji and Beas-Satluj link. *It is a Public Sector Project.*

Parbati State-II: It seeks the diversion of Parbati river at Pulga by constructing about 90 met. high dam. The water availability would be met by tapping streams *Jagrai, Hurla* and *Jiwa* etc.

Parbati Stage-III: It would use tail water of Stage-II project in combination with water of Sainj Khad. After raising 75 mts. high diversion dam at Sainji, the combined water has to be diverted through a 9.91 km. long head race tunnel to generate 501 MW of power in the surface power house located at Larji.

12. Larji Hydel Project: Installed capacity 126 MW. This is located on the Beas river on Mandi-Manali National Highway and envisaged construction of a diversion dam at Larji near Bhunter at the confluence of Tirthan river with the Beas in Kullu district. It comprises a diversion dam and 6 km long tunnel and also an underground surface power house utilising a gross fall of about 80 mt.

The project was accorded clearance by CEA and Planning Commission during 1987 for an estimated cost of Rs. 168.85 crore (1984 price level) with generating capacity of 126 MW (342 MW). The revised estimated cost at July 1997 price level was Rs. 667.04 crore. This project has been taken up in state sector and its cost was proposed to be partly met out of state plan and partly by raising loan from financial institutions. It is *located in Beas Basin.* The budget estimate was revised many a time and finally project was commissioned in 2007. On June 8, 2014 a tragedy struck when 24 engineering students from Andhra Pradesh, who were having fun in the Beas river water near Thalot were washed away, when authorities released water from the dam without warning.

13. Malana Hydel Scheme: Installed capacity 86 MW. It will use the water of the Malana stream which is a small tributary of the Parbati river, in Kullu valley. Implementation agreement for the project was signed with M/

S Rajasthan Spinning and Weaving Mills Ltd. on 13 March 1997. It has been taken up by M/S R.S.W.M. Ltd. Then a tripartite agreement was signed on 3rd March 1999 between Govt. of Himachal, M/s RSWM and M/s Malana Power Company Lt. The project becomes operational from 5th July 2001. Located in Beas basin.

14. Chamera Project: Installed capacity 540 MW. The scheme was estimated to cost about Rs. 809 crore. It is situated on the river Ravi, near *Rakh Village* in district Chamba. Chamera is the major hydel *project in the Ravi Basin.* This scheme envisaged construction of a barrage in the Ravi river so as to divert excess water of the Ravi river, after allowing for committed releases to be made at the *'Thein Dam'.* This project was conceived in 1980, but inordinate delay in its execution raised its cost to Rs. 2300 crore. The power house of the project is located at the confluence of the Ravi and Swan rivers at *Khairi,* 30 km from Chamba town and has a catchment area of 4725 sq. mt. of which 300 sq. mt. is snow catchment area. The project was commissioned with the help of a Canadian consortium as the entire dam equipment, technical know how and other guidance was given by the Canadians. It provides is 12 percent power royalty to Himachal.

Chamera Stage II (300 MW 100 × 3 MW each): It has been taken up with the assistance of Canada by the National Hydro-Electric Power Corporation (NHPC) by the Public Investment Board in April 1992 for an estimated amount of Rs. 1393.19 crore. To make it fast, 287 bighas of land was acquired by the project. The Union Government of India agreed to give 12 percent free power to Himachal Pradesh on its completion. This project would generate 168 crore unit of power every year. Chamera I and II are joint sector projects where Himachal has a share of 12 percent of the power generation.

15. The Siul-Baira Scheme: Installed capacity 201 MW. It uses the water of *Siul, Baira* and *Baldeh* Streams, which are the West tributaries of the river Ravi in Chamba district. The estimated cost of the project was Rs. 25 crores (1983). The Baira water is diverted through a tunnel by constructing a high rock fill dam at *Khakri.* The combined flow of these streams was utilised at *'Puniari'.* Located in Ravi basin.

16. The Holi Hydel Scheme: Installed capacity 7.5 MW. It user water of Holi stream, a tributary of river Ravi, in Chamba district Comprising three units of 2.5 MW each. It is expected to generate about 21 MW energy in a dependable year. The project is located in the interior belt of Chamba district and provides electricity to Bharmaur and some other parts of Chamba. Located in Ravi basin.

17. The Hibra Power Project: Installed capacity 231 MW. It is proposed across the Ravi, downstream of *'Tundah'* – Ravi confluence, in district Chamba. A private sector company M/S Harza Engineering Company has taken up this project. Located in Ravi basin.

18. **Giri Power Project** (Renuka Dam, The Dadahu Dam Project): Installed capacity 60 MW. It uses water of river *'Jalal'* and *'Giri'*, at a place known as *Dadahu.* The work on this project started in 1964. The power house has two units at 30 MW each. This was one of the first big venture of Himachal Government in the hydel power sector to harness the waters of Giri and Bata river. Located in Yamuna basin.

19. **Thirot Hydel Project** (4.5 MW): This project is located on the *Thirot Nallah,* a tributary of river Chenab, in the remote tribal valley of Lahaul-Spiti district. Thirot project has originally been sanctioned for three MW (3 × 1 MW) with cost Rs. 4.34 crores. Later on it was decided to raise the installed capacity of power house from three MW to 4.5 MW (3 × 1.5 MW). The project is in Chenab Basin and is under the control of state Government. Commissioned on 15 October 1995. Located in Chenab basin.

20. **Gaj Hydel Project** (10.5 MW): The project is located near Shahpur in Kangra district. For this project, non-availability of funds the reason for insignificant progress in the execution during the previous years. The revised estimated cost of this project was Rs. 2,815 lakh (1988-89). *Located in Beas basin* under Himachal Pradesh Government Commissioned on April 22,1996.

21. **Ghanwi Hydel Project** (22.5 MW): The project is located near Jeuri in Shimla district. The installed capacity of this project is 22.5 MW comprising three units of 7.5 MW each. The project was estimated to cost Rs. 2,832 lakh. This would be completely under ground, using water of the Ghanwi stream a tributary of Satluj and now form part of the Nathpa Jhakri project. It is 160 km from Shimla. Located in Satluj Basin under state of Himachal Pradesh.

22. **Dhamwari Sunda Project** (70 MW): The project is located *on Pabbar river* in the vicinity of Andhra Project which has already been commissioned. Its installed capacity is 60 MW comprising four units of 15 MW each. *Swedish* assistance has been obtained for this project. M/S Harza Engineering has taken up this project. It is *located in Satluj basin.*

23. **Uhl Stage-III** (70 MW): Uhl Stage-III project is located in Mandi district of Himachal Pradesh. The installed capacity of the project is 70 MW comprising four units of 17.5 MW each. The project is estimated to cost Rs. 103.37 crore as per the estimates of the year 1989. It has been given to private sector M/S Balarpur Industries.

Private Sector Projects Commissioned

Baspa-II HEP (300MW): The MOU and Implementation Agreement for execution of the Baspa-II HEP were signed by the H.P Govt. with M/s. Jai Parkash Industries Ltd., New Delhi on 23.11.1991 and 1.10 1992 respectively. The Unit-I-II and III of the project have been generating power w.e.f 24.5.2003, 29.5.2003 and 8.06.2003 respectively. Located in Satluj basin.

Patikari HEP (16MW): The Implementation Agreement for the Project

has been signed with M/s. East India Petroleum Ltd. on 9.11.2001 which has further incorporated Patikari Power Pvt. Ltd. for the implementation of the project. The techno-economic clearance has been issued by the Board on 27.9.2001. The estimated cost of the project is 126.00 crore. The PPA was signed with HPSEB on 14.1.2003. The Project has been commissioned in January, 2008.

Allain Duhangan HEP (192 MW): The estimated cost of this project is 922.36 crore. The MOU for execution of the project was signed between the HP Govt. and M/s. Rajasthan Spinning and Weaving Mills Ltd., New Delhi on 28.8.1993 and Implementation Agreement signed on 22.2.2001. The Govt. of H.P signed Quadripartite Agreement on 5.11.2005 between the Govt. of H.P., M/s. Rajasthan Spinning and Weaving Mills Ltd., MPCL and the Generating Company M/s AD Hydro Power Ltd. The construction work of project is under progress. The project has been commissioned in August, 2010.

Sarbari-II HEP (5.4 MW): The MoU was signed by the H.P Govt. with M/s Hydro Watt Ltd on 15.3.2001. The implementation agreement was signed by the H.P Govt. with company on 28.2.2009. The project has been commissioned in August, 2010.

Toss HEP (10 MW): The Govt. of H.P has signed the MoU and implementation agreement with M/s Sai Engineering Foundation, New Shimla. The project has been commissioned in 2009-10.

Karcham Wangtoo HEP (1,000 MW): The project has been allotted to M/s Karcham Hydro Corporation Ltd. New Delhi. The estimated cost of project is 6,930.00 crore. Annual generation of this project is 4,560 MU. The MOU for execution of the Project has been signed between the HP Govt. and M/s Jai Parkash Industries Ltd. New Delhi on 28.8.1993. The implementation Agreement was signed between Govt. of HP and M/s Jai Parkash Industries Ltd. on 18.11.1999 followed by a Tripartite Agreement between the Govt. of HP, M/s Jai Parkash Industries Ltd and M/s Jaypee Karchham Hydro Corporation Ltd., on 30.12.2002 and SIA on 20.12.2007. The work on the Project was started on 18.11.2005 and got completed in August, 2011. The project has been commissioned in August, 2011.

Upper Joiner HEP (12 MW): The Project has been allotted to M/s Tejas Sarnika Hydro Energies Pvt. Ltd. The MOU for execution of the Project has been signed between the HP Govt. and M/s Tejas Sarnika Hydro Energies Pvt. Ltd. on 12.01.2005. The Implementation Agreement was signed between Govt. of HP and M/s Tejas Sarnika Hydro Energies Pvt. Ltd on 11.07.2008. The project has been commissioned in July, 2011

Sumej HEP (14 MW): The MoU and implementation agreement for execution of the Kurmi HEP were signed by the H.P Govt. with M/s Rangaraju Ware Housing Pvt. Ltd. on 12.01.2005 and 11.12.2008 respectively. The project has been commissioned in March 2012.

Beaskund HEP (9 MW): The MoU and Implementation Agreement for

execution of the Beaskund HEP were signed by the H.P Govt. with Kapil Mohan and Associates Hydro Power Pvt. Limited Chandigarh on 23.03.2001 and 1.10.2009 respectively. The project has been commissioned in June 2012.

Malana-II HEP (100 MW): Malana -II Hydro Electric Project (HEP) has been contemplated a Power generation development on Malana a tributary of Beas in Kullu District of Himachal Pradesh. The Project has been allotted to M/s Everest Power Pvt. Ltd. New Delhi. The estimated cost of the Project is 633.47 crore. The estimated annual generation of this project is 428 MU. The MOU & IA signed with the company on 27. 5.2002 and 14.1.2003 respectively. The Project has been commissioned in July, 2012.

Budhil HEP (70 MW): The Project has been allotted to M/s Lanco Green Power Pvt. Ltd. The estimated cost of the project is 418.80 crore. The Memorandum of Understanding (MoU) was signed on 23.9.2004. The H.P Govt. signed the Implementation Agreement (I.A) with the company on 22.11.2005. The Project has been commissioned in August, 2012.

Neogal HEP (15 MW): Neogal Hydro Electric Project (HEP) has been contemplated as a power generation development on Neogal a tributary of Beas in District Kangra of Himachal Pradesh. The project has been allotted to M/s Om Power Corporation Ltd. New Delhi. The estimate and cost of this project is 61. 74 crore. The annual generation of this project will be 82 MU. The MOU for execution of the project was signed between the HP Govt. and M/s Om Power Corporation, New Delhi on 28.8.1993.

The Implementation Agreement signed with the company on 4.7.1998 stands terminated on 27.11.2004 due to failure of the company to achieve the financial closure and start construction work on the project within the time limit extended by the Govt. in its cabinet meeting held on 31.05.2004. The Company signed Power Purchase Agreement on 27.10.2006 with HPSEB. The Project was commissioned in May, 2013.

Project Under Execution

(i) Under Private Sector

Fozal HEP (9 MW): The Project has been allotted to M/s Fozal Power Pvt. Ltd., New Delhi. The estimated cost of the project is 49.17 crore. The Memorandum of Understanding (MOU) and Implementation Agreement (IA) have been signed on 21.06.2000 and 13.04.2006 respectively.

Tangnu Romai Stage-I HEP (44 MW): Tangnu Romai Hydro Electric Project (HEP) has been contemplated a Power generation development on Tangnu Romai a tributary of Yamuna river in District Shimla of Himachal Pradesh. The project has been allotted to M/s Tangnu Romai Power Generation Private Ltd.. The estimated cost of the Project is 239.73 crore. The annual generation of this project will be 211.05 MU. The MOU was signed with the company on 5.07.2002. An Implementation Agreement for the Project has been signed with M/s Tangnu Romai Power Generation Ltd, on 28.07.2006

as per the provision of Power Policy.

Tangnu Romai Stage-II HEP (6 MW): Tangnu Romai Hydro Electric Project (HEP-II) has been contemplated as a Power generation development on Tangnu Romai a tributary of Yamuna River in District Shimla of Himachal Pradesh. MOU and implementation agreement (IA) of Government of Himachal Pradesh and company was signed on 5.07.2002 and 28.7.2006 respectively

Lambadug HEP (25 MW): The Project has been allotted to M/s Himachal Consortium Power Projects Pvt. Ltd. The estimated cost of the Project is 149.81 crore. The MOU was signed with M/s Himachal Consortium on 14.06.2002 and IA was signed on 28.01.2006.

Baragaon HEP (24 MW): The Project has been allotted to M/s Kanchanjunga Power Pvt. Ltd., F-34, Sector, Noida (UP). The estimated cost of the project is 168.09 crore. The Memorandum of Understanding and Implementation Agreement (IA) was signed on 6.06.2002 and 25.11.2006 respectively.

Baner-II HEP (6 MW): The Project has been allotted to M/s Prodigy Hydro Power (P) Ltd. The estimated cost of the project is 30.36 crore. The Memorandum of Understanding (MOU) and Implementation Agreement (IA) have been signed on 29.05.2000 and 1.10.2001 respectively.

Raura HEP (8 MW): The Project was allotted to M/s DLI Power (India) Pvt. Ltd., Pune. The estimated cost of the project is 42.03 crore. The Memorandum of Understanding (MOU) and Implementation Agreement (IA) was signed on 4.02.1996 and 24.03.2008 respectively.

Sorang HEP (150 MW): The Project has been allotted to M/s Himachal Sorang Power Pvt. Ltd. The estimated cost of the project is 586.00 crore. The Memorandum of Understanding (MoU) and Implementation Agreement (I.A) signed on 23.9.2004 and 28.01.2006 respectively. An additional unit of 50 MW is being installed by the developer so the total capacity of Sorang HEP is proposed to be 150 MW, however two units of 100 MW commissioned in 2013-14.

Tidong-I HEP (100 MW): The project has been allotted to M/s Nuziveedu Seeds Ltd, Secunderabad. The estimated cost of the project is 500.11 crore. The Memorandum of Understanding (MoU) and Implementation Agreement (I.A) was signed on 23.09.2004 and 28.07.2006 respectively.

Chanju-I HEP (36 MW): Project has been allotted to M/s Indo Arya Central Transports and MOU was signed on 20.12.2007 for an installed capacity of 25 MW. The DPR submitted for 36 MW was Techno-economical clearance by HPSEB and IA was signed on 12.06.2009.

Kut HEP (24 MW): The MoU and implementation agreement for execution of the Kut HEP were signed by the H.P Govt with M/s Kut Energy (P) Ltd. Noida U.P on 28.04.2007 and 25.05.2008 respectively. The estimated cost of project is 196.50 crore.

Lower Uhl HEP (13 MW): The MoU and implementation agreement for execution of the Lower Uhl HEP were signed by the H.P Govt. with M/s Trident Power System Ltd. on 05.02.2005 and 29.12.2008 respectively.

Kurmi HEP (8 MW): The MoU and implementation agreement for execution of the Kurmi HEP were signed by the H.P Govt. with M/s Chandigarh Distillers & Bottlers Ltd on 19.06.2007 and 10.01.2009 respectively.

Rala HEP (9 MW): The MoU and Implementation Agreement for execution of the Rala HEP were signed by the Himachal Pradesh Government with M/s Taranda Hydro Power Pvt. Ltd., on 18.10.2006 and 07.11.2008 respectively.

Upper Nanti HEP (12 MW): The MoU and Implementation Agreement for execution of the Upper Nanti HEP were signed by the Himachal Pradesh Government with M/s Nanti Hydro Power Pvt. Ltd., on 27.10.2006 and 12.11.2008 respectively

Jongini HEP (16 MW): The MoU and Implementation Agreement for execution of the Jogini HEP were signed by the Himachal Pradesh Government with M/s Gangdari Hydro Power Pvt. Ltd., on 27.10.2006 and 19.11.2008 respectively.

Nanti HEP (14 MW): The MoU and Implementation Agreement for execution of the Nanti HEP were signed by the Himachal Pradesh Government with M/s Surya Kantha Hydro Poulteries (P) Ltd., on 12.11.2005 and with M/s Surya Kantha Hydro Energies (P) Ltd. on 12.11.2008 respectively.

Paudital Lassa HEP (24 MW): The MoU and Implementation Agreement for execution of the Paudital Lassa HEP were signed by the Himachal Pradesh Government with M/s Shri Jayalakshmi Power Corporation Ltd. on 06.06.2002 and 26.10.2006 respectively.

Roura-II HEP (20 MW): The MoU and Implementation Agreement for execution of the Roura-II HEP were signed by the Himachal Pradesh Government with M/s Chandigarh Distillers & Bottlers Ltd., on 27.10.2006 and with M/s Roura Non-Conventional Energy (P) Pvt. Ltd., on 01.10.2009 respectively.

Brua HEP (9 MW): The MoU and Implementation Agreement for execution of the Brua HEP were signed by the Himachal Pradesh Government with M/s Continental Components (P) Ltd., on 09.12.2000 and with M/s Brua Hydrowatt Pvt. Ltd., on 23.09.2011 respectively.

Jeori HEP (9.6 MW): The MoU and Implementation Agreement for execution of the Jeori HEP were signed by the Himachal Pradesh Government with M/s Technology House Pvt. Ltd. on 12.01.2005 and 23.02.2011 respectively.

Balargha HEP (9 MW): The MoU and Implementation Agreement for execution of the Balargha HEP were signed by the Himachal Pradesh Government with M/s Sandhya Hydro Power Projects Balargha Pvt. Ltd.,

on 03.11.2006 and 07.11.2012 respectively.

Rajpur HEP (9.9 MW): The MoU and Implementation Agreement for execution of the Rajpur HEP were signed by the Himachal Pradesh Government with M/s Rajpur Hydro Power Pvt. Ltd., on 31.07.2001 and 16.05.2013 respectively.

Bajoli Holi HEP (180 MW): The MoU and Implementation Agreement for execution of the Bajoli Holi HEP were signed by the Himachal Pradesh Government with M/s GMR Bajoli Holi Hydro power Pvt. Ltd., on 15.02.2008 and 29.03.2011 respectively.

Projects Under Execution

i) Under HPSEB Ltd.:-

Name of Project	Installed Capacity (MW)	Expected Generation (MU)	Likely date of Commissioning
UhI Stage-III	100.00	391.19	March, 2015
Ghanvi Stage-II	10.00	56.30	March, 2014
Total	110	447.49	

UHL Stage -III Hydro Electric Project (100 MW): The packages for construction of Neri Khad Intake Work and Rana Khad Intake Works have been completed during December, 2011 & Surge Shaft during January, 2012. Project is scattered over a large geographical area having poor communication, weak geological formations, tunnelling through sand stone, clay stone and conglomerate with heavy ingress of water at Inlet heading of Head Race Tunnel (HRT). Contract of HRT have been rescinded twice due to slow progress/ non performance of the contractors and remaining works of HRT were awarded on 15.10.2010.

The excavation of HRT has been completed during March, 2013. The estimated cost of the project is 940.84 crore (March, 2008 Price Level). 90% works pertaining to transmission viz construction of 132 KV Single Circuit Transmission line from Chullah to Bassi (15.288 KM.) and 132 KV Double Circuit Transmission Line from Chulla to Hamirpur (34.307KM.) have been completed.

GHANVI stage-II HEP (10 MW): Ghanvi Stage-II HEP is a run of the river scheme on Ghanvi rivulet, a *tributary of Satluj* river. This scheme envisages construction of drop type trench weir to divert the Ghanvi waters. This diverted water will be conveyed through 1.8m size D-shaped 1440m long tunnel and penstock, bifurcating near power house to feed two turbines in an underground power house to generate 10 MW of power by utilizing a gross head of 165 m and designed discharge of 7 cusecs. The annual energy generation in a 75% dependable year is expected to be 56.30 MU. All major

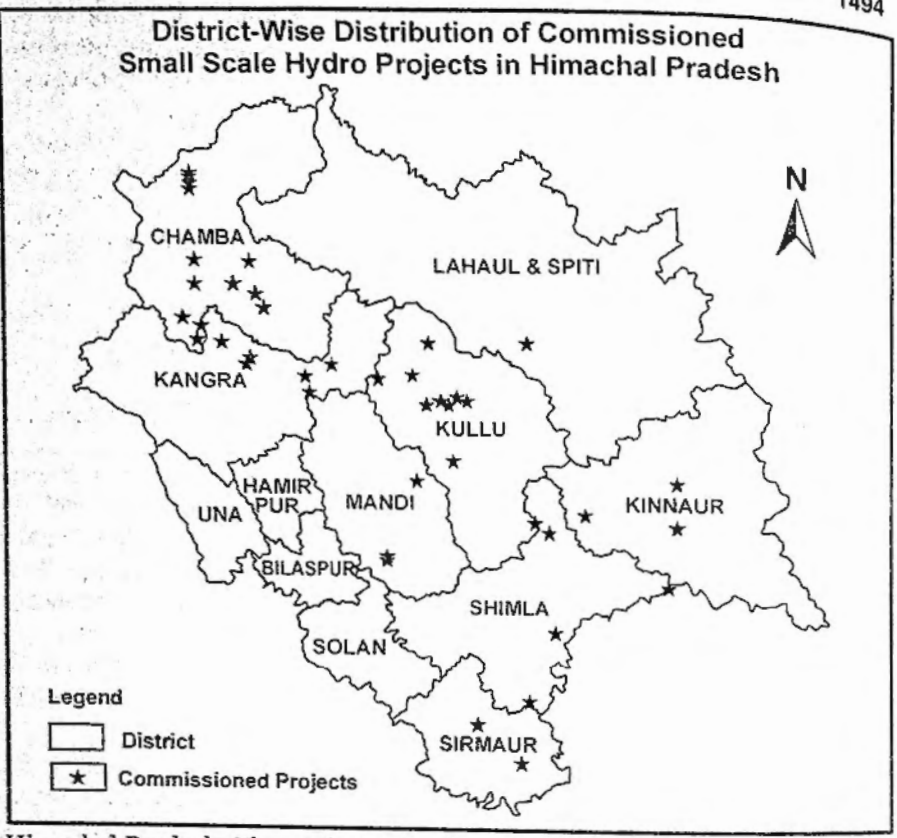
civil and hydro mechanical components have been completed. The estimated cost of the project is 99.80 crore at December, 2009 Price Level. An expenditure of 103.00 crore has been spent on civil works of the project ending November, 2013. Commissioned in the year on 31.3.2014

Projects Under Execution

ii) Project under HPPCL:-

Name of Projects	Capacity (MW)
State Sector	
1. Sawra Kuddu HEP	111
2. Integrated Kashang HEP (Stage-I, II, III)	195
3. Sainj HEP	100
4. Shongtong Karcham	450
Total	856

Sawra Kuddu HEP (111 MW): Sawara Kuddu HEP (111 MW) a run of river scheme has been contemplated as power generation development on the Pabbar river in Shimla District (H.P) near Rohru. *Underground power house* is located on the left bank of the Pabbar river near Snail village. This will develop a gross head of 213.50 m to generate 385.78 MU per annum@ 4.44 per unit. The statutory clearances have been accorded by respective agencies. Work has been divided into 4 Nos. packages and construction work has been started. The Head Race Tunnel of the Project posed geological problems. Technical solution for these problems has been evolved.



Integrated Kashang HEP (243 MW):- Integrated Kashang HEP (243 MW) envisages development of Kashang and Kerang Streams, tributaries of the river Satluj comprising four distinct stages as under:-

Stage -I (65 MW):- Comprising diversion of Kashang stream to an underground power house located on the right bank of Satluj near *Powari village,* developing a head of approximately 830 m to generate 245.80 MU per annum @ 2.85/- per unit.

Stage -II & III (130 MW):- Comprising diversion of the Kerang stream into an underground water conductor system (K-K Link) leading to upstream end of Stage-I water conductor system, augmenting the generating capacity of Stage-I power house, using Kerang water over the 820 m head available in Kashang Stage-I power house to generate 790.93 MU per annum @ 1.81/- per unit.

Stage -IV (48 MW):- This stage is more or less independent scheme harnessing the power potential of Kerang stream upstream of the diversion site of Stage-II. In this scheme, a head of approximately 300 m could be utilized to develop power in an underground powerhouse located on the right bank of Kerang stream.

Sainj HEP (100 MW):- Sainj HEP has been contemplated as a run of the river development on river Sainj, a tributary of River Beas in Kullu District of

Himachal Pradesh. The project comprises of a diversion barrage on the river Sainj near village Niharni and underground power house on right bank of river Sainj near village Suind with a gross head of 409.60 m to generate 322.23 MU per annum @ 3.74/- per unit. The project is executed on EPC mode.

Shongtong Karcham HEP (450 MW):- Shongtong Karcham Hydro electric project a run of -river scheme on the river Satluj in District Kinnaur of Himachal Pradesh with diversion barrage, near village Powari, and underground powerhouse, located on the left bank of the river Satluj near village Ralli will generate a gross head of 129 m, to generate 1578.95 MU per annum, @ 3.98/- per unit of power. The project is to be constructed through EPC mode.

Renuka Dam HEP (40 MW):- Renukaji Dam project, conceived as a drinking water supply scheme for the National Capital Territory of Delhi, envisages construction of 148 m high rock fill dam on river Giri at Dadahu in Sirmaur district and a power house at toe of Dam. The project will ensure 49,800 hectare m of live water storage in its reservoir and a firm water supply to the tune of 23 cusecs to Delhi besides generating 199.99 MU per annum @ 2.38/- unit exclusively for use of Himachal Pradesh. Total cost of the project

as finalized by CWC/CEA at March, 2009 price level is 3,498.86 crore i.e. (without Escalation & IDC) which shall be borne by the Govt. of India/Govt. of Delhi and other beneficiary states.

Hydro Power Policy for Projects above 5 MW

In order to give a boost to Hydro Power Generation, Himachal Pradesh has formulated Hydro Power Policy. The main features of this policy are:-

i All Projects above 5 MW shall be allotted to IPPs (Independent Power Producers) through International Competitive Bidding.

ii The Govt. of HP has taken a decision for inviting Global Bids for allotment of various Hydro Electric Projects in Private Sector on BOOT basis. The project shall be allotted through International Competitive Bidding (ICB) Route on the basis of quoting highest Upfront Premium over & above a threshold value of Upfront Premium with levying Normal Free Power Royalty as per the prevailing rates i.e. @ (12+1)%, (18+1)% & (30+1)% for the first 12 years, next 18 years & balance 10 years of the agreement period after commercial operation commissioning respectively in lieu of 40 years concession period.

iii The Developer shall make a provision of 1.5% of final cost of the Project towards Local Area Development Committee (LADC), the activities of which shall be financed by the Project itself.

iv For benefits of local people and local areas of the State, affected due to implementation of Hydroelectric Projects, the State Govt. has introduced a provision in line with the National Hydro Power Policy-2008, vide its notification dated 30.11.2009 for providing an Additional Free Power @ 1% of the generated energy from all Hydel Power Projects which would be earmarked for Local Area Development Fund (LADF). This fund would be available in the form of Free Power as an annuity over the entire life of the Project. The Govt. of HP vide its notification dated 5.10.2011, issued comprehensive Guidelines for the management of the LADF wherein a cash incentives to the Local Population in the Projects Affected Areas (PAAs), out of the funds received on account of sale of Additional Free Power @ 1% after COD of the Projects which shall contribute towards the upliftment of the Local Population in Projects Affected Areas as the same shall be disbursed annually during the entire life time of the Projects in terms of cash Transfer in favour of beneficiary family declared as PAF.

v The operation period of the Projects shall be forty years from the Scheduled Commercial Operation Date (COD) of the Projects, where after, the Project shall revert to the State Government free of cost.

vi The Company shall have to provide employment to Bonafide Himachalis, in respect of all the unskilled/skilled staff and other number of -executives as may be required for execution, operation and maintenance of the Project. If it is not possible to recruit 100% staff from Himachalis for justifiable reasons, only then the Company shall maintain not less than 70% of the total employees/ officers/ executives from Bonafide Himachali persons.

vii Release of Min. Discharge: The H.P government makes provision in policy to the Developer if, Run of the River (ROR) Projects shall ensure minimum flow of 15% water immediately downstream of the diversion structure of the project all the times as per the Policy of Department of Environment, Govt. of H.P, as applicable from time to time. The Developer shall provide necessary arrangement/ mechanism in the civil structure including discharge measurement system for the release of laid down minimum flow immediately downstream of the diversion structure.

viii Disposal of Power: The developer shall be free to dispose of such power as remains after meeting commitments of royalty in shape of free power and Additional Free Power through Merchant sale.

ix Rationalization of Milestones: To make the implementation of Projects more realistic the State Government vide its notification issued on 07.07.2012, has incorporated a provision for extension at various levels so that the Projects stucked due to extraordinary delays can be regularized and the same may be brought back to the track.

x Optimization of Potential: The State Government optimization of the total Hydro Potential of the State shall be engaged for achieving reputed consultancy firm for digitization of Basin Wise Plans, identification of new projects & optimization. This study stands, completed by M/s Lahmeyer International (I) Pvt. Ltd., wherein the consultant has explored the possibilities to enhance the existing potential of 23,000MW to about 27,000 MW.

xi Capacity Enhancement: For the point of view of optimization of the existing Projects, the Government has formulated a policy for enhancement of the existing capacities by imposing additionalties benefit sharing applicable on the increase Capacity. Additional Charges shall be levied on capacity increase beyond allotted capacity @ 20 lakh per MW and AddI. Free Power@ 3% of the capacity increases beyond allotted capacity.

xii Domain Change: The State Government formulated a policy allowing all domain changes resulting to optimization of potential by allotting un-utilized domains vide Government notification dated 15.06.2010.

xiii Web Based Monitoring: The Government of H.P has made all its efforts to develop, adopt and implement a web based real time monitoring of milestones in implementation of hydroelectric Projects in various sectors in Himachal Pradesh. The programming of on-line monitoring mechanism through the official web site of Directorate of Energy was put in place in association with National Informatics Centre (NIC). The monitoring of progress of implementation of CAT Plans, release of environmental flows and social parameters has also been made possible by providing web linked access to the web sites of concerned department/ organization viz: H.P Forest Department, H.P Sate Pollution Control Board and AGISAC respectively.

xv Local Area Development Fund (LADF): The State Government formulated guidelines for the management of LADF vide notification dated

05.10.2011, amplifying the utilization of LADF at various levels. The Government introduced provision for LADF @ 1.5% of the cost of Project December, 2006 and a considerable expenditure has been incurred on this account.

To access the development/ achievements under Local Area Development Funds (LADF), the Government carried out studies to assess the impacts due to Project Implementation, LADF activities and R & R plans in sampled 10 Hydro Electric Projects (HEPs) through Himachal Pradesh Agro University which submitted its final report, in January, 2013. The findings of the report, reveals that LADF has considerably contributed in the Local Area Development and majoring of the Local Population in PAAs have shown a satisfaction response towards development of Local Areas.

a) **Prior to Commissioning of the Project:** The Project developer shall contribute a minimum of 1.5% of final cost of the Project for more than 5 MW capacity and a minimum of 1% for Projects of capacity upto 5 MW. While the Project Cost to LADF, they may contribute more if they so desire. Initially the LADF will be worked out on the basis of the Project cost as per DPR for depositing with the concerned Deputy Commissioner. After completion of the Project, the LADF will be worked out on the final completed cost.

b) **Post Commissioning :** Project developers of all capacities shall contribute 1% Free Power for LADF over and above the rates of royalty agreed to be paid to the State Government in the Implementation Agreement (IA) / Supplementary Implementation Agreement (SIA), as the case may be. This additional 1% (one percent) free power, over and above the royalty component provided to the host state will be a pass through in tariff.

c) **Cumulative Impact Assessment Studies :** Numbers of hydropower projects are planned on the various rivers and their major tributaries in the state of Himachal Pradesh. While each project is planned to be environmentally compliant and sustainable, yet, their cumulative or aggregate impact is generally not known and seldom studied. Following an understanding that each Hydro-Electric Project (HEP) is generally environment norm compliant yet their aggregate or cumulative impact may not be as favourable. Hence assessment of cumulative impact has been committed by the State of HP and accordingly it is going ahead in a phased manner with Cumulative Environment Impact Assessment Study for all the river basins in the State.

The basin wise detail in respect of CEIA Studies is as under:

1. Satluj -The studies are in progress by ICFRE Dehradun and at an advance stage.
2. Chenab -The studies are in progress by M/s R. S Envirolink Technologies P.Ltd
3. Ravi -TOR is under process.
4. Yamuna -Process for preparation of TOR is being initiated
5. Beas -Draft TOR has been prepared and submitted for getting approval from MoEF.

Other Areas of Power Development: H.P Power Corporation apart from Hydro Power Development intends to diversify its power development activities in other areas such as thermal, renewable sources of energy such as solar and wind power, to meet the growing energy demands for the development of the state and the Indian nation. In joint venture a Pithead Thermal Plant at Raniganj in the state of West Bengal is being developed.

HIMURJA

Project Under Himurja: (UPTO 5 MW CAPACITY)

Projects	No.	Capacity (MW)
Total allotted Project (in existence)	472	1218.46
Implementation Agreement Stage	227	737.67
i) Commissioned	56	221.55
ii) Under Construction	51	182.60
iii) Clearances being obtained	120	333.52
Pre Implementation Agreement Stage	245	480.79
i) Clearances being obtained	143	307.42
ii) Survey & Investigation in progress	102	173.37

HIMURJA for development of new and renewable sources of energy in H.P : Himurja has made concerted efforts to popularize renewable energy programmes throughout the State with financial support of Ministry of New and Renewable Energy (MNRE), Govt. of India and State Govt. Efforts are continued for promotion and propagation of renewable energy devices like solar water heating system, solar photovoltaic lights etc. HIMURJA is also assisting the Govt. for exploitation of Small Hydro (upto 5 MW) in the state.

SOLAR THERMAL PROGRAMME

i) Solar Water Heating System: Solar water heating systems of 1,68,050 Litre. per day capacity have been installed through Market Mode under Jawaharlal Nehru National Solar Mission (JNNSM), in parts of the State upto December, 2013.

Small hydro electric projects upto 5 MW capacity being executed through private sector participation: During the period under report, Implementation Agreements for 41 projects with total capacity of 110.65 MW have been signed. 4 projects with an aggregate capacity of 16 MW have been commissioned. 4 Projects have been sanctioned for allotment with an aggregate capacity of 6.55 MW.

Hydro electric projects being executed by Himurja MHEPs: Himurja

is operating Micro Hydel projects at Lingti (400KW), Kothi (200 KW), Juthed (100 KW), Purthi (100 KW) Sural (100 KW), Gharola (100 KW), Sach (900 KW) and Billing (400 KW) which are under generation. During current year 30,18,205 units electricity has been generated from these projects upto December, 2013. Other projects, namely Bara Bhangal (40 KW) and Sarahan (30 KW) have also been executed by HIMURJA. From Bara Bhangal project, energy is being provided to local public.

Out of 19 HEPs allotted to HIMURJA by the State Govt., only 16 projects (63.05 MW) were found viable. Out of the viable projects DPRs have been completed for 15 numbers. and forwarded to Directorate of Energy (DOE) for TEC. TEC has been accorded by DOE for 14 projects. DPRs for remaining 1 project is under preparation. Now Government has cancelled. Allotment of 13 projects and remaining three projects of capacity 14.50 MW are to be executed by Himilrja.

Portable Micro Hydel Generator Sets: Himurja has commissioned Portable Gen. Sets in Pangi Sub- Division of Chamba Distt. In Pangi valley, electricity is being provided to Saichu, Sahali and Hillaur. There is no metering and the energy is being provided to general public. The O & M charges being paid are very high and the same are from the Himurja resources.

Development of Solar Cities: Shimla and Hamirpur Cities of the Pradesh would be developed as Solar Cities under Ministry of New and Renewable Energy (MNRE), Govt. of India Programme. The programme aims at minimum 10% reduction in projected demand of conventional energy at the end of five years, which can be achieved through a combination of energy efficiency measures and enhancing supply from renewable energy sources. The final master plan for development of Shimla Solar City has been approved by MNRE, GOL, whereas, draft of Final Master Plan in respect of Hamirpur Solar City is with Ministry for according final approval.

The major impediments in the process of exploitation of hydel potential has been non-availability of adequate funds for execution of hydel projects within the limited resources of the State. The necessity of improvement in generation of electricity by renovation and modernisation of power houses has been fully realised at all levels. This is an area with comparatively less investment and where more benefits can be achieved. Of late, it has been decided by the State and the Central Government to involve private sector in the exploitation of hydel potential. Currently government has identified ten projects of 1,430 MW capacity, for which a number of proposals have been received from private sector. According to an agreement with Central Government, the State is getting a grant of 12 percent royalty from all the hydel projects which started generation after September 1990. This decision has entitled Himachal Pradesh to get 12 percent power free from Chamera-I and Chamera-II projects. Reliability on Hydel Schemes for power requirement, will also reduce the danger of environment pollution and provide greater scope for industrialisation.

The Directorate of Energy Himachal Pradesh decided to engage consulting agencies for preparation of a digitised basin-wise plan to help identify additional potential since it is expecting the hydropower potential of the state to go up to 25,000 MW from the current 23,000 MW. The state's total power potential was initially pegged at 20, 000 MW. With the focus on small and micro-hydel projects and private parties coming up with self-identified projects, the power potential increased to 23,000 MW. Besides the exiting capacity, some already allotted projects have been revised upwards. Tc have a complete view of the identified potential, ascertain the status of the projects on the ground and identify the remaining potential, offers invited from consulting agencies. The digitised plans will be prepared for Satluj, Chenab, Ravi, Beas and Yamuna.

The consulting agencies will be required to incorporate the projects which have already been commissioned, or being implemented and are on the anvil to be allotted in various river basins in the plan. They will also prepare reports for the hydropower projects which have been already identified. They will also physically mark the sites and on its basis confirm the domains and capacity with regard to projects for which feasibility reports are available. So far out of the 23,000 MW hydropower potential, 7728 MW has already been commissioned. There are many other projects, at the verge of completion increasing the total share of hydropower.

The plan is to exploit the entire hydropower potential by the end of the 14th plan (2022). The target for the 10th plan was 2090 MW, for the 11th plan it was 9155 MW and for the 12th plan 5027 MW. Ironically only 467 MW, 10.76 per cent of the total potential exploited, has been harnessed in the state sector. With most projects allotted to the private sector, even after exploiting the total potential the state sector projects will account for just 17 per cent. So far the major projects with an aggregate capacity of 5491 MW have been executed in the central sector or in joint ventures with central public undertakings and projects of 3609 MW capacity are under implementation.

CENTRALLY SPONSORED SCHEMES AND DEPARTMENTAL SCHEMES

(I) Rajiv Gandhi Grameen Vidyutikaran Yojna: Rajiv Gandhi Grameen Vidyutikaran Yojna was launched in April, 2005 with the aim to electrify all un-electrified villages/habitations and provide access to electricity in every households having provision of 90% capital subsidy and 10% Loan. HPSEB formulated district wise electrification schemes under "Rajiv Gandhi Grameen Vidyutikaran Yojna" (RGGVY) as per guidelines of Rural Electrification Corporation (REC).

Expected Benefits from the scheme: The focus of the R-APDRP, Part-'A' Scheme is on actual demonstration of performance. Establishment of reliable and automated systems for sustained collection of accurate base line data through adoption of information technology in the area of energy accounting.

Government of India (GOI) introduced the R-APDRP (Restructured APDRP) Programme during the 11th Five Year Plan for the towns having population more than 30,000 (10,000 for special category states) as per census, 2001 covered under the programme. For special category states like Himachal Pradesh, GOI loan for Part-'B' shall be 90% of the total project cost and 10% shall be arranged by the utility through loan /own funding. GOI loan for Part-'B' shall be converted into grant of equal trenches every year for five years as per the R-APDRP guidelines on the basis of reduction in AT & C losses.

In Himachal Pradesh 14 towns namely Baddi, Bilaspur, Chamba, Dharamshala, Hamirpur, Kullu, Mandi, Nahan Paonta Sahib, Solan, Shimla, Sundernagar, Una and Yol having population more than 10,000 are covered under R-APDRP. The schemes for these towns under R-APDRP (Part-B) includes renovation, modernization and Strengthening of 11KV & 22 KV level substations, Transformers/Transformer centres, Re-conductoring of 11KV and LT lines, load bifurcation, feeder separation, Load Balancing, HVDS (11KV), Arial Bunched Conductoring, replacement of electromagnetic energy meters with tamper proof electronic meters, installation of capacitor banks, mobile service centres and strengthening at 33KV or 66 KV system. Initially, the R-APDRP (Part-B) schemes amounting to 322.18 crore (Loan amount 289.97 crore) were sanctioned by M/s Power Finance Corporation Ltd. (PFC)/ Ministry of Power for all the 14 towns covered under R-APDRP in Himachal Pradesh. Due to non availability of land for construction of 66/11 KV substations and right of way problem for associated 66 KV lines, the schemes for Shimla and Baddi towns have been revised. The revised R-APDRP (Part-B) DPRs for Shimla and Baddi towns amounting to 120.34 crore and 84.10 crore respectively have been sanctioned by M/s Power Finance Corporation Ltd. (PFC) on 08.02.2012 and accordingly the original sanctions amounting to 322.18 crore (Loan amount 289.97 crore) have been revised to 338.97 crore (Loan amount 305.07 crore).

The counterpart funding (10% of the total project cost) amounting to 33.90 crore have also been sanctioned by M/s during June 2012. The M/s PFC PFC has released 101.684 crore as upfront money for these 14 towns. The loan documents for counterpart funding of 33.90 crore have been signed on 19th December, 2013. Also the sanction of financial assistance for carrying out distribution works covering civil works and other components in R-APDRP (Part-B) schemes of 14 towns in HP has also been accorded during May, 2013 by M/s PFC Ltd. for 65.53 crore (90% loan i.e. 58.98 crore and 10% HPSEBL share i.e. 6.55 crore).

H.P Power Transmission Corporation Limited

H.P Power Transmission Corporation Limited (HPPTCL) is an undertaking of Himachal Pradesh, which was established on 27th August, 2008 with a view to strengthen the transmission network in Himachal Pradesh and to facilitate evacuation of power from upcoming generating plants.

The jobs entrusted to Corporation by Govt. of Himachal Pradesh *inter-alia* included execution of all new works both Transmission Lines and Sub-Stations of 66 KV and above voltage rating, formulation, upgradation, execution of Transmission Mater plan of HP for strengthening of transmission network and evacuation of power. HPPTCL is discharging the functions of a State Transmission Utility (STU) and coordinating the transmission related issues with Central Transmission Utility, Central Electricity Authority, Ministry of Power (GOI), HP Government and HPSEBL. Besides, corporation is also responsible for planning and coordination of transmission related issues with IPPs, CPSUs, State PSUs, HPPCL and other State/Central Government Agencies.

Save Energy Scheme : On 23rd November 2008, BJP led Government launched a unique energy saving drive by distributing compact fluorescent lamps (CFL) to 1.65 million families free of cost, with two lamps of 15 watt and two of 20 watt in replacement to used bulb of 60 and 100 watt, two each. The scheme was named as *"Atal Bijali Bachat Yojna."* Two leading CFL Manufacturers, HPL Socomec and Phoenix were given contract to supply 7.2 million lamps.

Implemented in good faith the scheme was proposed to save 100 crore rupees annually in the form of energy to the tune of 115 MW and earning carbon credits. The scheme was criticised by the then opposition party congress (I) and serious charges were levelled against the scheme. The HP State Power Corporation was setup on 10th November 2007.

Power Panel Report : An 11- member panel set up by the state government in 2013 recommended sweeping changes in the power policy to expedite the implementation of projects by bringing down the gestation period from the existing 116 months to 65 months.

The most important recommendation made by the committee headed by Subhash Negi, Chairman, State Electricity Regulatory Commission (SERC), was scrapping the techno-economic clearance (TEC) and doing away with the time-consuming process of obtaining NOCs from various departments. Instead of TEC, approval will be granted to feasibility report by Himurja for projects up to 5 MW and by the Directorate of Energy (DoE) for projects more than of 5 MW and up to 25 MW.

The feasibility report will have complete technical details like discharge data of water source, sites of diversion structure and power house, length of head race tunnel and land requirement. Clearances and compliance of norms and conditions will be ensured by the developer before and during the execution of the project. The developer will be allowed six months for preparing the report, which is extendable to a maximum of nine months. The domain, elevations and sites for diversion structure and power house will be frozen once the report is approved and all the clearances will be granted on the basis of it.

Earlier, TEC was granted on the basis of a detailed project report (DPR) and the entire process required more than three years. The DPR will be appraised by the DoE only to ensure optimization of power potential and adherence to safety and quality specifications. Techno-economic appraisal will be carried out only if the developer wants it for funding from financial institutions. It will not be a part of the clearance process. The developer will approach panchayat in one go and the SDM concerned after hearing the objections will pass a speaking order against which the aggrieved party can appeal to the Deputy Commissioner and, thereafter, to the Secretary (Power).

The committee also recommended downward revision of free power to be given as royalty from the current 7 to 2 per cent for the first 12 years, 16 to 13 per cent from 13 to 30 years and 25 to 19 per cent from 31 to 40 years. It will help bring down generation cost by 10 paise per unit. One per cent free power to the affected people should be given through direct benefit transfer and the entire fund under the local area development fund should be spent only on schemes approved by the panchayat. The state power board will buy power from projects up to 2 MW and for projects from 2 to 5 MW, it will formulate a transparent power purchase policy keeping in view factors like the evacuation cost, line loss and hydrology. The recommendations, if implemented, will bring down the cost of generation and the government will get free power as royalty in almost four years.

Himurja in Himachal Pradesh

Himurja (Himachal Pradesh Energy Development Agency) was established to institutionalize the various programmes and non-conventional energy sources which are aptly suited for decentralized application in the state. This is the most ambitious programme to evolve the optimal energy plan for rural India. The main objective of Himurja is to promote research, development and popularization of nonrenewable conventional sources of energy and thereby deal with the problems caused on account of the rapid depletion of non renewable resources.

It was in 1984-85 that Integrated Rural Energy Planning Programme was taken up in two blocks. Subsequently, this programme was extended to 15 blocks. In 1992-93 onwards, programme was extended to 26 blocks. It was further raised to cover all the blocks under this programme. *The broad objectives of Himurja are:*

(i) To identify and formulate proposals to set-up units of non-conventional and renewable energy device. The energy requirements of remote villages or other selective habitation centres by the use of bio-energy, devices for utilizing solar energy, wind energy and geothermal energy is provided.

(ii) To popularize such programmes among the people which have emphasis on non-conventional sources of energy through awareness and demonstration.

(iii) To standardize the renewable energy systems, provide consultancy services,

technical know-how to the users, promoters and manufacturers of various systems and devices of renewable sources of energy and its conservation.

(iv) Laisoning with other agencies in the country and abroad in the field of alternative sources of energy.

(v) To provide technical, financial or other assistance for the formulation of programmes, designs and projects meant for extension of alternate energy development in the state.

The area of operation of Himurja is quite wide. Various financial incentives are being provided for the use of energy efficient and non-conventional devices.

Himachal Pradesh State Electricity Board (HPSEB)

The State Electricity Board was constituted on 1st September, 1971 under Section 5 (1) of the Electricity Supply Act, 1948 and is engaged in the execution and investigation of various hydroelectric projects found to be economically viable. Like other state electricity boards in the country, the HPSEB is responsible for promoting the coordinated development of power potential, generation, transmission and distribution of electricity within the state in the most efficient and cost effective manner. This work is carried out by the board through various functional agencies. The other activities carried out by the board are achieving accelerated growth of rural electrification and industrialization. The head office of the board is located at Shimla. Overall control on different activities is exercised by the board through administrative, technical and account wings.

Himachal Pradesh Ex-Servicemen Corporation

The Himachal Pradesh Ex-servicemen Corporation was constituted under the Himachal Pradesh Ex-servicemen Corporation Act, 1979 and it came into existence in May, 1981. The headquarters of the corporation is located at Hamirpur. The main objective and function of the corporation is to arrange financial assistance to the ex-servicemen so as to enable them to start self-employment ventures in the field of transport, cottage and small-scale industries, poultry, dairy farming, hotel, horticulture, agriculture and retail business. Besides, arranging loans from the banks and financial institutions, the corporation provides margin money loans to ex-servicemen at low rate of interest. Training courses are also arranged in different fields in order to assist them settle in civil life through self employment ventures.

The corporation has also secured a contract for carriage of cement by ex-servicemen truck operators from the cement factory at Barmana. This contract has provided permanent work to this corporation for purchase of trucks. The main activity of the corporation is, however to provide, and arrange assistance to the ex-servicemen by way of bank credit, margin money, loans and interest subsidy.

HORTICULTURE AND FLORICULTURE

Fruit growing has a distinct advantage over cultivation of cereals or other cash crops in Himachal Pradesh because of the typical agro-climatic conditions. Himachal Pradesh, though a small state, is gifted with a variety of agro-climatic conditions, which are suitable for growing a large variety of fruits. Since 1980, Himachal has taken big strides in horticulture development. The area under fruits has increased from nearly 792 hectares in 1950-51 to 47,569 hectares in 1971-72,92,467 hectares in 1980-81, 1,20,580 hectares in 1984-85 and 1,42,485 hectares in 1987-88. 1,89,689 hectares in 1995-96, 207,240 in 1998-99, 2,23,035 in 2001-02, 1,91,668 in 2005-06, 2,04,629 in 2008-09 and 2,08,154 in 2009-10. Upto 31st March 2014, the area under fruits was 2,18,303 hectare and production reached at 5.56 lakh tonnes.

Horticulture is the most suitable avocation for solving the inherent problems like low land to man ratio, limited availability of solar energy, undulating physiography; excess soil erosion and low productivity.

The State is divided into 4 agro-climatic zones from horticulture point of view.

1. Shivalik Hills
2. Mid Hills
3. High Hills
4. Cold Dry Zone

1. Shivalik Hill Zone- It consists of foothills and valley areas upto an elevation of about 800 meters above the mean sea level with sub-tropical climate. It occupies about 33% of the cultivated area of the State. The soils are mostly sandy loam in texture with scattered loamy patches. The area is highly erosion prone due to weak geological formation and scanty vegetation. In this area moisture retention capacity is quite poor. The area receives about 1500 mm of annual rainfall.

2. Mid-Hill Zone- This zones extends from 800 meters to 1600 meters above mean sea level having mild temperate climate with annual precipitation of about 1800 mm. The soils vary from sandy loam to loam in texture. It occupies about 32% of the geographical area and about 53% of the cultivated area of the State. The peculiarity of this area is that major portion of its uncultivated area is under grasslands, mostly on the southern and western slopes. The forests are mainly on northern and northeastern slopes.

3. High-Hill Zone- This area falls above 1600 meters above mean sea level with humid temperate climate and alpine pastures. The zone covers about 25% of the geographical and about 11% of the cultivated area of the State. The annual precipitation varies from 1000 to 1500 mm. Most of the cultivated

area of this region being located on higher reaches lacks irrigation potential.

4. Cold Dry Zone- The area lies above 2700 meters above mean sea level. It occupies about 6% of the forest area and 3% of the geographical area of the State. The level of the precipitation is as low as 200 mm during summer and very heavy precipitation in the winter in the form of snow. Being a single crop area, the cultivation is carried out only in summer season under irrigated conditions.

A shift in cropping pattern from traditionally agriculture to the developing of horticultural crops is therefore emerging fast as it provides the necessary cropping system of hilly conditions. Being labour intensive it has the potentialities to generate increased employment opportunities in rural areas. Piercing into diversified agro-climatic conditions of the state it is suitable for growing a number of fruit crops adopted to sub-tropical temperate conditions and to specialised crops like *hops, chilgoza, mushroom, olives, sarda melon* and *pistachio nut.*

The State offers vast scope for the development of fruits like apple, nuts, citrus, temperate fruits and other sub-tropical fruits. Himachal Pradesh is primarily a temperate region. So besides some tropical fruits, temperate fruits such as apple, pear, plum, almond, raisin grapes, walnut, apricot etc. are grown in abundance. The vast tracts of land in Himachal Pradesh are suitable only for growing fruits because of soil texture and the degree of slope do not permit their use for any other agricultural use. Fruits cultivation has some distinct advantages such as; it helps in preserving ecological balance and checks soil erosion, imparts nutritive diet to the people and increasing employment potential of horticulture based industries.

At present, the middle zone is (1200 to 2400 meters elevation) *most developed fruit zone of the State.* Nearly 70 percent of fruit area and its production are found in this zone located in South-Eastern and East -Central parts of the State. In individual districts, Mandi, Kullu, Lahaul, Shimla, Solan, Sirmaur contribute together 82 percent of orchards area and fruit production. Kangra, Una, Hamirpur, Chamba and Bilaspur districts account only 18 percent of the total fruit area and production. The first three districts in terms of area are Shimla, Kangra and Mandi. The minimum area under horticulture is in Lahaul Spiti district.

Himachal Pradesh is also called as *"Apple State of India".* The cultivation of apple in Himachal Pradesh is supposed to have begun some time in the middle of the 19th century, when the British varieties were introduced by 'Captain R.C. Lee' in Kullu and 'Alexander Couts' in the Shimla region. Himachal has the proud privilege of having the best apple orchards in India today. There is a *Fruit Research Station,* under the control of the Department of Agriculture/Horticulture, first of its kind in the State known 'COUTS GARDEN' at Mashobra near Shimla. But the British varieties could not get much favour in the Indian as well as foreign markets.

So in 1918, **'Samuel Evans Stokes'** (later Satyanand Stokes) introduced delicious varieties from United States of America. He selected Kotgarh area for apple plantation which proved ideal and gave new direction and scope to the apple growers. In 1950-51, area under apple orchards was only about 480 hectares, in 1970-71 it was 26,735 hectares, in 1980-81 increased to 43,356, in 1984-85 with conducive policy, orchards business had become very popular, so area occupied was 49,840 hectares and in the end of 1988, area covered by apple increased upto 54,831 hectares.

In 1994-95, the area under apple cultivation was 75,469 hectares and production 122.78 thousand tonnes; in 1998-99 the area increased to 85,671 hectares and production 393.65 thousand tonnes. With greater scope of export focused and so by 2001-02 the area increased to 92,820 hectares but production slumped to all time low due to poor weather conditions to 180.53 thousand tonnes. Having this bad experience the area in the subsequent years came down, and so was the production.

In 2003-04, 84112 hectares land was under apple cultivation and production increased to 459.49 thousand tonnes. In 2007-08 94,726 hectares and production reached at 592.57 thousand tonnes. The area under apple increased to 99564 hectares in 2009-10 and production all time high 892.11 thousand tonnes.

Himachal's quality apples are exported now to many countries, such as Gulf countries, former U.S.S.R., Middle East and European countries. In 1985, total boxes of apple exported were 76,83,183; which increased to 1,58,10,117 in 1986.

There has been fluctuation in apple export due to various reasons such as low production, poor quality, competition from other countries etc. In 1990-91, 1,72,63,411 boxes were exported and in 2002-03 the number went upto 2,76,44,302 boxes. In 2005-06,3,94,56,542 and 2010-11, 4,64,32,146 boxes were exported.

TABLE - 1

FRUITS PRODUCTION/AREA/EXPORT (1950 TO 2013)

Year	Unit			
	Area under fruit production	Fruits Production (000 MT)	Apple Production (000 MT)	Apple Export (hectare)
1950-51	792	1.2	–	
1955-56	2030	7.0	–	–
1960-61	6004	18.7	12.0	9.6
1970-71	44329	148.6	103.1	182.5
1975-75	63385	245.9	200.0	160.0
1980-81	92467	139.8	118.0	94.4
1985-86	128770	207.7	174.6	139.7
1990-91	163330	386.3	342.1	307.9

1993-94	176891	352.8	279.1	265.3
1994-95	189689	170.5	122.8	249.1
1995-96	195684	311.9	276.7	259.6
1997-98	202362	279.7	239.3	210.8
1998-99	204642	436.00	393.65	284.1
2001-02	2,23,035	263.45	180.53	103.4
2004-05	1,82,441	692.01	527.60	315.6
2007-08	2,00,502	712.84	592.57	406.8
2010-11	2,08,154	1027.82	892.11	622.3
2012-13	2,10,126	1081.32	910.32	724.1

Source: Important Facts on Himachal Pradesh DESHP-1950-2013.

To improve the quality of the orchards, there is a network of about 70 progeny-cum-demonstration orchards in the State. The rapid growth in fruit production has also brought many problems such as marketing, transportation, utilisation of fruits and provision of cold storage to be tackled immediately to boost the morale of fruit growers. There is imperative need to build cold storages in the districts adjoining to the plains. The establishment of HPMC and various other projects from the aid of World Bank are steps towards right direction.

The *"Himachal Apples"* have gained superiority over apple produced in other states of the country. In every All India Apple exhibition in the past Himachal Pradesh has won maximum number of prizes and challenge shields since 1958. Apple fruit being delicate and fragile a slight mishandling may injure it. Therefore all marketing operations like picking, grading, packing and transportation need utmost care. According to one estimate on an average, the orchardists had to pay Rs. 2.55 per box for grading only in 1998-99. At present (2012-13) Rs 25/- are paid for grading of the boxes.

The apple cultivation in Himachal Pradesh is more due to narrow terraces and terrains, the unique locational and climatic advantages. The investment on apple orchard is profitable and financially viable and provides more employment. Other reasons to go for apple cultivation are utilization of marginal lands not fit for other crops.

Its plantation conserve the soil and is very important from environmental point of view. Hence apple crop is important to a sizeable number of farmers as it improves their economic condition. Since the economy of the Pradesh is dependent on this fruit, the state has created a number of infrastructural facilities, such as ropeways, roads, mechanical grading, packing houses, processing agro-based industries etc. The public sector integrated carton manufacturing factory at Pragati Nagar (Kotkhai) is doing good work by manufacturing telescopic cartons.

In 2010, for the first time the Horticulture Department succeeded in growing apples in lower hills of the state between the height of 3,000 feet and 4,000 feet. So far, apple was grown only in upper areas above the height of

4,000 feet in Kullu, Mandi, Shimla and Kinnaur districts only. With the efforts of the Horticulture Department now apple can be grown in the lower hills, particularly in Dhauladhar hills comprising Palampur, Dharamshala and Jogindernagar regions.

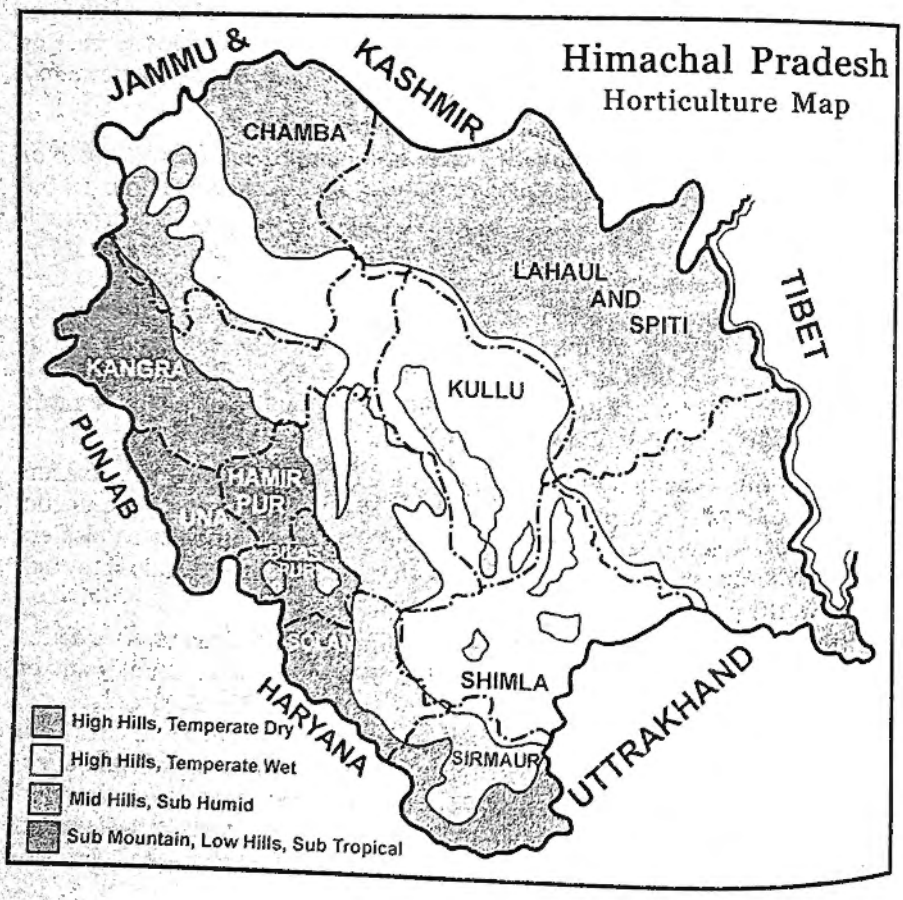
The commercial cultivation of apple in the lower hills, particularly Kangra, Hamirpur and parts of Mandi districts, would boost the economy as it would be a major cash crop. The state government has given its approval for commercial cultivation of apples in the lower hills. The experiments in this regard was conducted by the department in its Palampur Horticulture farm that proved a great success and had given a big boost to horticulture experts.

The *"spur apple"* imported from USA was found most suitable in low hills of the state. Since 2011-12 Himachali apple facing tough competiti from China, Afghanistan, Australia, Austria, Belgium, Brazil, Canada, Ch America, Newzeland, Iran and Italy. Himachal is the largest producer of A in India, but the quality of apple is not very good, that is why Indian markets are looking upto other countries.

In the year 2014, apple cultivation was reported successful in Hami district at the elevation of 700 meter above mean sea level. Apple tree bear fruits in good quality and quantity has shown new direction to the farmers.

ORGANIC CURE FOR APPLE DISEASE

The Organic formulation made from *cow urine, old lassi* and *neem oil* has proved effective in keeping away not only the *"marssonina"* fungus but also a host of other diseases. This organic cure was developed by a farmer named Gopal Mehta of Kotgarh area of Shimla district in the year 2011. "The orchards can be protected effectively with a mixture of water (200 litre), cow urine (15 litre) and long-stored sour buttermilk (15 litre), sprayed fortnightly from May 15 onwards till the harvesting of the fruit". In fact, the stench of the mixture was so strong that even animals like monkeys did not venture near the orchards for a couple of days after every spray. This organic spray is equally useful in growth and size of the apple.



Another organic formulations was developed by a farmer named Arun Kuthiala from Karsog area of Mandi district. In this formulation consists 200 liters of cow urine, one liters of neem oil and soap nut solution as emulsifier; should be sprayed five to six times during the season. These organic spray has helped in the growth of the fruit and its quality.

Citrus Fruits: The genus Citrus comprise a wide spectrum of varieties spread over all the tropical and sub-tropical parts of the state, country and of the world. Its production is reported from countries like China, Brazil, Israel, Italy, Mexico, U.S.A., Japan, South Africa etc. Most of species of citrus are native of South-East Asia. Among these species well known are *mandarin orange, sweet orange, sour orange, lime, lemon, sweet lime, grape fruit* and *citron*. These are successfully grown in the sub-mountain tracts with elevation from 75 meters to 250 meters offer congenial climate in Himachal Pradesh.

Thus lower areas offer the most suitable conditions for the cultivation of citrus fruits. Due to mountain slopes and heavy rainfall usually some sort of terracing to the slopes is necessary to avoid soil erosion and water logging. It is desirable to use budding plants of all citrus fruits.

Rajgarh- The Peach Bowl of Asia : Rajgarh is located in the heart of Sirmaur district in a lush green valley. It is the biggest subdivision of Sirmaur with a population of 76,509 (2001 census). Rajgarh has two subdivisions, one is Rajgarh itself and the other is Sarahan, another beautiful valley of Sirmaur. The total geographical area of Rajgarh is 810 sq km and 30 per cent of the total area is under forest. The total income from various sources, which includes sale of peaches, other stone fruits and vegetables, was about Rs 32 crore (2006). This also includes income from wood sold through the H.P State Forest Corporation in Rajgarh valley, which was Rs 2 crore.

Rajgarh is less than 100 Km from Chandigarh via Solan and about 150 Km via Nahan. In the south, it touches the beautiful Renuka lake and Nahan, the district headquarters of Sirmaur and beyond this starts Haryana. In the

northeast, it touches the Theog and Chaupal tehsils of Shimla district. *"Rajgarh is so centrally located that it can be called the heart of Sirmaur district. The environs are lush green and the air is clean. It is colourful and picturesque and it can be compared to hamlets in Europe. Rajgarh is a place of great beauty."*

Basically, the people of this area belong to *Khas Rajput* clan. It is said that the local people in the Pajotha Valley called *Miyans* were originally Rajputs from Rajasthan. During the freedom movement, the village figured in the popular Pachhota movement. It played a significant role in the liberation of states. The veteran freedom fighter Vaid Surat Singh of this valley played a stellar role in this movement. And Sai Ram, another great personality of this valley, was a great educationist during the pre-British era. He played an active part in spreading education in Rajgarh and Sirmaur. He also established the First school in this area about 100 years ago. The people of this valley are dynamic and hard-working. They are tough, stout and basically good-looking and simple people with sharp features. They are religious and God-fearing and worshippers of Lord Shiva and Goddess Durga. The local *Shaya temple* of lord Shirgul, the descendant of lord Shiva, has a mammoth following. According to a legend, Lord Shirgul had first come to Shaya village and later settled in Chur Chandani Churdhar mountains at a height of 12,000 feet.

The locals of Rajgarh, Sirmaur and the people of adjoining Shimla district go to pay obeisance at this temple once a year. There was a fort of Raja Sirmaur in Rajgarh. It used to house various offices of Rajgarh subdivision. It also housed the PWD office and in the adjoining area there was a store of blasting materials i.e. detonators. But unfortunately, in 1960, this store blew up in a freak accident and the entire fort was razed to the ground. The valley mourned the loss of a priceless monument. But the tragedy proved to be a blessing in disguise as a construction boom started in this area.

Rajgarh has today emerged as a small town cluttered with hundreds of concrete structures. It is a good sign from the development point of view, but definitely not a healthy one keeping in mind the natural beauty of this valley. Around this time, in the 1960s, the people of this valley also started growing vegetables and stone fruits that included peaches. "The dream of the first Chief Minister of Himachal Dr Y.S Parmar has been realised as Rajgarh is today known as the *peach bowl of Asia.* Every year, about Rs 4 crore worth of this fruit is grown here. Dr Parmar had initiated fruit cultivation here and it was carried forward with great determination and hard work by well known bureaucrat T.N Kaul."

Rajgarh subdivision has 550-km of roads. The condition of the roads isn't good but there is improvement since the past few years. The local temples include the *Shaya Chabron* Temple of Lord Shirgul and *Mata Matnali temple.*

The famous *Baru Sahib Gurdwara* also lies in this valley and is worth a visit. This gurdwara is 29 km from Rajgarh and is situated beyond Kheri, a picturesque spot on the banks of a tributary of the Giri river. According to a

legend, Guru Gobind Singh meditated here. The local management runs an Akal Academy, Senior Secondary school. This gurdwara and school are unique because they have their own private road, own workshops, petrol station and a generator (in case of electricity failure). The credit for inception and introduction of peaches in Rajgarh mainly goes to late Dr Y.S Parmar, the former Chief Minister of Himachal Pradesh. The first experimental peach orchard was planted by the Department of Horticulture in 1955. From 1955 to 1970, there was no peach boom visible though people had started growing other routine stone fruits and vegetables. It was only after the 70s that the peach revolution started and became visible.

To promote diversified base of horticulture in Himachal Pradesh efforts are being made to increase the production of crops like olive, figs, pistachio nuts, saffron, chilgoza etc.

Olive: The olive cultivation in Himachal Pradesh was started with the technical assistance of Italian government. Its first phase was started in 1984 and completed in 1987. The second phase was started in December 1990 and completed in 1993 at Bajaura in district Kullu.

Saffron: Jammu & Kashmir state is famous for the production of saffron. In Himachal Pradesh saffron cultivation has been giving encouraging results in *'Kinnaur district'* since 1985-86 and now its cultivation is taking place in Tabo (Spiti valley) area also.

Pistachio: Unlike apple it does not pose problems of transportation, storage and marketing. The successful introduction of pistachio cultivation in Kinnaur has brightened the prospects of growing the costly dry fruit on a commercial scale in the temperate zone of Himachal Pradesh. Once its seeds of valuable varieties were imported from Afghanistan and an experimental plantation was raised at a farm near Kalpa. Besides some more varieties are introduced from Mediterranean region. If pistachio is introduced in the chilgoza pine area, the cultivation of this fruit may be a great success. It requires very little care compared to other temperate fruits. The cold and dry zone, consisting districts Kinnaur, Lahaul-Spiti and Chamba are ideally suited for growing dry fruits like, almond, walnut, dried apricot, pistachios, prune, raisin grape etc. This cold zone, which falls above 3523 meters above mean sea level and has dry summer and less than 25 cm, rainfall annually. Some local varieties of almond like, *'Dheber Badam', 'Telangi selection'* and *'Riba selection'* etc. have been found very promising.

In 1985, the research wing of department of horticulture initiated the cultivation of pistachios in the cold and dry region of Kinnaur the first initiative was with seeds imported from Iran, then in 2001 from California in America 60 root stock was imported for cultivation. After five years samples were developed, normally as per California manual it takes seven years. Out of these emerged stock 40 were planted in Sharbo and 20 in Tabo area. The project has been successful and Kinnaur district is likely to emerge pistachios bowl of the state.

There is a fruit processing factory with the capacity of 18,000 tonnes at 'Parwanoo'. This is a World Bank project. Dr. Parmar University of Horticulture at Nauni in district Solan is expectedly playing a great role in developing new species suitable for plantation, according to the soil texture of the area.

The period from 1948-1966 was a period of political uncertainty in Himachal Pradesh. During this period hardly any concrete project was set up to make this land viable from horticulture point of view. But since 1969 under all five year plans horticulture has been given special emphasis.

PLAN OUTLAYS & EXPENDITURE IN HORTICULTURE

1 Fourth Five Year Plan (1969-1974)	Expenditure 356.82 Lakh
2 Fifth Five Year Plan (1974-1978)	Expenditure 808.55 Lakh
3 Sixth Five Year Plan (1980-1985)	Expenditure 1727.96 Lakh
4 Seventh Five Year Plan (1985-1990)	Expenditure 8156.29 Lakh
5 Eighth Five Year Plan (1992-1997)	Expenditure 11118.38 Lakh
6 Ninth Five Year Plan (1997-2002)	Expenditure 18196.04 Lakh
7 Tenth Five Year Plan (2002-2007)	Expenditure 14863.01 Lakh
8 Eleventh Five Year Plan (2007-2012)	Expenditure 35081.40 Lakh
9 Twelfth Five Year Plan (2012-2017)	Expenditure 35081.40 Lakh
10 Annual Plan (2012-2013)	Outlay 7279.30 Lakh
11 Annual Plan (2013-2014)	Outlay 8497.00 Lakh

Diversification: To bring diversification in the horticulture, special efforts are being made to promote other horticultural related activities and products. Such as beekeeping, hops production, floriculture etc.

Bee-Keeping: Himachal Pradesh offers very rich potentiality for the production and development of beekeeping, because of its large areas under agriculture, horticulture and forestry. Honey is produced by the bees. Owing to its medicinal quality it has big demand in the country as well as export potential. Beekeeping is least capital intensive with quick return, thus making it possible to be adopted on a large scale by the weaker sections of the farmer community for getting additional income to improve their economic conditions. The honey bees are the important source of pollination. In the year 1983-84, beekeeping scheme got a severe blow, when almost whole of the bee colonies especially 'Apic Indica' were perished due to outbreak of *"Sac-Board"* disease in the region. In the past years, concerted efforts have been made due to which in all 1,267 bee colonies were set up, upto the year of 1987-1988. Besides this, there are about 4,947 bee colonies with private beekeepers in the State. The total honey production in the State during the year 1987-88 was about 36.6 tonnes and in 1998-99 it went upto 96.2 tonnes.

Indo-German Dhauladhar project is in progress in the Dhauladhar range of Kangra district since July 1980. It provides for integrated development in forestry, horticulture, animal husbandry and agriculture. The research station

at Nagrota in Kangra district is the leading centre in the country for research work on beekeeping farmers, especially unemployed youths have become highly interested in this industry because of introduction of Italian honey bee (Apis Mellifera) and standardization of the technique for its multiplication has revolutionised beekeeping. The technology of honey extraction and control of pests and diseases has been stadardised now.

Under the programme ot horticulture development for weaker sections of the society special incentives in the form of subsidy are given for purchasing plant material, pesticides, horticultural tools and implements and micro nutrients at the rate of 25 percent to small farmers, 33 percent to marginal farmers and 50 percent to scheduled castes, scheduled tribes and backward area farmers. Till December 1998, 418 bee-colonies have been distributed amongst beekeepers and 351 Metric Tonnes honey was produced. With growing interest in bee keeping, it is becoming a big source of income to the youths, who wanted to have their own business. By the end of 2010, there were 4935 bee colonies and annual production 794 metric tonnes. As the demand of honey for medicinal purposes is growing day by day the expansion of bee keeping and honey production is imperative.

Floriculture and Land Scaping

Floriculture, or flower farming, is a discipline of horticulture concerned with the cultivation of flowering and ornamental plants for gardens and for floristry, comprising the floral industry. The development, via plant breeding, of new varieties is a major occupation of floriculturists. Floriculture crops include *bedding plants, house plants, flowering garden* and *pot plants,* cut cultivated greens, and cut flowers. As distinguished from nursery crops, flori culture crops are generally herbaceous. Bedding and garden plants consist of young flowering plants (annuals and perennials) and vegetable plants. They are grown in cell packs (in flats or trays), in pots, or in hanging baskets, usually inside a controlled environment, and sold largely for gardens and landscaping. Pelargonium ("geraniums"), Impatiens ("busy lizzies"), and Petunia are the bestselling bedding plants. The many cultivars of Chrysanthemum are the major perennial garden plant in the United States. Flowering plants are largely sold in pots for indoor use. The major flowering plants are *poinsettias, orchids, florist chrysanthemums,* and *finished florist azaleas.* Foliage plants are also sold in pots and hanging baskets for indoor and patio use, including larger specimens for office, hotel, and restaurant interiors.

Cut flowers are usually sold in bunches or as bouquets with cut foliage. The production of cut flowers is specifically known as the cut flower industry. Farming flowers and foliage employs special aspects of floriculture, such as spacing, training and pruning plants for optimal flower harvest; and post-harvest treatment such as chemical treatments, storage, preservation and packaging. In Australia and the United States some species are harvested from the wild for the cut flower market.

Government of India has identified floriculture as a sunrise industry and accorded it 100% export oriented status. Owing to steady increase in demand of flower, floriculture has become one of the important Commercial trades in Agriculture. Hence commercial floriculture has emerged as hi-tech activity-taking place under controlled climatic conditions inside greenhouse. Floriculture in India, is being viewed as a high growth Industry. Commercial floriculture is becoming important from the export angle. The liberalization of industrial and trade policies paved the way for development of export-oriented production of cut flowers.

The new seed policy has already made it feasible to import planting material of international varieties. It has been found that commercial floriculture has higher potential per unit area than most of the field crops and is therefore a lucrative business. Indian floriculture industry has been shifting from traditional flowers to cut flowers for export purposes. The liberalized economy has given an impetus to the Indian entrepreneurs for establishing export oriented floriculture units under controlled climatic conditions. Agricultural and Processed Food Products Export Development Authority (APEDA), is responsible for export promotion and development of floriculture in India.

Varieties: Floriculture products mainly consist of *cut flowers, pot plants, cut foliage, seeds bulbs, tubers, rooted cuttings* and *dried flowers* or leaves. The important floricultural crops in the international cut flower trade are rose, carnation, chrysanthemum, gargera, gladiolus, gypsophila, liastris, nerine, orchids, archilea, anthuriu, tulip, and lilies. Floriculture crops like gerberas, carnation, etc. are grown in green houses. The open field crops are chrysanthemum, roses, gaillardia, lily marygold, aster, tuberose etc.

Areas of Cultivation: Maharashtra, Karnataka, Andhra Pradesh , Haryana, Tamil Nadu , Rajasthan , West Bengal and Himachal Pradesh have emerged as major floriculture centres.

Himachal Pradesh is located in North Western part of India between latitude 30° 22' 40" N to 33° 12' 20"N and longitude 75° 47' 55" E to 79° 04' 20" N. In Himachal Pradesh, the per capita cultivated land is only 0.12 hectares while per capita irrigated land is a meager 0.02 hectares. This situation necessitates a cropping pattern that would ensure highest income per unit area/ labour/ investment. Commercial floriculture perfectly caters to this necessity. The agro-climatic conditions prevailing in the State of Himachal Pradesh offer excellent opportunities for the development of floriculture both to serve the internal off-season market and also for exports, an avenue yet to be tapped. A large variety of floriculture products, viz., cut flowers, bulbs, seeds, live plants, etc. can be produced as economic cash crops. Although flowers from different agro climatic zones of the State can be made available all through the year for domestic market, export quality flower produce can be ensured only by cultivation under controlled environment conditions of greenhouses.

Himachal Pradesh has diverse form of climate in its various parts which is being exploited for the cultivation of a wide range of flowers. As such, main objective of this scheme is to develop commercial floriculture as a side economic pursuit in orchards besides beautification of the important places through flower cultivation, ornamental gardening and land scarping. 35 Flower Growers Societies had been registered by the end of December 1998.

Floriculture has been picked up commercially in Himachal Pradesh with the area under its production increasing gradually. The commercial production of floriculture which was introduced in the state in 1959 began in 1980. The total area under floriculture which was five hectares in 1980 had increased to 100 hectares in 1998. Twenty-eight cooperative societies employing over 1,000 farmers were engaged in seed production and flower growing. The annual sale had touched Rs. 4 crore till 1998.

Commercial floriculture has become popular in Sirmaur, Solan, Kullu and Kangra district, *'Mahog'* village near Chail has been declared a model village for floriculture. In order to encourage floriculture, the government has introduced green housed farming and the drip irrigation system. Subsidy is being given for setting up drip irrigation system. The state government is providing several facilities for the development of floriculture. These include free technical advisory services, training facilities, arrangement of quality plant material and study tour.

The research and development support is being provided by Dr. Y.S. Parmar University of Horticulture and Forestry, (Nauni) Solan and the CSIR complex, Palampur. Import duty on machinery for seed development and soil preparation and specified goods for green house has been brought down to 25 percent. Flower seeds and tissue culture material of any plant origin can be imported without an import permit. According to the guidelines of the Centre, units engaged in floriculture can also avail of the benefits of duty-free imports under the ECU/SPZ scheme even if they export 50 percent of their production.

Kangra is emerging as an important floriculture belt. The commercial, cultivation of ornamental and cut flowers is becoming popular in the district. Intensive training in floriculture production technology is also being given here. Of 12 development blocks in the district, *Baijnath, Panchrukhi, Bhawarna, Nagrota Bagwan, Rait* and *Kangra* are suitable for rose cultivation on the pattern of Bulgaria and Turkey. About 150 hectares was proposed to be covered under rose cultivation in these blocks. Floriculture in Kangra was being promoted by the District Rural Development Agency under the project *"Kangra self-reliance by 2,000 A.D."*. Six flower cooperatives had been registered in the district up to 2001 with a total strength of 150 growers who have formed a district flower growers federation. The state government intends to provide each development block with trained extension officers.

The state had 556 hectare area under floriculture uptill 2011, out of that 256 hectare solely is in Sirmaur district (50% of the total area). The popular

varieties of flower are -Rose, Carneshan, Lilium, Marigold, Chrysanthemum and Jasmine. In the early 90's of the 20th century and advisor of Holland government and a floriculture expert Mr. John Nile visited Palampur valley and found the soil of the area suitable from floriculture point of view. In 1992 the initiative was taken under Indo-Dutch mission (IPEDA) came to be known *"Chandpur Flowers"*. Seven acre land was allocated for the cultivation of flowers, the varieties introduced were tulip, Asiatic Lily, Oriental lily etc. The quality of flower was so good that *'Chandpur flower'*, became household name in the flower market. In 1994, state's largest flower production unit was setup in Chandpur, near Palampur. But the entry of middlemen in the last decade of 20th century destroyed flower unit permanently.

The state Government decided to focus on floriculture to expand its market and provide additional source of income to farmers. A total of 763 hectares is under floriculture in the state with the total value of flowers produced till 2013-14 being Rs. 88.98 crore. Marigold, which is in great demand, is being cultivated in open and in 2012-13 almost 30,280 metric tonnes was grown. In 2012-13, the total area under floriculture was 913 hectares and various varieties of flowers worth Rs. 99.98 crore were grown. Palampur in Kangra, Bharmaur in Chamba, Rajgarh in Sirmaur, Bilaspur, Mashobra in Shimla have emerged the major flower growing areas of the state.

An experienced advisor to the Dutch (Holland) Government John Nile found Palampur belt most suitable for flower cultivation and production. The commercial production of flower was started at Chandpur 5 km. from Palampur in 1994. This project was funded under Indo-Dutch mission and APIDA 1992. In a short span of time *'Chandpur Flower'* became popular name in the national market, having good cultivation of Tulip, Asiatic Lilly, Oriental lilly etc. The unit provided employment to a large number of unemployed youth, but the entry of middleman in the beginning of 2001, led to the end of a flourishing commercial unit in 2002.

Even though there is immense potential for floriculture in Himachal, both in poly houses as well as in the open fields, but the absence of proper marketing has not only forced some growers to give up the cultivation but also put on hold expansion plans. The Horticulture Department provides Rs. 2.50 lakh per 1000 sq. mts. with the maximum limit being 4000 sq. mts and Rs. 10 lakh.

Rose Garden Nauni: The floriculture department of Dr. Y.S Parmar University Nauni, setup a rose garden in its campus, spread in 2000 sq. ft area. The project was started in the year 2010 but completed on 20th April 2014, have Indian and imported variety of red, pink, yellow, black, white, spotted etc. roses in the garden. The Nauni rose garden has been designed on the pattern of Chandigarh and Otty rose garden to attract more and more tourists.

ADVANTAGES OF FLORICULTURE

The Agro climatic conditions prevailing in the State of Himachal Pradesh offer excellent opportunities for the development of floriculture both to serve

the internal off-season market and also exports. A large variety of floriculture products, viz., cut flowers, bulbs, seeds, live plants, etc. can be produced. The natural agro climatic conditions offer ideal production environment for flowers and the planting material i.e., expensive heating and cooling systems in the greenhouses are not required. Power required for running the greenhouses is charged at domestic rates in the State. Flowers from different agro climatic zones of the State can be made available from open field cultivation all through the year for domestic market, however, export quality flower produce can be ensured only by cultivation under controlled environmental conditions of greenhouses.

SERVICES PROVIDED BY THE DEPARTMENT OF HORTICULTURE INFRASTRUCTURAL SUPPORT

Floriculture Nurseries: The Department of Horticulture has established seven Floriculture Nurseries in various Districts, viz., Navbahar and Chhrabra in Shimla District, Mahog Bag and Parwanoo in Solan District, Bajaura in Kullu District and Dharamshala and Bhatoon in Kangra District.

Model Floriculture Centre: The "Model Floriculture Centre" has been established at Mahog Bag (Chail), District Solan and a Tissue Culture Laboratory for the propagation of planting material of commercially important floriculture crops. The present infrastructure at the "Model Floriculture Centre" consists of 1706.5 sq. m of Greenhouse area, one Handling Unit for post harvest handling of flowers and 3 units of Cool Chambers for forcing and storage of planting material. The building, which houses the Tissue Culture Laboratory, Training Hall and other infrastructure of the Centre, has been constructed at an estimated cost of Rs. 94.22 lakhs and taken over by the Department of Horticulture in July 2004.

Post-harvest Infrastructure: Collection, Grading and Packing House and cool chamber facilities have been established by the District Rural Development Agency for post-harvest management of floriculture produce in the districts of Bilaspur, Mandi and Kangra.

Research and Development: The following organizations provide the necessary R&D support in the field of floriculture: -

Dr. Y.S. Parmar University of Horticulture & Forestry, Solan. This University has a separate Department of Floriculture & Landscaping as its headquarters at Nauni. The location specific research work is being carried out at the regional Research stations of the university located in various Agro climatic Zones of the State.

Institute of Himalayan Bio-resource Technology, Palampur, District Kangra

ICAR Research Station at Katrain District Kullu H.P.

National Bureau of Plant Genetic Resources, Phagli, Shimla, H.P.

Development of Hops: The hops have got a specified market in breweries and bakeries and a present bulk of their demand is met from import.

The cold and dry areas of tribal belt in the State offer good scope for the cultivation of hops. The work for the development of hops in Lahaul Valley of the tribal region of the State was started in the year 1975-76 and since then the hops cultivation in the area has gone a long way in improving the economic conditions of the tribals. At present, hops cultivation is concentrated only in Lahaul region of the tribal valley. Efforts are being made to expand its cultivation to other areas like Kinnaur, Spiti and Pangi region of Chamba Valley. There is hops drying-cum bailing unit at *'Jahalman'*. Hops are turning out to be big remunerative crop after potato and green peas in the sparsely populated Lahaul valley in Himachal Pradesh. Its cultivation is spreading to Kinnaur, Pangi and Bharmaur areas too.

The gross income received is Rs. 10,000 per bigha (1,25,000 per hectare) compared to Rs. 1500 per bigha from potato and Rs. 4000 per bigha from green peas. Hops are the female inflorescence of a plant called *"lumulus lupulus"*. It belongs to the family *cannabinaceae* to which also belongs the famous Indian narcotic plant *"Cannabis sativa"*. It is a perennial twining scabrid herb growing upto 4 to 6 meter in height. There are separate male and female plants. But hops grow from female plants. Hops is mostly used in beer preparation for imparting taste, aroma and sparkle and also to prevent bacterial action. Besides, hops have some medicinal properties and are used along with other medicines for debility, indigestion, worms and nervous conditions. Only three varieties-*Late cluster, Hybrid 2* and *Aromatic comet* are mostly grown at present.

The Peo subdivision of Kinnaur district has been selected for the cultivation of lavender, used in perfume industry. It's 20 species are grown there.

Wild fig (Ficus palmata Forsk.): This is a very commonly occurring wild plant in the Himalayas up to an elevation of 1550m. Surprisingly, the trees of this wild plant are rarely seen in the forests. They mostly grow around the villages in the wastelands and in the cultivated fields. Wild fig of the Himalayas has almost the same quality as the superior cultivated type of the Mediterranean region. The fruits are, however, smaller in size. As the cultivated fig (Ficus carica L.) cannot be grown in all places due to its very exacting climatic requirements, the Himalayan wild fig may prove to be a suitable alternative to this fruit.

The wild fig tree can grow and bear fruits even in colder places experiencing high rainfall at the time of fruit ripening. It is a deciduous tree having a height of 6-10m. The new growth and flowering start in March, and the fruits start ripening from the second fortnight of June and continue to do so till the middle of July. There is a great variation among wild plants regarding yield and fruit quality but still a plant produces 20-25 kg of fruit during one season.

Besides the fruit, the newly-emerging leaves and very young fruits are used as a vegetable in India. The fruits are about 2.5 cm in diameter and weigh about 6g each. Trees bearing even larger fruits are also met with. The

fruits have an excellent taste. The TSS (total soluble solids) content is 12.1 %. The ripe fruits are quite juicy. The juice can easily be extracted by hand pressing. One kg of fruit yields about 450 ml of juice. This wild fruit can be propagated both by seed and by cuttings.

Wild Himalayan Amla (Emblica officinalis Gaertn.): Amla is a fruit of Indian origin and grows mostly in tropical parts. It is cultivated for its fruits, which have a very high vitamin C content. This ranges between 1100 and 1700 mg per 100g. No other fruit except the Barbados cherry (Malpighia glabra L.) is known to have so much vitamin C.

The amla fruits are always in great demand. The wild amla is a form of the superior cultivated amla. It grows wild, mostly in the forests, in the mid-hill regions of the Himalayas which have a subtemperate climate. The cultivated amla cannot be grown in all places as it is highly susceptible to frost. The Himalayan wild amla, on the other hand, is a relatively cold-hardy plant. Some of the places where it is seen growing even experience light snowfall. This wild fruit can therefore be used for extending the cultivation of the tropical amla even to subtemperate regions.

The Himalayan wild amla is a small to medium sized tree attaining a height up to 5.5m. This is a very ornamental plant, especially when the branches are laden with fruits. The fruits are 2 to 2.5 cm in diameter and weigh about 6g each. There is, however, considerable variation in the fruit size of different trees and it is possible to select clones with relatively larger fruits. The fruits of the cultivated amla are larger in size, but except for the size, there is no other difference between the fruits of the Himalayan wild amla and the cultivated amla of the Indian plains.

he wild Himalayan amla can be propagated by seed. Asexual propagation is carried out by inarching. As this wild fruit tree is very ornamental, it is also ideally suited for planting as an avenue tree.

Orchids Fast Vanishing From The Hills : A delight for ornamental plant lovers, the gorgeous orchids are fast vanishing from the hills due to rapid degradation of the habitat and erratic and inadequate precipitation, which have driven some of the species to the verge of extinction. While the Forest Department put 47 medicinal plant species on the red list after carrying out a threat assessment, no attention was paid to the orchids, the population of which is declining at an alarming pace.

Scientists are concerned as the state is home to more than 10 per cent of the orchid species recorded in the Indian Himalayan region. While the population and habitat of almost all 81 species found in the state has shrunk, two most endangered species, *cypripedium cordigerum* and *cypripedium himalaicum* (Commonly called lady slipper), are already on Red Data Book, an unmistakable indication of the sharp degradation in environment. The other species face varying degree of threat, calling for immediate steps for their conservation.

KANGRA TEA

The history of Kangra tea goes back to 1850, when some British found Kangra, Palampur, Baijnath, Bir, Sidhwari etc. areas most suitable for tea plantation. In 1852 a Superintendent of Botanical Garden Dr. Jamson set up *"Delhi Tea Estate"* which became quite famous. During that period 'Tea Festivals' were also organised to attract traders from Afghanistan. In 1866 a British Army officer Major Straut bought a tea Garden and named it *"Nishan Tea Estate"*. Later on a number of army officers set up their own tea gardens there and each garden had more then 50 acre area. In 1866 Kangra tea got medal in London in an auction. But after 1892, British started selling their garden and nearly 613 acre tea land came under the possession of locals. 1905 earth quake added to the woes of the tea trade.

The History of tea plantation in Kangra Valley goes to the British period, when in 1850 on experimental basis plantation was started at Kangra, Palampur, Baijnath, Bir and Sidhwari. In 1852, Superintendent of Botanical Garden Dr. James set up *Delhi Tea Estate*. To pupularise the Kangra tea, a tea festival was organized and traders from Afganistan started taking interest in Kangra tea. In 1866, an Army officer named Major Straut purchased 'Delhi Tea Estate' and renamed it *Nishan Tea Estate*. This motivated many a British to own tea estate in the Palampur Valley, each of these Garden was in the vicinity of 50 acre. In 1866 Kangra Tea got Gold medal in a tea auction function in London. All of sudden in 1892 British started selling their Gardens and locals became the owners.

Tea Industry in Kangra having one of the oldest tea bushes in the country is retarded due to paucity of funds and marketing facility, mismanagement, irrational policies, shortage of skilled labour and more a state of jealousy and rivalry between cooperative manufacturing units. The green tea of Kangra is also famous for its medicinal value and could compete the world famous Darjeeling Tea as well.

Holta Tea Estate was set up in 1854 (42,00 feet above the mean sea level) in 1854. After the devastating earth quake of 1905, annihilating both man and plantation, the tea production lost its paramount position. However, the scene has changed with the setting up of the Council of Scientific and Industrial Research (CSIR) Palampur complex, where scientists are striving to improve tea production of the once popular Kangra flavour through the scientific methods using tissue culture techniques, producing numerous *"somatic embryos"* encapsulated into a gelatin like substance, sodium alginate to form a bead like structure called an artificial or synthetic seed and hence the production has shown tremendous increase from 84 kg of green tea leaves per hectare to 200 kg green leaves per hectare. A new concept the *"organic tea farming"*, growing tea without using any chemicals such as pesticides and fertilisers has come into operation to explore the much needed export potentiality.

In the tea gardens, the chemical control of grass weeds is quite necessary particularly during early years of their establishment, after which the bushes attain a good spread and dense canopy which suppress weed growth in natural way. Out of various grass weeds in tea Estates in Kangra valley, the *thatch* (Imperata cylindrical Beauv) is in abundance and devastating.

The entire tea production of Himachal Pradesh is produced in Kangra especially in Palampur valley. It was Dr. William Jameson who had introduced the Chinese green tea, had brought the seedling from the Kumaun Hills to Nagrota and Bhawarna first. After testing and trying period of more than 75 years, the four cooperative tea factories at Palampur, Bir, Sidhbari and Baijnath encouraged the disillusioned planters to produce quality tea and it is fetching good price now.

In 1998 when India became signatory of WTO, tea import also increased, which resulted in the lesser demand of Kangra tea. The rural employment schemes launched by central government has distracted the labour from tea garden to easy earning. In 2002, the area under tea garden in Kangra valley was 4000 acre, which reduced to 2200 acre by 2013, nearly 1800 acre fall in area in 10 years.

The events which proved death blow to 'Kangra Tea' were; disintegration of Soviet Union in 1980, signing of WTO agreement by India in 1998, ban on the sale of tea Gardens by the state Government and launching of NEREGA and MGNREG. In 2001 the area under tea plantation was 4000 acre, which has reduced to 2200 acre in 2013, a decrease of 1800 acre in 12 year. By 31st March 2014, there were only 400 tea planters in the Kangra Valley facing crunch of Labour, market, and publicity to Green tea of Kangra. To revive tea industry in the state, Government should make a congenial policy towards the ownership of tea Gardens.

Kiwi: Kiwi resembles our Chikoo fruit in the colour of its skin but is oblong in shapes. These are Chinese gooseberries, commonly known as Kiwis and command a lucrative international market of about 400 crore (2001 AD). Its five main varieties are *allison, Monty, abbot, hayward* and *brung.* They have been experimented successfully in the lower and middle hills primarily of Kullu and Solan districts at present.

Its pulp is sweet and has delicate refreshing flavour. Kiwis grow like graphs on vines supported by wires to form net like structure known as *pergda.* The technique is necessary also to save the fruit from the sun and bird damage. The average crop per vine comes between 50 kg to 100 kg of fruits as experimented in the Horticulture University orchard Nauni. According to one estimate growers can get Rs. 25,000 to 30,000 per bigha from commercial cultivation of this fruit on the basis of market price in the year 2000-2001.

Kiwi fruit, also known as *'Chinese gooseberry'*, is becoming popular among the farmers of Himachal Pradesh. Because of its brownish colour and hairy

appearance resembling the flightless bird Kiwi, the fruit was named Kiwi fruit. The transformation of this hard and wild Chinese berry into a tasty fruit began in 1904 in Newzealand. The fruit was a novelty in the early days. Kiwi farms were later developed in California and Newzealand from where this nutritious fruit moved to the international markets.

This fruit is dull brown in colour, oval-oblong in shape and covered with dense hair. The flesh of the fruit is attractive with its light green colour and many small, black seeds radiating from the centre, arranged in a fascinating pattern. Kiwi fruit can be consumed fresh or as *salad.* It has a delicate, distinctive and melon-like flavour. It is a rich source of vitamin C. It also contains phosphorous, potassium, iron, calcium and riboflavin. The excellent source of crude fibre. Its juice contains anti-cancerous substances.

At present, Newzealand is the main producer of the Kiwi fruit followed by the U.S.A., Japan , France, Italy, Australia and Germany. In India, this plant was introduced in Banglore, but it did not come into bearing. However the plant introduced at Shimla bore fruits in 1969 for the first time. Kiwi fruit can be propagated by different methods like seeding, grafting, budding and even in mist propagation. However, the rate of plant survival is very low. The plant can also be grafted on seedlings raised from the seeds in winter. Its water requirement is very high and it cannot withstand strong wind, frost and dry climate.

Kiwi fruit requires a male plant for pollination. The pollination is done mostly by honeybees and insects. The bearing of the plant starts at the age of four-five years; the yield varies between 50-100 per vine depending on the management and cultural practices. It has a prolonged shelf life.

To increase Horticultural activities and increase productivity both Government and individual entrepreneurs should take certain immediate steps.

- Immediate introduction of genetically productivity potential enriched plant material of various fruits especially that of spur varieties of apple and a virus free clonal root stocks, varieties of cherry and its root stocks which deserves special attention to be introduced in large number.
- To increase productivity, particularly at the level of weaker sections of the society there is a great need for providing not only capital subsidy on loan but also making it interest free.
- For making technical know how available, which is one of the essential inputs for gainful utilisation of other input resources and for the proper transfer of technology to the orchardists it is imperative that training and visit system by experts should be introduced in the state.
- Elite gardens have to be set up for stocking of selected plant material so as to serve as bud wood banks for scientific multiplication of plant material for higher return and productivity.
- Identify short and long term problems in horticulture.

– Technology transfers to farmers should be through training and visits and adequate research and development efforts should be made to solve these problems.

Pre and Post harvesting operations both are equally essential and so deserve proper strategy to ensure remunerative returns.

Himachal Pradesh has been endowed by nature, so varied agro-climatic conditions, which suits purposefully for the production of agriculture and horticulture produce. Modern society has appreciated food and beverages industry in a big way. Himachal state can take advantage of this situation, should focus more on raw material required to support this industry. Our Horticulture produce itself can make the state self-reliant, to meet the financial need of infrastructure development. Intensive Research techniques should be deployed to ensure growth in area and productively of various fruits.

To facilitate the packing of fruits, the state government set up a carton factory at Pragati Nagar near Gumma, district Shimla in 1988. But this unit continued occurring losses and so in March 2005 it was given on lease.

Himachal Pradesh Horticultural Produce Marketing and Processing Corporation Limited (HPMC)

This corporation is popularly known as HPMC. The corporation came into existence in June, 1974 as a subsidiary company of H.P. Agro-Industries Corporation in pursuance of an agreement entered with the International Development Association for providing modern and scientific infrastructural facilities in the state. The objective set forth was proposed to be achieved through the adoption of a three-dimensional integrated marketing concept involving standarization of produce, extension of marketing period, gradual reduction in growers dependence on the private commission agents and utilization of low grade fruit by conversion of the same into nutritional and value added products. The infrastructural facilities provided by HPMC are in terms of packing houses, grading houses, cold storages, warehouses and fruit processing plants.

ANTODYA

Antodya is the most important programme of the Government for the eradication of poverty. Antodya programme was introduced for the first time in 1977 in Rajasthan state. This programme of ensuring social justice to the poorest of the poor is implemented on the basis of economic criteria only by rising above narrow considerations of caste and community. It has been made the basis of all development and welfare programmes in the state. Antodya programme does not aim at giving large sums of money to the poor and make them rich overnight.

It aims at creating such conditions and opportunities for the poor which may enable them to progress, stand on their own feet and lead a respectable and honourable life in the society. In Himachal Pradesh, the first phase of Antodya programme was started on 15th August 1990. Under this phase, five lakh persons were identified who were poorest among the poor. After the selection, it was found that out of these identified families, seventy percent belonged to scheduled castes and scheduled tribes. The poorest amongst other communities also got selected. Under the Antodya programme, identified families are provided cheap ration, ex-gratia grant, stipends to students, subsidy on interest and liberal financial help to start their own ventures.

Cheap ration: These families are provided wheat at the rate of Rs. 3.50 per kg, rice at the rate of Rs. 4.50 per kg and salt at the rate of 2/-Rupees per kg. This is an effort to ensure two meals a day to the poor at cheap rates.

Ex-Gratia Grant: A sum of Rs. 25000 is granted immediately as ex-gratia grant is case bread winner member of Antodya family in the age group of 18-60 years passes away. The grant being given under this scheme is in addition to any other help or insurance money. This is a kind of insurance cover for the Antodya families, for which they have to pay no premium.

Education facilities: With a view to ensure proper education of children of Antodya families, there is a comprehensive scheme to see that every child of these families is able to pursue his studies upto any level according to his wish without any economic hurdle. Under the scheme, the children of these families studying in primary classes are paid an annual stipends of Rs. 250, male students from 6th to 8th class, Rs. 450 and female students of Rs. 1500 per year, male students of 9th and 10th class Rs. 2000 and female students Rs. 3000 per year and +1 and +2 students Rs. 1200 per year.

The students studying in colleges are being given economic assistance of Rs. 10,000 per year and those students who were residing in hostels are paid an additional amount of Rs. 15,000 per year and interest free loan of Rs. 1,00,000 for those students who are able to make advancement in every field of life and wipe out the stigma of socio-economic backwardness.

Liberal help: There is provision for Antodya families for subsidy at liberal rates under various developmental programmes. All families selected under Antodya Programme are eligible for the grant of subsidy as available to the IRDP families plus 50 percent subsidy under animal husbandry, agriculture, horticulture, cottage industries and other developmental programmes besides grant for starting their own avocations. There is provision for loans to these families at the subsidised interest rate of four percent so that they could start their own venture without any difficulty.

Keeping in view the need for conservation of environment "VAN LAGAO–ROZI KAMAO" programme has been launched in Himachal Pradesh. The programme aims at making afforestation a people's movement, linking wages with work and making programme employment oriented. This scheme is first of its kind in the whole world, which took off in February 1990. It will help to achieve the target of greater land under forests in the state.

In order to successfully implement "Van Lagao–Rozi Kamao" programme, schools, Mahila Mandals, Youth Clubs and Panchyats, besides village communities, have been actively involved. Under the scheme, there is programme to set up *'school vatikas', 'mahila mandal vatikas', 'samriti vatikas'* and *'panchayat vatikas'* for the greater participation of people in developmental works.

BANKING IN HIMACHAL

Banking in India in the modern sense originated in the last decades of the 18th century. The first banks were Bank of Hindustan (1770-1829) and The General Bank of India, established in 1786 and became defunct. The largest bank, and the oldest still in existence, is the State Bank of India, which originated from the Bank of Calcutta in June 1806, which almost immediately became the Bank of Bengal. This was one of the three presidency banks, the other two being the Bank of Bombay and the Bank of Madras, all three of which were established under charters from the British East India Company. The three banks merged in 1921 to form the Imperial Bank of India, which, upon India's independence, became the State Bank of India in 1955. For many years the presidency banks acted as quasi-central banks, as did their successors, until the Reserve Bank of India was established in 1935.

In 1969 the Indian government nationalised all the major banks that it did not already own and these have remained under government ownership. They are run under a structure known as 'profit-making public sector undertaking' (PSU) and are allowed to compete and operate as commercial banks. The Indian banking sector is made up of four types of banks, as well as the PSUs and the state banks, they have been joined since 1990s by new private commercial banks and a number of foreign banks.

Banking in India was generally fairly mature in terms of supply, product range and reach-even though reach in rural India and to the poor still remains a challenge. The government has developed initiatives to address this through the State Bank of India expanding its branch network and through the National Bank for Agriculture and Rural Development with things like micro finance. Indian Banking Industry currently employs 11,75,149 employees and has a total of 109,811 branches in India and 171 branches abroad and manages an aggregate deposit of INR 67504.54 billion (US$1.1 trillion) and bank credit of INR 52604.59 billion (US$ 880 billion). The net profit of the banks operating in India was INR 1027.51 billion (US$ 17 billion) against a turnover of INR 9148.59 billion (US$ 150 billion) for the fiscal year 2012-13.

THE HIMACHAL PRADESH STATE COOPERATIVE BANK (Hq. SHIMLA)

The commercial Banks were operating for the years, but it was being felt that these banks were not paying necessary heed to the credit requirements of common masses. Further the commercial banks, were mainly concentrating their business in the urban area and the banking facilities to rural people were not available.

Consequently, the Cooperative Banks came into picture after 1904. Himachal Pradesh has the distinction of having first Coop. Society Registered

in India. Cooperatives were primarily visualized as specialized agency for financing the credit requirement of rural people in the country particularly agriculture.

In Himachal Pradesh at the time of attaining independence of India, Mahasu Central Cooperative Bank, The Mandi Central Cooperative Bank Ltd. and The Chamba Central Cooperative Bank Ltd. were functioning to cater to the needs of farmers. In 1953 Himachal Pradesh State Cooperative Bank was established after amalgamating these three Central Cooperative Banks into it.

The Registration of Himachal Pradesh State Cooperative Bank was done in August, 1953, under the Cooperative Society Act, 1912 the bank started functioning on 15th March 1954. At that time, the State of Himachal Pradesh used to be the Union Territory and there were only 6 districts in the State. The bank started functioning as an Apex bank as well as Central financing agency under two tier system in 6 districts of the State.

In the year 1955 one Joint Stock Bank i.e., Bank of Sirmaur was also merged in it. At present the H.P.S.C.B. is performing dual function viz. that of Apex Cooperative Bank in Himachal Pradesh to play lead role in development in Cooperative in the State and that of a Cooperative Bank in 6 districts viz. BILASPUR, CHAMBA, KINNAUR, MANDI, SHIMLA and SIRMAUR.

The Bank is extending banking facilities in 5 districts viz. KANGRA, KULLU, HAMIRPUR, LAHAUL & SPITI and UNA through its affiliated District Central Cooperative Banks, i.e. The Kangra Central Cooperative Bank and in district SOLAN through another affiliated District Central Cooperative Bank, The Jogindra Central Cooperative Bank as a District Central Cooperative Bank.

The Himachal Pradesh Cooperative Bank is serving the people of the State through a network of 190 branches and Extension Counter of which about 94% is in the rural areas of the State and one branch at New Subzi Mandi, Azadpur, New Delhi for the benefit of horticulturists of the State.

THE KANGRA CENTRAL COOPERATIVE BANK (Hq. DHARAMSHALA)

This bank came into existence on 17th March 1920 (License No. RPCD. 09/2009-10). Indora Banking Union was merged and 2nd Branch of the Bank opened at Nurpur in January 1956, Palampur Banking Union was merged and 3rd Branch of the Bank opened at Palampur in January 1957 Nanaon Banking Union was merged and 4th Branch of the Bank opened at Hamirpur in Oct'1958. The Bank suffered losses because of the partition in 1947 to the tune of Rs.10.64 lakhs. In March 1962, the bank suffering from the setback of partition was granted Rs.4.09 lakhs by the Govt. Govt also provided Interest Free Relief Loan of Rs.3.98 lakhs and Govt of India Loan of Rs.4.97 lakh @ 3.87% in 1962. In 1971-72 the Bank entered into the deposit mobilisation scheme of Pong Dam Area aggressively and secured maximum share of Deposit. Bank Deposits increased from Rs. 256 lakh in 1971-72 to Rs. 1054 lakh in 1973-74.

On 24 August 2009, the Kangra Central Cooperative Bank was adjudged best bank in all India rating in quality management. All India Trade Confederation presented the award to the management Board.

THE JOGINDRA CENTRAL COOPERATIVE BANK LIMITED (Hq. SOLAN)

The Jogindra Central Cooperative Bank Ltd was registered on 20th August 1924. The Bank is functioning as Central Cooperative Bank in the District Solan with its 25 ranches, 1 Pay Offices, 1 Mobile Counter and 1 xtension Counter. The General House/BOD takes all policy & strategic decisions within the ambit & regulation & provisions of H.P. Cooperative Societies Act. 1968, H.P. Coop. Societies Rules 1971, and guided by Banking regulation Act, 1949, Bye-Laws framed and registered by RCS H.P. and instructions/guidelines received from the Reserve Bank of India & NABARD from time to time.

The Executive Committee and various other Subcommittees of Directors of BOD /Officials are constituted for specific purposes by the Board of Directors from time to time. At Head office, the Official hierarchy is headed by the Managing Director, GM ,DGM, AGM Officer's, Grade-I Officer's, followed by other officials and subordinates.

THE HIMACHAL PRADESH GRAMIN BANK

Himachal Pradesh Gramin Bank, sponsored by Punjab National Bank came into existence with the amalgamation of two RRBs, viz. Himachal Gramin Bank, Mandi (sponsored by Punjab National Bank) and Parvatiya Gramin Bank, Chamba (sponsored by State Bank of India) vide Government of India Notification dated 15th February 2013 under section 21 of the RRBs Act, 1976 with its Head Office at Mandi. The area of operation of the Bank is spread over to 12 districts of Himachal Pradesh. The Bank is authorized to affect banking transactions as permitted under section 5 (b) of Banking Regulations Act, 1949.

Presently in 2013, Bank is functioning with a network of 188 branches in twelve districts, namely, Mandi, Kangra, Kullu, Hamirpur, Bilaspur, Una, Shimla, Solan, Sirmaur, Kinnaur, Lahaul -Spiti and Chamba. There are two Regional Offices, one at Dharamshala at Dari and other at Sunder Nagar in Mandi.

The prime objective of establishment of the Bank is to provide basic banking facilities to the remote rural sectors and to provide the facility to rural masses to deposit their savings in a secured manner. Another important responsibility entrusted to the Bank was to provide productive credit, viz. Agriculture, Cottage and Small Industries, retail trade, dairy development and other related allied activities. Bank allowed to finance for housing, education, transport and consumer loans to public under different approved schemes of the Bank. Himachal Pradesh Gramin Bank is sincerely working to fulfil its obligations.

THE KANGRA COOPERATIVE BANK LTD. DELHI

The Kangra Cooperative Bank Ltd. started in a very humble way as a small Thrift/Credit Society in March, 1960 by a few friends of Distt. Kangra of Himachal to help out the people of Himachal residing in Delhi to uplift their economic conditions and tide over the FINANCIAL hardships. Dedication, sincerity and honesty of these members/associates brought rich fruits and this Thrift/Credit Society grew up into a big society within twelve years after its formation and successful running was converted into a Primary Urban Cooperative Bank in 1972 by RBI and was permitted to carry out banking activities including acceptance of deposits from public (non-members) by opening their Saving, Current and RD A/c's. Twenty three years there from in June 1995 it was granted a license to carry out the banking business by the Reserve Bank of India. Thereafter, it was granted license to open branches and consequently six more branches were added in February, May, December 1996, June 1998 ,October 2008 and the last one in July 2009. In may 1970 it purchased Paharganj building and reconstructed the same in 1993. In october, 1997 it purchased the present premises at Janakpuri to set up administrative, arbitration and recovery department and HO. Central accounts and Personnel department are functioning from this building. It has a meeting room. One branch also function here. The main branch along with its service branch, is situated in its own three storied building at Paharganj. It purchased another Building in April 2008 At Jagatpuri where its one of the existing Branches has already been functioning. Its branches are at- Janakpuri (C-29), Paharganj (1916, Chuna Mandi), Jagatpuri (73-A, A-Block), Rohini (A-50, Naharpur), Govindpuri (1/7, Main Road), Mayur Vihar (C4/17, Phase-I), Sant Nagar Burari (1 Kushal Complex), Pul Pehladpur (B-183, Main Road) and Bhajanpura (Plot -397 GF, Khajoori Khas).

Bank enjoys Grade 'A' audit classification since long. Govt. of NCT of Delhi gave to the Bank "Best Bank Award" for the years 2004-05, 2007-08, 2009-10 and 2011-12.

WOMEN BANK SHIMLA

The first branch of all women bank in Himachal Pradesh was opened on 18th March 2014 near Tibetee Market Shimla. The branch was inaugurated by its MD and Chairperson Ms. Usha Anant Subramanayam. This was the 17th branch of the bank in the country, from where women can have easy loan for care centre, cyber cafe, catering business, Parlour and for kitchen upgradation. Men can also open their account in this bank, but employees are only women.

DIRECTORATE OF ECONOMICS AND STATISTICS (SHIMLA)

Himachal Pradesh came into existence on 15th April 1948. At that time its statistical activities were almost negligible. The information used to be collected only in connection with the execution of administrative functions like; the maintenance of Law and order and collection of land revenue. Moreover, all the statistical data which originated as a by-product of administration were fragmentary, incoherent and undependable and had therefore little practical utility from the stand point of providing an overall measure of economic and social development.

The government of Himachal Pradesh realised this lacunae during 1st Five Year Plan and so in 1955, it sanctioned the creation of the Directorate of Economics and Statistics which started functioning with effect from January 1956. Thereafter in 1958-59, district Statistical offices were established in Mandi, Chamba, Sirmaur and the then Mahasu districts. Bilaspur remained attached for some time with Mandi district but now a district office is functioning there.

The Directorate of Economics & Statistics came into being with the objective to advise the state government on Economic and statistical matters for formulation of policies and plan. The mandate of the department is to assess the economic development of the state through the estimation of State Domestic product/presentation of economic scenario of the state through fact and figures, census and survey and studies.

Functions of the Department

The subject allotted to this department according to "The Business of the Government (Allocation) Rules 1971" are as below:-

State Income estimation (GSDP/PCI)
Public Finance
Socio-Economic Surveys
Rural Development statistics
Census of H.P. Employees
Official Statistics
Prices Statistics
Labour Statistics
Statistical Training
Evaluation of Programmes
Coordination between Statistical work of other departments
Establishment, budget and account matters
Classification of H.P. Government budget and budget of local bodies

Besides above the department was allotted some additional subjects after the year 1971:-

National Sample Survey
Tribal research/studies
Housing & Building Statistics
Capital Formation
Collection of all types of statistics at block level
Index of Industrial Production
Computerisation of data
District Income Estimation
Compilation of Pensioner's data.
Economic Census

The main functions of the Department is to build firm and broad data bank for the Pradesh so as to serve as useful data base for all plan and policy formulations, bring out the estimates of GSDP/State Income and the economic growth, conduct of various studies and Surveys and coordinate various Statistical activities of different departments in the state.

In 1960 Kinnaur became a tribal district and the district statistical officer's office was set up there. Later on, in 1966 Punjab hill areas were transferred to Himachal and the new districts, Kangra, Kullu and Shimla were immediately provided with the new offices. In 1972 with the creation of Hamirpur and Una districts, new statistical offices were created for Una, Hamirpur and Lahaul-Spiti. Now there are district statistical offices in all the twelve districts of the Pradesh with one Directorate of Economics and Statistics as a Central coordinating organisation, in respect of all economic and statistical data collected within the state with headquarters at Shimla. The Minister for planning is the Minister in charge of the department. The Commissioner-cum-Secretary (Planning) is the Secretary of the department and the Administrative Department at the Secretariat level. The Director of Economics and Statistics is the Head of the Department.

The most important work of the department is to estimate the State Income / District Income which has now being recognized significant and reliable indicators to measure the economic growth of the state. These estimates are presented in the Economic Survey during budget session of Vidhan Sabha every year. Special expertise is involved in this very voluminous and huge calculation work to find out the income generated, contribution and rate of growth under different sectors of the economy. No developmental scheme can be made successful without properly assessing the contribution/ growth scenario of the sector to which the schemes pertains.

The state income estimates also help in studying the sectoral /regional development imbalances, formulation of taxation policies and receiving central grants etc. To achieve this objective this department is making all efforts to cull out the data on plan and non-plan expenditure and classifying the budget asked from all government departments. Collection of Prices Sta-

tistics Containment of Inflation is on the priority list of the government. Price collection and compilation is an important assignment with DEPARTMENT OF ECONOMICS & STATISTICS and well knit mechanism is being maintained for ensuring correctness in reported prices.

The department is engaged in collection of prices in different formats i.e. 16 essential items of daily needs on weekly basis like food grains, major pulses, sugar, OIL etc., Whole Sale & Retail prices of 104 items on monthly basis , Live STOCK Prices on Half yearly basis , Building material prices on quarterly basis and Labour Bureau Prices for price indices. The department also supplies the prices of various building material to National Building Organisation. This price collection work is done by the District Statistical Officers of the department.

Training division has been created with a vision to promote good governance by providing to the staff quality training & learning related to performance towards building a professional statistical service which is efficient, accountable and responsive. Senior and lower level staff were trained with an objective to make officers to acquire professional approach, make them aware about the challenges and opportunities within the statistical services, to enable the officers to understand and learn the system, role and functions of the statistical advisor's to the Government departments, to enhance and upgrade the knowledge and skills of staff to cope up with dynamics and dimension of FINANCIAL and statistical management in the department, acquaint the personnel with typing, word processing, office work and to prepare them for handling higher level of duties and responsibilities consequent upon promotion.

National sample survey (NSS) and Other Surveys

1. National Sample Survey: Himachal Pradesh started participating in the National Sample Survey programme from 27 th round i.e. 1972. The National Sample Survey work involves the field study on various subjects assigned during the round which is done on sample matching basis as allotted by Govt. of India. This voluminous work involves door to door approach for which large number of field functionaries are required. After field work the filled in schedules are thoroughly scrutinised. This exercise needs sufficient man power. The department has now started the tabulation of these schedules at headquarters itself. The results of these surveys are used for estimation of Consumption Expenditure/ Poverty line and other Plan Indicators. During the current year: -The data entry of 62nd Round was completed in-house for the first time.

2. Surveys and Evaluation Studies: Many ad-hoc surveys/studies etc. are being conducted by the department which provides a bench mark/ base to various projects and programmes of the Govt. Since 1986, the post of Director has been redesignated as *'Economic Adviser'* to Himachal Pradesh Government.

Followings have been its Directors and Economic Advisers since 1955:

DIRECTORS

1.	Sh. R.C. Gupta	28.07.1955 — 01.04.1957
2.	Sh. K.N. Vali	02.04.1957 — 03.06.1966
3.	Sh. L.L. Jain	04.06.1966 — 10.08.1966
4.	Sh. R.L. Khanna	11.08.1966 — 06.05.1967
5.	Sh. M.L. Jain	07.05.1967 — 06.04.1970
6.	Sh. R.N. Pandey	07.04.1970 — 05.09.1973
7.	Sh. R.S. Bhatnagar	06.09.1973 — 31.08.1986

ECONOMIC ADVISERS

1.	Sh. R.S. Bhatnagar	01.09.1986 — 31.03.1991
2.	Sh. V.K. Malhotra	01.04.1991 — 31.07.1995
3.	Sh. B.C. Kandpal	01.08.1995 — 30.10.1995
4.	Sh. P.L. Sharma	01.11.1995 — 30.11.1996
5.	Smt. Mohindra Malhotra	01.12.1996 — 31.08.2006
6.	Mr. Ashok Rajan	01.09.2006 —31.12.2007
7.	Mr. Pradeep Chauhan	01.01.2008 to continue

Glossary of Tribes And Castes In Himachal Pradesh

ABDAL : A small caste of Muhammadans found in Kangra and the Jaswan Dun Valley of Una and Hoshiarpur. The Abdal are divided into 12 *toli* or *sept.* The Abdals of Kangra do not associate with those of Sukhar and Nurpur. The Abdals are beggar and wandering singers, performing especially at *Rajput funerals* at which they precede the body singing and playing *dirges been* and *birlap.* In the time of Rajas when any Rajput was killed in battle and the news reached his home, they got his clothes and used to wear them while singing his dirge. Thus they sang dirges for Ram Singh Wazir of Nurpur and Shah Singh of Atariwala who had fought against the British and for Raja Rai Singh of Chamba. The Abdal now sing various songs and attend Rajput weddings. They are endogamous. Abdal means 'Lieutenant' and is the name of the class of wandering Mohammedan saints. (The Abdal take fifth place in the *sufi* hierarchical order of saints issuing from the great Qutab. Also called 'Rukaba', guardians. They reside in Syria bring rain and victory and avert calamity *Encyclopedia of Islam*".)

ABKAL : A *sept* of Rajput, descended from Wahgal a son of Sangar Chand, 16th Raja of Kahlur.

ACHI-LAMA (Tibetan) : A group of actors, singers and dancers, found in Kinnaur. They wear mask of skin with conch shells for eyes and a dress to which woollen cords are so attached that in dancing they spread out. The women play a large tambourine, and the men a small drum shaped like a hollow glass. Parties of five men, two women and a boy perform their dance.

ACHRAN : An *agricultural clan* found in Shahpur, district Kangra.

AITLE : A sept, or clan of Kanets found in Kaljun pargana of Shimla Hills.

AKERE: An agricultural clan found in Shahpur.

ALDANG : A sept of Kanets found in the village of Labrang of Kinnaur district (formerly part of Bushahr state).

ANGAR : Angar, *an agricultural clan* found in Shahpur.

AURE : An *agricultural clan* found in Shahpur, district Kangra

BARHIAL : a *sept* descended from Andeo Chand, son of Udai Chand fourteenth Raja of Kahlur. Another account makes them descendants of Raja Ajit Chand's younger son.

BARWALA, BATWAL : These two names, though probably of different origin, are used at most as synonyms, the former being more common in the lower hills and the latter in the mountain ranges of Kangra. But in Chamba the Barwala is clearly distinct from the Batwal, being a maker of mats and winnowing fans, and the name is probably derived from *bara or baria,* the kind of grass used for them, *Batwal or Batwar* on the other hand means a *tax collector,* and *batwal* is an ordinary peon of any caste, even a Brahmin, though of course he may be by caste a Batwal[1]. At the capital Chamba, Barwalas used to be employed as watchmen and thus went up in the social scale as Batwals. In Kangra however the Batwal form a true caste, while Barwala

is little more than the name of an occupation. Both words correspond very closely with the '*Lahbar*' or '*Balahar*' of the plains, and denote the village watchman or messenger. In the higher hills this office is almost confined to the Batwalas, while in the lower hills it is performed by men of various low castes who are all included under the generic term of Barwala. These men are also the coolies of the hills, and in fact occupy much the same position there as is held by the Chamars in the plains, save that they do not tan or work in leather. In Kangra they are also known as '*Kirawak*' or '*Kirauk*', a word which properly means a man whose duty it is to assemble coolies and others for *begar* or forced labour, and they are also called 'Satwag' or "bearers of burdens". Like most hill menials they often cultivate land, and are employed as ploughmen and field labourers by the Rajputs and allied races of the hills who are too proud to cultivate with their own hands. They are true village menials, and attend upon village guests fill pipes, bear torches, and carry the bridegroom's planquin at weddings and the like, and receive fixed fees for doing so. In the towns they appear to be common servants. They are of the lowest or almost the lowest standing as a caste, apparently hardly, if at all, above the Dumna or sweeper of the hills; but the Batwal has perhaps a slightly higher standing than the Barwala. Indeed the name of Barwala is said to be a corruption of *baharwala* or "outsider", because, like all outcasts, they live in the outskirts of the village.

At Batwal weddings in Sialkot in Pakistan the learned among the Meghs officiate. The Batwals have Brahman priests, but they do not conduct their marriage rites: they also avoid contact with them. The Batwals marry their girls at an early age, but allow widow-remarriage, and that too without regard to the husband's brother's claims. Two *gots* only are avoided. Batwals[1] are menials.

Birth observances - Four or twelve months after the birth of a boy ritan are observed as follows:- Loaves of bread fried in oil are arranged in piles, seven in each heap, and the head of each family takes a pile and distributes it among its members. Only those who belong to the *got* in which the birth has taken place can take part in this feast. Among the Jhanjotra the head of a boy or girl is not shaved till the child begins to talk. Sometimes a bodi is retained, as among Hindus.

Their wedding ceremonies are thus described :-

Four posts are fixed in the ground and four more placed over these. On these four latter two turbans, supplied by the fathers or guardians of the bride or bridegroom, are spread. Then the bride's father places her hands in those of the bridegroom saying : In God's name I give you this girl (my daughter or relation)[2].

1. Dr. J. Hutchison notes regarding the Batwals of Chamba that they claim descent from Siddh Kaneri, a defied ascetic of whom they know nothing. Formerly employed as watchmen, a few are still enlisted in the State Police. Barwalas and Batwals are all Hindus and have their own *gotras,* but Brahmans do not officiate at their weddings, which are solemnized by two literate men of the caste. Their observances follow the usage of the locality in which they are settled. Thus in Chamba the *biyah* or full wedding rite is observed as among the high castes, though expanse is curtailed and the ceremonies abridged. A Brahman fixes the day of the wedding. The dead are burnt.

2. The Batwals folk-etymology derives their name from Betwal, 'son of a daughter' A Raja's daughter became enceine by an illicit amour and was expelled from her father's kingdom. A Chuhra took her to wife, and the child founded the Batwal caste.

3. At weddings, food is thrown to the crows – which birds the Batwals are said to chiefly worship and until they (crow) take the food the Batwals themselves will not eat.

Then the pair, the bride's hands clasped in the bridegroom's, walk round an earthen pitcher placed inside the four upright posts. This duly done, the marriage is completed[3] On his way home the bridegroom has to wind some raw cotton seven times round a shrub.

The Batwals either burn or bury their dead. In either case on the way to the ground they halt and place two balls of leavened barley bread at the shoulders, and two at the feet, of the corpse. Thirteen days after the death they take to a Brahman a rupee and 4 sers of wheat flour, and these he carries to a tank, where he recites prayers. As amongst Hindus, bhajjan is performed after a death. Two yards of cotton cloth, knotted at the four corners, are hung over the left shoulder, in token of mourning, by the kin.

The remains of a body are taken either to the Ganges or to Parmandal. The Batwals are not allowed to sell *ghi*, and after a cow has calved they do not eat *ghi* until some has been offered to a Brahman.

In Sialkot the Batwala *gots* are:-

		Nandan
Dhaggra	Lakhutra	Sangotra
Jhanjotra	Lahoria	Sargotra
Kaith	Molum or Molan	Sindha

Each of the Batwal *gots* in Sialkot has its own temple, e.g., *the Jhanjotra* at Ghulhe, in Zafarwal tahsil : *the Kaith* at Amranwali in Sialkot : and *the Molan* at Gillanwala in Zafarwal. The temple is simple a mound of earth before which they prostrate themselves, each head of a family sacrificing at it a goat in honour of his eldest son.

In Kapurthala (Punjab) the Barwala gots are:-

Badial	Dhadi	Phankrain
Chakmak	Jhajriha	Ratri
Chandgirain	Nahra	Soner
Chauhan	Pambalia	

With the Chandgirain *got* the other Batwals have no connection, and do not even smoke with them. Like the Batwals the Barwalals in Sialkot employ Meghs, who rank higher than the ordinary Meghs, as priests in religious and ceremonial observances. The Barwalas make baskets in Sialkot. In Kapurthala they are village watchmen and messengers. In Himachal they are spread all over the state.

CHAMBIAL : A Rajput sept (Hindu) first grade deriving its name from Chamba state.

CHAUHAN : A great Rajput tribe, one of the *Agnikulas,* and also one of the 36 (royal) ruling races. Tod calls them the most valiant of the whole Rajput race, and to them belonged Pirthvi Raj, the last Hindu ruler of Hindustan. Before the seat of their power was moved to Delhi, Ajmer[1] and Sambhar in Jaipur seem to have been their home. After their ejectment from Delhi they are said to have crossed the Yamuna to Sambhal in Muradabad, and there still dwell the genealogists and bards of the Chauhan of the Nardak of Karnal and Ambala in which districts they have retained their dominant position more than elsewhere in the Punjab.

1. The Ambala traditions mention Alal-Kundorpuri as their seat before Ajmer was founded. They also add that Rana Har Rai founded Jundla in the Panipat tehsil: thence the Chauhan spread northwards. In Karnal their *chaudhriats* are Gumthala, Rao Sambhli Habri and, chief of all, Jundla.

The Chauhans in Ambala claim to belong to the Bachas *got* and to be of *Surajbansi* descent. In this district they hold 169 villages, and their traditions give them the following pedigree and history:

Raja Nanak Rao, took Sambhal in Muradabad.

Ralla-kund

Rana Harra[1] in the 5th generation founded Pundri and Habri, c. 988 A.D.

Augha, ancestor, of the Adhoa Rajputs

Rantha[2] Subh Mal.

Rantha's descendants drove the Koli Rajputs across the Tangri, where they may still be found. Tilok chand, son of Subh Mal, his descendant, retained 84 out of the 169 Chauhan villages- the Chaurasi ; while Subh Mal's second son, Manak Chand, turned Muhammadan and took the puchasi or 85 remaining. Jagajit; 8th in descent from Tilok Chand, was Guru Govind Singh's antagonist c. 1700 A.D. In 1756 his grandson, Fateh Chand, with his two sons Bhup Singh and Chuhar Singh, fled from Ahmad Shah Durrani into Kotaha where 7,000 Chauhans were massacred by the imperial forces under the Rai of Kotaha.

In Hissar the true Chauhans are immigrants and may be divided into two branches, the *Nimrana* and *Sidhmukh* or, as they call themselves, Bara Thal. The Nimranas who are descendants of Raja Sangat, a great-grandson of Chahir Deo, brother of Pirthvi Raj, are subdivided into two clans, Rath and Bagauta, both of which came from Gurgaon, the former tracing their origin to Jatusana. The name Bagauta would appear to be connected with Bighota.

The Bara Thal had a group of 12 villages near Sidhmukh in Bikaner (Rajasthan), close to a famous shine of Guga.

The Sohu and Chotia Pachades claim Chauhan descent.

The Chauhans own a few villages to the south of Delhi city and have a small colony near Jakhauli in Sonepat tehsil, but in this District they have adopted widow remarriage and are disowned by their fellow Rajputs, but they are the best cultivators

1. Rana Harra also had four illegitimate sons by a Rorni, by a Gujari, a Jatni and a Hujamni respectively. The latter's son, Kawal Raj, founded a bara, or group of 12 villages, of Rajputs: the Jatni's son, Bhadhi, was the ancestor of the Mudhnl Jats who hold two baras, one in Kalsora in Thanesar, the other in Saharanpur. But the Kamal tradition is different. It assigns to Rana Harrai two Rajput wives and five of inferior status, viz, a Rorni, whose descendants form the Dopla got of the Rors, a Jatni, a Gujari, a Jogin and a Nain. The descendants of the two latter are the Rajputs of Mustafabad pargana in Jagadhri tahsil, while the Jatni's and Gujan's progeny appear to have settled east of the Yamnua.
2. Rantha or Ranta was the son of Kana Har Rai's old age and his stepbrothers disputed his legitimacy. So he appealed to the king of Delhi and his mother said that she had fed the Rana on Dolah, a fish supposed to possess aphrodisiac qualities. The king declared that Rantas sweat would smell of the fish if he were legitimate. He fulfilled the test and was declared legitimate.

of the tribe, and otherwise decent and orderly.

In the central and some western district the Chauhans are found classed indifferently as Rajput or Jat, e.g., in Sialkot.

In Amritsar they are classed as an agricultural tribe (Rajput, Jat and Gurjar), and they are also so classed in Montgomery (Rajput and Jat) and in Shahpur.

In Bahawalpur the Chauhans have three clans :- Khalis, Hamshira [found mainly in Uch *peshkari-they* claim that Muhammad Husain, their ancestor, was Akbar's foster brother *(hamshir),* but others say they are Hashmiras not Hamshiras]; and Khichchi, who claim to be descended from Khichchi Khan, ruler of Ajmer 750 years ago, and say their ancestor founded Shergadh in Montgomery. Few in number they are confined to the kardari of Khairpur East (in Pakistan), where they are carpenters and khatiks by trade, though in Multan they are well-to-do landowners:-

Numerous Jat and other tribes comprise Chauhan sections or have sections which claim Chauhan descent, indeed it would be difficult to name a large caste in the Punjab which has not a Chauhan section, e.g. see Chamar. The Kchichi and Varaich are also numerous Chauhan clans in the Punjab. In Himachal Pradesh Chauhans are spread all over the state as believed in migrated from the plains to Hills during Muslim invasion of North India. In Himachal Pradesh, Chauhans are spread all over the state and as believed migrated from the plains to Hills during Muslim invasion of North India.

DADWAL : The Rajput clan to which belongs the ancient ruling family of Datarpur, but said to take its name from Dada in Kangra on the Hoshiarpur border. The Ranas of Bit Manaswal, or tableland of the Hoshiarpur Shivaliks were Dadwal Rajputs, and the clan still holds the tract.

The Dadwals are found in the neighbourhood of Datarpur, the seat of their former sovereignty, and on the southwest face of the Shivaliks in Hoshiarpur tehsil near Dholbaha and Janauri or Jankapuri, its ancient name, which is still used. Janak was an ancient Surajbamsi ruler. The Dadwals are a *branch of the Katoch* and do not intermarry with them, or with the Gulerias or Sibayas on the ground of a common descent. They have an interesting local history which describes how they wrested the tract round Datarpur from a Chahng *rani.*

The Dadwals have several *als or* families, whose names are derived from their settlements, such as *Janaurach, Dholbahia, Datarpuria, Fatehpuria, Bhamnowalia, Khangwarach, Naruria, Rampuria;* etc. Datarpur is their chief village, but they have no system of *chhats* and *makans. (For* their history and the septs which intermarry with them see the *Hoshiarpur Gazetteer,* 1904', pp. 48-9.)

DASHWAL of the plains is a group of Rajputs found in the Shimla Hills. To it belong the chiefs of 'Ghund' Theog', 'Madhan' and 'Darkoti' baronies feudatory to Keonthal state. It is asserted that the Dashals once ranked as Kanets wearing no sacred thread and performing no orthodox funeral rites, and a fifth Dasha *sept* is still only of Kanet status this latter *sept* gives its name to Dashauli a village in punar pargana of Keonthal.

DOGAR fem. Dogami : The Dogars of the Punjab are found in the upper valley of the Satluj and Beas above the lower border of the Lahore district, and have also spread westwards along the foot of the hills into Sialkot. There are also considerable colonies of them in Hissar and Karnal (Haryana state). The Dogars of Ferozepur, where they hold the riverside almost exclusively from 20 miles below to 20 miles

above the headquarters of that District, were thus described by Mr. Brandreth :- "In my account of the Ferozepur *ilaqa* I have already alluded to the Dogars, who are supposed to be converted Chauhan[1] Rajputs from the neighbourhood of Delhi. They migrated first to the neighbourhood of Pak Pattan, whence they spread gradually along the banks of the Satluj, and entered the Ferozepur district about 200 years ago. The Ferozepur Dogars are all descended from a common ancestor named Bahol, but they are called Mahu Dogars from Mahu the grandfather of Bahlol. Bahlol had three sons[2] Bambu, Langar and Sammu. The Dogars of Ferozepur and Mullanwala are the descendants of Bambu ; those of Khai the descendants of Langar ; the descendants of Sammu live in the Kasur territory. There are many other sub-castes of the Dogars in other districts along the banks of the Satluj, as the Parchats, the Topuras, the Chopuras, etc. The Chopura Dogars occupy Mamdot[3].

Ferozepur Dogars consider themselves superior in rank and descent to the other sub-castes. They are very particular to whom they give their daughters in marriage though they take wives from all the other families. At one time infanticide is said to have prevailed among them, but I do not think there is much trace of it at the present day.

"Sir Henry Lawrence, who knew the Dogars well, writes of them that 'they are tall, handsome, and sinewy, and are remarkable for having almost without exception, large aquiline noses; they are fanciful and violent, and tenacious of what they consider their rights, though susceptible to kindness, and not wanting in courage; they appear to have been always troublesome subjects, and too fond of their own free mode of life to willingly take services as soldiers. The Jewish face which is found among the Dogars, and in which they resemble the Afghans, is very remarkable, and makes it probable that there is very little Chauhan blood in their veins, notwithstanding the fondness with which they attempt to trace their connection with that ancient family of Rajputs. Like the Gujars and Naipals they are great thieves, and prefer pasturing cattle to cultivating. Their favourite crime is *cattle stealing*. There are, however, some respectable persons among them, especially in the Ferozepur *ilaqa*. It is only within the last few years that the principal Dogars have begun to wear any covering for the head; formerly the whole population, as is the case with the poorer classes still, wore their long hair over their shoulders without any covering either of sheet or turban. Notwithstanding the difference of physiognomy, however, the Dogars preserve evident traces of some connection

1. Francis (*Ferozepur Gazetter*, 1899-9, pp. 15-16) gives a full account of the Dogar history in that District and on p.56 he says that the Dogar claim to be Punwar, as well as Chauhan, and are probably a section of the great Bhatti tribe and closely allied to the NAIPAL. The Manj tradition say that the Dogars are descended from Lumra (? fox) who, like Naipal, was one of Raja Bhuti's 24 sons. They thrust aside the Wattus to the west and the Naipals to the east, and probably subdued the Machhis, Mallahs and other inferior tribes, assuming the position of social superiors rather than that of actual cultivators, and affecting the title of Sirdsar.

2. Francis (Ferozepur Gazetteer p.56) gives a different account. He says that Mahu had two sons Sahlol (whose descendants live on the Kasur side of the Satluj) and Bahlol. From Bahlol sprang four branches, Khamki, Phaimaki, Ullaki and Kandarki. The Phaimala hold Khai and will not give daughters to other branches which they consider inferior. Infanticide was formerly common amongst them.

3. Francis say that sections mostly located in Mamdot are the Mattar, Chhini, Rupa, Dhandi and Khamma, as well as the Chopra.

with the Hindus in most of their family customs, in which, they resemble the Hindus much more than the orthodox Muhammadans."

Mr. Purser wrote that they are divided into two tribes, one of which claims to be Chauhan and the other Punwar Rajputs, and he noted their alleged advent from Pak Pattan, but not their previous migration from Delhi. If they ever did move from Delhi to the Montgomery district, it can hardly have been since the Ghaggar ceased to fertilize the intervening country, and the date of the migration must have been at least some centuries back; and the Dogars of Hissar came to those parts from the Punjab, probably from the Satluj across the Sirsa district. The Dogars of Lahore and Ferozepur are essentially a riverside tribe, being found only on the river banks: they bear the very worst reputation, and appear from the passage quoted above to have retained till lately some at least of the habits of a wild tribe. Their origin was probably in the Satluj valley. They appear to have entered the Ferozepur district about 1760 A.D., and during the next forty years to have possessed themselves of a very considerable portion of the district, while their turbulence rendered them almost independent of the Sikh Government. In A.D. 1808 we recognised the Dogar State of Ferozepur, and took it under our protection against Ranjit Singh but it lapsed in 1835.

The Rajput origin of the Dogars is probably very doubtful, and is strenuously denied by their Rajput neighbours, though Sir Denzil Ibbetson believed that Dogar, or perhaps Doghar[1] is used in some parts of the Province to denote one of mixed blood. Another derivation of the name is *doghgar* or milkman. The Dogars seem to be originally a pastoral rather than an agriculaural tribe and still to retain a strong liking for cattle, whether their own or other people's. They are often classed with Gujars, whom they much resemble in their habits. In Karnal, Lahore and Ferozepur they are notorious cattle-thieves, but further north they seem to have settled down and become peaceful husbandmen. They are not good cultivators. Their social standing seems to be about that of a low-class Rajput, but in Sirsa they rank as a good agricultural caste, of equal standing with the Wattus. They are practically all Musalmans, but in Karnal their women still wear the Hindu petticoat and in marriage the mother's *got* is excluded. In Jullundur they marry late, and are said to have marriage songs unintelligible to other tribes. Some of the largest Dogar clans are the Mattar, China, Tagra Mahu and Chokra.

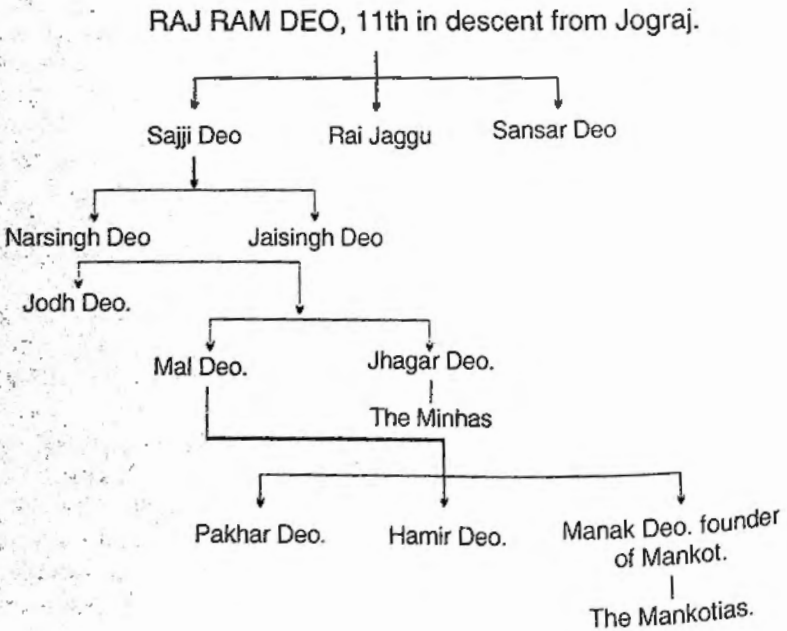
According to an account obtained from Kapurthala the Dogars were originally settled at Lakhiwal, near which was fought a battle between the Manj and Bhatti Rajputs, the Dogars siding with the latter. The Manj were, however, victorious and explelled the Dogars from Lakhiwal, but for generations no Dogar would drink from the hands of a Manj.

The Dogar septs in Kapurthala are:-Dasal, from Lakhiwal: founded Dasal which was destroyed by the Sikhs, who had been plundered by the Dogars in their flight from Ahmad Shah Abdali; Bajwa, or Ratra, from Sunaru; Ripal, Nainah, Mattar, Asar all from Lakhiwal.

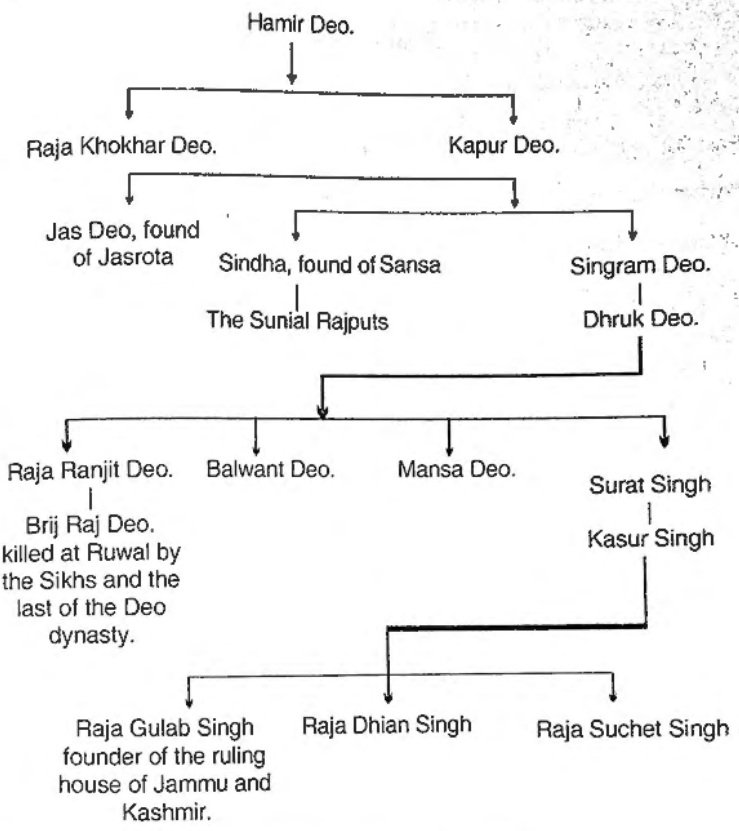
Other *gots* are the Sidhi, Banch, Dare, Chhane, Khame, Mabhi, Mahu, Dahud, Dhandi, Gug, Dher, Tote, Kohli, Pade, Sanapi, Jakhra, Katwal, Chhordal, Chopri, Ghangi, Wali, Wisar, Khari, Sombar, Ilsar, Johde,

1. Doghar means two water pots, once carried on top of the other. The 'd' is soft. In Dogar it is hard.

Kotordal, Gosal, Saurai, Dhaurai and Gamload.



In Montgomery the Dogar-Khiwa, Mahu and Mittar rank as three agricultural Rajput clans.

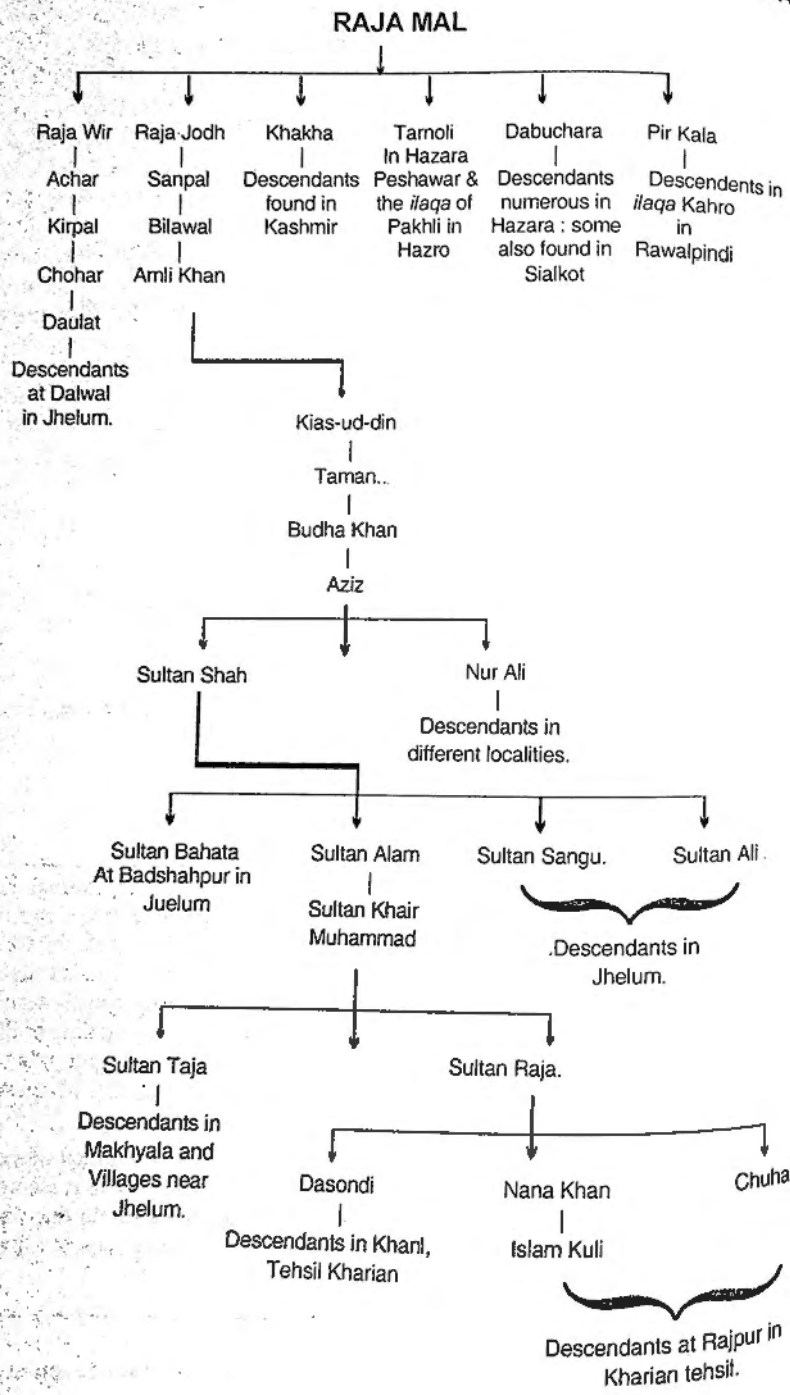


DOGLI : A term applied to the offspring of a Rajput man by a Gaddi woman in Kangra, *Cf.* Dogala, a mongrel. (The 'd' is soft).

DOGRA : A term applied to any inhabitant of the Dugar *des,* whatever his caste, but more especially to the Hindu Rajputs of that region. Brahmins also are included in the term, as are Rathis and Thakurs (as Rajputs), but not Ghirths or Kanets.

According to Drew (*Jammu and Kashmir Territories*, pp. 43 et sq.) there are two lakes near Jammu, the *'Sarion Sar'* and *'Man Sar'*, and the country between them was called in Sanskrit Drigarhdesh or the country between the two hollows. This was corrupted into Dugar. Drew divides the Dogras of the Jammu hills into Brahmins, Rajputs (including the Mians and working Rajputs), Khatris, Thakars, Jats, Baniyas and Kirars (petty shopkeepers), Nais, Jiurs (carriers), Dhiyars (iron-smelters), Meghs and Dums.

JAMWAL, a Hindu Rajput clan (agricultural) found in Montgomery: and also in Sialkot where two accounts of their origin are current. According to their *mirasis* they are of Solar Rajput descent, and their ancestor Agnigar migrated from Ayodhya to the Rechna doab. His son Jammu defeated one Raja Chanda Rihas and founded the town of Jammu, whence their name, Jamwal. One of the chiefs, however, by name Milhan Minhas, took to agriculture and founded the MANHAS tribe. The other accounts is that Bham Datt migrating from Ayodhya to Kashmir, returned and settled at the place where Mankot now stands. His descendant Jammu founded an independent state of that name, and fourth in descent from him reigned Jograj, *circa* 474 Sambat. From him descended the Deo dynasty of Sialkot, whose pedigree is thus given:-



In Hosiarpur the Rajputs rank as sept of the 1st grade.

JANJUA : A Rajput tribe found, though not in large numbers, throughout the eastern Salt Range, their headquarters, in the southwest Punjab including Bahawalpur[1], in Hoshiarpur and Amritsar. The Janjua once held almost the whole of the Salt Ranges tract, but were gradually dispossessed by the Gakkhars in the north and by the Awans in the west, and they now hold only the Central and Eastern parts of the Range as tribal territory, which is exactly what they held at the time of Babar's invasion. They still occupy a social position in this tract which is second only to that of the Gakkars, and are always addressed as Raja Various origins have been ascribed to the Janjua.

According to Babar the hill of Jud was held by two tribes of common descent the Jud and Janjuha. The Janjuha were old enemies of the Gakkhars[2]. Babar records that a headman among them receives the *title of Rai* (the same purely Hindu title was used by the Khokhars and Gakkhars), while the younger brothers and sons of a Rai were styled Malik.

1. Where they are said to be a clan of the Gakkhars.
2. E.H.I. IV, pp. 232, 234-5, nearly all races of the Jud, as tribe, have disappeared.

RAJA MAL
Raja Wir
Achar
Kirpal
Chohar
Daulat
Descendants at Dalwal in Jhelum.
Raja Jodh
Sanpal
Bilawal
Amli Khan
Khakha
Descendants found in Kashmir
Tarnoli In Hazara Peshawar & the ilaqa of Pakhli in Hazro
Dabuchara
Descendants numerous in Hazara : some also found in Sialkot
Pir Kala
Descendents in ilaqa Kahro in Rawalpindi
Kias-ud-din
Taman..

Sultan Taja
Descendants in Makhyala and Villages near Jhelum.
Sultan Raja.
Dasondi
Descendants in Khanl, Tehsil Kharian
Nana Khan
Islam Kuli
Chuhar.
Descendants at Rajpur in Kharian tehsil.

According to a modern account Raja Mal Rathor, had six sons: Wiraial and Jodha whose descendants intermarry, their settlements being contiguous; while those of the other four, Khakha, Tarnoli, Dabochar and Kala, do not. Disputes between the brothers led to their dispersion and disintegration, so that the *septs* regards themselves as district tribes. Moreover many adopted various handicrafts, so that Janua *gots* are now found among the Telis, Lohars, Tarkhans and even Musallis: and the Ghumman, Ganjial, Bhakrial, Nathial, Banth, Basoya and other Jats are of Janjua descent.

The four younger *septs* are each endogamous, and it is considered discreditable to marry outside the *sept*. Widow remarriage is strictly prohibited. Their observances are the same as those of the Chibhs. The pedigree comes from the *mirasi* of the tribe is given in the earlier.

Another pedigree3 makes them descendants of Jaipal who opposed Mahmud Ghazni at Nandana 1000 years age. Babar certainly describes them as rulers, from old times, of the Salt Range hill and of the tract between Nilab and Bhera. He also describes Malik Hast Janjuha ruled according to fixed customs, not arbitrarily realizing a *shah-rukki* (2½ rupees yearly on every hand of cattle and seven *shah-rukhis* on marriage.

Mr. Thomson's account of the tribe in Jhelum, which follows, is not contributed on any material point by the present day Janjuas:-

"At some uncertain period, then, some clans of Rahtor Rajputs, emigrating from Jodhpur, occupied the uplands of the Salt Range, the leader of this movement according to the common account, was Raja Mal; but his chieftain is a little mythical, and any large action of doubtful origin is apt to be fathered upon him. The Rajputs first seated themselves at Malot in the west Salt Range. This place, although picturesque, is so inaccessible and unfruitful, that it must have been chosen for safety more than convenience. From here the Rajputs extended their supremacy over the uplands of Jhangar and Kahun and the plain country near Grijakh and Darapur. In these regions they were rather settlers than conquerors. They not only ruled, but to a great extent occupied also. It seems very doubtful whether their real territories ever extended much further, but their traditions certainly point to a former lordship over the Western upland of Vanhar, and over much of the present tehsils of Tallagang and Chakwal. If Babar's account be read with attention, it will be seen that he represent the Janjuas as confined to the hills, and ruling over various subject tribes who cultivated the plains. This account serves to explain the utter extirpation that has befallen the Janjuas in the Vanhar and elsewhere. If we conceive them as holding detached forts in the midst of a foreign population which gradually grew hostile, then this extirpation can easily be understood. This also serves, to explain how one or two villages of peasant Janjuas have escaped while all the Chiefs

3. The Janjuas themselves now reject this story, which is not in itself very plausible: they say the name of the tribe is derived from that of one of their forefathers, Janjuha, who in most of the genealogies comes eight or nine generations before Raja Mal. It is moreover improbable that the general conversion of the Janjuas took place 900 years ago; it is likely enough that Mahmud made converts, and that these reverted as soon as his back was turned: but the Janjua village pedigree tables nearly all agree in introducing Muhammadan names only abut 15 generations back. Which would point to their general conversion about the middle of the 5th century. Cracroft however noted that the Janjuas in Rawalpindi still continued to feast Brahmans, etc., at weddings.

and Rajas round about have perished. The vague accounts of the people seem to point to some such history as this, and not to any great racial or tribal war.

The Janjuas were long the predominant race in the centre and west of the district. Raja Mal is said to have reigned in the days of Mahmud of Ghazni, and his authority was probably more or less recognised from Rawalpindi to the Jhelum. When Mahmud invaded India the Janjuas opposed him, were defeated, and fled to the jungles. Mahmud followed them up, and succeeded in capturing Raja Mal himself. The Raja was released on condition that he and his tribe should embrace Islam. When this conversion took place, *the janju* or caste thread was broken, and the neophytes have been called Janjuas ever since.

Raja Mal is said to have left five sons. Three of these settled in Rawalpindi or Hazara. Two, Wir and Jodh, remained in Jhelum. They speedily divided their possessions. Wir took the Western, and Jodh the Eastern share. Choya Saidan Shah was the boundary between them. *Wir's* descendants are now represented by the Janjuas of Malot and the Kahun *ilaqa*. Their chief seat is at Dilwal. Jodh's descendants have split into many branches. A general supremacy was long exercised by the Sultans of Makhiala in Jhangar. But the chiefs of Kusak and Baghanwala soon became practically independent, as did also those of Dilur. Karangli, and Girjakh, whose descendants are now either extinct or much decayed. The plain *ilaqa* of Darapur and Chakri seems to have broken off from the main stock even earlier than the others. This passion for separatism is fatal to any large authority. The feuds to which it gave rise, joined with an endless Gakkhar war, and the establishment of new and strenuous races beyond the mountains brought the Janjua dominion to destruction. The Dhani country, called Maluki Dhan after the great Raja, and the forts in Tallagang and the Vanhar seem to have been all lost not long after the time of Babar. But in the centre and east Salt Range and round Darapur the Janjua supremacy remained undisputed until the advent of the Sikhs. And the rich Salt Mines at Khewwra and Makrach must have always made this territory important. The Sikhs conquered the whole country piecemeal. Ranjit Singh himself besieged and captured Makhiala and Kusak. Most of the influential chiefs received *jagirs* but were ousted from their old properties.

The Janjuas are physically a well-looking race. Their hands and feet in particulate are often much smaller and more finely shaped than those of their neighbours. They largely engage in military service, where they prefer the cavalry to the infantry. They are poor farmers, and bad men of business. They are careless of details, and apt to be passionate when opposed. Too often they fix their hopes on impossible objects. As landlords they are not exacting with submissive tenants. They are willing to sacrifice something to retain even, the poor parodies of feudal respect which time has not destroyed. Their manners are often good. They have a large share of vanity which is generally rather amusing than offensive. They are at the same time self-respecting, and not without a certain kind of pride, and are eminently a people with whom slight interludes of emotional government are likely to be useful.

In Hoshiarpur the Janjuas are fairly numerous to the northeast of Dasuya. The Bihals of Badla are said to be an *al or* subdivision of the Janjua which takes its name from the village of Beata in tappa Kamahi. *Bah* means a settlement, and the Janjua villages seem often to begin with *Bah*. The Janjuas in this district say they migrated from Hastinapura to Garh Makhiala in Rawalpindi or Jhelum, and thence, to escape Mohammadan oppression to Badla under Raja Sahj Pal 8th in descent from Raja

Jodh. His son Pahar Singh held 132 villages round Badla. They claim to be Ranas of the Dogars, and the head of the family is installed with the common ceremony of the *tika* under a banyan tree at Barnar or Bah Ata, though Badla (Bar-or Boharwala) also claims the honour, amidst the assembled Dogars of Mehr Bhatoli, a village near Badla, who present a horse and shawl, while the Bihals pay a *nazar* of Rs. 2/- each. They are said to give daughters only to Dadwals, who are 1st grade Rajputs, and to take them from Barangwals, Laddus, and Ghorewahas, who are in the 3rd grade.

The Badlial is another Janjua *sept*, deriving its name from Badla, the ancient Rajput *tika*. Badla is now in ruins and its *rana's* family is extinct, but the *sept* has made one of its members their *rana* and presents *nazarana,* etc., to him as usual. Still, as he has not been installed or made a *tilakdhari,*. his *ranaship* does not count for much.

JASROTIA: A Rajput clan, an offshoot of the JAMWAL. It derives its name from Jasrota and is of Jaikaria status.

JASWAL: An offshoot of the Katoch, the great Rajput clan which gave rulers to the kingdom of Trigarta. It derives its name from (or possibly gives its name to) the Jaswan Dun of Hoshiarpur, and at its original seat, Bhir Jaswan, are remains of buildings, wells and fountains which attest its former power. It will ranks high, being of *Jaikaria* status. In 1596 the Jasuwalas were described as 'Zamindars with an army' and gave some trouble to the imperial authorities.

KAHLURIA: Of Kehlur one of the Shimla Hill states a Hindu Rajput sept of the 1st grade found all over the state.

KANET : The Kanets are the yeoman peasantry of the eastern Himalayas in the Punjab, and of the hills at their base. On the west they extend as far as Bangahal and the eastern portion of the Kangra Valley, occupying the whole of Kullu[1], Mandi, Suket, the Shimla Hill States and Sirmaur. A few are also found east of the Satluj in the Jhandbari *ilaqa* of Hoshiarpur and the Kotaha Valley of Ambala is also held by them. In Kangra Proper their place is filled by the Girths. The Rajputs are, generally speaking, their overlords, but in many places especially in the Shimla Hills, they have retained their original independence and are directly subordinate to the Rajput Rajas.

The common derivation of Kanet or Kanait is from *kunit* 'indifference' or 'hostility to the Shashtras, and the Rajputs or Chhatris who did not observe them strictly are said to have been called 'Kanait'. Their laxity was mainly with regard to wedding and funeral rites and in keeping windows as wives. Others say that the word is really *kania het* or 'love for daughters' because Kanets did not kill their girl-children. The true Rajputs used to kill theirs at birth. Another suggestion is that *ait* signifies sons, just as *aik* signifies brothers and kinsmen, *e.g.,* Ramait means Ramu's sons and Ramaik his brothers and kin. Now Raja Kans of the Purans is called Kan in Pahari and his sons would be called Kanait.

The Lahulas[2], or peasantry in Lahaul, are beginning to call themselves Kanets as they become Hinduized. *See under Lahula.* The Kanets of Lahaul are said to be called Jad by the Kanets of Kullu, but that term appears to be unknown both in Lahaul and in Spiti looked upon as *dait* (a devil or *rakshasa),* he was killed and left no descendants. Others say that Krishna also called Kan in Pahari, invaded Bushahr and advanced to Shurinatpur (now Sarahan); so *his* descendants are Kanait. But neither suggestion appears tenable.

Speaking generally, the further we penetrate into the Hills the less pure is the Kanet and the lower he stands in Hindu estimation. In the Shivalik hill, in Sirmaur, below the Chur Peak, in lower Suket, Mandi, Nalagarh, Bilaspur, etc., the pure Kanets at least rank higher than those in the upper hills of Kullu, Saraj and the other Shimla States. The latter in turn look down upon the Kanets whose country stretches from the Nogri *khad* to Kinnaur, and they in turn despise the Jads of Kinnaur itself.

In Kullu Proper, i.e. in the Kullu Valley, the Kanets have three groups or grades: *Khash, Rahu* and *Niru*[3], the latter apparently confined to the Dugi-Lag *waziri* in Kullu. Sir James Lyall, however, noted only two divisions the 'Kassiya' and 'Rao.' The latter say that a Raja *of* Kullu ordered the Kanets to reform their loose practices, and conform altogether to Hinduism; those who obeyed were called *Kassiay* and those who stuck to their old ways *Raos.* It is a fact that at the present day the former are more Hindu in all their observances than the latter and the story is otherwise probable, as one can see that the foreign priests round the Rajas were always striving to make the Kullu people more orthodox Hindus, greater respecters of Brahmans and less devoted to the worship of their local divinities. The Kassiyas wear the *janeo,* and pretend to some superiority which, however is not admitted by the Raos. They intermarry and eat and drink together out of the same cooking-pots but not out of the same dish or plate. The late Mr. A. Anderson noted that the Kassiya were more common in Kullu proper and the Rao in Saraj. The Kanets of the remote Malana. Valley will be found described under RA Deo. According to Cunningham Raos are also in possession of the lower Pabbar, Rupin and Tons valleys in the Shimla Hills, but these may be the Rahus of those Hills. They give their name to the petty fief of Rawahin or Rawain.

In the Shimla Hills the groups are *Kanet, Khash, Rahu and Kuran* (? or Kuthara), the Khash ranking below the Kanet, who take their daughters in marriage; while both rank above the Rahu, who are votaries of Rahu, and the Kuran, devotees of Ketu. These two latter groups keep an eclipse as a fete-day, feasting just as it takes place. On the Shivratri too they make an ox of flour and worship it; and then the head of the family shoots it in the belly with an arrow or cuts it with a sword, and the pieces are distributed to all present, in spite of attempts of rescue the image[4].

In Sirmaur the Kanets are found throughout the State, but trans-Giri only the Khash. The latter have an offshoot called *Sharai* from *Shara,* the Muhammadan Law, because their ancestor when hard-pressed acknowledged himself the Koli of his Muhammadan oppressors. The Khash will give no daughters to the Sharai. Most of the Kanets in Sirmaur are returned as Punwar.

The relative position of the different groups can hardly be stated with precision. Thus in Kullu Proper the Khash rank higher than the Rahu, despite the saying:

Khashia, Khash bis,
Man ek, bap bis.
"To very Khashia[5] twenty Khash,
One mother, twenty fathers."

In Saraj the "Kanets are polyandrous, yet they profess to look down on the Kanets of Kullu Proper : and in the Shimla Hills the Khash are inferior to the true Kanets.

In the Kinnaur tract of Bushahr, the Kanets are called *Jads* or *Zads* and form distinct sub-caste with which the Kanets of the lower ranges do not, as a rule, intermarry or eat, though they will smoke and drink with them. They are not at all

particular about their food or drink, and will actually eat *yak-beef.*

Throughout Sirmaur and the Shimla Hills there were until quite recent times two great factions, the *Shatis* or followers of the Pandavas and the *Bashis* who were adherents of the Kauravas[3]. Social intercourse of any kind between these two groups was absolutely forbidden, but they now intermarry, and so on. In Sirmaur the adherents of the Kauravas are also called *Sathars,* those of the Pandavas Pasars. The origin of these terms is lost in obscurity.

The Kanets are, or claim to be, of impure Rajput descent, but the race is of diverse origin. In Kullu they are often classed by other Hindus as on a par with the *Rathis*[6] of Kangra, and just as the latter claim to be Rajputs, who have lost status by taking to the plough, or the offspring of Rajputs by women of Sudra rank, so the Kanets say that they are the children of women of the hills by Rajputs who came up from the plains. On the other hand, another story makes the mass of the Kullu population homogeneous and assigns both the Kanets and the Dagis to one stock. Two sons of the demi - god, Bhim Sain, Pandava, each had a son by a daughter of a Kullu *rakshasa* or demon. One of these married a Bhotanti or Tibetan woman, who fed him on yak's flesh, so that he and his children by her became Dagis. The other son was the ancestor of the Kanets.

But if the mass of the Kanets claims descent from various Rajput tribes, some, such as the *Chibhar,* from Kishtwar and Lahore, and the *Dogra,* from Jamnu, claim to be Brahmans by origin. Besides their nebulous status groups the Kanets are divided into countless septs of which only a few can be noticed here. More than 1,100 Kanet khels[7] or septs are enumerated. The *khel* is quite distinct from the *gotra* which is often, if not always, retained. The origin of some of the *khels* is quite recent and well authenticated. Thus the Sain septs is descended from Ranas of Kotkhai, Khaneti, Kumharsain and Delhat : the Maliara sprang from a cadet branch of the ruling families of Bilaspur and Nalagarh; and both, originally Rajputs by birth, have sunk to Kanet status.

In Simaur the *Jaitki khel* is so named from the village of Jaitak, but it is said to have descended from a Khatri of Samana who espoused a Kanetni.

From the Agnikula Rajputs have sprung the Agnibansi and Punwar septs; and from the Punwar the Bhaunthi, Badhar, Baler, Khanogu and Ramol *septs.*

The Tanwar or Tanur Kanets are descended from Rajputs of that clan and are found, chiefly, in Baghal, Mahlog and Kunihar.

From the Chauhans are descended the Rahani, Namola, Biphrala, Padhar, Padhan, Sadi, Chauhan, Chandal and Chandel septs, all claiming Baldeo of Delhi as their progenitor. The Badhoi Kanets, who are very numerous in the Shimla Hills, are also said to be Chauhan; they are divided into a number of sub-septs and can marry within their own sept. Other septs are:

1. Bharadwaje[7]: This *gotra* name is still in use, but it includes the Batal and Manlu (Kanet) septs and the Chanaru (Brahmans). Tradition says that once a Brahman *mawi* of Sonwal, a village in Koti, had two sons who married Kanet brides. One settled at Manla village, the other at Bhatla, and they founded the Manlu and Batal septs. Those of the family who remained Brahmans settled at Chanari, a village in Koti and are called Chanaru. 2. Kalal: A sept which takes its name from Kelo, a village in Koti, and gives its name to the Kalalthi *pargana* of that State. 3. Chauhan: A sept which occupies the upper valley of the Pabbar in Jubbal, and is numerous in

Keonthal, Sirmaur, Mandi and Suket. 4. Mangal : A sept which gives its name to the Mangal, a tract lying west of the Pabbar basin. 5. Kasib : another *gotra* name, more than half of whom are returned from Bushahr, where the Kanets are divided into numerous septs.

The Kanets of Kullu

Kanets of both sexes wear a dress which is picturesque, and not at all oriental. A red and black woollen cap, not unlike a Scotch bonnet at first sight, a grey or brown loose woollen tunic girt in, with a rope or sash at the waist, a striped or chequered blanket worn like a Scotch plaid round the chest and over the shoulders, form the dress of the men. If enough well off, they add loose woollen trousers tight round the ankle. Some of the women wear a cap like that of the men, under which their hair hangs down in long plaits lengthened out with plaits of worsted, but most of them do without a cap, and wear their hair puffed out and twisted into a high sloping chignon, not unlike the fashion once prevailing among English women. Instead of a tunic they wear a plaid or blanket fastened around them with bodkins, and so skilfully put on that while the neck and arms are bare, all the rest of the body is modestly covered to below the knee; the leg is bare or covered with a woollen gaiter: broad metal anklets are not uncommon, and set off the leg very prettily; the arms are generally overloaded with bracelets. Both sexes are generally shod with sandals made of plaited straw or hemp, but many go bare foot, and a few wear leather shoes. Both sexes, especially on festival days, are fond of wearing bunches of flowers stuck in their caps or in their hair, and strings of flowers hung round their necks. Some are hardly darker than Spaniards in complexion, with a ruddy color showing in their cheeks; others are as dark as the ordinary Punjabi [8]. They are not tall, but look strong and active, and generally have handsome figures. Many of the women have fine eyes, and a mild and gentle expression of face, but the men, on the whole, have the advantage in regularity of feature. The finest men are to be found in Saraj. The women do most of the field work, with the exception of ploughing, but in return they have more liberty than in most parts of India. They attend all the fairs and festivals (juch) held periodically at every temple in the country. At these fairs both sexes join in the singing and dancing, but the women in Kullu dance separately, and at night only. In Bushahr the Kanets of both sexes dance together. In the Lag and Parol *waziris* it is not uncommon to see many of both sexes returning from the fairs decidedly tipsy, the result of deep potations of *sur* or *lugri*, a kind of weak acid beer, generally brewed at home, from rice. In Rupi and Saraj drinking is considered a reproach, and almost universally eschewed[9]. In the winter, when confined to their houses by the snow, the men spend most of their time in weaving blankets and cloth for sale or home consumption : the women do not weave in Kullu.

Social Usages

The social usages of the Kanets are not peculiar to the caste, but are those which are followed by the other castes in the localities concerned, the upper classes of the Kanets observing the same usages as the Brahmans or Rajputs, while the lower are content to follow much the same customs as the artisan castes below them. A full account therefore of all the Kanet social usages and religious beliefs would be tantamount to a description of all the Hindu usages in vogue in the hills of Kullu, Mandi, Suket and Shimla, together with an account of all the Hindu beliefs in those hills.

On the birth of a male child in Kullu there is a feast, and a present is made to the

headman *(Negi)* of the Kothi. The child is christened some time within the year following, and is then produced in public, and there is another feast. It is a common custom in Outer Saraj to give two brothers names that rhyme. According to one informant, who ranks all Kanets as Sudras, the Khash observe the same rites at birth as the twice-born castes, while the Raos, like the low castes, simply offer a bunch of green grass (durda) to the child's father and he places it on his head, but gives no alms.

'Three kinds of marriage ceremonies are in use in Kullu, *viz.* (1) *Bedi biah* : The ordinary Hindu form; (2) *Ruti manai* : Four or five men go from the bridegroom to the bride's house, dress her up, put a cap on her head, and then bring her home to the bridegroom; (3) *Ganesh puja* : The form used by Brahmins, Khatris, Suniaras, etc., in marrying a Kanet girl. The bridegroom sends his priest and others to the bride's house where worship of Ganesh is performed, and the bride then brought home. Suniaras send a knife to represent them. The children of a Brahman and Rajput by a Kanet wife are called Brahmans and Rajputs; the term Rathi is often added as a qualification by anyone pretending himself to unmixed blood. In the absence of other children they are their father's full heirs, but in the presence of other children by a *lari* wife they would ordinarily only get an allotment by way of maintenance, put by some at one-fifth, but the limit seems rather vague in practice.

---

1. In Shimla the Niru, Nora, Niuru, Nonum Neonu and (or) Notu sept(s) are said to be old Kanets and descended from the Rajputs - of a tribe not specified-who were mawis or movannas, Brahmans and Mians or sons of Rajas who took Kanet wives. They often intermarry with the Khash or Khosh. "The Niru and Khosh do not intermarry with the Rahu and Kuran, though the two former eat food cooked by each other, and also with the Rahu and Kuran except at times of sutak and patak. In Kullu and Bushahr the Rahu and Kuran cook lit On an *angetha* or stove, while the Niru and Khosh use chulas, but this is a custom rather than a caste distinction. The Rahu and Kuran disregard the rule of juth, i.e., they can drink from the same cup. With them demise mourning ends after three days and on the 5th they kill a goat. These Kanaits can cohabit with a Kolin, if they keep her in a separate house, and any son by her will be a servant in the family but cannot claim inheritance. But a Dagi woman cannot be kept, as the Dagi is inferior in caste to the Koli. These Kanaits eat the flesh or the ewe, *bheri.* They can marry the maternal uncle's or father's sister's daughter. They are found in Kullu and Bushahr but there are very few to the south of the Nogri. The Rahu and Kuran hardly differ at all. They intermarry and eat together during *sutak* and *patak.* Rahu is said to be derived from Rahu the sun-devouring dragon, or, in Kullu proper, from *mahu,* a bee.

2. In the Shimla hills, four classes among the Kanets were said to rank higher than the rest and are known as the "Char Khundh". Their names are Bhaunthi, Parhiar, Chhippar, Balhir. Other subdivisions in those hills are: - Kohal, Gahtu, Baruri, Chakar, Katlehru, Suraji, Khash, Badni, Charola, Badalwal, Jalanu, Rohal, Katalik, Pirwal, Janwal, Dolal, Rohana, Kulhamun, Noru, Laddogarh. But a large number of *khels* are now given as superior to the rest of the Kanets.

3. Said to mean "female" (? Khas). The word Khasha in Sanskrit is said to have meant the country inhabited by the fourth class of the Hindus (? Sudras). It extended from Kumaun to the Shimla Hills.

4. The Bashis kept the Shivratri on the 14th, the Shatis on the 15th of *Phalgun.*

5. The Kanets rank well above the Ghirths in the hypergamy scale, for whereas a Ghirthni becomes a queen in the 7th generation a Kanetni may aspire to that honour in the 5th, which places the Kanets just below the Rathis.

6. The word *khel* is pronounced like *kher,* with the hard I, in the Shimla Hills. It may, however be identical with the Pashtu Khel.

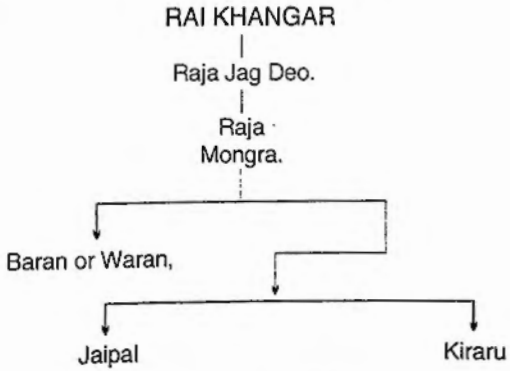
7. The occurrence of this *gotra* name among the Gaddis and Ghirths also will be noted.

8. With the exception of a few families, descendants of the Rajas' priests or purohits, the Kullu Brahmins differ very little in appearance, dress or customs from the Kanets. The same may be said of nearly all of the few Rajputs. The blood is in fact generally very mixed, for both Branmins and Rajputs commonly marry Kanet girls : such wives are known as *srit* in distinction from the *lari,* or wife of the same caste taken by the regular *biah* ceremony : Lyall's Kangra Settlement Report, – 114. The text is from – 112

9. In Rupi a mildly intoxicating, but very refreshing, infusion of bhemp-leaves *(bhang),* violets and sugar is occasionally indulged in at fairs. In the other *waziris* of Kullu Proper, toward, the sources of the Beas, there is much drunkenness. The hill-beer is of two kinds *lugri* and *chakti* and *sur.* The former is made from rice, fermented with *phap,* a kind of yeast which is imported from Ladakh or Baltistan, and the composition of which is a trade secret of the brewers, who are nearly all Ladakhis or Lahulis, and thus able to keep the roadside public-houses and the drinking-tents at fairs in their own hands. Four measures of rice are mixed with 4 equal measures of *phap,* and to the mixture is added the same bulk of water, the whold sufficing to fill a large earthen ware vessel in which it is allowed to remain for 4 days: the liquor is then strained off, and will keep good for 8 days; it is acid and sickening, and an acquired taste is necessary for its appreciation. Sur is the "table beer" of the country, brewed by the people in their homes, and is made in the same way as *chakti,* but with kodra millet instead of rice and a ferment called dhili, instead of *phap. Dhili* is a mixture of satu and various herbs kneaded into a cake without any admixture of water, and kept warm below a layer of barley straw for 20 days or so, when it begins to smell, it is then dried, and is ready for use.

KATOCH : The generic name of the dynasty whose original capital was at Jullundur but whose territories were subsequently restricted to the Kangra hills. The Kingdom whose capital was at Jullundur (Jalandhara) was called Trigarta, but the name of its dynasty does not appear to be recorded, and the name Katoch is confined to the house of Kangra. From it sprang four or five branches, *the Jaswals* or rulers of the Jaswan Dun in Hoshiarpur, *the Guleria,* once rulers of Guler or Haripur in Kangra, *the Sibaia or Sipaia* of Siba in Kangra and *the Dadwals* of Datarpur on the borders of Kangra in Hoshiarpur. A fifth brah which claim Katoch descent is the Luddu Rajput sept. The Katoch are by status *Jaikaria Rajputs* of the 1st grade. The Guleria represent the elder line and from it sprang the Siba and Dadwal, the Jaswal being an offshoot of the main branch.

KATWAL, A Dogar clan (agricultural) found in Amritsar *see Dogar.*



KANGAR, KIN GAR- The Kangar is a travelling hawker, but he confines his traffic to small articles of earthenware such as pipe-bowls, and especially to those earthen images in which native children delight. These he makes himself and hawks about for sale. But Baden-Powell gives at p. 267 of his Punjab Manufactures a long account of an operation for a new nose said to be successfully performed by the Kangars of Kangra. According to Mr. H. L. Williams the Kingar are also called Ale Bhole and are Muhammadans, often suspected of petty pilfering from threshing-floors and hen-roosts, a primitive race whose conditions of life resemble the Kuchband.

KHACHI : A Rajput clan (agricultural) found in Multan. In Himachal Pradesh Khachi caste is found in district Shimla and adjoining areas.

NARWAL : A Jat tribe a *got* found chiefly in tehsil Sangrur in Punjab. It derives its name fancifully from *narwal* lit beating because its progenitor used to take such care of grass growing in waste land that he used to beat the dust out of it. The word is also used to mean 'Cleaning Fields'.

PUNWAR (Parmara) : A Rajput tribe of the Western Plains. The Punwar or Pramara was once the most important of all the *Agnikula Rajputs.* "The word is the Pramara's" is an ancient saying denoting their extensive sway; and the *Nau kot Marusthali,* extending along and below the Satluj from the Indus almost to the Yamuna, signified the *maru asthal* or arid territory occupied by them, and nine divisions of which it consisted. But many centuries have passed since they were driven from their possessions, and in 1826 they held an independent sway only the small State of Dhat in the desert. The Punwar are found in considerable numbers up the whole course of the Satluj and along the lower Indus, though in the Derajat and in the Multan division many of them rank as Jats. They have also spread up the Beas into Jullundur, Gurdaspur and Sialkot. There is also a very large colony of them in Rohtak and Hissar and on the confines of those districts; indeed they once held the whole of the Rohtak, Dadri, and Gohana country, and their quarrels with the Jatu Tanwar of Hissar have been noticed under Jatu. A few Punwar are also found in the Pabbi in Jhelum.

According to local tradition in Rohtak the Punwars immigrated from Jilopattan or Daranagri and intermarried with the Chauhans who gave them lands round Rohtak and Kalanur. In Sialkot they say that Raja Vikramajit was a Punwar and divide themselves into four branches: *Bhautial* from Bhota, *Mandila* from Mandial, *Saroli* from Sirali and *Pinjauria,* from Pinjaur[1] all names of places.

In Bahawalpur the Punwars have the following 15 septs:

(i) Dhandu: mostly goat-herds who live by selling milk. A few hold land.

(ii) Gachchal.

1. This cannot well be the Pinjaur near Kalka. All four places appear to lie in Sialkot.

(iii) Pahna-Rue : a small sept.

(iv) Ran: a small sept, mostly agriculturists, but in Ahmadpur East washermen.

(v), (vi), & (vii) Jaipal, Kirara and Waran.

The Jaipals and Kirarus originally came from Marwar, but the Waran had their home at Dhara-nagri.

(viii) Wasir : a small sept.

(ix) Tangra : also a small sept; some are tenants and others are proprietors.

(x) Satthus : tenants and cattle-breeders.

(xi) Butt: chiefly found in Ahmadpur, but there are also a few in Khairpur *peshkari*. They refuse to give daughters outside the sept and usually intermarry.

(xii) Lakk : chiefly found in the *peshkari* of Khairpur East.

(xiii) Labana : the Muhammadan Labanas claim to be Punwars from Delhi.

(xiv) Parhar, divided into three sub-septs, (i) Dangar, (ii) Nachna, and (iii) Mahpa. A branch of the Parhars, called Burama, lives in the Rohi and tends camels.

(xv) Dhuddi : a widely spread clan found both in the Lamma and Ubha and comprising several septs of which the principal are :-

(i) Kadar (ii) Chanan. (iii) Pannan.
(iv) Katari. (v) Chanan *pakhiwar*. (vi) Wake.

To these may be added the Buhars, who are akin to the Parhars, and the Dahas who are *dohtas* or *daughters'* sons of the latter. Daha, a *faqir*, having married the daughter of a Parhar Rajput and founded this sept.

SIBAIA : An offshoot of the Katoch, the great Rajput clan of Kangra. It derives its name from Siba (Dada-Siba) or Sivia in Dehra tehsil or possibly from Raja Saparan Chand who became a Raja from generations after Raja Hari Chand and founded Haripur. Saparan Chand (Sibaram Chand) founded Siba which may be termed after him.

TIBETAN- The only true Tibetans found in the Punjab are the people of Spiti. They speak a dialect of Western Tibetan or Bhoti, as it is vaguely termed by the hill people who speak the Pahari dialects of Punjab.

In Spiti a Tibetan's individuality is not fixed by his and his father's names because he has two, and often three recognised fathers. It is fixed by (1) his personal name, (2) by his house name, (3) by his clan name. This last is the name of the *phas-pun ship* (father-brother ship) to which he belongs each *phas-pun* is exogamous, a custom noticed by the most ancient Chinese authors who describe the Tibetans, and ever *phas-pun* has to look after the cremation of its dead and in every village it usually erects a *(m) chodrten or mani* walls to their memory, its name being inscribed on the votive tablet of the monument. The names of their clans are (like the *als* among the Brahmans, Rajputs etc., of the Himalayas) often local. Thus the names of the *phas-pun* of Khalatu indicate that the greater part of the population of the village came from Gilgit.

In Spiti the *phas-pun* is called *ru(s) pa* or bones, as Sir J.B. Lyall said, but he was wrong in writing that the same *ru(s) pa* are to be found in all the village of spiti. Some of them are scattered about in a number of village, but quite new names will also be found. Of the names given by Lyall the following are certainly Tibetan: (1) Gyazhingpa 'large field,' (2) Khyungpo *'garuda* men', a very common name in the pre-Buddhist period-, (3) Lonchenpa, 'great ministers' and (4) Nyegspa, a word found in the earliest Tibetan records. The two other names appear to be non-Tibetan, Hesir being doubtless the Hensi caste found in Kullu.

Village life in Spiti

The Spiti men buy old cattle from the Lahulis, and slaughter them in the autumn to furnish the 'larder for the six months of winter. Parched barley-flour made into porridge is the everyday food in Spiti. It is also eaten boiled with butter and green herbs into a kind of soup.

The houses in Spiti as in Lahaul are very different in appearance from those of Kullu and Kangra. They are two or sometimes three storeys high, with flat roofs; the lower' storey is occupied by the cattle, horses, and sheep and goats, the upper one contains the room lived in by the family. In Spiti these rooms are commonly three in number, and surround on three sides an open court, one of them is the family chapel, which is ordinarily very well furnished with images, large prayer cylinders, religious pictures, books, and sacramental vessels, the others are good sized room lighted by small windows hung with wooden shutters, the largest is about 20 feet square, and has a roof supported by a double row of upright posts. At the comers of the house are flagstaffs consisting of poles, from which hang black yak's tails. The walls are white washed inside and out, and neatly topped with a coping faggots.

The furniture in a Spiti house has a general resemblance to that in a Lahaul one, but tubs and pails, the wood work of which comes from Bushahr, are much used, and the churn for beating up the tea with salt and butter is never missing.

In Spiti polyandry is not recognised, as only the elder brother marries and the younger ones become monks, but there is not the least aversion to the idea of two brothers cohabiting with the same woman, and it often happens in an unrecognised way, particularly among the landless classes, who send no sons into the monasteries. Sir James Lyall was informed that, when the bridegroom's party goes to bring the bride from her father's house, they are met by a party of the bride's friends and relations who stop the path, whereupon a sham fight of a very rough description ensues, in which the bridegroom and his friends, before they are allowed to pass, are well drubbed with good thick switches. If a man wishes to divorce his Wife without her consent, he must give her all she brought with her, and a field or two besides by way of maintenance. On the other hand; if a wife insists on leaving her husband, she cannot be prevented from doing so, but, if no fault on the husband's side is proved, he can retain her jewels, and he can do so also if she elopes with another man, and in addition

can recover something from the corespondent by way of fine and damages. There is a recognised ceremony of divorce which is sometimes used when both parties consent. Husband and wife hold the ends of a thread, repeating meanwhile :- *"One father and mother gave, another father and mother took away: as it was not our fate to agree, we separate with mutual good will,"* the thread is then severed by applying a light to the middle. After divorce a woman is at liberty to marry whom she pleases. If her parents are wealthy, they celebrate the second marriage much like the first, but with less expense; if they are Poor, a very ordinary ceremony is used.

Corpses are ordinarily burnt, and the ashes thrown into a river, or made into a figure of the deceased and deposited into a *chorten* or pyramidical cenotaph in the case of great men. Burning is apparently the only practice in Lahaul, but in Spiti the dead are said to be sometimes exposed on the hills to be eaten by wild beasts, or cut into small pieces and thrown to dogs and birds, according to the custom of Great Tibet, where these beneficent methods of disposing of the body are philosophically preferred as most likely to be pleasing to the heavenly powers. In the public rooms of some of the Spiti monasteries you are shown masonry pillars which contain the bodies of deceased abbots, buried there in full canonicals in a sitting posture.

In Spiti the ordinary dress of the men consists of a skull cap, a long loose or frock or coat of thick woollen cloth girt in at the waist by a long and broad sash, and a pair of boots with leathern soles and cloth tops reaching to and gathered below the knee. Some who can afford it wear also a silk or cotton undercoat, the coat is generally the natural color of the wool, the other articles are red; or red and black. Every man wears a loose necklace of rough lumps of turquoise, amber, and other stones mixed with coral beads. A bright iron pipe and a knife in sheath are stuck in his belt, from which hang also by steel chains his *chakmak* or flint and steel and tinder box, a metal spoon, and a bunch of the most fantastically-shaped keys. In the fold of his coat next the skin he carries a wooden or metal drinking-cup, a tobacco-pouch, some parched barley-meal; and other odds and ends. Many wear their hair plaited into a tail like Chinamen. If of a serious tone-a professing Buddhist (to adopt a phrase used among some Christians-he will never go out without a prayer-wheel in one hand, and a religious book or two slung on his back, and repeats the *Om mani* at every pause in the conversation.

The monks, when not engaged in religious functions, go bareheaded, and wear a rosary of beads instead of a necklace: the cut of their coat and boots is the same, but the cloth is dyed either red or yellow. Astrologers dress in red from head to foot, the women wear a coat, sash, and boots like the men, but the coat is, he thought, always of a dark color, they also wear loose red trousers, the ends of which are tucked into the book, and a shawl over their shoulders, they go bareheaded, and wear their hair in a number of small plaits which hang down the back. On the top of their heads the married women wear a *pirak* or silver ornament from which depend strings of beads on both sides of

their faces, and long tails of leather studded with coarse turquoises. The girls wear only a single turquoise threaded on the hair near the parting: this, like the snood in Scotland, is a sign of their being unmarried. In winter both sexes wear greatcoats made of sheepskin with the wool on.

The great mass of the arable land consists of the holdings of the *talfas* or revenue-payers, which are each separate estates of the nature of household allotments. Within these estates the following occupants may be found:

Firstly, in each there is the *kang chimpa* (great house) or head of the family, who is primarily responsible for the revenue, the *begar* or forced labour, and the share of common expenses demandable on the whole holding. He is the eldest son, for primogeniture prevails, but it does not follow that his father must be dead, for by custom of the country the father retires from the headship of the family when his eldest son is of full age and has taken unto himself a wife. There are cases in which father and son agree to live on together in one house, but they are very rare. On each estate there is a kind of dower house with a plot of land attached, to which the father in these cases retires. When installed there, he is called the *kang chungpa* (small houseman). The amount of land attached differs on different estates, different estates where it is big, the *kang chungpa* pays a sum of cash, or cash and grain, about equal to its retable assessment, but where it is small, as is usually the case he pays a small cash fee only, which is really rather a hearth-tax than a share of the land revenue, to which, however, it is credited in collection.

The *kang chungpa* is not liable for any share of common expenses (a heavy charge in Spiti) nor for performance of *begar* or forced labour. On occasions of a great demand for men to do some work near the village he may be impressed, but the principle is that he is free. Sometimes, in the absence of a living father, the widowed mother, or the grandfather, or an uncle, aunt, or unmarried sister, occupies the small house and land on the same terms.

A yang chungpa is the term used to describe a person living on an estate in a separate house of lower degree than that of the *kang chungpa.* Such a person is always some relation of the head of the family, he may be the grandfather who has been pushed out of the small house by the retirement of his own son, the father, but it is commoner to find unmarried sisters, aunts, or their illegitimate offspring in this position. A small plot of land is generally attached to the house, and a few annas of revenue are paid, but rather as a hearth-tax on account of grass, wood water etc., than as the share of the land-tax on the plot held. In proof of this some *yang changpas* have no land attached to the house, but pay like the others, Most of these people would be entitled to some maintenance from the head of the family if he did not give them a plot of land. They are not liable to be impressed for ordinary *begar,* but most help on occasions of great demand near home. They often do distant *beggar,* however, in place of the head of the family by mutual agreement. On many holdings another class of people are found living in a dependent position towards the *kang chimpa* or head of the family. They have a small house to themselves,

with or without a patch of land attached, generally they pay' an anna or two to revenue, whether they hold land or not. In fact in this respect, and with regard to liability to *begar,* they are much on the same footing as the *yang chungpa,* the fundamental difference is that they are not related to the head of the family, land have got their house or house and land, not with reference to any claim to maintenance, but out of the favour, or for the mutual benefit of both parties. They are, therefore, expected to do a great deal of field work for him. People of this class are called *dotul,* literally smoke-makers, because they have a hearth to themselves, but no other interest in the land. To mark the fact that they hold of one particular landholder, the word *ranki,* meaning private or particular, is added.

All land held by the *kang chungpas* and by *yang chung pas* and *ranki, dotusl,* pertains to the holding or allotment, cannot be alienated, and lapses to the *kang chimpa.* The latter could not of course evict a *kang chungpa,* and the general feeling is that 'When he has given a plot to a *yang chungpa,* he could not resume it, except with consent, but he could resume from a *ranki dotul,* and would be considered quite justified in doing so on the grounds of customary service not having been properly performed. The constitution of the Spiti family has justly been described as a system of *primogeniture* whereby the eldest son succeeds in the lifetime of his father. In the case of the little plots held by people of the *dotul* class, father and son live on together, as the land is too small to be divided, and there are no responsibilities which father could transfer with the land to the son. In the same way two or more brothers of this class live on together, often with a wife in common, till one or other, generally the weakest, is forced out to find a subsistence elsewhere. Working for food or wages, and not the plot of land, is the chief source of subsistence to these people.

APPENDIX–1

The Himalayan Rivers & Their Place of Origin

River	Place of Origin	River	Place of Origin
Aglar River	Nag Tibba	Chamke Chu	Bhutal Himalayas
Alaknanda River	Badrinath	Chandrapuri Gad	Garhwal Hills
Amo Chhu River	Bhutan Himalayas	Chang Celmo	Lanak La Pass
Amrit Ganga River	Garhwal Hills	Chapursain	Karakoram range
Andhi Khola River	Annuaparna Massif	Chauka River	Nepal Hills
Andra River	Chiragaon Hills	Chaval Chhu River	Main Himalayan Range
Aru River	Aru glacier (J&K)		
Arun River	Eastern Nepal	Chepa Khola	Himalchuli peak
Asan Roa River	Mussorie Ridge	Chipshap	North-East Ladakh
Ashni River	North-East of Shimla	Chonbag Gad	Garhwal Hills
Astor River	Burzil Pass	Chus River	Ladakh Hills
Awa River	Dhauladhar Range	Dabka River	Uttrakhand Hills
Babai River	Western Nepal	Darondia Khola	Himalayan Hills
Bagdari Gad River	Garhwal Hills	Dhansiti River	Lower Himalays
Bagmati River	Kathmandu Valley	Dhaoli Ganga	Kumaun-Tabet range
Balkhila River	Mandal Valley	Dhauliganga	Niti Pass
Baira River	Pir Panjal Range	Dhawalganga	Garhwal Hills
Bankund River	Bankund glacier	Dihang River	Arunachal Pradesh
Baner River	Dhauladhar Range	Dikrang River	Arunachal Pradesh
Banganga River	Dhauladhar range	Diuri River	Eastern Bhutan
Barma Gad River	Gharwal Hills	Dras River	Himalayan range
Baroda Gad River	Shastru Tal	Dudhganga	Kalapani Glacier
Barun River	Eastern Nepal	Dudh Kosi River	Everest massif glacier
Baspa River	Baspa Hills (H.P.)	Dur Chu	Bhutan Hills
Bata River	Nahan Range	Gaira Gad	Garhwal Hills
Bhagirathi River	Chaukhamba Peak	Gaj River	Dhauldhar, Kangra
Bhadal River	Pir-Panjal Range	Galiwan River	Himalayas
Bhakra River	Uttaranchal Hills	Gandak River	Manang Bhot
Bhandal River	Mussoorie Ridge	Ganesh Ganga	Gharwal Hills
Bheri River	Dhualagiri Massif	Ganga River	Gangotri Glacier
Bhilangana River	Khatline Glacier	Gemri River	U.khand Himlayas
Bhoga River	Shivalik of Jammu	Ghagra River	Himalayan Range Near
Bhola Kosi River	Cho Oyu Glacier		
Bhyundar River	Garhwal Hills	Ghengar	Garhwal Hills
Bichom River	Arunachal Himalayas	Ghizar River	Main Himalayan Range
Bindal River	Mussoorie Ridge	Ghujerab River	Karakoram Range
Brahmputra	Kailash Range	Gilgit River	North-West Himalayas
Bumthang Chu	Bhutan Himalayas	Giri River	Nag Tibba
Burhi Gandaki	Southern Tibet	Girthi River	Kungribingri Peak
Chaki River	Dhauladhar Range	Gola River	Lower Kumaon

River	Place of Origin	River	Place of Origin
Goriganga	Himalayas Unta Dhura, Uttrakhand	Lachung River	Northern Sikkim
Gurtang River	Ladakh Range	Ladhiya River	Kumaon Hills
Ha Chu River	Central Himalayas Bhutan	Lastar Gad River	Garhwal Hills
Hanle River	Zanskar Range	Lhonak River	Northern Sikkim
Hom Gadhera	Barmal Peak	Liddar River	Chandanwari Glacier
Hughe River	Gasherbrum Glacier	Lipa River	Spiti Valley

17. Shri Ajay Sharma	Limca Book Record Holder	1997

Note: After 1991, Youth awards were given only in 1998.

APPENDIX–5

Gallantry Award Winners From Himachal

Victoria Cross

About the middle of the 19th century the custom of rewarding individual acts of extraordinary gallantry came into vogue in Britain.The Victoria Cross, the most coveted of all decorations, was instituted in 1856 to honour the gallant acts of British soldiery in the Crimean War. From Himachal Pradesh, we had only two Victoria Cross winners.

1. **Late SH, Jamedar Lala Ram (VC),** Village Dera Parol Teh., Bhoranj, (1914-18 Ist World War) Distt, Hamirpur
2. JC- 2209 Subedar Major (Hon. Captain) Bhandari Ram (VC) (1939-45 IInd World War) Tehsil. Ghumarwin, Distt. Bilaspur

Param Veer Chakra

British rule over India came to an end on 14 August 1947 and with it also ended the old institution of British honours and awards. The new Indian awards could come into being only with the dawn of the Republic on 26 January 1950. But on the basis of proposals already submitted by early May 1948, the new awards, known as Param Vir Chakra, Maha Vir Chakra and Vir Chakra, were finally selected in June 1948.

Thus on becoming a Republic, decorations and medals were introduced to honour the deeds of gallantry and valor by members of Indian defence force. Gradually, with the passage of time the range of awards kept on expanding. A complete break with the past was, however, not possible because members of the Indian armed forces still held British honours and awards thus substituted the British decorations and medals, which could no longer be granted to Indians. A perusal of the British and Indian awards will show that the Param Vir Chakra to the Victoria Cross, the Maha Vir Chakra to the Indian Order of Merit and the Vir Chakra is equivalent to the Military Cross. The other group of awards i.e. the Ashoka Chakra series, meant for gallantry other than in the face of the enemy, was probably meant to replace the George Cross, Albert Medal and George Medal.

The first batch of decorations introduced on 26 January 1950 was thus made effective with retrospective effect from 15 August 1947. The Vir Chakra and Ashoka Chakra series became important institutions of this batch. The second installment came in March 1953 in the form of the Meritorious Service Medal and Long Service and Good Conduct Medal, Territorial Army Decoration and territorial Army Medal. Then followed the highest award of the land-the Bharat Ratna-and Padma series in 1954. On 26 January 1960, some more medals were instituted and these included the Vishisht Seva Medal (in the classes), Sainya Seva Medal, Videsh Seva Medal and Sena, Nao Sena and Vayu Sena Medals. As a result of the Indo-Pak conflict of 1965, the Raksha Medal, Samar Seva Star and some others were introduced. Then came the 1971 war and it led to the institution of the Sangram Medal, Poorvi Star and Paschimi Star.

1. Major Som Nath Sharma (Posthumously) Dadh, Kangra — 4 Kumaon Regiment- 03.11.1947

2.	Major Dhan Singh Thapa, Shimla	Gorkha Rifles	02.10.1962
3.	Capt. Vikram Batra. Distt. Kangra Kargil Conflict (Posthumoulsy)		1999
4.	Sanjay Kumar Rifleman Distt. Kargil Conflict Distt. Bilaspur		1999

Mahaveer Chakra

1.For acts of gallantry in the presence of the enemy on land, at sea or in the air. The decoration may be awarded posthumously.

2. If any recipient of the Chakra shall again perform such an act of bravery as would have made him or her eligible to receive the Chakra, such further act of bravery shall be recorded by a Bar to be attached to the riband by which the Chakra is suspended, and for every such additional act of bravery, an additional bar shall be added, and any such bar or bars may also be awarded posthumously. For every bar awarded a replica of the Chakra in miniature shall be added to the riband when worn alone.

APPENDIX – 15

Director Himachal Pradesh Institute of Public Administration (HIPA)

The Himachal Pradesh Institute of Public Administration, popularly known as HIPA, was established on January 1, 1974 at FAIRLAWNS a place about 12 kms. from SHIMLA on the Mashobara road. The Institute is located in a building with a historical past. The building having serene and picturesque surroundings with well laid out spacious and luxuriant lawns was originally got constructed by Mr. R. Dixon of the foreign office of British India. Later, it was purchased by Nawab Muzaffar Ali Khan Quizzalbash of Malerkotla. On his migration to Pakistan in 1947 the property came to the Government of Punjab State, which converted it into a Circuit House. At the time of re-organization of States in November, 1966 the property was transferred to Himachal Pradesh government, which subsequently selected it for setting up the Institute.

Over time, this Institute, which virtually began from a scratch, has bloomed into a full-fledged training institution having all the facilities that an Institute of this nature is expected to have.

S. No.	Name	Duration
1.	Mr. B.K. Sharma	10.12.1973 to 25. 03.1974
2.	Mr. C.M. Chaturvedi	26.03.1974 to 10.06.1974

APPENDIX – 16

Chairman and Members Himachal Pradesh Administrative Tribunal

The following have been Chairman and members of Himachal Pradesh Administrative Tribunal.

Chairman:

S.No.	Name	Period
1.	Mr. Justice Hira Singh Thakur (Chairman)	01.09.1986 to 09.08.1989
2.	Mr. Justice Roop Singh Thakur (Chairman)	09.08.1989 to 26.03.1992
3.	Mr. M.G. Chitkara (Vice Chairman)	26.03.1992 to 13.10.1995
4.	Justice D.P. Sood (Chairman)	14.10.1995 to 30.03.1998
5.	Mr. Attar Singh (Vice Chairman)	01.08.1998 to 16.11.1998
6.	Justice A.L. Vaidya (Chairman)	28.05.1999 to 03.10.2001
7.	Mr. Attar Singh (V.C.) (Acting)	04.10.2001 to 03.03.2002
8.	Mr. Narendra Thakur (V.C.)	09.09.2002 to 29.05.2005
9.	Mrs. Bakhsish Kaur (Chairman)	31.05.2004 to 03.10.2005
10.	Mr. Justice M.R. Verma	04.10.2005 to 08.07.2008
11.	Mr. Justice V.K Sharma	28.02.2015 to Continue

The Government of India cancelled the notification DATED August 26, 1986, vide which the tribunal was established. As per an official press note, the notification comes into force with effect from July 8, 2008. The tribunal has been scrapped even though the BJP had in its election manifesto (point 3.19) promised to set up a permanent Bench of the tribunal at Dharamsala and Mandi. The tribunal had been holding a circuit Bench at these two places. The Congress government after coming to power in 2012, restored the administrative tribunal on dated 7th September 2013.

Members:

1.	Mr. I.K Suri	01.09.1986 to 26.12.1989
2.	Mr. L.C. Gupta	13.02.1989 to 19.09.1992
3.	Mr. Sunder Prakash	13.02.1989 to 23.04. 1990
4.	Mr. M.G. Chitkara (as Member)	23.03. 1991 to 25.03.1992
5.	Mr. S.M. Kanwar	16.02.1996 to 08.07.1999
6.	Mr. Hari Singh	22.03.1991 to 04.11.1995
7.	Mr. Attar Singh	24. 06.1991 to 30.07.1994
8.	Mr. Narender Thakur	18.07.1997 to 18.07.2002
9.	Mr. V.K. Bhatnagar	16.09.1999 to 25.11.2003
10.	Mr. D.S. Amisht	24.12.2003 to 08.07.2008
11.	Mr. S.S. Negi	09.01 2004 to 08.07.2008
12.	Mr. D.K Sharma (secretary law)	17.08.2015 to continue
13.	Mr. Prem Kumar	17.08.2015 to continue
14.	Ms. Harinder Hira	17.08.2015 to continue

2.	Bilaspur	1. Bilaspur, 2. Goalthai
3.	Hamirpur	1. Hamirpur, 2. Nadaun
4.	Chamba	1. Sultanpur, 2. Hatli, 3. Parel 4. Holi, 5. Garnota
5.	Kangra	1. Nagrota Bagwan 2. Nagri, 3. Dhaliara, 4. Sansarpur Terrace, 5. Dehra, 6. Badal, 7. Bain Attarian, 8. Kangra, 9. Raja ka Bag 10. Nargala Jawali.
6.	Una	1. Mehatpur, 2. Gagret, 3. Tahliwala, 4. Amb, 5. Jeetpur Bhedi, 6. Basal.
7.	Kinnaur	1.Reckong-Peo
8.	Kullu	1. Shamshi
9.	Sirmaur	1. Paonta, 2. Kala-Amb, 3. Dhaula-Kuan
10.	Shimla	1. Shoghi, 2. Chirgaon, 3. Mehdali, 4. Jais, 5. Raighat, 6. Pandranu. 7. Jubbarhatti, 8. Sundda Bhaunda.
11.	Mandi	1. Mandi, 2. Ratti, 3. Pali, 4. Saigloo 5. Bhambla
12.	Lahaul & Spiti—	1. Keylong

APPENDIX – 18

Distance of important places of Himachal Pradesh from District Headquarters–

Distt./Distt. Headqts.	Name of Place	Distance
1. Bilaspur (Bilaspur)	1. Sri Naina Deviji	76
	2. Talaic	64
	3. Ladraur	52
	4. Bhakra	80
	5. Nouni	8
	6. Brahmpukhar	16
	7. Namhol	24
	8. Ghagas	12
	9. Kandraur	22
	10. Ghumarwin	32
	11. Kuthera	42
	12. Bharari	46
	13. Berthin	46
	14. Jandutha	42
	15. Geharwin	42
	16. Swar Ghat	42
	17. Markanda Via Ghat	22
2. Chamba (Chamba)	1. Bharmaur	64
	2. Mani Mahesh Lake	64
	3. Chhatrari	36
	4. Mehla	14
	5. Saho	20
	6. Salooni	48
	7. Bhandhal	68
	8. Tissa	72
	9. Pangi	98
	10. Khajiar	27
	11. Kalatop	37
	12. Dalhousie	56
	13. Kundi	24
3. Hamirpur (Hamirpur)	1. Nadaun	28
	2. Sujanpur Tira	26
	3. Deot Sidh	46
	4. Bhoranj	25
	5. Bijhhari	34
	6. Awah-Devi	24
	7. Barsar	36
	8. Bhota	15

The Tribune (Daily News Paper) Published from Chandigarh (1996-2014)
Amar Ujala (Daily News Paper) Published from Chandigarh (2010-2014)
Divya Himachal (Daily News Paper) Published Mattaur (2001-2014)

We regard Himalayas as an abode of God Shiva and hence is regarded very sacred. Ancient Hindu scripture, Rig Veda, has referred to Himalaya as a deity. It is believed that a sage through meditation saw the image of Himalaya shapes in the stomach of Lord Krishna, the eighth incarnation of Lord Vishnu. Shiva Vedathas also inscribed Himalaya as the centre of the earth.

The book wonderland Himachal Pradesh is an effort to explore this part of the Himalayas, to understand its history, geography, culture and the life style of its inhabitants.
